## The Best Book of Reference in the World.

*THE TIMES* says:—"Haydn's Dictionary of Dates is the most universal book of reference in a moderate compass that we know of in the English Language."

*Medium 8vo, Cloth, 21s.; Half-Calf, 25s.; Full or Tree-Calf, 31s. 6d.*

# HAYDN'S DICTIONARY OF DATES AND UNIVERSAL INFORMATION.

**23<sup>rd</sup>  
Edition.**

A Complete Record of all Nations and Times,  
containing the History of the World to  
the Beginning of 1904.

**Brought up  
to the  
Beginning of  
1904.**

For more than Half a Century HAYDN'S DICTIONARY OF DATES has been firmly established in the public favour as A WORK WHICH HAS NO RIVAL, and as a work which is indispensable in every office or place of business, every library, and every home.

### INDISPENSABLE . . .

To every Editor, Journalist, Schoolmaster, Barrister, Solicitor, Business Man, Author, Clergyman or Minister, M.P., County or Town Councillor, Magistrate, Librarian, Mayor of a City, Town, "Boro," Insurance Agent, Banker, Urban or District Councillor, Stockbroker, etc., etc., etc.

# HAYDN'S DICTIONARY OF DATES

IS WHAT IT CLAIMS TO BE,

. . . **A Complete Record** . . .

Of all the events, Ancient, Mediæval, and Modern, which have taken place in the world from the earliest times right up to the autumn of last year. It is Accurate, Comprehensive, and Exhaustive, and is easy of Reference, that the required information can be found at a Moment's Notice.

The secret of its wonderful exhaustiveness and accuracy is due to the fact that

**THE WORK OF COMPILATION AND CORRECTION IS  
DONE DAY BY DAY.**

Every day since the issue of the last edition the newspapers and publications of importance have been thoroughly examined, and every item which in any way adds to the usefulness of the work has been duly added. This entails great editorial expense of time, and necessitates another huge expense, inasmuch as it renders it necessary that

**THE ENTIRE WORK BE KEPT STANDING IN TYPE.**

WARD, LOCK & CO., LIMITED, SALISBURY SQUARE, LONDON, E.C.

# Cassell's Unrivalled Dictionaries AND CYCLOPÆDIAS.

*THE TIMES* says:

"HAZELL'S ANNUAL DIFFERS FROM ALL OTHER  
 BOOKS IN ITS DESIGN. A most useful and trust-  
 worthy work."

# Vernon's Vertical System.

(THE COMING SYSTEM.)

*Times*.—"By this System the most complex body of documents can be arranged with admirable simplicity."

## THE SIMPLEST OF ALL SYSTEMS.

Papers arranged in a moment alphabetically, or classified under any desired headings—in Boxes, Cabinets, Writing Tables, etc., from 500 to 500,000 Letters.

*The Bishop of Bristol*.—"The convenience of the Writing Table is beyond words. There is never anxiety as to where a letter is; and the drawer with Cards for notes of Reference, Speeches, Sermons, etc., makes me perpetually regret that I had not such a thing twenty years ago."

## THE CERES CARD SYSTEM.

Cards are used for Library Catalogues, and by Charitable Organisations for Lists of Applicants for Relief, indexing Case Papers, etc.; or by Societies, Hospitals, Institutions, Clubs, etc., for Subscription Registers, records of stock and all kinds of lists of persons and things, in place of cumbersome alphabetical or classified books, which mean ever recurring labour and expense for re-arrangement and re-writing into new books. (See Explanatory Pamphlet.)

*N.B.*—Letters can be "posted" into the empty end of the File, and afterwards sorted.

## The Ceres Writing Copier.

(PATENT PROVL.)

Perfection at Last.

PRESS-  
COPYING  
AT  
AN END.

Not Messy.

No Press.

No  
Trouble.

Letters written in usual way with ordinary pen and ink, and perfect facsimile re-produced simultaneously. Original letter never soiled or smeared, and shows no sign of having been copied. Three or four copies produced by one writing if required.

Full particulars with Specimen of Writing and Copy on application.

Call and examine both Systems, or send for Special Catalogue, quoting "Hazell's."

**THE CERES DEPOT, 10, John St., Adelphi, W.C.**

(CLOSE TO CHARING CROSS.)

Practical Presents.

# HAZELL'S ANNUAL

FOR 1905:

*A CYCLOPÆDIC RECORD OF MEN AND  
TOPICS OF THE DAY,*

REVISED TO DECEMBER 31st, 1904.

ARRANGED IN ALPHABETICAL ORDER, AND  
FURNISHED WITH A SPECIAL INDEX.

EDITED BY

W. PALMER, B.A. (LOND.).

London:

HAZELL, WATSON & VINEY, LD., 52, LONG ACRE, W.C.  
HODDER AND STOUGHTON, 27, PATERNOSTER ROW.

1905.

[All rights reserved.]

NOTES—Patterns of these sterling cloth will be sent to country and foreign applicants, but those living in or near London are recommended to call and view the stock—7 yards is the quantity required for man's suit. Should customers find a difficulty in getting a tailor to make them, I can probably assist them. These goods are as unlike the ordinary things shown by the average tailor as anything can be. INSPECTION heartily invited.

## PREFACE. REMOTE STORAGE

It may fairly be claimed for the ANNUAL that, more than any other yearly work of reference, it aims at being encyclopædic in character. Other publications may, and do, specialise more in particular directions than the ANNUAL; but its special aim is to embrace, so far as is practicable within one volume, all the information that most readers will need during the current year with reference to "men and topics of the day"—the men, in this instance also, embracing the women. How far this aim is carried out it is for those who use the ANNUAL to say. Here it is only desired to emphasise the main object of the book.

As instances of the special character which is thus given to the ANNUAL, the articles on "Canals, British and Foreign," "Esperanto," "The Triple Alliance," "The Textile Industries of the World," "Vagrancy and Labour Colonies," the accounts of the Political Parties of every important foreign country, the Monroe Doctrine, and the Anglo-Japanese Agreement, the biographies of Foreign and Colonial statesmen and notabilities, the summary of the most important legal decisions of the year, and the review of the chief industrial engineering Schemes throughout the world, may be specified, though the list could be indefinitely extended. The method of treatment of the articles on such subjects as "The Russo-Japanese War" and "The Fiscal Question" is determined by this special aim, as a result of which it is believed that the ANNUAL contains more information on subjects as to which information is usually sought in vain than any other annual work of reference.

In the present issue the accounts of Foreign Armies and Navies are placed under the headings of the countries to which they belong, and the article on Newspapers of the World has been similarly dispersed through the book. The copious **Index**, which has now become a permanent and indispensable feature, will make reference to any subject perfectly easy, and should always be referred to if the great range and fulness of the contents of the book are to be realised. The alphabetical arrangement, however, is still maintained, and is indeed rendered absolutely necessary by the encyclopædic nature of the ANNUAL.

Once more the great assistance given by readers, contributors, and officials, in the form of suggestions and criticisms, special articles, and revision of statistics, etc., is gratefully acknowledged.

WILLIAM PALMER.

## OCCURRENCES DURING PRINTING.

**Army, British.**—Director-General Army Medical Service: Surgeon-General A. Keogh, M.D., C.B., R.A.M. Corps. The War Office on Dec. 28th, 1904, placed orders for sufficient 18½-pounder field guns to re-arm the whole of the British Army.

**Austria-Hungary.**—**Austria.** On Dec. 31st the resignation of the Premier, Dr. von Koerber, was definitely announced, and Baron Gautsch von Frankenthurn was appointed to succeed him, the new Cabinet being thus composed:—**Ministerial Council for Austria:** *Premier*, Baron Gautsch von Frankenthurn; *Minister of the Interior*, Count Bylandt-Rheydt; *National Defence*, Lieut.-Gen. Count Welserhsheimb; *Public Worship and Education*, Dr. von Hartel; *Commerce*, Baron von Call; *Railways*, Dr. von Wittek; *Finance*, Dr. Kosel; *Agriculture*, Count Buquoy; *Justice*, Dr. Klein; *Polish Representative without Portfolio*, Dr. Pientak; *Czech Representative without Portfolio*, Dr. Randa.

**Hungary.** The new session was opened quietly (Dec. 14th), but only formal business was done. Count Tisza had an audience of the King (17th), and afterwards announced that Parliament would be dissolved. The dissolution took place on Jan. 4th, 1905.

**British Empire.**—Governor-General of India's Council: J. P. Hewett; C.S.I., C.I.E. (Chief Commissioner Central Provinces), and E. N. Baker, C.S.I. (Finance Secretary Government of India) appointed ordinary members of the Council; and Sir E. Fitzgerald Law, K.C.M.G., C.S.I., resigned. **Indian Railway Board:** F. R. Upcott, S.C.I. (Chairman), W. H. Wood, T. R. Wynne, C.I.E. **Malta:** Revenue, 1903-4, £464,591; expenditure, £410,887. **Imports**, £1,318,430; **exports**, £123,776. **Transvaal:** Returns published Dec. 24th showed 21,462 Chinese coolies at work and 6395 on the water. **Bechuanaland:** Revenue, 1903-4, £32,443; expenditure, £82,938.

**China.** The delay on the part of the Ministers, in replying to the Chinese proposals on the Indemnity, was, according to the *Times* correspondent at Peking (Dec. 20th), due to the attempt on the part of some of the Powers to get China to sign gold bonds and pay in silver at a rate to be determined by the Powers. China asked that she should be allowed to purchase her gold in the open market, but Russia, Germany, and France insisted that she should buy it through the international banks. The British Minister supported the Chinese proposals.

**Denmark.** A ministerial crisis arose at the end of 1904, and the following members of Dr. Deuntzer's Cabinet resigned:—*War*, Major-General Madsen; *Justice*, M. Alberti; *Interior*, M. Sørensen; *Public Instruction*, M. Christiansen; *Agriculture*, M. Hansen.

**Education.** The following appointments to the Board of Commissioners of National Education in Ireland were announced (Jan. 9th,

1905):—Dr. Foley, Roman Catholic Bishop of Kildare, in the room of Archbishop Walsh, resigned; Mr. Edward John Gwynn, Fellow of Trinity College, Dublin, in the room of Dr. Bernard, Dean of St. Patrick's, resigned; and Mr. Gerald Dease, D.L., in the room of Mr. Edmund Dease, D.L., deceased.

**Greece.** A ministerial crisis at the end of December followed the defeat of the Government on the 23rd on a motion of want of confidence, owing to the defection of the Zaimist party, and M. Delyanni formed a new Cabinet as follows:—*Premier and Minister of the Interior*, M. Delyanni; *Foreign Affairs*, M. Skouzis; *War and Marine*, M. Kyriakoulis Mavromichalis; *Justice and Public Instruction*, M. Carapanos; *Finance*, M. Gounarakis. The Chamber was dissolved and new elections were ordered for March 5th.

**Knighthoods.** G.C.V.O.: Lieut.-Gen. Felice, Italian Army (hon.); General Hermann von Broizem, German Army (hon.). K.C.V.O.: Maj.-Gen. F. O. Wahle, of Saxony (hon.); Baron Burnham; Rear-Adm. W. H. May, M.V.O. G.C.M.G.: Rt. Hon. Sir Charles Hardinge, K.C.M.G., K.C.V.O., C.B., H.B.M., Ambassador at St. Petersburg. **Baronet:** Rt. Hon. Sir E. Monson, G.C.B., G.C.M.G., G.C.V.O., on retirement from British Embassy, Paris.

**Labour Movement.** A Conference of Joint Committees of the Parliamentary Committee of the Trade Union Congress and the General Federation of Trade Unions, appointed to draft proposals on the Unemployed question, with the co-operation of the Labour M.P.'s, issued its report on Dec. 29th, 1904. The Conference expressed the opinion that the main cause which leads to large numbers of men being without employment is the absence of organisation in industry, intensified by the increased introduction of labour-saving appliances unaccompanied by an adequate reduction of the hours of labour or a sufficient increase in remuneration; the displacement of men by women and young persons through the introduction of automatic machinery; the absence, particularly in Government works, of any attempt to regulate the distribution of work so as to maintain employment at an even level, thereby causing alternate periods of rush and stagnation; the fact that the financial resources of the country are being constantly drained in avoidable wars and extravagant expenditure. The existing methods of dealing with unemployment, apart from trade union effort and financial aid—namely, (1) public, semi-public, and private employment agencies; (2) public, semi-public, and private relief; (3) private charity—are, in view of the Conference, when not positively harmful, defective and inadequate, inasmuch as they weaken the sense of individual and collective responsibility for existing conditions, and notwithstanding generations of experiments they have lamentably failed to furnish even a temporary solution of the problem.

The Conference suggested as Remedial Proposals a more systematic regulation of industry,

and proposed that the Government and all public bodies should regulate the distribution of work under their jurisdiction, so as to obviate the necessity to discharge workmen; that the practice of working overtime be generally discountenanced; that local public bodies, with the addition of a considerable proportion of direct trade union representatives, should be permanently established in all localities; that works of public utility be carried out with the least possible delay, such as that relating to the Port and docks of London and the improvement of the Thames; coast protection against the encroachment of the sea, and general reclamation of the land saved from such encroachment; necessary harbour works, and work already decided upon in connection with the postal and other Government departments; the acquisition by the Government of waste land at present unfit for agricultural purposes with a view to afforestation.

**London Electric Lines.** The Metropolitan began to run a partial electrical service between Baker Street, Harrow and Uxbridge on Jan. 1st, 1905.

**Mercantile Marine. Shipbuilding Returns, 1904.** At the close of the quarter ending December 31st, 1904, there were 403 vessels, of 1,049,860 tons gross, under construction in the United Kingdom, excluding war-ships. The details were: Steam, 371 ships—tonnage, 1,037,788; Sail, 32 ships—tonnage, 12,072. Total steam and sail, 403 ships—tonnage, 1,049,860.

**Mines and Quarries.** The Royal Commission on Coal Supplies, after taking evidence extending over nearly three years and holding sixty sittings, on Jan. 7th, 1905, concluded the revision of their final report. Two large volumes of evidence, together with short interim reports, have been already published. The revised report was signed and is to be published in a short time. Some of the volumes, however, it was stated by the secretary, Mr. William Russel, which accompany the report will take a longer time to prepare.

**Mint, Royal.** The number of pieces struck in 1904 was 95,137,437, of which 45,024,030 were for the Colonies. The gold issued in 1904 amounted to £11,042,000, the silver to £605,801, and the bronze to £77,895. The withdrawals from circulation were: gold, £2,100,000, and silver, £638,839.

**Morocco.** A serious defeat of the Government troops by the Pretender near Ujda was reported (Jan. 5th, 1905). In another battle, fought about 30 kilometres from Ujda, the Pretender's troops were beaten, but withdrew to a spot previously selected, where reinforcements were awaiting them. The Sultan's troops, pursuing them, fell into the ambushade and were completely routed, losing 400 killed and wounded. These victories left Bu Hamara in possession of all Morocco east of Fez.

**Obituary. De Montalt,** Cornwallis Maude, 1st Earl, I.R.P., three times a Lord-in-waiting (Jan. 9th, 1905), 87

**Parliament (p. 539) Stalybridge Bye-Election.** J. F. Cheetham (L.) 4029; J. T. Travis Clegg (C.) 3078. Liberal gain. **New M.P., Cheetham,**

John Frederick (L), elected for Stalybridge Jan. 7th, 1905; sat for N. Derbyshire '80-'85. He owns the Bankwood Cotton Mills at Stalybridge, and employs hundreds of operatives, J.P. Cheshire and Lancashire; Alderman Cheshire C.C.; Governor Victoria University. Eastwood, Stalybridge.

**Peerage.** By the death of Cornwallis, 1st Earl de Montalt, the earldom became extinct, Lieut.-Col. Robert H. Maude succeeding as Viscount of Hawarden and Baron de Montalt (Jan. 9th, 1905). He was b. 1842, m. 1881, Caroline, da. of the late Major A. Ogle, of Steeple Aston, Oxfordshire. *Heir*, Robert Cornwallis Maude, b. 1890.

**Russia.** A previous rumour as to the impending resignation of the Minister of the Interior, Prince Sviatopolk-Mirski, was again current (Jan. 9th), and it was added that M. Witte would succeed him and assume direction of the internal affairs of Russia.

**Russo-Japanese War.** Reuter's correspondent at Tokio stated (Jan. 9th) that in well-informed quarters it was estimated that the original garrison of Port Arthur consisted of from 38,000 to 40,000 men, including sailors. The number of those killed or missing during the siege and of those who died of sickness was placed at over 10,000. Of the officers taken prisoners at Port Arthur, 50 per cent. decided to share the captivity of their men, including Generals Fock, Smirnof and Gorbatsky, and Admiral Wilmann. The Japanese were busily engaged in clearing the harbour and approaches of mines, and made preparations for the establishment of a naval station at Port Arthur. The blockade of the Liau-tung Peninsula, declared on Jan. 1st by Admiral Togo, was raised on Jan. 7th, but no ships except those in the service of the Japanese Government were allowed to enter Port Arthur.

The International Commission of Inquiry into the North Sea incident met again on Jan. 9th, 1905, and Admiral Fournier was appointed President. The Admiral said that the example of wisdom and moderation which their Majesties the King of England and the Emperor of Russia had given to the world by the appointment of the Commission would permit of "a conscientious and mature examination." The Commission then occupied itself with the drawing up of rules of procedure, and it was stated that the utmost publicity should be given to the work of inquiry and the taking of evidence, though the actual deliberations of the Commission would be kept secret.

**Telephones.** The Postmaster-General announced (Jan. 9th, 1905) that there was no foundation for recent rumours that the business of the National Telephone Company had been acquired by the Government, and that an announcement of the terms would be made at once. The negotiations between the Government and the Company were not concluded; and in any case no announcement on the subject would be made till Parliament met. Lord Stanley undertook in the 1904 Session that no agreement should be binding until Parliament had had an opportunity of considering it.

**Unemployed Fund.** Amounted to £40,000 by Jan. 4th, 1905.

### ABYSSINIA.

Abyssinia is a country of North Africa, and occupies a highland region S.W. of the Red Sea. Estimated area, 150,000 sq. m.; pop. 3,500,000. The country is made up of a number of states, the chief of which are Tigre in the north, Amhara in the west and centre, and Shoa in the south. After the defeat and suicide of King Theodore, in '68, Prince Kassa of Tigre assumed the chief power as Johannes II. To him, in '89, succeeded Menelik II., King of Shoa, who was born in '42, and is Hon. G.C.B. and G.C.M.G. He has no direct heir, his cousin Ras Makonnen being regarded as his probable successor. By a treaty with Great Britain concluded in '97, the frontiers of the British Somaliland Protectorate were delimited, the caravan route between Zeila and Harar was declared open to the commerce of both nations, most-favoured-nation treatment was granted to Great Britain and her colonies, and in return the right of free entry at the port of Zeila was given to all material destined for the service of Abyssinia. The Emperor has claimed jurisdiction over some of the country between Shoa and the Nile, but an agreement delimiting the boundary between his territory and the British Soudan was signed May 15th, 1902. The Emperor agreed not to construct any work which would arrest the flow of the Blue Nile, Lake Tsana, or the Sobat into the Nile, except in agreement with H.M. Government; to lease to H.M. Government a commercial station near Itang, on the Baro river; and to allow the construction of a railway through Abyssinian territory from the Soudan to Uganda. On the same date a modification of the boundaries between Abyssinia, Erythrea, and the Soudan was agreed upon between the Emperor and the British and Italian representatives. The text of the agreements was published Dec. 13th, 1902.

The system of government is monarchical, and a sort of feudal military system obtains, each large province being under a Ras or feudal chief, the more important of whom form a Council of State, while under them are the governors of districts and the chiefs of villages.

The military organisation is feudal in character, and the constitution is by provinces, each Ras having a standing force as garrison and at call in case of war, and a considerable number of retainers not embodied. The garrison forces united constitute the new army of Menelik, and are estimated at 70,000 men. The central control is weak, and there is no organised division into the three arms, as in Europe; but the forces are readily grouped,

the mounted men forming an irregular cavalry, and have great mobility. Practically every man has a sword and a rifle, but the firearms are extraordinarily varied, and the mounted troops also carry a javelin or spear. They do not exceed 5000 altogether. The guns are mostly adapted for mountain work, there being about 50 modern and 30 old ones. The unembodied retainers, who may be likened to a militia, number about 140,000 men.

The religion is a form of the Armenian and Coptic Christian Church, called Monophysite. People a mixed race: Semitic or Arabic type most prevalent; colour yellow-brown to black. There are Mohammedans, and the Jewish Falashas, who number about 250,000, and are the principal agriculturists and manufacturers. Abyssinian trade passes principally through Adowa, the capital of Tigre, to the port of Massowah, now Italian. Manufactures limited to coarse cotton and woollen cloths, leather, pottery, and some iron, steel, and other metal articles. Exports: ivory, gold dust, musk, coffee, and some other productions. The capital is Adis Abeba, population about 10,000; and Harar, in Eastern Abyssinia, has about 35,000 inhabitants, and is the centre of a most fertile district.

A complete telegraphic and telephonic system is being established in the country. A railway has been built from Jibutil, on the Red Sea, to the Abyssinian border near Harar, and it will eventually be continued to Adis Abeba. A convention was concluded in Feb. 1902 between the Ethiopian Railway Company, which is constructing the line, and the Government of French Somaliland, placing the line under the direct surveillance and control of the French Government, and the French Legislature approved the convention on April 6th. As to operations against the Mad Mullah in Somaliland, see BRITISH EMPIRE (Somali Coast Protectorate).

British Minister and Consul-General (at Adis Abeba), Lieut.-Col. Sir J. L. Harrington, K.C.V.O., C.B. Vice-Consuls, Capt. A. Duff, at Adis Abeba; J. Gerolimato, at Harar.

Academies. The International Association of, was established in 1899 on the initiative of the Royal Society, and now represents 20 academies and learned societies of Europe and America. The delegates of the constituent bodies meet in general assembly once in every 3 years. The first meeting was held in Paris in 1901, the second in London in May 1904, and the next meeting is to be held at Vienna in 1907. The International Catalogue of Scientific Literature is one of the projects which the

Association is concerning itself with; others are a complete edition of the works of Leibnitz and an Encyclopædia of Islam. Its affairs are conducted by a Council, the President and Vice-President of which are chosen by the two sections of which the Association consists—the Science section and the Letters section. Sir M. Foster and Lord Reay were elected to these offices in 1904.

**Academy, British, for the Promotion of Historical, Philosophical, and Philological Studies.** The Academy is the outcome of a meeting of representative scholars at the British Museum in 1901, when, after careful deliberation, a petition to His Majesty in Council was drawn up and presented, praying for the grant of a charter of incorporation, which appeared in the *Gazette* (Jan. 14th, 1902). The Royal Society approved and supported the petition, and on August 8th it was acceded to, and a Royal Charter was granted. The Academy aims at the promotion of the study of moral and political sciences, including history, philosophy, law, politics and economics, archaeology and philology. The number of ordinary Fellows is fixed at 100 as a maximum; and they are distributed under four main sectional Committees: (1) History and Archæology—chairman Mr. Bryce; (2) Philology—chairman Sir R. C. Jebb; (3) Philosophy—chairman Dr. Edward Caird; (4) Jurisprudence and Economics—chairman, Sir C. P. Ilbert. **President:** Lord Reay, G.C.S.I. **Council:** Sir W. R. Anson, M.P.; the Right Hon. James Bryce, M.P.; Prof. Ingram Bywater, Prof. Rhys Davids, Rev. Canon S. R. Driver, D.D., the Rev. A. M. Fairbairn, D.D., Sir Courtenay Ilbert, Sir Richard Jebb, M.P., Rev. J. E. B. Mayor, Dr. J. A. H. Murray, Dr. H. F. Pelham, Rev. W. W. Skeat, Sir E. Maunde Thompson, K.C.B., Dr. A. W. Ward, and Prof. James Ward. **Secretary,** Prof. I. Gollancz, 54, Sidney Street, Cambridge; Tan-y-Bryn, Shoot-up Hill, London, N.W.

**Academy, The French (Académie Française),** was founded in 1635 by Cardinal Richelieu, and is the first of the five academies constituting the "Institut de France," the other four being l'Académie des Inscriptions et Belles Lettres, l'Académie des Sciences, l'Académie des Beaux Arts, and l'Académie des Sciences Morales et Politiques. The Academy consists of forty members, and meets at the Palais de l'Institut every Thursday from 3 to 5 p.m. An annual meeting is held in November. Each of the members receives 1500 fr. a year, and the Secretary 6000 fr. Six members who are appointed as a Dictionary Commission also receive 1000 fr. a year each. Twenty-one "prix littéraires" and forty "prix de vertu" are awarded by the Academy. **The Secretary** is M. Gaston Boissier.

**Accountants (Chartered) in England and Wales, Institute of.** Incorporated by royal charter May 11th, 1880. **Objects.** The elevation of the profession of public accountants as a whole, and the promotion of their efficiency and usefulness, by compelling the observance of strict rules of conduct as a condition of membership, and by setting up a high standard of professional and general education and knowledge, and otherwise. Except in the case of persons who were in service as public accountants' clerks before March 21st, '82, who may qualify by passing an examination (and in some very special cases, for information as to

which inquiry should be made at the Institute), candidates for membership must serve under articles and pass examinations. **Officers:** **President,** J. S. Harwood-Bannor, F.C.A., 24, North John Street, Liverpool; **Secretary,** Hon. George Colville; **Solicitors,** Messrs. Markby, Stewart & Co., 57, Coleman Street, E.C. **Hall and Offices,** Moorgate Place, London, E.C.

**Acts of Parliament.** The public Acts passed during the 1904 Session are enumerated at the commencement of Part II. of the article on SESSION, and particulars are given of the more important of them in alphabetical order in that article. The **Wholesale Agency for Government Publications,** held by Messrs. Eyre & Spottiswoode for so many years, on Jan. 1st, 1905, passes into the hands of Messrs. Wyman & Sons, Ltd., Fetter Lane. Acts of Parliament prior to the year 1887 will, however, still remain in possession of, and be only obtainable from, Messrs. Eyre & Spottiswoode.

**Adler, Hermann, M.A., Ph.D., Hon. LL.D.** St. Andrews, Chief Rabbi, is son of the late Chief Rabbi, and was b. in Hanover, 1839. Ed. at University Coll., Lond., B.A. Lond. '59, Ph.D. Leipsic '61. Appointed Principal of the Jews' College in '63, and Minister of the Jewish Synagogue at Bayswater in '64. Dr. Adler is the author of several works of a controversial and homiletic character, including a reply to Dr. Colenso's "Criticism of the Pentateuch," and "Sermons on Passages in the Bible on which Christian Theologians base their Faith," and has contributed to the principal reviews and the Jewish Encyclopædia. He was elected Chief Rabbi of the United Congregations of the British Empire in May '01, and was installed on June 23rd in the Great Synagogue of London. He is connected with a large number of philanthropic and educational institutions, both in his own and the general community, including King Edward's London Hospital Fund. He is President of Jews' College and a Life Governor of University College. Address: 22, Finsbury Square, E.C.; 6, Craven Hill, W.; Athenæum Club.

## AÉRIAL NAVIGATION.

There are two systems of aerial navigation—viz., ballooning and aviation. The former involves the use of machines lighter than the air; while the latter may be accomplished only by the use of apparatus heavier than the air. For a discussion of the subject, and accounts of various flying machines, see '95 and previous eds.

At Paris, in July 1901, a navigable balloon was constructed and worked with considerable success by M. Santos-Dumont. He succeeded in going from St. Cloud to the Eiffel Tower and back again, a distance of about 15 kilomètres, in 41 minutes. M. Santos-Dumont used a cigar-shaped balloon inflated with hydrogen gas, and driven by a motor turning an aerial screw at the rate of 200 revolutions a minute. On Oct. 19th, 1901, the same journey was successfully performed in 29½ minutes, and M. Santos-Dumont thus won the Deutsch prize of 100,000 fr. M. Dumont has since made several experiments with his dirigible balloons, and in 1903 the French Government accepted his offer to put his balloons at their disposal for military purposes.

In England Mr. Stanley Spencer successfully

crossed London from the Crystal Palace to Eastcote, near Harrow, on Sept. 19th, 1902, in the "Mellin" airship. In Sept. 1903 a new balloon was built, but it was not found possible to propel it against the wind successfully.

MM. Paul and Pierre Lebaudy, of Paris, have also experimented with a dirigible balloon, and on May 8th, 1903, they succeeded in travelling from Moisson to Mantes and back to Moisson, going altogether a distance of 37 kilomètres, in 90 minutes; while on Nov. 12th they travelled from Moisson, about 55 kilomètres from Paris, to the Eiffel Tower, starting at 9.10 a.m. and arriving at 10.50 a.m.

A flying machine, in the construction of which no balloon was used, was built by Prof. S. P. Langley at Whitewater, Virginia, U.S.A. The U.S. Government granted a subsidy of £15,000 for its construction, but the first trial was a failure, though it was stated it was merely experimental.

Dr. F. A. Barton was occupied during 1903 and 1904 with the construction of a large air-ship at Alexandra Park. It includes a large balloon 170 ft. long and 40 ft. in diameter, containing a little over 170,000 cubic ft. of gas, and having a lifting capacity calculated at 11,900 lb. The balloon is divided into 3 compartments by means of diaphragms, and has in the centre of it a small balloon, containing 12,000 c. ft. of air, the object of which is to keep the silk, of which the balloon is built, always perfectly tight. When the air-ship rises and the hydrogen gas in the large balloon expands the air is allowed to pass out of the small balloon; and when the hydrogen contracts air can be pumped into the small balloon. Suspended under the balloon is the bamboo framework. Between the balloon and the deck are 30 aeroplanes. The propelling power is derived from 2 engines of 47 i.h.p. each, driving 2 sets of 6-bladed fans, running at over 100 revolutions per minute, and placed at the sides of the ship. The rudder is in the form of a large square sail 17 ft. by 12 ft. An accident occurred to Dr. Barton (July 4th, 1904) which delayed the first trial of the ship.

Aéronautical Society of Great Britain (established 1866), 53, Victoria Street, S.W. Sec., E. Stuart Bruce, M.A.

## AFGHANISTAN.

Afghanistan is an inland country of Asia, forming the north-eastern portion of the great Iran plateau. Its breadth is about 500, and its length, from the Herat boundary to the Khaibar, about 600 miles. Its area is about 216,000 sq. m. It is bounded on the E. by the tribes on the N.W. frontier of India under British control; on the S. by Baluchistan; on the W. by Persia; on the N. by the Russian Central Asian States. Kabul is the capital. There is no Afghan nation; the population (4,000,000) consists of discordant tribesmen, constantly in revolt, and only kept in subjection by frequent military expeditions from Kabul. The chief tribes are the Ghilzais in the province of Kabul, the Duranis between Herat and Kandahar, the Amiahs and Hazaras in the Paropamisus mountains, north of the Duranis, and the Uzbeks and Tajiks. The four principal provinces are Kabul, Turkestan, Herat, and Kandahar. Most of the tribesmen are Suni Mahometans.

The present Ameer is Habibullah Khan, G.C.M.G., eldest son of the late Abdur-

rahman Khan. He was born in 1872, succeeded on Oct. 1st, 1901, and was formally enthroned in March 1902. He has a subsidy of 18 lakhs (£120,000) per annum from the Indian Government. A standing army is maintained, and the Commander-in-Chief is the Ameer's brother, Sirdar Nasrullah Khan, appointed in 1903. Service is obligatory, but rests lightly upon the population, about one man in eight being called upon to serve. The army comprises about 27,000 infantry, 7,000 cavalry, and a strong force of artillery, apart from the irregulars, who number some 25,000 mounted men and a smaller force of infantry, capable of being increased on a war footing to 80,000 horse and 60,000 foot. The firearms are various, but include many modern rifles, and the same applies to the guns. At Kabul there are factories where guns are forged and rifles made, and all sorts of manufactures are carried on. Silks, felts and carpets are manufactured. Exports: assafetida, madder, fruits, furs, shawls, and chintz. The exports to India are estimated at about £400,000 a year, and the imports £500,000 a year. Of late years Russian trade competition has been severe.

The delimitation of the Indo-Afghan boundary adjoining the Mohmand country was commenced in 1904 by a Joint Commission. In October the Ameer proposed to send his eldest son, the Sirdar Inayat Ulla, to meet Lord Curzon on his return to India, and agreed to receive a Mission at Kabul to be sent by the Indian Government for the discussion of questions concerning his relations with the Indian Government. The Mission accordingly left Peshawar for Kabul on Nov. 27th.

Agent to the Governor-General of India at Cabul, Mohammed Khuda Bakhsh.

## AFRICA.

The present condition of affairs and the latest details that have come to hand about the various parts of this vast continent will be found dealt with under their proper alphabetical headings throughout the book. Africa has been gradually shared out between various European Powers, chief of whom are England, Germany, France, Italy, Spain, and Portugal.

It is estimated that the total area of Africa is 11,500,000 square miles, in round numbers, and the following is a rough approximation of the area secured by each Power:—

Great Britain . . . . .	2,713,910 sq. miles.
France (including Madagascar) . . . . .	3,804,974 " "
Germany . . . . .	933,380 " "
Italy . . . . .	188,500 " "
Portugal . . . . .	790,124 " "
Spain . . . . .	169,150 " "
Turkey (Tripoli and Benghazi) . . . . .	398,900 " "
Egypt and Anglo-Egyptian Soudan . . . . .	1,010,000 " "
Congo Free State . . . . .	900,000 " "
Liberia . . . . .	52,000 " "
Morocco . . . . .	219,000 " "
Abyssinia . . . . .	320,000 " "
	<hr/>
	11,499,938 " "

**British, French, and German Trade with Africa.**

The following table gives details as to the trade of Great Britain and France with Africa in 1901 and 1902, and the trade of Germany with Africa in 1901.

It may be added that British Trade has progressed thus :

	Imports from Africa	Exports to Africa
1897 . . .	£ 22,902,000	£ 24,797,000
1901 . . .	26 435,000	32,288,000
1902 . . .	29,456,000	40,607,000

French Trade has progressed thus :

	£	£
1898 . . .	13,960,000	12,562,000
1901 . . .	13,209,000	15,123,000
1902 . . .	16,048,000	15,835,000

A very important report "On the Present Position and Future Prospects of British Trade in South Africa" was published as a Blue Book in Nov. 1903, and was summarised in the article on the BRITISH EMPIRE, p. 70, 1904 ed.

For details as to the Cape to Cairo Railway see article with that heading under ENGINEERING.

**Aga Khan, His Highness Sultan Mahomed Shah,** Head of the Ismailiah sects of all Moslems, is the third Aga Khan in direct male line since the family migrated from Persia and settled in British India. He was born in '77, educated privately, and married his cousin '97. As religious leader of considerable numbers of Mahometans in all parts of the world, he has followed an enlightened policy in elevating their mental and moral condition, and reconciling them politically to the different administrations to which they are subject. He rendered notable service to the British Government by securing the allegiance of some of the Frontier tribes in the N.W. Frontier of India. He is a great traveller, and frequently visits England and other European countries. He was created K.C.I.E. in '97, promoted to G.C.I.E. in 1902, and holds several high distinctions from the German Emperor, the Shah of Persia, the Sultans of Turkey and Zanzibar, and other potentates. He has founded many Mahometan and charitable institutions, and is a munificent donor to many public movements in India, Europe, and Africa. Chief residence: Bombay. Clubs: Marlborough, Piccadilly; and several clubs in India.

**AGRICULTURE**

- I. BOARD OF AGRICULTURE.
- II. AGRICULTURAL STATISTICS.
- III. CO-OPERATION IN AGRICULTURE.
- IV. AGRICULTURAL EDUCATION, SOCIETIES, etc.

**I. BOARD OF AGRICULTURE AND FISHERIES.**

The Board of Agriculture for Great Britain was established in '89, and consists of the Lord President of the Council, His Majesty's Principal Secretaries of State, the First Commissioner of the Treasury, the Chancellor of the Exchequer, the Chancellor of the Duchy of Lancaster, and the Secretary for Scotland, with such other persons as His Majesty may

from time to time think fit to appoint during his pleasure. The President of the Board receives a salary of £2000 per annum. The powers and duties of the Privy Council under the Diseases of Animals Acts; of the Land Commissioners for England under the Tithe Acts, the Copyhold Act, the Inclosure Acts, the Metropolitan Commons Acts, the Drainage and Improvement of Land Acts, or under any other Act; and of the Commissioners of Works under the Survey Act '70, were transferred to the Board by the Act of '89; and, by the Board of Agriculture and Fisheries Act of 1903, the duties of the Fisheries Department of the Board of Trade were transferred to the Board of Agriculture, the designation of which was at the same time altered. The expression "agriculture" is defined to include "horticulture."

The business of the Board is transacted in four divisions—viz., Animals, Intelligence, Land, and Fisheries.

The **Animals Division** is charged with the suppression of certain contagious diseases, including rabies, among animals in Great Britain; and with the regulation of the importation, into Great Britain, of animals, including dogs.

The **Intelligence Division** is charged with correspondence and inquiries relating to insect attacks, experiments, and general farming subjects; conducts business in connection with the Sale of Food and Drugs and similar Acts; inspects, reports, and advises upon Agricultural Education in England and Wales; issues leaflets; and edits the monthly *Journal* of the Board, which contains information as to the position of agriculture at home and abroad, rural industries, noxious insects and fungi, wild birds useful to agriculture, and statistics of quantities and values of agricultural produce.

The **Land Division** prepares the annual Agricultural and Produce Returns, collects the average prices of British corn under the Corn Returns Act '82, and is concerned with the regulation and inclosure of commons, transactions under the Universities and College Estates Acts, sales of glebe land, reappportionment and redemption of tithe rent-charge, enfranchisement of copyhold land, and the sanctioning of charges on land for works of improvement.

The **Fisheries Division** is charged with powers and duties under the Sea Fisheries Regulation Act, the Salmon and Freshwater Fisheries Acts, and certain Acts relating to Shell Fisheries. This division is under the control of Mr. Archer, who holds the rank of Assistant Secretary. Mr. C. E. Fryer is Superintending Inspector.

Under the Fertilisers and Feeding Stuffs Act, '93, the Board has appointed a chief agricultural analyst, and made regulations regarding the analysis of fertilisers and feeding-stuffs by district analysts.

The **Ordnance Survey** (*q.v.*) of the United Kingdom is conducted by the Director of the Survey, under the control of the Board, in whose hands are now also placed the arrangements for the advertisement and sale of the maps and memoirs of the **Geological Survey** (*q.v.*) of the United Kingdom. By an Order in Council dated March 28th, 1903, the powers and duties formerly vested in Commissioners of the Office of Works, relating to the **Royal Botanic Gardens, Kew** (*q.v.*), were transferred to the Board of

Agriculture. Further powers have been conferred on the Board by the Sale of Food and Drugs Act, the Commons Act, the Improvement of Land Act, of the session of '99, and by the Agricultural Holdings Act, 1900.

**President**, Right Hon. the Earl of Onslow, G.C.M.G.

**Permanent Secretary**, Sir T. H. Elliott, K.C.B. Offices, 4, Whitehall Place, 3, St. James's Square, and 3, Delahay Street, S.W.

### **Agricultural Correspondents.**

A number of Honorary Agricultural Correspondents were appointed throughout Great Britain by the Board of Agriculture in 1904, in order that they should bring to the notice of the Board any special circumstances affecting the practice of agriculture, horticulture and forestry, or the transport of farm, garden and forest produce in their respective districts, and should help in making known to agriculturists and others concerned the information contained in the Board's publications.

### **Departmental Committees.**

A Departmental Committee was appointed in December 1903 to inquire into and report upon the present position of fruit culture in Great Britain, and to consider whether any further measures might with advantage be taken for its promotion and encouragement. The committee is constituted as follows: viz., Mr. A. G. Boscawen, M.P., chairman; Mr. C. W. Radcliffe Cooke, Mr. J. M. Hodge, Col. Charles W. Long, M.P.; Mr. George Monro, Mr. P. Spencer Pickering, M.A., F.R.S.; Dr. W. Somerville, Assist. Sec. Board of Agriculture and Fisheries; Mr. Edwin Vinson, and Rev. W. Wilks, M.A., Sec. Royal Horticultural Society. **Secretary**, Mr. Ernest Garnsey, of the Board of Agriculture and Fisheries.

In May 1904 a Departmental Committee was appointed to inquire as to the rates charged by railway companies in Great Britain in respect of the carriage of foreign and colonial farm, dairy, and market-garden produce from the ports of shipment or of arrival to the principal urban centres, and to report whether there is any evidence to show that preferential treatment is accorded to such produce, and, if so, what further steps should be taken, either by legislation or otherwise, to secure the better enforcement of the law in the matter. The committee is constituted as follows: The Earl of Jersey, G.C.B., G.C.M.G. (chairman); Sir J. L. Mackay, G.C.M.G., K.C.I.E.; Sir Herbert Jekyll, K.C.M.G., Assist. Sec. Board of Trade; Sir Charles J. Owens; Mr. Alfred Baldwin, M.P.; Mr. E. G. Haygarth Brown, Inspector Board of Agriculture and Fisheries; Col. W. S. Kenyon-Slaney, M.P.; Mr. George Lambert, M.P. **Secretary**, Mr. E. C. Stoneham, of the Board of Trade.

### **II. AGRICULTURAL STATISTICS.**

The total area of land and water in 1904 was given in the Agricultural Returns, 1904, thus:—

	Ares.
England . . . . .	32,551,808
Wales . . . . .	4,777,133
Scotland . . . . .	89,458,728
Total Great Britain . . . . .	56,787,669
Ireland . . . . .	20,710,589
Total United Kingdom . . . . .	77,684,012

The total acreage under crops and grass in 1903 and 1904 was:—

	1903. Acres.	1904. Acres.
England . . . .	24,651,379	24,630,092
Wales . . . .	2,800,401	2,798,880
Scotland . . . .	4,891,799	4,888,638
Great Britain . . .	32,343,579	32,317,601
Ireland . . . .	15,242,421	15,230,124
United Kingdom . .	47,708,033	47,670,948

It is impossible to give comparative figures further back than 1887, for the United Kingdom, as to the amount of land under pasture, and the amount of arable land. Since that time there has been little change in the relative proportions, but what change there has been is in the direction of decrease of the arable and increase of the pasture land. The averages for the United Kingdom for 1891-95 compare with the figures for 1904 thus—

	1891-95 Acres.	1904 Acres.
Permanent Pasture . .	27,642,070	28,693,305
Arable Land . . . .	20,345,937	18,977,643
	47,988,007	47,670,948

For Great Britain the comparison goes back to 1871-75, thus—

	1871-75 Acres.	1904 Acres.
Permanent Pasture . .	12,833,522	17,098,056
Arable Land . . . .	18,242,204	15,219,554
	31,125,726	32,317,610

The *Times* (Sept. 27th, 1904) gave the following figures as to the

Areas of Wheat, Barley and Oats in Great Britain, '74-1904.

Year.	Wheat.	Barley.	Oats.	Total.
	Acres.	Acres.	Acres.	Acres.
'74	3,630,300	2,287,987	2,596,384	8,514,671
'84	2,677,038	2,168,820	2,915,363	7,761,221
'94	1,927,962	2,095,771	3,253,401	7,277,134
1904	1,375,284	1,840,688	3,252,975	6,468,947

### Acreage under Crops, 1904.

The figures for the United Kingdom include the Isle of Man and the Channel Islands.

	Great Britain.	Ireland.	United Kingdom.

Flax . . . .	563	44,293	44,856
Hops † . . . .	47,799	—	47,799
Small fruit . . .	77,947	4,512	82,459
Bare fallow . . .	432,690	4,848	437,538
Orchards ‡ . . .	243,008	—	243,008

\* Excluding 12,808,500 acres returned as mountain and heath land used for grazing in 1904.

† The hop counties are Hants, Hereford, Kent, Salop, Surrey, Sussex and Worcester. Of the total acreage Kent has 29,841 acres. The average yield for the last 10 years has been 466,977 cwt. See produce in 1904 and figures as to imports of hops given below.

‡ The acreage of any crop or grass grown under the trees in orchards is also returned under its proper heading.

Acreage under Cabbage, Kohl Rabi, Rape and Lucerne, 1904.

	Great Britain.	Ireland.	Isle of Man and Channel Islands.
	Acres.	Acres.	Acres.
Cabbage . . . .	64,607	39,665	103
Kohl Rabi . . . .	15,607	—	—
Rape . . . .	97,772	3481	243
Lucerne . . . .	55,724	—	417

Area of Mountain and Heath Land used for Grazing, and of Woods and Plantations, excluding Ireland

	Great Britain.	Isle of Man and Channel Islands.
Mountain and Heath Land used for Grazing.	Acres. 12,788,156	Acres. 20,344
Woods and Plantations . . . .	2,726,116	869

**Numbers of Live Stock, 1904.**

**Horses.**

The figures relate only to horses used for agricultural purposes as stated and unbroken horses, and do not embrace the total number of horses in the country.

	Great Britain.	Ireland.	United Kingdom.
Horses used for agricultural purposes*.	No. 1,120,247	No. 369,785	No. 1,497,274
Unbroken horses: 1 year and above	301,371	93,498	396,288
Unbroken horses: under 1 year	138,618	68,980	208,271
Total of horses	1,560,236	532,263	2,101,833

\* Including mares kept for breeding.

**Cattle, Sheep, and Pigs.**

The figures as to cattle are larger than those for any year since 1892. The number of sheep shows a pronounced decline, but the number of pigs has increased.

	Great Britain.	Ireland.	United Kingdom.
Cows & Heifers in Milk or in Calf . . . .	No. 2,678,680	No. 1,497,819	No. 4,193,893
Other Cattle—Two years and above . .	1,374,636	1,026,665	2,405,979
One year and under two . .	1,429,833	1,035,505	2,474,434
Under one year . .	1,375,203	1,117,143	2,501,659
Total of Cattle.	6,858,352	4,677,132	11,575,965
Ewes kept for Breeding . .	9,880,908	1,524,803	11,435,887
Other Sheep—One year and above . .	5,313,602	722,565	6,040,674
Under one year . .	10,012,668	1,580,516	11,628,513
Total of Sheep	25,207,178	3,827,884	29,105,074
Sows kept for Breeding . .	382,056	133,541	517,621
Other Pigs . .	2,479,588	1,181,982	3,674,471
Total of Pigs . .	2,861,644	1,315,523	4,192,092

**Holdings and Allotments.**

The Board of Agriculture and Fisheries, in collecting the 1903 returns, directed the officers to furnish also an abstract of the number of holdings in Great Britain in separate groups of size. The particulars for Great Britain of different sizes of holdings are:—

Above 1 acre and not exceeding 5 acres	111,357
" 5 acres "	50 "
" 50 " "	300 "
" 300 " "	18,081
Total	512,385

Taking only the holdings above 5 acres, the average size was, for Great Britain, 81 acres in 1885, 80 acres in 1895, and 80 acres in 1903. The larger farms are mainly in the eastern, north-eastern, south-eastern, and east midland districts of England and in Scotland.

Similar particulars were obtained in '85 and '95, and a comparative table may be given to show the result.

**Holdings in Great Britain.**

Years.	Small (over 5 and not exceeding 50 acres).	Medium (over 50 and not exceeding 300 acres).	Large (over 300 acres).	Total Holdings (above 5 acres).
1885	232,955	144,288	19,364	396,607
1895	235,481	147,870	18,787	402,138
1903	232,892	150,055	18,081	401,028

Details for England, Wales, and Scotland are given in the following table:—

	No. of Holdings, 1903.	Acreage under Crops and Grass.	Average Size. 1903.	1895.
England	372,849	24,651,379	66'1	65'3
Wales	60,153	2,800,401	46'6	47'1
Scotland	79,383	4,891,799	61'6	61'5
Total, Great Britain	512,385	32,343,579	63'1	62'6

Concerning allotments of 1 acre and under, these numbered in 1895 579,133; those of less than 1 acre were 541,990, and of 1 acre 37,143. Allotments are still increasing, although less rapidly than formerly. Major Craigie, in his Report to the Board of Agriculture, in the Agricultural Returns of '06, stated, respecting these allotments, that "the wants of certain counties have apparently been fully met, while a tendency to the amalgamation of small plots, and some surrender of allotments, owing to the low prices of vegetable produce, is reported in others."

The Allotments and Small Holdings Association was founded in '85 to assist rural labourers to obtain small allotments of land and to maintain their rights to the charities bequeathed for their benefit in past years. The President is Sir Walter Foster, M.P., and the Secretary Mr. C. D. Sturge. Office, 116, Vivian Road, Harborne, Birmingham.

**Persons engaged in Agriculture.**

In the General Report on the 1901 Census of England and Wales, issued in 1904, the following comparison was made as to the number of persons engaged in Agriculture in the United Kingdom, as enumerated at the last three censuses:—

	1881	1891	1901
Farmers, Graziers Do. Sons or other relatives re- turned as assist- ing in the work on the Farm ..	633,787	597,878	577,177
Agricultural Lab- ourers, Farm Servants .. ..	280,964	297,099	320,976
Gardeners, Nur- serymen, Seeds- men, Florists ..	1,192,725	1,072,059	869,728
Others — Shep- herds, Farm Bailiffs, etc. ..	168,846	199,014	239,689
	86,009	83,706	102,242
	2,362,331	2,249,756	2,109,812

In the same report particulars were given for the period 1851—1901 for England and Wales only as follows:—

**Number of Persons engaged in Agriculture.**

Census Year.	Males engaged in Agri- culture.	Propor- tion per cent. of total males aged 10 years and upwards.	Females engaged in Agri- culture.	Propor- tion per cent of total Females aged 10 years and upwards.
1851*	1,544,087	23·5	168,652	2·4
1861*	1,539,965	21·2	115,213	1·5
1871*	1,371,304	16·8	85,667	1·0
1881	1,288,173	13·8	64,216	0·6
1891	1,233,936	11·6	51,045	0·4
1901	1,153,185	9·5	38,982	0·3

\* The figures for 1851, 1861, and 1871 include the "retired."

The comparison may be affected by changes in classification, and by the fact that carters, labourers, etc., probably returned themselves under different classifications at different censuses. The table, however, shows that the numbers of both sexes engaged in agricultural pursuits have declined continuously throughout the last half-century, just as the amount of arable land cultivated has declined.

The following table gives the total number classed as **farmers and graziers** in England and Wales at each census since 1851. It should be noted that the numbers for 1871 and earlier years include the "retired," whereas those for 1881 and later years do not.

1851	249,431	1881	223,943
1861	249,735	1891	223,610
1871	249,907	1901	224,299

It therefore appears that the number of holders of farms has not materially declined during the half-century from 1851 to 1901.

The number of workers on farms in England

and Wales has, however, declined, as the following table shows:—

Year.	Males.	Females.
1851 . . .	1,232,576	143,475
1861 . . .	1,206,280	90,525
1871 . . .	1,014,428	58,656
1881 . . .	924,871	40,346
1891 . . .	841,884	24,150
1901 . . .	715,138	12,002

This decrease has been partially compensated by the more general adoption of machinery by the farmers themselves, while the number of agricultural machine proprietors and attendants has increased from 4,675 in 1891 to 6,545 in 1901.

The number of nurserymen, seedsmen, florists and gardeners (including domestic gardeners) in England and Wales has increased from 148,285 in 1881, and 179,336 in 1891, to 216,165 in 1901.

The number of woodmen enumerated in England and Wales was 8,151 in 1881, 9,448 in 1891, and 12,035 in 1901.

**Agricultural Labourers' Wages.**

Although time payments in cash form the leading part of agricultural labourers' earnings, the system of remuneration varies very much in different parts of the United Kingdom. Where the hiring system prevails, additional cash payments for piecework, hay and corn harvest, overtime, etc., are few, if any, while allowances in kind, such as board and lodging for unmarried men, and free cottages, potatoes, fuel, etc., for married men, are frequent. On the contrary, while the engagements are shorter and the rates of cash wages are lower in the arable districts of the eastern and southern counties of England, more piecework is done, and extra payments in cash at hay and corn harvests and for overtime can be earned, while men in charge of animals frequently receive lamb money, journey money, free cottages, and other allowances in kind.

The following were the final averages obtained for the earnings of ordinary agricultural labourers in England, and for the classes of labourers most nearly corresponding to them in other parts of the United Kingdom, for '98, according to a report made by the Assistant Commissioner of Labour of the Board of Trade:—

Country.	Average earnings per week in '98 (including the value of all allow- ances in kind).
	s. d.
England ..	16 10
Wales ..	16 5
Scotland ..	18 1
Ireland ..	10 1

From '96 to 1903 there was a progressive increase of wages in England, Wales, and Scotland. The increase was greatest during the five years 1897-1901, and particularly in 1900; but in 1902 and 1903 the upward tendency was not nearly so strong. In Ireland there has been but little change in wages, except in the neighbourhood of the large towns, or districts where railways have been made.

**Produce of Crops.**

The Board of Agriculture issued in Nov. 1904 a Preliminary Statement, showing the Estimated Total Produce of the principal crops in Great Britain in 1904, as follows:—

	Total Produce.	Yield per acre.	Average yield per acre for 10 years '91-'03.
	Bushels.	Bushels.	Bushels.
Wheat . . .	36,880,246	26'82	30'95
Barley . . .	57,193,067	31'07	33'17
Oats . . .	127,407,848	39'17	30'06
Beans . . .	5,828,175	23'12	28'25
Peas . . .	4,482,866	25'77	26'29
	Tons.	Tons.	
Potatoes . .	3,588,254	6'29	5'75
Turnips and Swedes . . .	23,036,129	14'36	12'79
Mangold . . .	7,481,402	18'76	18'30
	Cwts.	Cwts.	
Hay (Clover, Sainfoin, etc.)	69,941,268	30'11	29'13
Hay (Perma- nent Grass) .	117,513,916	24'66	23'63
Hops . . .	282,330	5'91	—

The department of Agriculture and Technical Instruction for Ireland furnished the following statement showing the estimated Total Produce and Yield per Acre of the Principal Crops in Ireland in 1904:—

Crops.	Estimated Produce in 1904.	Estimated Average Rate of Produce per acre in 1904.
	Cwts.	Cwts.
Wheat . . .	556,894	18'1
Oats . . .	17,183,400	15'9

† Hay . . .	121,632,062	76,958,220	198,590,282

\* From Clover, Sainfoin, etc.

† From Permanent Grass.

**Annual Average Prices per Imperial Quarter of English Wheat, Barley, and Oats.**

Cereal Year.	Wheat.	Barley.	Oats.
	s. d.	s. d.	s. d.
1893-94 . . .	25 5	26 5	18 4
1894-95 . . .	21 5	21 5	14 8
1895-96 . . .	24 10	22 4	14 1
1896-97 . . .	28 8	23 2	16 9
1897-98 . . .	36 2	26 11	18 3
1898-99 . . .	26 1	26 1	17 3
1899-1900 . .	26 4	25 0	17 4
1900-01 . . .	27 1	25 0	18 4
1901-2 . . .	28 4	26 0	20 4
1902-3 . . .	26 5	23 0	17 8
Average of 10 years . . .	27 1	24 6	17 4
1903-04 . . .	27 2	21 11	16 4

**Prices of Cattle and Sheep.**

The average prices of British cattle and sheep per stone of 8 lb., sinking the offal, at the Metropolitan Cattle Market, are mentioned in the next table:—

Year.	Cattle.	Sheep.
	Per stone of 8 lb.	Per stone of 8 lb.
	s. d. s. d.	s. d. s. d.
'73 . . .	5 1 to 6 4	5 8 to 6 11
'78 . . .	4 6 to 6 0	5 4 to 6 10
'83 . . .	4 4 to 6 1	6 2 to 7 3
'88 . . .	2 4 to 4 11	3 3 to 5 10
'93 . . .	2 10 to 4 9	3 8 to 5 5
'94 . . .	2 5 to 4 6	3 7 to 5 10
'95 . . .	2 8 to 4 6	3 11 to 5 11
'96 . . .	2 4 to 4 5	3 3 to 5 5
'97 . . .	2 5 to 4 6	3 8 to 5 8
'98 . . .	2 4 to 4 3	3 2 to 5 6
'99 . . .	2 6 to 4 7	3 4 to 5 8
1900 . . .	3 1 to 4 10	3 4 to 6 0
1901 . . .	2 4 to 4 7	3 3 to 5 8
1902 . . .	2 11 to 4 11	3 7 to 5 9
1903 . . .	2 10 to 4 8	3 8 to 5 10

**Diseases of Animals.**

The outbreaks in 1903 were:—

	Great Britain.	Ireland.
Anthrax . . .	761	4
Glanders . . .	1,463	4
Swine Fever . . .	1,478	172
Pleuro-Pneumonia .	—	—
Foot and Mouth . .	—	—
Rabies . . .	—	2

It was in 1899 that the last outbreak of pleuro-pneumonia occurred, and it seems to have been banished from the country. Foot and mouth disease also appears to have been eradicated, there having been no cases since 1902. The number of outbreaks of swine fever has also greatly diminished since the Board took over the powers they are now exercising. On the other hand the number of outbreaks of anthrax and glanders seems to be steadily increasing.

For the first 9 months of 1904 the outbreaks were:—

Anthrax . . . . .	742
Glanders . . . . .	1198
Swine Fever . . . . .	1038

**Imports of Agricultural Produce.**

	1903.		Per head of population.
	No.	£	
Horses . . .	27,266	631,255	
Live { Cattle . . .	522,546	9,209,122	
Sheep . . .	354,241	546,063	
	Cwts.

**III. CO-OPERATION IN AGRICULTURE.**

The Agricultural Organisation Society was established by Mr. R. A. Yerburch, M.P., in April 1901, through the amalgamation of the British Agricultural Organisation Society with Lord Winchelsea's National Agricultural Union. Some progress in the formation of agricultural co-operative societies had already been made by the British Agricultural Organisation Society, but the combination of the two societies has led to increased activity, and has greatly stimulated public interest on the subject of agricultural co-operation. A considerable number of country districts are vigorously taking the matter up, and at last the farmers themselves are beginning to combine for their common benefit. The Agricultural Organisation Society maintains a staff of organisers, and (a) advises with regard to the preliminary steps to be taken in the

formation of a society; (b) supplies model rules giving societies a legal constitution without trouble or expense; (c) gives information concerning the working of other societies, with the object of mutual help and experience; (d) is in a position to negotiate with firms in a manner impossible for a local society; (e) institutes systematic methods of administration in order to secure good management.

The number and nature of Societies affiliated to the Agricultural Organisation Society to Sept. 30th, 1904, was as follows, viz. :—

Societies established for the Supply of Requirements, Sale of Produce, and Improvement of Live Stock . . . . .	62
Dairy, Bottled Milk, and Cheesemaking . . . . .	11
Rural Industries . . . . .	2
Allotments and Small Holdings . . . . .	4
Village Credit Societies . . . . .	9
Water Supply . . . . .	1
Sale of Implements . . . . .	1
Auction Market . . . . .	1

Total . . . . . 91

The President of the Agricultural Organisation Society is Mr. R. A. Yerburgh, M.P.; Chairman of Committee, the Hon. T. A. Brassey; and the Secretary is Mr J. Nugent Harris. The offices are at Dacre House, Dacre Street, Westminster.

The reports of the Irish Agricultural Organisation Society, Ltd., indicate that the agricultural co-operative movement in that country has fully kept up its rate of progress. There were at the end of 1904, 908 societies, including :—

376 Dairies,
160 Agricultural Societies,
226 Agricultural Banks,
36 Poultry Societies,
58 Home Industry Societies,
4 Flax Societies,
28 Bee-keepers' Societies,
3 Federations, and
18 Miscellaneous Societies.

The membership of the societies on Jan. 1st, 1904, was 78,541. One achievement of the Irish Agricultural Organisation Society is the permanent reduction in the price of artificial manure in Ireland, which can now be bought at prices which vary from 25 to 40 per cent. lower than those that ruled before the idea of joint purchase had been taken up. Co-operative societies in Ireland are now placed on equal terms with ordinary traders respecting commissions. The work of the Society has attracted many sympathisers in America, and an association called "The Irish Industrial League of America" has been formed for raising funds to enable the former society to continue this work until the self-supporting stage has been raised. The Irish Agricultural Organisation Society is working hand-in-hand with the Department of Agriculture and Technical Instruction for Ireland.

At a conference of representatives of the Agricultural Organisation Societies of Great Britain and Ireland, held in London in Nov. 1904, it was resolved to promote, in every possible way, joint action between the English and Irish agricultural co-operative movements, and to establish a trade federation of the societies affiliated to the Agricultural Organisation Society. The draft scheme for the carrying out of these resolutions sets forth that the title of the new body will be "The Agricultural Co-operation Federation (Ltd.)," and

the objects in view are stated as follows: "To promote the agricultural co-operative movement in the United Kingdom by carrying on the business of wholesale and retail dealers, brokers, and commission agents for the purchase and sale of farm, garden, and dairy produce, and of all farmers' requirements; to carry on the business of banking, insurance; also that of common carriers; and to engage in any occupation, business, manufacture, or trade in any way whatsoever allied to, or connected with, the farming industry." The offices are to be in London. A body to be called the Council of Control will be elected by the British Agricultural Co-operative Societies, in the proportion of one member for every hundred shareholders, to select from its own body a board of directors to manage the affairs of the federation.

See also **Agricultural Credit Societies** on p. 40.

#### **IV. AGRICULTURAL EDUCATION, SOCIETIES, ETC.**

##### ***Agricultural Education.***

There are several large institutions in Great Britain where a full course of agricultural education, with knowledge of the allied sciences, can be obtained. The following are classed as agricultural colleges: viz.—

- Royal Agricultural College, Cirencester.
- College of Agriculture, Downton, Salisbury.
- University College, Reading.
- University of Cambridge Department of Agriculture.
- University of Leeds.
- South-Eastern Agricultural College, Wye, near Ashford.
- Armstrong College, Newcastle-upon-Tyne: Agriculture and Rural Economy.
- University College of Wales, Aberystwyth.
- University College, Bangor.
- Aspatia Agricultural College, Cumberland.
- Tamworth Agricultural College and Training Farm.

Brewood Grammar School, Staffordshire.

Uckfield Agricultural and Horticultural College and Training Farm, Sussex.

West of Scotland Agricultural College, 6, Blythswood Square, Glasgow.

Dauntsey Agricultural School, West Lavington, Devizes.

Aberdeen and N. Scotland College of Agriculture, Aberdeen.

Aberdeen University made provision in 1904 for conferring the degree of Doctor of Science in Agriculture—D.Sc. (Agr.)—on persons showing the necessary qualifications, and presenting "a thesis or public memoir or work" approved by the Senatus.

##### ***Royal Agricultural Society of England.***

This, the premier agricultural society of the United Kingdom, was founded by Royal Charter on March 26th, 1840. It has two sides to its work: (1) The practical, the chief feature of which is its annual shows, to which the best pedigree animals are brought to compete for the valuable prizes offered by the Society, and still more for the honour of being "Royal" prize-winners, and at which also the newest inventions in agricultural implements and labour-saving appliances are exhibited; (2) The scientific, for which purpose it maintains a complete chemical laboratory for the analysis of feeding stuffs, manures, soils, etc., and

retains the services of Chemical, Botanical, Zoological, and Veterinary experts in order that its members may have at low rates the best scientific advice obtainable. It controls, moreover, an Experimental Farm and "Pot Culture" station at Woburn, where elaborate investigations into crops, soils, feeding stuffs, and other matters connected with agriculture are carried on. Its *Journal* has from the first taken high rank amongst scientific publications and contains in each volume articles by leading authorities on the most important agricultural questions of the day. The Society has, in conjunction with the Highland and Agricultural Society of Scotland, instituted annual examinations for the award of National Diplomas in the science and practice of Agriculture and of Dairying. It seeks in many other ways to foster the study of agriculture, including the publication of insect and other "Diagrams," a Text-book on agriculture (now in its thirtieth thousand), Pamphlets, and lantern slides. The governing body of the Society consists of a President (elected annually), twelve trustees, twelve vice-presidents, and fifty members of council, half of whom go out of office each year. The number of members is about 9500, including nearly all the chief landowners and practical farmers and stock breeders of the country. Membership of the Society entitles to the use of a large and well-stocked library of standard books on agricultural subjects, and a reading-room, at which the principal agricultural newspapers and other periodicals can be consulted by members. Members may obtain skilled veterinary advice in cases of disease amongst cattle, sheep, or pigs, by arrangements made with the Royal Veterinary College. They can also consult the professors of the College at fixed rates, and have the privilege of sending cattle, sheep, and pigs to the College infirmary. The Society makes annually a considerable grant from its general funds in order that members may obtain at low rates analyses of feeding stuffs, artificial manures, soils, etc., by the Society's consulting chemist (Dr. J. Augustus Voelcker, M.A., F.I.C.), whom members may also consult either personally or by letter at a small fee. Reports can be obtained by members from the Society's consulting botanist (Mr. W. Carruthers, F.R.S.) on the purity and germination of seeds, and on diseases or weeds affecting farm crops, at a fee of one shilling in each case. Information respecting any animal (quadruped, bird, insect, worm, etc.) which, in any stage of its life, affects the farm or rural economy generally, with suggestions as to methods of prevention and remedy in respect to any such animal that may be injurious, can be obtained by members from the Society's zoologist, Mr. Cecil Warburton, M.A., the Zoological Laboratory, Cambridge, at a fee of one shilling for each case. The sixty-fifth annual show of live stock, implements, and farm produce was held at Park Royal, the Society's new Permanent Showyard in London, June 21st to 25th, 1904. Patron, His Majesty the King. President for 1904-5, Lord Middleton. Secretary, Sir Ernest Clarke, 13, Hanover Square, W.

#### Other Societies.

The Smithfield Club (Incorporated), formed in 1798, has also to be credited with excellent services in encouraging the breeding and

proper fattening of live stock and exhibiting agricultural produce and implements. Secretary, E. J. Powell, 12, Hanover Square, W.

The British Dairy Farmers' Association. Secretary, W. C. Young, 12, Hanover Square, W.

The Highland and Agricultural Society of Scotland. Secretary, Jas. Macdonald, 3, George IV. Bridge, Edinburgh.

The Royal Dublin Society, of which Mr. Robert Bruce is the Agricultural Superintendent. Secretary, R. J. Moss, F.C.S., F.I.C., Leinster House, Dublin.

The Bath and West and Southern Counties Society. Secretary, T. F. Plowman, 3, Pierrepont Street, Bath.

The Farmers' Club. Secretary, S. B. L. Druce, 2, Whitehall Court, London, S.W.

The Royal Counties Agricultural Society. Secretary, Franklin Simmons, Basingstoke.

The Welsh National Agricultural Society. Secretary, Walter Williams, Cambrian Chambers, Aberystwyth.

The Royal Agricultural Benevolent Institution grants pensions to farmers and their wives and daughters who have become reduced in circumstances. Secretary, C. B. Shaw, 26, Charles Street, St. James's, London, S.W.

Great attention is now being paid to instruction in Dairying, which may be specially studied at The British Dairy Institute at Reading.

The Midland Dairy Institute, Kingston Fields, Derby.

The Dairy Institute, Worleston, Nantwich.

The Dairy School, Kilmarnock, N.B.

The several local Chambers of Agriculture in Great Britain are affiliated to the Central and Associated Chamber of Agriculture (Secretary, A. H. H. Matthews, Broad Sanctuary Chambers, Westminster, S.W.), and concern themselves principally in influencing legislation in the interests of the farmers.

#### Breed Societies.

There is a permanent Royal Commission on Horse Breeding, of which the Duke of Portland, K.G., is President. Sec., J. Herbert Taylor. Office, 12, Hanover Square, London, W.

Other Breed Societies concerned with horses are:—

Shire Horse Society, 12, Hanover Square, W.  
Clydesdale Horse Society, 93, Hope Street, Glasgow.

Hackney Horse Society, 12, Hanover Sq., W.  
Hunters' Improvement Society, 12, Hanover Square, W.

Polo and Riding Pony Society, 12, Hanover Square, W.

Cleveland Bay Horse Society, Norton Carr, Nunthorpe R.S.O., Yorkshire.

Yorkshire Coach Horse Society, The Grange, Appleton Roebuck, Bolton Percy R.S.O., Yorks.

For Cattle the chief societies are:—

Shorthorn Society, 12, Hanover Square, W.  
Hereford Herd-Book Society, 20, East Street, Hereford.

Devon Cattle Breeders' Society, Wiveliscombe, Somerset.

Sussex Herd-Book Society, 12, Hanover Square, W.

English Jersey Cattle Society, 7, Princes Street, Hanover Square, W.

Galloway Cattle Society, Monswald Manse, Ruthwell R.S.O., N.B.

Ayrshire Cattle Herd-Book Society, 58, Alloa Street, Ayr.

Highland Cattle Society, 15, High Street, Inverness.

Jersey Herd-Book Society, St. Helier, Jersey.

English Guernsey Society, 12, Hanover Square, W.

Kerry and Dexter Herd-Book Society, Leinster House, Dublin.

Red Polled Society, *Mercury* Office, Norwich.

For Sheep the leading societies are:—

National Sheep Breeders, Mowbray House, Norfolk Street, Strand, W.C.

Oxford Down Breeders, 11, Queen Street, Oxford.

Southdown, 12, Hanover Square, W.

Hampshire Down, 49, Canal, Salisbury.

Wensleydale, Carperby, Aysgarth.

Leicester, Elms Villa, Great Driffeld, Yorkshire.

For Poultry there are many societies and clubs, including

National Poultry Organisation Society, Sec. E. Brown, F.L.S., 12, Hanover Square, W.

Poultry Club, Sec. T. Threlford, 42, Earham Grove, Forest Gate, London, E.

For Fruit there is the

National Fruit Growers' Federation, Sec. A. T. Matthews, 28, Eaton Rise, Ealing, London, W.

There are three associations devoted to the interests of Pig Breeders:

National Pig Breeders' Association, Ruddington, Nottingham.

British Berkshire Society.

Large Black Pig Society, 64, Oxford Street, Ipswich.

The British Goat Society (Allerton House, Kingston-on-Thames) issues a Herd-Book for that description of stock.

**Albani, Madame**, the vocalist, whose name prior to her marriage with Mr. Ernest Gye was Emma la Jeunesse, was b. in Montreal. No *prima donna* has a more extensive repertoire, and her fame is as great on the oratorio platform as on the lyric stage. She studied under Duprez in Paris, and under Lamperti in Milan. She made a successful *début* at Messina in 1870, and subsequently sang in other Italian theatres, coming to the Covent Garden Opera House in '72. Wagner's "Lohengrin" and "Tannhäuser" owe much of the favour they have received in this country to her intellectual and refined impersonation of the heroines.

She has sung in Paris, Berlin, Vienna, and other Continental cities, and throughout the United States, and is indispensable at the triennial Handel Festivals.

**Albany, H.R.H. the Duchess of**, daughter of the Prince and Princess of Waldeck-Pyrmont, and sister of the Queen-Regent of the Netherlands, was b. Feb. 17th, 1861. She married H.R.H. Prince Leopold of England, Duke of Albany, April 27th, '82, and became a widow by his sudden death ('84). In '88 the Princess lost her mother. H.R.H. receives a pension of £6000 a year from the British Government.

In '99 her son the Duke of Albany, by the renunciation of the eldest son of the Duke of Connaught, became heir-presumptive to the Duchy of Saxe-Coburg; and on the death of Duke Alfred he succeeded (July 31st, 1900).

The marriage of Princess Alice of Albany to Prince Alexander of Teck was solemnised in St. George's Chapel, Windsor, Feb. 10th, 1904.

**Albert Medal, The**, was instituted in 1866 and extended in '67 and '77, for the purpose of rewarding acts of heroism performed by civilians at sea or on land. The recipients of the decoration belong to one of two classes. The first class are awarded a decoration consisting of a gold oval-shaped badge bearing the words on a garter "For Gallantry in Saving Life at Sea," or "on Land," as the case may be. Members of the second class, whose acts of bravery, though meritorious, have not been so striking, receive a bronze badge with the same inscription.

**Alcohol for Industrial Purposes.** In Sept. 1904 the Chancellor of the Exchequer appointed a Committee to inquire into the use of duty-free alcohol for industrial purposes, consisting of Sir Henry Primrose, K.C.B., C.S.I., chairman; Professor Sir William Crookes, F.R.S.; Sir W. H. Holland, M.P.; the Hon. J. Scott-Montagu, M.P.; Lothian D. Nicholson, Esq.; Dr. W. Somerville; Dr. T. E. Thorpe, C.B., F.R.S.; Thomas Tyrer, Esq. The terms of reference are: "To inquire into the existing facilities for the use, without payment of duty, of spirits in arts and manufactures, and, in particular, into the operation of Section 8 of the Finance Act, 1902; and to report whether the powers conferred upon the Commissioners of Inland Revenue by this section permit of adequate facilities being given for the use of spirits in manufactures and in the production of motive power, or whether further facilities are required; and, if it should appear to the committee that the present facilities are inadequate, to advise what further measures could be adopted without prejudice to the safety of the revenue derived from spirits and with due regard to the interests of the producers of spirits in the United Kingdom." All communications should be directed to Sir Henry Primrose, K.C.B., at Somerset House, Strand, W.C.

**Ambulance Association, St. John.** Established in 1877, by the Duke of Manchester, and the Chapter of the Order of St. John of Jerusalem, for the purpose of disseminating general information as to the preliminary treatment of the sick and injured among all classes of society. A course of instruction is given to students, and considerably over 500,000 certificates have been awarded to persons of both sexes. An Invalid Transport Corps has also been formed. The work has been extended to the East and West Indies, Canada, China, Australia, New Zealand, and different parts of Europe and Africa. President, H.R.H. the Prince of Wales, K.G.; Chairman, The Marquis of Breadalbane, K.G.; Chief Secretary, Col. Sir Herbert C. Perrott, Bart., C.B. Head Offices, St. John's Gate, Clerkenwell, London, E.C.

**Andorra.** A republic under the joint suzerainty of France and the Spanish Bishop of Urgel. Area, 175 sq. m.; pop. 6000.

**Annunzio, Gabriele d'**, Italian poet, was b. 1864 on a boat in the Adriatic, educated in a college at Prato, near Florence, and studied in Rome, where he is said to have led a very unconventional life. He now lives, alternately, at Naples, Chieti, or in his country seat at Francavilla. He was elected, in '98, a deputy in the Italian Parliament. His friendship with the great actress, Duse (*q.v.*), seems to have become important for both. His first volume of verse, "Primavera," appeared in '79, and was followed by "In Memoriam," '80; "Canto novo," '82;

"Intermezzo di reine," '83. Their great talent was marked by extreme sensuousness, which, later on, changed into, or allied itself with, pessimism. His "Odi Novelli" reached their 9th edition in '99. Of his numerous novels, the first, "Terra Vergine" appeared in '82; it was followed by a long series, showing at the side of abundant poetry, a far-reaching realism. "Il Piacere" obtained ten editions between '89 and '98. He seems influenced by modern French and Russian writers. He then turned to the drama with "Un Sogno d'un Mattino di Primavera." In his play "Giaconda" he triumphed in pathos, greatly helped by Signora Duse, who also played in "Francesca da Rimini," which she produced at the Adelphi in 1903.

**Antiquaries of London, Society of,** Burlington House. **Assist. Secretary,** W. H. St. John Hope, M.A.).

### ARABIA.

Arabia is a large peninsula in S.W. Asia having an area of about 1,000,000 sq. miles, and a population of about 12,000,000. The provinces of Hedjaz and Yemen, contained in it, are under Turkish rule. Hedjaz contains 96,500 sq. m., and a pop. of 300,000. The Hedjaz camels are bred here, and about 20,000 are sent annually to Syria. Yemen has an area of 73,800 sq. m., and a pop. of 750,000. Mecca, besides being the goal of Mahometan pilgrims, is the chief distributing centre for Central Arabia. Outside these settled provinces the country is practically divided between the Bedouin tribes, the chief of which, the great Shammar tribe, has its centre at Hail, with a permanent population of about 10,000; and the fanatical Wahabite tribes of the oases, whose gathering-place and centre is at Riadh. Under Mohammed Ibn Rashid, the sheikh of the Shammar tribe, the Wahabite tribes were brought under the Bedouin control from Hail as a centre. Ibn Rashid died in '97, and his nephew Abdul Aziz Ibn Rashid succeeded him and was supported by the Turks. He it was who advanced against Koweyt, a town of about 25,000 inhabitants, on the Persian Gulf, which has been spoken of as the terminus of the proposed German railway from Constantinople through Baghdad; and this led early in 1901 to a raid by Sheikh M'Baruk of Koweyt into Jebel Shammar, which ended in a severe defeat. However, in the course of subsequent fighting this was avenged, and the Wahabite chief, Abdul Aziz bin Feysul, with whom Sheikh M'Baruk allied himself, installed himself at Riadh as Ameer of Nejd, and Ibn Rashid was driven back to Hail. Turkey has claimed that Koweyt comes under her administration, but this Great Britain has refused to allow, and in Aug. 1901 British ships supported M'Baruk in resisting Turkish pretensions. British influence in Arabia is exercised in the case of Oman (*q.v.*) through the Sultan of Muscat. Great Britain and Turkey came to an agreement, Nov. 15th, 1901, for the delimitation of their spheres of influence between Aden and Yemen. The chief exports are sheep and goat skins, mother-of-pearl, and gum, but all in very small quantities.

**British Consul at Jiddah,** S. P. Devey.

### ARCHÆOLOGY, 1904.

The chief event in the archæological year has resulted from the **British Expedition to Tibet**, inasmuch as those who accompanied

that expedition were able to see for themselves not only the famous figure of Buddha, which had hitherto been seen but by two Europeans before, but also the temple in which it was preserved, the various other images that surrounded it, their wrought-iron chain doorways, and the various treasures preserved in the temples and monasteries of Lhasa.

Second to that must be mentioned a great archæological loss—the destruction by fire of a large portion of the **library of Turin**, occasioning the loss of more than 100,000 volumes, and many manuscripts of unique importance, including 400 codices.

The principal discoveries have been made in the island of Crete, in Greece, and in Egypt. In Crete, Dr. Evans has continued the excavations of Knossos, revealing many fresh treasures of the famous temple and city. His rivals in the same island, the Italian archæologists, have found important mural decorations, gold ornaments, vases, and inscriptions. In Greece, the site of the sanctuary at Delphi has been uncovered, and in the island of Samos important discoveries have been made in connection with the temple of Hera. In Rome, the pavement of the **Basilica Nova**, in the Forum, has been revealed; but, more interesting still, that which the Romans considered to be the **gulf of Curtius** has been discovered, and the columns of the temple that was erected close by it.

The work in Egypt has been mainly in connection with the **Beni Hassan excavations**, and the result was shown to the public in an important exhibition at Burlington House during the summer. Our knowledge of the life of the ancient Egyptians is steadily becoming more accurate and scientific, thanks to the discoveries made in these excavations. Very important papyri have been found at **Oxyrhynchus**, and Dr. Grenfell and Dr. Hunt have published the fourth part of their work on these papyri, containing "The New Sayings of Jesus," the fragment of the lost Gospel, the new Epitome of Livy, and the recently discovered work by Pindar. In connection with Egypt it must be recorded that the fear entertained as to possible damage at Philæ by reason of the new Nile dam has been justified, and the famous columns have suffered irretrievable damage by what must, however, be considered as a European necessity and a great Egyptian advantage.

Steady work has been going on in the valley of the Tigris, and five palaces and a temple have been revealed in the city of **Assur**. Some wonderful mural decoration has rewarded the searchers, and a large number of inscribed bricks have been found, giving new information as to the history of the Assyrian nation.

In **British Honduras** an expedition set forward to examine the ruins reported to exist in the mahogany forests, and the result has been the discovery of some great pyramids and other remains of a civilisation of which hardly anything hitherto has been known.

The archæological side of art has received great advantage from two exhibitions: one of German primitive pictures at **Düsseldorf**, and one of French primitive art in **Paris**. Elaborate illustrated works have been prepared on each exhibition, and the pages of the *Athenæum* have had a series of scholarly articles on the show at Düsseldorf, from the pen of Morelli's pupil, Miss Ffoulkes.

Steady work has been in progress at **Hercu-**

laneum, revealing some fresco work, many objects of domestic interest, and some beautiful silver vessels; but, owing to the intense hardness of the soil, work is very slow and very costly in that city.

In England it is pleasant to record the gift to the city of Sheffield by the Duke of Norfolk of the ancient British camp of *Winobank*, by which that very important encampment is absolutely saved from destruction. Considerable interest has been raised in connection with the proposed destruction of an Edwardian wall at *Berwick-on-Tweed*, and it is to be feared that the people of that town do not yet realise how serious the proposed destruction would be. In Croydon the excitement as to *Whitgift's* hospital has produced the desired effect, and this beautiful building is safe, certainly for the present. Some action on the part of the *Old Guildford Society*, with respect to a mediæval crypt in the High Street of that town, has averted the serious injury which at one time it was proposed to carry out upon this important undercroft. There has been a great deal of correspondence as to certain cottages at *Stratford-on-Avon*, believed to have been contemporary with Shakespeare, and the decision of the trustees to retain them intact has been welcomed by all archaeologists. The Chapel of the *Pyx*, almost the only part of *Westminster Abbey* going back to the time of Edward the Confessor, and the most interesting part of the Abbey, is to be opened to the public.

Other archaeological work that should be referred to relates to the excavations at *Ludlow Castle*; the opening up of several important cairns on the *Isle of Bute*; the discovery of some wonderful mural frescoes at the village church of *Trotton*, near *Midhurst*; the excavations in *Paris*, revealing the lower part of the walls of the *Louvre*; and the discovery of a large quantity of mammoth remains at *Sittingbourne*. The finding of twenty original sketches by *Michael Angelo* in *Florence*, is an event that should not be overlooked.

Amongst the exhibitions of minor importance, the one of historical pictures at *Oxford*, that of pewter at *Clifford's Inn*, and that of local antiquities at *Southampton*, must be recorded. In the case of the *Oxford* exhibition an admirable illustrated catalogue has been prepared, and similar works relative to the pewter exhibition and the *Southampton* antiquities are in progress. In this connection, the *Musical Exhibition* which took place at *Fishmongers' Hall* in *June*, and at which an unrivalled collection of old instruments, scores and portraits was brought together, must not be overlooked.

During the year the only known manuscript of "*Paradise Lost*," written by a contemporary scrivener for the purposes of the censor, was brought to auction, and disposed of to an American collector; while, thanks to the generosity of its owner, the manuscript by *Keats* of his "*Hyperion*" passed into the possession of the *British Museum*.

Some interest has been aroused with regard to the *Roman stonework* preserved in the *Guildhall*, and pressure is being brought to bear upon the *City of London* to give the very valuable remains in their possession a better chance of being seen and examined by the archaeological public.

The famous bronze mirror-case from the *Hawkins* collection came under the hammer at *Christie's*, and has been acquired by the

*British Museum*, whose grant for the purpose has been supplemented by various generous gifts. At the same sale-rooms the *Bacon silver cup*, made from the *Great Seal*, was sold for the record price of £2500.

The various archaeological societies have had their usual gatherings; one of the most successful of all provincial meetings was the jubilee of the *Surrey Archaeological Society*, held at *Guildford*. Two new societies have been formed: the *British Numismatic Society*, which has attained a remarkable success and filled up the whole of its membership within the year; and the *Catholic Record Society*, which bids fair to be most useful in its work.

Two other events should be noticed: one the purchase of the famous collection of armour belonging to the *Duc de Dino*, obtained for the *New York Museum*; and the other the discovery of the original miniature of *Anne of Cleves*, painted by *Holbein* for *Henry VIII.* This famous portrait has passed into the hands of *Mr. Salting*.

Of archaeological books the volume on the manuscripts at *Hatfield*, the one on the history of the *Yeomen of the Guard*, the account of the *King's Armoury* (by the *King's Armourer*), "*English Monastic Life*" (by *Abbot Gasquet*), *Miss Jekyll's* work on "*Old West Surrey*," and the new book on *Fountains Abbey*, merit attention.

The annual Congress of the 39 *Archæologica Societies* was held in *July*, and considerable attention was given to the various schemes for recording *British camps*, local documents, names, effigies, charters, and earthworks.

The obituary includes the names of *Professor Mommsen*, *Sir Albert Woods*, *Mr. Moens*, *Mr. Latimer*, *Dr. Murray*, and the *Rev. W. D. Parish*.

The *British Archæological Association* (*Sec.*, *George Patrick, A.R.I.B.A.*) has its offices at 32, *Sackville St.*, *W.*

The *Royal Archæological Institute of Great Britain and Ireland* (*Hon. Sec.*, *W. Hale-Hilton*) has its offices at 20, *Hanover Square, W.*

*Architects, Royal Institute of British.* Founded in 1834, for the general advancement of architecture and for promoting and facilitating the acquirement of the knowledge of the various arts and sciences connected therewith. It was incorporated by royal charter in '37, and obtained a new charter in '87, conferring greatly extended powers. *Secretary*, *Mr. W. J. Locke.* *Offices*, 9, *Conduit Street, Hanover Square, W.*

*Architects, The Society of.* Founded in 1884 and incorporated by the *Board of Trade* in '93, it advocates the statutory examination and registration of all persons entering the profession of architecture. The Society has enrolled over 600 members. Its examinations are held twice a year, in *April* and *October.* *Office of Secretary*: *Staple Inn Buildings, Holborn, W.C.*

*Architectural Association, The (London).* Its objects are to provide facilities for the study of architecture, and to be a medium of friendly communication between the members and others interested in architectural progress. Instruction is given by lectures and classes, and a studio, each of which is under the management of a paid instructor or lecturer. This education extends over four years, and includes preparation for the intermediate and final examinations of the *R.I.B.A.* The entrance

fee is £2 2s., and the annual subscription £1 1s. Sec., D. G. Driver. Office, 18, Tufton Street, Westminster.

## ARGENTINE REPUBLIC.

The Argentine Republic is a group of 14 provinces and 10 territories, with an extensive seaboard on the east coast of South America. The boundary between the Republic and Chili, which had been the cause of much friction, was submitted to the arbitration of King Edward VII., whose award was published on Nov. 20th, 1902 (see ed. 1903 for details). A general treaty of arbitration was also concluded between the two countries on Aug. 12th, 1902.

The constitution of 1853, modified in '60 and '98, closely resembles that of the United States. It vests the executive power in the hands of a President, who is also Commander-in-chief of the troops, elected by representatives of the provinces for six years, not being re-eligible; and the legislative authority in that of a Senate of 30 members, two chosen by the capital and two by the legislature of each province, and a House of Deputies of 120 members elected for four years by the people, one-third of the Senate retiring every three years and one-half of the House retiring every two years. The Session lasts from May 1st to Sept. 30th.

The Army is sanctioned by an annual vote, as in Great Britain. The standing force and reserve consist of 120,000 men (18 battalions of infantry, 10 regiments of cavalry, 8 of artillery, and 4 battalions of engineers). Outside these are the national and territorial guard, which have little training. Compulsory military service was adopted in 1901, and it is believed that 500,000 men could be mobilised in case of war. Service in the active army is of 2 years, but a large proportion of men serve for a much shorter period. They are in the reserve up to 20, the national guard up to 36, and the territorial guard up to 41.

The Navy is administered by a Ministry of Marine. Of the personnel 2000 are conscripts, called up annually and serving for two years, the remainder are volunteers. There are 321 executive officers and 158 engineer officers on the active list, and from 5000 to 6000 men. The executive officers are divided as follows: 1 vice-admiral, 2 rear-admirals, 3 commodores, 11 captains, 42 commanders, 30 lieutenants, 91 sub-lieutenants, 81 midshipmen, and 60 cadets. The strength in ships built on Nov. 30th was:—

Battleships	1
Coast defence vessels	4
Armoured cruisers	4
Protected cruisers	5
Torpedo vessels	5
Torpedo-boat destroyers	3
Torpedo boats	22

The principal dockyards are situated as follows:—

**San Fernando.** Three small docks take cruisers.

**Puerto Belgrano.** One large dock takes battleships.

**Buenos Ayres.** Very limited accommodation. The provinces elect their own governors and legislatures, and have complete control over their internal affairs. The State religion is Roman Catholic, but all others are tolerated. Education is free, secular and compulsory between 6 and 14. There are 453 elementary

schools, with 460,229 scholars. The climate of the country is temperate and healthy. The rich mineral resources are beginning to be developed. Farming and stock breeding are, however, the chief industries of the country, and they are extending rapidly. The cultivation of cotton has been seriously undertaken in the semi-tropical districts of the Chaco, and in Misiones. The chief exports are wool, cattle and sheep, frozen meat, hides, butter, and grain. There are several Jewish agricultural colonies, promoted by the Jewish Colonisation Association. Length of railways, 11,000 miles, connecting the capital with the principal cities of the Republic. Telegraphs, 27,500 miles, connecting all the Republic.

Area, 1,135,840 sq. miles; population, 5,500,000, the great majority of Spanish origin and of other European countries. Capital of the republic, Buenos Ayres, with 960,000 inhabitants. Other large towns are Rosario, pop. 140,000; Cordoba, 60,000; and Tucuman, 50,000. Capital of the province of Buenos Ayres, La Plata. Revenue, 1902, £13,158,650; expenditure, £16,489,045. Estimated revenue, 1903, £14,763,200; 1904, £14,189,440; estimated expenditure, 1903, £14,748,730; 1904, £14,218,000. The foreign debt in 1903 was £76,216,550, and the internal debt £10,168,410, of which £6,687,730 was a paper currency and £3,480,680 a gold debt. Imports, 1903, £26,241,320 (£1 = \$5); exports, £44,196,900. The United Kingdom has the largest individual share both of imports and of exports, taking 19.6 per cent. of the exports and sending 35.9 per cent. of the imports in 1902. Germany and the United States each send about 13 per cent. of the imports. In 1903 the United Kingdom sent 34.2 per cent., Germany 13 per cent., and the United States 12.7 per cent. of the imports, and took respectively 16.1 per cent., 12.1 per cent., and 3.6 per cent. of the exports. There is said to be about £250,000,000 of British capital invested in Argentina.

President, Señor Manuel Quintana: assumed office Oct. 12th 1904.

Vice-President: Señor J. F. Alcorta.

Ministry: Minister of the Interior, Señor Rafael Castillo.—Foreign Affairs, Señor Rodríguez Larreta.—Finance, Señor Terry.—Justice and Public Instruction, Señor Gonzalez.—War, Gen. Godoy.—Marine, Capt. Martin.—Agriculture, Señor Torino.—Public Works, Señor Orma.

Legation in London, 2, Palace Gate, W.—Minister, Don Florencio L. Dominguez.—Consul-General, Dr. S. Garcia Uriburu, 3, Budge Row, Cannon Street, E.C.—Consul, Alfredo O. Lumb.—Vice-Consul, Francisco J. Torrome.

British Minister at Buenos Ayres, W. H. D. Haggard, C.B.—Secretary, F. D. Harford.—Consul, A. C. Ross, C.B.—Consul at Rosario, H. Mallet.

## History, 1904.

The elections for the renewal of one-half of the seats in the Chamber of Deputies took place (March 15th) under the new electoral law, allowing to each elector only one vote. The result was a victory for the National party, the Opposition winning only 9 constituencies out of a total of 60. Of the 9 seats, one was gained by a Socialist.

An International Health Exhibition was opened (April 4th). Señor Manuel Quintana

was elected President (June 12th), and Señor Jose Figueroa Alcorta, Vice-President. The new President formally assumed office (Oct. 12th). He said that the Government intended to amend the electoral law, to consider (if the state of the Treasury permitted) the conversion of the Foreign Debts, to reform the judicial and educational systems, and to encourage agriculture and stock-raising.

**Armagh, The Most Rev. William Alexander, Archbishop** of, D.D., D.C.L. Oxon., LL.D. Dublin. He is the son of the Rev. R. Alexander, Prebendary of Aghadoe, and was born April 13th, 1824. Ed. at Tonbridge School, and Exeter and Brasenose Colleges, Oxford. Having been curate and rector of several parishes in Ireland, and Dean of Emly, he was in '67 appointed Bp. of Derry and Raphoe, and in '96 Archbp. of Armagh and Primate of the Protestant Episcopal Church of Ireland. There is a Roman Catholic Archbp. of Armagh (see Index). Dr. Alexander has published a number of theological works, and "The Finding of the Book and other Poems." He is the only living prelate appointed by the Crown. The Palace, Armagh.

## ARMY, THE BRITISH IMPERIAL.

### I. ADMINISTRATION.

War Office Reconstitution.  
The Committee of Imperial Defence.  
The Army Council.  
Duties of War Officials.  
The Inspector-General of the Forces.  
The Director of Army Finance.

### II. ARMY ORGANISATION.

The Reorganisation Scheme.  
Financial Effect.  
The Auxiliary Forces Commission and Conscription.  
General; Army Corps, Districts, etc.  
Regular Army.  
The Army Reserve.  
Militia.  
Imperial Yeomanry.  
Volunteers.

### III. EFFECTIVES AND DISTRIBUTION.

Whole Army; Establishments and Strength.  
Actual Strength of Arms; Regular Army.  
Distribution of the Regular Army.  
Army Reserve.  
Militia.  
Imperial Yeomanry.  
Volunteers.

### IV. MAINTENANCE.

Estimated expenditure, etc.  
Normal Expenditure, 1895-1905.  
Cost of Imperial Defence.  
Military Expenditure of Foreign Powers.

### V. TERMS OF SERVICE.

### VI. THE INDIAN ARMY.

### VII. COLONIAL FORCES

#### I. Administration.

When the 1904 ANNUAL was published, the War Office (Reconstitution) Committee, which consisted of Viscount Esher as chairman, Admiral Sir John Fisher, and Colonel Sir George

Sydenham Clarke, had not presented its report. The Report appeared in three parts—the first dated Jan. 11th, the second Feb. 26th, and the third March 9th, 1904. In pursuance of the recommendations, a complete breach with the past has been made in the administration of the British Army. The Committee had been directed by the terms of its reference to take the Admiralty system as to the basis of its action, and the result of its deliberations has been to institute what is practically a copy of the system of the Admiralty Board.

#### The Committee of Imperial Defence.

As a preliminary to its recommendations, the Committee made a momentous suggestion for the reconstitution of the Defence Committee of the Cabinet as an institution to consider all questions of Imperial Defence from the point of view of the Navy, the Military Forces, India, and the Colonies; to obtain and collate information from the various departments of the State; to prepare any documents required by the Prime Minister; to furnish such advice as might be required; and to keep adequate records for the use of the Cabinet of the day and its successors. The machinery to be provided for the work was the Secretariat or "permanent nucleus" of the Committee, which has since been constituted.

In August an estimate was presented in the House of Commons for expenses in connection with the Committee for Imperial Defence, the Treasury having approved the financial provisions necessary for the creation of the Secretariat. The Secretary is appointed for five years, with a normal salary of £1500; but Sir George Clarke, the first holder of the office, receives £2000, and has as his colleagues two Assistant Secretaries, nominated respectively by the Admiralty and the War Office, and appointed for 3 years, with salaries at the rate of £500 per annum. The original proposal was upon a more extensive scale, but it has been explained that the present organisation is regarded as a beginning. The great advantage of the arrangement is that it will enable a vote to be taken in the House each year after a discussion of matters relating to Imperial Defence as a whole. This was never possible in the discussion of Army and Navy votes separately.

The Prime Minister is Chairman of the Committee of Imperial Defence, whose members are the chief officers of the Admiralty and War Office.

#### War Office Reconstitution.

The other recommendations of the Esher Committee may be grouped under the following heads. (Notes are added indicating the direction in which the work of reorganisation and reconstitution is going forward.)

(a) The institution of an Army Council to undertake the duties and business of the War Office. (See below.)

(b) The creation of a trained General Staff of the Army as one of the most pressing military needs. (A beginning has been made by the creation of the Department of the Chief of the General Staff (see below, Army Council), but Treasury opposition has delayed the work, and the organisation of the new General Staff of the Army will be a work of years.)

(c) The separation of administrative from ex-

ecutive military functions. (In the Aldershot command—formerly the 1st Army Corps—a new arrangement of the staff provides for this distinct allocation of duties, and is to be noticed as an important step towards the intended reconstitution of military duties in the commands. The system is to be extended.)

(d) The complete decentralisation of administrative work. (This is a gradual work, to report upon which a committee was appointed. The decentralisation will be carried out in connection with the strengthening and reorganisation of the District Commands.)

(e) A thorough system of Army Inspection (The Department of the Inspector-General of the Army has been created: see below.)

(f) Many important financial changes. (This is a gradual work. An Army Finance Department has been created—see below—with the purpose of amalgamating the Army Pay Department with the Accountant-General's Department.)

(g) A redistribution of duties within the War Office. (The many changes effected threw the War Office into temporary confusion, but progress is being made. See below—Other Changes.)

(h) Various changes with a view of increasing the authority and responsibility of the officer to bring about higher efficiency in the Army. (These have reference to investing officers with financial responsibility by rearranging duties, and to a better system of training, which is being introduced in the Aldershot Command.)

(i) A change of personnel in order to bring new minds in order to bear upon new measures. (In relation to the latter question the Committee insisted that "new measures demand new men," and the result was that the former heads of the War Office were summarily removed from their positions, and their places taken by new officials.)

### The Army Council.

The new Board created under this name by a patent dated Feb. 6th consists of the Secretary of State, described as its "President," four military members, and two civil members. The members of the Council act in a dual capacity: (a) as colleagues of the Secretary of State at the Council table; (b) as superintendents of the several branches into which the business of the War Office is divided.

The Military Members are thus, under the patent, the organising and administrative heads of the War Office, each responsible with the Secretary of State for the work of the War Office, and each for the efficient working of the branches under his individual control. The law officers of the Crown endeavoured to provide for the single responsibility of the War Minister, while leaving unimpaired that of the members of the Council. By an order in Council dated August 10th the duties of the members of the Army Council were defined, and it was noted, as presenting a certain disparity with the patent, that the Secretary of State was made responsible for "all the business of the Army Council." The first Military Member (Chief of the General Staff), the second Military Member (Adjutant-General), the third Military Member (Quartermaster-General), and the fourth Military Member (Master-General of the Ordnance) are under the terms of this order "responsible to

the Secretary of State for the administration of so much of the business relating to the organisation, disposition, *personnel*, armament, and maintenance of the Army as shall be assigned to them or each of them from time to time by the Secretary of State." The Finance Member is responsible for the Finance of the Army and for other business that may be committed to him, and in the same way the Civil Member is responsible for the non-effective votes and for any other business assigned to him.

### Allocation of Duties.

The Secretary of State (Mr. H. O. Arnold-Forster, M.P.) is responsible to the Crown and Parliament as indicated above, and has general direction and supervision of all War Office business.

The Chief of the General Staff (Lieut.-Gen. Hon. Sir N. G. Lyttelton, K.C.B.) deals with the military defence of the Empire, the collection of intelligence, the training of the forces, their use in war, war organisation, the education of officers, the selection and administration of the General Staff, and telegraphs, signalling and associated matters. The duties are discharged under his authority by the Director of Military Operations (Major-Gen. J. M. Grierson, R.A.), the Director of Staff Duties (Major-Gen. H. D. Hutchinson), and the Director of Military Training (Major-Gen. Hon. Sir F. W. Stopford, K.C.M.G.).

The Adjutant-General (Major-Gen. C. W. H. Douglas, C.B.) is concerned with the raising and organising of the military forces, the maintenance of the Army abroad, the distribution of units, regulations for placing units on a war footing, personal questions, medical and sanitary matters, discipline, ceremonial matters, administrative arrangements connected with training, and the selection and administration of the Departmental Staff. The heads of the branches are the Director of Recruiting and Organisation (Major-Gen. H. S. G. Miles), the Director of Personal Services (Major-Gen. W. E. Franklyn), the Director-General of Army Medical Services (vacant), and the Director of Auxiliary Forces (Major-Gen. W. H. MacKinnon).

The Quartermaster-General (Maj.-Gen. H. C. O. Plumer, C.B.) deals with organising and training the Transport, Remount, and Supply Services; the settling of reserves of food, clothing, equipment, etc., to be held in depots, garrisons, and mobilisation stores, and the scales on which articles are to be supplied to the troops; the holding and issuing of military stores; the administration of departmental services, and the selection of officers for employment in them. The heads of the branches are the Director of Transport and Remounts (Major-Gen. F. W. Benson), under whom is the Director-General of Army Veterinary Services (Col. H. Thomson), the Director of Movements and Quarterings (Brig.-Gen. H. M. Lawson), the Director of Supplies and Clothing (Major-Gen. R. Auld), and the Director of Equipment and Ordnance Stores (Major-Gen. F. E. Mulcahy).

The Master-General of the Ordnance (Maj.-Gen. Sir J. W. Murray, K.C.B.) is concerned with armament, including mines and lights; coast defences; reserves of arms of all kinds and ammunition; patterns; provisions and inspection of guns, small-arms, ammunition, etc.; the direction and financial control of manufacturing departments except clothing; inventions; con-

struction and maintenance of fortifications; stores, buildings, and ranges; the *personnel* of manufacturing and inspection staffs; technical questions affecting artillery and engineer services; contracts for guns, ammunition, and stores. The principal officers in the department are the **Director of Artillery** (Col. C. F. Hadden) and the **Director of Fortifications and Works** (Col. R. M. Ruck).

The **Parliamentary Under-Secretary of State**, being the **Civil Member of the Army Council** (the Earl of Donoughmore), has special duties, including supervision of large barrack and hospital construction, and has under him the **Director of Barrack Construction** (Mr. H. B. Measures, F.R.I.B.A.) and the **Chaplain-General** (Right Rev. Bishop J. Taylor Smith, D.D.).

The **Financial Secretary and Finance Member of the Council** (Mr. W. Bromley Davenport, M.P.) is the **Financial Secretary**, made a colleague of the **Military Members**, and has as his executive officer the **Director of Army Finance** (Sir G. D. A. Fleetwood Wilson, Assistant Under-Secretary of State), who administers non-effective votes, and whose duties, defined by Order in Council, are given below.

The **Secretary of the Army Council** and of the War Office (Col. Sir Edward Ward, K.C.B., Permanent Under-Secretary of State) is the former Assistant Under-Secretary of State, and the work of his department is conducted through several branches. He is charged with the interior economy of the War Office and the preparation of all official communications of the Army Council. The **Naval Adviser** to the Army Council is Capt. R. P. F. Purefoy, R.N.

#### The Inspector-General of the Forces.

The necessary corollary of these changes was the disappearance of the Commander-in-Chief (Earl Roberts, who was publicly thanked by the King in an Order to the Army issued Feb. 18th, 1904) and the creation of a new office—that of the **Inspector-General of the Forces**. The Army Council administers but does not command the Army, the executive command being vested in generals outside the War Office, and the **Inspector-General** has the duty of inspecting every branch of military work. The **Duke of Connaught** has been appointed to this high and important position, and his duties were defined by Order in Council on August 10th. They are as follows: "Under the orders and directions of the Army Council, to review generally and report to the Army Council on the practical results of the policy of that Council, and for that purpose to inspect and report upon the training and efficiency of all troops under the control of the Home Government on the suitability of their armament and equipment, on the condition of fortifications and defences, and generally on the readiness and fitness of the Army for war."

#### The Director of Army Finance.

The functions of this officer have likewise been defined, by Order in Council, August 10th. He acts as deputy and assistant to the **Finance Member of the Council**, as accounting officer of Army votes, accounts, and funds, being thus charged with the allowance and payment of all moneys for Army services, with accounting for and auditing expenditure and preparing annual accounts, and generally with the duty of audit

and with advising the administrative officers at the War Office, and in command on all questions of Army expenditure.

#### Other Changes.

Many other changes proposed by the Esher Committee have been introduced, but a Finance Committee at the War Office is now investigating certain of the proposals. The details of work within the War Office have undergone changes with a view of simplifying procedure and decentralising the business. In relation to decentralisation the purpose is to establish **Administrative Districts** to which a large part of the business of the War Office can be delegated, the higher duties of administration devolving upon the major-generals in command, who would deal with mobilisation, ranges and training grounds, barracks, lands, supply, local transport, remount purchases, hospitals, stores, and some appointments. For the command and training of the troops there were to be **five Military Commands**—the Army Corps (now the "Striking Force" of the Aldershot Command), and the Northern, Eastern, Western, and Irish Commands. These arrangements will be introduced progressively.

### II. Army Organisation, Reorganisation Scheme, Auxiliary Forces Commission, Regular Reserve, Militia, Imperial Yeomanry, and Volunteers.

#### The Reorganisation Scheme.

The long-expected announcement of the new scheme of **Army Reorganisation** was made in the House of Commons by Mr. Arnold-Forster on July 14th, and has ever since been the subject of much discussion and criticism. Military opinion recognises it to be right in general principle, but to be defective in application. The Government was influenced and controlled by two antithetical considerations—a demand for higher efficiency combined with greater readiness, and at the same time for pecuniary retrenchment. The principle was admitted that the Navy is the bar against invasion on a great scale; that the Army must be prepared for foreign service, with large reserves; and that military preparations at home must be directed solely to the meeting of hostile raids. The old system had given good results during the War in certain respects, but it had ceased to furnish the requisite drafts of trained and efficient men for India, and a change was felt to be inevitable. Accordingly, the new scheme proposed to divide the **Regular Army** into two parts—viz., a **General Service Army** and a **Home Service Army**.

The **General Service Army** would serve abroad and at home, and the men would enlist for nine years with the colours followed by three in the Reserve. (In October 1904 these terms of service were laid down for the Infantry, instead of the three years' service, which had been introduced for the whole Army by Mr. Brodrick.)

The **Home Service Army** would serve at home in peace, and abroad, if necessary, in time of important war, the men enlisting for two years with the colours and six years in the Reserve. (No provision has yet been made for instituting

this Home Service Army, but it is known that certain battalions will soon be opened for short-service enlistment.)

A part of the scheme which has been carried into effect is the creation of a **Striking Force** ready for immediate service, being the troops of the Aldershot command. The four **Army Corps** have been abolished, and are now known as "commands." It was recognised to be unnecessary to maintain an infantry battalion at home for every battalion abroad, according to the old system, and it is contemplated to absorb 14 of the more recently raised battalions, as well as the 5 battalions of the Royal Garrison Regiment. These proposals have excited considerable opposition.

Turning to the **Home Service establishment**, it is intended to territorialise 38 line battalions, with a peace strength of about 500, to be permanently located at home in time of peace. (This is another part of the proposals that has met with considerable opposition.) According to the scheme there would be 10 battalions of Foot Guards and 26 General Service and 71 Home Service battalions at home, with a total strength of 67,023; 26 General Service battalions in Egypt and the Colonies (strength, 22,438); and 52 General Service battalions in India (strength, 53,924); making a total of 143,385. This scheme was based on a supposition that certain battalions now abroad could be withdrawn.

In regard to the **Royal Horse and Field Artillery**, it is proposed to deal with them in the same way as with the Infantry; assigning 100 batteries, including the Horse Artillery, to General Service, and a new organisation is under consideration for the Cavalry.

As to the **Militia**, Mr. Arnold-Forster inclined to absorb 33 of the best battalions into the Home Service Territorial Army; but he has admitted that popular feeling against such a complete change is as yet too strong.

Touching the **Volunteers**, it is proposed to reduce the establishment to 200,000, and the strength to about 80,000, the whole being divided into two classes—namely, those who are able to give up a good deal of time to drill and training, and those who are unable to do so. Nothing has yet been done in this direction.

#### Financial Effect.

"Particulars regarding the Proposed Army Organisation Scheme," giving many details, appeared in a Parliamentary Paper dated August 1st (Cd. 1910). The presumed financial effect of the intended reductions and additions was given in a Parliamentary Paper dated August 7th, and the following are the details in brief form: Abolition of the Royal Garrison Regiment—reduction, £530,000; abolition of 14 Infantry battalions—reduction, £810,000; conversion of 6 Line battalions abroad and 20 at home to a reduced establishment as General Service battalions at home—reduction, £98,000; reduction of 26 Line battalions in the Colonies and Egypt—reduction, £175,000; conversion of 38 battalions into Home Service battalions—reduction, £860,000; formation of 33 additional Home Service battalions—increase, £1,077,000; formation of depots—net increase, £628,000; withdrawal of troops from abroad—reduction, £80,000; better pay, etc., of the Foot Guards—net increase, £69,000; new organisation of the

Cavalry, with reduced reserves—net increase, £83,000; new organisation of the Artillery, with some reductions—net increase, £4000; changes affecting the Volunteer Force—net reduction, £300,000; reduction on Submarine Services, £100,000.

The net reduction in effective charges was given as £1,092,000; or, if 33 Militia battalions were absorbed into the 33 Home Service battalions proposed to be raised, £1,471,000. These figures were the subject of criticism: it was pointed out that some of the changes proposed were likely to absorb some of the intended saving; and it was particularly remarked that no capital charge was indicated for the formation of the large depôts in which it is intended to train the troops at home, as the result of doing away with the linked battalions.

#### The Auxiliary Forces Commission and Conscription.

The Report of the Royal Commission on the Auxiliary Forces, presided over by the Duke of Norfolk, was presented on May 27th, 1904, and was a document of controversial nature which has been the cause of much comment. The Commissioners had examined a great many witnesses, and their report was very voluminous. A War Office Memorandum had informed them that a land force of 330,000 men was necessary for Home Defence, but it appeared that the Admiralty estimated that only say 5000 or 10,000 raiding enemies might be expected to get a footing on our shores. Accordingly the Commissioners asked the Admiralty for information; but the Director of Naval Intelligence was not allowed to give evidence, and ultimately the Commissioners were told by the Imperial Defence Committee that they might take the mobilisation scheme—100,000 Militia and 200,000 Volunteers—as the basis of their recommendations. The Commissioners gave great credit to the Auxiliary Forces for the excellent spirit they displayed, and said that their deficiencies were due to restricted opportunities and conditions of service. The Militia was described, in its existing state, as "unfit to take the field for the defence of this country"; while the Volunteers, "in view of the unequal military education of the officers, the limited training of the men, and the defects of equipment and organisation, are not qualified to take the field against a regular army." Accordingly, the Commissioners came to the conclusion that only by the adoption of the system of conscription adopted in Continental states could an Army for Home Defence, adequate in strength and military efficiency to defeat an invader, be raised in the United Kingdom. The Commissioners were of opinion "that the necessary thorough training could be given within one year, after which only one or two annual periods, or a few weeks' exercise or manœuvres, would be needed. Sir Ralph Knox did not subscribe to the report of the majority, saying the Navy was the only defence of an island power, and was both the first and second line of defence; and Lord Grenfell and Colonels Satterthwaite and Dalmahoy offered individual opinions.

On June 2nd, Mr. Arnold-Forster announced in the House of Commons that the Government did not intend to make any proposals in favour

of a system of conscription, and on August 2nd he presented to the House of Commons figures showing the basis on which the estimated extra cost of £25,900,000 for conscription had been made. It was assumed that the number of men to be raised each year would be 380,000, exclusive of officers and non-commissioned officers; that these would be paid at Army rates, and the privates at 1s. a day; that the Militia and Volunteers would cease to exist; and that the Regular Army could be reduced by 30,000, but that its regimental pay (except for officers) would have to be doubled. The estimated cost of the conscript Army of 380,000 was £27,530,000, and of doubling the pay of regular soldiers, £4,414,000, making a total of £31,944,000 against which was set the saving, by abolishing Auxiliary Forces and reducing the Regulars, £6,044,000, thus giving the net annual cost of conscription as £25,900,000. If the number of men raised each year were reduced by one-half, the cost would be reduced to £13,765,000. These figures were afterwards shown not to be altogether well grounded. The report of the Auxiliary Forces Commission has been the subject of a great deal of discussion, but the general feeling of the country is against conscription, which, it is argued, would give a great and unwieldy army at home, where it would not be required, and would not provide the Indian and Foreign garrisons which we have to maintain in peace time. The Commissioners made specific recommendations for increasing the efficiency of the Militia and Volunteers, of which some particulars are given below.

#### General, Army Corps, Districts, etc.

Under the new system, the British Army has been organised in **Commands**. It was designed by Mr. Brodrick to form six Army Corps, but four only were constituted. Various opinions were held as to the merits of the system. The underlying purpose was explained to be that we should be in a position to send at least three army corps abroad. This arrangement has been upset by the new scheme, but up to the present time (Dec. 1904) the only important change has been to describe the Army Corps as **Commands**, and to increase the efficiency and improve the organisation of the Aldershot Command. (See above, **War Office Reconstitution**.) The training-grounds are being obtained, and the institution of the system has enabled the process of delegation and decentralisation to be begun.

The following are the particulars of the **Army Commands** as now constituted:—

- I. **Aldershot Command**: Lieut.-Gen. Sir J. D. P. French, K.C.B.
- II. **Southern Command**: Field-Marshal Sir H. Evelyn Wood, G.C.B.
- III. **Irish Command**: Gen. Lord Grenfell, G.C.B.
- IV. **Eastern Command**: Gen. Lord Methuen, G.C.B.

In addition to these are the following **District Commands**:—

**North-Eastern**, Major-Gen. Leslie Rundle, K.C.B.

**North-Western**, Major-Gen. Sir F. Howard, K.C.B.

**Scottish**, Lieut.-Gen. Sir C. Tucker, K.C.B.

The new organisation does not as yet supersede that of the **regimental districts**, of which there are 69, each under the command of a colonel. The **regimental district** is the recruiting-ground of a territorial regiment, with which are linked, as junior battalions, the militia and volunteer corps within the area; and the reserve men are pensioners of their respective territorial regiments. If the plans of the War Office (**Reconstitution**) Committee are carried out, the 69 regimental depots will be grouped in 19 brigade districts, and these into 7 administrative districts (including Scotland and Ireland), each under a major-general, with London as an additional district, while General Officers Commanding-in-Chief will have command of the troops in 5 district commands. The Royal Artillery, through 9 recruiting areas, and the Royal Engineers, through the Commanding Royal Engineer in each district, have a territorial organisation; but this is not the case with the Cavalry, which has special recruiters or staff officers located in various districts. A new organisation for the Cavalry is under consideration. In theory, one battalion of each Infantry regiment has been at home, as a feeder for the other abroad; but in practice this system has never been uniformly maintained, and was completely dislocated by the war in South Africa. The Depot system, which is proposed for the General Service Army, is to do away with the linking of battalions for drafting purposes.

#### Regular Army.

The following is the organisation of the Regular Army according to the units of each arm of the Service. The strength is given below. (III.).

Household Cavalry . .	Regiments	3
Cavalry of the Line . .	do.	29
Horse Artillery . .	Batteries	30
Field Artillery . .	do.	158
Mountain Artillery . .	do.	9
Garrison Artillery . .	Companies	112
Royal Engineers . .	do.	97½
Foot Guards . .	Battalions	10
Infantry of the Line . .	do.	161
Army Service Corps . .	Companies	85
R.A. Medical Corps . .	do.	43
Army Ordnance Corps . .	do.	23

In addition to these are **Colonial Corps** in Egypt, Barbados, Jamaica, Bermuda, Malta, West Africa, Mauritius, Ceylon, China, and Hong Kong, the Straits Settlements, etc.; being Royal Artillery, 18 companies; Royal Engineers, 6 companies; Infantry, 11 battalions.

#### Army Reserve.

The Army Reserve is a vital element in our Army organisation, the Reserve men being liable by the terms of their agreement to general service with the arms in which they were enrolled with the colours. The Reserve was profoundly affected by the war in South Africa, and the general mobilisation of the force showed that it could be relied upon. Reservists, who have served their period with the colours, and who are of the best

soldiering age, and available for service if required, are an excellent set of men. The Reserve men are pensioners of the respective territorial regiments, and look to the officer commanding the district as their commanding officer. Mr. Brodrick, late Minister of War, expressed the belief that the new proposals for Army reorganisation would ultimately enable the force to be raised to 150,000 or 175,000 men. The establishment as at present authorised is 70,000. Subsequently to the war men have been drafted in large numbers to the Reserve, and the numbers increased by 33,606 in the first nine months of 1903. The Reserve comprises Sections A, B, C, and D, the B section being the most important, comprising all who have enlisted for short service and have discharged their active duties. The following was the strength of the several sections on Oct. 1st, 1903: A, 2921; B, 55,165; C, 1741; D, 6644; total, 66,471.

The Army Reserve will be greatly affected by the new conditions of service. See below (III.—Effectives and Distribution.)

A further Reserve force is the Reserve Division of Militia, to be embodied with the Militia upon mobilisation. See below (Militia).

### Militia.

During the War the Militia, though it was kept in the background, accomplished what no other branch of the Army could do. Without external aid it provided a large number of organised and complete battalions for home, foreign, and active service, thus maintaining its old traditions, and demonstrating its high value among the military forces of the Crown. The Militia is a force of very old standing, the purpose of which is to provide a body of trained men, available in case of need or of imminent national danger, to supplement, support, or relieve the regular army at home and on the Mediterranean stations. There are in all 124 Infantry battalions attached to the Line regiments, 32 corps of Garrison Artillery, 3 Field Batteries, 2 fortress corps of Engineers, 10 divisions of Submarine Miners, and 2 companies of the Medical Staff Corps. The Malta regiment, some colonial corps, and 8 Channel Islands regiments are in addition. It has often acted as a feeder to the Regular Army, and, under the territorial system, this has come to be regarded as its chief function. A very large number of Militia recruits are every year transferred to the line—11,870 in the first 9 months of 1904—and the force is a channel through which many commissions are annually gained in the regular Army.

The Militia recruit is enlisted for six years, and may re-engage if under 45 years of age for a further period of four years. Recruits are liable, at any time after enlistment, to be assembled for preliminary drill for such period, not exceeding six months, as may be directed from time to time by the Secretary of State for War. Brigades and regiments are called out annually for 27 days' training, which may be extended to 56 days if deemed expedient.

The Lord-Lieutenant of a county recommends to the consideration of the Secretary of State for War, for submission to His Majesty, the names of candidates for first appointment to Commissions, commanding officers being directed to assist him in the selection if called upon. For subaltern officers

in the Militia, candidates must be seventeen years of age or upwards. The appointment of officers as captains and field officers is recommended by the Militia commanding officer direct.

The Army Reorganisation scheme included a proposal to absorb 33 of the best Militia battalions in the Home Service Army, but this has not been carried out, and meets with opposition. The Auxiliary Forces Commission made recommendations for increasing the efficiency of the Militia by passing the recruit through six months' training in his first year, not less than six weeks in the three subsequent years, and a fortnight in each of the last four years, the total period being increased to eight years. It was also proposed to organise brigades and divisions, with permanent commander and a limited staff.

The New Militia Reserve, formed as a "Reserve Division of the Militia," by Royal Warrant (Feb. 4th, 1903), under the Militia and Yeomanry Act, 1892, had attained an enrolled strength of 5052 on Oct. 1st, 1903. The arrangements for musketry training are to be increased. Men of the Reserve Division are liable to serve with the Militia whenever that force is embodied by proclamation.

### Imperial Yeomanry.

The services of the Imperial Yeomanry in South Africa, in the organisation of which the old Yeomanry Cavalry played a very large part (although in the actual composition of the force the regular yeomen formed only about one-fifth of the total strength), caused the military authorities to reorganise the force. An Army Order of April 17th, 1901, provided that it should, in future, be entitled the "Imperial Yeomanry," and that the brigade organisation should be abolished, and the force be organised in regiments of four squadrons, with a regimental staff and a machine-gun section. The order included rules as to efficiency, drills, and pay. During the period of training, and under conditions laid down, the daily pay, including ration allowance, varies from 5s. 6d. in the case of a private to 9s. 6d. in the case of a regimental sergeant-major, with 1s. additional when a non-commissioned officer acts as quartermaster. It was also announced that after Oct. 31st, 1901, all corps of Volunteer light horse and Volunteer companies of mounted infantry would be disbanded or merged into squadrons of the Imperial Yeomanry. The number of regiments so far constituted is 52. It was decided, under Mr. Brodrick's Army scheme, to provide the Yeomanry with rifles, to give them extra pay as indicated above, with horse allowance of £5, and to raise the force to 35,000 as Imperial Yeomanry, intended to furnish mounted troops for home defence, while Colonial Yeomanry are to be affiliated for Imperial services. There is a school for instruction for officers of Imperial Yeomanry, with a lieutenant-colonel as commandant, and a staff of 66. The Imperial Yeomanry appear to be unaffected by the new Army scheme.

### The Volunteers.

Volunteer corps are raised under the Volunteer Act 1863 (26 & 27 Vict., c. 65). They are subject to the provisions of that Act and any

Acts amending it, and likewise to all regulations made with regard to volunteer corps. The Volunteer (Military Service) Act of '96 provides that whenever an order for the embodiment of the Militia is in force, any member of a Volunteer corps may offer himself for actual military service, and if the services of such numbers of any corps are sufficient to enable them to be separately organised are accepted, then those members may be called out either as a corps or as part of a corps. Under the Volunteers Act 1900 new regulations were made as follows:—I. A member of a Volunteer corps may contract to come out for actual military service in Great Britain whenever summoned, and to serve for a period not exceeding one month in the absence of a Royal Proclamation calling out the Volunteers generally. II. A member of a Volunteer corps may contract to proceed upon active service to any part of the world in a unit or company formed of Volunteers, on special conditions as defined by the terms of his contract.

The Volunteers, like the Militia, form junior battalions attached to the line regiments in their respective districts. Their own organisation as a cohesive and independent fighting force is still imperfect, and the new Army scheme proposes a much higher level of efficiency and an improved organisation.

The views of Mr. Arnold-Forster as to the future of the Volunteers are given above (II. The Reorganisation Scheme). The following are the recommendations of the Royal Commission on the Auxiliary Forces. The Volunteer force should be managed at the War Office by a separate department, the head of which should have special knowledge of, and experience with, Volunteers, and should report direct to the Army Council. The force should be organised in brigades and divisions, and commanders and staffs should be appointed. These commanders should be responsible for the training, instruction and inspection of the bodies under their command, their mobilisation, and their leading in war. Under the Volunteer Act, 1863, the financial administration as well as the discipline of the Volunteer force rests upon the commanding officers. The income of a corps is almost entirely derived from capitation grants, and commanding officers have in consequence been compelled to attach undue importance to numbers as compared with real efficiency. To obviate this, it is desirable that of the money granted by the State to each corps a portion should take the form of an allowance per battery or company proportionate to the establishment, and that the balance only should be issued in the form of capitation grants. The training should be concentrated upon what is essential for its tasks in war. All Volunteer corps should be allowed to train up to 14 days in camp each year, with adequate allowances. Ranges and grounds of exercise should be provided at the cost of the State, and adequate financial provision should be made for the necessary cost of movement to and from them. Transport and equipment for mobilisation should be provided. Tactical schools should be formed and Volunteer officers encouraged to attend them and other schools of instruction by elastic conditions as to time and place, and by sufficient money allowances to cover all necessary expenses. An increase of the minimum number

of attendances other than those in camp required from each man as a condition of earning a capitation grant is desirable in the interest of efficiency. The present average is 19 in the Infantry and 34 in the Artillery, and the minimum should certainly be more than 10.

### III. Effectives and Distribution.

Establishment and Strength of the Army, Army Reserve, Militia, Imperial Yeomanry, and Volunteers on Oct. 1st, 1903 (all ranks).\*

	Normal Establishment	Actual Strength	Wanting to complete
Army, Regular Forces			
Regimental Establishments	285,925	292,411†	—
General and Departmental Staff and Miscellaneous Establishments	2,555	2,555	—
Army Reserve, Class I.	70,000	66,471	3,529
Militia	132,447	96,857	35,590
Militia Reserve (New)	50,000	5,052	44,948
Channel Islands and Colonial Militia	5,996	5,085	911
Imperial Yeomanry at Home	35,196	26,434	8,772
Volunteers	347,801	255,578	92,223
Bermuda Rifle Volunteers	319	225	94
General total	930,232	750,658	186,067

\* The General Annual Report on the British Army, 1903 (issued March 14th, 1904) was for the first nine months of 1903, it being intended henceforth to make it cover the period Oct. 1st—Sept. 30th.

† 6486 supernumeraries.

### Strength of the Regular Army by Arms.

Household Cavalry	1,425
Cavalry of the Line	23,084
Royal Horse Artillery and Royal Field Artillery	32,511
Royal Garrison Artillery	23,067
Royal Engineers	11,480
Foot Guards	7,847
Infantry of the Line	157,669
Colonial Corps and Indian Infantry borrowed for garrison and expeditionary purposes	19,609
Army Service Corps	6,028
Royal Army Medical Corps	5,346
Army Ordnance Corps	2,542
Army Pay Corps	900

It appears from the General Annual Return of the Army that in the year ending Dec. 31st, 1902, 51,677 recruits joined (2317 for long service, 49,360 for short service), and, in the first nine months of 1903, 31,026 (1551 for long service and 29,475 for short service). There was a large diminution compared with previous years, largely accounted for by the fact that the mounted corps were closed for recruiting, owing to the special enlistments for them which had been made during the war.

**Distribution of the Regular Army,**  
all ranks, Oct. 1st, 1903.

At home—	
England and Wales . . . . .	96,856
Jersey . . . . .	971
Guernsey and Alderney . . . . .	1,193
Scotland . . . . .	5,668
Ireland . . . . .	26,277
Total . . . . .	130,965

In the Colonies, Egypt, China, and Crete 85,066

East Indies—	
Punjab . . . . .	19,302
Bengal . . . . .	24,686
Madras . . . . .	9,660
Bombay . . . . .	17,651
Burma . . . . .	4,190
Royal Artillery Staff unposted, etc. . . . .	891
Total . . . . .	76,380

General Total at Home and Abroad . . . . . 292,411

**The Strength of the Army Reserve**

from '98 to 1903 has been as follows:—'98, 82,063; '99, 78,839; 1900, 24,388; 1901, 5434; 1902, 2573; 1903, 32,872; Oct. 1st, 1903, 66,475. The reduced numbers after 1901 were due to Reservists being embodied with the Regulars for the war. The establishment is 70,000, but is intended to be increased to at least 90,000 under the new Army scheme. The General Service men, after serving nine years with the colours, will be three years in the reserve, with an estimated Reserve strength of 20,300; and the Home Service men, after two years with the colours, will be six years in the Reserve, with an estimated strength of 63,600. To these must be added Reservists of the Foot Guards (6100), making a total of 90,000. In this estimate the 2nd-class Reserve, corresponding to Section D, has been disregarded.

**Changes in Establishment and Effective of the Militia**

during the last seven years, exclusive of the permanent staff:—

Date.	Enrolled strength.	Estab-lishment.	Wanting to com-plete.
1st Jan., 1896	108,350	126,723	18,373
" 1897	107,878	126,609	18,731
" 1898	105,531	125,435	19,904
" 1899	103,647	124,481	20,834
" 1900	98,130	123,137	25,007
" 1901	92,741	124,252	31,511
" 1902	102,845	123,993	21,148
" 1903	102,420	133,351	30,931
1st Oct., 1903	100,503	126,942	26,439

The figures from 1900 onwards do not include Militia Reservists called out on permanent service with the Line. Recruiting in 1902 showed a material increase—41,486, as compared with 37,644 in the previous year. The recruits enrolled in the first nine months of 1903 were 25,688.

The new Militia Reserve has an established strength of 50,000. Its formation began in 1903, and on Oct. 1st the strength was 5052.

**Enrolled Strength of the Imperial Yeomanry** in 1902, 21,840, and the number present at the inspection 19,570; 1903, enrolled 26,372, at inspection 23,779. The establishment being 34,594, the number wanting to complete was 8222. On Jan. 1st, 1903, the enrolled strength had increased to 22,942, the net increase up to Sept. 30th being 3482.

**Strength of the Volunteers.**

The conditions affecting unfavourably the strength of the Volunteers and the changes suggested or impending have been given above. The establishment is 346,450, and the actual strength by the latest return (Jan. 1, 1903) 250,990, leaving 95,460 wanting to complete. The enrolled strength has been as follows since the establishment of the force: '60, 119,146; '61, 161,239; '62, 157,818; '63, 162,935; '64, 170,544; '65, 178,484; '66, 181,565; '67, 187,864; '68, 199,194; '69, 195,287; '70, 193,893; '71, 169,608; '72, 178,279; '73, 171,937; '74, 175,387; '75, 181,080; '76, 185,501; '77, 193,026; '78, 203,213; '79, 206,265; '80, 206,537; '81, 208,308; '82, 207,336; '83, 209,365; '84, 215,015; '85, 224,012; '86, 226,752; '87, 228,038; '88, 226,469; '89, 224,021; '90, 221,048; '91, 222,046; '92, 225,423; '93, 227,741; '94, 231,328; '95, 231,704; '96, 236,059; '97, 231,796; '98, 230,678; '99, 229,854; 1900, 277,628; 1901, 288,476; 1902, 268,550; 1903, 253,281. The net decrease between Nov. 1st, 1902, and the same date in 1903 was 15,269. It has since been reported that there is a further considerable diminution.

**IV. Maintenance.**

The table opposite shows the total net estimate of expenditure on the Home and Colonial establishments exclusive of India, and for the sake of comparison the net expenditure of 1902-3 and the net estimate of 1903-4 are given:—

The Army Estimates (including the Ordnance Factories Vote) for 1904-5 amounted to £28,900,000, as compared with £34,500,000, the total of the original estimate for 1903-4—a decrease of £5,600,000, or of £8,300,000 if the Army Supplementary Estimate of Feb. 11th for £2,700,000 was taken into account. Limiting the comparison to original estimates, the main reductions for extraordinary services were:—(a) Mowatt reserves of stores, £1,750,000; (b) South Africa—including compensation claims and other charges, £3,070,000; (c) China and Somaliland, £500,000; total, £5,320,000. Against these reductions were set various increases: viz. (a) The grant of "Service" pay, £750,000; (b) Growth of Army Reserve, £210,000; (c) Military Works Acts annuities, £98,000; (d) Militia—full number of battalions training, £70,000; total, £1,128,000. These increases had been met, and a further saving of £280,000, effected as follows: (1) Reduction of establishment of Foot Guards by 94 men per battalion, £50,000; (2) reduction of establishment of infantry of line at home by 50 men per battalion, £175,000; (3) discontinuance of enlistment into the Militia Reserve, £100,000; (4) reduction of vote for Ordnance factories, £185,000; (5) reduction in vote for stores and clothing owing to surplus stocks available after the war, £750,000; (6) Miscellaneous, including deferred pay, etc., £148,000; total, £1,408,000.

	Net Expenditure, 1902-3.	Net Estimate, 1903-4.	Net Estimate, 1904-5.

<b>Total effective and non-effective Services . . . . .</b>	<b>£ 68,863,527</b>	<b>34,245,000</b>	<b>28,830,000</b>

\* Excess of Receipts over Expenditure.

	1904-5.
Repayments by Government of India, included as appropriations in aid of Army estimates; other than stores, etc., issued on repayment . . . . .	£ 1,570,589
Deduct,—Contribution from Army funds towards cost of garrison of Aden and sea transport . . . . .	230,000
	<b>£ 1,340,589</b>

**Further Particulars of Expenditure.**

The following are details of the total normal military expenditure of this country in each of the undermentioned financial years '95 '96 to 1904-5, including supplementary votes and expenditure under Military Works Acts:—

Year.	Estimates apart from War.	Under Military Loans.	Total (apart from War), including Loans.
	£	£	£
1895-6	18,470,535	619,579	19,090,114
1898-9	20,096,373	947,423	21,043,796
1901-2	25,528,574	1,749,487	30,278,061
1902-3	28,716,627	1,622,294	30,378,921
1903-4	29,800,000	3,600,000	33,400,000
1904-5	28,830,000		28,830,000

**Cost of Imperial Defence.**

The following table gives particulars of the total cost of Imperial Defence, including India and the Crown Colonies, but excluding self-governing colonies:—

**1. United Kingdom (1904-5 Estimates):—**

Net total of Army Estimates and Ordnance Factories . . . . .	£28,900,000
Net total of Navy . . . . .	36,889,300
<b>Total . . . . .</b>	<b>£65,789,300</b>

**2. India (1903-4 Estimates):—**

The total net Military Expenditure . . . . .	17,782,000
The total net Naval Expenditure . . . . .	393,200

Total . . . . . £18,175,200

3. Crown Colonies :—	£
The Crown Colonies pay the following contributions in aid of Army Votes, viz. :	
Ceylon . . .	£130,000
Mauritius . . .	26,200
Hong-Kong . . .	76,400
Straits Settlements . . .	117,500
Malta . . .	5,000
	355,100
Total of 1, 2, and 3 . . .	£84,319,600

### Military Expenditure of Foreign Powers.

It is impossible to give the actual expenditure in all cases, as in some instances it has not been published. Moreover, in some cases the Naval Budgets make provision for certain items, such as coast fortifications, which are of a military nature. The following is the information available :—

	France.	Russia.	Germany.	Austria.
	£	£	£	£
1900	29,369,500	36,837,833*	33,426,500	16,664,772
1901	31,845,833	36,067,333*	34,005,129	17,096,368
1902	32,711,512	35,848,726	32,686,340	16,842,608*
1903	32,188,816	36,647,089	31,880,455	17,183,022*

\* These figures show expenditure, according to published accounts. The figures not marked show sums voted in the estimates.

The German Estimates made no provision for pensions, which are included in a separate Budget, and amount to about £5,000,000 a year.

### V. Terms of Service.

In view of the great demand for men, very important inducements for enlistment have been made. The requirements as to age and height are varied from time to time, and may be obtained at any recruiting station. The standards have been improved, and the particulars are given in the Annual Report on Recruiting. In practice, for "growing youths," they are slightly modified. From April 1st, 1903, a most important change was made, both as regards the terms of service and pay of the soldier. With very few exceptions, the terms of service were altered to three years' colour service and nine years in the reserve for all branches. This arrangement has now been done away with entirely under the new Army Scheme. It was expected that at the end of their three years' service men would extend their service in large numbers, but this was not the case, and it became exceedingly difficult to provide the necessary drafts for India. On Oct. 20th, 1904, it was ordered that all enlistments until further notice were to be for a period of 9 years with the colours and 3 in the reserve, according to the new Army Scheme as it applies to General Service soldiers; service pay, messing allowance, etc., being under existing regulations. Under the reorganisation scheme the General Service private would receive 1s. a day from date of enlistment as regimental pay; with 5d. a day for messing and kit allowance, the sum rising after 6 months, including service pay, to 1s. 11d. for a first-class

shot, followed by army reserve pay of 6d. The Home Service Army, no special enlistments for which have yet been made, would give pay and allowances rising from 1s. to 1s. 3d., with reserve pay of 4d. a day. The Foot Guards would receive pay and allowances rising from 1s. 3d. to 2s., with 8 years' colour service.

### Service in Army Reserve.

The Army Reserve is that force to which men are transferred on expiration of their period of service with the colours, as indicated above. They may be called up annually for training for a period not exceeding 12 days or 20 drills. While in the Reserve they are liable to be recalled to the colours in case of national danger or great emergency, and if so recalled are treated in every respect as soldiers, and are allowed to regain the rank they held on transfer to the Reserve. Prior to the war the men in Section D could not be called up for service until the whole of the First-class Reserve had been embodied; but the Reserve Forces Act has been altered, abolishing this restriction, and the rate of pay for the section was raised to that for Sections B and C—viz., from 4d. to 6d. a day. Under the new scheme the period of reserve service will be 3 years for the General Service establishment and 6 years for the Home Service establishment.

### VI. The Indian Army.

The Viceroy and Governor-General in Council is responsible for the superintendence, direction, and control of the whole Military Government of India. Two military authorities are responsible for the state of the Army—the Commander-in-Chief, who directs the Army, supervises its preparation for war, and is responsible for its efficiency; and the Military Member of Council, who is responsible for supply, transport, remounts, ordnance, military works, and finance. Both of these high officers have a seat on the India Council, and there is a Military Department, through which military business is submitted to the Viceroy, and, if necessary, to the Council. Under the Commander-in-Chief are three Lieutenant-Generals commanding the Northern, Western and Eastern Army Corps, in addition to which are the troops of the late Madras command and those of the Burma command. The Commander-in-Chief's executive officers are the Military Secretary, the Adjutant-General, the Quartermaster-General, and the Principal Medical Officer. The departments of the Military Member of Council deal with supply, transport, etc.

The Army in India consists of British Regular Forces, Indian Regular Forces, the various local corps, British volunteers, Indian Army Reserves, Imperial Service Troops, and Military Police. The establishment of the British regiments serving in India in 1904-5 is 74,657, including the following units and branches: 9 regiments of cavalry, 11 horse artillery batteries, 42 field batteries, 3 howitzer batteries, 8 mountain batteries, 22 garrison artillery companies, 6 heavy batteries, 52 battalions of infantry, details of Royal Engineers, R.A. Medical Corps, etc.

Considerable changes have recently been made in the Indian Army, but in order to understand the present organisation, a brief retrospect is necessary. That army emanated originally from the three great commercial centres.

Bengal, Madras, and Bombay, and thus the "Presidential Armies" came into existence. Under the system that existed, only the Bengal Army was under the direct control of the Commander-in-Chief in India, the armies of Madras and Bombay being under their own Presidential commanders-in-chief. The system was recognised to be faulty and dangerous, and it was decided to concentrate the control of the three armies under one leadership—an arrangement which was completed in 1895, when the Presidential Armies were converted into army corps, each with its district, a fourth army corps being formed out of the Punjab Frontier Force, under a separate control known as the Punjab command.

Lord Kitchener has entered upon a vigorous policy tending towards greater efficiency and greater preparedness for war in the distribution of the troops. He does not think the number sufficient, and it is his purpose to make officers responsible for their commands, from the general down to the company commander. He looks forward to a redistribution of troops and commands to meet the necessities of the country. Recently the regiments of the Native Army have been renumbered, and the names of Bengal, Madras, and Bombay, as distinguishing parts of the Army, have been abolished; while separate forces and corps—such as the Punjab Frontier Force, the Hyderabad Contingent, and the local corps—have been absorbed into the line, and, at the same time, the Indian Staff Corps, instituted in 1861, has changed its title to that of Indian Army. An Army Order issued by Lord Kitchener in Oct. 1904 gives effect to the scheme for redistribution, the units being grouped in the formation in which they can best train in peace for the operations of war. One object is to enable all three arms to be trained together at the various centres. Southern India is not denuded of troops, though the post of Lieutenant-General of the Madras Army has been abolished, and Lieut.-Gen. Sir C. Egerton commands the G Division at Secunderabad instead. No change has been made in Burma, where Lieut.-Gen. D. J. S. McLeod is in command.

The three great commands are—

**Northern Army Corps** (Lieut.-Gen. Sir Bindon Blood), with divisions at Peshawur, Rawal Pindi and Lahore, and independent brigades at Kohat and Bannu.

**Western Army Corps** (Lieut.-Gen. Sir A. Hunter, D.S.O.), with divisions at Quetta, Mhow and Poona; and

**Eastern Army Corps** (Lieut.-Gen. Sir A. Gaselee), with divisions at Meerut and Lucknow. These three important commands will retain the staffs of the late Punjab, Bombay and Bengal armies which they replace, with some modification of boundaries; but ultimately, when proper barracks have been provided, the arrangement will permit the distribution of troops upon the frontier and upon the lines of approach. Increased powers are given to officers of divisions, giving the lieutenant-generals more leisure for the training of their commands for war. The great commands are divided into districts under major-generals or brigadiers. The great departments of the Army are upon an extensive scale.

When the reorganisation of the Native Army took place, in 1895, one great object was to divide the unwieldy Bengal Army into its two parts, drawing the Punjab troops to the Punjab

and placing the Hindustani troops in the Bengal area. The forces of the Punjab consist of Sikhs, Dogras, Gurkhas, Punjabi Mohammedans, and Pathans. In Bengal are Hindustanis, both Brahmans and Rajputs, Jats, Gurkhas, and others. In the Bombay area are many differing elements. The Madras Army has been reconstituted, as indicated above. The regiments of the Native Army are organised in class regiments and class squadron and company regiments. Recruiting is for both long and short service, and the whole country is divided into recruiting districts. India has also as a second line the **Volunteers**, about 32,000 strong; the **Imperial Service Troops**, about 19,000 men in all, maintained by the Native States; the **Frontier Militia** on the north-west frontier; and the **Military Police** on that frontier and in Assam and Burma. The Militia and Police are under the civil power.

The **units of the Native Army** are as follows: 3 regiments of Body-guards, 39 regiments of Cavalry and the Aden troop, 10 Mountain Batteries, 1 Frontier Garrison company, 78 guns, 28 companies of Sappers and Miners, 139 Infantry battalions, and some others. The Auxiliary Forces, which have been alluded to, consist of 66 Volunteer corps, 33 Imperial Service corps, 6 Militia corps, and 21 Militia Police corps.

The **Imperial Service Troops**, under the superintendence of British officers, are trained for service by certain feudatory princes. The plan of embodying "**Imperial Service troops**," under agreement with the feudatory states, was adopted during Lord Dufferin's viceroyalty. The result has been admirable, and the native Princes have been enthusiastic in their prosecution of the plan. A splendid reserve has been created, numbering at least 19,000 well-trained men, located thus: Kashmir, 4350; Punjab, 4950; Rajputana, 4000; other states of Central and Western India, 4500; Southern India, 1400. Some of these troops have displayed the utmost hardihood and courage in the Frontier operations. Outside these are the large armies of the Native States, which may be described as irregulars, and are of uncertain value. The local corps of Central India and Rajputana are really police under military supervision, while the **Military Police** are under civil control.

In the following table of the aggregate strength of military forces available in India, the figures must be considered as approximate to some extent, since there may have been some alteration in authorised establishments since the figures were made up:—

British Regular Forces . . . . .	74,450
Indian Regular Forces . . . . .	154,110
British Volunteers . . . . .	31,500
Indian Army Reserves . . . . .	22,000
Imperial Service Troops . . . . .	19,000
Local Corps . . . . .	5,250
Military Police . . . . .	28,340
Total . . . . .	324,650

## VII. Colonial Forces.

British Colonial forces are those raised and maintained by the Colonies for local purposes, or as a contribution towards Imperial defence. In the self-governing colonies the forces are administered by defence departments, variously

organised, and in Canada and certain of the Australasian colonies the forces are commanded by Imperial officers lent to the Colonial Governments. In the South African colonies the command in war devolves upon the general in command of the Imperial troops.

The permanent troops of Canada consist of two squadrons of cavalry, two field batteries, two garrison companies of artillery and four companies of infantry; and the North-West Mounted Police are practically a fine military force. The Permanent Militia numbers 1066, and the Active Militia 40,730. Under the Militia law all British subjects in the Dominion between 18 and 60 may be called out to serve in four classes of the Militia Reserve. This force includes 7 regiments and 6 independent squadrons of cavalry, 17 batteries of field artillery, 6 regiments of garrison artillery, 11 squadrons of mounted rifles, 4 companies of engineers, 4 companies of army service corps, 86 regiments and 6 companies of infantry. There is a Royal Military College at Kingston, and the Dominion is divided into twelve military districts. The new scheme for reorganising the Militia upon a strong military basis provides for a permanent military establishment of 100,000 men, with complete auxiliaries, including medical corps, army service corps, intelligence department, and transport; 50,000 on a peace footing, one-half of the force to drill every year, and another 50,000 to be held as a reserve, the annual drill being optional, but the men being supplied with rifles and ammunition and encouraged to make themselves proficient in the use of firearms. All officers and non-commissioned officers needed for the entire force of 100,000 would be trained and required to drill every year, and it is proposed to institute a more thorough system of military instruction, with branch establishments throughout the Dominion. Provision is intended to be made for a great central camp, where all officers, together with the regular force and contingents from every corps in the Dominion, may be assembled every year for instruction and manœuvres. In addition, district camps would be established in the various provinces, where such of the reserves as desire to drill may assemble. The plans provide for a large increase in the number of mounted men, particularly on the frontier of the province of Ontario and in the North-west, as well as for the development of a large artillery force.

The various defence forces in the Australian States have been transferred to the control of the Federal Government. Major-Gen. E. T. H. Hutton was appointed to the command in 1901. The total number of men sent from Australia to South Africa during the war was 16,763. The following table shows the strength of each state and the numbers available, including the nucleus of paid troops, the force partially paid, the volunteers, rifle clubs (total of these 31,318), and cadets.

The new Army Organisation Scheme, adopted by the Commonwealth Government in July 1903, on the recommendation of Major-General Hutton, was given in the ANNUAL, 1903, p. 92. The scheme was developed in General Hutton's second annual report, 1903-4. Much has been done towards giving effect to it, but most attention is directed to the need of providing modern and adequate equipment, increasing the Royal Australian Artillery, and completing the scheme of organisation in all its details.

The following table is from the appendix to the Report, showing the strength on May 1st, 1904:—

	Officers.	Others.*
Headquarters . .	10	16
New South Wales . .	733	14,308
Victoria . .	768	28,225
Queensland . .	357	6,795
South Australia . .	192	5,287
West Australia . .	133	2,571
Tasmania . .	178	1,945
Commonwealth } Military Forces }	2,371	59,147

\* In this total are included 28,721 members of rifle clubs.

The only permanent forces of Cape Colony are the Cape Mounted Rifles (912) and Cape Police (3246). There are also 49 volunteer corps, numbering 6835, with 12 guns. In Natal are mounted rifles (1000), a field battery (100 men), a composite regiment of 200 men, and an infantry battalion of 500, besides about 1700 Europeans as an armed and mounted police. The naval corps numbers 140. There are armed police organised on a military basis in Bechuanaland, Basutoland, and Rhodesia.

In New Zealand (*q.v.*) the regular troops consist of forces of artillery and engineers, and there is a large force of volunteers.

In the West Indies the permanent forces are armed native police for local defence, and in Bermuda and Jamaica they are auxiliary to Imperial garrisons.

In West Africa considerable forces of armed natives are maintained in the Nigerian regiments of the West African Frontier Force.

In British East and Central Africa the King's African Rifles have been organised under the Foreign Office. There are two battalions of Central African Rifles, two of Uganda Rifles, and East African and Somaliland battalions.

Armed forces are in the Straits Settlements, Labuan, Hong Kong, Fiji, and British New Guinea, while the Malay States Guides are permanent troops. It is not possible to give statistics of the whole force of permanent and volunteer organisations throughout the Colonies, but the establishments of permanent troops are approximately as follows:—North America, 1700; South Africa, 4500; Australasia, 2000; Cyprus, 700; West Indies, 2800; West Africa, 8000; Eastern Colonies, 3400; total, 21,800.

#### ART, 1904.

The attack on the administration of the Chantrey Fund commenced in 1903 by Mr. D. S. McColl, was renewed, and after much newspaper skirmishing the Earl of Lytton brought the matter before the House of Lords, and on June 21st, 1904, moved that a Select Committee be appointed to inquire into the administration of the Trust. This was agreed to, and the Committee, composed of Lord Carlisle, Lord Lytton, Lord Crewe (chairman), Lord Windsor, Lord Ribblesdale, Lord Newton, and Lord Killanin, held its sittings in July. Among the witnesses were Sir Edward J. Poynter, P.R.A., Sir William Richmond, R.A., Sir Lawrence Alma-Tadema, R.A., Mr. Marcus Stone, R.A., Mr. Thomas Brock, R.A., Mr. Val Prinsep, R.A., Mr. Seymour Lucas, R.A., Mr. John S.

Sargent, R.A., Mr. Harry Quilter, Professor Frederick Brown, Sir W. Martin Conway, Sir Walter Armstrong, Lord Davey, Sir James Guthrie, P.R.S.A., Mr. H. Spielman, Count Kessler, and Mr. Briton Riviere. On Aug. 4th the report of the committee was presented to the House of Lords. The Committee gave details of the bequest of Sir Francis Chantrey, R.A., under which the first purchases were made in 1875. The total capital available amounted to £105,000 invested in 3 per cent. Consols, since reduced to  $2\frac{1}{2}$  per cent., the available income having varied from about £2500 to about £2100. From '77 to '97 the collection was temporarily deposited at the South Kensington Museum and at various provincial galleries, but in the latter year a permanent home for it was found in the Tate Gallery, and in accordance with the terms of the bequest, the 85 works purchased up to that date, and all future purchases were handed over to the Government, who directed the Trustees of the National Gallery to house the collection, which now numbers 109 works. The Committee explained the procedure by which the works of art are chosen, and went on to say that the collection, in their opinion, contains too many pictures of a purely popular character, and too few which reach the dignity of artistic distinction evidently aimed at by Sir Francis Chantrey. Less criticism has been directed against the collection of sculpture, which seems on the whole to be more adequately representative. While the collection might, to some extent, be improved by a system of purchase founded on a wider interpretation of the terms of the will, the Committee were strongly of opinion that the constitution of the purchasing body, as appointed by the Testator, was inherently defective. While desiring "distinctly to record" that there were no grounds for any imputation of corrupt or interested motives against the Royal Academy, the committee found that in choosing works for purchase too exclusive a preference had been given to pictures shown at the Royal Academy and that insufficient attention had been paid to other exhibitions. They suggested that pictures might with advantage be bought sometimes from studios, from private owners, and even in the auction-room. As to the purchase of works by deceased artists, the propriety of which had been urged by many of the Academy's critics, the committee thought that it should only be done in exceptional cases, and that no work should be purchased by any artist who was not living when the bequest came into operation in 1877. The Committee recommended the appointment of a committee of three, for the purchase of works of art in painting and sculpture, composed of the President, *ex officio*, of a Royal Academician appointed by the Council, and of an Associate of the Royal Academy nominated by the body of Associates. The elected members should be appointed to hold office for five years, and should not be eligible for immediate re-election. Regulations should be made by which the principal artistic societies in England and Scotland should be invited regularly to report to this committee, to whom the final powers of selection and purchase should be entrusted; the existence of important works of art. The Committee recommended that some modification should be effected in the provision of the will which forbids the purchase of incomplete works of

sculpture. The Committee in conclusion recommended that effect should be given to the provisions they suggest either under a scheme of the Charity Commissioners, on the application of the Trustees, or if not, by Act of Parliament.

The Winter Exhibition of the Royal Academy, which opened on Jan. 4th, contained about thirty-five portraits in oil by Sir Thomas Lawrence, among them many of his best known works, and a few drawings, besides works by earlier masters; a remarkable collection of Italian bronzes, chiefly of the 15th and 16th centuries, and examples of the work of the sculptors E. Onslow Ford and Harry Bates.

The Hanging Committee of the Summer Exhibition of the Royal Academy, which opened on May 2nd, was composed of Messrs. Marcus Stone, Luke Fildes, W. F. Yeames, R. W. Macbeth, G. Frampton, Aston Webb, and Sir E. Waterlow. The new rule prohibiting outsiders from submitting more than three works to the Selecting Committee for the Summer Exhibition came into force, but had comparatively little effect in checking the flow of pictures to Burlington House in March. No fewer than 11,162 works were sent in, a decrease of only 2491 on the number submitted in 1903. The sales were poor, although the exhibition was generally regarded as above the average in quality, and the number of visitors was abnormally large. The Chantrey Trustees bought Mr. Napier Hemy's "London River" (£1000), and Mr. Arthur Wardle's "Fate" (£315), and the sculpture Mr. H. A. Pegram's "Sibylla Fatidica" (unpriced). Other pictures sold were "An Allegory" (£1500), by Mr. S. J. Solomon, A.R.A.; "Pro Patria" (£250), by Mr. Herbert Gandy; "Gleams of Light on Troubled Water" (£300), by Mr. E. G. Fuller; "Twins" (£220), by Mr. Walter Hunt; "An Autumn Morning" (£210), by Mr. Ernest Panton; "A Critical Moment" (£300), by Mr. G. E. Robertson; "The Birch, the Rowan, and the Pine, Aviemore" (£650), by Mr. J. McWhirter, R.A.; "The Destroyers" (£350), by Mr. Herbert Dicksee; "Vox Populi" (£600), by Mr. E. Blair Leighton; "The Dancing Lesson" (£250), by Mr. A. C. Cooke; "A Sunny Shore" (£400), by Mr. Lionel P. Smythe, A.R.A.; "To Gallant Speech and Bearing a Fair Ear Bendeth Low" (£275), by Mr. J. H. F. Bacon, A.R.A.; "The Greeting" (£420), by Mr. Walter Langley; and "Pluto's Messenger" (£420), by Mr. G. A. Storey, A.R.A.

At the New Gallery the International Society of Sculptors, Painters and Gravers held its fourth exhibition in January, February, and March. The exhibition, which attracted about 21,000 visitors, contained Whistler's "Symphony in White" and "Valparaiso," and some striking examples of the art of the society's new president, the sculptor, M. Rodin. At the summer exhibition of the New Gallery the great feature was a group of some half-dozen paintings by Mr. Watts, one of which, "Progress," was sold for £1732 10s. The Guildhall Galleries were filled for about two months in the summer with a collection of pictures and drawings by Irish artists, living and deceased, brought together by Mr. Hugh P. Lane. At the Portrait Painters' Exhibition, held at the New Gallery in the late autumn, the work of Lenbach was conspicuous among the paintings, and the central hall was filled with the works of four sculptors—Messrs. John Tweed, A. G. Walker, F. Derwent Wood, and Basil Gotto. At Messrs. Obach's gallery,

in June, Whistler's famous *Peacock Room* was shown before it was sent to America; and in the autumn a group of draughtsmen and engravers held their first exhibition as "*The Society of Twelve*." The official picture of the Coronation, by Mr. E. A. Abbey, R.A., was shown at the Old Hanover Gallery by Messrs. Agnew. At Dublin, in November, the pictures that it is hoped will form the nucleus of the proposed *Irish Gallery of Modern Art* were shown at the rooms of the Royal Hibernian Academy. At the New English Art Club Mr. Sargent re-appeared as an exhibitor after an absence of several years.

Artistic honours of the year included a knighthood for Mr. Aston Webb, R.A., the architect of the National Memorial to Queen Victoria. At the Royal Academy Mr. Frank Brangwyn, Mr. C. W. Furse, and Mr. H. A. Pegram were elected Associates. Mr. J. Walter West and Mr. R. Anning Bell were elected members of the Royal Society of Painters in Water Colours; and Mr. J. S. Sargent, R.A., Mr. H. S. Tuke, A.R.A., Mr. D. Y. Cameron and Mr. F. Cadogan Cowper Associates. Mr. Frank Brangwyn was elected a Fellow of the Royal Society of Painter-Etchers; and Mr. Robert Brough, Mr. D. Y. Cameron and Mr. Campbell Mitchell were elected Associates of the Royal Scottish Academy.

In June artists heard with regret of the suspension of the issue of the *Magazine of Art*. In the same month Prof. von Herkomer announced that he could no longer spare the time to direct the famous art school at Bushey, which he founded more than twenty years ago. Mr. W. A. Sandby, who died in May, bequeathed £1000 to the Royal Academy, the interest of which is to provide funds for an annual "Sandby" gift, to be awarded alternately to a landscape painter and an architect, or to their families if in distress. At the Royal Exchange another fresco, by Mr. George Harcourt was added to those that already decorate the walls of the ambulatory.

The National Gallery received a notable addition in the shape of Titian's well-known portrait of *Ariosto*, for which the immense price of £30,000 was paid—£18,500 by Mr. W. W. Astor, Mr. Alfred Beit, Lord Burton, Lord Iveagh, Mr. Pierpont Morgan, and Lady Wange, and the remainder by the Treasury. The National Gallery also acquired, among other works, Millais' portrait of Sir Henry Thompson, by whom it was bequeathed; a portrait of the artist's father, by Albert Dürer, who until last year was unrepresented in the national collection; Hogarth's portrait of Quin, the actor; and a portrait of a woman by Van Der Helst. At the Victoria and Albert Museum great progress was made with the new buildings that are being erected from the designs of Sir Aston Webb. The large collection of pictures and drawings bequeathed to the Museum three years ago by Mr. Constantine Ionides was at length exhibited; and early in the year a Morland exhibition was held, to commemorate the centenary of that artist. The National Arts Collection Fund, which was formed in 1903 for the purpose of adding works of value and interest to our national museums and galleries, made several presentations to the British Museum, where, in the summer, a number of water colours and drawings from the recently-acquired Reeve collection were shown for the first time.

In the sale-rooms one of the features of the year was the dispersal of the great collection of snuffboxes, miniatures, and objects of art formed by the late Mr. Hawkins, of Portland Place. The sale—or sales, for there were several of them—occupied many days at Christie's, and astonishing prices were paid for snuffboxes and miniatures. One Louis XV. gold and enamelled snuffbox realised £6400, and others of about the same period went for £1900, £1550, and £1460 respectively. One of the miniatures in the Hawkins collection, a portrait of a Duchess of Norfolk, by Holbein, was sold for £2750. It was a great season for snuffboxes, as another example from a private collection, a gold box enamelled with scenes from *Gil Blas*, was sold early in the year for £1942. In June a pair of miniatures of John Croker and his wife, by Nicholas Hilliard, were sold for £2250; and in the following month another miniature, of Mary Queen of Scots, painted by the same artist on a playing card, went for £816. A sale of great interest was that of the pictures, jewels, plate and objects of art of the late Duke of Cambridge, which realised altogether £89,738. Here, too, were some fine snuffboxes—a Louis XV. example selling for £2000, and one of Louis XVI. for £1600. One of the Duke's jewels, the Lesser George of the Garter, went for £1790. Most of the Cambridge pictures were of personal and historic rather than artistic interest, but the collection contained several portraits by Reynolds and Gainsborough. One of the Gainsboroughs, a portrait of the beautiful Duchess of Gloucester, was a work of surpassing charm, and no surprise was felt when the bidding for it was run up to £12,700, a record price for a picture at Christie's. In the Orrock sale the sum total was £65,946, and among the most notable items were Turner's "Walton Bridges" (7000 gns.), a water colour by the same artist, "Lancaster" (1500 gns.), and a Reynolds, "Lady Anne Fitzpatrick" (4000 gns.). The collection of Townshend heirlooms from Raynham Hall, which included a vast number of family portraits from the time of the Tudors to the early nineteenth century, realised £41,017. Sales of individual canvases of importance included Reynolds' "Portrait of a Lady" (£3255), Lawrence's "Miss Juliana Copley" (£2520), Gainsborough's "Pastoral Landscape" (£3045), and two portraits by the same master—"Frederick, Duke of York" (£2625), and "Pitt" (£2415). A portrait of a lady by Romney was brought to London last year from Tasmania, where it had been for sixty years, and it was sold at Christie's for £3405. A more important and sensational sale of a Romney took place in December. Three pictures were sent up to Christie's from Whitehaven, where they had been in the hands of a private collector for forty years. One of them, a painting of two children—a boy and a girl—was ascribed to Romney by the London experts, and for this canvas—dirty, damaged, and unframed—6500 gns. was bid by Messrs. Agnew, to whom it was knocked down. One of the best of the studies of children by Millais, the "Caller Herrin," was sold for £1680, and the price paid for a Crome, "Norwich above the New Mills" (£1995), is the highest on record for a work by that artist. The sales of engravings were not remarkable, but in February a proof of W. Ward's mezzotint of "The Daughters of Sir Thomas Frankland," after Hoppner, was knocked down for £693.

## ARTILLERY.

**Military.**—The re-armament of the field artillery may be described as a burning question in the British army. There have been great delays, but it is understood that an 18½-pounder quick-firing gun has been adopted, weighing, with its limber, about 1½ ton, which many think too heavy for mobility. It is, however, stated that the weight behind the teams is lighter than is the case with the old 15-pounder. The main points in view in re-armament are rate of fire, power, mobility, and the question of providing by shields for the protection of the gunners. During the South African war a German gun, manufactured by Messrs. Erhardt, of Düsseldorf, was introduced for certain batteries of the British army, causing a good deal of discussion. Mr. Brodrick, introducing the Army Estimates, 1902, said they had given good results. The leading features are that the gun recoils in a cradle, and that the carriage has a tubular telescopic trail. In all the chief armies of Europe a quick-firing field gun has now been adopted. The Germans have provisionally adopted a Krupp quick-firing field gun ("C. 96") which is said to answer all expectations, but trials are still going on. The French led the way with a very remarkable gun. The system resembles that of the Erhardt gun, and Col. Deport, the inventor, provided an arrangement for the gun to run back axially on its carriage, which is practically immovable in horizontal fire, and the gun will fire 20 rounds a minute. A hydro-pneumatic brake controls the gun and carriage, and there is a spade under each wheel and one at the trail. The gun only runs back. The breech action of the French gun is a marvel of simplicity. The breech opens with a single action, the whole of the block revolving from left to right. The reverse action loads the piece. The motion of opening extracts the case and throws it clear. Once laid, any alteration in range is made by turning a hand-screw, to which is fitted an indicator and dial. The gun is provided with a light bullet-proof shield, so that when in action the four men working it are under cover. Norway has adopted the Erhardt system, and Sweden and Denmark the well-known Krupp pattern with sliding breech. Eight other Powers appear to have concluded their trials within the past twelve months. Switzerland and the Netherlands have given the preference, after comparative trials, to the Krupp gun, and Turkey and Roumania have followed suit. Portugal, after testing the Creusot and Krupp patterns, has signed a contract with the former firm for the supply of all the field guns she requires. Mexico has ordered her guns partly at St. Chamond and

partly at Le Creusot. The new American gun is to be provided mostly in the United States, but fifty guns have been ordered from the Erhardt firm at Düsseldorf. After long-continued trials the Austrians appear at length to have almost decided upon their gun. Russia and Italy have partly renewed their field artillery armament, but seem to be still continuing trials before proceeding further with the work. Belgium hesitates between St. Chamond and Krupp; and Spain, Serbia, and Bulgaria are expected to select guns of a French pattern. It was assumed that the new Japanese Arisaka gun, which is of a very light character, was giving excellent results; but recent accounts seem to show that it is not equal to the new Russian gun, with which, however, it is believed, the whole of the Russian artillery are not yet armed. The Arisaka gun is an 11-pounder, the Russian (Engelhardt) gun a 13½-pounder, firing 16 rounds a minute. When limbered up the latter weighs 34 cwt. for the horse artillery, and 37½ cwt. for the field artillery.

**Naval.**—Development in naval guns consists chiefly in increased length. Fifteen years ago the standard length was 30 calibres, but the French introduced guns of from 42 to 45 calibres. Our new guns of the latter length are only just being introduced into the newest ships, but the Americans are now manufacturing guns of 50 calibres, and it seems to be agreed that from 40 calibres to 45 calibres is the best length for a heavy gun, and from 45 calibres to 50 calibres for a lighter one. The new Vickers 9·2-in. is of the latter length, and will be mounted in some of the new battleships and armoured cruisers. Although longer than the Mark IX. gun of the same calibre (of which particulars are given below), it has a larger nitro-cellulose charge (192 lb.), the muzzle velocity being increased to 3209 foot-seconds, and the muzzle energy to 26,754 foot-seconds. A new Vickers 6-in. has been brought forward for the new battleships and cruisers, of which some particulars are given in the table. A more powerful 50-calibre 7·5-in. gun than is shown in the table is mounted in the *Triumph* and *Swiftsure*, bought from Chili. There have been great improvements in the systems of mounting guns, combined with new arrangements for ammunition supply in any position of the gun. The hand elevating and training arrangements are admirable pieces of mechanism, giving surprising facility. The new breech mechanisms, as in the 12-in. Vickers guns in the service, have the advantage of presenting a larger locking area in the breech screw. All the new guns are vastly more powerful than their predecessors. The following table will illustrate their character and capabilities:—

	12-in.	9·2-in.	7·5-in. Q.F.	6-in. Q.F.	4·7 Q.F.	12-pr. Q.F.	3-pr. Q.F.
Calibre . . . . . in.	12	9·2	7·5	6	4·7	3·0	1·85
Weight . . . . .	50 tons	27 tons	14 tons	7 to 8 cwt.	41 cwt.	8 cwt.	5 cwt.
Length of bore . . . . . calibres	40	46·74	45	50	40	28	40
Weight, projectile . . . . . lb.	850	380	200	100	45	12·5	3·3
" charge . . . . . lb., oz.	201 8	103	47	25	5 7	0 13½	0 6½
Muzzle velocity . . . . . ft.-secs.	2750	2700	2700	3000	2188	1585	1873
" energy . . . . . ft.-tons	44,643	18,400	9340	—	1494	223	80·3
Perforation, wrought iron at muzzle . . . . . in.	46	33·3	26	—	62·4	4·9	4·1

**Authorities.**—Lloyd & Hadock, "Artillery: its Progress and Present Position"; "Naval Annual," gunnery tables; Garbett; "Naval Ordnance" (Royal Navy Handbooks); Dredge, "Modern French Artillery," reprinted from *Engineering*, '91; Longridge, "The Application of Wire to the Construction of Ordnance," '89, "Interior Ballistics," '89, "Smokeless Powder and Gun Construction," '90, "The Artillery of the Future," '91, and "The Field Gun of the Future," '92; Wille, "Das Feldgeschütz der Zukunft"; "Modern Naval Artillery" (Griffith). There is a large literature concerning the tactical employment of guns. Consult Pratt, "Field Artillery"; May, "Guns and Cavalry"; Rouquerol, "Tactical Employment of Field Artillery," translated by Capt. Radcliffe, R.F.A., 1903.

**Auctioneers' Institute of the United Kingdom (Incorporated)** The, has for its objects the provision of a central organisation for auctioneers, valuers, and land, estate, and house agents, and the promotion of the efficiency and usefulness of the profession. There are ten provincial branches. Membership may be obtained by examination annually in March or April, or under the "Practice" qualification. **President**, Mr. D. T. Alexander (Stephenson & Alexander) Cardiff. **Secretary**, Mr. Charles Harris. **Offices**, 57 and 58, Chancery Lane, W.C.

**Austin, Alfred**, appointed Poet Laureate (*q.v.*) on New Year's Day '96, was b. 1835 at Headingley, near Leeds. He was ed. at Stonyhurst College and St. Mary's College, Oscott, and took his degree at the London University in '53. He was called to the bar of the Inner Temple, '57. His bent, however, was always towards literature, and he published his first acknowledged poem, entitled "The Season," in '61, having already published, anonymously, a poem called "Randolph," in his nineteenth year. His best-known works are "The Human Tragedy," "Savonarola," "The Tower of Babel," "Prince Lucifer," "Fortunatus the Pessimist" ('92), "The Garden that I Love," ('94), "In Veronica's Garden," and "Lamia's Winter Quarters" ('95), "Alfred the Great, England's Darling" ('96), "The Conversion of Winklemann" ('97), and "The Poet's Diary" (1904). For many years he was a writer in the *Standard* and the *Quarterly Review*. He was also one of the founders of the *National Review*, which he edited, in conjunction with Mr. W. J. Courthope, during the first years of its existence. A collected edition of his Poems was issued by Messrs. Macmillan in six volumes in '92, to which two more have since been added. Address: Swinford Old Manor, Ashford, Kent.

## AUSTRIA-HUNGARY.

Austria-Hungary is a monarchy composed of a Cisleithan portion, officially known as Austria, and a Transleithan portion known as Hungary. The reigning dynasty is the Hapsburg-Lorraine dynasty, and the law of succession is that the Crown passes by right of primogeniture and lineal succession to males, or, in default of males, to females. Each country has, according to the *Ausgleich*, or Compromise made in 1867, its own constitution, a limited monarchy, and each possesses a separate parliament, but they have united under a common sovereign in the establishment of a common

army, navy, financial, diplomatic, postal, and telegraphic services. The control in regard to common affairs and the voting of money for common purposes are entrusted to a supreme body known as the *Delegations*. Of these there are two, each composed of 60 members, representing the legislative bodies of Austria and Hungary, the upper houses returning 20 and the lower houses 40 delegates. The members of the *Delegations* are appointed for one year, and are summoned annually by the Emperor alternately at Vienna and at Budapest. Subject to the *Delegations* are the three executive departments for Foreign Affairs, War, and Finance, and the Common Court of Public Accounts. The agreement between the two countries, termed the *Ausgleich*, is expressly subject to periodical revision, so far as it affects the regulation of their fiscal and commercial affairs, the quota paid by them to the common expenses of the Empire, and the privileges of the Austro-Hungarian Bank. The customs and commercial treaty agreed to in 1867 is renewable every ten years, and was denounced in Dec. '96 by the Hungarian Government in order to secure, if possible, more favourable terms for the future. The treaty expired Dec. 31st, '97, but was prolonged for one year provisionally, and afterwards till Dec. 31st, '99. During '99 it was agreed, by the Hungarian Reichstag and by the Austrian Ministry under Article XIV., the emergency clause of the constitution, that the existing Customs Union should be maintained till 1907, and that the charter of the Bank should terminate then if the customs and commercial treaty were not renewed beyond that date. The contributions to the common expenditure were fixed thus: Austria, 65·6 per cent.; Hungary, 34·4 per cent. An agreement was arrived at, however, on Dec. 31st, 1902, between the two Governments, though it still lacks the formal approval of the legislatures. Austria-Hungary is one of the three Powers which make up the *Triple Alliance* (*q.v.*).

## The Army.

The Active Army of the Dual Monarchy is an organisation common to both kingdoms, and has its *Ersatz*, or supplementary, Reserve, with local forces for Bosnia and Herzegovina attached. There are fifteen army corps, and certain troops in the military districts of Zara in Dalmatia. In addition are the *Austrian Landwehr* and *Landsturm* and the *Hungarian* (or *Transleithan*) *Landwehr* and *Landsturm*, known as the *Honved*.

During 1903 the army question rose to great prominence between the national parties in Austria and Hungary, and certain concessions were made to the latter in regard to the language of command, regimental colours, and other matters, but these do not affect the unity of the army.

The fifteen army corps comprise 5 cavalry divisions and 39 infantry divisions of the active army, and on mobilisation a *Landwehr* division would be attached to each. There are 466 battalions of *Infantry* (102 regiments of the line, 4 of Tyrolese Rifles and 4 Bosnian, and 26 battalions Regular Rifles). The *Cavalry* on a peace footing comprises 252 squadrons (15 regiments of Dragoons, 11 of Uhlans, and 16 of Hussars), and the *Artillery* 251 batteries, exclusive of 18 battalions of *Fortress Artillery* and 15 of *Pioneers*. The *Field Artillery* is formed in 14

brigades, and a group of 3 mountain batteries in the Tyrol. On a peace footing there are 224 field batteries, 16 horse batteries, 11 mountain batteries, 56 ammunition columns (in skeleton), and 56 depots. The war strength would give a total of 328 batteries (exclusive of fortress units), with a total of 2464 guns. The Austrian and Hungarian cavalry have won the admiration of European soldiers, and the empire unquestionably possesses a thoroughly practical mounted arm fit for service at a moment's notice.

The following table shows the total strength of the forces in 1904; but it is believed that by embodying all classes of the Landsturm the dual monarchy could put 3,000,000 men in the field.

	Peace.	War.
Field Army . . . . .	266,000	687,000
Landwehr and Honved . . . . .	51,000	237,000
Reserve Troops . . . . .	6,000	192,000
Fortress Troops . . . . .	7,000	31,000
Transport Staff, etc. . . . .	16,000	—
Landsturm . . . . .	—	393,000
	346,000	1,540,000

The Honved (national Hungarian army) is subject in war time only to the Commander-in-Chief, and in peace time only to the Royal Hungarian jurisdiction.

### The Navy.

1. Finance.—The Estimates for 1904 came to a total of £2,084,434 (50,026,410 kr.), an increase of £43,150 (1,035,590 kr.) over the sum voted for the previous year. The sum proposed for new construction was £683,770 (16,410,480 kr.)

2. Personnel.—The numbers of all ranks in the Austrian Navy, including reserves, total 11,000. The executive officers are distributed as follows: 1 admiral, 3 vice-admirals, 10 rear-admirals, 20 captains, 30 commanders, 140 lieutenants, 75 sub-lieutenants, 205 midshipmen, and 175 cadets.

3. Matériel.—The strength of the Austrian Navy in ships built and building on Nov. 30th was:—

#### Built.

Battleships, 1st class . . . . .	3
"    3rd class . . . . .	5
Coast defence ships . . . . .	3
River monitors . . . . .	6
Armoured cruisers . . . . .	1
Protected cruisers, 2nd class . . . . .	2
"    3rd class . . . . .	4
Torpedo vessels . . . . .	15
Torpedo boats . . . . .	37

#### Building.

Battleships, 1st class . . . . .	3
Armoured cruisers . . . . .	1
Torpedo vessels . . . . .	5

4. Dockyard.—The principal Government dockyard of Austria-Hungary is situated at Pola. There are three small docks there.

5. Progress.—The battleships *Hapsburg*, *Arpad*, and *Babenburg* have all been completed and passed into service, and two river monitors, the *Bodrog* and *Temes*, which were launched in March, were completed for service in November. The launches of the year in-

clude the battleship *Erzherzog Friederich* at Trieste on April 30th.

Austria has an area of 115,993 sq. m.; estimated population in 1902, 26,150,708. The variety of races and languages included in the empire is great. There are about 9,000,000 Germans, 6,000,000 Bohemians, Moravians, etc.; 4,250,000 Poles, 3,380,000 Ruthenians, 1,200,000 Slovenes, besides smaller numbers of Servians, Croats, Italians, etc. The empire is governed by an Emperor and by the Reichsrath, or Council of the Empire, consisting of an Upper House and a Lower House. The Reichsrath has its own ministers and government, and exercises full parliamentary functions on all matters within its competence—from which, however, Foreign Affairs and War are excluded. The present Upper House contains 239 members. It is composed of the Princes of the Imperial family who are of age, of whom there are 17, of 68 hereditary nobles, of 18 archbishops and bishops, and of 157 (in 1903) life-members nominated by the Emperor for distinguished services in science or art, or to the Church or State. The Lower House contains 425 members, who are the popular representatives of the seventeen provinces which comprise the Austrian Empire: viz., Lower Austria, 46 members; Upper Austria, 20; Salzburg, 6; Styria, 27; Carinthia, 10; Carniola, 11; Trieste, 5; Görz and Gradiska, 5; Istria, 5; Tyrol, 21; Vorarlberg, 4; Bohemia, 110; Moravia, 43; Silesia, 12; Galicia, 78; Bukowina, 11; Dalmatia, 11. According to the present system they are elected for six years by five groups: the large landed proprietors, who choose 85 members; the Chambers of Commerce, who choose 21; the inhabitants of towns, 118; the inhabitants of country districts, 129; and the general body of electors, including roughly all male citizens over twenty-four with a residential qualification of six months, who choose 72. In these four groups there are comprised about 1,700,000 voters. Members of the Lower House receive 16s. 8d. per day while in attendance, with travelling expenses. Purely provincial matters, and matters not expressly reserved to the Reichsrath, are administered by the seventeen provincial diets, or Landtage, the members of which are elected for six years, and meet in session annually, while local matters are dealt with by communal councils, or by corporations in towns. The chief towns are Vienna, pop. 1,674,957; Prague, 201,589; Lemberg, 159,877; Gratz, 138,080; and Trieste, 134,143. About a dozen dailies are published in Vienna, of which the principal are the following: The *Neues Wiener Tagblatt*, has the largest circulation in Austria and Hungary, and prints from 65,000 to 100,000 a day. Editor, Mr. Wilhelm Singer. London correspondent, Dr. Maurice Ernst, who at the beginning of the Japanese war received a letter from King Edward in which His Majesty expressed the wish that the press should do its utmost towards promoting a spirit of international friendliness. The *Neue Freie Presse* which possesses a world-wide reputation, especially for its financial column. Present editors and part proprietors: Mr. Maurice Benedikt and Dr. E. Bacher. London correspondent, Mr. E. Lunge. The *Fremdenblatt* is accredited as also being a Foreign Office organ; while the newly-founded *Zeit* professes to be wholly independent. The best-known illustrated comic papers in Vienna are *Der Floh* and the *Figaro*.

Hungary has an area of 125,430 sq. m.; population, 1902, 19,254,559. The various races include about 7,500,000 Magyars, 2,130,000 Germans, 2,000,000 Slovaks, 2,600,000 Roumanians, 1,565,000 Croats, 1,062,000 Servians, and others. The kingdom includes Hungary, Croatia-Slavonia, and Transylvania, and is governed by a King (the Emperor of Austria), and a Reichstag, consisting of a House of Magnates and a House of Representatives. The former comprises 241 hereditary peers, paying land tax of at least 3000 fl. a year, some 55 high ecclesiastical dignitaries of the Roman Catholic, Greek, and Protestant Churches, 74 life-peers, all the archdukes who have attained their majority, 3 delegates from the Diet of Croatia-Slavonia, and 10 state dignitaries and judges. The House of Representatives contains 453 members, elected for five years by male citizens over 20, with a low property qualification. Of these 413 represent Hungary, and 40 Croatia and Slavonia. Members of the Lower House receive £200 a year with £66 13s. for house rent. For local government there are municipalities and rural communes with representative bodies. Transylvania is in full legislative and administrative union with Hungary, but Croatia-Slavonia has its own Ban, or governor, and its own provincial diet, consisting of 90 members, for the transaction of provincial matters. The population of Transylvania is largely Roumanian, and much discontent exists amongst them on account of the persecution and injustice which they allege they suffer at the hands of the Magyar rulers of Hungary. The capital is Budapest (pop. 505,763). Budapest possesses more daily papers than Vienna. Amongst the best known in England is the *Pester Lloyd*. Editor, Dr. Max Falk. Amongst the Budapest dailies published in Hungarian should be mentioned the *Budapesti Hirlap* and the *Pesti Hirlap*.

Bosnia-Herzegovina, though in strictness still a province of the Porte, has since the Treaty of Berlin in '78 been occupied and administered by Austria-Hungary, and may fairly be considered as belonging to that empire. Its area is 19,702 sq. miles, and the population is about 1,737,000. It is placed under the Austria-Hungarian Finance Minister, Baron Stephan Burian of Rajecz, and the Provincial Government is located at the capital, Sarajevo (pop. 38,000).

Liechtenstein is a principality under Prince John II., lying between Austrian Tyrol and the Rhine, which practically is included in the Empire. Area, 65 sq. miles; population, 9500; capital, Vaduz. The administration is directed from Vienna by a Court of Chancellery.

The chief religious bodies in Austria, where religious liberty is the ruling principle, are Roman Catholics, Greek Catholics, Lutheran and Reformed Evangelicals, Armenians and Jews. In Hungary much the same divisions exist, and full liberty and equality prevail. Roman Catholics form about 80 per cent. of the population in Austria, and about 50 per cent. in Hungary. Attendance in the elementary schools is compulsory in both countries, although the period of attendance varies in different districts, and the educational fabric includes also gymnasia and other preparatory schools, universities and colleges, and technical schools. The larger half of the population in both countries are engaged in and dependent upon

agriculture, cereals, beet, wine and silk being produced. There are extensive and valuable forests, and mining for coal and iron is also carried on very largely. The chief exports are sugar, grain, cattle, horses, eggs, and other agricultural produce, timber, woollen and leather goods, glass and glassware, and fancy fancy goods. There are 29,378 miles of railways.

The estimated revenue and expenditure for common affairs for 1903 amounted to £16,165,000. For Austria alone the revenue in 1903 was £73,380,000, and the expenditure £73,365,000; for Hungary alone the revenue was £40,365,000, and the expenditure £46,345,000; for Croatia and Slavonia the revenue was £815,000, and the expenditure £810,000; for Bosnia-Herzegovina the revenue was £1,060,000, and the expenditure £1,945,000. The public debt of Austria was in 1902 £384,865,000, with annual interest charges of £15,725,000, towards which Hungary's contribution was £2,565,000; the public debt of Hungary in 1902 was £220,415,000.

	1902.	1903.
Imports .	£78,598,711	£82,711,425
Exports .	83,150,191	90,708,232

including in both cases precious metals and coin. The total trade for the year 1903 was by far the largest yet recorded. The United Kingdom sent £6,088,142 of the imports, and took £9,212,224 of the exports.

**Ministries for Common Affairs:** *Minister for Foreign Affairs*, Count Agenor Goluchowski.—*Minister of Finance*, Baron Stephan Burian von Rajecz.—*Minister of War*, Lieut.-General von Pitreich.

**Ministerial Council for Austria:** *Premier and Minister of Interior and Justice*, Dr. von Körber; *National Defence*, Count Zeno Welsersheimb.—*Public Worship and Education*, Dr. Wilhelm von Hartel.—*Commerce*, Baron von Call zu Rosenberg u. Culmbach.—*Finance*, Dr. Mansuetus Kosel.—*Agriculture*, Count Ferdinand Buquoy.—*Railways*, Dr. von Wittek.—*Ministers without portfolio*, Leonhard Pietak and Dr. Antonin Randa.

**Ministerial Council for Hungary:** *President of the Council and Minister for Home Affairs*, Count Stephan Tisza.—*Public Worship and Instruction*, Albert von Berzeviczy.—*Croatia, Slavonia, and Dalmatia*, E. de Cseh.—*Justice*, Dr. Alexander von Plösz.—*Finance*, L. Lukacs.—*Minister at H. M. Court*, ad interim: Count St. Tisza.—*Minister of National Defence*, Major-General Alex. Nyiry.—*Commerce*, Karl von Hieronymi.—*Agriculture*, Bela von Talian.

**Ambassador in London**, Count Albert Mensdorff.—*Secretary*, Count Theobald Westphalen.—*Attaché*, Prince Emil Fürstenberg.—*Chancellor*, Bruno Steiner.—*Military Attaché*, Prince Frederick von und zu Liechtenstein. *Embassy*, 18, Belgrave Square, S.W.

**Consulate-General in London**, 22 and 23, Laurence-Pountney Lane, E.C.—*Hon. Consul-General*, Baron Alfred de Rothschild.—*Acting Consul-General*, F. Stockinger.—*Vice-Consul*, Count Gustav Sizzo Norris.

**British Ambassador at Vienna**, The Rt. Hon. Sir Francis R. Plunkett, G.C.B., G.C.M.G., G.C.V.O.; *Secretary*, Hon. Alan Johnstone, C.V.O.; *Commercial Attaché* (for Austria-Hungary, Italy, and Greece), Andrew P. Bennett, Esq., British Embassy, Vienna.

**Consular Service:** *Consuls-General*, at Vienna, Chevalier Paul von Schoeller, C.M.G. (hon.); at Budapest, F. W. Stronge; at Sarajevo, E. B.

Freeman, I.S.O. *Consuls*, at *Vienna*, M. Feldscharek; at *Prague*, Capt. A. W. W. Forbes; at *Budapest*, Dr. Brüll, C.M.G.; at *Trieste*, H. L. Churchill; at *Fiume*, G. Faber.

### **Sovereign.**

The Emperor of Austria and King of Hungary and Bohemia is Francis Joseph I., b. Aug. 18th, 1830. His father was the late Archduke Francis Charles. Succeeded his uncle, Ferdinand I., as Emperor of Austria, Dec. 2nd, '48. Crowned King of Hungary June 8th, '67. The beginning of his reign was marked by important events. Hungary was in a state of rebellion, which was quelled by the help of Russia. His Italian dominions were saved by the genius of General Radetzky. The Emperor made strenuous efforts to prevent the Crimean war, and refused to join France and England. After the Austro-French war ('59), he was compelled to sign the treaty of peace of *Villafranca*, by which Lombardy was ceded to Italy. In '66 he lost the duchy of *Holstein*, obtained by the convention of *Gastein*, and in the same year, as the result of the war with Prussia, *Venetia* also. That year was fatal to the supremacy of Austria in Germany, the contest being decided in favour of Prussia by the treaties of *Nikolsburg* and *Prague* respectively. The Turkish provinces of *Bosnia* and *Herzegovina* were, by decision of the *Berlin Congress* ('78), placed under the administration of Austria-Hungary. In '54 the Emperor Francis Joseph married the Princess Elizabeth Amalie Eugenie, (daughter of the Duke Maximilian Joseph of *Bavaria*), who was murdered by an Italian anarchist at *Geneva* in '98. The death of the Crown Prince *Rudolph* made the Archduke Francis Ferdinand (q.v.), a nephew of the Emperor's, the heir to the throne. The Emperor received King *Edward VII.* at *Vienna* in Aug. 1903, and was by him appointed a Fieldmarshal of the British Army. He returned the compliment in 1904 by appointing King *Edward* a Fieldmarshal in the Austro-Hungarian army, and visiting him during his stay at *Marienbad*.

### **Political Parties.**

**Austria.** The Lower House of the *Reichsrath* includes members of widely varying race and creed: for instance German Liberals, National Germans, Anti-Semites, Poles, Ruthenians, Young Czechs, Old Czechs, Independent Czechs, Left Centre, Clericals, Slavonians and Serbo-Croats, Bohemian Feudal Conservatives, Moravian Central Party, Italians, Roumanians, and German Conservatives. Count *Taaffe*, long the Prime Minister, in Oct. '93 lost the support of the German Liberals, the Poles, and the Conservatives, because of his Electoral Reform measure, which practically amounted to a measure of universal suffrage; and he finally had to resign. He was succeeded by Prince *Windischgrätz*, who, with the help of the Poles, the German Liberals, and the Conservatives, managed to form a Coalition Cabinet, which held office till June '95, when it was succeeded first by a provisional administration under Count *Kielmansegg*, and then by a non-party Cabinet under Count *Badeni*. The Poles, the Moderate German Liberals, and the Young Czechs formed the majority upon which Count *Badeni* relied during '97. His famous language ordinance, allowing the official use of the Czech language in Bohemia and

Moravia, alienated the Germans, and provoked a racial conflict of a most bitter character between the Germans and the Czechs. The Czechs laid stress on the language question, because their aim is to obtain for Bohemia a semi-independent status such as Hungary enjoys; whereas the Germans desire to maintain the existing centralised form of government with their own supremacy under it. The Germans, with the exception of the German Nationalist group, consolidated themselves in '99. There was also a steady and significant revolt against the political influence of the Roman Church during the year, and it was seen to be intimately associated with the German Nationalist agitation. Finally Count *Thun* resigned, the language ordinances were repealed, and a Ministry under Count *Clary* was formed, relying mainly upon the Germans for a majority in the *Reichsrath*. He had to resign (Dec. 21st, '99), and eventually Dr. von *Körber* formed a Ministry composed largely of permanent officials, and relying upon no party for support. Attempts were made to effect a compromise between the Czechs and Germans, but failed, and the Lower House was dissolved (Sept. 7th, 1900). The elections followed in December and Jan. 1901; and the Clericals, both the Ultramontanes in the Alpine provinces and the Anti-Semites in the urban districts, lost heavily, the Social Democrats being responsible for their downfall in *Vienna*. The Poles more than held their own, but the young Czechs lost ground slightly. The German Nationalists, led by Herr *Schönerer*, returned 21 strong as against 5 in the last House, and the extreme Germans generally strengthened their position at the expense of the more moderate Germans. In 1902 the German People's Party separated from the more moderate German sections, and drew closer to the German Nationalists. At the provincial elections in Lower Austria, held in Nov. 1902, the Clericals gained heavily. (See *History* below.)

**Hungary.** Parties here are distinguished as Liberals, Independents, the Croatian delegates, who usually vote with the Liberals, and the Nationalists, who vote now with one party and now with another. At the general election in Oct. '96 the Liberals gained a decisive victory. There were then returned 282 Liberals, 37 Nationalists, 48 Kossuthists, 7 Ugronists, 20 of the People's Party, and 10 owing allegiance to no party. The net Liberal gain was estimated to be 65 seats, while all the other parties except the Kossuthists, led by M. Franz *Kossuth*, lost ground. The Ugronists afterwards joined the Kossuthists, and passed under Clerical influence. At the end of '98, and early in '99, there was a serious split in the Liberal party, and the dissentients, with the aid of the Opposition, mainly controlled by the Clerical party, succeeded in driving Baron *Banffy* from office in Feb. '99. He was succeeded by M. *Koloman Szell*, but the Liberals remained in power. The National Party afterwards fell asunder, the members mostly joining the Liberals, and the Kossuthists showed symptoms of breaking up; but see *History* below.

### **History, 1904.**

In his opening address to the reassembled *Reichsrath* (March 8th), Dr. von *Körber* said that, besides a large number of bills, no fewer than sixty important Imperial Ordinances

awaited Parliamentary sanction owing to the deplorable condition of Parliamentary business caused by the constant obstruction. The antagonism between the Czechs and Germans was as great as ever, and manifested itself in dangerous riots at Prague and even in Vienna, where the University had to be prematurely closed (10th) owing to the friction between German and Slav students. In Parliament the old obstructive tactics were resumed in a very violent and virulent fashion, and ultimately the Reichsrath was adjourned without having even elected the Austrian Delegations (22nd). There was at this time some evidence of an understanding having been arrived at between the Young Czechs and the Poles, and the Germans were correspondingly alarmed. The Prince and Princess of Wales arrived at Vienna on a visit to the Emperor (April 10th). The Reichsrath again adjourned (May 10th), this time *sine die*, the Czech obstruction having again prevented any legislation from being carried. When the Delegations assembled during this month they found themselves confronted by very heavy extraordinary estimates for naval and military expenditure for 1905; and the War Minister, Lieut.-General von Pitreich, explained (18th) that they were absolutely necessary to bring the armaments of the country up to the level of modern requirements, and to make good existing deficiencies. The political situation did not affect the matter, though it was stated that the need for more expenditure was in part deduced from the lessons afforded by the Russo-Japanese War, and in part a precaution against trouble in the Balkans. The Emperor went to Marienbad as the guest of King Edward VII., who was taking the waters there (Aug. 16th), and left on the following day, after a most cordial visit.

After protracted negotiations a provisional agreement with Italy was signed at Rome (Sept. 22nd), covering the period from Oct. 15th, 1904, to Dec. 31st, 1905, when the new commercial treaty between Austria-Hungary and Italy, the draft of which was also agreed upon, is to come into force. The old treaty lapsed on Dec. 31st, 1903, and was provisionally continued, minus the wine clause, to Sept. 30th, and afterwards to Oct. 14th, 1904. The new provisional agreement provided for the admission into Austria-Hungary of 450,000 hectolitres of foreign white wine of specified strength and quality at a special rate between Oct. 15th and Dec. 31st, 1904, thus really giving a concession to Italy; but placed all foreign wines on a higher scale of duty for 1905, and applied a still higher scale under the new treaty for 1906.

The Premier reconstructed his Cabinet (Oct. 26th), the Finance Minister, Dr. von Böhm Bawerk, being succeeded by Dr. Mansuetus Kosel, and the Minister of Agriculture, Baron von Giovanelli, by Count Ferdinand Buquoy; while Dr. Antonin Randa, of the Czech party, was also given a seat. A serious riot occurred at Innsbruck (Nov. 3rd). There had been a long-standing feud between the German and Italian students there; and to avoid trouble the Government had instituted a new and separate law faculty for Italian students. To celebrate its inauguration the students met at a hotel. An affray rose between them and the Germans outside, shots were fired, the hotel was demolished, the police were overpowered, the troops (the Italian Imperial Light Infantry) were called out, and charged, and more life was lost.

The Reichsrath reassembled (17th) under better auspices than usual, so far as obstruction was concerned. There were signs of a better understanding between the Government and the Czechs, owing to proposals for important public works in Bohemia. The Poles had also been conciliated in August by the institution of parallel classes for Czech and Polish teachers in the German teachers' training colleges of Austrian Silesia, and other conciliatory acts. On the other hand, the Pan-German party was pretty generally discredited.

The negotiations with Germany for a new commercial treaty were broken off (30th), but resumed during December. An ultimatum to the Porte was presented by the Austro-Hungarian Ambassador (Dec. 5th) demanding the dismissal and punishment of Turkish officials at Skutari, in Albania, who had prevented by force the despatch of Austro-Hungarian mails, and threatening in default of compliance a naval demonstration against Turkey. The demands were complied with.

In the Hungarian Chamber bills were introduced by the Government (March 2nd) to sanction negotiations for new commercial treaties with Germany and Italy, to found a large number of Hungarian scholarships in various military educational institutes, and to organise a Royal Marshal's Court for Hungary. Later in the year an ordinance was issued by the Austro-Hungarian War Minister establishing the rights of the Hungarian language in military correspondence, as promised in 1903. In consequence of continued obstruction on the part of a small body in the Reichstag, the Premier proposed (5th) various amendments of the standing orders. He asked that the President, after hearing two speakers, should for one year, and in regard to stated business, have the power to call upon the House to vote by show of hands; that, on receipt of a motion signed by 50 Deputies, he should have power to fix the maximum duration of any debate; and that he should be empowered to prohibit speeches made for the purpose of wasting time and to punish disobedient or uproarious Deputies by having them excluded from the sitting. These strong measures and the evident determination of the Premier, backed by the Liberal party, to carry them out, brought about a compromise. The Clerical Independents, the Clerical People's party, and the Liberal dissentients undertook to cease their obstruction to the Recruits Bill for 1903; whereupon Count Tisza withdrew his proposals (10th). The Recruits Bill was duly passed, a vote on account of the first six months of the current year was granted, and a bill of indemnity for the period May to December 1903, during which the Government was carried on without Supply (18th). The Recruits Bill for 1904 was carried (21st).

A general strike on the State railways broke out (April 20th), isolating Hungary from railway communication with the rest of Europe, since 70,000 men were involved, the cause of the dispute being a demand of the railway men and officials for higher pay, which the Government proposals did not meet to the men's satisfaction. Hundreds of arrests were made, but the men were afterwards set at liberty and sent to their homes. The Government, however, ordered the militarisation of all railway employees liable to military service in the reserve, and took severe measures, which practically crushed the strike. The Parliamentary session was closed

by Royal decree (25th), and the Opposition were thus robbed of a chance of making capital out of the strike. When Parliament had re-assembled, the Premier laid before the Lower House the terms of a convention made with the Cunard Co., by which the company undertook to organise a line for passenger, mail, and freight traffic between Fiume and New York, with fortnightly sailings (July 25th).

The Premier, just before Parliament met (Oct. 10th), announced his determination to deal with Parliamentary obstruction, and carried (12th) the appointment of a Special Committee to revise the Standing Orders. He was at once met by vehement opposition on the part of the Independent, Clerical, and Nationalist parties; and the discussion on his motion raged for some time. At the critical moment, in answer to a timely interpellation, he announced that the new Army Bills would be framed on the basis of the two years' service system, and that the Hungarian Honved or Landwehr would be supplied with the artillery formations which

the nation had long desired (Nov. 12th). His "guillotine" motion, creating new provisional standing orders, was carried by a large majority (18th) after violent scenes, and he at once produced a Royal decree closing the session. The Opposition groups at once united under M. Francis Kossuth and Count Apponyi to fight the Ministry on what they declared to be the Premier's breach of the Constitution, and drew up an address to the Crown, which was signed by the two leaders named and by Baron Banffy, M. Szederkenyi, M. Thaly, M. Ugron, Count Zichy, and others. This address declared the provisional standing orders null and void, and every subsequent decision of Parliament taken with the aid of the guillotine invalid. Such decisions, it continued, could not receive the Royal sanction without provoking incalculable conflicts and disturbances. When the Chamber was to be met (Dec. 13th) the Opposition secured possession, wrecked the President's chair and Ministerial benches, and prevented any legal sitting from taking place.

## B

**Ball, Sir Robert Stawell, LL.D., F.R.S.,** was b. at Dublin July 1st, 1840, and was ed. at Chester and Trin. Coll. Dublin. Formerly Andrews Professor of Astronomy in the University of Dublin, and Royal Astronomer of Ireland ('74), now Lowndean Professor of Astronomy and Geometry in the University of Cambridge and Director of the Cambridge Observatory ('92). He is the author of several works on the mathematical doctrine known as the Theory of Screws, besides many papers on mathematics, astronomy, and physical science in various publications. Knighted '86. "The Story of the Heavens," "Starland," "In Starry Realms," "The Story of the Sun," "In the High Heavens," "Great Astronomers," and "The Earth's Beginning" are amongst his chief works. He is also widely known as a lecturer on astronomical subjects. Address: Observatory, Cambridge; Athenæum Club.

### BANKING.

THE BANK OF ENGLAND.  
BANK NOTES AND CIRCULATION.  
CLEARING HOUSE SYSTEM.  
BANKING CAPITAL.  
INSTITUTE OF BANKERS.  
PEOPLE'S BANKS.

#### *The Bank of England.*

Governor, Mr. S. Hope Morley, 1904-5;  
Mr. A. F. Wallace, 1905-6.  
Deputy-Governor, Mr. A. F. Wallace, 1904-5;  
Mr. W. M. Campbell, 1905-6.  
Chief Accountant, G. F. Stutchbury.  
Chief Cashier, J. G. Nairne.  
Secretary, K. Grahame.

This is the most important bank in the world. It was established in 1694 with a capital of £1,200,000, which has been increased from time to time until it reached £14,553,000 in 1816, at which amount it now stands. It has also a rest, or reserve, of about £3,000,000. Under the Bank Charter Act of '44, the Bank is divided into the Issue and Banking Depart-

ments. From the former the Bank is permitted to issue £14,000,000 of notes of its own upon certain securities, of which the debt owing to it by the Government, amounting to £11,015,100, formed part. Every note issued in excess of £14,000,000 was ordered to be represented by gold coin or bullion, silver bullion to a limited extent being permissible. In practice silver bullion is not now held in the Issue Department. It is also provided that, if any of the note issuing banks discontinue issuing their own notes, His Majesty in Council may authorise the Bank of England to increase its securities in the Issue Department by an amount not exceeding two-thirds of these lapsed issues. The fiduciary issue of the Bank has so risen at different periods from '44 that it now stands at £18,450,000. The annual sum payable by the Bank for its exclusive privileges has been increased from £120,000, as settled in '33, to £180,000, and all profit from the increase of the issue of their notes beyond £14,000,000 is directed to go to the public. The profit on this amount was, up to '92, the interest at 3 per cent. after deductions for stamp duties and expenses. As regards what are called dead bank notes it is enacted that, when Bank of England notes issued more than forty years have not been presented for payment, the Bank may write off the amount, or any portion of the amount, of these notes from the amount of such issued from the Issue Department, and the Bank Charter Act of '44 is to apply as if the amount of notes thus written off had not been issued. The Bank will, however, be liable to pay any note so written off if it is presented for payment. Another source of profit to the Department is the gain made in the purchase of foreign coin and bullion brought to it, for which under the Act of '44 the Bank pays at the rate of £3 17s. 9d. per oz., being 1½d. per oz. under Mint price.

In the Banking Department the Bank of England, in addition to transacting business as other large English banks do, acts as the banker of the Government in the management and

payment of dividends on the National Debt, the issue and withdrawal of Exchequer bills and bonds, the issue of Government loans, and the banking operations connected with the Government offices, the Indian Government, and much of the financial business of Colonial Governments. By the Bank Act of '92 the remuneration to be paid to the Bank of England for the management of the National Debt is to be a yearly sum at the rate of £325 per million pounds of such debt up to £500,000,000, and at the rate of £100 for every million above this amount up to and including the year ending March 31st, 1912, and thereafter from year to year until Parliament otherwise directs. During such period this annual sum is not to be less than £160,000. For the management of Exchequer bonds and Exchequer bills the Bank is to receive £100 per million, and for the management of Treasury bills £200 per million outstanding on the last day of the previous financial year. The Bank also takes charge of the reserves of other bankers in connection with clearing-house transfers, and in consequence of this the reserves of the Bank are generally the only unused money in the country that can be had on a sudden demand. This institution also derives much profit from the employment of its deposits, on which it allows no interest. It is the ultimate resort of all large merchants and traders and others who wish to borrow and cannot get accommodated at other banks.

The Bank Charter Act of '44 requires a weekly account to be published of certain particulars of the Issue and Banking Department. The one for the week ending Dec. 7th, 1904, is as follows, viz. :—

DR.	Issue Department.	£
Notes issued . . . . .		48,524,190
CR.		£
Government Debt . . . . .		11,015,100
Other securities . . . . .		7,434,900
Gold coin and bullion . . . . .		30,074,190
		£48,524,190

DR.	Banking Department.	£
Proprietors' Capital . . . . .		14,553,000
Rest . . . . .		3,177,145
Public deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and dividend accounts . . . . .		7,632,085
Other deposits . . . . .		41,145,452
Seven-day and other bills . . . . .		130,661
		£66,638,343

CR.		£
Government Securities . . . . .		15,609,872
Other Securities . . . . .		28,562,003
Notes . . . . .		20,654,945
Gold and silver coin . . . . .		1,811,523
		£66,638,343

Besides the head office and two branch offices in London, the Bank of England has branches at Liverpool, Manchester, Birmingham, Leeds, Hull, Bristol, Newcastle, Plymouth, and Portsmouth. The management of the Bank is in the hands of a governor, deputy-governor,

and 24 directors, elected by stockholders who have held £500 worth of stock for at least six months previous to the election. In future, it is provided by a supplemental charter, where stock stands in the joint names of two or more members, the first name in a joint account will be able to vote, unless the other or other members nominate one of such to do so. The supplemental charter also provides for the abolition of the "shuttings" of the transfer books of bank stock, and henceforth the stock may be transferred "ex div." the day after the balance for the dividend has been struck. A director is required to hold £2000, a deputy-governor £3000, and a governor £4000 of the stock. Custom has excluded English bankers from this body, but members of leading firms negotiating foreign loans and engaged in foreign bill broking appear to be eligible. The Court, or Board of Directors, meet every Thursday, when the weekly account is presented. The two governors have the chief administration of the institution, and attend daily at the Bank.

At the half-yearly general Court of the Directors and Company of the Bank of England held on Sept. 22nd, 1904, the net profits of the half-year ended Aug. 31st were £651,750, as against £715,767 for the corresponding period of 1903, and a half-year's dividend of interest and profits was made of £4 10s. per cent.

#### Fixed Issues and Circulation of Notes.

The fixed issues of bank notes by the banks of Great Britain and Ireland are, according to the *Bankers' Magazine* for Dec. 1904, as follows, viz. :—

England : Bank of England . . . . .	£18,450,000
" 17 Private Banks . . . . .	684,201
" 19 Joint Stock Banks . . . . .	1,135,283
Scotland : 10 Joint Stock Banks . . . . .	2,676,350
Ireland : 6 Joint Stock Banks . . . . .	6,354,494
	£29,300,328

This periodical for the same date also stated that the average weekly circulation of the banks of the United Kingdom to Nov. 9th, 1904, is as follows :—

	£
Bank of England, for month ending Nov. 9th . . . . .	27,934,205
Private Banks . . . . .	171,288
Joint Stock Banks . . . . .	489,051
Total in England . . . . .	28,594,544
Scotland . . . . .	7,508,282
Ireland . . . . .	6,957,209
United Kingdom . . . . .	43,060,035

In comparison with the corresponding period of 1903 the returns show a decrease in the Bank of England circulation of £629,440, a decrease in private banks of £28,407, and a decrease in joint stock banks of £52,643; in Scotland a decrease of £227,049, and in Ireland a decrease of £604,780; showing that the month ending Nov. 9th, as compared with the corresponding period of 1903, presents a decrease of £710,490 in England, and a decrease of £1,542,319 in the United Kingdom.

### The Clearing-house System.

A clearing house is an establishment in large cities in which the business of banks with other banks is adjusted. Each bank which deals with the London Clearing House sends clerks daily, who take with them the various bills and cheques in possession of their bank or drawn on other bankers. This adjustment establishment, and the bankers connected with it, have accounts at the Bank of England, and the balances, which were formerly settled by cash or notes of this bank, are now settled by transfers from one account to another. The arrangements for clearing are directed by a committee appointed by the banks. There are two paid managers or inspectors to better carry out these arrangements. Accounts are closed at four o'clock. Three-quarters of an hour is allowed for the banks to consider drafts upon them, and to determine whether they are to be honoured. In the meantime the bills and cheques have been classified at the Clearing House, and by 5.30 accounts are adjusted, each bank paying or receiving the balance due to it. The notification of the total amount of bills, cheques, and drafts, passing through the Clearing House is an indication of the state of trade, and as the Metropolis is the main cosmopolitan centre of commerce, this record has a world-wide range. The sums passed through the London Clearing House for 1903 reached the enormous total of £10,119,825,000, as against £10,028,742,000 in 1902. In the provincial clearing houses cheques are drawn not only on the members' banks actually presenting, but also on their branches within a specified distance of the centre. There are clearing houses at Liverpool, Manchester, Birmingham, Leeds, Sheffield, Newcastle-on-Tyne, and Leicester; and in Scotland at Edinburgh, Glasgow, Aberdeen, Dundee, Greenock, Leith, Paisley, and Inverness. In Ireland the only clearing house is in Dublin. Chief Inspector, Philip W. Matthews; Deputy Inspector, M. E. Scott, Lombard Street, E.C.

### Capital and Reserve Funds.

The total amount of the paid-up capital of all the joint-stock banks of the kingdom and the Bank of England on Oct. 1st, 1904, was £86,828,900. Beyond their capital these banks hold reserves to about £48,575,200, which amounts are held in the following proportions by these institutions in different divisions of the country, viz.:

	Capital.	Reserve Funds.
	£	£
Bank of England . .	14,553,000	3,000,000
Other Banks, England	55,620,100	34,231,700
Banks, Isle of Man .	30,000	40,000
„ Scotland . .	9,316,600	7,353,700
„ Ireland . .	7,309,200	3,949,800
	<b>£86,828,900</b>	<b>£48,575,200</b>
	<b>£135,404,100</b>	

The 16 private banks which publish accounts have capital and reserves to the amount of about £4,592,955, and the remainder about £2,000,000, so that the total paid-up capital and reserves for all home banks is about £142,000,000.

### Institute of Bankers.

This Institute was founded in '79, and is an association of gentlemen connected with the various branches of banking. Its objects are to facilitate the consideration and discussion of matters of interest to members of this branch of commerce, and to afford opportunities for the acquisition of a knowledge of the theory of banking. It has at present in London, the provinces, in India, and the Colonies about 5000 adherents: viz., 420 Fellows, who are partners, directors, or managers of banks, 1122 Associates, consisting of officials of over 10 years' standing, and those who have passed the final examination, and about 3500 ordinary members drawn from the juniors on bank staffs. These different classes subscribe £2 2s., £1 1s., and 10s. 6d. per annum respectively. Papers on banking and financial subjects are read and discussed before the Institute from time to time and published in the official *Journal of the Institute of Bankers*, which also contains matter of interest to bankers generally. The annual examinations for the certificate of the Institute are held in the spring in London and numerous provincial centres. The Offices are at 34, Clement's Lane, Lombard Street, President, J. Spencer Phillips, Esq.; Secretary, Mr. W. Talbot Agar; Assistant Secretary, Mr. Ernest Sykes.

### People's Banks.

The movement usually designated "People's Banks" had its origin about the year 1849 in the north of Germany, where, almost simultaneously, although working quite independently of one another, systems of popular banking were established by Schulze-Delitzsche and Raiffeisen, in two districts, the Winterwald of Prussia and Flammersfeld, where the people were the poorest and most in the hands of the usurers, agriculture the most neglected, and manufactures in an almost primitive condition. In both instances the original capital was exceedingly limited—£336 in the one case and £300 in the other—obtained by the subscriptions of men well known to one another and to the founders. The peasants and small craftsmen became gradually encouraged to deposit their savings in these banks, which undertook the granting of small loans at a fair commercial rate of interest, 5% or 6% to poor but industrious and honest workers, to assist in the cultivation of their holdings and pursuit of their avocations. Despite many obstacles, including official disapproval, these banks have played an exceedingly important part in the agricultural progress and the remarkable commercial development of Germany during the last three decades. How important may be gathered from the fact that there are now more than 8000 of these institutions in Germany and Austria-Hungary, with a total membership of over 2,000,000, disposing of over £20,000,000 sterling, and doing business to the amount of over £400,000,000 yearly. The names under which these organisations go and their methods of working are not always identical, but their essential principles are the same—viz., that the industrious and honest poor shall be able to have the same facilities for credit as their richer brethren, the security being their collective credit.

Next to Germany the greatest success of the movement has been attained in Italy. There

in 1866 Signor Luzzatti, since Finance Minister in more than one Cabinet, established the "People's Bank of Milan," with the trivial sum of £28 (the exact sum with which the "Rochdale Pioneers" commenced operations). From this humble beginning it has grown till it possesses a paid-up capital of £500,000, and during its existence has loaned out over £5,000,000 to the industrial classes, chiefly in very small sums, often but a few shillings. The present position of the movement in Italy generally will be best understood from the fact that one-third of the whole banking business of that country is transacted through the medium of the "People's Banks," of which there are now more than 1000 in operation.

From these centres it has spread in various directions: to Switzerland, Roumania, Bulgaria, Denmark, Belgium, and Holland, with beneficial effect to the small cultivators, so numerous in those countries; and in India, within the space of five years, 150 similar land banks have been established. Japan and China have also taken up the idea. France and Russia, too, have both witnessed several attempts to found the system, and not without some measure of success; but State interference has in each instance acted prejudicially upon a movement the central and essential feature of which is self-help.

People's Banks were first introduced to popular notice in the United Kingdom by Mr. H. W. Wolff in his book "People's Banks," which appeared in '93, and by the advocacy of Mr. R. A. Yerburgh, M.P., who became in '94 the founder of the "Agricultural Banks Association." During the same year the theory was first reduced to practice by the establishment of the first "Agricultural Credit Society" in England at Scawby in Lincolnshire, and the first town "Co-operative Bank" at Newport (Mon.). In '97 Mr. Yerburgh's Association became merged in the "Co-operative Banks Association," which in 1904 was amalgamated with the Agricultural Organisation Society (see pp. 10-11). In Ireland it has been found admirably adapted to the circumstances and needs of the country, and has developed in a more rapid ratio. The rural banks are registered under the Friendly Societies' Acts on the basis of mutual and unlimited liability (the principle of the majority of the German "People's Banks"); and the town banks under the Industrial and Provident Societies' Act (which is the system obtaining in Italy) on the limited liability principle.

The latest returns give the number of Agricultural Credit Societies in England and Wales as 7—viz., Scawby and Spalding in Lincolnshire, Castle Morton in Worcestershire, Wiggshall in Norfolk, Hedge End in Hampshire, Freeby in Leicestershire, and Far Forest, Rock, Worcestershire; and 9 town Co-operative Banks, at Bethnal Green, Stepney, Brondesbury, and King's Cross in the Metropolis, Newport (Mon.), Croydon, Hull, Yardley (a suburb of Birmingham), and Blackburn (Lancs.). In Ireland there are 226 Co-operative Credit Banks.

The propaganda for the formation of Agricultural Credit Societies is now carried on by a sub-committee of the Agricultural Organisation Society, presided over by Mr. R. A. Yerburgh, M.P., and the other members are Mr. V. V. Bramford, Mr. H. C. Fairfax-Cholmeley, Mr. W. Fitzherbert-Brockholes, Mr. V. A. Malcolmson, Mr. Henry Robson, Mr. John Ross, and Mr. R. N. Sutton-Nelthorpe.

## BANKRUPTCY.

This is mainly regulated in England and Wales by the Bankruptcy Act, '83, the Bankruptcy (Discharge and Closure) Act, '87, the Bankruptcy Act '90, and the rules made thereunder. In all its branches this system is subject to the control of the Board of Trade (*q.v.*). For the proper administration of the system there is the Bankruptcy Division of the High Court of Justice, which has jurisdiction in the City of London and its liberties, and also within the districts of the Metropolitan County Courts. Outside these boundaries the County Courts have bankruptcy jurisdiction. A great portion of this in both the High Court and County Courts is exercised by the Registrars, who hear petitions for adjudication in bankruptcy, hold public examinations of the debtors, approve of compositions, and grant discharges when these are unopposed. The Bankruptcy Department of the Board of Trade consists of Official Receivers, and a central staff under the Inspector-General, who audit trustees' accounts, and overlook the conduct and dealings of these persons, and the other local officials. There is an official receiver appointed to each district, but the same individual may be appointed to this position for two or more districts, or two or more of such receivers may be appointed to the one district. The official receiver is to investigate the conduct of the debtor, and to report to the Court respecting it, to take such part as the Board of Trade may order in his public examination, and to assist when required in his prosecution. It is also the duty of the official receiver to become interim receiver of the debtor's estate, pending the appointment of a trustee, and as manager when a special manager is not appointed, to summon and preside at the first meeting of creditors, to issue proxies, to report to the creditors on any offer by the debtor for a composition or scheme of arrangement, to advertise the proceedings, and to act as trustee during any vacancy in that appointment. In order to be made a bankrupt, it is essential that the debtor shall have committed one or more of the recognised acts of bankruptcy (see *ed.* '96). The act of bankruptcy on which the petition against the debtor is founded must have occurred within three months. An infant, though engaged in trade, cannot be made bankrupt, but a married woman can be, and in respect of her separate property if she carries on a trade distinct from her husband, or when he is a convict or in exile; as in such cases she is liable to be sued personally as a *femme sole*.

According to the report of the Inspector-General in Bankruptcy for the year ended Dec. 31st, 1903, the number of receiving orders made in England and Wales was 4286, involving liabilities of £5,320,967, and the assets realised £2,535,432. The number of deeds of arrangement was 3622, the liabilities thereunder being £4,354,315, and the assets £2,505,669. The failures showed an increase of 401 as compared with 1902, but a decrease of £377,515 in the amount of liabilities in bankruptcy and under deeds of arrangement.

Barclay, Sir Thomas, P.C., is the eldest son of the late George Barclay, LL.D., of Bonvil, Cupar, Fife, and was b. at Dunfermline in 1853, and ed. at Univ. Coll. London, and at London, Paris, Bonn, and Jena Universities. He was called to the Bar at Lincoln's Inn '81, and for some time assisted M. de Blowitz as

*Times* correspondent in Paris, but resigned the post in order to take up French law practice. He is a great authority on International Law, a member of the Institute of International Law, a vice-president of the International Law Association, and a member of the Supreme Council, of the Congo Free State. He has done much to promote the cause of International Arbitration in France, America, and this country. Knight of the Legion of Honour, and knighted by the King June 24th, 1904. 13, Old Square, Lincoln's Inn, W.C.; 17, Rue Pasquier, Paris.

**Baring-Gould, Rev. Sabine, M.A.**, Rector of Lew-Trenchard, North Devon, since '81, and formerly Vicar of Dalton, Yorks, and Rector of East Mercia, Essex. He is the eldest son of the late Mr. E. Baring-Gould, of Lew-Trenchard, and was b. at Exeter, Jan. 28th, '34, and ed. at Clare Coll. Camb. His literary activity has been and still is phenomenal. Fiction, theology, history, mythology, archæology, folk-lore, art, music: in all these provinces he has won great triumphs, though perhaps he is best known by his novels. "Mehalah," first published in '80, achieved for him widespread fame, and more recently he has published "Mrs. Curgenvin," and "Cheap Jack Zita," '93, "Noëmi," '95, "The Broom Squire," '96, "Guavas the Tinner" and "Bladys," in '97. A charming "Garland of Country Song" appeared in '94, "Old English Fairy Tales" in '95, a life of "Napoleon" in '96, "A Study of St. Paul" in '97, "Domitia" in '98, "Pabo the Priest," "Furze-bloom," and "A Book of the West" in '99, "Winefred" and "A Book of Dartmoor" in 1900, "Royal Georgie" and "A Book of Brittany" in 1901, "Brittany" and "Miss Quillet" in 1902, "A Book of N. Wales" and "In Dewisland" in 1903, "Siegfried" and "A Book of Ghosts" in 1904. He is a J.P. for Devon.

**Barrie, J. M.**, also known as "Gavin Ogilvy," was b. at Kirriemuir, Forfarshire, in 1860. He was ed. at Dumfries Academy, and graduated M.A. at Edin. Univ. in '82. After holding a journalistic position in Nottingham he came to London. The introduction to the public of Mr. Barrie's peculiar genius for depicting Scotch village life was accomplished through the columns of the *British Weekly*, and he contributed also to the *St. James's Gazette*, the *Speaker*, and the *National Observer*. His first volume, "Better Dead," appeared in '87; "Auld Licht Idylls" and "When a Man's Single" were published in '88; "A Window in Thrums" and "An Edinburgh Eleven" in '89. In '90 Mr. Barrie issued "My Lady Nicotine," during '91 his first lengthy story, entitled "The Little Minister," was published, and a new story entitled "Sentimental Tommy," and "Margaret Ogilvy, a Memoir," in '96. In 1900 "Tommy and Grizel," a sequel to "Sentimental Tommy," appeared, and in 1902 "The Little White Bird." Mr. Barrie's work for the stage includes an amusing comedy entitled "Walker, London," which had a tremendous run at Toole's Theatre in '92; "Jane Annie," written with Mr. Conan Doyle, and brought out at the Savoy in '93; "The Professor's Love Story," first played in America, and afterwards brought to England by Mr. Willard; "The Little Minister," produced Nov. 6th, '97, at the Haymarket; "The Wedding Guest," at the Garrick (Sept. 27th, 1900); "Quality Street," at the Vaudeville, in Sept. 1902, "The Admirable Crichton" and

"Little Mary" in 1903. Mr. Barrie was, in '94, married to Miss Mary Ansell, who played charmingly in "Walker, London," when it was first produced. Address: Kirriemuir, N.B.

**Barton, The Right Hon. Sir Edmund**, G.C.M.G., K.C., was b. at Glebe, Sydney, N.S.W., Jan. 18th, 1849, and ed. at the Sydney Grammar School and University. He was called as a barrister in '71, and soon made himself a place in the public life of the colony. He was elected to represent his University in the Legislative Assembly '79, and became Speaker '83-7, afterwards entering the Legislative Council '87-9. In '89, and again in '91, he was Attorney-General, and in the latter year he was chosen as a member of the Federal Convention which met at Sydney. Thenceforward his connection with the cause of Australian Federation was close and constant. He was chosen as the senior representative of the colony at the '97 Federal Convention, and took the leading part in its proceedings in that year, and until the Federal Constitution Bill was adopted. For a time he led the Opposition in the New South Wales Parliament, but resigned that post in order to give himself more unreservedly to the promotion of the cause of Federation. He came to England in 1900 as the Federal delegate for N.S.W. in support of the Constitution Bill, and distinguished himself by his able advocacy of the measure as it stood. He was Premier of the first Commonwealth Ministry from Jan. 1901 till April 1903, when he became a Judge of the High Court. He was made a Privy Councillor on Jan. 1st, 1901, and on his visit to England for the Coronation and the Colonial Conference in 1902 was appointed G.C.M.G.

**Battenberg, Rear-Admiral H.S.H. Prince Louis Alexander of**, G.C.B., G.C.V.O., is the eldest son of Prince Alexander of Hesse, was b. May 24th, 1854, and m. in '84 the Princess Victoria, daughter of the Grand Duke of Hesse and Princess Alice. He is a naturalised British subject. Entered the Navy '68, rose to the rank of captain '91, served in the Egyptian War '82, is an Elder Brother of Trinity House, A.D.C. to the King, was Director of Naval Intelligence 1902-4, and in Dec. 1904 was appointed to the command of the Second Cruiser Squadron.

**Beaumont, Vice-Admiral Sir Lewis Anthony**, K.C.B., K.C.M.G., was b. May 19th, 1847, and entered the Navy '60. He served in the Arctic Expedition '75-6, was Private Secretary to Lord Northbrook '83-5, Director of Naval Intelligence '94-9, and A.D.C. to Queen Victoria '95-7. He attained the rank of Rear-Admiral in '97, and commanded the Pacific fleet '99-1900 and the Australian fleet 1901-3. He is a Grand Officer of the Legion of Honour. In 1904 he was appointed to act as the Naval Representative of Great Britain on the International Commission of Inquiry into the North Sea Incident, and to succeed Admiral Sir E. Seymour as Commander-in-Chief at Devonport.

**Bebel, Ferdinand August**, chief of the German Socialists, was b. at Cologne, Feb. 22nd, 1840. He has risen from the working classes, and was first heard of as a master-turner at Leipzig, '64. In that year he was president of the Educational Union of Workmen, and member of the permanent Committee of German Workmen's Unions. A friend and confidant of Karl Marx and Friedr. Engels, he was

elected in '67 a member of the short-lived North German Parliament, and in '71 into the new German Reichstag. He was, at that period, not friendly to Prussian predominance, and was a member of the then famous "International." Accused in '72, together with his friend Liebknecht, of an "attempt at high treason," he was condemned to two years' imprisonment, and moreover to nine months for insult to the German Emperor. But he was re-elected to Parliament, where he has always maintained his position. His works include "Unsere Ziele," 10 eds., "Der Deutsche Bauernkrieg" ('76), "Christentum und Sozialismus," "Die Frau," 18 eds. ('93), "Die Mohamedanisch-Arabische Kulturperiode" ('89), "Sonntagsarbeit," "Charles Fourier," "Die Lage der Arbeiter in den Bäckereien," etc. Since Liebknecht's death he may be considered as the head of German Socialists. At the Congresses of Lübeck and Dresden in 1902 and 1903 he successfully opposed the tendency represented by Bernstein towards practical co-operation, on given points, with the old Liberal parties.

**Bedford, Admiral Sir Frederick George D., G.C.B.,** Governor of Western Australia, is a son of Vice-Admiral E. J. Bedford, was b. 1838, entered the Navy '52, saw service in the Crimean War in the Black Sea and Baltic, organised the Nile flotilla for the relief of Gordon in '84, took part in punitive expeditions in Gambia and the Benue river '94, and on the Niger '95, and has commanded at the Cape, West Africa, and North America and West Indies stations. He has also served at the Admiralty as Second Sea Lord, and is the author of the Sailors' Pocket and Hand Books. He was appointed Governor of West Australia in Jan. 1903.

### BELGIUM.

A kingdom under Leopold II. of Saxe-Coburg, and by the constitution of '31, following on the secession from the Netherlands in '30, declared to be a constitutional, representative, and hereditary monarchy. Belgium is a neutral power, her neutrality being guaranteed under the Treaty of London, 1831, by Great Britain, Austria, Prussia, and Russia. The executive power is vested in the King and his Ministers, the legislative power jointly in King, Senate, and Chamber of Deputies. The principle of manhood suffrage with compulsory voting prevails tempered by the plural vote and proportional representation of minorities, based upon a somewhat intricate system. All citizens over 25, who have lived at least a year in the same commune, have a vote. An additional vote is accorded them if they are (1) either 35 years of age, married, with legitimate offspring, and pay a tax of at least 5 fr. to the State; or (2) are 25 years old and own immovable property to the value of at least 2000 fr., or have a corresponding income from such property, or for two years have received at least 100 fr. a year from Belgian funds. Two additional votes are given to citizens of 25 years of age who possess a diploma of higher education or have filled a public or private position implying the possession of such education. No citizen can have more than three votes. From this electorate both Houses of the Legislature are chosen, save for those senators who are elected indirectly. The Senate is elected for eight years. The number of members elected directly, 83, is equal to half the number of

deputies. The indirectly elected senators are chosen by the provincial councils, 2 for each province with less than 500,000 inhabitants; 3 for each with more than 500,000 and less than 1,000,000; and 4 for each with over 1,000,000. The Deputies are elected for four years, in the proportion of 1 to every 40,000 inhabitants, and number 166. One-half retire every two years. Senators must be 40, and deputies 25 years of age. Each deputy receives 4000 fr. yearly, and travels free.

The army was recently reorganised according to a scheme prepared by a mixed commission. The main feature was the adoption of volunteer enlistment, with the purpose of bringing about a progressive decrease in the annual levy by subscription. Special advantages were offered, but the result has been very disappointing. After a full trial the scheme has proved a complete failure. On Nov. 17th, 1904, the King addressed a letter to the War Minister, affirming his belief that personal service is essential, and questioning whether the reduction of the period of service was expedient.

The establishment on Oct. 1st, 1903, when the recruits were embodied, was 42,000 men, but it has never been possible to attain anything like the number, and regiments are in some places so weak that training is impossible. The nominal liability is 8 years with the colours and 5 in the reserve, and the recruit contingent is 13,300, the volunteers being in addition.

The composition is as follows: **Cavalry**—2 regiments of Chasseurs, 2 of Guides, and 4 of Lancers. Each regiment consists of 4 squadrons Active and 1 Reserve. To the above have to be added the Gendarmerie (over 1700 men). **Artillery**—4 field and 4 fortress regiments (in all 204 guns). **Engineers**—1 regiment of 3 battalions, a reserve battalion, and 5 special technical companies. **Infantry**—14 regiments of the line, of 4 battalions of 4 companies each, 3 Active and 1 Reserve battalion; 1 regiment of Grenadiers, similarly organised; 1 regiment of Carabiniers of 6 battalions (4 active and 2 reserve), and 3 regiments of *chasseurs-à-pied*.

The Civic or National Guard is under the Minister of the Interior in peace time, and numbers approximately 45,000 men reckoned as "active," and 100,000 "non-active." The effect of the new law cannot yet be estimated fully.

Local government is carried on by 9 provincial and 2618 communal councils. The country is divided by a difference of language, the Flemish inhabitants in the north using the Flemish tongue in all its varieties of local *patois*, while the Walloons of the southern provinces speak French. There are 2,822,005 who speak Flemish only, 2,574,805 who speak French only, and 801,587 who speak French and Flemish. The north, too, is chiefly agricultural, and the south industrial. Almost the entire population is of the Roman Catholic faith, but full religious liberty prevails, and grants are made from the national treasury to all denominations. There are 6897 primary, 2400 infant, and 3038 adult schools, attended by 809,525, 229,995, and 145,111 pupils respectively, and the higher branches of education are well provided for. The success of the manufacturing industries of the country is attributed, to a certain extent, to the high standard of technical education prevailing. Agriculture, mining, iron, sugar, and textile manufacturing are the chief occupations; and

textiles, sugar, machinery, and agricultural products are the chief exports. Raw materials are admitted free of duty, but there are small duties on manufactured goods imported. An Agricultural Commission exists in each province, and a special Council advises the Government as to the best means of promoting the various national industries. There are 2850 miles of railway in operation, of which 2516 are owned and worked by the State. The total length of the canals and navigable waterways of the country is 1360 miles, 85 per cent. of which are under the direct control of the State, and the cheap transport thus rendered possible gives to all industries an incalculable advantage. The population of the chief towns (with their suburbs) was given in a Foreign Office Report published in 1904 thus: Brussels, 377,231; Antwerp, 516,472; Liège, 485,235; Charleroi, 288,056; Verviers, 79,293.

The chief newspapers are the *Indépendance Belge*, the *Etoile Belge*, and the *Petit Bleu*. There are also three dailies: *Le Soir*, *La Reforme*, *Le National Bruxellois*, which only cost 2 centimes (less than one-fifth of a penny).

An International Exhibition of Arts and Manufactures will be held at Liège May—Oct. 1905, under the auspices of the Government.

Area, 11,373 sq. m.; pop., 1903, 6,896,079. Revenue, 1901, £20,031,620; expenditure, £19,901,412; estimated revenue, 1903, £19,561,602; 1904, £21,174,900; estimated expenditure, 1903, £19,654,741; 1904, £21,164,095; imports, 1902, £95,230,000; 1903, £106,256,000; exports, 1902, £75,255,440; 1903, £81,072,000; debt, 1903, £115,175,766 (consolidated), £85,560 (floating). For Workmen's Compensation Act see LABOUR MOVEMENT.

**Ministry.** *Premier and Minister of Finance and Public Works*, Comte de Smet de Naeyer.—*Foreign Affairs*, Baron de Favereau.—*Interior and Public Instruction*, M. de Trooz.—*Justice*, M. Van den Heuvel.—*Agriculture and Industry*, Baron Van der Bruggen.—*War*, Gen. Consebant d'Alkemade.—*Industry and Labour*, M. Francotte.—*Railways, Ports, and Telegraphs*, M. Liebaert.

**Minister in London**, Count de Lalaing, 15, West Halkin Street, Belgrave Square, S.W.

**Consul-General in London**, M. F. H. Lenders, 118, Bishopsgate Street Within, E.C.

**British Minister at Brussels**, Sir Constantine Phipps, K.C.M.G., C.B.—*Secretary of Legation*, Sir Brooke Boothby.

**British Consul-General at Antwerp**, Mr. E. C. Hertslet. **Vice-Consuls**, W. Lydcotte and R. H. Cox, at Antwerp; T. E. Jeffes, at Brussels; O. FitzMaurice, at Charleroi and Mons; J. P. Bagge, at Ghent; E. A. O. Leeds, at Liège; N. G. E. Hervey, at Ostend and Bruges; H. Hayemal, at Spa.

### Sovereign.

**King Leopold II.** was b. at Brussels, April 9th, 1835, and is the son of King Leopold I., whom he succeeded, Dec. 10th, '65. He has travelled much in Europe, Asia Minor, and Egypt. He was practically the founder, and is now the ruling sovereign, of the Congo Free State (*q.v.*). He married, in '53, the Archduchess Maria of Austria, who died Sept. 19th, 1902, and by whom he has three daughters. The eldest, Princess Louise, married in '75 Prince Philip of Saxe-Coburg-Gotha. The second, Princess Stephanie, widow of the late Crown

Prince Rudolf of Austria, married Count Lonyay in '99. The third is Princess Clementine. The heir presumptive is Prince Albert, second son of the Count of Flanders, brother of the King. He was recognised as heir on the death of his elder brother, Prince Baldwin, his father having renounced his rights. He was born April 8th, '75, married (Oct. 2nd, 1900) the Duchess Elisabeth of Bavaria, and has two sons, Prince Leopold, b. Nov. 3rd, 1901, and Prince Charles Theodore.

### Political Parties.

Before '93 there were practically only two parties—the Clerics or Catholics, and the Anti-Catholics or Liberals. Gradually, however, after the amendment of the Constitution in '93, the Liberal party disappeared, so far as representation in the Chamber was concerned, and a strong and well-organised party of Socialists sprang up. As a general rule, the Socialists are stronger in the Walloon provinces, and the Catholics in the Flemish provinces. After the election of one-half of the Deputies (July 5th, '96) the distribution of parties in the Chamber was—111 Catholics, 12 Liberals, and 29 Socialists. After the May '98 elections the Chamber included 112 Catholics, 28 Socialists, 6 Liberals, and 6 Radicals. The principle of proportional representation was applied for the first time at the general election on May 27th, 1900, which resulted in the return of 85 Catholics, 33 Liberals and Radicals, 33 Socialists and 1 Christian Democrat. The Liberals, Radicals and Socialists combined on the question of electoral reform during 1901, and determined, to quote a declaration made by the Radical leader, M. Féron (July 11th) "to throw full light upon the fraud which enables the Clerical party to crush the *bourgeoisie* in towns and industrial centres, and place in an unfair minority the bulk of the working classes." The agreement between the Liberals of the Ligue Libérale and the Radicals of the Association Libérale was strengthened in 1902 in view of the May election on the basis of universal suffrage with proportional representation, this implying the abolition of plural voting. The election took place on May 25th in respect of half the Chamber—viz. 76 members plus the 14 new members added in 1902, making 90 in all. As a result of the election, the new Chamber consisted of 95 Catholics, 35 Liberals, 34 Socialists, and 2 Christian Democrats. The Catholic majority was therefore 24. In Feb. 1904 the various sections of the Liberal party drew closer together on the basis of a common programme, which included such reforms as the abolition of plural voting, the suppression of mortmain in respect of religious bodies, and army reorganisation.

### History, 1904.

After a debate extending over several weeks, the Liberal and Socialist demand for compulsory instruction and the abolition of subsidised schools was defeated, and the Budget of Public Instruction was voted by a large majority (Feb. 5th). Before the Probate Division of the Law Courts a lawsuit against the King was commenced (Feb. 20th) by the creditors of the King's daughter, Princess Louise of Coburg, who claimed that the Belgian law, setting up a joint partnership of property, applied to the estates of the King and the late Queen, whereas the King took the view that the diplomatic

settlement under which the marriage was arranged, setting up the principle of separate estates, governed the matter. In the result the decision pronounced by the Courts was in the King's favour (April 20th). The Radical leader, M. Féron, moved the abolition of plural voting in favour of **universal suffrage**, and was supported by his followers and the Socialists, but the motion was rejected by a majority of 15 (May 5th). The election of one-half of the members of the Chamber and the Senate took place (29th), and the Opposition gained 5 seats in the Chamber and 2 in the Senate. **Commercial treaties** with Holland and Germany were signed (June 23rd), and an **Arbitration Treaty** with Russia was concluded (Nov. 3rd).

**Benckendorff, The Count de**, who succeeded M. de Staal as **Russian Ambassador in London** in Nov. 1902, was born at Berlin in 1849. He entered the Russian Foreign Office in '68, was appointed Hon. Attaché to the Embassy at Rome in '71, and retired from the Diplomatic Service in '77. He was appointed First Secretary to the Embassy in Vienna '86, and afterwards Councillor there, Minister to Denmark '97, and Ambassador in London 1902. See **RUSSIA and RUSSO-JAPANESE WAR**. Address: Chesham House, Chesham Place, S.W.

**Beresford, Lord Charles**, son of the Rev. John, 4th Marquis of Waterford; b. '46; E. Bayford School, and Stubbington, Hants; entered as a cadet on the *Britannia* '59; obtained the rank of Commander '75, Captain '82, Rear-Admiral '97, and Vice-Admiral 1902; a Lord of the Admiralty '86-8 (resigned on question of strength of fleet), and A.D.C. to Queen Victoria in the Jubilee celebrations of '97; accompanied King Edward VII. as naval A.D.C. on his visit to India '75-6; commanded the royal yacht *Osborne*, and was in '82 in command of the gunboat *Condor* at the bombardment of Alexandria, afterwards landing and acting as chief of the police force organised by the British when in occupation; subsequently served with the Nile expedition which crossed a part of the Soudan in the ineffectual attempt to relieve Gordon, and commanded the *Safia*, whose action under repaired boiler saved the whole column. He went to China in '98 as a representative of the Associated Chambers of Commerce, and upon his return published "The Break-up of China." The noble Lord was M.P. for Waterford '74-80, East Marylebone '85-90, and York '98-1900, resigning the seat to go on active service. On retiring in 1902 he resumed parliamentary life, being elected for Woolwich in succession to Col. Hughes. He made several speeches in Parliament on naval matters during the same session, but in 1903 resigned his seat on his appointment as Admiral of the Channel Fleet. He is to succeed Admiral Sir Compton Domville as Commander-in-Chief in the Mediterranean in 1905. Park Gate House, Ham Common, and 14, Wilton Crescent, S.W.

**Bernhardt [Bernard], Rosine Sarah**, French tragic actress, was b. at Paris, Oct. 22nd, 1846, of Jewish parents, but, by the will of her father, baptised, educated in a convent at Versailles, received ('58) at the Paris Conservatoire, appeared at the Théâtre Français in '62 as "Iphigénie," but without success; entered the Gymnase Theatre, and seemed to pass away into obscurity. But in '66 she reappeared at the Porte St. Martin, and in the following year

she achieved, at the Odéon, in the rôle of the Queen, in Victor Hugo's *Ruy Blas*, her first striking success. The war of '70-71 interrupted her career, and she became, for a while, a nurse. She then won a position in the Théâtre Français, the troupe of which she accompanied in '79 to London, where her triumphs have been repeated in succeeding years, and where she married a M. d'Amala. She was left a widow in '89. She broke her contract with the Français in '80, and has since been touring, with great *éclat*, in America, and in all the principal countries of Europe, excepting Germany. She now directs a theatre of her own in Paris. She is also a painter and sculptor.

**Bernstein, Eduard**, German author and politician, was b. Jan. 6th, 1850, at Berlin, and studied at the Werder public school Gymnasium. He became a bank clerk, but took to literature and Socialism, and was a pupil of Marx and Engels. To avoid prosecution he left Germany in '78, and lived in England from '88 to 1901. He became a member of the German Parliament in 1902, where he plays an important rôle as a moderate Socialist. He strongly opposed the new Protective Tariff, and has met with some opposition from the older Socialist leaders because of his desire to promote a working agreement with the Liberals, instead of holding aloof from all parties (see GERMANY). He was editor of or contributor to various Socialist periodicals, and founded the existing monthly "Documente des Socialismus," which he still directs.

**Berteaux, M. Henry Maurice**, appointed French Minister of War in succession to General André in Nov. 1904, was b. June 3rd, '52, at St. Maur-les-Fossés, in the department of the Seine. He was elected to the Chamber in '93 as Republican Deputy for Versailles (Seine et Oise), having previously been Mayor of Châton, and achieved a great professional success on the Paris Stock Exchange. He was a friend of M. Bourgeois, and his own abilities soon made him a conspicuous member of the Chamber. He was in time made Vice-President of the Army Committee, and eventually Reporter of the War Estimates, and the esteem in which his party held him was shown by his choice to continue General André's work of restoring the spirit of loyalty to the Republican régime to the Army.

**Bertie, The Right Hon. Sir Francis Leveson, G.C.V.O., G.C.M.G., K.C.B.**, British Ambassador to France, is a son of the 6th Earl of Abingdon, and brother of the present Earl. He was b. 1844; ed. at Eton, and entered the Foreign Office in 1863. He was private secretary to Mr. R. Bourke when Under-Secretary of State for Foreign Affairs, '74 to '80, and was Second Secretary to Lords Beaconsfield and Salisbury at the Berlin Congress in '78. In '92 he was appointed Assistant Under-Secretary of State for Foreign Affairs, and in 1903 Ambassador to Italy. In August 1904 he was appointed to succeed Sir Edmund Monson at Paris at the end of the year. He married in '74 Lady Feodorowna Cecilia, daughter of the 1st Earl Cowley.

**Betting**. See Report of Select Committee on Betting under SESSION, sect. 123, ed. 1903; and Betting Bill under SESSION, sect. 55, ed. 1904.

**Bible Society, The British and Foreign**, was established in 1804, its object being the translation and circulation of the Scriptures. Up to 1904 186,680,101 Bibles and portions of

the Bible, in 370 languages and dialects, had been issued under its auspices. The expenditure of the Society in 1903-4 was over £250,000. Work abroad is carried on not only through the missionary societies, and Biblewomen supplied to them, but by some thirty agents in foreign countries, under whom a staff of 900 colporteurs is engaged in distributing the Scriptures. A Centenary Fund of 250,000 guineas is being raised to extend its work in all departments. Sunday, March 6th, 1904, was observed as Bible Sunday by Protestant Churches in all parts of the world. Bible House, 146, Queen Victoria Street, London, E.C. Secretaries, Rev. A. Taylor, M.A., and Rev. J. H. Ritson, M.A.

**Bimetallicism** is the term currently used to denote a Joint Monetary Standard of Value. Mr. Balfour, who is a convinced bimetallicist, has defined the contention of the bimetallicists as being "that if they could by international arrangement fix some ratio of exchange between gold and silver coin they would create an automatic system by which the demand and supply for gold and silver respectively would maintain that ratio at the point they fixed it." Bimetallicists advocate an agreement on a broad international basis to reopen the mints of the leading nations of the world to the unrestricted coinage of both gold and silver. They contend that not only is a stable par of exchange between all gold and silver moneys required in the interests of industry and trade, but that the growth of the world's trade and population requires that even the large and prospective output of gold should be supplemented by a greater monetary use of silver. Its supporters claim that bimetallicism is essentially a Free Trade movement, and repudiate the suggestion that it has anything to do with Protection. (A detailed discussion of the question appeared in the '87 edition.) A Royal Commission on currency appointed in '86 issued its report Nov. '88 (see ed. '89). An International Monetary Congress held at Paris in Sept. '89 discussed the subject academically, and an International Monetary Conference which was convened by the United States, "to consider by what means, if any, the use of silver can be increased in the currency system of the nations," and which met at Brussels in Nov. '92, separated without coming to any conclusion. On March 17th, '96, the House of Commons passed a resolution urging upon the Government the advisability of doing all in their power to secure by international agreement a stable monetary par of exchange between gold and silver. A Bimetallic Congress was held at Brussels in April '96, representatives from Great Britain, France, the United States, Germany, Austria-Hungary, Belgium, Denmark, Holland, Roumania, and Russia being present. An American Commission appointed by the United States Government to study, in co-operation with a Commission appointed by the Mexican Government, and with the European Governments, the means of establishing a stable ratio between gold and silver, visited Europe in 1903, and conferred privately with the British, French, German, and other Governments. The object was understood to be to endeavour to give stability to the silver currency of the different countries using such a currency by establishing a fixed relation between its value and a gold standard, as has been done in India. The Bimetallic League is a society which specially

devotes itself to the propagation of bimetallic principles. The President is Lord Aldenham, the General Secretary Mr. Henry McNiel, and the Offices are at 18, Exchange Street, Manchester.

**Biographies.** See Index at front of book for names of people of whom biographies are given separately. Biographies of all ruling sovereigns, etc., will be found in the articles on their countries. Under PARLIAMENT biographical notices of all Peers and M.P.s are given, and under PRIVY COUNCIL of Privy Councillors.

**Birds, Protection of.** The Wild Birds Protection Acts, 1880 to 1904, prohibit the shooting or snaring of all wild birds during close time, and grant special and fuller protection in the case of certain wild birds named in a schedule; prohibit the offering for sale after March 15th of any wild bird recently killed or taken; enable orders to be made, on the application of a county council, prohibiting the taking or destroying of the eggs of certain wild birds, and of the eggs of any wild bird in certain breeding areas, also prohibiting the taking or killing of any wild bird beyond the breeding period or close time, etc. Close time is fixed between March 1st and August 1st in each year, but the period may be extended or varied by any county council, and orders can be made on the application of a council giving protection to named birds during the remainder of the year. The close time for game birds is: partridges, Feb. 1st—Sept. 1st; pheasants, Feb. 1st—Oct. 1st; bustard, March 1st—Sept. 1st; grouse, Dec. 10th—Aug. 12th; blackgame, Dec. 10th—Aug. 20th; and no game can be taken on a Sunday or Christmas Day. Information as to the birds named in the schedule, and the duration of close time can be obtained of the clerks of county councils. The Society for the Protection of Birds discourages the wanton destruction of birds, interests itself in their protection, and requires of its members that they shall not wear the feathers of any bird not killed for the purpose of food, the ostrich only excepted. On the question of killing game birds the society is strictly neutral. It has over 5000 associates. Hon. Sec., F. E. Lemon; Sec., Miss L. Gardiner. Offices, 3, Hanover Square, W.

**Birkbeck College,** Bream's Buildings, Chancery Lane, E.C., was founded by the late Dr. Birkbeck, Dec. 2nd, 1823, as a mechanics' literary and scientific institute. The foundation stone of the present building was laid by the Duke of Albany in '83, and the building was subsequently opened formally by the Prince of Wales. The Institution was incorporated during '91 as part of the City Polytechnic, under a scheme formulated by the Charity Commissioners, and in this way its building debt was removed and a substantial endowment secured. It is under the administration of a Council. Day and evening classes, open to both sexes, are held in English and commercial subjects, Modern Languages, Classics, Law, and Science. There are splendidly equipped Physical, Chemical, and Metallurgical Laboratories. Principal, G. Armitage-Smith, M.A. Secretary and Clerk to the Governing Body, W. H. Congreve.

## BIRTHS AND DEATHS.

### Registration.

The duty of registering the birth of all children who are born alive is by law imposed upon the parents, who must, within 42 days

after the birth, give information to the Registrar, and sign the register in his presence. Failing the parents, the law requires the occupier of the house where the birth took place, or some person present at the birth, or the person having charge of the child, to register the birth. The registration is free of charge, unless the registrar is requested to attend at the house where the birth took place, when the fee is 1s. A small fee is charged for a certified copy of the entry in the register. There are provisions by which, in case of failure of registration within 42 days, the registrar may require any of the above-named persons to register; but after twelve months the birth cannot be registered except with the written authority of the Registrar-General. Still-born children are not registered. Children born at sea, on board a British vessel, must be registered by the commanding officer sending the necessary particulars to the Registrar-General. The father of an illegitimate child can only have his name entered on the register at the joint request of himself and of the mother.

The duty of registering a death similarly rests upon the nearest relatives present at the death or during the last illness, or living in the same district; failing them, upon those present at the death, or the occupier of the house, or the person ordering the burial. Registration should be made within five days of the death, either personally or in writing; but in the latter case the written notice must be accompanied by a medical certificate of the cause of death, and the register must still be signed within fourteen days. The registration is free of charge, unless the registrar attend at the house where the death took place, when the fee is 1s. After fourteen days and within twelve months the registrar may, failing the receipt of the information as to the death, require any person who should have effected the registration to attend and give the information required. But after twelve months no death can be registered except with the written authority of the Registrar-General. A certificate of death in the ordinary course is given without fee, and this certificate must be delivered to the person who buries or performs any funeral service for the burial of the deceased.

As to Registration of Marriages, see article on MARRIAGE.

#### Statistics, 1894—1903.

	Births.		Deaths.	
	No. Registered.	Rate per 1000.	No. Registered.	Rate per 1000

For statistics as to Marriages, see article on MARRIAGE.

**Björnson, Bjørnstjerne**, the Norwegian poet, dramatist, and novelist, was b. Dec. 8th, 1832, at Kvikne, in the heart of Norway, where his father was the clergyman. In '52 he entered the University of Christiania, but before his course of studies was completed he began to earn a scanty living as a journalist in '54. He was director of the National Theatre in Bergen '57-59, and then returned to Christiania, where he became co-editor of one of the leading papers. In '60 he went abroad, visiting Denmark, Italy, Germany, and France. In '63 he returned to Norway, and in '65 was appointed artistic director of the Christiania Theatre. During the two years he remained there he became editor of the illustrated *Norsk Folkeblad*, which he conducted for six years. In '72 he again went abroad, this time to Germany and Italy. Shortly before his return to Norway in '75 he bought the farm Aulestad, in the Gausdal Valley, where he has written many of his books. During the winter '80-81 he went on a lecturing tour to America. Since '82 he has lived abroad for many years, but of late has generally spent his summers on his farm in Norway. Björnson has taken an active part in the political life of his country, both as a speaker and a writer. Nearly all his stories and plays are translated into English and most European languages, but "Beyond Human Power" (Part I.) is the only play that has been performed on the English stage. It was produced by Mrs. P. Campbell in 1901 at the Royalty Theatre. His 70th birthday was celebrated on Dec. 8th 1902, by congratulations from far and near, a deputation from the Storting waiting on him, and the people of Denmark presenting an address containing 30,000 signatures.

**Blind, Karl**, b. at Mannheim, Sept. 4th, 1826, came forward, even during his studies at the University of Heidelberg, as an active agitator in the movements which led to the revolution of '48. Having participated in the rising led by Hecker, and been wounded, he fled to Strasburg; but returned and fought in the rising commanded by Struve in the autumn of that year, in the Black Forest. A prisoner and condemned to eight years' imprisonment after judicial proceedings which caused much emotion, he was forcibly set at liberty in '49 when the people and soldiers of Baden effected the downfall of the government of the Grand Duke. Sent by the newly constituted popular government with a diplomatic mission to Paris, he was arrested as a supposed participator in Ledru-Rollin's rising, June 13th, '49, in the interest of the then Roman Republic. Expelled from France, he lived first at Brussels, then chose London as his permanent residence. Here, or from here, he was in frequent active communication with Mazzini, Garibaldi, and Louis Blanc. His comments upon current political events were frequent, and many of them have appeared in English publications. Folklore and historical studies have also occupied him much.

**Blind Pensions.** The Royal Blind Pension Society grants pensions to indigent blind of good moral character, without regard to sect or creed. Assistance and inquiries should be addressed to the Secretary, W. Elliott Terry, Office, 237, Southwark Bridge Road, S.E.

**Blind, School for the,** Leatherhead. The largest training institution for the Blind in the world. The object of the Institution is "to

render the blind self-reliant by teaching them a trade." The **Principal** is the Rev. St. Clare Hill, M.A. West End depot, 491, Oxford Street, W.; factory, 246, 248, 250, Waterloo Road, S.E.; London Office, 1, St. George's Circus, S.E.; Chief Office, Highlands Road, Leatherhead.

## BOLIVIA.

Bolivia is bounded on the north by Peru and Brazil; on the east by Brazil and Paraguay; on the south by the Argentine Republic and Chili; on the west by Chili and the Pacific Ocean. Bolivia has no sea-coast, having lost her own to Chili during the war of 1875-80, which was terminated by a compact of peace, '80, under which Bolivia alleges that Chili is bound to procure her an outlet to the sea. In June 1903 a treaty was signed under which it is understood that Chili will grant a seaport on payment of an indemnity by Bolivia. The boundary between Bolivia and Brazil has recently been in dispute, but in March 1903 a *modus vivendi* was arranged, and a treaty transferring the territories of Upper Acre, Upper Purus and Upper Jurua to Brazil as far as the 11° S. long. in exchange for the concession to Bolivia of territory on the frontier of Matto Grosso and the River Madeira, plus £2,000,000 and various commercial facilities, was signed Nov. 21st, 1903.

A treaty with Chile was signed on Oct. 17th, 1904, establishing the definite sovereignty of the latter country over the province of Antofagasta, Chile, undertaking the payment of the '79 war claims. An arrangement as to railway construction, and the concession of the most-favoured-nation treatment to Chile, were included in the treaty, together with a clause appointing Germany as arbitrator in any difficulties arising between the two countries.

The executive power is in the hands of a President, elected for four years, with a Congress of two Chambers, a Senate of 16 members, elected for six years, and a Chamber of 69 Deputies, elected for four years by universal suffrage, as is also the President. Prefects administer the 9 Departments into which the country is divided, and subordinate officers the 57 provinces and 595 cantons making up the Departments. The inhabitants are chiefly Indians. The Roman Catholic is the State religion, but liberty prevails. Education is free and obligatory, though the law is not strictly enforced. The standing army is fixed at 2500, but reserves and a territorial guard bring up the possible fighting strength to over 82,000. It is a very rich country, abounding in minerals, especially copper, tin, and silver. It produces potatoes, barley, grapes, coffee, cacao, etc.; and exports wool, rubber, coffee, and minerals. But industry is wanting in the country, which offers a wide field to European labourers.

The capital of Bolivia is **La Paz**, pop. 62,500; and other chief towns are Sucre, pop. 27,500, Cochabamba, pop. 30,000, and Oruro, pop. 16,000.

**Area**, 567,360 sq. m.; **pop.** about 2,500,000. **Revenue**, 1904, £855,510: 1905 (estimated), £651,256; **expenditure**, 1904, £855,510: 1905 (estimated), £642,861; **Imports**, 1903, £1,362,024; **exports**, £2,159,121. **Internal debt**, £300,000.

**President**, Colonel Ismael Montes. — **Vice-President**, Dr. Eliodoro Villazon.

**Ministry: Foreign Affairs**, Dr. Claudio Pinilla. — **Interior**, Dr. Anibal Capriles. — **Finance**, Don Daniel del Castillo. — **Justice and**

**Public Instruction**, Dr. Juan Saracho. — **War**, General Clodomiro Montes.

**Chargé d'Affaires and Consul-General**, Colonel Don Pedro Suárez, 12, Fenchurch Street, E.C. — **Legation**: 74, Compayne Gardens, N.W. — **Consulate**: 12, Fenchurch Street, E.C. — **Military Attaché**, Colonel Don Pedro Suárez.

**British Minister and Consul-General**, W. N. Beauclerk, Esq. (resides at Lima).

**Consul at La Paz**, G. Harrison.

**Vice-Consuls**: At **Oruro**, Dr. J. R. Smith; at **Sucre**, E. F. Moore.

**Booth, Charles**, F.R.S., P.C., was b. at Liverpool on March 30th, 1800, and ed. at the Royal Institute School there. He has been a partner in the firm of Alfred Booth & Co., Liverpool, since 1862, but the study of social problems has been his life-work. He has published "Life and Labour of the People in London," "Pauperism," "Condition of the Aged Poor," and "Old Age Pensions." He is an ex-President of the Royal Statistical Society. On June 24th, 1904, he was made a Privy Councillor. D.C.L. Oxon. 1904. 24, Great Cumberland Place, W.

**Booth, Rev. William**, better known as General Booth, the founder of the Salvation Army, was b. at Nottingham, 1829. Entered the Methodist New Connexion Ministry '50. He resigned, however, in '61, preferring to work as an evangelist amongst those who never attended a place of worship at all. In '65 he established in the East End of London the Christian Mission, out of which grew the world-wide organisation known as the Salvation Army, which has invaded almost every town of England and Wales, and sent missionary contingents into various foreign countries, including France, Switzerland, Holland, Belgium, Scandinavia, Finland, Italy, India, Australasia, U.S.A., Canada, S. America, W. Indies, Java, and Japan. His eldest son is the Chief of the Staff, and other members of his family have also co-operated with him in his missionary enterprise. There are in all over 16,000 officers employed in the work. He has of late years given much time to the development of the scheme of social amelioration initiated in Nov. '90 on the lines of his famous book "In Darkest England and the Way out." He accomplished a remarkable motor tour through the country in 1904. Address: 101, Queen Victoria Street, E.C.

**Borneo**. A large island of the Malay archipelago, divided into various states. Estimated total area 300,000 sq. m.; estimated pop. 1,846,000. Holland claims as a possession 212,737 sq. m. of territory on the south, east, and west of the island, with a population of about 1,250,000. In reality this immense tract is parcelled out into various native states. Those on the coast are more or less under Dutch influence. Of the interior little is even known. The principal Dutch settlements are at Sambas, Pontiana, Banjarmassin, and Koti. At Martapura are the diamond fields of the Borneo Mining Co., which, for a time, by agreement with the De Beers Co., are now again being worked. There are also coal mines in operation. On the north-west coast is Sarawak, to the north-east of that Brunei, and beyond that British North Borneo, which are all protectorates of Great Britain, and for details of which consult the Index.

Between British North Borneo and the Dutch territories on the east is the native state of **Sulu**. The whole island is rich in valuable timber, woods, fruits, spices, drugs and gums, and has a varied fauna. **Minerals**: coal, iron, gold, diamonds, antimony, quicksilver, etc. Soil exceedingly fertile, and well adapted for the cultivation of all tropical products. **Principal exports**: sago, beeswax, edible birds'-nests, camphor, rattans, gold, pepper, caoutchouc, gutta percha, spices, drugs and dyes, etc. The people belong to various races—Malays, Dyaks, Kyans, Negritos, Bugis, and Chinese. Tattooed races, Kanowits, Pakatans and others, inhabit the interior.

**Botha, Louis**, the Commandant-General of the Boer forces after the death of Joubert, was b. at Greytown, in Natal, in '64. He had his share of fighting as a young man with the native tribes in that district, and after serving under the Zulu chief Dinizulu he settled on a farm near Vryheid in what was then called the New Republic. This was afterwards incorporated with the Transvaal, and Botha then represented Vryheid in the Volksraad. He consistently took the more liberal view in all political matters during the years that followed, but when war broke out he led the Vryheid commando and was in the first fighting round Dundee, with his friend Lucas Meyer. His influence grew rapidly, and he was ever urging bolder counsels upon the more cautious and hesitating General Joubert. In particular he is credited with having counselled an attack upon Ladysmith on the night of the Nicholson's Nek disaster. But when Joubert fell ill he had his chance, and directed the Boers with conspicuous success at Colenso and Spion Kop. When General Joubert left Natal he was put in command of the Boers there, and after Joubert's death he succeeded him by his express desire as Commandant-General. His capacity was abundantly proved in the fighting that followed. After the conclusion of peace in 1902 he visited England and Europe.

**Bougereau, Adolphe William**, French painter, was b. at La Rochelle, Nov. 30th, 1825. A pupil of Picot, he returned, after five years of study at Rome, to Paris, where he showed in his works a marked tendency of uniting to the idealism of Ingres, a greater natural warmth. Critics reproach him with plying, by elegance and refined expression, the way to sensual conceptions. In this field his "Triumph of Venus" (79) is considered his master-work. He made a name first by decorating a country house in Pompeian style; he painted portraits, and many ecclesiastical frescoes, e.g., at the churches of St. Clotilde and St. Augustin in Paris. He received in '85 the Medal of Honour of the Salon, and was made Knight Commander of the Legion of Honour. He played a marked part in the refusal of French artists to comply with the personal invitation of the late Empress Frederic to exhibit at Berlin.

**Bourgeois, Léon**, French statesman, was b. at Paris in 1851. He read for the Bar, and entered the Chamber of Deputies in '88, becoming Under-Secretary of State for the Interior in that year, and afterwards Minister of Education in the Cabinets of M. Freycinet and M. Loubet, and Minister of Justice under M. Ribot. In '05 he formed a ministry himself, consisting entirely of Radicals, but friction with the Senate led to his resignation. In

'98 he became once more Minister of Education, and in '99 was one of the French delegates at the Hague Peace Conference, where he greatly distinguished himself. He strongly supported M. Waldeck-Rousseau's administration, and his personal ability and Parliamentary influence were recognised in 1902 and 1903 by his election as President of the Chamber of Deputies. Family bereavements kept him aloof from politics in 1904, when an attempt was made to represent him as hostile to the Government majority, an attempt which drew from him a strong denial and an assurance of his warm support of the Government.

**Bourget, Paul**, French writer; b. at Amiens in 1851. He appeared first in verse in "Vie inquiète" (74), followed by "Edel" (78) and "Les Aveux" (82), in which he was supposed to be first an admirer of and successor to Baudelaire, with tendencies in the direction of Shelley, Keats, and even Tennyson. His novels are numerous, beginning with "L'Irréparable" (84). His "Essays de Psychologie Contemporaine" (84) and "Etudes et Portraits" (88) met with a friendly reception, and he has gradually become a favourite writer in the circles of fashionable ladies, though not in those alone. More than most French writers, he has travelled and tried to familiarise himself with other countries—not Italy alone, but also England and the United States. His recent "Etapas" has passed rapidly through eight editions.

**Bourne, The Most Rev. Francis**, Roman Catholic Archbishop of Westminster, and successor of Cardinal Vaughan as head of the Roman Catholic Church in England, was b. at Clapham, March 23rd, 1861, and is thus the youngest member of the Catholic Episcopate in England. His father, the late Mr. Henry Bourne, was Principal Clerk in the Receiver-General's Branch in the Post Office, and died in '70. Archbishop Bourne was ed. at St. Cuthbert's College, Ushaw, at St. Edmund's College, Old Hall, St. Thomas' Seminary, Hammersmith, and the Seminary of St. Sulpice, Paris, where he received the diaconate in '83. After a year at Louvain University he was made priest in '84, and for five years officiated as assistant priest at Blackheath, Mortlake, and West Grinstead. In '89 he founded and was made rector of an ecclesiastical seminary for the education of the clergy of the diocese of Southwark, acting also as Professor of Moral Theology and Holy Scripture. In '95 he went to Rome, and was named Domestic Prelate to the Pope; in '96 he was appointed Bishop of Epiphania and Coadjutor with the right of succession to the see of Southwark, of which he became Bishop in '97 on Bishop Butt's resignation. During the long period of ill-health which Cardinal Vaughan endured he was often called upon to act as his substitute, and upon his death he was appointed, Aug. 28th, 1903, by Pope Pius X. to succeed him. He is a good preacher, has a great reputation as an administrator, and he has wide and enlightened views as to the training of students for the priesthood.

**Boys' Brigade, The**. A movement set on foot twenty-one years ago by Mr. W. A. Smith of Glasgow. The aim of the promoters is "the advancement of Christ's Kingdom among boys, and the promotion of habits of obedience, reverence, discipline, self-respect, and all that

tends towards a true Christian manliness." Companies are formed in connection with Churches, missions, and Sunday-schools in all parts of the United Kingdom, and the boys are trained largely by means of military drill and discipline. They wear, with their ordinary clothes, a simple uniform of cap, belt, and haversack. The total number of boys enrolled in the United Kingdom is 52,000, and their ages vary from 12 to 17. The officers number 4800. The movement has spread to America and the Colonies. The total strength of the Brigade throughout the world is 94,000. **Brigade Secretary**, Mr. W. A. Smith, 162, Buchanan Street, Glasgow. **London Secretary**, Mr. Roger S. Peacock, 34, Paternoster Row, E.C.

BRAZIL.

A republic on the east coast of Central South America, which, until 1889, was an empire under Emperor Pedro II., of the house of Braganza. A revolution then, however, broke out, a National Congress was assembled by the Provisional Government, and a new Constitution was drafted, and finally adopted in Feb. '91. The chief feature of this was the establishment of the old provinces as twenty-one separate states, self-governed except for federal purposes, but with all fiscal matters, the maintenance of order, the defence of the country, the currency, reserved to the Federal Government. Legislative authority is exercised by the National Congress, composed of a Senate of 63 members, and a Chamber of Deputies of 212 members. Congress meets annually on May 3rd for a four months' session. Deputies and senators are paid. The former must have been citizens for four and the latter for six years. Deputies are elected directly, with provision for minority representation, for three years, one member being chosen for every 70,000 of the population. The Senators are directly elected, three for each state, for nine years (one-third retiring every three years). The executive authority is in the hands of the President, elected for four years only by the people directly.

Gradual progress is being made in the reorganisation of the army, but much remains yet to be done. The strength and organisation is as follows: staff, 28; engineer corps, 66; general staff corps, 124; medical staff, 163; artillery staff, 62; 6 regiments of artillery (24 batteries), 2,412; 6 battalions of fortress artillery (24 batteries), 1984; 2 battalions of engineers, 862; 14 cavalry regiments, 5670; 1 transport corps, 278; 40 infantry battalions, 17,840; total, 29,489. The troops are divided into seven military districts, the most important being Rio Grande do Sul (11,226 men).

The navy numbers about 8500 of all ranks. The executive officers are distributed as follows: 1 admiral, 2 vice-admirals, 10 rear-admirals, 18 captains, 30 commanders, 60 lieutenant-commanders, 175 lieutenants, and 160 sub-lieutenants. The ships built number in all 63. There are no vessels under construction, but a new naval programme has been drawn up by Congress. Particulars are given below:—

Built.	
Coast defence ships . . . . .	9
Protected cruisers . . . . .	6
Torpedo vessels . . . . .	18
Torpedo boats . . . . .	28
Submarines . . . . .	2

Projected.

Battleships . . . . .	3
Armoured cruisers . . . . .	3
Torpedo-boat destroyers . . . . .	6
Torpedo boats . . . . .	12
Submarines . . . . .	3

The battleships are to be of about 13,000 tons displacement, and the armoured cruisers of from 9200 to 9700 tons. The contracts for the vessels of the programme shall, wherever possible, be awarded to English firms.

The only important dockyard is situated at Rio de Janeiro, where there are three docks to take cruisers, and two smaller ones. Besides this there are naval bases at Para, Bahia, Pernambuco, and Ladario de Matto Grosso.

There is no connection between Church and State, and all religions are tolerated, but the Roman Catholic prevails. Education is free, but not compulsory, and illiteracy is very prevalent. The chief products are coffee, rubber, tobacco, sugar, maté, cocoa and cotton. Diamonds, gold, manganese and iron are found, and mining is being more actively carried on than formerly. There are several flourishing German and Italian colonies in the southern states. There are over 9400 miles of railway open for traffic. In 1902 the United Kingdom sent 28 per cent. of the total imports, the United States 12 per cent., Germany 11.4 per cent., and France 8.8 per cent.

The award of the Swiss Government, to whom the matter was referred for arbitration, settled the boundary dispute between Brazil and French Guiana on Dec. 1st, 1900. Part of the disputed territory is known as the **Counani territory**, and during 1904 there were rumours that the inhabitants were seeking recognition as an independent State. On the other hand, it seems that the Brazilian Government, after the award mentioned above, organised an administration for the territory, and that it is indisputably Brazilian territory (see BOLIVIA, p. . .), as to the settlement in 1903 of the **Acre territory** boundary dispute.

**Area**, 3,218,082 sq. m.; **pop.** 18,595,642. The population consists of whites, negroes, and Indians. **Capital**, Rio Janeiro, **pop.** 750,000. It is, however, an article of the Constitution that the capital of the Republic shall at some future time be built on the central plateau of Brazil; and a lofty plateau in the state of Gorgaz has been suggested for the purpose.

The **Revenue**, 1903, was Rs. 44,300,908 gold and Rs. 264,133,004 paper; **expenditure**, Rs. 42,981,127 gold, and Rs. 281,198,959 paper; **imports**, 1902, £23,361,950; **exports**, £36,805,000; **external funded debt**, £42,915,000; **internal funded debt**, £81,437,500.

**President**, Dr. F. de P. Rodrigues Alves (took office Nov. 15th, 1902).—**Vice-President**, Dr. Affonso Penna.

**Ministry**: **Foreign Affairs**, Baron do Rio Branco.—**Home Affairs**, Dr. J. J. Seabra.—**Finance**, Dr. Leopoldo de Bulhões.—**Industry and Public Works**, Dr. L. Müller.—**Marine**, Rear-Admiral J. de Noronha.—**War**, Marshal Argollo-Ferrão.

**Minister in London**, Senhor Joaquim Nabuco, 11, Southwell Gardens, S.W.—**First Secretary**, J. M. Cardoso de Oliveira.—**Second Secretaries**, E. L. Chermont and R. do Rio Branco.—**Delegate of the Brazilian Treasury** Dr. J. A. de Azevedo Castro, 53, New Broad St., E.C.

Consul in London, F. A. Vieira, Coventry House, South Place, Finsbury, E.C.

**British Minister to Brazil,** Sir Henry Neville Dering, Bart., K.C.M.G., C.B.—*Secretary*, H. C. Lowther.—*Consul-General*, A. Chapman, Rio de Janeiro.—*Consuls:* at Bahia, —; at Para, W. A. Churchill; at Rio Grande do Sul, P. Staniforth; at Santos, F. W. Mark; at Porto Alegre, A. Archer.

### History, 1904.

In his Message to Congress at its opening (May 3rd) the President (Dr. Rodrigues Alves) said public opinion had approved the Treaty with Bolivia regarding the disputed territory of Acre. Brazil was drawing up her case against Peru, but the Government would not open negotiations until the Peruvian troops were withdrawn from the disputed zone, and pending the settlement of the question would not permit the Peruvian authorities to control the Brazilian population established there. A note had been sent to the Peruvian Government demanding the evacuation of the Alto Purus and Alto Juruá territories occupied by the Peruvians, and an order for the mobilisation of Brazilian forces was issued (4th), but a conciliatory reply from the Peruvian Government (8th) relieved the situation. It proposed that the territories should be evacuated and declared neutral pending an amicable settlement of the question by mutual agreement or arbitration, and an agreement to this effect was afterwards arrived at. The King of Italy signed his award as to the boundary between Brazil and British Guiana (June 14th), which had been submitted for his arbitration. The award stated that "the documents which have been submitted to us, and which we have duly appreciated and weighed, furnish historical and judicial claims on which very precise and clearly defined rights of sovereignty in favour of the one or the other of the two Powers concerned can be founded only as regards some portions of the territory in dispute and not as regards the entirety of the said territory." Therefore the limit of the zone of territory over which the rights of sovereignty of one or the other of the two parties must be regarded as established could not be fixed precisely, and it could not be decided with certainty whether the preponderating right rested with Brazil or with Great Britain. Under the circumstances it was not possible to divide the disputed territory into equal parts either as regards superficial area or value, and so the lines drawn by nature were adopted, the actual decision being: "The frontier between British Guiana and Brazil remains fixed by the line which starts from Mount Yakontipu, continues in an easterly direction along the watershed to the source of the Ireng (Mahu), proceeds down the course of that river to its confluence with the Tacutu, follows the course of the Tacutu to its source, where it joins the line of frontier established by the declaration annexed to the treaty of arbitration concluded in London by the high contracting Powers concerned on Nov. 6th, 1901. In virtue of that declaration, all that part of the zone in dispute lying to the east of the line of frontier will belong to Great Britain, and all that part which is to the west will belong to Brazil. The frontier along the rivers Ireng (Mahu) and Tacutu remains fixed by the *Thalweg*, and the

said rivers will be open to free navigation of the two States bordering on them. When the rivers divide into several branches, the frontier will follow the *Thalweg* of the most easterly branch."

**Bridge, Sir Frederick,** M.V.O., Mus. Doc., organist of Westminster Abbey, was b. at Oldbury 1844. Ed. at the Cathedral School, Rochester, he subsequently became a pupil of the late Sir John Goss. In '69 he was appointed organist of the Manchester Cathedral, and in '71 Professor of Harmony at Owens College. He has been connected with Westminster Abbey since '75, and was appointed in '90 Professor of Music at Gresham College, in '96 Conductor of the Royal Choral Society, and in 1902 King Edward Professor of Music in the University of London. His compositions, mainly produced at the great provincial festivals, include the "Hymn to the Creator," "Rock of Ages," "Calirhoe," "The Repentance of Nineveh," and "The Cradle of Christ." He was entrusted with the duty of setting to music Tennyson's poem "Crossing the Bar," which was sung at the funeral in Westminster Abbey (Oct. '92). His most successful work is a setting of Rudyard Kipling's "Flag of England" for chorus and orchestra, performed at the Albert Hall in the Diamond Jubilee year with remarkable success. In addition to the above compositions, Prof. Bridge has written many anthems and services, carols, etc., and is the author of four of Novello's Primers on the subject of Counterpoint, Organ Accompaniment, and "Musical Gestures." The latter is a novel system of teaching the rudiments of music by physical exercises. He published in 1903 a book on "Samuel Pepys—Lover of Music" (Smith Elder & Co.). He was knighted in '97, and received the Royal Victorian Order (4th Class) for his services as director of the music at the Coronation of King Edward VII. in 1902. Address: The Cloisters, Westminster Abbey; Cairnbarrow, Huntly, N.B.

**Bridge, Admiral Sir Cyprian A. G., G.C.B.,** was b. March 15th, 1839, and entered the Navy in '53. He served in the Russian war in '54, and during the Indian Mutiny fought with the Naval Brigade on the Burmese frontier. He has had a long and active career, was Director of Naval Intelligence '89-94, and Commander-in-Chief on the Australian station '95-8. In Feb. 1901 he was chosen by the Admiralty to succeed Sir E. H. Seymour as Commander-in-Chief on the China station on his retirement from that post in June 1901, and he held that command till 1903. He was appointed in 1904 by the Board of Trade to report on the North Sea outrage. 1, Eaton Terrace, S.W.

**British and Foreign Anti-Slavery Society.** Founded 1839, its first President being Thomas Clarkson. The objects of the Society, which carries on the work of previous anti-slavery societies, the need for which had ended in the emancipation of slaves in British colonies, are: "The universal extinction of slavery and the slave trade; and the protection of the rights and interests of the enfranchised population in the British possessions, and of all persons captured as slaves." Patron, H.M. the King; Journal, *The Anti-Slavery Reporter*; President, Sir T. F. Buxton, Bart., G.C.M.G.; Secretary, Travers Buxton. Office, 55, New Broad Street, E.C.

## THE BRITISH

- The British Empire consists of  
 (1) The United Kingdom of Great Britain and Ireland,  
 (2) The Empire of India, and  
 (3) The British Dominions beyond the seas, including all Colonies, Protectorates, and Dependencies,

the whole forming one empire under Edward VII. (*q.v.*), King and Emperor, whose title rests upon the Act of Settlement, 1701, which settled the succession to the throne on the Princess Sophia of Hanover and the "heirs of her body being Protestants." The supreme executive authority is vested nominally in the Crown, but really in the Cabinet, or Ministry; and the supreme legislative authority in Parliament.

We furnish below a table showing the geographical distribution of the various parts of the Empire, their capitals, area, population, public revenue and expenditure, imports and exports, the dates at which they were acquired, and their political status and government. The dependencies are classified thus:—(a) Colonies possessing a full constitution, with responsible government; (b) colonies in which the legislature is partly elective and partly controlled by the governor, styled representative government; (c) Crown colonies, which are ruled directly by the Imperial Government, through their respective governors and local officials; (d) dependencies subordinate to the government of others, provinces and parts of colonies, administered by functionaries appointed by the governments on which they are dependent; (e) protectorates, internally in-

dependent, but more or less subject to British control, by treaty and otherwise; (f) places nominally belonging to Great Britain, but either unoccupied or not under authority. Territories occupied by troops, but not declared to be actually British possessions (*e.g.*, Egypt, Soudan), have not been included in this table, and many small possessions, like the numerous islands in the Pacific, are not given a place.

Following the table will be found fully descriptive articles upon India and the Colonies and Dependencies. The figures given in the table are as far as possible the latest received in England.

The area of the British Empire was estimated in the General Report on the 1901 Census (*Cd.* 2174,—1904) at 11,876,745 sq. m., and the population at 400,543,713, made up thus—

	Area in sq. m.	Estimated or enumerated pop. 1901.	Natives of U.K.
United Kingdom	121,089	41,458,721	
Isle of Man and Channel Isles	303	150,370

# EMPIRE.

The Colonies, Dependencies, Protectorates, etc., were thus distributed—

	Area in sq. m.	Estimated or enumerated pop. 1901.	Natives of U.K.
In Europe . . .	3,703	472,502	31,854
In Asia . . .	1,849,259	300,604,864	117,669
In Africa . . .	2,689,297	45,146,972	222,118
In America . . .	4,036,871	7,525,815	395,113
In Australasia .	3,176,223	5,184,469	885,296

In '37 the area of the British Empire was estimated at 8,329,000 sq. m., and in '61 it was about the same figure; so that, in the last forty years, it has increased by nearly 50 per cent. Of the total 9,115,000 sq. m. are under settled government, the self-governing colonies alone covering about 7,000,000 sq. m.

In '37 the population of the British Empire was 168,000,000; in '61 it was estimated at 175,000,000; in '71 at 235,000,000; in '81 over 254,000,000; in '91 nearly 372,000,000; and in 1901 it had reached over 400,000,000.

In '37 there were about 25,750,000 British in the United Kingdom and about 1,500,000 in the Colonies, making a total of 27,250,000. In 1902 there were 41,950,000 British in Great Britain and 10,500,000 in the Colonies, giving a total of 52,500,000.

The total revenues of the Empire amounted

to about £75,000,000 in 1837, the United Kingdom having a revenue of £50,000,000, and India and the Colonies about £25,000,000. In 1903 the revenue of the United Kingdom was, roughly, £141,000,000; India, £83,000,000; Australasia, £47,000,000; Canada, £13,500,000; Cape Colony and Natal, £15,000,000; other Colonies, £17,500,000; making a total of £317,000,000.

Sir Robert Giffen, at the meeting of the British Association in Sept. 1903, put forward the following estimates as to the aggregate income and wealth of the people of the British Empire:—

## Aggregate Income. £

United Kingdom . . .	1,750,000,000
Canada . . .	270,000,000
Australasia . . .	210,000,000
India . . .	600,000,000
South Africa . . .	100,000,000
Remainder of Empire . . .	200,000,000

Total . . . £3,130,000,000

## Capital or Wealth. £

United Kingdom . . .	15,000,000,000
Canada . . .	1,350,000,000
Australasia . . .	1,100,000,000
India . . .	3,000,000,000
South Africa . . .	600,000,000
Remainder of Empire . . .	1,200,000,000

Total . . . £22,250,000,000

## I. THE UNITED KINGDOM.

The plan of the ANNUAL is such that it has been found advisable to place under separate headings the articles which describe the parliamentary, local government, military, naval, educational, financial, legal, mercantile and commercial, religious, industrial and general constitution and activities of the United Kingdom, and a reference to the Index will enable these articles to be consulted with ease.

**Isle of Man.** Lies in the Irish Channel, equidistant from England, Scotland, and Ireland. **Area**, 220 sq. m.; **pop.** 54,752. **Divisions** are 6 sheadings (or counties) and 17 civil parishes. The principal towns are Douglas, Castletown, Ramsey, and Peel. **Castletown** is the ancient capital, but **Douglas** (pop. 10,149) is the chief town and the seat of government. **Physical aspect** mountainous, well watered, and exhibiting lovely scenery. There are peculiar breeds of ponies, cattle, cats, etc. **Government** is "home rule" under a Governor, who, with Council and House of Keys of 24 members, makes up the Tynwald Court. Acts, after assent of the Crown, must be proclaimed on Tynwald Hill. The **Deemsters** are Judges of the Common Law Division of the High Court. **Industries** are farming, fishing, mining of lead, copper, iron, zinc, and reception of tourists. The land is in a high state of cultivation. Railways exist between the various towns. The **Manx people** are mostly of Celtic nationality. Their language and old customs are gradually disappearing.

**Lieutenant-Governor**, Lord Raglan.—*Clerk of the Rolls and Judge of the Chancery Division of the High Court of Justice*, Sir James Gell, Kt., C.V.O.—*First Deemster*, Thomas Kneen.—*Second Deemster*, Stewart Stevenson Moore.—*Attorney-General*, George Alfred Ring.—*Receiver-General*, Col. Anderson.

The **Channel Islands** lie in the southern part of the English Channel, 10 to 30 miles from the French coast. Anciently an appanage of the Duchy of Normandy, they have belonged to England since the Conquest. Total **area** about 76 sq. m.; **pop.** 95,841. Divided into two separate governments, called **Bailiwicks**, that of **Jersey** (area 45 sq. m., pop. 52,796), and that of **Guernsey** (area, with Alderney, Sark, Herm, Jethou, etc., 31 sq. m., pop. 43,045). The capitals are respectively St. Heliers and St. Pierre. Each Bailiwick enjoys a kind of autonomy. The Crown appoints a Lieutenant-Governor and a Bailiff to each, and each has its representative legislature called the **States**. The English Church is the established religion, and the islands are included in the see of Winchester. Relics of Norman customs survive in the administration. The people are an intermixture of French and English. Granitic rock is the foundation of the islands. They are extremely fertile and picturesque. Agriculture is largely carried on, fruit and vegetables being raised for export. Industries are farming, market gardening, and fishing. The fisheries are important, embracing lobster, oysters and cod.

**JERSEY:** *Lieutenant-Governor*, Major-Gen. Hugh S. Gough, C.B., C.M.G.—*Bailiff*, Sir William H. Venables Vernon, Kt.—*Dean*, Very Rev. Geo. Orange Balleine, M.A.—*Attorney-General*, A. Hilgrove Turner, Esq.—*Vicomte*, R. R. Lemprière, Esq.—*Solicitor-General*, H.

Le V. dit Durell, Esq.—*Government Secretary* (vacant).—*H.M. Receiver-General*, Capt. C. E. Malet-de-Carteret.—*Greffier*, E. Le Sueur, Esq.

**GUERNSEY, SARK, ALDERNEY, ETC.:** *Lieutenant-Governor and Commanding Troops*, Maj.-Gen. B. B. D. Campbell, C.V.O., C.B.—*Bailiff*, Sir Henry Giffard, K.C.—*Dean*, Very Rev. Thos. Bell, M.A., Hon. Canon of Winchester.—*H.M. Procureur*, E. C. Ozanne.—*H.M. Comptroller*, A. Wm. Bell.—*Gov. Secretary*, Col. Wm. Bell, C.B.—*Receiver-General*, Col. A. H. Collings.—*H.M.'s Greffier*, Q. le Pelley, Esq.

## II. THE EMPIRE OF INDIA.

India is a dependency of Great Britain, consisting partly of territory under the direct administration of British officials, and partly of native states, all subordinate, in varying degrees of relationship, to the suzerain power. The nine great provinces are Madras, Bombay, Bengal, the United Provinces of Agra and Oudh, the Punjab, Burma, Assam, the Central Provinces, and the North-Western Frontier Province. The British territory in India was acquired by the **East India Company**, by conquest or treaty, in the course of one hundred years, dating from the battle of Plassey (1757). As a result of the mutiny of the Sepoy army (1857-8), the East India Company ceased to exist; and the direct sovereignty was vested by the Government of India Act, '58, in the Crown. In accordance with the Royal Titles Act of '76, the King of Great Britain and Ireland assumes the additional title of Emperor of India. The Parliament of the United Kingdom is, of course, supreme over India; but this supremacy is enforced rather by means of Ministerial responsibility than by direct legislation. Practically, all the statutes relating to India are in the nature of either constitutional enactments or financial provisions.

The Act of Parliament that abolished the Company also created a **Secretary of State for India**, together with a Council of twelve members, selected for a period of ten years from among Indian ex-officials for the most part, whose names are given on p. 58. The main duty of the Council is to control the expenditure of the Indian revenues, both in India and elsewhere, and generally to conduct the business done in England in regard to the government of India. In England every measure concerning India runs in the name of the Secretary of State; and he alone is responsible to Parliament. In practice he is always a Cabinet minister of the first rank.

In India the supreme authority, both executive and legislative, is vested in the **Governor-General in Council**. The Governor-General, or **Viceroy**, who is generally appointed for five years, and receives a salary of £16,720 a year, has power to overrule his Council in cases of emergency. For ordinary purposes the Council is composed of seven members, all appointed, like the Governor-General himself, by the Crown for a period of five years. These members preside over the departments of Finance, Commerce, Home Affairs, Revenue and Agriculture, Military Administration, Legislation, and Public Works. The Foreign Department is under the special care of the Viceroy. For *personnel* of Governor-General's Council see p. 59. For purposes of legislation this Council is augmented by sixteen additional members, nominated by the Governor-General,

of whom one-half must be non-official persons, and of whom some are always natives. The four provincial legislative councils and the Calcutta Chamber of Commerce have each the right to recommend one member. The seat of the Supreme Government is Calcutta, with an annual migration to the hill station of Simla for the hot season.

As regards the work of administration, Madras and Bombay, which boast a historic existence for two centuries, are styled Presidencies, and enjoy a certain precedence, are each ruled by a Governor, appointed by the Crown, with legislative and executive councils modelled on those of the Governor-General. They each possess an army and a civil service of their own. Bengal, the North-West Provinces, the Punjab, and Burma are each under a Lieutenant-Governor appointed by the Viceroy with the approval of the Crown, and have each a legislative council. The Central Provinces and Assam are under Chief Commissioners appointed by the Viceroy in Council. A Chief Commissioner presides over each of the following: Coorg, Ajmere-Merwara, British Baluchistan, the Andaman Islands, and the North-Western Frontier Province. In addition, there are some smaller tracts under the direct administration of the Governor-General. Within the provinces, and under the control of the secretariat, or central provincial bureau, the actual unit of administration is the District, which forms the charge of an officer, usually styled Collector or Deputy-Commissioner. His principal duties are executive, magisterial, and fiscal; but he also exercises supervision over police, jails, schools, public works, forests, etc. The Districts, of which there are 250 in British India, are combined into Divisions under Commissioners. As to justice, the Collector in each District is usually judge both of first instance and appeal. Madras, Bombay, Bengal and the United Provinces have each a High Court, from which there is an ultimate appeal to the Privy Council in England. The Punjab has a Chief Court, and Burma, the Central Provinces, Oudh and Sind have each a Judicial Commissioner, Burma having also a Chief Court. For local government purposes there are the municipal bodies, numbering about 764, in all towns of sufficient size, appointed on the elective principle as to the majority, but with some Government members in all cases, and having charge of municipal business generally, including the care of roads, fairs and markets, open spaces, water supply, drainage, education, hospitals, etc. In the rural districts there are about 700 district and local boards, having charge of local roads, sanitation, education, hospitals, etc. Port Trustees have charge of harbour works, pilotage, etc.

The staff of administration consists of: (1) the covenanted civil service, appointed after competitive examination in England; (2) the statutory civil service, selected from among natives; (3) military officers of the staff corps in civil employ; (4) a miscellaneous class of uncovenanted civil servants of different grades, who may be either Europeans or natives.

The Indian Civil Service, besides the ordinary departments of civil administration, includes judicial posts, the medical service, the forest department, and officers of the staff corps in civil employ. Candidates are required to pass a competitive examination in England—which

examinations are as a rule held annually during August in London. Candidates must be above 21 and under 23 on the 1st of January preceding the date of the examination; but in and after 1906 candidates must be above 22 and under 24 on Aug. 1st of the year in which the examination is held. Application for admission to the examination must be made on or before July 1st in each year to the Secretary, Civil Service Commission, London, W. The Public Works Department is recruited from the Royal Indian Engineering College at Cooper's Hill (which, however, is now to be discontinued), from the corps of Royal Engineers, and, as regards Indians, from the Civil Engineering Colleges in India. The Telegraph Department is recruited much in the same manner. Examinations for the Forest Department and the Medical Service are also held in England.

**Religion.** The Hindu religion is professed by over 207,000,000, or nearly three-fourths of the whole population. The Mohammedans number about 62,500,000 adherents, the Buddhists about 9,500,000 (chiefly in Burma), and Christians (in 1901) 2,923,349. The number of Christians in '91 was 2,284,380, and the increase in the ten years amounted to 28 per cent., a much greater rate than that shown by the general population. The majority of the native Christians are to be found in the Madras Presidency. The Parsis numbered 94,200 in 1901.

Educational institutions are of two kinds—public, which are under the Department of Public Instruction, and private, which are not. There are five universities, with 191 affiliated colleges for arts, Oriental learning, and professional courses; 5,493 secondary schools, with 558,000 scholars; and of 8,538 primary schools, with 3,260,000 pupils. Including the private institutions, the number of scholars is about 4,500,000, of whom less than 450,000 are girls.

The large majority of the population are engaged in agricultural pursuits, nearly 200,000,000 being either engaged in tilling the soil or dependent upon those so engaged; and the land-tax is, next to the income from railways, the chief source of Indian revenue. There is an Agricultural Department in every large province, for the purpose of improving agricultural methods and disseminating information, with an Inspector-General of Agriculture appointed by the Supreme Government. Metal and textile workers, glass and pottery workers, with their dependants, number close on 20,000,000, and there are large numbers employed in service. Great irrigation works have been carried out, the capital outlay up to the end of 1903 in this respect amounting to £20,648,303, and the area irrigated being over 14,000,000 acres. The principal crops cultivated are rice, wheat, millet, pulse, and other food grains, oil-seeds, tea, cotton, sugar-cane, tobacco, and indigo. The cultivation of opium is a Government monopoly, and is restricted to Bengal and the United Provinces, with a small cultivation for local use in the Punjab and Ajmere-Merwara and on the frontier of Upper Burma. The Government receive the crop and manufacture it at the factories at Patna and Ghazipur for the foreign market. Malwa opium is grown in Baroda and in some of the Native States, and heavy duties are levied on the exports of this opium, a duty being also paid to the Indian Treasury. All salt imported into or manufactured in India has

to pay duty. There are 15,756,000 acres under cotton, and the export of raw cotton in 1902-3 was 6,045,000 cwts., valued at £9,838,000. See article on **TEXTILE INDUSTRIES**.

There are two kinds of tenure under which the land is held. The first, the **Zamindari tenure**, prevails principally in Bengal, the Punjab, and the United Provinces, while it also exists in the Central Provinces, Madras, and Assam. Under this system the land is held in large estates, averaging about 800 acres, by zamindari and by village communities, and the state revenue is assessed and paid on each estate as a whole for stated periods. About 318,000,000 acres are held under this system. The **raiyatwari system** prevails in Bombay, Madras, Sind, Burma, Assam, and to some extent in the Central Provinces. Under this system the land is held by petty proprietors direct from the Government, and the revenue is assessed with each holding, and is paid directly to the State. About 278,000,000 acres are held under this system. The land revenue in recent years has amounted to about £18,500,000.

Special attention is paid to afforestation, and huge forest tracts have been demarcated and reserved in recent years, while the Forest Department has a less complete control over the "protected" and "unclassed" forests. The country is rich in coal, though little mining has as yet been done. The production in 1901 was 6,635,727 tons, of which more than four-fifths came from Bengal. The railways of India have been constructed either by private companies to which the State guarantees interest, or directly by the State. The total number of miles open for traffic on Dec. 31st, 1903, was 26,952, and the total capital outlay up to the same date was £221,696,464. The chief exports are wheat, rice, jute, cotton, hides and skins, opium, indigo, tea, and oil-seeds.

The principal Indian journals are largely the organs representative of the services or the English trading classes living at the centres of government. In Calcutta, the leading dailies are the **Englishman**, which claims to be the oldest English paper in India, the **Indian Daily News**, and the **Statesman**, which advocates a Liberal policy. In Madras there are the **Mail**, **Times**, and **Standard**; at Bombay the **Times of India** and the **Gazette**; at Allahabad the **Pioneer**; at Lucknow the **Daily Telegraph**; at Lahore the **Civil and Military Gazette**, and at Delhi the **Morning Post**. There are a large number of vernacular papers published in India.

**Indian National Association.** Established in 1870 (by Miss Mary Carpenter) for the purpose of promoting social progress and education in India, and extending friendly intercourse between the English people and the people of India, by grants in encouragement of education, especially of female education, in India; organising lectures on Indian subjects, social meetings, etc.; selecting English teachers for Indian families and schools; helping and advising Indian students who visit England. Queen Alexandra is the Patroness of the Association. **Hon. Secretary** in England, Miss E. A. Manning, 5, Pembridge Crescent, Bayswater, London, W.

**Indian National Congress.** Some twenty years ago a movement took definite shape, among the educated classes of India of all races, religions, and provinces—to meet together and discuss their political wants. Hitherto the people of India had been widely separated from one another by differences of language,

creed, and caste; and these differences had been intensified by distance. It was the English Government that for the first time made it possible for them to unite in a common object. The original stimulus came from the education in English, which is given in all the colleges and higher schools, and in many of the common schools; but the scheme could never have been realised if it had not been for the development of the railway system. The first **Indian National Congress** was held at Bombay in Dec. '85; the president was Mr. W. C. Bonnerjee, a Bengal Brahmin. The Twentieth Congress was held in Bombay in December 1904, under the presidency of Sir H. J. S. Cotton, K.C.S.I. The Chairman of the British Committee is Sir W. Wedderburn. The official report of the various sessions of the Congress may be obtained from the British Committee, 84 and 85, Palace Chambers, Westminster, S.W. A weekly journal, named *India*, "a record and review of Indian affairs," is published at the same address. *India* publishes a full report of all proceedings in Parliament relating to Indian affairs.

The area of British territory alone (excluding native states) is 1,087,249 sq. m., and the population 231,899,507. The total area of India, including Burma and the native states, is given as 1,766,642 sq. m., and the total population, according to the census taken in 1901, numbers 294,361,056. The population of Calcutta is 1,125,400, Bombay 776,006, Madras 509,346, Haidarabad 448,466, Lucknow 264,049, Rangoon 234,881, Delhi 208,575, Benares 209,331. The revenue for 1901-2 was £76,344,525; 1902-3, £77,434,915; 1903-4, £83,068,000. The expenditure was: 1901-2, £71,394,282; 1902-3, £74,365,366; 1903-4, £80,357,000. The public debt is £79,949,000 in India, and £133,046,000 in England. The imports for 1902-3 were £74,466,000, and for 1903-4 £88,470,500. The exports were, 1902-3, £92,702,000, and 1903-4 £113,325,000. Of the imports 66½ per cent. come from the United Kingdom, and the balance from the colonies and from foreign countries; of the exports 27½ per cent. go to the United Kingdom, 23½ to European countries, and the balance to other foreign countries and the colonies. There is a general duty of 5 per cent. on the value of goods imported, the chief exceptions being railway material, industrial and agricultural machinery, food-grains, some raw materials, etc., which are admitted free; cotton goods which pay 3½ %, and iron and steel which pay 1 %.

#### Government of India.

**Office of the Secretary of State in Council.**

**Secretary of State**, The Right Hon. St. J. Brodrick, M.P.

**Permanent Under-Secretary**, Sir Arthur Godley, K.C.B.

**Parliamentary Under Secretary**, —

**Assistant Under-Secretary of State**, Sir Horace G. Walpole, K.C.B.

**Council:** Sir C. H. T. Crosthwaite, K.C.S.I.; Sir Stuart C. Bayley, K.C.S.I., C.I.E.; F. C. Le Marchant; Gen. Sir J. J. H. Gordon, K.C.B.; Sir D. Fitzpatrick, K.C.S.I.; Sir J. L. Mackay, K.C.I.E.; Sir John Edge, Kt., K.C.; Sir P. P. Hutchins, K.C.S.I.; Gen. Sir A. R. Badcock, K.C.B., C.S.I.; Sir William Lee-Warner, K.C.S.I.; Rt. Hon. Sir Anthony P. MacDonnell, G.C.S.I.; J. F. Finlay, C.S.I.—*Clerk of the Council*, Sir Horace G. Walpole, K.C.B.—

*Private Secretaries to Secretary of State, F. A. Hirtzel, Lord E. Talbot, D.S.O., M.P.*

*Secretaries of Departments: Financial, L. Abrahams.—Military, Gen. Sir E. Stedman, K.C.B., K.C.I.E.—Judicial and Public, Sir Charles James Lyall, K.C.S.I., C.I.E.—Political and Secret, Richmond Ritchie, C.B.—Public Works, F. C. Thompson.—Revenue and Statistics, T. W. Holderness, C.S.I.*

### Supreme Government, Calcutta.

*Viceroy and Governor-General, Lord Curzon of Kedleston, G.M.S.I., G.M.I.E. (For biography see Peerage under PARLIAMENT.)*

*Commander-in-Chief, Gen. Lord Kitchener of Khartoum, O.M., G.C.B., G.C.M.G.*

*Governor-General's Council—Ordinary Members, Major-Gen. Sir Edmond R. Elles, K.C.B., K.C.I.E.; Sir A. T. Arundel, K.C.S.I.; Denzil Ibbetson, C.S.I.; H. E. Richards; Sir E. FitzG. Law, K.C.M.G., C.S.I.—Extraordinary Member, Gen. Visct. Kitchener, G.C.B., O.M., G.C.M.G.—Additional Members for Making Laws and Regulations, H. Adamson, C.S.I.; L. A. S. Porter; A. D. Younghusband; Sir Rameshwara Singh, K.C.I.E., Maharaja Bahadur of Darbhanga; G. K. Gokhale; Rai Bahadur B. K. Bose, C.I.E.; Rai Sri Ram Bahadur; Raja Sir Surindar Bikram Prakash Bahadur, K.C.S.I.; Sir Sultan Muhammad Shah, Agha Khan, G.C.I.E.; E. Cable; Nawab Saiyid Muhammad Sahib Bahadur.*

*Secretaries to the Government for India: Home, H. H. Risley, C.S.I., C.I.E.—Revenue and Agriculture, J. O. Miller, C.S.I.—Finance and Commerce, E. N. Baker, C.S.I.—Foreign, L. W. Dane, C.S.I.—Military, Major-Gen. E. De Brath, C.I.E.—Irrigation, Roads and Buildings, S. Preston, C.I.E.—Legislative, J. M. Macpherson, C.S.I.*

### Provinces of India.

**Madras**, with the native states of Mysore, Travancore, etc., occupies the entire south of the Indian peninsula. The seat of government is Madras city, on the east coast. The **Laccadive Islands** (pop. 10,274) for administrative purposes form a part of the Presidency. There are few manufactures, but the sea coast has helped to create a widely diffused trade. **Area**, 141,726 sq. m.; **pop.** 38,209,436.

*Governor, Lord Amphil, G.C.I.E.*

*Governor's Council: J. Thomson, C.S.I., and Gabriel Stokes, C.S.I.—Additional Members for making Laws and Regulations—Officials: M. Hammick, C.I.E., Chas. Jas. Weir, R. V. Srinivasa Aiyar, B.A., John N. Atkinson, A. Gibbs Bourne, D.Sc., Herbert Bradley, A. E. Castle Stuart, Sir V. Bhashyam Aiyangar, James Andrew, L. A. Govindaraghava Aiyar, K. Vasudeva Aiyangar, G. Srinivasa Rao, M. Krishnan Nayar, K. Venkata Rao, Sir George Gough Arbuthnot, Ghulam Muhammad Ali (Sahib Bahadur, Prince of Arcot), H. P. Hodgson, C. Muttukumaraswami, Mudaliyar (Zamindar of Chunampet), P. S. Sivaswami Aiyar, V. C. Desikachariyar.*

*Secretaries to Government: Chief Secretary, G. S. Forbes, C.S.I.—Revenue Department, Murray Hammick, C.I.E.—Local, etc., Departments, A. G. Cardew, M.A.—Public Works, W. B. de Winton, C.I.E., A. H. Garrett, H. G. S. Savory.*

**Bombay** is the western Presidency: capital Bombay. It is the home of the Mahrattas and

of the Mahometans of Gujarat and Sind. Manufactures include cotton cloth, silk weaving, pottery and brass ware. **Area**, including Sind and Aden, 123,064 sq. m.; **pop.** 18,559,561.

*Governor, Lord Lamington, G.C.M.G., G.C.I.E. Council of the Governor: Sir J. Monteath, K.C.S.I.; E. McG. Hope Fulton.—Additional Members for making Laws and Regulations, Basil Scott (Advocate-General), Mir Allah-bakshkhan valad Alibakshkhan Shahwani Talpur, Gokaldas Kahandas Parekh, Sir Pherozeshah M. Mehta, K.C.I.E., Ibrahim Rahimtoola, Daji, Abaji Khare, Hari Sitaram Dikshit, Navroji Dorabji Khandalavala, Chimanlal Harilal Setalvad, Arthur Delaval Young-husband, Vithaldas Damodher Thackersey, Meherban Chintamanrao Raghunath (Chief of Kurundwad), Khan Bahadur Darasha Ratanji Chichgar, C. H. Armstrong, Montagu de Pome-roy Webb, William Henry White, Edward Giles, John Lewis Jenkins, George Clifford Whitworth, Amphlett Lamb, C.I.E., Dr. Rham-krishna Gopal Bhandarkar.*

*Secretary, F. K. Boyd.*

*Secretaries to the Government: Revenue, Financial and Separate Departments, Richard A. Lamb, C.I.E.—Political, Special, Judicial, and Legislative Departments, S. W. Edgerley, C.I.E.—Educational, etc., Departments, H. O. Quin.—Public Works, W. H. White.*

*Commissioner in Sind: A. Cumine, C.S.I.*

**Bengal** comprises the deltas and lower valleys of the Ganges and Brahmaputra, and includes the four provinces of Bengal proper, Behar, Orissa, and Chota Nagpur. Capital Calcutta. The soil is very fertile, and the staple crops are rice, jute, indigo, and tea. Opium is a Government monopoly. There are flourishing manufactures, and trade and commerce prosper. **Area**, 151,185 sq. m.; **pop.** 74,744,866.

*Lieutenant-Governor, Sir Andrew Henderson Leith Fraser, K.C.S.I.*

*Council: Krishna Govinda Gupta, H. Savage, C.S.I., Behari Lal Gupta, P. O'Kinealey (Advocate General), W. C. Macpherson, C.S.I., D. B. Horn, L. P. Shirres, A. Earle, C. G. H. Allen, Tarini Kumar Ghose, Nawab Bahadur Khwaja Salimullah, Maharaja Sir Ravaneshwar Prashad Singh Bahadur, K.C.I.E., Babu Kali Pada Ghosh, M.A., Babu Bhupendra Nath Basu, M.A., Babu Saligram Singh, Charles Frederick Larmour, Apar Alexander Apar, Babu Ambika Mazumdar, Babu Nalin Behari Sircar, C.I.E.*

*Secretaries to Government: Chief Secretary, L. Hare, C.I.E.—General and Revenue, A. Earle.—Financial and Municipal, L. P. Shirres.—Public Works, D. B. Horn and W. A. Inglis.*

**The United Provinces of Agra and Oudh** occupy the upper basin of the Ganges and the Jumna. Capital Allahabad. It is the richest wheat-growing country in India, and the natural fertility has been increased by a magnificent series of irrigation works. Millet, rice, indigo, cotton, sugar, tobacco, etc., are also grown. Manufactures include sugar, indigo, and cotton cloth. **Area**, 107,164 sq. m.; **pop.** 47,691,782.

*Lieutenant-Governor, Sir J. J. D. La Touche, K.C.S.I.*

*Legislative Council: J. Hooper, A. McRobert, Raja Tasadduq Rasul Khan, Raja Sham Singh of Tajpur, Babu Sri Ram, Rai Bahadur, M.A., Rai Nihal Chand, Bahadur, Pandit Madan Mohan Malaviya, LL.B., Munshi Madho Lal,*

A. W. Cruickshank, J. M. Holms, R. G. Hardy, H. Marsh, L. A. S. Porter, J. E. Gill.

**Secretaries to Government:** *Chief Secretary*, W. H. L. Impey; *Financial*, J. M. Holms; *Judicial*, S. H. Butler.—*Buildings and Roads, and Railway Branches*, A. R. Sutherland.—*Irrigation Branch*, H. Marsh, C.I.E.

**The Punjab** is bounded by Kashmir on the north, the North-West Provinces on the east, Afghanistan and Kelat on the west, and the Sutlej and Rajputana on the south. Capital, Lahore, but the chief city is Delhi. The Sikhs are found in this province, and agriculture is the main industry. Artificial irrigation is almost universal. There are rich deposits of rock salt. *Area*, 97,209 sq. m.; *pop.* 20,330,339.

**Lieutenant-Governor**, Sir C. M. Rivaz, K.C.S.I.

**Legislative Council:** A. Anderson, C.I.E., Miyan Muhammad Shah Din, James McC. Douie, J. Brenton, C.I.E., Sir David Parkes Masson, C.I.E., Sir Kunwar Ranbir Singh, K.C.S.I., Col. James B. Hutchinson, Major Raja Jai Chand, Col. J. A. L. Montgomery. **Secretary**, H. A. B. Rattigan.

**Secretaries to the Government:** *Chief Secretary*, J. McC. Douie.—*Judicial and General Secretary*, A. B. Kettlewell.—*Secretary Irrigation Branch*, J. Benton, C.I.E.—*Secretary Buildings and Roads Branch*, E. D. Smithe, M.I.C.E.—*Revenue Department Financial Commissioner*, Sir C. L. Tupper, C.S.I., K.C.I.E.

**Burma** comprises a vast tract of country in southern Asia, bounded on the north and west by the mountainous ranges of Tibet, Assam, and Manipur, on the east by Chinese territory, and partly on the south-east by Siam. There are three great tribal families in the country, the chief of which is the Mran-má (from which the word Burma is derived); and while distinct from the Aryans in India and the Chinese on the other side, the natives to some extent partake of the peculiarities of both. *Area*, 236,738 sq. m.; *pop.* 10,490,624. The Chins or Kachins are inhabitants of the outlying highlands of the Bhamo and Katha districts of Upper Burma. The Shan States lie between Burma and Indo-China.

**Lieutenant-Governor**, Sir H. S. Barnes, K.C.S.I. **Legislative Council:** W. T. Hall, Kun Kyi, C.I.E., C. H. Wilson, C.I.E., J. Lewis, Maung Po, L. M. Jacob, C. Findlay, F. C. Gates.

**Secretaries to the Government:** *Chief Secretary*, F. C. Gates.—*Revenue Secretary*, H. M. S. Mathews.—*Financial Commissioner*, W. T. Hall.—*Public Works Department*, L. M. Jacob.

**Assam** lies to the north-east of Bengal, and is bounded on the north by the eastern section of the Himalayas. Capital Shillong, in the Khasi Hills. The population is entirely rural; rice is grown, but the cultivation and manufacture of tea is the great commercial industry of the country. *Area*, 56,243 sq. m.; *pop.* 6,126,343.

**Chief Commissioner**, Mr. J. B. Fuller, C.S.I., C.I.E.—*Secretary to Chief Commissioner*, F. J. Monahan.—*Secretary, Public Works Department*, W. McM. Sweet.—*Director, Department of Land Records and Agriculture*, F. C. Henniker.

**The Central Provinces** contain much waste-land and jungle. Coal is found at Warora, and the only important manufactures are weaving and the working of iron ore. *Area*, 86,459 sq. m.; *pop.* 9,876,646. The Berars (area, 17,710 sq. m., *pop.* 2,754,016), are attached to the Central Provinces for administrative purposes.

**Chief Commissioner**, J. P. Hewett, C.S.I., C.I.E. **Secretaries to the Government:** *Chief Secretary*, B. Robertson.—*Second Secretary*, F. S. A. Slocock.—*Commissioner of Settlements and Agriculture*, B. P. Standen.—*Judicial Commissioner*, S. Ismay, C.S.I.—*Public Works Department*, R. G. Kennedy.

A new province, the **North-West Frontier Province**, was created in Nov. 1901 out of the four trans-Indus districts of the Punjab, including the districts of Peshawar, Kohat, Bannu, and Dera Ismail Khan, with the tribal country beyond them, and the political agencies of Dir, Swat, Chitral, the Khaibar, the Kuram, Tochi and Wana. The province was put under a Chief Commissioner resident at Peshawar, aided by a Revenue and a Judicial Commissioner. *Area*, 16,466 sq. m.; *pop.* 2,125,480.

**Chief Commissioner**, Lieut.-Col. H. A. Deane. C.S.I.—*Judicial Commissioner*, C. E. F. Bunbury.—*Revenue Commissioner*, M. F. O'Dwyer.—*Inspector-General of Police*, C. G. W. Hastings, C.I.E.

**The Andaman and Nicobar Islands** (area, 3188 sq. m., *pop.* 24,649, including 1882 Andamanese, 6511 Nicobarese, and 16,256 resident in the convict settlement) lie in the Bay of Bengal. They are administered by a Chief Commissioner. The Andamans contain valuable forests, and the Nicobars produce coconuts. The convict settlement is in the Andaman Islands.

**Chief Commissioner**, W. R. H. Merk, C.S.I.

**Ajmere-Merwara** (area, 2711 sq. m., *pop.* 476,912) (in Rajputana) has a population consisting mainly of Hindus, though there are 72,000 Mahometans.

**Chief Commissioner**, Sir A. H. T. Martindale, K.C.S.I.

**Coorg** (area, 1582 sq. m., *pop.* 180,607) is another minor district. **Chief Commissioner**, Sir J. A. Bourdillon, K.C.S.I. (Resident at Mysore).

**Baluchistan** is a country in southern Central Asia, lying to the south of Afghanistan, and extending to the Persian Gulf. Persia is on the west and British India on the east. It includes (1) **British Baluchistan**, consisting of Quetta and the Bolan, held on a perpetual lease from the Khan of Kelat since '83, Sibi, Pishin and other districts assigned to Britain by the treaty of Gundamak, etc.; (2) the Native States of Kelat and Las Bela; and (3) the Tribal Areas inhabited by the Marri and Bugti tribes. The total area is about 132,315 sq. m.; population some 1,050,000 tribesmen. The British territory is now administered from Quetta as the headquarters by the Agent to the Governor-General. It has an area of 45,804 sq. m.; *pop.* 308,246. There are five administrative districts under Political Agents, one of whom is also Agent for Kelat. The principal chief of the native states is Sir Mir Mahmud Khan, G.C.I.E., Khan of Kelat, who receives an annual subsidy from the Indian Government of 100,000 rupees a year. He succeeded his father in '93. The ruling chief of Las Bela is Jam Mir Kamal Khan, who succeeded in '96. Kelat has an area of 73,025 sq. m.; *pop.* 637,127. Area of **Las Bela** 6357 sq. m.; *pop.* 56,109. The country is of great strategic importance, commanding the numerous passes to the south of the great caravan route through the Gomal to Ghuzni, Kabul, and Kandahar. A railway is being constructed from Quetta to Nushki, a distance of 93 miles along the trade route to Seistan. The Khan of Kelat in 1903 leased the Naisarabad Niabat lands along the

Upper Sind frontier and the Manjuti lands to the north of Naisarabad to the Indian Government in perpetuity for an annual rent of £7833 6s. 8d. per annum. The Tribal Areas cover 7129 sq. m.; pop. 39,000.

Agent to the Governor-General, Col. C. E. Yate, C.S.I., C.M.G., I.A.

**Bhutan** is a small independent state in the Eastern Himalayas, bounded on the north-east and north-west by Tibet and on the south by British India. The population is mostly Bhuddist and Mongolian. Part of Tibet runs between Sikkim and Bhutan, and forms the valley of Chumbi, through which is the best route from India to Tibet. The Indian Government pay the leading chiefs a subsidy of 50,000 rupees. Area, 17,000 sq. m.; pop. about 25,000.

**Nepal** A kingdom in the Himalayas, with Tibet on the north, Sikkim on the east, and British India on the south and west, which is independent, but maintains friendly relations with the Indian Government, who have a Resident at the capital, **Katmandu** (pop. 50,000). The population is of mixed character, but the Ghoorkas predominate. The ruler is the Maharajah Dhiraj, born August 8th, '75, and succeeded in '81. Area about 54,000 sq. miles; pop. estimated at from 2,000,000 to 5,000,000.

Resident (at **Katmandu**), Lieut.-Col. C. W. Ravenshaw.

**Sikkim** is a feudatory state in the Himalayas, bounded on the north and east by Tibet, on the south by Darjiling, and on the west by Nepal. It is under the protection of Great Britain, which controls both its foreign relations and internal affairs, a Political Agent advising the Maharaja and his Council. Trade with Tibet is carried on through Sikkim. Area, 2818 sq. m.; pop. 59,014.

### Native States in India.

The native or feudatory states occupy more than one-third of the country. The British Government has control over them, but not of the direct character which it exercises over the wholly British territory. Some, but not all, of these states pay tribute to the supreme Government. The nature of British control over these states varies, and is exerted chiefly through a Political Resident, who assists the native prince. These princes can manage their internal affairs, but have no power to make war or peace. Their external relations are in the hands of the Supreme Government, and they can only maintain a limited military force. The census of India (1902) gave the area and population of these states as follows:—

	Area.	Pop. 1901.
Haidarabad . . .	82,698	11,141,142
Baroda . . .	8,099	1,952,692
Mysore . . .	29,444	5,539,399
Jammu and Kashmir . .	80,900	2,905,578
Rajputana . . .	127,541	9,723,301
Central India . . .	78,772	8,628,781
Bombay States . . .	65,761	6,908,648
Madras " . . .	9,969	4,188,086
Central Provinces . .	29,435	1,996,383
Bengal States . . .	38,652	3,748,544
United Provinces . .	5,079	802,097
Punjab " . . .	36,532	4,424,398
Baluchistan . . .	86,511	308,246
Total . . .	679,393	62,769,795

Residents: At **Baroda**, Lt.-Col. M. J. Meade, C.I.E., I.A.; at **Hyderabad**, Lt.-Col. Sir D. W. K. Barr, K.C.S.I., I.A.; at **Kashmir**, E. G. Colvin, I.C.S.; at **Mysore**, Sir J. A. Bourdillon, K.C.S.I., I.C.S.

### History, 1904.

Early in February a Blue Book (Cd. 1931) was issued stating the views of the Government of India on the question of Preferential Tariffs. The Government's conclusions were (1) that without any such system India already enjoyed a large measure of the advantages of the free exchange of imports and exports; (2) that India had something, but not perhaps very much, to offer to the Empire; that she had very little to gain in return, and that she had a great deal to lose or risk; (3) that the danger to India of reprisals by foreign nations, even if eventually unsuccessful, was so serious, and their results would be so disastrous, that the Indian Government would not feel justified in embarking on any new policy of this kind unless assured of benefits greater and more certain than any which had, so far, presented themselves. At the same time it was pointed out that India's import tariff and her readiness, if need arose, to differentiate against the goods of a hostile country had enabled her to negotiate with France in 1900 and with Russia in 1903.

The Legislative Council, after a second sitting, lasting 3 days, passed the **Universities Bill** (March 21st). By this Bill, the system of competitive examination for the public services was abolished in favour of a system of selection of candidates on probation, the Government having come to the conclusion, after a lengthy trial in Bengal, that the system of open competition for Indians was not a suitable method of recruiting the public services under existing conditions. The native members opposed the Bill, and brought forward 65 amendments, but they were all rejected.

In the course of a debate on the **Budget**, which was presented (March 23rd) and showed estimated revenue 1904-5 £80,143,600, and estimated expenditure £79,229,900, Lord Curzon made a speech in which he reviewed the work of the 5 years of his Viceroyalty, and announced that he should return to India after his visit home for another period of 5 years. He hoped to obtain the creation of a new post—a member of Council to represent Commerce and Industry. As to frontier policy he defended the system of employing levies of border police, and explained the Government's guiding policy thus: "India is like a fortress, with the sea as a moat on two sides and mountains on the third. Beyond the walls is a glacis of varying breadth and dimensions. We do not want to occupy it, but we cannot afford to see it occupied by a foe. We are quite content that it should remain in the hands of allies and friends, but, if unfriendly influences creep up and lodge under our walls, we are compelled to intervene, because danger would thereby grow up and menace our security. This is the secret of the whole position in Arabia, Persia, Afghanistan, Tibet, and Siam."

Referring to the aspirations of native Indians to play a larger part in the public life of the country, he said the country was not yet ready for this, though during the last 36 years the natives had been given a remarkably large share of civil posts. Out of 26,903 appointments, carrying salaries ranging from £60 to £800 per

annum, 5,205 were held by Europeans, 5,420 by Eurasians and 16,283 by Indians. As to the internal development of India, Lord Curzon said that during his Viceroyalty the revenue had risen from £68,500,000 in '99 to £83,000,000 in 1904, and the surpluses had averaged £3,000,000 per annum. The financial position was sound, credit had improved, and industrial activity was increasing.

Lord Curzon left for England on leave (April 30th), Lord Amptill, Governor of Madras, assuming the Viceregal functions during his absence. Mr. Brodrick introduced the Indian Budget in the House of Commons (Aug. 12th), and Sir Henry Fowler stated that in his opinion the financial condition of India was marvellously satisfactory. Mr. Brodrick announced the constitution of a Railway Board, and the appointment of an extra member of the Viceroy's Council to deal with Commerce, and a Bill for this purpose was carried through Parliament.

In the article on CHINA, an account of the Mission sent by the Government to Tibet will be found. In the British Parliament in Feb. 1904, the point was raised, before there had been any fighting, whether the sending of the Mission was not a contravention of the Act of 1883, which provided that the Indian Government should not use its funds for the purpose of an expedition outside the boundaries of India. The reply given by Lord Lansdowne was that, inasmuch as the Mission was not a military operation, it did not contravene the Act. He said afterwards that the object of the Mission was to make a new Convention with Tibet and China. On April 12th Mr. Balfour announced in the House of Commons that recent events made it necessary to ask the House to sanction the employment of Indian troops beyond the Indian frontier, and a resolution to that effect was passed on April 13th by 270 votes to 61. Mr. Balfour said that Russia had declared that Tibet was outside her sphere of influence, and he accepted that declaration absolutely. On the Indian Budget, August 12th, Sir M. Bhowaggee moved that a substantial proportion of the cost of the expedition should be defrayed by the British Exchequer, but afterwards withdrew his motion. In the course of the discussion Mr. Brodrick said that there would have to be an indemnity of some description, but there was no intention of occupying the country permanently, or of establishing a protectorate, or of stationing a Resident at Lhasa.

### III. COLONIES, PROTECTORATES, ETC.

#### COLONIAL OFFICE.

The authority of the Crown throughout our colonial dependencies is exercised by the Secretary of State for the Colonies, now the Rt. Hon. Alfred Lyttelton, M.P., who took office in Mr. Balfour's Government in Oct. 1903. Governors of colonies are selected from those whose names he submits for the King's approval; the enactments of all colonial legislatures come before him for approval or disallowance, and in some cases the veto has been exercised; and in his office the constitution of new colonial legislatures is planned. The direct executive action of the department is mainly confined to Crown colonies, protec-

torates, etc. (for a full list of which see table, pp. 52-5). In the self-governing colonies the department is the channel of communication in regard to all matters arising in the Colonies affecting foreign powers and matters of general Imperial concern. An Emigrants' Information Office (*q.v.*) is attached to the department. Colonies having responsible governments are represented in London by Agents-General. The names and offices of the various Agents-General will be found under the alphabetical headings of the various colonies which they represent. The British Settlements Act '87 enables His Majesty in Council to provide for the government of his possessions acquired by settlement, and by Order in Council to establish all such laws and institutions, and constitute such courts and officers, and make such provisions and regulations for the administration of justice, as may appear to be necessary.

Permanent Under-Secretary of State, Sir Montagu F. Ommamney, G.C.M.G., K.C.B., I.S.O.  
Parliamentary Under-Secretary of State, The Duke of Marlborough, K.G.

Assistant Under-Secretaries, Frederick Graham, C.B.; R. P. Lucas, C.B.; (Legal) Hugh B. Cox, C.B.; R. L. Antrobus, C.B.  
Librarian, C. Atchley, I.S.O.  
Chief Registrar, W. F. Westbrook.

#### Crown Agents for the Colonies.

The Crown Agents for the Colonies act as commercial and financial agents in the United Kingdom for all the Crown Colonies, for the government of which the Colonial Secretary of State is by the necessities of their constitution ultimately responsible. They receive instructions directly from the Colonial Governments, only referring to the Colonial Secretary when they have reason to think that he has it under consideration to suspend or modify a particular work or service. The expenditure for articles supplied by the Crown Agents requires the sanction of the Colonial Secretary, but the responsibility for this rests upon the Colonial Governments and not upon the Crown Agents. The following are the Colonies and Protectorates for which the Crown Agents transact business in this country: Antigua, Bahamas, Barbados, Basutoland, Bechuanaland Protectorate, Bermuda, British Guiana, British Honduras, Central Africa Protectorate, Ceylon, Cyprus, Dominica, East Africa Protectorate, Falkland Islands, Fiji, Gambia, Gibraltar, Gold Coast, Grenada, Hong Kong, Jamaica, Lagos, Leeward Islands, Malta, Mauritius, Montserrat, Newfoundland, Northern Nigeria, Southern Nigeria, Orange River Colony, St. Helena, St. Kitts-Nevis, St. Lucia, St. Vincent, Seychelles Islands, Sierra Leone, Somaliland Protectorate, Straits Settlements (Singapore, Penang and Malacca, and Native States of Perak, Selangor, Pahang, Negri Sembilan); Transvaal, Tobago, Trinidad, Turks Islands, Uganda Protectorate, Virgin Islands, and Wei-Hai-Wei. The Crown Agents also act as Agents for the South African Constabulary, the Uganda Railway, the Central South African Railways, the King's African Rifles, and the West African Frontier Force.

The Crown Agents who transact business in London on behalf of the Crown Colonies are Sir E. E. Blake, K.C.M.G., Major M. A. Cameron, C.M.G., late R.E. W. H. Mercer, Esq., C.M.G.,

and the offices are at Whitehall Gardens, S.W., and 1, Tokenhouse Buildings, E.C.

*Secretary, A. B. Keith, M.A.—Chief Clerk and Accountant, E. G. Antrobus,—Registrar, T. S. Dunn, I.S.O.—Chief Cashier, L. Adams,—Head of Engineering and Works Branch, Capt. J. F. Carmichael, R.E.—Head of Engineering Inspection Branch, A. M. Heath, A.M.I.C.E.—Head of General Stores Branch, H. F. Smith.—Head of Shipping Branch, N. Hardingham, I.S.O.—Head of Correspondence Branch, G. Hodgson.—Head of Appointments Branch, H. Martin.*

### Colonial Officers and Trade Inquiries.

The following officers have been designated in the Colonies to receive and answer commercial inquiries addressed to them, either by the Commercial Intelligence Branch of the Board of Trade, or by British merchants and traders who may seek advice :—

Antigua—Treasurer, Antigua.  
Bahamas—Colonial Secretary, Nassau.  
Barbados—Colonial Secretary, Bridgetown.  
Basutoland—Government Secretary, Maseru.  
Bechuanaland Protectorate—Vernon Eason, Francistown.  
Bermuda—Colonial Secretary, Bermuda.  
British Guiana—Controller of Customs, Georgetown.  
British Honduras—Colonial Secretary, Belize.  
British North Borneo—Superintendent of Customs, Sandakan.  
Cape Colony—Mr. E. J. Cattell (Secretary Chamber of Commerce), Capetown; J. S. Neave (Secretary Port Elizabeth Chamber of Commerce), Port Elizabeth.  
Dominica—Treasurer, Dominica.  
Falkland Islands—Colonial Secretary, Stanley.  
Fiji—Assistant Colonial Secretary, Suva.  
Gambia—Collector of Customs, Bathurst.  
Gibraltar—Colonial Secretary, Gibraltar.  
Gold Coast—Colonial Secretary, Accra.  
Grenada—Collector of Customs, Grenada.  
Hong Kong—Harbour Master, Hong Kong.  
Jamaica—Colonial Secretary, Kingston.  
Lagos—Colonial Secretary, Lagos.  
Mauritius—Collector of Customs, Port Louis.  
Montserrat—First Treasury Officer, Montserrat.  
Natal—Collector of Customs, Durban; A. D. C. Agnew, Custom House, Point Natal.  
New Zealand—Secretary for Industries and Commerce, Wellington, New Zealand.  
Orange River Colony—J. H. Meiring, Collector of Customs, Bloemfontein; R. H. Dumaresq and C. Selby-Lowndes (Inspectors for the Land Settlement Board), Bloemfontein.  
St. Kitts-Nevis—Assistant Treasurer, St. Kitts.  
St. Lucia—Administrator, St. Lucia.  
St. Vincent—Supervisor of Customs, St. Vincent.  
Seychelles—Administrator, Seychelles.  
Sierra Leone—Colonial Secretary, Freetown.  
Southern Nigeria—Secretary to the Government, Calabar.  
Straits Settlements—Registrar of Imports and Exports, Singapore.  
Transvaal—Hon. R. H. Brand, Office of the High Commissioner, Johannesburg; Chas. A. C. Tremeer, D.S.O., Johannesburg.  
Trinidad—Collector of Customs, Trinidad.  
Victoria—Secretary to the Premier of Victoria, Melbourne.  
Virgin Islands—Commissioner, Virgin Islands.

It is suggested that, in all cases, commercial inquiries should go through the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C., as the information may sometimes be already available at that Branch.

## COLONIES IN EUROPE.

**Gibraltar.** Ruled as a Crown colony by the military Governor. The name is a corruption of *Jebel el Tarik*, the Mount of Tarik. Anciently *Calpe*, one of the pillars of Hercules. Is a rocky promontory,  $2\frac{3}{4}$  miles long and with an extreme breadth of  $\frac{3}{4}$  mile, on the south of Spain, connected with Andalusia by a low isthmus, and is a British fortress and the "key" of the Mediterranean. Area,  $1\frac{1}{2}$  sq. m.; pop. 25,692, including a garrison of 6660 men. The rock rises to 1439 feet, and is impregnable fortified. The town lies within the bay, on the western side. Anchorage is bad. The port is free, and is the *entrepôt* of a considerable trade between North Africa and the United Kingdom. An enclosed harbour and graving docks are being constructed. (See ENGINEERING.) It is also a coaling station of first-rate importance.

Governor and Commander-in-Chief, Field-Marshal Sir George S. White, G.C.B., G.C.S.I., G.C.M.G., G.C.I.E., G.C.V.O., V.C.—Colonial Secretary, Fred. Evans, C.M.G., C.V.O.—Treasurer and Collector, A. C. Greenwood.—Chief Justice, Sir S. H. Gatty.—Attorney-General, A. M. Coll, K.C.

**Malta.** A Crown colony. Anciently *Melita*. Situated in the Mediterranean, 56 miles south of Sicily. With smaller islands, Gozo and Comino, area 117 sq. m., pop. 184,742, excluding the garrison of about 10,115. Malta itself contains about 158,000 inhabitants. Capital, *Valetta*, pop. 50,000, a fine city, impregnable fortified, commanding a noble harbour. It is the chief naval and coaling station in the Mediterranean. Executive in the hands of a military Governor and Executive Council. The Council of Government consists of the Governor and the Vice-President, the Lieutenant-Governor and Chief Secretary, 9 official and 8 elected members, and chooses its own president. The Imperial Government in 1903 reduced the elected members to a minority in the Council because of their refusal to vote the estimates, in consequence of their views on the Education question. The elected members thereupon resigned, and repeated the procedure. In 1904 Letters Patent were issued dealing with the resignation of elected members, whereupon no members presented themselves for election. The Maltese, who speak Italian or English in the upper classes and a dialect of Semitic origin (derived from the Carthaginian and Arabic tongues) in the lower, are nearly all Roman Catholics, and the Government schools, which provide free primary education for children are Roman Catholic also. The chief products are cotton, wine, and corn. King Edward VII. visited the island in April 1903, and laid the foundation stone of a new breakwater at the entrance to the Grand Harbour.

Governor and Commander of the Troops, Gen. Sir C. M. Clarke, Bart., G.C.B., G.C.V.O.—Lieut. Governor and Chief Secretary to Government, E. M. Merewether, C.V.O., C.M.G.

**Cyprus.** An island and British colony in the Levant, 60 miles south of Asia Minor, and 40

west of Syria. Area, 3584 sq. m.; pop. 237,022, of whom 182,739 are Greek Christians and 51,309 Mahometans, and 130 military. Divided into six districts. Capital, Nicosia, pop. 14,752, inland. Chief produce, cotton, wine, caroubs, wheat, barley, wool, silk, spirits, sponges, raisins. The island is administered, under the agreement concluded between Great Britain and Turkey in '78, by a High Commissioner, with an Executive Council of 4 and a Legislative Council of 18, of whom 12 are elected. Under the same agreement an annual tribute of £92,800, with 4,166,220 oke of salt, is payable to the Sultan. An advance of £314,000 was sanctioned in '99 by the Imperial Government, under the Colonial Loans Act, '99, £254,000 for a harbour and railways and £60,000 for irrigation works. The railway is to connect the harbour to be made at Famagusta with the capital, Nicosia. There are 460 schools of all classes, with 22,738 scholars.

High Commissioner, Sir C. King Harman, K.C.M.G.

Executive Council: *Chief Secretary*, Capt. A. H. Young, C.M.G.—*King's Advocate*, W. Rees Davies.—*Receiver-General*, Lt.-Col. J. C. Gore.—*Additional Members*, the Bishop of Kitium, Theophanis Theodotou, and the Chief Cadi.

## COLONIES IN ASIA.

**Aden.** A town and territory on the S. coast of Yemen, Arabia, 110 miles east of the Straits of Bab-el-Mandeb, forming a British dependency. Total area, 80 sq. m.; pop. 41,222. Consists of a rocky promontory not unlike Gibraltar, joined to the mainland by a low isthmus, and is under a *Resident*, who acts as military and civil governor, subject to the Government of Bombay. The harbour, a very fine one, touched at by 1500 ships annually, is the *entrepôt* of trade between Europe and America on the one hand, and India, Southern Arabia and the east coast of Africa on the other. It is a coaling station for the British Navy, and as such is strongly fortified. In Nov. 1901 an agreement between Turkey and Great Britain was arrived at for the delimitation of the frontiers and spheres of influence between Yemen and Aden. The islands of Perim and Kuria-Muria off the coast of Arabia, and Socotra off the coast of Africa, are dependencies of Aden. Perim has an area of about five sq. miles, and is used as a coaling depôt for the Mercantile Marine. Socotra has an area of 1382 sq. miles, and a population of 12,000 of Arab descent. Capital, Tamarida. Products, aloes, dates, figs, etc.

Political Resident, Major-Gen. H. M. Mason.

**Bahrein Islands.** These islands in the Persian Gulf have been under British protection since 1847. The chief town is Moharek, on the island of that name, pop. 22,000; but the commercial capital is Manameh, pop. 25,000. The ruling chief is Sheikh Esa. The British Political Resident resides at Bushire. The chief industry is pearl fishing, but dates and grain are also exported.

**British North Borneo** (area 31,000 sq. m., pop. 150,000) is not an official dependency, but is the property of the British North Borneo Company, to whom a royal charter was granted in '82. In '88 a formal protectorate was proclaimed over British North

Borneo. The administration of the territory is in the hands of a Governor, assisted by a Council, and by Residents appointed to preside over provinces and districts; the machinery being similar to that in Crown colonies. The British North Borneo Company sells or leases its lands to planters, and derives its revenues from the proceeds of sales and taxes. About 1,000,000 acres have been leased for the cultivation of tobacco, and the industry is rapidly developing. The cultivation of cotton is being encouraged, and the coconut and timber trade is extending. The chief town and seat of the administration is Sandakan; pop. 9500. A railway 57½ miles long, exclusive of sidings, runs from Jesselton, Gorga Bay, on the west coast, to Beaufort Junction in the interior. Thence another railway some 20 miles long runs to Weston, Brunei Bay. Beyond Beaufort another length of railway, 30 miles, is in progress to Fort Birch, farther in the interior.

Court of Directors: *Chairman*, Sir C. J. Jessel, Bart.; *Rear-Admiral* Sir Bouverie Clark, K.C.B.; *Frederick C. Stoop*, Esq.; *W. C. Cowie* (Managing Director); *E. Dent*; *J. A. Maitland*; *Major-General* Sir Alfred Turner, K.C.B.; and *G. H. Hildyard*.—*Secretary*, Harington G. Forbes.—*London Office*, 15, Leadenhall Street.

*Establishment: Governor and Commander-in-Chief of Labuan, and Principal Representative of the Company in North Borneo*, Edward Peregrine Gueritz.

*Consul-General*, (Singapore), Sir J. Anderson, K.C.M.G.

**Brunei**, or Borneo Proper, is an independent state in the island of Borneo lying north-east of Sarawak. Area about 3000 sq. m. Capital, Brunei, with a population of about 12,000. It is ruled by a Sultan, Hassim Jalud Alam Akamadin; but his authority is fast diminishing, and outside the capital the natives are generally in a state of passive rebellion. A protectorate was proclaimed over Brunei by England in '88. The internal administration is left to the Sultan, but all foreign relations are conducted by His Majesty's Government.

**Ceylon.** An island almost joined to the southern extremity of India by a chain of reefs and sandbanks called Adam's Bridge. Its extreme length is 266 miles, and its width 140 miles. It is a Crown colony. Area, 25,333 sq. m.; pop. 3,749,562 at end of 1903. Divided into nine administrative provinces. Capital, Colombo, pop. 158,228. Bulk of population Cingalese, then Tamil coolies, Moormen (Arabs), Eurasians, and Malays. Europeans about 9000. An aboriginal nomadic race, the Veddahs, occupy the interior, but they only number about 2000. The Government is in the hands of a Governor nominated by the Crown, an Executive Council of 5, and a Legislative Council of 17 members, which is composed of the Executive Council, 4 other official members, and 8 non-official members. Colombo, Kandy, and Galle have municipal government, and there are 18 local boards. The basis of the law is Roman Dutch, but the criminal law has been remodelled from the Indian Penal Code. There is an Imperial garrison of about 1700 men. Trincomalee is a fortified naval station, forming the headquarters of the British fleet in East Indian waters, and Colombo harbour is strongly fortified. The chief news-

papers are the *Observer* and the *Times*. More than half of the population are Buddhists. The Hindus number 828,622, and the Mahometans and Christians number about 248,000 and 362,000 respectively. Education is unsectarian, and in the case of vernacular schools free. Coffee was formerly Ceylon's principal product for export; now tea is the chief staple, and more attention is paid to cocoa, cocoanut and other palms. Grain and rice are cultivated, with cinnamon, caoutchouc, etc. Experiments are being made with cotton in the dry zones. Railways, owned and worked by the Government, extend 392 miles. On Nov. 1st, 1904, a railway, 68 miles long, to Anuradhapura was opened. The Maldivé Archipelago is tributary to Ceylon. It consists of groups of islets 500 miles west of Ceylon, inhabited by a Mahometan population estimated at 30,000. Mali is the chief island. The produce consists of millet, fruit, and cocoanuts. For Colombo Harbour Works see ENGINEERING.

Governor, Sir Henry Arthur Blake, G.C.M.G. Executive Council: *Lieut.-Governor and Colonial Secretary*, A. M. Ashmore, C.M.G.—*Commanding the Forces*, Col. (temporary Brigadier-General) G. L. C. Money, C.B., D.S.O.—*Attorney-General*, A. G. Lascelles.—*Auditor-General*, F. R. Ellis, C.M.G.—*Treasurer*, H. C. Nicolle.—*Clerk of Council*, J. J. Thorburn.—*Surveyor-General*, P. D. Warren.—*Principal Collector of Customs*, W. H. Jackson.—*Director of Public Works*, F. A. Cooper, C.M.G.

**Hong Kong.** An island and Crown colony, situated close to the mouth of the Canton river, and divided from the southern coast of China by the Ly-ee-moon pass. It was ceded to Great Britain in 1841, at the close of the opium war. The peninsula of Kowloon, opposite the island, and the small adjacent Stonecutter's Island, now strongly fortified, with other islets, appertain to the colony. Capital, *Victoria* (commonly called Hong Kong, pop. 300,000). Area, 32 sq. m.; pop. 335,000. In '98 a portion of territory adjacent to Kowloon, together with Mirs Bay and Deep Bay and the island of Lan-tao, were leased to Great Britain by the Chinese Government for ninety-nine years. The area leased is 376 sq. miles, and is administered as part of the colony: pop. 110,000. Government is in the hands of a Governor, with Executive and Legislative Councils, the latter including 7 official and 6 unofficial members, 4 of whom are nominated by the Governor. There are 12 free Government schools, and a large number of other aided schools, mostly carried on by the missionary societies. The island is our "Eastern Gibraltar," and is both a military and naval station, forming the headquarters of the China Squadron. There is an Imperial garrison of 8500 officers and men, including the Hong Kong Regiment, and the China Squadron includes about 48 vessels. It is also the great emporium for the European trade with China, and for the local coast trade, and is a free port. Imports, chiefly goods for China, cottons, and other manufactured articles; exports, tea, silk, and other Chinese produce.

Governor, Sir M. Nathan, K.C.M.G. Executive Council: *Officer commanding the Troops*, Major-Gen. Villiers Hatton, C.B.—*Colonial Secretary*, F. H. May, C.M.G.—*Attorney-General*, Sir H. Berkeley.—*Treasurer*, A. M. Thomson.—*Director of Public Works*, W. Chatham.—*Principal Civil Medical Officer*, Dr. J. M. Atkinson.—Sir C. P. Chater, C.M.G.; C. W. Dickson.

**Labuan.** An island and Crown colony, situated in a bay on the north-west coast of Borneo. Area 31 sq. m.; pop. 8411. The port and town is *Victoria*, pop. 1500. There are only about three score of Europeans resident, the population being composed mainly of Malays. By an arrangement between H.M. Government and the British North Borneo Company, the island has been administered since '89 by the Governor of the Company. The rainfall in Labuan is extraordinary, being 168 in. during the year. Extensive beds of coal exist in the island.

**Sarawak** lies on the north-west coast of the island of Borneo. Its area is 41,000 sq. m., and pop. 500,000; and in '88 it was constituted an independent state under the protection of Great Britain, all its foreign relations being conducted by H.M. Government. Capital, Kuching; pop. 25,000. Seaboard extends 380 miles. The government was handed over by the Sultan of Brunei in '42 to Sir James Brooke, who ruled as Rajah till '68, when he was succeeded by his nephew, His Highness the Rajah Sir Charles Johnson Brooke, G.C.M.G. The Rajah married, in '69, Margaret Alice Lily de Windt, and his heir is Charles Vyner Brooke, b. Sept. 26th, '74. Under the just and equitable rule of the Brookes, Sarawak has been reclaimed from barbarism. The chief exports are rubber, pepper, and sago flour. Coal is mined on a considerable scale, and gold is also worked.

**Wei-hai-wei**, which was leased to Great Britain by China by a Convention signed at Peking, July 1st, '98, is a city situated in a deep bay about 18 miles in circumference. The city is on the Shantung promontory, about 40 miles east of Chefoo, and lies nearly opposite Port Arthur. Wei-hai-wei Harbour is sheltered, and can accommodate a large number of vessels. Forts command the entrances to the harbour. With the city and harbour there passed under British jurisdiction the island of Liu-Kung, on the north side of the bay, and all other islands and waters in the bay, together with a belt of land 10 miles wide along the entire coast-line of the bay. The area is 285 sq. m., and the Chinese population is about 150,000, while the sphere of influence over which the British Government holds military rights has an area of 1500 sq. m. Gold and other minerals exist, but have not yet been worked to any extent. The only export is salt fish, sent to Southern China. The territory is administered by a Commissioner under the Colonial Office, which took it over from the Admiralty on Jan. 1st, 1901. The seat of government is Port Edward, on the mainland. The garrison consists of a Chinese regiment with a strength of about 550.

Commissioner, J. H. Stewart Lockhart, Esq., C.M.G. Government Secretary, R. Walter.

#### STRAITS SETTLEMENTS.

A Crown colony in the Malay Peninsula, deriving its name from the Straits of Malacca, which form the great trade route between India and China. Area about 1542 sq. m.; pop. 572,249, including 281,933 Chinese, 215,058 Malays, and 57,150 natives of India. The capital of the colony and seat of government is Singapore. The Governor is assisted by Executive and Legislative Councils, the first consisting of nine official members, and the second of these with seven non-official members, two of whom are nominated by the Chambers of Commerce of

Singapore and Penang. There are municipal boards partly elected and partly nominated by the Government at Singapore, Penang, and Malacca. The chief exports are tin, tapioca, copra, sago, rice, sugar, gambier, gums, and spices.

The constituent parts are as follows:—**Singapore**, an island off the southern extremity of the Malay Peninsula, area 206 sq. m., pop. 228,555. It is hilly and forested, fertile, and not unhealthy for Europeans. Chief local products, pepper and gambier. The city of Singapore is a great commercial centre for the East. It has a commodious harbour, protected by fortifications. It is the headquarters of H.M. military and naval forces in these regions. The garrison consists of two battalions of infantry and two garrison companies of artillery. The colony also maintains an armed police force of 2000 officers and men.—**Penang**, or **Prince of Wales' Island**, lies 360 miles north of Singapore, and about two miles off the coast of Province Wellesley. Area 107 sq. m., pop., including Province Wellesley and the Dindings, 248,207. The port and capital is Georgetown, better known as Penang. A Resident Councillor controls the administration. **Province Wellesley** is politically one with Penang. It stretches 45 miles along the coast of the mainland. Area 288 sq. m., pop. 108,117. **The Dindings**, about 80 miles south of Penang, consist of the island of Pangkor and a small strip of territory on the mainland, where is Lumut, the headquarters, with a fine harbour. Politically this settlement is a part of Penang. Area about 265 sq. m.—**Malacca** is a town and territory 240 miles south of Penang. Its coast, rocky and barren, extends 42 miles. Area 659 sq. m., pop. 95,487. It is ruled by a Resident Councillor, subject to the Governor of the colony. The chief export is tapioca. Included in the administration of the Straits Settlements are the **Cocos (or Keeling) Islands**, a small coral group lying some 700 miles S.W. of Java (area 9 sq. m., pop. 669), annexed to Singapore in 1903, and **Christmas Island**, which lies 200 miles S.W. of Java, and was annexed to Singapore in 1900.

### **The Protected Malay States.**

On the mainland there are several protected Malay States, which, though not part of the colony, are subject to the supervision of a **High Commissioner** (the Governor of the Straits Settlements), which is exercised through British Residents, who assist the native rulers in the administration of the States. Perak, Selangor, Pahang and Negri Sembilan agreed to form one administrative federation under a British Resident-General in July '96. These countries are rich in natural resources, and for several years Perak and Selangor have exported the greater part of the Straits tin, which now accounts for about 46,000 out of the world's annual output of 75,000 tons of tin. The greater part of the Straits output is smelted at Singapore and goes to America, and an attempt to buy and ship the ore to New York, and smelt it there, was met in 1903 by the imposition of a duty on all tin ore exported without such guarantee as the Resident might require that it would be smelted in the Colony. The soil is fertile, and there are vast areas of forest land available for conversion into plantations; but mining at present makes agriculture a secondary consideration. There are about 300 miles of railway, chiefly in Perak and Selangor. **Perak**,

on the western coast of the peninsula; area 7751 sq. m., pop. 329,665. Capital Taiping. The ports are Teluk Anson and Port Weld. **Selangor** adjoins Perak along its southern frontier; area 3200 sq. m., pop. 168,789. The capital is Kuala Lumpur (pop. 77,234), the largest town on the mainland of the Peninsula. Coffee and rubber are grown. **Sungei Ujong** and **Jejebu**, together with **Negri Sembilan**, the name given to a federation of nine small states lying to the north and east of Malacca, are administered by one Resident, who resides at Seremban. Area 4000 sq. m., pop. 96,028. Planting, especially of coffee, is progressing here. **Pahang**, the latest acquired and largest of the Malay States, contains a lot of gold, but needs funds for its development. Area 10,000 sq. m., pop. 84,113. **Johore** is an independent Malay State under Sultan Ibrahim, at the southern extremity of the peninsula. The foreign relations of the State, however, are in the hands of the British Government. Area 9000 sq. m., pop. about 200,000. Capital Johore Bharu. See table, pp. 52-5.

**Governor and Commander-in-Chief**, Sir J. Anderson, K.C.M.G.

**Executive Council:** The Governor; *Major-Gen. commanding H.M. Troops*, Sir A. R. F. Dordard, K.C.B., D.S.O.—*Sir Colonial Secretary*, F. G. Penney (acting).—*Resident Councillor of Penang*, J. K. Birch.—*Resident Councillor of Malacca*, F. G. Penney.—*Attorney-General*, W. R. Collyer.—*Treasurer*, R. N. Bland.—*Auditor-General*, E. C. Hill.—*Colonial Engineer*, A. Murray.

**Resident-General for Protected States**, W. T. Taylor, C.M.G. (acting).

## **BRITISH SOUTH AFRICA.**

The office of **High Commissioner in and for South Africa** was created by Letters Patent in 1878. He represents the Crown in all matters occurring in South Africa beyond the limits of the colonies therein. He is Governor of Basutoland, and controls the administration of the Bechuanaland Protectorate and of Rhodesia. In 1900 it was arranged that the office of High Commissioner should be held with that of Governor of the Transvaal and Orange River Colony. The expenses of the High Commissioner are borne partly by Imperial funds. Census returns issued in 1904 showed that in British South Africa, south of the Zambesi, the white population numbered 1,135,016, and the coloured population 5,198,175.

The South African Intercolonial Conference, representing Cape Colony, Natal, the Orange River Colony, the Transvaal, and Southern Rhodesia, held at Bloemfontein in March 1903, confirmed the principle of the total prohibition of the sale of intoxicating liquor to natives. A **Customs Convention** for the five Colonies was also agreed to, providing for preferential treatment to the extent of a 25 per cent. reduction in the general *ad-valorem* rates on British goods and the goods of such British colonies and possessions as should grant reciprocal privileges to the products and manufactures of South Africa. On all goods liable to an *ad-valorem* rate of only 2½ per cent. the reduction provided for was the whole of such rate. It was stipulated, however, that the goods should be *bonâ fide* manufactures of the United Kingdom.

High Commissioner, Viscount Milner, G.C.B., G.C.M.G.

General Officer Commanding, Lieut.-Gen. Sir H. J. T. Hildyard, K.C.B.

Inspector-General of S. African Constabulary, Lieut.-Col. J. S. Nicholson, C.B., D.S.O.

Commissioner for the Central South African Railways, (vacant). General Manager, T. R. Price, C.M.G.

Consul-General for S. Africa, Ernesto Storni.

**Basutoland.** A native province of British South Africa, situated to the north-east of Cape Colony. It lies inclosed between Natal, the Orange River Colony, and Cape Colony. Basutoland was disannexed from Cape Colony in 1884, and has since been administered by a Resident Commissioner, under the High Commissioner for South Africa. The chiefs adjudicate on cases between natives, appeals lying to the Magistrates' Courts, in which all cases between natives and Europeans are heard. A hut tax of £1 per hut is levied, and in 1903 was paid on 663,561 huts. Area, 10,293 sq. m.; pop. 348,848 in 1904, including 805 Europeans. Capital, Maseru; pop. 862. The country includes the finest grain-producing land in South Africa, gold and other minerals are believed to exist, and the climate is magnificent. The chief products are wool, wheat, mealies, and Kaffir corn. The natives keep large herds of cattle. The province is included in the South African Customs Union.

Resident Commissioner, H. C. Sloley.

**Bechuanaland Protectorate.** The Protectorate (area about 386,200 sq. m., pop. 120,776, including 1004 whites, in 1904) extends from the Molopo-river in the south northwards to the Zambesi, and is bounded on the east by the Transvaal colony and Matabeleland, and on the west by German South-West Africa. The administration is carried on by a Resident Commissioner, whose headquarters are at Mafeking, under the High Commissioner, with two Assistant Commissioners, one at Palapye and another at Gaberones. A mounted police force maintains order. There is also a small force of native police. The Protectorate includes the lands of Khama, chief of the Bamangwato, lying south-west of Matabeleland, of Sebele, chief of the Bakwena, of Bathoen, chief of the Bangwaketse, of Linchwe, chief of the Bakhatla, and of Motegosi, chief of the Bamalete. The boundaries of the territory assigned to each chief have been carefully designated, and a hut tax is levied. The railway from Cape Town to Kimberley is continued through Vryburg and Mafeking to Palapye, Tati, and Bulawayo.

Resident Commissioner for the Protectorate, R. C. Williams, C.M.G.; Assistant Commissioners, J. Ellenberger; Major Panzera.

### CAPE COLONY.

Cape Colony occupies the extreme southern portion of Africa. Its boundaries are: west, the Atlantic Ocean; north, the Orange river and the Bechuanaland Protectorate; east, the Orange River Colony, Basutoland, and Natal; south, the Indian Ocean. The area of the colony is 276,995 sq. m., and the pop. 2,409,804. Whites number 579,741, and those of other than European or white races 1,830,063. Capital, Cape Town, pop. 87,483; other chief towns, Port Elizabeth, pop. 23,266, the chief commercial port;

Grahamstown, pop. 10,498, the capital of the eastern province; Kimberley, pop. 28,718, the seat of the diamond trade; Queenstown, King Williamstown, and Panmure, or East London. Simon's Bay is an Imperial naval station 22 miles south of Cape Town. The Transkeian Territories and Walfisch Bay have some separate provincial status. The Transkeian Territories are ruled by resident magistrates under the direct control of the Government of the colony; and Walfisch Bay (pop. 1015), an isolated port on the coast of Damaraland, is also administered by a resident magistrate. Pondoland, which up till then had been a protectorate, became an integral portion of the colony in March '94, and the Crown colony of Bechuanaland in '95.

The Executive is in the hands of a Governor with a responsible Ministry of five principal ministers. The Parliament consists of a Legislative Council of 26 members, and a House of Assembly of 107 members. Members of the Legislative Council are elected for seven years, and of the Assembly for five years. The members of both Houses are paid £1 1s. per day. The electors are the same in each case, and are qualified as occupiers of property worth £75, or receiving a salary equivalent to £50. The laws are founded on a modification of the Roman-Dutch Law. Both English and Dutch languages are used in Parliament and the Courts. The Colony possesses a complete system of local self-government, 74 elective councils maintaining the roads, and having powers as to public works, licensing and police in all the 77 divisions. There are also 104 municipal councils and 78 village management boards.

As to Education, there is a University at Cape Town (Royal Charter 1877), and there are more than 2600 State-aided elementary schools, besides private and religious institutions; but education is not compulsory. There is no State Church. The principal denominations are Dutch Reformed, Episcopalian, Independent, Presbyterian, Wesleyan, and Roman Catholic. There is an important Admiralty establishment at Simon's Bay, and Table Bay is strongly fortified. The colony possesses 2317 miles of Government railway open, 587 miles of privately owned lines worked by Government, and 235 miles of line privately owned and worked. Government lands are granted, leased, or may be rented on easy terms. The chief minerals worked in the colony are copper, coal, and gold. The chief diamond fields are at and near Kimberley, in Griqualand West, and their export in 1902 was valued at £5,427,360. Agricultural operations include the production of wool, wine, wheat and other cereals, and the breeding of horses, cattle, sheep, and ostriches. There are valuable forests. The principal exports are gold, diamonds, wool, mohair, ostrich feathers, hides and skins, copper ore, and aloes. The chief newspapers are the *Cape Times* (London office: 158, Leadenhall Street); the *Argus* (which supports the Government, and is published by a company that also publishes the *Johannesburg Star*, the *Bulawayo Chronicle*, etc.), the *South African News*, the *Diamond Fields Advertiser*, and *Ons Land*, which is the paper of the Dutch colonists.

Revenue, 1903-4, £9,910,141; expenditure, £10,849,904. Imports, 1903-4, £27,658,132; exports, £27,019,913. Public debt, 1903, £36,49,249.

**Government.**

Governor and Commander-in-Chief, Hon. Sir Walter Francis Hely-Hutchinson, G.C.M.G.

**Ministry:** *Premier*, The Hon. Dr. L. S. Jameson, C.B., M.D., M.L.A.—*Treasurer*, The Hon. E. H. Walton, M.L.A.—*Colonial Secretary*, The Hon. Col. C. P. Crewe, C.B., M.L.A.—*Attorney-General*, The Hon. Victor Sampson, M.L.A., K.C.—*Commissioner for Public Works*, The Hon. Dr. T. W. Smartt, M.L.A.—*Secretary for Agriculture*, The Hon. A. J. Fuller, M.L.A.—*Minister without Portfolio*, Hon. Sir Lewis L. Michell, M.L.A.

**Permanent Officials:** *Under Colonial Secretary*, Noel Janisch, Esq.—*Assistant Treasurer*, W. A. Collard, Esq.—*General Manager of Railways*, T. S. McEwen, Esq., C.M.G.—*Secretary for Public Works*, L. Mansergh, Esq.—*Secretary Law Department*, John Graham, Esq., C.M.G.—*Under-Secretary for Agriculture*, Charles Currey, Esq.

**Commandant-General of Cape Colonial Forces**, Colonel H. T. Lukin, C.M.G., D.S.O.

**Agent-General in London**, Sir Thomas E. Fuller, K.C.M.G., 100, Victoria Street, S.W.—*Secretary*, T. Slingsby Nightingale, Esq.—*Emigration Agent*, W. C. Burnet, Esq.

**History, 1904.**

The General Election for the House of Assembly took place during February. Sir J. Gordon Sprigg was defeated at East London, Mr. Merriman at Wodehouse (though a seat was afterwards found for him by the Bond), and other members of the Ministry elsewhere. In the result the Progressives, led by Dr. Jameson, secured a majority of 5 in the House of Assembly. Sir J. Gordon Sprigg accordingly resigned (18th), and Dr. Jameson was asked by the Governor to form a Cabinet, a task in which he succeeded (21st). The Governor opened Parliament (March 4th), and in his speech announced Bills for dealing with the representation of the people, repealing the Peace Preservation Act, and preventing Chinese immigration into the Colony. Owing to the severe depression which existed, strict economy was called for in the estimates for the ensuing year. The Redistribution Bill was then introduced and read a first time. It provided for 3 additional seats in the Council and 12 in the House of Assembly, distributed mainly among the principal towns. The Bond Congress strongly and unanimously condemned the Bill, and the Bond members doggedly opposed it in the House, but finally the debate was closed and the second reading was carried by 42 votes to 34 (29th). The Bill passed the Committee stage without amendment (April 15th), and the Legislative Council approved it (21st). A Bill excluding Chinese indentured labour from the Colony passed its second reading (May 2nd). Mr. Walton made his Budget Statement (3rd), and estimated the deficit for the year ending June 1904 at £825,864, and for June 1905 at £675,339. They could not wisely retrench, so they must resort to taxation; and he proposed Excise duties on spirits and beer, and a graduated income tax, with exemption for incomes below £500, 6d. on incomes between £500 and £1000, and 1s. on incomes above £1000. The Chinese Exclusion Bill was read a third time (May 27th). Amendments were agreed to making the Bill applicable to all Chinamen except British

subjects, and forbidding the issue to uncertified Chinamen of liquor, mining, dealers', importers', or hawkers' licences, or their entry on contract as mining or agricultural labourers, domestics, or laundrymen. The Bill forbids the issue of certificates of naturalisation to the Chinese. The elections for the additional seats took place in July, and still further strengthened the Government majority.

**NATAL.**

A British colony situated on the south-east coast of Africa, discovered by Vasco da Gama on Christmas Day 1497, and hence named *Terra Natalis*. Seaboard extends a distance of about 376 miles. Portuguese East Africa and the Transvaal border the colony on the north, Orange River Colony and Basutoland on the west, and Cape Colony on the south-west. **Area**, including Zululand, Amatongaland, and the Vryheid, Utrecht and Wakkerstroom districts transferred from the Transvaal in 1902, 36,434 sq. m.; **pop.** (1904) 1,108,754, including 97,109 whites, 100,918 Indians and Asiatics, 6686 mixed races, 79,978 natives in service, and 824,063 natives in locations and areas. **Capital**, Pietermaritzburg, pop. 31,199; the only port is Durban, with a pop. of 67,842.

Zululand and British Amatongaland, which had formerly been administered as a dependent protectorate, were in Dec. '97 made an integral part of the colony. The area of Zululand is about 10,500 sq. m.; **pop.** 181,000, including 1100 whites. It has 210 miles of seaboard. Gold and other minerals have been found in no inconsiderable quantities, but they have not been worked as yet.

The Transvaal Districts transferred, in 1902, as mentioned above, had an area of 7234 sq. m., and a pop. of 80,250.

Natal is administered by a Governor, a Ministry of 6, a Legislative Council of 12 members, appointed for ten years by the Governor, with the advice of the Ministry, and a Legislative Assembly of 39 members, elected for four years by voters having a property qualification of £50, or paying £10 rent per annum, or having an income of £96. For local government there are municipal corporations at Durban, Pietermaritzburg, Newcastle, Ladysmith and Dundee, and local boards at Verulam, and Greytown. Many natives live apart in locations provided for them by the Government, about 2,250,000 acres of land being vested for this purpose in the Native Trust. In 1900 there were 223,000 natives on such lands, and at the same time about 300,000 living as tenants on Crown or private lands. Further there are about 205,000 natives residing on Crown lands in Zululand. A Native High Court administers civil justice, and deals with all political crimes and crimes arising out of native law and custom—ordinary crimes falling under the ordinary criminal law. Natives can acquire the franchise under certain conditions.

Religion is well provided for by denominational bodies, but no State aid. There are 32 Government primary schools; and a large number of other primary and secondary schools, for both European and native children, are aided and inspected by the Government. The chief products of the colony are wool, cereals, coal (a rapidly growing industry), iron, and sugar. The coal deposits are in the northern portion of the colony, the Dundee district being the best developed area. The output

in 1901 was valued at about £550,000. There are 626 miles of railway constructed, and worked by the Government. The chief newspapers are the *Natal Mercury*, the *Natal Witness*, and the *Times of Natal*.

Revenue, 1902-3, £4,334,175; expenditure, £5,039,003; exports, 1903, £10,454,229; imports, £15,274,096; debt, 1903, £14,019,143.

Governor, His Excellency Sir Henry McCallum, G.C.M.G.

Ministry: Premier and Colonial Treasurer, Sir George Morris Sutton, K.C.M.G., M.L.C.—Attorney-General, Hon. G. A. de R. Labistour.—Colonial Secretary and Education, Hon. W. L. Estrange, J.P., M.L.A.—Native Affairs and Public Works, Hon. George Leuchars, M.L.A.—Agriculture, Hon. G. A. Clayton, M.L.A.—Railways and Harbours, Hon. J. G. Maydon, M.L.A.

Legislative Council: Messrs. Crawford (President), Jameson, A. M. Campbell, F. T. Angus, C. J. Labuschagne, D. C. Uys, M. Campbell, Sutton, Kirkman, Turner, and Baynes.

Agent-General in London, The Hon. Sir William Arbuckle, 26, Victoria Street, Westminster, S.W.—Secretary to Agency, R. Russell, Esq., M.A., B.C.L.

### ORANGE RIVER COLONY.

Founded by Boers who trekked from Cape Colony in 1836, and recognised in '54 as an independent Dutch republic under the title of the Orange Free State. Under the terms of a treaty made with the Transvaal in '97, and the pressure of President Steyn, the Government of the Free State threw in their lot with the Transvaal Government in Oct. '99, and the first act of hostility in the Boer war was committed by Free State forces. The country was, on May 28th, 1900, formally annexed by Great Britain after its occupation by Lord Roberts, proclaimed as the Orange River Colony, and put under military rule, Lord Milner being appointed as Governor both of the Orange River and the Transvaal Colonies, with a Lieutenant-Governor at Bloemfontein. Executive and Legislative Councils were also established. Roman-Dutch law prevails, and there is an Appeal Court independent of that in the Transvaal. The predominant religion is that of the Dutch Reformed Church, supported by the State. By the end of 1902 11,684 children were under instruction in the schools established by the Government. The country is not well suited for agriculture, but good grazing is afforded by the rolling plains, of which it chiefly consists, and stock and sheep farming are extensively carried on. Coal is abundant in the north of the colony, and diamond mines exist. There are about 500 miles of railways, which are placed under the control of the Intercolonial Council (q.v.). The chief newspaper is the *Bloemfontein Post*. The South African Constabulary police the country (London office: King's Court, Broadway, Westminster).

A Boer Congress was held at Brandfort (Dec. 2nd, 1904). It resolved to demand the publication of a full statement as to the distribution and administration of the Compensation Funds. Other resolutions dealt with the language, education, and constabulary questions, and finally a demand for responsible government was put forward.

Area estimated at 48,326 sq. m.; pop., according to the 1904 census, 385,045, of whom 143,419 were whites and 241,626 coloured persons. Of

the whites 81,761 were males and 61,658 females. Capital, Bloemfontein, pop. 33,890, including town 25,873 troops 3487, and 4530 civilians, etc., with troops. Other chief towns are Harrismith (5306), Kroonstad (5797), Jagersfontein (5650), and Ladybrand (3207). Revenue, 1902-3, £563,300; 1903-4, £875,137; expenditure, 1902-3, £558,685; 1903-4, £807,300; imports, 1902-3, £2,459,682; 1903-4, £3,841,421; exports, 1902-3, £284,703; 1903-4, £1,405,530.

Governor, Viscount Milner, G.C.B., G.C.M.G. Executive Council: Lieutenant-Governor, Brigadier-Gen. Sir H. J. Gooltd-Adams, K.C.M.G., C.B.—Colonial Secretary, H. F. Wilson, C.M.G.—Treasurer, A. Browne, I.S.O.—Collector of Customs, J. H. Meiring.—Attorney-General, H. F. Blaine, K.C.—Director of Agriculture, C. W. Palmer.—Chief Justice, A. F. S. Maasdorp.

### TRANSSVAAL.

The Transvaal lies N. of the Vaal river and S. of the Limpopo river. It is bounded W. by Bechuanaland; E. by Portuguese East Africa and Zululand; S. by Natal and Orange River Colony. Area, 113,642 sq. m.; pop. (1904) 1,354,200, of whom 300,225 were whites, 1,030,029 aboriginal natives, and 23,946 of other coloured races. The population of the Johannesburg municipality in 1904 was returned as 75,904, and of Pretoria municipality as 15,539. The population of the Transvaal, excluding Swaziland, was, in 1904, 1,268,716, and of this number 991,383 were resident in rural, and 263,184 in urban areas, 14,149 being accounted for by the regular military forces.

Swaziland, which passed with the Transvaal under British rule in 1900, and now forms part of the Transvaal, is bounded on the east by the Delagoa Bay territory of Portuguese East Africa and Tongaland, which intervene between it and the coast. Area, 8,000 sq. m.; pop. 84,586. Capital, Embabaan. It is a mountainous tract stretching along the Limpopo range, with richly fertile valleys, and its mineral wealth is great, valuable fields of gold and coal being included in it, while its agricultural and pastoral resources are also great. The Swazi are a section of the Zulu race. By an Order in Council, Aug. 7th, 1903, the appointment of a Resident Commissioner, with Assistant Commissioners, judges, and other officers to administer justice and collect taxes, was authorised. A Proclamation was issued (Oct. 3rd, 1904) providing for the administration of the country and for the establishment of magistrates' Circuit Courts. The jurisdiction of the paramount and other chiefs is retained in all civil disputes in which only aboriginal natives are concerned, but with an appeal to a resident magistrate. The agricultural and grazing rights of the natives were protected. A Commission was appointed to inquire into the concessions that had been granted, and provision was made for expropriation where that should be found necessary. It was provided that the money required for the settlement of the country should be raised by a loan on the security of the country.

The Transvaal was founded in 1831 by Boers, who journeyed thither from Cape Colony, and gradually formed a settled Government, whose independence was acknowledged by Great Britain by the Sand River Convention in 1852. Serious difficulties with the natives arose from time to time, and in 1877 the country was

annexed by the British Government. In 1880 the Boers took up arms to regain their independence. **Majuba** and the 1881 Convention followed, giving the Transvaal complete self-government subject to the suzerainty of Great Britain. Another Convention was signed in 1884, under which the country was renamed the South African Republic, the control over foreign relations, except with the Orange Free State, being reserved to the British Crown. In '86 gold was discovered on the **Witwatersrand** range of hills, and these have since, after the first rush and the inevitable collapse, proved to be of immense value (see **GOLD FIELDS AND PRODUCTION**). The gold output since the war has been: **Year to December, 1901, £1,097,219; 1902, £7,301,501; 1903, £12,628,057.** The centre of the gold fields is **Johannesburg**, which had in '99 a population of over 100,000, including over 50,000 whites. It was the discontent amongst the "Outlanders" of Johannesburg which ultimately led to the war between the Transvaal and Great Britain. Fighting began in Oct. '99, and after some initial successes the Boers were driven back, Lord Roberts reaching Bloemfontein March 13th, and Pretoria June 5th, 1900. On Sept. 1st, 1900, the country was formally annexed to the British Empire, though terms of peace were not signed till May 31st, 1902. Lord Milner then assumed office as **Governor of the Transvaal**, and **Executive and Legislative Councils** were constituted. The latter was enlarged in 1903, and consists of 30 members, while in 1904 the Imperial Government announced that the nominated element was to be made elective.

The **judicial system** set up since the annexation includes resident J.P.'s, resident magistrates at all populous centres, the Witwatersrand High Court with civil and criminal jurisdiction, and the Supreme Court of the Transvaal with original and appellate jurisdiction. Circuit courts are also held. The **South African Constabulary** form the main police force, and are now 5000 strong (London office: King's Court, Broadway, Westminster). The **educational system** provides for free elementary education, and in accordance with the terms of peace, for the teaching of the Dutch language where parents desire it, and on the same conditions for denominational instruction in school hours, though the general religious instruction is undenominational. In 1904 there were 373 primary schools with 24,972 scholars. The number of farm schools was 269 with 9016 scholars. The Boers generally belong to the **Dutch Reformed Church**, but the English Episcopal and Free Churches have a large number of adherents. For local administration there are municipal bodies at Pretoria and Johannesburg, and local commissioners were appointed to carry out the work of resettlement after the war, to disburse the Government grant of £3,000,000, and to make further loan advances. There are about 780 miles of **railways**, and they are under the control of the Intercolonial Council. The regular **military forces** in 1904 had a total strength of 14,149, according to the Census. They are under the command of the Commander-in-Chief at Pretoria, who also commands the forces throughout British South Africa.

The country offers great facilities for agriculture and stock-rearing, but wants developing. The number of farms before the war was estimated at rather more than 12,000. The

chief exports were gold, wool, cattle, hides, grain, and ostrich feathers. The gold output recently is given above. Coal is found of fair quality, and the output is steadily rising. It amounted to £877,976 in 1903. The chief newspapers are the *Rand Mail*, the *Johannesburg Star*, and the *Transvaal Leader*.

The revenue 1902-3 was £4,682,000; 1903-4, £4,465,000; **expenditure**, 1902-3, £4,578,000; 1903-4, £4,358,000. **Imports**, 1902-3, £13,067,671, exclusive of public and Government stores; 1903-4, £10,451,048; **exports**, 1902-3, £7,431,632; 1903-4, £12,969,912. **Public Debt:** The Imperial Government, by the **South African Loan and War Contribution Act, 1903**, guaranteed interest at 3 per cent. and the sinking fund payments on a loan of £35,000,000, to be repaid within 50 years from April 1st, 1904. Another loan, called the **War Contribution Loan of £30,000,000**, is to be the contribution of the Transvaal towards the cost of the war. There is no Imperial guarantee, and the loan is to be treated as a war debt secured on the assets of the Transvaal, and paid off in three annual instalments. A group of South African financiers agreed in Jan. 1903 to underwrite the first £10,000,000. The depression in 1904, however, prevented the raising of the first instalment. The Chancellor of the Exchequer said (April 21st) that it would be raised when the prosperity of the Colony and the condition of the money market permitted, and the obligation of the guarantors was in no way affected by the delay. The instalments on the War Contribution Loan are directed by the South African Loan Act 1903 to be paid to the British National Debt Commissioners, and by them applied in reduction of the National Debt.

**Governor**, Viscount Milner, G.C.B., G.C.M.G.  
**Executive Council:** *Lieutenant-Governor*, the Hon. Sir Arthur Lawley, K.C.M.G.—*Colonial Secretary*, Patrick Duncan, C.M.G.—*Attorney-General*, Sir R. Solomon, K.C.M.G., C.B., K.C.—*Treasurer*, W. L. Hichens.—*Secretary for Native Affairs*, Sir Godfrey Lagden, K.C.M.G.—*Commissioner of Mines*, H. Weldon.—*Commissioner of Lands*, A. Jameson, M.D.—*Postmaster-General*, J. F. Brown.—*Director of Customs*, J. W. Honey.—*Director of Agriculture*, F. B. Smith.—*Director of Education*, F. Ware.  
**Chief Justice**, Sir J. Rose-Innes, K.C.M.G.

### History, 1904.

The Government published a **Draft Ordinance** to regulate the introduction into the Transvaal of unskilled non-European labourers (Jan. 6th), and the Legislative Council passed the first reading of it (19th). A strong protest against the introduction of Chinese into the Transvaal was received from Mr. Seddon, Premier of New Zealand, and from Mr. Deakin, Premier of the Australian Commonwealth. The Government of Cape Colony also objected. Mr. Deakin said he and his Ministers foresaw grave perils of a racial, social, political and sanitary nature from such a policy. The second reading of the Ordinance was carried without a division (20th). Lord Milner, speaking to the Farmers' Association at Krugersdorp (21st) on the question, said he had done his best to learn the opinion of all classes, and he found that while nobody wished to have recourse to foreign labour, yet on the whole the greater number were content to see it introduced, though some would rather see the progress of the country stopped. If he thought the public feeling

was that in no circumstances should foreign labourers be admitted, it would be his duty not to consent to the Ordinance. A petition to the Government in favour of imported Asiatic labour was reported (23rd) to have been signed by 45,100 white adult males, out of a total of about 80,000, of whom 15,000, being Government employes, did not sign. The Ordinance was finally passed by the Legislative Council (Feb. 10th). A letter signed by Messrs. Botha, Delarey, Kurger, Smuts, and other Boer leaders, and sent at their request to Mr. Lyttelton, was published (12th). It pointed out that the question of introducing Asiatic labour had never been submitted to the people, and assured the Colonial Secretary that the great majority of the Boers were opposed to the proposal, and regarded the Ordinance as a public calamity of the first magnitude. An outbreak of plague in the coolie location at Johannesburg was reported (March 20th). As to the action of the Imperial Parliament on the question see SESSION. See also CHINA as to Chinese Labour Convention.

A number of delegates from a Boer Congress, which was held at Pretoria and lasted three days, presented to Sir Arthur Lawley the resolutions passed by the Congress (May 25th), General Botha introducing them, and stating that they desired to help and co-operate with the Government. The resolutions protested against the war debt and the levying of a war tax before responsible government was granted; urged various grievances as to compensation, asking the Government to pay out immediately the £3,000,000 promised, and to pay all legal debts of the old Government; made representations as to the Gold and Diamond Laws, and referred to the Education question and the appointment of teachers in the State free schools. Sir Arthur Lawley in reply emphasised the desire of the Government to know and meet the needs and aspirations of the people. He stated, with regard to compensation, that £10,000,000 had been spent in repairing the ravages caused by the war, without taking into account the £4,500,000 provided by the War Office to pay out certain burghers with whom the authorities had entered into a special agreement, and to discharge the receipts given by the military during the war. General Botha warmly and heartily acknowledged his appreciation of Sir A. Lawley's reply.

The first batch of Chinese labourers arrived on the Rand (June 22nd). It was estimated that by June 1905 the number of Chinese at work in the mines would be 50,000. The next day the third session of the Legislative Council was opened by the Lieut.-Governor, who said that in spite of continued depression there had been a marked advance towards normal conditions. The financial outlook was satisfactory, and with regard to education the Government were arranging for a devolution of control from the central to the local authorities concurrently with the assumption of financial responsibility by the latter. The Council, on the motion of the Lieut.-Governor, passed a vote of sympathy and condolence with the family of ex-President Kruger (July 18th).

A national convention on the subject of Asiatic traders was held (Nov. 10th) in Pretoria, and was attended by 160 delegates, from every municipality in the Transvaal as well as the principal chambers of commerce, trade unions, agricultural associations, and other repre-

sentative bodies. A resolution was carried recommending that Asiatic immigration should be prohibited except under the terms of the Foreign Labour Importation Act. This was in face of the reply given by the Colonial Secretary to the Legislative Council, on Aug. 16th, that the Imperial Government, while ready to sanction legislation similar to that in force in Cape Colony and Natal, were unable to sanction legislation which would interfere with the existing rights of Asiatics as regards trading. On that occasion the Council resolved unanimously that "the unrestricted issue of licences to Asiatics will only result in the elimination to a great extent of white traders"; that the Secretary of State for the Colonies be requested to appoint a Commission from England to visit the Transvaal and report upon the question; and that, pending such report, authority should be given to introduce legislation suspending the further issue of licences to Asiatics.

## INTERCOLONIAL COUNCIL FOR TRANSVAAL AND ORANGE RIVER COLONY.

By an Order in Council, dated May 20th, 1903, an Intercolonial Council was established "to advise the High Commissioner and Governor on the financial administration of the South African railways and the employment of their revenue, the expenditure on the South African Constabulary, certain official expenditure common to the two Colonies which is placed by the Order under the administration of the Council, and any other common expenditure which may from time to time be placed under its authority by the Legislative Councils of the two colonies with the consent of a Secretary of State." The Council consists of the High Commissioner, the Lieutenant-Governors of the two Colonies, the Inspector-General of the South African Constabulary, and members of the Transvaal and Orange River Colony Executive and Legislative Councils. Revenue, 1903-4, £2,661,195; expenditure, £2,600,926.

In 1904 an extraordinary session was opened at Johannesburg (March 1st) to consider the financial position in view of the decrease in the railway revenue. Lord Milner said that the stagnation was due to the lack of unskilled labour for the mines, which prevented the gold from being got as fast as was necessary to keep the trade of the country going. He said that only £30,000,000 had been raised out of the guaranteed loan of £35,000,000, and this had been spent as follows: Discharge of old liabilities, £4,600,000; acquisition of railways, £13,500,000; repatriation, £5,800,000; development, £5,100,000; capital expenditure on existing railway lines, £700,000; cost of the issue of the loan, £270,000. In view of the inability to raise the remaining £5,000,000, expenditure must be restricted as far as possible. The Council decided to reduce the expenditure on new railway lines, suspending work on four lines in course of construction in order to provide for further capital expenditure on railways actually working. The Council resolved to ask for an increase in the membership, which was afterwards granted.

Lord Milner made a financial statement at the opening of the ordinary meeting of the Council (May 31st). Reviewing the past year, he pointed out various increases in revenue and decreases in expenditure, such as, for instance, the saving effected by reducing the

constabulary strength to 5000. The Transvaal was paying its way, while in the Orange River Colony there was a substantial surplus. The estimated expenditure for 1904-5 was £2,500,000. To the revenue the railways would contribute £1,270,000, and allowing for other receipts the Colonies would have to find £1,180,000, of which the Transvaal would be asked for £1,000,000. The S. African Constabulary force gave rise to considerable criticism (June 9th), many members of the Council arguing that it should be superseded by a small police force. Lord Milner replied that its cost was really to be regarded as an insurance premium on the lives and property of the inhabitants, though the force could and would be gradually reduced. The Council resolved (14th) that better financial control of the railways was needed and should be provided by the appointment of an Auditor with large powers, and of a Treasurer solely responsible to the Council in respect of intercolonial funds. Sir Percy Girouard, Commissioner of Railways, tendered his resignation (17th), which was accepted.

The Council met again in extraordinary session (Nov. 15th), and Lord Milner was able to announce that since June the prospects so far as railway construction was concerned had changed vastly for the better. In accordance with the Council's wishes reforms in the railway administration were being provided for, including the abolition of the office of Railway Commissioner, and the appointment of a General Manager under a Board of Control appointed by the Council. A number of new lines were considered, and the Council ratified (16th) agreements for their construction as follows: Bethlehem to Kroonstad; Bethlehem to Modderpoort; Ladybrand to Modderpoort, and Alival North to Wepener, with an extension to a point to be determined afterwards. The length of the lines thus sanctioned was 339 miles. Other lines, 218 miles long, from Pretoria to Rustenburg and from Krugersdorp to Mafeking, were sanctioned (17th), and the Railway Committee were authorised to enter into an agreement for the construction of a line from Bloemfontein to Kimberley, provided a satisfactory offer were made. Further the Council resolved to advance the necessary sum to enable a private company to finish a line, already almost completed, from Machadodorp to Ermelo, and to join it up with the Springs line.

#### RHODESIA.

On Oct. 29th, '89, a Royal Charter was granted to the British South Africa Company, conferring upon it large administrative powers in the region north of Cape Colony, now known as Rhodesia, which has an estimated area of 750,000 sq. m., and authorising it to promote trade and commerce and to work mineral and other concessions in those regions. After the Jameson raid the control of the military forces of the country was placed entirely in the hands of the Imperial Government. The authorised share capital of the Company amounts to £6,000,000. Rhodesia is divided into two portions by the river Zambesi.

Northern Rhodesia (divided into North-Eastern and North-Western Rhodesia) is the British sphere lying between the Portuguese settlements, German East Africa and the Congo Free State, excepting the British Central Africa Protectorate. North-Eastern Rhodesia has an area of about 120,000

sq. m. and a pop. of about 350,000. Ivory and rubber are exported, and cotton is being grown with some success (see article on TEXTILE INDUSTRIES). North-Western Rhodesia is also called Barotseland, and contains the country ruled by King Lewanika, whose headquarters are at Lealui. The headquarters of the Administrator of North-Eastern Rhodesia are at Fort Jameson, and of the Administrator of North-Western Rhodesia at Kalomo. There is a High Court of North-Eastern Rhodesia, of which Mr. Leicester P. Beaufort is the Judge.

Southern Rhodesia includes the two provinces of Matabeleland (area 70,835 sq. m., pop. 7706 whites, 187,000 natives) and Mashonaland (area 72,995 sq. m., pop. 4917 whites, 377,000 natives). In addition there are 1044 Asiatics and other coloured persons. It lies between the northern boundary of the Transvaal on the south, and the Zambesi on the north, with the Portuguese provinces of Manica and Sofala as the eastern boundary. The seat of government is Salisbury (pop. 1726), which is also the capital of Mashonaland; the chief town of Matabeleland is Bulawayo (pop. 3840). On Nov. 4th, '97, the railway from Vryburg to Bulawayo was formally opened. On May 1st, 99, the first train from Beira, the eastern port, entered Salisbury, a distance of 375 miles, and the railway from Salisbury to Bulawayo, *via* Gwelo, a distance of 300 miles, was completed on Oct. 6th, 1902. During 1903 railways were built from Bulawayo to Gwanda, from Bulawayo to the Matopos, and from Gwelo to Selukwe. In 1904 the extension northward had reached the Victoria Falls on the Zambesi, and rapid progress is being made with the line to the north of the Falls. It is expected that Kalomo will be reached early in 1905, and it has been decided to go on to Broken Hill, a point 250 miles beyond Kalomo (see Cape to Cairo Railway under ENGINEERING). The total railway system open for traffic is now nearly 1900 miles. The output of gold from the mines in 1902 amounted to 194,169 oz., and in 1903 to 231,872 oz. A banket reef was discovered in 1904 in the Lomaganda district and a large alluvial area in the Victoria district. There has been and is an inadequate supply of native labour, owing to the disinclination of the natives of Southern Rhodesia to work of any kind, and the directors of the B. S. A. Co. advocate the introduction of Asiatic labour.

The Government is conducted by the Executive Council of Southern Rhodesia, consisting of the Administrator of Southern Rhodesia (Sir W. H. Milton, K.C.M.G.) and four members appointed by the Company, with the approval of a Secretary of State, and by a Legislative Council consisting of the Administrator, the Resident Commissioner, and fourteen other members, of whom seven are appointed by the Company with the approval of a Secretary of State and seven elected by the registered voters of Mashonaland and Matabeleland. The duration of each Legislative Council is for three years. The ordinances of the latter are subject to confirmation by the High Commissioner and to disallowance by the Secretary of State. There is a resident Commissioner appointed and paid by the Crown, who sits on the Executive and Legislative Councils, without a vote. Native affairs are administered, under the Administrator, by a Chief Native Commissioner in each province, assisted in each case by Commissioners and Assistant Commis-

sioners. Land has been reserved for tribal settlements, and an annual hut tax of £1 is imposed. The Judicial Establishment consists of the High Court of Southern Rhodesia with two judges, the Attorney-General, Solicitor-General, and local magistrates. The territories are divided into magisterial districts, and appeal lies from the magistrate to the judges, and from the High Court to the Supreme Court of the Cape. There are magistrates at Salisbury, Bulawayo, Victoria, Umtali, Gwanda, Gwelo, and Melssetter. Civil cases between native and native are tried in accordance with native law, with certain restrictions. The control of the military forces of Southern Rhodesia, known as the British South Africa Police, is in the hands of the Imperial Government, acting through the High Commissioner for South Africa, though the cost is paid by the Company. The chief newspapers are the *Bulawayo Chronicle*, *Rhodesia Herald*, and *Rhodesia Advertiser*.

**Board of Directors:** The Duke of Abercorn, K.G. (*President*), A. Beit (*Vice-President*), Lord Gifford, V.C., Sir Lewis Michell, J. Rochfort Maguire, P. Lyttelton Gell, Dr. L. S. Jameson, C.B.—*London office*, 2, London Wall Buildings, E.C.—*Manager*, H. Wilson Fox,—*Joint Manager and Secretary*, J. F. Jones, C.M.G.—*Assistant Secretaries*, A. P. Millar, D. E. Brodie.

**Administration:** *Administrator of Southern Rhodesia*, Sir W. H. Milton, K.C.M.G. (Salisbury).—*Resident Commissioner*,—*Administrator of North-Eastern Rhodesia* R. Codrington.—*Administrator of North-Western Rhodesia*, R. T. Coryndon.

## BRITISH EAST AFRICA.

**British Central Africa Protectorate.** A portion of British Central Africa lying round the shores of Lake Nyasa, and extending to the banks of the Zambesi. It includes all British Nyasaland, as well as the Shiré Highlands and the greater part of the basin of the river Shiré. The settlement of the western boundary of the British and Portuguese spheres was by agreement (Aug. 12th, 1903) referred to the arbitration of the King of Italy. The expenses of administering the Protectorate are partly met out of revenue locally raised, and further by an annual grant from the Imperial Government. The administration is in the hands of a Commissioner acting under the Colonial Office, to which department it was in 1904 transferred from the Foreign Office. The Protectorate is divided into 12 Districts, and these are managed by a number of Collectors and Assistant Collectors, Judicial Officers, etc. By an Order in Council 1902 a High Court was established in and for the Protectorate. A number of forts recently erected guard the frontier in all directions, especially on the north and south-east, from the ingressions of the slave-trading Arabs and Yaos. The armed forces of the Protectorate consist of a naval force on the Zambesi, the Upper Shiré, and Lake Nyasa, including 5 gunboats, 140 Sikhs and about 1000 native troops, forming the 1st and 2nd C.A. battalions of the King's African Rifles, which are under the control of the Foreign Office. The 2nd battalion is a reserve force, available for service in any African Protectorate. Most of the officers of this force are Indian officers, lent, together

with the Sikhs, by the Indian Government. The port of British Central Africa is Chinde, at the mouth of the Zambesi, where a small concession has been granted by the Portuguese Government. The area of the Protectorate is 42,217 sq. m.; the European inhabitants number about 500, and the native inhabitants about 3,000,000. The principal occupation of the European settlers is planting; and many thriving plantations of coffee, sugar, cinchona, and tobacco, have been established. Cotton cultivation is now being developed with every prospect of success (see article on TEXTILE INDUSTRIES). Rubber and ivory are also exported. The chief towns are: Blantyre (pop. 6500), Zomba (headquarters of the Administration), Fort Johnston (the principal port on Lake Nyasa and naval dépôt), Karonga (north end of Lake Nyasa), the starting-point for Tanganyika, and Kotakota (west coast of Lake Nyasa). Almost the entire trade of British Central Africa is with the United Kingdom. A concession for the construction of a railway between Chiromo and Blantyre was granted to the Shiré Nyasaland Co. on Dec. 31st, 1902, and the line is slowly progressing. There is telegraphic connection between Blantyre, Zomba, and other stations with the South African system *via* Tete on the Zambesi, Matabeleland and Mashonaland. A special article upon the African Trans-continental Telegraph appears under the separate heading ENGINEERING. The British Central Africa Co. (office, 20, Abchurch Lane, E.C.) supplies information to settlers.

**Commissioner and Commander-in-Chief**, Sir Alfred Sharpe, K.C.M.G., C.B.—*Deputy-Commissioner*, Major F. B. Pearce.—*Agent at Chinde*, S. H. Fletcher.—*Chief Judicial Officer* (Blantyre), J. J. Nunan.—*Secretary to the Administration*, A. J. Williams.—*Senior Naval Officer on Lake Nyassa*, Commander Percy Cullen, C.M.G., R.N.R.—*Surveyor*, T. I. Binnie.

**Inspector-General of Protectorate Forces**, Brigadier-Gen. Sir W. H. Manning, K.C.M.G., C.B.

**East Africa Protectorate.** This extends about 400 miles along the coast northwards from Umba, at the mouth of the Umba river, and inland to the borders of Uganda. It adjoins the Italian and Abyssinian spheres on the north and German East Africa on the south. The Imperial British East Africa Company opened up the country, having in 1887 obtained a concession of territory from the Sultan of Zanzibar and in '88 a charter from the British Government. An arrangement for buying them out was, however, come to in '95, and the direct administration of the country was undertaken by H.M. Government. The Protectorate, which is administered by a Commissioner and Consul-General, who is also British Agent and Consul-General at Zanzibar, is divided into the following districts, each under a sub-commissioner: the Coast Province, capital Mombasa; Ukamba, capital Nairobi; Tanaland with Witu, capital Lamu; Jubaland, capital Kismayu; Kenya, capital Fort Hall; Naivasha; and Kisumu. The chief ports are Mombasa (which is also the capital of the whole Protectorate), pop. 27,000; Lamu, Vanga, and Kismayu. A hut tax is imposed upon the natives. The military forces consist of the 3rd or East Africa battalion of the King's African Rifles. The establishment has

a strength of 45 officers and 1875 rank and file. There is also an armed native police force about 1600 strong. A railway of 582 miles' length has been constructed from Mombasa to Lake Victoria Nyanza. Since the completion of the railway the East Africa Syndicate Ltd. have been at work, and have found mineral deposits sufficient to justify operations on a large scale. Agricultural operations are also increasing. It is proposed to settle a Jewish colony in East Africa, in connection with the Zionist movement. (See JEWS.) By an Order in Council, 1902, a High Court, with full civil and criminal jurisdiction, was established in the Protectorate, with an Appeal Court at Zanzibar. The principal products of the country are cloves, ivory, indiarubber, copra, hides, etc. Area estimated at 200,000 sq. m.; pop. 4,000,000, including 450 Europeans and Eurasians. Revenue, 1903-4, £108,857; expenditure, £350,958; Imports, 1903-4, £604,500; exports, £160,000.

**Commissioner and Commander-in-Chief,** Sir Donald K. Stewart, K.C.M.G., appointed in 1904, in succession to Sir Charles Eliot, who resigned his position and asked the Prime Minister to hold an inquiry into the circumstances of his resignation. This was refused, but some correspondence between Sir C. Eliot and Lord Lansdowne was published, from which it was made clear that the resignation was a protest against the action of the home Government as to concessions and leases in the Protectorate.

**Uganda Protectorate, The,** includes not only Uganda proper, but Unyoro, Busoga, and other countries westwards up to the boundary of the Congo Free State, and northwards to the Egyptian Soudan. It lies between the Congo Free State on the west and the East Africa Protectorate on the east, the southern boundary being 1° S. lat. and the Anglo-German frontier, and the northern an undetermined line from a point near Lado on the White Nile to the watershed of Lake Rudolf, separating it from the Egyptian Soudan. The native capital of the country is Mengo, but the British administration, under a Commissioner and Consul-General, has its headquarters at Entebbe, on the N.W. shore of Lake Victoria. The Imperial Government took over the administration from the Imperial British East Africa Company in '94, and made the country a Protectorate. A High Court for the Protectorate was established in 1902, with an Appeal Court at Zanzibar. The King, or "Kabaka," is H.H. Daudi Chua, who, being a minor, is now under a regency of three chiefs. He receives a stated allowance from the Government. There is also a Lukiko, or native council of 80 chiefs. The trade, which is increasing, is mainly in ivory, cattle, wild coffee, and rubber. Iron ore abounds, and wheat grows well. The development of the country has progressed wonderfully in the last year or two, and will doubtless go on still faster now that the railway from the coast is completed. The line runs from Mombasa, on the coast, to Port Florence, on the north-east corner of the Victoria Nyanza, a distance of 584 miles. The net loss on the working from April 1902 to March 1903 was £49,690. Several mail, passenger, and trading steamers are now plying on the lake. The military force includes the 4th battalion King's African Rifles, the total strength being

about 1200 officers and men. There is a native police force about 1100 strong. The prosperity of the country is threatened by the terrible "sleeping sickness," which has destroyed thousands. Investigations into the cause and cure of the disease, made under the direction of Colonel Bruce, resulted in the discovery that the disease was due to trypanosome infection. Area about 86,000 sq. m., pop. about 4,000,000, including about 300 Europeans. Revenue, 1903-4, £49,501; expenditure, £186,884; Imports, 1903-4, £123,198; exports, £52,848.

**Commissioner and Commander-in-Chief,** Lieut.-Col. J. Hayes-Sadler, C.B.

**Zanzibar Protectorate, The,** consists of the island of Zanzibar (area 640 sq. m., pop. 150,000) and the island of Pemba (area 380 sq. m., pop. 50,000). Capital, Zanzibar, which has a fine port, and is used as a coaling station for H.M. Navy. The Sultan is Seyyid Ali bin Hamoud, b. '84, succeeded July 18th, 1902. A Regent acts till the Sultan is 21. A regular Government is constituted under British control, exercised through the British Political Agent and Consul-General. Germany, by the Samoa Agreement (Nov. 14th, '99), renounced her rights of extra-territoriality in Zanzibar from such time as the similar rights possessed there by Great Britain should be abolished. Slavery was abolished in April '97. H.M. Court for Zanzibar forms the Court of Appeal from the High Courts of British Central and East Africa and Uganda. Imports, 1902, £1,106,247; exports, £1,060,277. The products are mainly cloves (which form four-fifths of the entire clove crop of the world), copra, chillies, ivory, rubber, hides, and gum.

**Agent and Consul-General,** Basil S. Cave, Esq., C.B.

**Somali Coast Protectorate.** The British sphere of interest in Somaliland and on the coast of the Gulf of Aden, which has existed since 1884, is known by this name. It is administered under the Foreign Office by a Commissioner and Consul-General. It has about 400 miles of coast, and extends inland 300 miles at its deepest point. Within this territory lie the ports Zaila, Bulhar, and Berbera, but their trade is affected by the railway being built from Jibutli in French Somaliland to Harar (see ABYSSINIA). The boundaries were fixed by agreements with Italy in '94, and with Abyssinia in '97. The Somaliland Battalion of the King's African Rifles forms the military force. The chief town of the district is Berbera, which has about 30,000 inhabitants. The products are chiefly cattle, coffee, skins and hides, ostrich feathers, ivory, and gum. Area 68,000 sq. m.; pop. 153,000. Imports, 1903-4, £360,587; exports, £185,521. The depredations of the Mad Mullah, Haji Mahomed Bin Abdullah, in Northern Somaliland and Abyssinia, led to a joint expedition being undertaken against him during 1901. Another expedition was sent against him in 1902, and a severe defeat was sustained by the British forces, through the cowardice of the Somali levies, at Ergo on Oct. 6th. A new expedition under Brigadier-General Manning, Inspector-General of the King's African Rifles, was organised in 1903, Italy allowed Obbia to be used as a base of operations, and the Emperor of Abyssinia agreed to co-operate again. After pushing the Mullah back, a reverse was sustained at Gum-

baru on April 17th, 1903, and the further advance of the expedition was suspended. Major-General Sir C. Egerton was appointed to the chief command in June 1903. In 1904 General Egerton attacked the Mullah's force at Jidballi (Jan. 10th) and defeated it with severe loss. The prisoners captured numbered 215, with 366 rifles, and 680 dead were counted, the total being estimated at over 1200. The power of the Mullah was broken by this defeat, and subsequent operations in the Nogal and on the North Sorl completed his rout, drove him out of the Protectorate and dispersed his followers. The Mullah himself took refuge in the Mijjarten territory. Illig was taken from its Dervish garrison (April 21st) by a joint naval and military force, and destroyed. In June the bulk of the expeditionary force under General Egerton was withdrawn. Two Indian regiments and two native mounted infantry companies were left as a temporary garrison, and Colonel (local Brigadier-General) Swayne assumed full civil and military control of the Protectorate, and began the organisation of the tribes with a view to their own defence. The cost of the expedition to the end of the financial year 1903-4 was stated to be £1,800,000.

Commissioner and Commander-in-Chief, Lieut.-Col. E. J. E. Swayne, C.B.

## BRITISH WEST AFRICA.

**Gambia.** A Crown colony on the Gambia river, the most northerly and the oldest of the British settlements on the coast of West Africa. Capital, Bathurst (pop. 8807). Consists of St. Mary's Island, with Combo on south, Albreda, Barra, and The Ceded Mile on north bank. Up the river are several stations, of which McCarthy's Island, 187 miles from the mouth, is the highest. The area of the colony proper is about 69 sq. miles, but a Protectorate exists in the interior, and the area of the whole colony is about 3061 sq. miles, and the population 163,718. The military force consists of the Gambia Company of the West African Frontier Force. A hut tax of about 4s. per annum is levied in the Protectorate. Products ground-nuts, hides, beeswax, rice, cotton, maize, grain, indiarubber, etc. Ruled by an Administrator, a Legislative Council of six members, two non-official, and an Executive Council. By the Anglo-French Agreement, signed April 8th, 1904, the frontier was modified in such a way as to assure Yarbata, at the head of the navigable Gambia, 300 miles from the sea, and the landing-places belonging to that locality, to Senegambia. Access to the navigable portion of the river and transit for sea-going merchantmen up the river were granted to the French Government under arrangements subsequently made. The area transferred was about 50 sq. m.

Governor, Sir George C. Denton, K.C.M.G.

Colonial Secretary, H. M. Brandford Griffith, C.M.G.

**Gold Coast Colony.** A Crown colony on the coast of West Africa, bounded on the east by Togoland (German), and on the west by the Ivory Coast (French). The colony has a coast-line of about 350 miles. The area, inclusive of Adansi, Ashanti, and the Northern Territories, may be put at about 74,500 square miles, and the population at 1,500,000, of whom about 500 are Europeans. The territories in the hinterland to the north of Ashanti were made

a separate district in '97 under the name of the "Northern Territories" (area about 38,000 sq. m., pop. 317,964), and are administered by a Commissioner. The Niger Convention, drawn up by the Anglo-French Commission sitting at Paris, and signed June 15th, '98, and the agreement with Germany of Nov. 15th, '99, settled the boundaries of the hinterland to the west and the north. The native state of Ashanti lies inland, at the back of the central portion of the colony. Accra is the administrative centre of the colony, and has a population of 17,892. The Government includes a Governor, an Executive Council, and a Legislative Council of 9, 3 of whom are non-official. For defence there is an infantry regiment of two battalions, with two batteries of artillery. The products are chiefly palm-oil, gold, palm kernels, rubber, cocoa, timber, etc. The country is very rich as regards both minerals and agriculture. The gold export in 1903 was £254,791, nearly the whole coming from the mines of the Ashanti Goldfields Corporation. Cotton is grown, and its cultivation is now encouraged. A railway runs from Sekondi via Tarkwa and Obuassi to Kumassi, a distance of 168 miles. See GOLD FIELDS.

Governor, Sir J. P. Rodger, K.C.M.G.

Executive Council: Colonial Secretary, Major H. Bryan. — Attorney-General, Willoughby Osborne. — Treasurer, C. Riby Williams, C.M.G. — Officer Commanding Gold Coast Regiment West African Frontier Force, —

Commissioner Northern Territories, Lt.-Col. A. H. Morris, C.M.G., D.S.O.

**Lagos.** A British colony, consisting of Lagos, town and island, on the coast of the Bight of Benin, 150 miles east of the Gold Coast, together with a strip of land along the coast that reaches from Dahomey on the west to Southern Nigeria on the east. The eastern boundary of the Protectorate was defined by the Lagos Protectorate Order in Council (Dec. 27th, '99), by which the whole of the Yoruba country was given to the Lagos Protectorate, and the Ilorin country to Nigeria. It is in contemplation to unite Lagos and Southern Nigeria into one administration. The town of Lagos is the largest on the West African coast, and has a population of 42,000. Area, including the protectorate, about 26,700 sq. m.; pop. over 3,000,000. The Governor is assisted by an Executive and a Legislative Council, the latter including five unofficial members. Resident officers are stationed at Ibadan and other towns in the interior, with a Superintendent of Native Affairs at Abeokuta. The population of the latter town is estimated at 150,000, and of Ibadan at 200,000. There is a civil police force of 420, together with a battalion 550 strong of the West African Frontier Force. Much has been done of late to open up the interior to British commerce, and a new rubber industry and cotton planting are being actively developed. The chief exports are palm oil and kernels, mahogany and rubber. Of the total exports, 65.4 % go to Germany and 29.9 % to Great Britain; whereas Great Britain sent 73.8 % of the imports in 1903, and Germany 17.1 %. The railway from Lagos to Abeokuta and Ibadan (126½ miles) was completed and opened by the Governor on March 4th, 1901. It is to be extended to Oshogbo, 72 miles farther.

Governor, Walter Egerton, C.M.G.

**Executive Council:** *Colonial Secretary*, C. H. H. Moseley, C.M.G.—*Chief Justice*, W. Nicoll.—*Attorney-General*, E. A. Speed.—*Treasurer*, F. C. Anson.—*Officer Commanding the Lagos Battalion*, *West African Frontier Force*, Major E. C. Tidswell, D.S.O.

**Northern Nigeria.** A British Protectorate constituted Jan. 1st, 1900, over territories up till then in the occupation of the Royal Niger Company. The northern boundary is the French Soudan, from Barua on Lake Chad to a point on the Niger ten miles north of Ilo. A new line of delimitation was substituted by the *Anglo-French Agreement* of April 8th, 1904, for that established by the *Anglo-French Convention* of '98. The western boundary is the French territory in the hinterland of Dahomey, from the same point on the Niger southwards to the point of intersection of the Okpara river and the 9th parallel of N. lat. The southern boundary is formed by the Lagos Protectorate and Southern Nigeria. The eastern boundary is that of the Cameroons, running north-east to Lake Chad. The Protectorate includes the old *Fulah Empire*, of which the Sultan of Sokoto is the head. The *Haussa* states of the *Fulah Empire* are Mahometan, but many of the tribes in the Protectorate are pagans. Until the end of '99 the *Royal Niger Company* governed the bulk of the Protectorate under a royal charter, dated July 10th, '86, but this charter was revoked in '99, and the Imperial Government, under the terms of a Treasury minute dated June 30th, '99, took over from the Company all their administrative powers and duties, the benefits of all their treaties and all their land and mining rights. The Company, however, as "The Niger Company, Ltd.," continue their trading, mining, and banking operations, the working of forests, and the cultivation of indigo, tobacco, and other indigenous products. A *High Commissioner* controls the administration of the Protectorate, which has been largely divided into provinces under the supervision of *Residents*. There are now 16 such provinces—viz., Borgu, Illorin, Kontagora, Bida, Kappa, Lower and Upper Benue, Middle Niger, Muri, Sokoto, Katsena, Kano, Yola, Bantshi, and Basas. The Government utilises the native chiefs, and establishes Native Courts, wherever possible, under the supervision of the *Residents*. There are also Provincial Courts held by the *Residents* themselves, with a Supreme Court which serves as a Court of Appeal for both Northern and Southern Nigeria. The 1st and 2nd Battalions *West African Frontier Force*, consisting of *Haussas* and *Yorubas* with a few other natives, constitute the military force, and have a strength of 2400 infantry, 3 batteries of artillery, with sappers, and medical and transport staff. The principal station is Lokoja, at the junction of the Benue and the Niger, but the headquarters are at Zungeru, up the Kaduna River. A port for the Protectorate is reserved at the mouth of the Forcados river in Southern Nigeria, with Burutu, which is used as a depot and transhipment station. The chief towns in the Protectorate are Wurno (capital of Sokoto), Gando, Sokoto, Kano, Bida, Yola, Yakuba, Zaria, and Illorin. The country is fertile, and its agricultural resources are undoubtedly great. The inland regions are said to be fairly healthy, and produce cotton, indigo, rubber, hides, and ivory, while minerals are stated to abound in certain parts. It is said that Northern Nigeria

alone could produce all the raw cotton that Lancashire requires, provided the transport difficulty were met by the construction of railways. The area of the Protectorate is about 320,000 sq. miles. The trade of the Niger Co. in 1901 was: imports, £91,342; exports, £73,287.

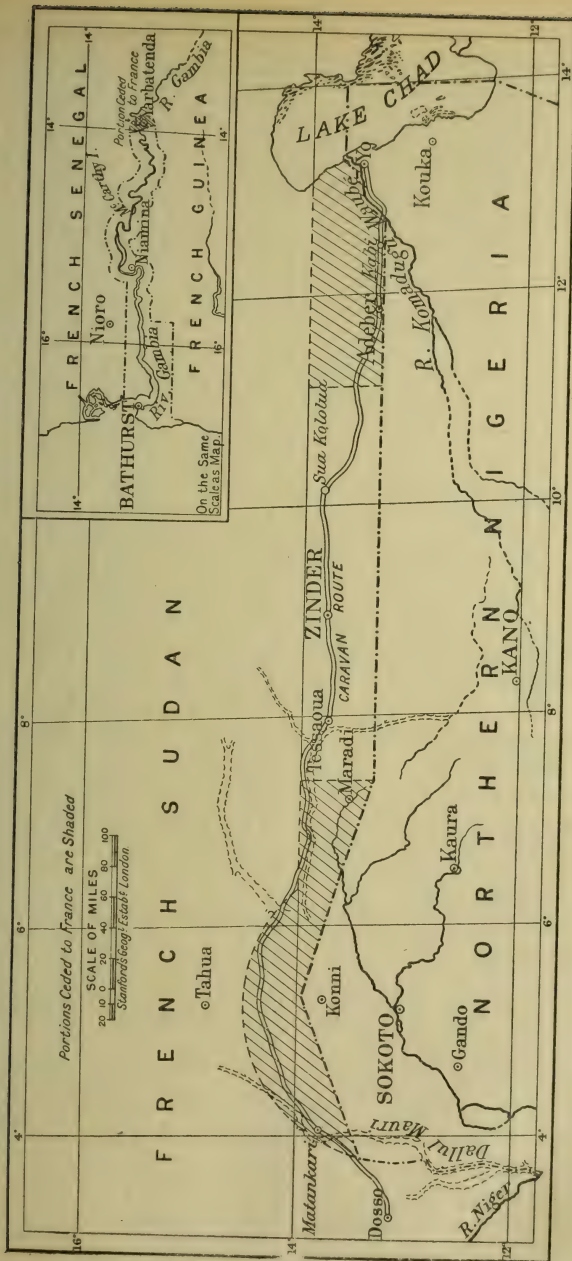

**High Commissioner.** Brigadier-General Sir F. D. Lugard, K.C.M.G., C.B., D.S.O.—*Resident and Deputy High Commissioner*, W. Wallace, C.M.G.—*Secretary to Government*, M. Beresford. I.S.O.—*Treasurer*, S. T. Harrison.—*Chief Justice*, M. R. Menendez.—*Commandant of Northern Nigeria Regiment*, *West African Frontier Force*, Col. A. W. G. L. Cole, D.S.O.

**Southern Nigeria.** A British Protectorate, constituted Jan. 1st, 1900, in part from the Niger Coast Protectorate and in part from the territories of the Royal Niger Company. Its southern boundary is the sea from Ogbo on the west, where it adjoins Lagos, to the mouth of the Cross river on the east, where it adjoins the Cameroons. The Cameroons form the eastern boundary, and Lagos the western, the northern boundary being Northern Nigeria. Lagos and Southern Nigeria are to be united into one administration. The area is estimated at about 48,000 sq. miles, but the population is not known. There are 460 Europeans in the Protectorate. It is administered by a *High Commissioner*, with 4 Divisional Commissioners, 4 Travelling District Commissioners, and 9 District Commissioners. There is a *Resident* at Benin city (pop. 50,000), the king of which was deposed in '07. The military forces consist of the 3rd Niger Battalion of the *West African Frontier Force*, about 1400 strong. The inhabitants are negroes, all of more or less cannibalistic tribes. The chief products are palm-oil and kernels, rubber, gums, ivory, and coffee. Old Calabar (pop. 15,000) is the headquarters of the administration. Asaba, the former administrative centre of the Royal Niger Company, Idda, and on the coast Bonny, Opobo, Brass and Akassa are important towns, while Benin, about sixty miles up the Benin River, has a population of about 50,000. At Akassa are the engineering and other works of the Company taken over by the Government, and here also is the only "slip" on the west coast where vessels can be repaired. The customs' revenues of the whole of Nigeria and Lagos are collected on the seaboard, and allocated afterwards.

**High Commissioner**, Walter Egerton, C.M.G.—*Secretary to Government*, —*Senior Divisional Commissioner*, W. F. W. Fosbery.—*Treasurer*, C. E. Dale.—*Chief Justice*, H. G. Kelly.—*Attorney-General*, J. Winkfield.—*Officer Commanding the Southern Nigeria Regiment*, *West African Frontier Force*, Col. A. F. Montanaro, C.B.

**Sierra Leone**, a British colony on the West African coast, founded in 1807. Sierra Leone proper is a peninsula, containing about 300 sq. miles, but the colony has a coast-line of 210 miles in length. Area, with the Protectorate in the hinterland, 33,100 sq. m.; pop. about 1,100,000. It is bounded on the north by the Grand Scarcies river, which separates it from Casamance, a part of Senegal, and on the south by Liberia. On the east the frontier was settled by an agreement made between Great Britain and France in Jan. '95, by which the

colony relinquished all control of the head waters of the Niger, and became inclosed on every side. By the Anglo-French agreement, April 8th, 1904, the *Los Islands* (pop. 1422) were ceded to France to form part of French Guinea. The interior is divided into 5 districts—Karene, Ronietta, Bandajuma, Koinadugu, Panguma, each under a District Commissioner. A house tax is levied on the natives. The leading tribes are the Timmanis in the north, the Mendis in the south, and the Yonnis in the middle districts. A railway runs from Freetown *via* Songotown, Rotifunk and Morjamba to Bo, a distance of 136 miles, and is being pushed on beyond Bo. It had reached 177 miles from Freetown on Dec. 31st, 1903. The capital is Freetown, with a population of over 34,000 and municipal government. It is the local headquarters of a battalion of the West African Frontier Force, about 500 strong, besides engineers and artillery. There is also an armed police force 265 strong, and an establishment for victualling and coaling ships of the Royal Navy. The chief exports are palm oil, palm kernels, kola nuts, hides, and rubber. Cotton grows freely, and its cultivation is now being encouraged. The bulk of the palm kernels and oil go to Germany, which took 34·7% (the United Kingdom 30·5%) of the exports in 1903, while Germany sent 10·3 (the U.K. 73·5%) of the imports. The colony is administered by a Governor, an Executive Council of 6 members, and a Legislative Council consisting of the Executive and 4 nominated members.

Governor, Leslie Probyn, C.M.G.

**Executive Council:** The Governor, *President*.—*The Officer commanding the Troops.*—*Colonial Secretary,* G. B. Haddon-Smith, C.M.G.—*Treasurer,* E. O. Johnson.—*Attorney-General,* E. T. Packard.—*Collector of Customs,* A. P. Viret.

## COLONIES IN NORTH AMERICA.

### DOMINION OF CANADA.

The Dominion of Canada consists of the upper portion of the North American continent except part of Labrador, which belongs to Newfoundland, and Alaska, which belongs to the United States. Its area is 3,653,946 sq. miles. In 1867 the provinces of Ontario, Quebec, Nova Scotia, and New Brunswick united under one federal government; in '70 Manitoba and North-West Territories were added, the latter by purchase in '69 from the Hudson Bay Company; British Columbia joined in '71, and Prince Edward Island in '73. In '80 an Order in Council was issued, annexing to the Dominion such British possessions in North America, other than Newfoundland, as were not previously in the Dominion. Federal capital, *Ottawa*, in Ontario, pop. 59,902. The population of the Dominion at the 1901 census was 5,371,315. The French-speaking part of the population number 1,649,371, and the large majority of them reside in Quebec; the Germans, 309,741. The Indians number 108,112.

The Federal Parliament is modelled after that of the United Kingdom, with a Senate of 8 members nominated for life, 24 from Ontario, 24 from Quebec, 10 from Nova Scotia, 10 from New Brunswick, 4 from Manitoba, 3 from British Columbia, 4 from Prince Edward

Island, and 2 from the Territories. The House of Commons consists of 213 members elected quinquennially on a low suffrage, 86 coming from Ontario, 65 from Quebec, 18 from Nova Scotia, 13 from New Brunswick, 7 from British Columbia, 4 from Prince Edward Island, 10 from Manitoba, 10 from the North-West Territories, and 1 from the Yukon Territory. The basis on which the number of members is allotted to each province is that Quebec shall always have 65 and the other provinces a proportional number according to their population at each decennial census. Election is by ballot, and the franchise is regulated by the Provincial Legislatures. The senators are paid \$1500 per annum, and the members \$10 a day during the session, with a maximum of \$1500. The Governor-General, representing the King, receives £10,000 yearly, and is assisted by a Privy Council chosen by himself. In each of the provinces a Lieut.-Governor, appointed by the Governor-General in Council, represents the executive authority, and details as to the provincial administration are given below. The territory not comprised within any province—*e.g.* the North-East Territory and the Arctic Islands—is administered by the Minister of the Interior. The limits of federal and provincial jurisdiction are regulated by the British North America Act '67. The Dominion Parliament has exclusive legislative power in all matters, including finance, trade, postal service, currency, banking, navigation, defence, etc., except those specifically delegated to the provincial legislatures. Bills passed by the Dominion Parliament require the assent of the Governor-General, and may be disallowed within two years by the King.

There is no State church, but the Roman Catholic Church in the province of Quebec has secured to it the privileges enjoyed by it previous to British rule, of collecting tithes, etc. The estimated strength of the chief religious bodies is: Roman Catholics, 2,228,997; Methodists, 916,862; Presbyterians, 342,301; Church of England, 680,346; Baptists, 316,714. Elementary education is free, and is liberally supported by grants from the provincial Governments, aided by local taxation. There are altogether 19,552 public schools of all grades, with 28,699 teachers and 1,096,632 pupils. Besides these there are many private schools, and each province has one or more universities. In Ontario, Quebec, and the North-West Territories there are separate schools for Roman Catholics, and in Manitoba denominational religious teaching is allowed in the last half-hour of the school day, provided the parents are willing. The Governor-General appoints the judges of the Superior Courts and county courts in the provinces, and over all is the Supreme Court at Ottawa, with appellate civil and criminal jurisdiction throughout the Dominion. The military establishment consists of (1) an Imperial military and naval garrison at Halifax, and a naval station at Esquimaux, on the Pacific; (2) a Militia force—the permanent division numbering 1021, the active division, in which the term of service is three years, and which numbers about 40,730 men, and the reserve, consisting of all between the ages of 18 and 60 who do not serve in the active force. See BRITISH IMPERIAL ARMY, p. 28. The Imperial Government takes charge of the naval defence of the country.

Canada is the largest of all the British possessions. The climate varies, being in the east cold but clear in winter, warm in summer; while the climate of the British Columbia coast resembles that of England. The winter is dry, healthy, and invigorating. The mineral deposits are practically inexhaustible, particularly coal, iron, nickel, copper, and gold. The mineral output of 1903 included gold, £3,845,375; nickel, £1,021,285; silver, £347,242; copper, £1,169,520; coal, £3,258,100 (7,996,634 tons). The fisheries on both the Atlantic and Pacific coasts are extremely valuable, and the timber supply is very rich. Manufactures are carried on extensively, and employ about 400,000 persons. Agriculture is, however, the main industry of the Dominion, and in Manitoba and the Territories the wheat-growing as well as general farming capabilities are immeasurable. Ranching has in late years also proved profitable. There has been a tremendous tide of immigration flowing into the N. W. Territories, especially during the last few years. For the year ended June 30th, 1901, the number of immigrants was 49,149; and for '02 67,379, of whom 17,259 were British and 26,388 from the United States. In the first nine months of 1903, the number of immigrants was 108,014, of whom 43,187 were of British, 32,498 of American, and 32,329 of other foreign nationality.

There are about 90 daily papers published in the Dominion: the *Toronto Globe*, the Government organ (London offices, Outer Temple, Strand); the *Montreal Star* (London office, 109, Fleet Street); the *Toronto Telegram*, a smart evening paper, owned by Mr. Ross Robertson; the *Montreal Gazette*, which represents the old type of Canadian Conservatism; and the *Montreal Herald*, a Laurier journal.

There were in 1903 sixty-five railway lines working in the Dominion of Canada, with a total mileage of 18,868. The Government own about 1511 miles of railway, and a magnificent system of canals. In 1901 there were 689 miles of electric railways. The two principal railway systems are those of the Canadian Pacific, with 7202 miles, and the Grand Trunk of Canada, with 3153 miles. The Grand Trunk Pacific Co. was formed, with the aid of the Government, to construct a trans-continental line between 2500 and 3000 miles in length, running from Ontario, through Manitoba and the North-West Territories, to the British Columbia coast. The contract between the Government and the Grand Trunk Pacific Co. is that the latter shall construct in 8 years all the sections of the new line west of Winnipeg to the Pacific, the Government guaranteeing the principal and interest of three-fourths of the bond issue necessary for construction, and paying a cash subsidy for the mountain section, which will eventually amount to between £1,600,000 and £2,000,000. The Company guarantees the remaining one-fourth of the bond issue, and becomes proprietor of this section. As to the section east of Winnipeg to Moncton, New Brunswick, on the Atlantic, the Government will construct it, and when complete it is to be leased to the Company for 50 years, when it reverts to the Government, though the Company are then to retain the terminals and such branch lines as they may select, with running rights, for a further 50 years. The Company will work both sections when they are completed. By the Transcontinental Railway Amendment Act, 1904, it was provided that the railway should

be commenced simultaneously at Winnipeg, Abitibi, Quebec, and Moncton, and carried on so that the sections between Winnipeg and Quebec and between Quebec and Moncton should be completed as nearly as possible at the same time. The Act empowered the Grand Trunk directors (5 of whom are also directors of the Grand Trunk Pacific Co.) to make use of the capital and credit of the Grand Trunk Co. for the purposes of the Grand Trunk Pacific.

By the **Tariff Act '97** a rebate of 12½ per cent. of the Customs Duties was granted to countries whose tariff was judged as favourable to Canada as the Canadian tariff so reduced, and the United Kingdom and New South Wales were at once given the benefit of the reduction, with the result that the concession had to be extended to all countries entitled to most-favoured-nation treatment in Canada. The Commercial Treaties of the United Kingdom with Germany and Belgium were, however, denounced in view of this, and on Aug. 1st, '98, a rebate of 25 per cent. was given to the United Kingdom and the West Indies, and to such other countries in the British Empire as accorded reciprocal treatment to Canada. In 1900 the preferential treatment was increased from 25 per cent. to 33½ per cent. See also **History, 1904, and COLONIAL CONFERENCE.**

**Revenue, 1902-3, £13,481,940; expenditure, £10,556,850; exports, 1902-3, £46,110,985; imports, £45,690,563; net debt, £54,155,000. Public works cost £36,343,596.**

**Governor-General, The Right Hon. Earl Grey, G.C.M.G.**

**Ministry: Premier and President of Privy Council, Right Hon. Sir Wilfrid Laurier, G.C.M.G., K.C.—Justice, Hon. Chas. Fitzpatrick, K.C.—Trade and Commerce, Right Hon. Sir R. J. Cartwright, G.C.M.G., P.C.—Postmaster-General, and Minister of Labour, Hon. Sir W. Mulock, K.C.M.G., K.C.—Secretary of State, Hon. R. W. Scott, K.C.—Finance, Hon. W. S. Fielding.—Marine and Fisheries, Hon. R. Prefontaine.—Railways and Canals, Hon. H. R. Emmerson.—Public Works, Hon. J. Sutherland.—Militia and Defence, Hon. Sir F. W. Borden, K.C.M.G.—The Interior and Superintendent-General of Indian Affairs, Hon. Clifford Sifton, K.C.—Agriculture, Hon. Sydney Fisher.—Customs, Hon. William Paterson.—Inland Revenue, Hon. M. E. Bernier.—Without portfolio, Hon. Wm. Templeman and Hon. C. S. Hyman.—Solicitor-General, Hon. R. Lemieux.**

**High Commissioner for the Dominion of Canada, Lord Strathcona and Mount Royal, G.C.M.G., 17 and 19, Victoria Street, London, S.W.—Secretary, W. L. Griffith.**

### Political Parties.

The two chief political parties are known as Conservatives and Liberals. From the date of confederation, in 1867, the Liberals were only in power once till their signal victory in '96. The late Sir John Macdonald, the leader of the Conservative party, held office from '67 to '91, with the exception of five years, from a Liberal administration under Mr. Mackenzie was in power. When Sir John Macdonald died he was succeeded by Sir John Abbott, and he by Sir John Thompson, on whose death Sir Mackenzie Bowell followed him (Dec. 12th, '95). The Manitoba Schools question and other questions shook the Government's

position during '95 and '96, and after some internal dissensions Sir Charles Tupper became Premier on the eve of the dissolution of Parliament in April '96. At the General Election which followed there were the following parties in the field: the **Conservatives**, led by Sir Charles Tupper, advocating protection and preferential trade, if possible, with Great Britain and the Colonies, new steam and cable services, and the strengthening of the defences of the Dominion; the **Liberals**, led by Sir Wilfrid Laurier (*q.v.*), advocating fiscal reform in the direction of free trade, modified only by revenue requirements, the extension of the franchise, the enlargement of the trade of Canada, and a policy of non-interference with provincial politics; the **McCarthyites**, seceders from the Conservative party; and the **Patrons of Industry**, forming practically the Labour party. In the electoral fight the influence of most of the higher Catholic clergy was thrown on the side of the Conservatives, chiefly because of the Manitoba Schools issue; but this intervention probably did more harm than good, for in Quebec, where it might possibly have been expected to have effect if anywhere, the Liberals triumphed signally. There were finally elected 118 Liberals, 86 Conservatives, and 8 Independents, the latter being on the whole supporters of the Liberals. A wave of Imperial and loyal feeling at the time of the Jubilee in '97 had as one of its results the institution of a preferential tariff in favour of the mother-country, which ultimately gave British goods an advantage of 33½ per cent. over other imports. Sir Wilfrid Laurier claimed that he had thus not only cultivated closer trade relations with Great Britain, but had done so to the great advantage of Canada. The Conservative party, under Sir Charles Tupper, on the other hand, urged that the preferential policy should be reciprocal, and denied its advantages to the Colony. This issue was very prominent in the autumn of 1900. In Sept. 1900 Mr. Hugh J. Macdonald resigned the Premiership of Manitoba in order to help Sir Charles Tupper in fighting the general election. The result was the return of the Liberals to power with an increased majority. When the 1904 general election came on, Sir Wilfrid Laurier's Government had a majority of 52 in a House of 214. The chief issue was the railway policy of the country. The Government asked the electors to ratify the Grand Trunk Pacific scheme, described above, declaring that a second trans-continental line constructed in this way was a vital necessity. The Opposition, under Mr. Borden, advocated Government ownership and working of such a line by the extension of the existing national system westward to the Pacific, and strongly criticised the Government contract with the Grand Trunk Pacific. The returns showed (Nov. 4th) that the result of the election was to give the Government a large majority. Ontario continued to return a majority of Conservatives, but Quebec and the other provinces gave overwhelming support to the Ministry.

#### History, 1904.

The Dominion Parliament was opened (March 10th), Mr. N. A. Belcourt being elected Speaker of the House of Commons. In his Speech from the Throne (11th) the Governor-General commented on the gratifying increase of the trade of the country each year, and on

the unparalleled immigration of settlers into Manitoba and the North-West Territories. During the debate on the address, Mr. Borden, leader of the Opposition, strongly criticised Sir Wilfrid Laurier's agitation for full treaty-making powers for Canada. In reply, Sir Wilfrid maintained that the day was coming when such powers would be given, in order that Canada might be master of the situation. Sir F. Borden introduced a bill amending the Militia law, by increasing the permanent force and providing better pay both for it and for the Volunteers (17th). A big fire broke out in the business quarter of Toronto, and property to the value of £2,000,000 was destroyed (April 19th). Mr. Fielding, in his Budget statement (June 7th), announced that the surplus for the last fiscal year was £2,869,053, and estimated the surplus for the current year at £3,300,000. Both political parties were in favour of preferential trade with the mother-country; but since the question had there become a party one, the Canadian Government did not feel free to take any part in it. He outlined a fiscal policy embracing a maximum tariff to be applied to commercially hostile countries, a minimum tariff for friendly countries, and the preferential tariff applicable to Great Britain and her Colonies. A special duty on dumped goods would be imposed, providing that when it could be shown that any dutiable article had been purchased abroad at less than the fair market value at the point of production, it should, in addition to the ordinary duty, pay a special duty equivalent to the difference between the purchase price and the fair market value, but not exceeding half the ordinary duty. On one or two exceptions it provided a special fixed additional duty. The effect of the surtax had been to reduce the German imports to £1,073,432 for the first 10 months of the current year from £1,729,720 in the corresponding period of the previous year. Considerable discussion arose over a speech made by Lord Dundonald, condemning the interference of politicians in military matters, and charging the Minister of Agriculture with interfering, on political grounds, with the organisation of the new cavalry regiment (June 8th). In consequence of the speech, Lord Dundonald was relieved of his command (14th), and subsequently left Canada, after receiving enthusiastic tributes of appreciation from those who supported him. Sir F. Borden then introduced a Militia Bill entirely reorganising the Canadian War Office, setting up a Military Council of 7 members on the lines of the Army Council in Great Britain, and providing for uniformity of staff organisation between the Canadian and Imperial troops. An address of farewell to Lord Minto was moved by Sir Wilfrid Laurier, seconded by the Leader of the Opposition, Mr. Borden, and carried unanimously in the House of Commons (Aug. 4th). The Premier said that the Governor-General had been the model of a constitutional governor, and had brought the Crown closer to the hearts of the people. The Archbishop of Canterbury arrived at Quebec (28th), and preached in the Cathedral of the Holy Trinity. A very cordial welcome was given to the new Governor-General, Earl Grey, in December.

#### Provinces of Canada.

British Columbia lies between the Rocky Mountains and the North Pacific Ocean, and

extends from the United States boundary to 60° N. lat. Area, 383,000 sq. m.; pop. 178,657, including about 29,000 Indians, 15,000 Chinese, and 5000 Japanese. Minerals consist chiefly of coal, silver, and gold. Vancouver Island contains large deposits of good steam coal, and there are other large deposits in the inland parts of the colony. Gold has been found in the Kootenay, Cariboo, and Cassiar districts, near the Columbia river, in great abundance. The town of Rossland became the centre of the district. An important industry is carried on in tinned salmon. There are also valuable timber and fruit-growing industries established. Capital, **Victoria**, on Vancouver Island, pop. 20,816. Vancouver City (pop. 26,133), on the mainland, is the terminus of the Canadian Pacific Railway. The government of the colony is administered by a Lieut.-Governor and a responsible Ministry. There is a Legislative Assembly consisting of 38 members. Manhood suffrage prevails in provincial elections.

**Lieutenant-Governor**, The Hon. Sir Henri Joly de Lotbiniere, K.C.M.G.—**Premier**, The Hon. Richard McBride.—**Attorney-General**, The Hon. Charles Wilson.—**Mines**, The Hon. R. F. Green.—**Provincial Secretary**, The Hon. F. J. Fulton.—**President of Council**, Hon. A. E. McPhillips.—**Finance**, Hon. R. G. Tatlow.

**Manitoba** was formerly known as the **Red River Settlement**, and entered the Dominion in 1870. It takes its name from Lake Manitoba, which is situated 60 miles S.W. of Lake Winnipeg. Area, 73,956 sq. m.; pop. 255,211. Capital, **Winnipeg** (pop. 42,340), at the junction of the Assiniboine and Red rivers. The climate is healthy, but there are great extremes of temperature. Soil very fertile, and yields abundantly, being peculiarly adapted to the growth of wheat. Large numbers of horses, cattle, sheep, and swine are raised. Coal abounds, gold is worked in the east, iron ore on the islands of Lake Winnipeg, and the northern part is heavily timbered. In 1900 there were 31,812 farms, and farm property was valued at nearly £30,000,000. Executive vested in a Lieutenant-Governor appointed by the Governor-General of the Dominion, and a Ministry. There is a Legislative Assembly, numbering 40 members, elected by districts for four years. The district of **Keewatin** (pop. 5000) is under the government of the Lieut.-Governor of Manitoba.

**Lieutenant-Governor**, The Hon. Sir D. H. McMillan, K.C.M.G.

**Executive Council**: **Premier**, The Hon. R. P. Roblin.—**Treasurer**, —.—**Public Works**, The Hon. D. H. McFadden.—**Minister without portfolio**, The Hon. Robert Rogers; **Attorney-General**, The Hon. Colin H. Campbell.

**New Brunswick** lies along the Bay of Fundy. Area, 27,700 sq. m.; pop. 331,120. Capital **Fredericton**, pop. 7000; chief commercial centre **St. John**, with a population of 40,711. Divided into fifteen counties. The chief rivers are the St. John and the Miramichi, which are navigable in part. Administered by a Lieut.-Governor and Executive Council. The people elect a Legislative Assembly of 46 members. Coal, iron, and antimony abound, and there are fine timber forests. Cereals are largely grown, and fruits, and the fisheries are remunerative.

**Lieutenant-Governor**, Hon. A. R. McClellan.

**Executive Council**: **Premier**, Hon. L. J. Tweedie.—**Chief Commissioner of Public Works**, Hon. Chas. H. La Billois.—**Surveyor-**

**General**, Hon. Albert T. Dunn.—**Attorney-General**, Hon. W. Pugsley.—**Commissioner for Agriculture**, Hon. L. P. Farris.—**Members without office**, Hon. H. A. McKeown and Hon. G. F. Hill.

**North-West Territories**, The, comprise the following districts: Assiniboia, area 89,535 sq. m., pop. 67,385; Alberta, area 106,100 sq. m., pop. 65,876; Saskatchewan, area 107,092 sq. m., pop. 25,679; Athabasca, area 265,000 sq. m., pop. 6615; Yukon, area 200,000 sq. m., pop. 27,219; Mackenzie, area 538,000 sq. m., pop. 5216; Franklin (area and pop. unascertained), and Ungava, area 276,000 sq. m., pop. 5113. Assiniboia, Alberta, Saskatchewan, and Athabasca were marked off in '82, and are properly organised and divided into electoral districts, from which the members of the Legislative Assembly are elected. In '95 and '97 the remaining territory was subdivided into the districts of Ungava, Franklin, Mackenzie, and Yukon. The Yukon was in '98 constituted a separate territory, and is administered by a Commissioner, with an Executive Council of 10 members, 5 of whom are elected. The population of the Territories was returned in 1901 at 211,649. Capital, **Regina**, in Assiniboia, with a pop. of 2000. Great lakes and large navigable rivers—the Mackenzie, Slave, Peace, Saskatchewan, among the chief—are found in the Territories. The resources are enormous, agricultural, pastoral, and mining. Vast coal fields of fairly good quality exist, and are being profitably worked. The Canadian Pacific Railway traverses Assiniboia and Alberta. The Government of the Territories consists of a Lieut.-Governor, a responsible Ministry, and a Legislative Assembly of 35 members. The new gold fields at Klondike lie in the Territories. Klondike is only a small section of Yukon. The gold-bearing area extends south-eastwards from the 141st meridian into British Columbia. Indications show that it is at least 500 miles long, and in places upwards of 100 miles wide. The arctic climate and the shortness of the summer season appear to be the great hindrances to mining operations, together with the scarcity of supplies caused by the remoteness of the district, and the great difficulty of the transit thither. Dawson City, which has sprung up at the junction of the Klondike and Yukon rivers, has a population of 9142, that of the whole district being about 27,219.

**Lieutenant-Governor**: The Hon. A. E. Forget. **Deputy Sub-General of Indian Affairs**: Mr. James A. Smart.—**Indian Commissioner**; Mr. David Laird.

**Executive Council**: **Premier and Attorney-General**, F. W. Haultain.—**Territorial Treasurer and Commissioner of Public Works**, A. L. Sifton.—**Territorial Secretary and Commissioner of Agriculture**, G. H. Bulyea.—**Clerk of Council**, John A. Reid.—**Clerk of Legislative Assembly** (vacant).—**Commissioner of Mounted Police Force**, Major A. B. Perry.

**Nova Scotia** is a peninsula connected by a narrow isthmus with New Brunswick. Incorporated with it is **Cape Breton Island**, formerly a distinct colony. Area 20,907 sq. m.; pop. 459,574. Capital, **Halifax**; pop. 40,832; a fine city and harbour, also an Imperial military and naval station. Divided into 18 counties. The coal mines near Halifax and Cape Breton turn out about 2,000,000 tons of coal per annum, and the

whole of the Dominion Government railways are worked with coal from these mines. Iron and gold are also worked, but agriculture is the chief occupation. Fishing also employs many. Administered by a Lieut.-Governor and Executive. The people elect a Legislative Council of 21 members, and a House of Assembly of 38 members. The colony was originally a French one, and then called Acadia; ceded to England 1714.

**Lieutenant-Governor:** The Hon. A. G. Jones.

**Executive Council:** *Premier and Provincial Secretary*, Hon. Geo. H. Murray.—*Attorney-General*, Hon. J. W. Longley.—*Commissioner of Works and Mines*, Hon. C. E. Church.—*Without office*, Hon. T. Johnson, A. H. Comeau, A. Macgillivray, T. R. Black, David McPherson, and W. T. Pipes.

**Ontario** (formerly called Upper Canada). **Area**, 222,000 sq. m.; **pop.** 2,182,947. It extends along the north shores of the River St. Lawrence and the great lakes, and is important as containing the Dominion metropolis **Ottawa** (pop. 59,928). Provincial capital, **Toronto**, pop. 208,040, on Lake Ontario, the second city in Canada in wealth and population. Besides the two capitals, important towns are Hamilton (pop. 52,634), London (pop. 37,981), Guelph, St. Catherine's, Brantford, Belleville, and Chatham. Administered by a Lieut.-Governor and responsible Ministry. There is only one chamber, the Legislative Assembly, which has 98 members elected by manhood suffrage for four years. The land is very fertile, and produces cereals, fruit, etc., in abundance. The lumber trade in the province is a very important one.

**Lieutenant-Governor:** His Honour W. Mortimer Clark, K.C.

**Executive Council:** *Premier and Treasurer*, The Hon. G. W. Ross, LL.D.—*Attorney-General*, The Hon. F. R. Latchford, K.C.—*Education*, The Hon. Richard Harcourt, M.A., K.C.—*Minister of Agriculture*, The Hon. John Dryden.—*Commissioner of Crown Lands*, The Hon. A. G. Mackay.—*Provincial Secretary*, The Hon. G. P. Graham.—*Commissioner of Public Works*, The Hon. A. W. Charlton.—*Ministers without portfolio*, Hon. G. M. Gibson, K.C., and Hon. F. E. A. Evanturel.

**Prince Edward Island** lies in St. Lawrence Gulf, north of Nova Scotia and between New Brunswick and Cape Breton. **Area**, 2133 sq. m.; **pop.** 103,259. Capital, **Charlottetown**, pop. 12,080. Divided into three counties. Administered by a Lieut.-Governor and Executive Council. The people elect a House of Assembly of 30 by manhood suffrage. Climate milder than neighbouring provinces. The adjoining waters include the most valuable fishing grounds of America.

**Lieutenant-Governor:** Hon. Donald A. McKinnon, K.C.

**Executive Council:** *Premier and Attorney-General*, Hon. A. Peters. *Provincial Secretary, Treasurer, and Commissioner of Agriculture*, Hon. Benjamin Rogers.—*Public Works*, Hon. J. H. Cummsky.—*Without portfolio*, Hon. James W. Richards, Hon. Peter McNutt, Hon. George Forbes, Hon. R. C. McLeod, Hon. J. F. Whear, Hon. G. Simpson.

**Agent-General in the United Kingdom:** Harrison Watson, 73, Basinghall Street, London, E.C.

**Quebec** (formerly called Lower Canada) lies eastward of Ontario, occupying both banks

of the St. Lawrence. **Area**, 347,350 sq. m.; **pop.** 1,648,898; mostly descendants of original French colonists. There are 1,291,699 Roman Catholics in the province. Capital, **Quebec**, pop. 68,840; a picturesque and very strong fortress, with historic associations. **Montreal**, a splendid city on the St. Lawrence, is the chief seaport and the most populous town in the Dominion, with 267,730 inhabitants. Other towns are St. Henri, Hull, and Sherbrooke. Administered by a Lieut.-Governor and responsible Ministry. A Legislative Council of 24 members appointed for life by the Lieut.-Governor. The Legislative Assembly has 74 members. All cereals and fruits are produced in abundance; there is a big lumber trade, and manufactures flourish.

**Lieutenant-Governor:** The Hon. Sir Louis A. Jetté, K.C.M.G.

**Executive Council:** *Premier*, Hon. S. N. Parent.—*Treasurer*, Hon. J. C. McCorkill.—*Attorney-General*, Hon. H. Archambault.—*Commissioner of Agriculture*, Hon. Adélard Turgeon.—*Commissioner of Colonisation and Public Works*, Hon. L. Gouin.—*Provincial Secretary*, Hon. A. Robitaille.—*Without portfolio*, Hon. W. A. Weir.

## NORTH ATLANTIC COLONIES.

**Bahama Islands.** A chain of islands, 600 miles in length, lying between the S.E. corner of Cuba and Florida. **Area**, 4466 sq. m. **Pop.** 53,735, the majority being of the negro race. Twenty islands of the group are inhabited, but there are besides about 3000 islets and rocks. The chief island politically is **New Providence** (area, 58 sq. miles), on which is the capital, **Nassau**, pop. 12,000, a favourite winter health resort for Americans and West Indians. Other islands are Andros, Eleuthera, Great and Little Bahama, Abaco, Inagua, etc. Much forest and valuable timber. Cattle largely reared. Saint Salvador, where Columbus first landed in 1492, is one of the Bahamas. **Chief exports:** sponges, turtles, pineapples, oranges, and sisal fibre, mainly to the United States. The Government is representative. There is a Governor and an Executive, a Legislative Council, and a House of Assembly of 29 members. Education is free, compulsory, and unsectarian.

**Governor and Commander-in-Chief**, Sir William Grey-Wilson, K.C.M.G.

**Executive Council:** *Colonial Secretary*, J. S. Churchill, C.M.G.—*Attorney-General*, Anton Bertram.—*Receiver-General*, W. R. Hunt.—R. H. Sawyer, C.M.G.; W. E. Armbrister; Joseph Brown; J. H. Young; and J. P. Sands.

**Bermuda Islands.** A group of small islands and coral reefs, situated in the North Atlantic, 600 miles east of Cape Hatteras. **Area** of group, 18 sq. m., the principal island containing 16 sq. m. **Pop.** 23,317, including military and naval forces. There are 6693 whites and 12,762 coloured persons in the civil population. Administered by a Governor with an Executive Council of 6 members, and Legislative Council of 9 members, and an elected House of Assembly of 36 members. It is a naval station, with a permanent Imperial garrison of 2779 men, and an Admiralty establishment of 1803; and is becoming a favourite winter resort for Americans and Canadians. The capital and seat of government is Hamilton. There is

regular steam communication between Bermuda and New York, Halifax, Jamaica, etc. The chief products are early vegetables, lily bulbs, and onions, and practically all the exports go to the United States. For the floating dock being constructed see **ENGINEERING**.

**Governor**, Major-Gen. Sir R. M. Stewart, K.C.B.

**Executive Council**: The Governor.—*Colonial Secretary*, Eyre Hutson.—*Attorney-General*, R. Gray.—*Receiver-General*, F. W. Major.—C. Peniston; J. H. Trimmingham.

**British Honduras**. A Crown colony in Central America, bounded by Yucatan on N., Guatemala W. and S., and Caribbean Sea E. **Area**, 7562 sq. m. The population (38,981) includes whites, aboriginal Indians, Caribs, negroes, East Indians, and Chinese. The chief towns are Belize (6972), Corosal (1514), and Orange Walk (1967). Near the coast the country is swampy, with numerous lagoons abounding. The northern district is a flat plain; but on the west, away from the coast, hills and valleys, clothed with timber, abound, and rich grassy plains afford excellent pasturage. The chief rivers are the Hondo, the New River, and the Old or Belize River. A railway is being surveyed from Belize through the hinterland into the Peten province of Guatemala. The products are chiefly logwood and mahogany (which, however, is beginning to fail on the sea littoral), with bananas, cocoanuts, plantains, rubber, and gum. The Government is composed of the Governor, an Executive Council and a Legislative Council of three official and five unofficial members.

**Governor**, Sir Ernest B. Sweet-Escott, K.C.M.G.

**Executive Council**: The Governor.—*Colonial Secretary*, P. C. Cork, C.M.G.—*Treasurer*, H. B. Walcott.—*Attorney-General*, F. M. Maxwell.—Carlos Melhado; A. Williamson, C.M.G., H. C. Usher, I.S.O.

**Labrador**. A great peninsula on the east coast of British North America, lying between the Gulf of St. Lawrence and Hudson Bay. From Cape Chidley (Hudson's Strait) to Blanc Sablon (Strait of Belle Isle), including the basin of the Hamilton, it belongs to Newfoundland, the remainder of the peninsula forming part of Quebec and the North-West Territories. The area is about 200,000 sq. miles, and pop. 3634.

### NEWFOUNDLAND.

This—the oldest British Colony—was discovered in 1497 by John Cabot with an English expedition. The area is 42,200 sq. m.; the population, including both Newfoundland and Labrador, 220,249; the capital St. John's (pop. 29,594). Newfoundland divides Labrador with Canada, her share being estimated at 120,000 sq. m., with a resident population of 4000. The Colony is ruled by a Governor, with a Legislative Council of 15 members appointed by the Crown, and a House of Assembly of 36 members elected for four years, from 18 districts, by manhood suffrage and the ballot. A branch of the Royal Naval Reserve has existed in the island since 1900. The religious bodies are: Church of England, 69,823; Church of Rome, 72,696; Wesleyan, 53,276; other denominations, 6245. Education is purely denominational. The progress of the Colony has been retarded by British policy, which until 1813 absolutely prohibited settlement.

Its real advance began in 1825, when the first resident Governor was appointed. Representative Government was granted in '32. The railway was commenced in '81, and has now been extended across the island to Port aux Basques, and tri-weekly steamship connection with the American railway system *via* Sydney, C.B., is maintained. The railway has given great impetus to pulp manufacture, mining, lumbering, and general trade. Newfoundland abounds in copper and iron, particularly at Belle Isle, in Conception Bay. In fact, from a great fishing country the island is being transformed into a great mining centre. Coal is abundant, but the output, which is in the hands of the contractor, Mr. R. G. Reid, is still inconsiderable. Newfoundland is a great place for sport. Caribou shooting is excellent, and there is good fishing for salmon and trout. The principal industries are the seal and cod fisheries, and agriculture by small farmers. The best land is in the Codroy valley and on the west coast. The export of cod averages over a million quintals, hair seals about 300,000 skins and the oil.

By the Treaty of Utrecht, 1713, certain rights were granted to French fishermen, the nature and extent of which were long in dispute. The islands of St. Pierre and Miquelon (see **FRANCE, Colonies**) are owned by the French, and a French fishing fleet has visited the coast annually, claiming the exclusive right to fish from Cape John on the east coast round north to Cape Ray on the west coast. This exclusive right was never admitted by Great Britain, nor was the contention that it included a right to the lobster fishery admitted. Further, the French claimed the right to prevent the erection of stations on the French coast, and thus many locations rich in minerals were rendered useless. A Royal Commission to inquire into the whole matter was appointed in August '98. Its general conclusions were that the French cod fishery on the coast had become practically valueless, and should be extinguished by money payment or concession elsewhere; that the lobster industry should be settled on the same basis; that the Colony should give the French free bait if they would abandon their bounties, that French interference with the Treaty Shore should be no longer tolerated, except in cases where actual damage to their fisheries could be proved; that an English Consul should be appointed at St. Pierre, to prevent the smuggling trade now carried on, with the connivance of the French authorities, with Canada and Newfoundland. From 1890 till 1904 a *modus vivendi* with France was renewed from time to time pending the final settlement of the question.

By the Anglo-French Convention signed April 8th, 1904, France renounced the privileges accorded by Article XIII. of the Treaty of Utrecht, but kept for her subjects, on a footing of equality with British subjects, and subject to all local laws and regulations, the right of fishing during the usual fishing season ending Oct. 20th, in the territorial waters of that part of the coast of Newfoundland comprised between St. John's Cape and Cape Ray going northward. The right of fishing retained for French subjects extends to every kind of fish, including bait, as well as shell fish. It was agreed that the French citizens engaged in fishing, or in the preparation of fish, on the "Treaty Shore,"

prior to the closing of the fishing season of 1903, should either abandon their establishments there or give up their occupation, receiving a pecuniary indemnity from the British Government, to be settled by an arbitration tribunal composed of an officer of each nation, with an umpire in case of disagreement. In further compensation for the surrender of her privileges a modification of the Gambia-Senegambia frontier was made in favour of France, giving Yarbata to Senegambia (see p. 75). The Los Islands, opposite Konakry Island, were also ceded to France, and a modification of the Anglo-French boundary line in the Niger and Lake Chad region was agreed upon.

Governor, Sir W. MacGregor, K.C.M.G., C.B.  
**Executive Council:** *Premier and Colonial Secretary*, the Rt. Hon. Sir R. Bond, K.C.M.G.—*Justice*, E. P. Morris, K.C.—*Finance*, E. M. Jackman.—*Agriculture*, E. Bawe.—*Ministers without portfolio*, G. Knowling, J. S. Pitts, J. D. Ryan, and H. Gear.

### History, 1904.

Parliament opened (Feb. 25th), and the *modus vivendi* on the French Treaty Shore question was again renewed (March 8th), the Government having added 3 members to the Legislative Council in order to ensure the passage of the measure, in view of the fact that in 1903 it was only carried by the President's casting vote. A month later (April 8th) the *Anglo-French Convention*, of which the effect is stated above, was signed at London. As a result of the Convention, overtures were made by Canada with a view to the island entering the Dominion; but the Government took the position that the Colony would prefer to retain its autonomy, the Finance Minister citing Newfoundland's splendid financial position as an argument for so doing. Governor Boyle, having been appointed to the Mauritius, left the Colony (May 10th), the Chief Justice acting as Administrator until the new Governor, Sir W. MacGregor, arrived (Sept. 26th). Some difficulties arose over the Convention during the summer, the French at St. Pierre making an attempt to evade the Bait Act, and some of the Newfoundland fishermen proceeding to the Treaty Shore and occupying the French stations. The general election took place (Oct. 31st), and resulted in a victory for Sir Robert Bond's Administration, his supporters being returned by a sweeping majority. The year was one of great prosperity for the Colony. The hair seal fishery was very successful, and the cod fishery, though partial at Newfoundland, was very good at Labrador, and the very high prices obtained by the fishermen fully made up for any shortness in the shore catch.

## WEST INDIES.

The name of "West Indies" was given by Columbus to the islands surrounding the Caribbean Sea. They are divisible into the Bahamas, the Greater Antilles, and the Lesser Antilles. The last are also divided into Windward and Leeward groups; and to them may be added the islands off the Venezuelan coast. The total area is estimated at upwards of 90,000 sq. m., and the total pop. at 5,000,000, of whom two-thirds are negroes.

Barbados is geographically but not politically one of the Windward group. Area, 166 sq. m.;

pop. 198,792. Capital, **Bridgetown**, pop. 30,000. It is administered by a **Governor**, with Executive Committee, consisting of 3 official and 7 unofficial members, a **Legislative Council** of 9 members, and a **House of Assembly** of 24 members, elected annually. Barbados is the headquarters for the British troops in the West Indies, and has an imperial garrison of 33 officers and 753 non-commissioned officers and men. The chief exports, which go very largely to the United States, are sugar and molasses. Asphaltum is also exported. The depression in the sugar trade and an epidemic of smallpox caused much suffering during 1902-3.

Governor, Sir G. T. Carter, K.C.M.G.  
**Executive Council:** The Governor.—*Officer commanding the Troops*, Major-General J. F. Hilton.—*Colonial Secretary*, S. W. Knaggs.—*Attorney-General*, W. H. Stoker, K.C.—Sir G. C. Pile, M.L.C.

**British Guiana.** A Crown colony in north of S. America, bounded on the east by Dutch Guiana, on the south by Brazil, on the west by Venezuela, and on the north and north-east by the Atlantic. Its area is estimated at about 104,000 square miles. Pop. 302,172. Capital, **Georgetown** (Demerara), pop. 48,192, a picturesque, well-built city and port, provided with various excellent modern institutions; second town and port, New Amsterdam (Berbice), pop. 7012. The population is mixed, including whites, negroes, aboriginal Indians, East Indian coolies, and Chinese. Rich alluvial low-lying plains extend forty to seventy miles from the coast, and are the seat of cultivation and settlement. The staple article cultivated is sugar-cane. Gold mining is now attracting considerable attention, and there are promising diamond fields. The chief lack of the colony is labourers to develop its great agricultural and mineral resources. **Executive** in hands of Governor and Executive Council; legislation conducted by a Court of Policy of 15 members, 7 official and 8 elected. For finance measures 6 elected representatives are added, forming Combined Court. Civil law is modified Roman-Dutch; criminal law is English. Exports consist chiefly of sugar, rum, molasses, and gold. Of the total trade 45.6 per cent. is with the United Kingdom, 8.4 per cent. with British possessions, 37.7 per cent. with the United States, and 3.75 per cent. with other foreign countries. The Governor announced in Feb. 1904 that the import duties in force would be reduced by way of preference in favour of the mother country and other British colonies, such as Canada, which had claims on the colony's gratitude.

Governor, Sir F. M. Hodgson, K.C.M.G.—*Government Secretary*, C. T. Cox, C.M.G.

**Court of Policy:** *President*, The Governor.—*Gov. Secretary*, C. T. Cox, C.M.G.—*Attorney-General*, Sir Thomas Rayner, K.C.—*Auditor-General*, N. Darnell Davis, C.M.G.—*Immigration Agent-General*, A. H. Alexander; and others.

**Jamaica.** The largest of the British West India Islands, lying 90 miles south of Cuba. Its length is 144 miles, and its greatest width 49 miles. Area 4207 sq. miles. The island is mountainous, and a range of hills, known as the Blue Mountains, runs from east to west, rising to 7423 feet in one place. **Turks and Caicos Islands**, southern islands of the Bahama

group (area 169 sq. miles, pop. in 1901 18,923), with important salt, sponge, and fibre industries, have been annexed to the colony, and **Grand and Little Cayman** (area 55 sq. miles, pop. 5919), **Pedro Cays** and **Morant Cays** are also dependencies. The capital of Jamaica is **Kingston**, pop. 48,500, with Spanish Town (the old capital) of next importance. The principal ports are **Port Royal** (harbour of Kingston), **Montego Bay**, and **Falmouth**. **Exports**: bananas, oranges, sugar, rum, coffee, cocoa, and dye-woods. Of the exports 68 per cent. go to the United States and 19 per cent. to the United Kingdom; of the imports 53 per cent. are sent by the United Kingdom and 40 per cent. by the United States. The Government includes a Governor, a Legislative Assembly of 29 members, 5 official, 10 nominated by the Crown, and 14 elected, and a consultative Privy Council. There is an Imperial garrison of 1790 officers and men at Kingston, and a naval dockyard and coaling station at Port Royal. Total population of Jamaica and dependencies on March 31st, 1903, 785,434, consisting chiefly of negroes.

Captain-General and Governor, Sir J. A. Swettenham, K.C.M.G.

**Privy Council**: *Senior Officer commanding the Troops*, Brigadier-Gen. Caulfield; *Colonial Secretary*, H. C. Bourne.—*Attorney-General*, H. R. Pipon Schooles.—*Director of Public Works*, Valentine G. Bell, C.M.G.; Dr. J. Pringle, Lieut.-Col. C. J. Ward.

**Trinidad and Tobago**. Trinidad is an island of rectangular shape, with an area of about 1754 sq. m., pop. 255,148, separated from the mainland of Venezuela by the Gulf of Paria. In '89 the island of **Tobago** was separated from the Windward Islands and joined with Trinidad; and in '98 it was made a ward of the united colony of Trinidad and Tobago, the revenue, expenditure and debt being merged in those of the united colony. Tobago has an area of 114 sq. m., with a population of 8,751. Scarborough (pop. 1769) is the chief town. The capital of the colony is **Port-of-Spain** (pop. 54,100), in the north-eastern corner of the island, which possesses the best harbour in the West Indies. The products are cocoa, sugar, asphalt, cocoanuts, and fibre. The asphalt output, which is the product of the Pitch Lake, the property of the Crown, is about 100,000 tons per annum, and the payment to the Government by the company which leases the lake was in 1903 £53,103. The Government consists of a Governor, an Executive Council of 7 members, and a Legislature composed of the Governor, 11 official and 11 unofficial members, all appointed by the Crown. Cocoa planting is extending rapidly, and rubber in Tobago.

Governor, Sir H. M. Jackson, K.C.M.G.

**Executive Council**: *Colonial Secretary*, H. C. Clifford, C.M.G.—*Attorney-General* (vacant).—*Auditor-General*, R. G. Bushe.—*Commandant*, Lieut.-Col. H. E. Brake, C.B., D.S.O.—*Receiver-General*, Denis Slynne, Walsh Wrightson, C.M.G., and R. H. McCarthy.

### LEEWARD ISLANDS.

The westward section of the Lesser Antilles (so called in distinction from the Windward Islands, with reference to the trade winds). Of the whole group Guadeloupe, Martinique, St. Bartholomew, and part of

St. Martin belong to France; St. Eustatius, Saba, and part of St. Martin to Holland; and some of the Virgin Isles to Denmark. Those which belong to Great Britain are described below. The Leeward Islands Confederation has representative government, with a Governor, Executive, and Federal Legislative Council, though each presidency possesses its own constitution. The Legislative Council consists of 8 official and 8 elective members. There is an armed police force 189 strong. The capital and seat of government of the Leeward Islands is **St. John** (Antigua). Total area of the colony 704 sq. miles; total pop. 127,434.

**Antigua**—i.e. "ancient," so called by Columbus, has an area of 108 sq. m.; pop. 34,971. Its capital, **St. John**, pop. nearly 10,000, is the seat of the federal government. **English Harbour** is a naval station, and one of the finest harbours in the West Indies. The island, though suffering sometimes from drought, is very fertile. Produces sugar and pineapples chiefly. Government is administered by the Governor of the Leeward Islands, and a Council, consisting of 8 official and 8 non-official members, all nominated by the Governor. Four delegates are sent to the Federal Council. **Barbuda** (pop. 775) and **Redonda** (pop. 120) are dependencies of Antigua. Exports: salt, phosphates of lime, and cattle. Area, 62½ miles; pop. 895.

**Montserrat** has an area of 32 sq. m., pop. 12,215. Capital, **Plymouth**. Governed by a Commissioner and Executive Council nominated by the Sovereign, and a Legislative Council of 4 members appointed by the Crown. Education well provided for. The chief exports are sugar, limes, coffee, and cocoa. Cotton is being grown with favourable results.

**St. Christopher, or St. Kitts**, has an area of 65 sq. miles; pop. 29,782. There is an Administrator with an Executive Council for the Presidency, which includes Nevis and Anguilla, and a Legislative Council of 6 official and 6 unofficial members. Capital, **Basseterre**, pop. about 10,000. Sugar and sugar products are the chief exports, but cotton is now being grown with success. **Nevis** has an area of 50 sq. miles; pop. 12,774. Capital **Charlestown**, pop. 1500. The island is simply a single cone-shaped mountain, surrounded by a margin of low lands. **Anguilla** has an area of 35 sq. m.; pop. 3890. It is low and flat, deficient in wood and water. Produces salt from a lake, phosphate of lime, cattle, ponies, and garden stock.

**Dominica** lies between Guadeloupe and Martinique. Area, 291 sq. m.; pop. 28,894. Capital, **Roseau**, pop. 5764; second town **Portsmouth**. Cocoa, limejuice, coffee, fruits, and spices are the chief productions. Two-thirds of the people speak French, but the use of English is increasing. The Council consists of 12 members, 6 official and 6 non-official, all nominated by the Governor.

The **Virgin Islands** lie immediately to the west of **Puerto Rico**. Of the principal islands, Denmark possesses **Santa Cruz**, **St. Thomas**, and **St. John**; and England owns **Tortola**, **Virgin Gorda**, and **Anegada**. The latter, with smaller islands, form a presidency, under the administration of a Governor. The total area, embracing in all about 32 islands, is 58 sq. m.; total pop. 4908.

Governor of Leeward Islands, Sir C. C. Knollys, K.C.M.G.

**Executive Council:** The Governor.—*The Administrator of St. Kitts and Nevis; The Administrator of Dominica,—Colonial Secretary and Attorney-General, E. St. J. Branch.—T. D. Foote, J. J. Camacho, E. A. Foster, Francis Watts, C.M.G., W. H. Whyham, Sir D. Morris, K.C.M.G.*

### WINDWARD ISLANDS.

The Windward Islands, so called in distinction from the Leeward Islands, with reference to the trade winds, form part of the Lesser Antilles. All the islands are, for administrative purposes, under one Governor and Commander-in-Chief, but each has its own Administrator and separate institutions. There is no common legislature, laws, revenue, or tariff; but there is a common Court of Appeal, consisting of the Chief Justices of the Islands and of Barbados. The total area of the colony is about 524 sq. miles, and the total pop. about 163,000.

**Grenada** is the largest of the group, and is the residence of the Governor of the Windward Islands. Its area is about 133 sq. miles, and the population 65,627. Capital, **St. George** (pop. 5188). The products are cocoa, fruits, cotton, coffee, and spices. The Government includes the Governor-in-chief of the Windward Islands, an Executive Council of 6, and a Legislative Council of 13—6 official, and 7 nominated by the Crown.—The Grenadines are a cluster of islets lying between Grenada and **St. Vincent**, some of which are subordinate to Grenada and some to **St. Vincent**. Area, 25 sq. m., pop. 6400. The largest is Carriacou, with an area of 10 sq. m. and pop. 6497. Revenue (1902-3), £72,803; expenditure, £68,669; debt, £123670; imports (1902), £239,103; exports, £310,602.

**St. Lucia** is the most northerly island of the colony. Area about 234 sq. m.; pop. 50,354. Capital, **Castries** (pop. 8000), the harbour of which is one of the best in the West Indies, and which is the chief coaling station for the fleet there. The whites are mostly French Creoles; the dominant religion is Roman Catholic, and education chiefly so; the law is based on old French codes. The scenery of the island is exceptionally beautiful. Products chiefly sugar, cocoa, tobacco, and spices. Government in the hands of an Administrator with a nominated Executive and Legislative Council.

**St. Vincent** lies about 21 miles south-west of **St. Lucia**. Area about 132 sq. m.; pop. 47,488, of whom about 32,000 are blacks. Capital, **Kingstown** (pop. 4547). Revenue, 1902-3, £29,292; expenditure, £28,389; debt, £6770; imports, 1902, £79,123; exports, £44,094. Chief exports: arrow-root, sugar, cocoa, live stock and poultry, fruit and vegetables. The fisheries are abundantly productive. Efforts are being made to establish a cotton industry. The Government includes an Administrator and a Legislative Council of 4 official and 4 unofficial members, all nominated by the Crown. Terrible volcanic eruptions occurred in 1902, the Soufrière volcano being the centre of the disturbances, which were accompanied by earthquakes, and caused great loss of life and damage to property. Eruptions also took place in 1903.

**Governor (and Governor of Grenada),** Sir R. B. Llewellyn, K.C.M.G. — **Administrator of St. Lucia,** Sir G. Melville, K.C.M.G. — **Administrator of St. Vincent,** E. J. Cameron.

## AUSTRALASIA.

### THE COMMONWEALTH OF AUSTRALIA.

Australia is the largest island in the world—about one-fifth less than Europe, and about as large as the United States, excluding Alaska. It extends 2400 miles west to east, and 1971 miles north to south. Area computed at 2,946,691 sq. miles, or twenty-six times the size of Great Britain and Ireland. Present total population about 3,925,000. It is a British possession, and consists of the colonies of Queensland, New South Wales, Victoria, South Australia, and Western Australia, all of which, together with Tasmania (area 26,215 sq. miles; pop. 175,000), combined as Original States to form, as from Jan. 1st, 1901, a Federal Commonwealth under the title of the **Commonwealth of Australia**. Australia is a great plateau, elevated on the east and inclined towards the west. The eastern half and most of the other territories bordering the coasts on north and west are extremely fertile, and well adapted for grazing. Wool still continues to be the staple export, but the trade in frozen and tinned meat is increasing, and a wine industry is rapidly growing up, especially in South Australia and Victoria. The total imports of wine from Australia into the United Kingdom were 736,754 gallons in 1901 and 992,844 gallons in 1902. The great central depression is sterile, and almost impassable on account of want of water, together with prickly growths. Coal abounds in various districts, particularly in New South Wales and Queensland. Gold, silver, tin, iron, and copper are extensively worked. Climate varies from tropical to temperate. There are over 13,600 miles of railroad open, but, as will be seen below, they remain under the control of the States, and are not made a Commonwealth service. The black aborigines are few, and rapidly decreasing, but their present strength is probably about 200,000. The progress of the country during the last fifty years has been wonderful, but this progress has not been attained without considerable expenditure.

The **Constitution of the Commonwealth** is contained in the Commonwealth of Australia Constitution Act 1900, and provides for the admission of other Australasian colonies and British possessions. Any proposal to alter the Constitution must be passed by an absolute majority of each House of Parliament, and submitted to the electors in each State. The legislative power is vested in a **Federal Parliament**, consisting of the King, a Senate, and a House of Representatives. A **Governor-General**, with a salary of £10,000 per annum, represents the King. The Senate consists of 36 members, six for each Original State, directly chosen by the people of the State voting as one electorate (though Queensland has power to divide the State into divisions) for a term of six years. The Senate cannot originate or amend Bills appropriating revenue or moneys or imposing taxation, but, with this exception, has equal power with the House of Representatives. If the Senate thrice rejects a Bill passed by the House of Representatives, or insists on passing it with amendments to which the other House will not agree, the Governor-General may dissolve the Senate and the House of Representatives. In the event of disagreement after the dissolution, the Governor-General has power to convene a joint sitting of the members of

the two Houses, to vote together and decide the point or points at issue. The **House of Representatives** consists of 75 members directly elected for three years by the people of the Commonwealth, the number of members being, as nearly as practicable, twice the number of senators. New South Wales has 26 members; Victoria, 23; Queensland, 9; South Australia, 7; Western Australia, 5; and Tasmania, 5. A person entitled to become a member of the House or of the Senate must be twenty-one years of age, must be an elector or a person qualified to become an elector, must have resided within the limits of the Commonwealth for at least three years; and must be a subject of the King, either natural-born or for at least five years naturalised. Senators and members of the House of Representatives receive an allowance of £400 a year. The Federal Parliament has power to make laws for trade, taxation, bounties, borrowing, postal services, naval and military matters, currency, banking, divorce, marriage, old age pensions, immigration and emigration, etc. The **State Parliaments** retain legislative authority in regard to all matters not transferred to the Federal Parliament. **State Governors** are still appointed by the Crown, and they still correspond on State business directly with the Secretary of State for the Colonies, the Governor-General being kept informed. When a proposed law is passed by both Houses of Parliament the Governor-General may assent, withhold assent, reserve the law for the King's pleasure, or return it to the House in which it originated, with any amendments which he may recommend, and the Houses may deal with the recommendation. The King may disallow any law within one year from the Governor-General's assent, and such disallowance shall annul the law from the day when the disallowance is made known. A measure reserved for the King's pleasure is not to have any force unless and until, within two years from the day on which it was presented to the Governor-General, the Governor-General makes known that it has received the King's assent.

The executive power of the Commonwealth is exercisable by the Governor-General as H.M.'s representative, with an Executive Council of 7 **Ministers of State**, whose salaries may not exceed, in all, £12,000 per annum. The judicial power of the Commonwealth is exercised by a Federal Supreme Court, called the High Court of Australia, and other Courts vested with Federal jurisdiction. Trade, commerce, and intercourse among the States are absolutely free. An Inter-State Commission appointed by the Governor-General has powers of adjudication and administration for the execution and maintenance within the Commonwealth of the provisions of the Constitution relating to trade and commerce, and of all laws made thereunder. The Commonwealth makes uniform customs and excise duties, and of the net revenue from such duties not more than one-fourth may be applied by the Commonwealth towards its expenditure. A State cannot coin money nor make anything but gold and silver coin as legal tender in payment of debts. The Commonwealth cannot make any law for establishing any religion, or for imposing any religious observance, or prohibiting the free exercise of any religion, and no religious test is required as a qualification for any office or public trust.

**Primary Education** is compulsory and secular in all the States, though in New South Wales and Western Australia secular instruction is held to cover general religious teaching as distinguished from dogmatic instruction. In Queensland, South Australia, Victoria, and Western Australia public instruction is free, but in New South Wales a fee of 3d. is charged, and small fees are required in Tasmania from those able to pay. The school age is 6 to 14 years in New South Wales, 6 to 13 in Victoria, 6 to 12 in Queensland, and 7 to 13 in South Australia and Tasmania. **Secondary Education** is very generally provided and liberally assisted by the State; grammar, high, and technical schools do good work; all the States except Tasmania have agricultural colleges; and finally there are the **Universities** of Sydney, Melbourne, and Adelaide. Abundant provision is made for elementary scholars to mount this educational ladder.

The Commonwealth Executive Council adopted (July 24th, 1903) a new army organisation scheme, the present position of which is given in ARMY, BRITISH IMPERIAL, on p. 28.

The local naval forces consist of 242 permanent officers and men, and 1637 partially paid members of naval brigades, the maintenance of these forces costing £75,000 per annum. The Imperial naval force on the Australian Station (including New Zealand) was fixed at the Colonial Conference 1902 at not less than one 1st-class armed cruiser, two 2nd-class and four 3rd-class cruisers, four sloops and a Royal Naval Reserve consisting of 25 officers and 700 seamen and stokers, all under the control of the Naval Commander-in-Chief appointed to the Australian Station. Of the ships, one is to be kept in reserve, and three only partly manned and used as drill ships for training the Reserve, the remainder to be kept in commission fully manned. The Colonial contribution towards maintenance, it was agreed, should be raised from £126,000 to £240,000 a year (£200,000 being contributed by Australia).

The **Immigration Restriction Act**, which became law at the end of 1901, provided that no person shall be allowed to land in Australia who, "when asked to do so by an officer (the word 'officer' being defined as meaning an officer specially appointed or any Customs officer) fails to write out at dictation, and sign in the presence of the officer, a passage of fifty words in length in a European language directed by the officer." There are additional clauses providing that workers under contract are inadmissible unless skilled and absolutely required by the Commonwealth.

The seat of government (which is temporarily Melbourne) is to be in the State of New South Wales, and the Parliament sits at Melbourne until the seat of government shall be decided upon. In 1904 both Houses of Parliament selected **Dalgety**, a township 296 miles south of Sydney, on the Snowy river, with a pop. of about 300.

There are in all about 1200 papers published in Australasia, but the leading dailies may be counted on the fingers. Sydney, the capital of New South Wales, boasts the oldest paper in the Australian colonies—the *Sydney Morning Herald* (London office, 40, King Street, Cheap-side). In point of circulation the *Sydney Daily Telegraph* probably stands first, with 70,000 daily. Editor, Mr. Ward. London offices, 160, Fleet Street. The *Sydney Sunday Times* is the only

journal which has special and exclusive cables from London. Mr. J. Henniker Heaton, M.P., has a large interest in the *Sydney Town and Country Journal* and the *Evening News*, upon which papers he was formerly engaged. The *Sydney Bulletin* must also be mentioned. The two great journals of Melbourne are the *Melbourne Argus* (London office, 80, Fleet Street, E.C.) and the *Melbourne Age* (London office, 160, Fleet Street).

In South Australia, Adelaide possesses two important dailies, the *Advertiser* (London representative, Mr. W. E. Robinson, 160, Fleet Street), of which the editor and proprietor is Sir J. Langdon-Bonython, and the *Register* (London office, 80, Fleet Street). Brisbane, the capital of Queensland, has the *Brisbane Courier* and the *Brisbane Telegraph*; whilst in Western Australia the *Western Australian* possesses a good reputation, and in Tasmania the *Hobart Journal* may be similarly classed.

Cable news is supplied by the **Australian Press Association**, 80, Fleet Street, E.C.

Revenue, 1902-3, £12,105,878; '03-4, £11,631,056. Expenditure, 1902-3, £3,901,759; '03-4, £4,252,562. Surplus revenue paid to States, 1902-3, £3,200,457; 1903-4, £7,382,460. Imports, 1903, £67,468,533, of which £24,431,740 was Australian produce imported from one State to another, £5,225,322 external produce imported from one State to another, and £37,811,471 external produce imported from overseas. Exports, 1903, £77,618,363, of which £59,919,170 was Australian produce sent overseas, £10,906,853 Australian re-exports, and £6,792,340 other re-exports. The total State debts of the Commonwealth amounted in 1904 to £228,775,395.

Governor-General, Lord Northcote, G.C.M.G., G.C.I.E., C.B.

Ministry: Prime Minister and Minister for External Affairs, Rt. Hon. G. H. Reid, P.C., K.C.—Trade and Customs, Hon. Allan McLean.—Treasurer, Rt. Hon. Sir George Turner, P.C., K.C.M.G.—Home Affairs, Hon. Dugald Thomson.—Attorney-General, Sir J. H. Symon, K.C.M.G., K.C.—Postmaster-General, Hon. Sydney Smith.—Defence, Lieut.-Col. the Hon. J. W. McCay.—Vice-President of the Council, Hon. J. G. Drake.

### Political Parties.

There have from the beginning been three parties in the Commonwealth Parliament. The first Cabinet was formed by Mr. (now Sir Edward) Barton, and the first election, in March 1901, turned on the Tariff question in most of the States, though in Queensland the chief issue was the question of black labour on the sugar plantations. In the result the Government secured a majority in both Houses, but the Labour party secured 76 seats in the House and 8 in the Senate. Mr. G. H. Reid became the leader of the Opposition, and Mr. Watson of the Labour party. In Sept. 1903 the Ministry was reconstituted, Sir E. Barton resigning the Premiership to become a Judge of the High Court, and Mr. Deakin succeeding him.

The second general election took place on Dec. 16th, 1903, and the modifications in the state of parties are shown below. In the Senate there were:

	Before Election.	After Election.
Ministerialists . . . .	12	8
Opposition . . . . .	16	14
Labour . . . . .	8	14

In the House of Representatives there were:

	Before Election.	After Election.
Ministerialists . . . .	32	26
Opposition . . . . .	27	26
Labour . . . . .	16	23

The following table shows the position of parties in each of the States, as well as in the Commonwealth as a whole:—

### HOUSE OF REPRESENTATIVES.

	Seats.	Minis- terialists.	Opposi- tion.	Labour.
New S. Wales	26	3	16	7
Victoria . . . .	23	16	5	2
Queensland . . .	9	1	1	7
S. Australia . .	7	2	3	2
W. Australia . .	5	1	0	4
Tasmania . . . .	5	3	1	1
	75	26	26	23

The main feature of the election was, of course, the triumph of the Labour party. In New South Wales Mr. Reid and the Free Trade party won a great victory. In Victoria the fight was mainly on the question of labour legislation. Women voted for the first time, and went to the poll in large numbers.

The changes of Ministry in 1904 are described in *History, 1904*, below.

### History of Australia, 1904.

Lord Tennyson, on leaving the Commonwealth, addressed a Message to the Prime Minister and the people, thanking them for the kindness and courtesy shown to Lady Tennyson and himself, and expressing his belief in a yet closer union of the British Empire still to be accomplished (Jan. 20th). Lord Northcote, the new Governor-General, landed (21st), and was met by the Federal Ministers and escorted to Parliament House to be sworn in. Replying to addresses of welcome, he said (29th) that the King had sent through him a message to the Australian people expressing His Majesty's appreciation of the services of the Australians during the war in South Africa, and his gratitude for the welcome accorded to the Prince and Princess of Wales during their stay in Australia. In opening Parliament the Governor-General declared that Preferential Trade would secure to Australia an immense and stable market, and expressed the hope that a further conference of the State Treasurers (in addition to one already held) would result in a satisfactory arrangement for the taking over of State debts, and would allow the adoption of a system of Old Age Pensions throughout the Commonwealth.

The Conference of State Treasurers was a very important one. Sir George Turner proposed that the Commonwealth should, as provided by the Constitution, take over all the State loans contracted before federation, and in addition those contracted since (amending the Constitution to permit this); that the Commonwealth should use the three-fourths of the net Customs and Excise revenue (now repaid to the States) to pay interest on the loans, and, since that would not suffice, should also receive the railway revenue of the States and use what might be necessary, repaying the balance to the States; that all future State borrowing should be done through the Commonwealth Government, the Federal Treasurer having

discretion as to the time of raising the loan, and power to refuse the loan if the total interest thus incurred should exceed the amount of State revenue over which he had control; and that a sinking fund of 1 per cent. should be attached to every new loan. In the main these proposals found general acceptance, and when Sir George Turner, who accepted office as Treasurer under Mr. Reid, presented his Budget on Oct. 18th, he said that he hoped a further conference would bring matters to a successful issue.

A Bill for the establishment of a **Court of Conciliation and Arbitration** was announced, and was at once introduced (Mar. 2nd). It excluded Government employes from its operation, and the Labour party at once took issue on this point. Mr. Watson, leader of the Labour party, introduced a motion that the House should record its grave objection to the introduction of Chinese into the Transvaal until a referendum of whites on the subject had been taken or responsible government had been granted. The Premier (Mr. Deakin) said the war would have presented a very different aspect, and made a very different appeal in Australia, had it been known that the Chinese would be admitted. The motion was carried by 53 votes to 5, and the Senate adopted a similar resolution. When the trial of strength came off between the Government and the Liberal party, over an amendment proposing to bring the State employes under the Arbitration Bill, the New South Wales free traders voted with the Opposition and defeated the Ministry (April 21st) by 38 votes to 29. Mr. Deakin and his Cabinet at once resigned, and Mr. Watson, the leader of the Labour party, formed a Ministry consisting entirely of members of his party, with the exception of Mr. Higgins, the Attorney-General (26th). For the sake of future reference the constitution of the Ministry may be given: Premier and Treasurer, Mr. Watson; External Affairs, Mr. Hughes; Attorney-General, Mr. Higgins; Home Affairs, Mr. Batchelor; Trade and Customs, Mr. Fisher; Defence, Mr. Dawson; Postmaster-General, Mr. Mahon; Vice-President of the Council, Mr. McGregor. Mr. Watson unfolded the policy of his Administration to the House of Representatives (May 18th). The Arbitration Bill would be gone on with, and clauses would be added including in its operation railway servants and other Government employes. The Capital Site Bill would be introduced, providing for an inalienable territory 30 miles square. A Bill to appoint a High Commissioner of the Commonwealth in London; a Fraudulent Trade Marks Bill, to stop the rampant commercial immorality; and Bills dealing with New Guinea, providing for a survey of the transcontinental railway, etc., would be introduced. Negotiations for union between the followers of Messrs. Deakin and Reid had been going on for some time, but the proposed coalition was not completed.

Mr. Watson went on with the Arbitration Bill, and very soon found himself in trouble, owing to his awkward position between the two strong parties led by Mr. Reid and Mr. Deakin. The latter and most of his followers for some time supported the Ministry, but gradually his party became disintegrated. The Ministry were twice defeated. The first time (July 10th) was on a motion made by the Premier to bring over-sea shipping engaged

in coastal trade within the provisions of the Arbitration Bill. The voting was 26 to 22. The second time the Government were defeated (August 12th) by 36 votes to 34 on another question connected with the Arbitration Bill—viz. a proposal empowering arbitration courts to order employers to give preference to trade unionists over non-unionists, where it was possible to get unionists of equal skill, when a case happened to come before the court. Mr. Watson sought to dissolve Parliament, but the Governor-General would not consent, and sent for Mr. Reid, who formed a new Administration (17th), Sir George Turner becoming Treasurer. Mr. Reid stated (Sept. 7th) that the Government would respect the people's decision in favour of fiscal peace, and with regard to Preference would await some definite proposal from the Imperial Government. He proposed to take up the Conciliation Bill where it had been left by his predecessor. The appointment of a High Commissioner in London would be postponed till the next Session, and he would endeavour to arrange with the State Governments for a joint representation of Australia in England.

Mr. McCay, the Defence Minister, outlined a new scheme of defence, providing for a Council of Defence, including expert members with consultative powers, supervising naval and military administrative boards—the latter being separate from the executive command. The scheme passed the House of Representatives (Nov. 25th). See separate article as to events connected with the FISCAL QUESTION.

### ***The Constituent States.***

**New South Wales** is the oldest of these, and was founded as a penal settlement in 1788. It has Queensland on the north, and Victoria on the south. From the sea upon the east it stretches to about long. 140° E., which meridian divides it from South Australia. Total area, 310,700 sq. m.; pop. in 1903, 1,417,870. The capital is Sydney, on Port Jackson, pop. 488,968. Ruled by a Governor and responsible Ministry. Legislative power is vested in a Parliament of two houses. The upper, or Legislative Council, consists at present of 63 members (the number is unlimited, but is not to be less than 21) appointed by the Governor for life. The lower house, or Legislative Assembly, is composed of 90 members, elected triennially on a basis of manhood suffrage. Every male subject above twenty-one, having resided for one year in the colony and for one month in his electoral district, possesses a vote. The elections take place all on the same day. Members are paid the sum of £300 a year. For local government purposes the colony recognises 78 boroughs and 112 municipal districts, besides Sydney. There is also a division into 141 counties. The Church of England has by far the most adherents, next coming the Roman Catholics, the Presbyterians, the Wesleyans and the Congregationalists, in the order named. There is no state aid to religion. There are 3025 miles of Government railway open. Much grain is grown, and there are nearly 30,000,000 sheep in the colony. There are large forests, and gold, silver, lead, zinc, coal, and copper are mined. The staple export is wool, to the amount of over £7,680,000 in 1902. Silver and gold, coal, hides, tallow, and frozen meat are also exported.

The referendum at the end of 1903, on the

proposed reduction of the number of members in the Legislative Assembly, showed a majority of 143,102 votes in favour of the reduction from 125 to 90 members. A Bill was accordingly introduced and passed through all its stages in Jan. 1904. In June Sir John Lee, the Premier, resigned, and Mr. Waddell reconstructed the Administration; while later in the year a new Cabinet was formed by Mr. Carruthers, after the general election in August had given a majority against Mr. Waddell's Government. Mr. Carruthers stated on Sept. 20th that he proposed to establish a portfolio of Agriculture, to abolish the post of Agent-General in London, in view of the appointment of a Federal representative, and to reduce the status of the Governor.

**Revenue**, 1903-4, £11,553,744; **expenditure**, £11,535,947. **Imports**, 1903, £26,779,169; **exports**, £26,738,111. **Public debt**, 1904, £80,033,580.

**Governor**, Sir H. H. Rawson, K.C.B.—**Lieutenant-Governor**, Sir Frederick M. Darley G.C.M.G.

**Ministry**: *Premier and Colonial Treasurer*, Hon. J. H. Carruthers.—*Colonial Secretary*, Hon. J. A. Hogue.—*Public Instruction, Labour, and Industry*, Hon. B. B. O'Connor.—*Public Works*, Hon. C. A. Lee.—*Attorney-General and Justice*, Hon. C. G. Wade.—*Mines and Agriculture*, Hon. S. W. Moore.—*Lands*, Hon. James Ashton.—*Vice-President of the Executive Council*, Hon. John Hughes, M.L.C.—*Without portfolios*, Hon. William Thomas Dick.

**Acting Agent-General in London**, Rt. Hon. the Earl of Jersey, P.C., G.C.B., G.C.M.G., Westminster Chambers, 9, Victoria Street, S.W.—**Secretary**, T. G. White, Esq.

**Norfolk Island**, 900 miles east from Australia (area 12 sq. miles, pop. 827), is administered as a dependency by a resident magistrate, assisted by an elected council of 12 members. The chief village is Kingston. **Lord Howe Island** (pop. 100) is also a dependency, administered by a visiting magistrate from Sydney.

**Queensland** was originally administered by New South Wales, as forming part of that colony; but in 1859 it was given a separate status. It comprises the N.E. section of the continent, immediately N. of New South Wales. It is 1300 miles from N. to S., and 900 miles from E. to W., including 668,497 sq. m. of area. **Population**, 523,266. The capital is **Brisbane**, pop. 121,262, situated on the river of that name, 500 miles N. of Sydney. Other **leading towns** are Charters Towers, Gympie, Toowoomba, Maryborough, Rockhampton, and Townsville. The colony is separated into three divisions—Southern, Central, and Northern. In the first the bulk of the population reside, with 45 representatives in Parliament; the Central district has 11 representatives; and the Northern 16. The north yields tropical produce of all kinds, and in many of the seaboard districts a most important sugar industry is established, with small proprietors farming limited areas. There are about 9000 Kanakas and other Polynesians in the sugar districts. The Commonwealth Government in 1901 passed the Pacific Islands Labourers Act, providing that all Polynesians should be sent back to their islands by the end of 1906, and prohibiting their importation after that time. In the southern portions of the colony products of the temperate zone flourish, and wheat forms an important item of agriculture. The pastoral industry is very large,

and mining is a considerable industry—gold, silver, copper, tin, and coal all being worked. Timber is found in abundance, both hard and soft woods being indigenous. There are supplies of smokeless coal near Rockhampton and near Port Gladstone. **Executive** vested in Governor and responsible Ministry. **Parliament** consists of two houses—**Legislative Council** and **Legislative Assembly**. The former is composed of 39 members, nominated for life by the Governor on the advice of the Ministry. No limit is placed to the number of members. The latter has 72 members elected from 61 electoral districts for three years on a manhood-suffrage basis, with a residential qualification in the colony of six months. The members are paid £300 a year. The principal religious bodies are Church of England, Roman Catholic, Methodist, and Presbyterian. Valuable land grants were formerly made to these bodies, which they now retain free from taxation. The chief **exports** are gold, wool, frozen meat, hides and skins, and sugar. There are about 2830 miles of railway open.

**Revenue**, 1903, £4,185,125; **expenditure**, £3,717,806; **imports**, 1903, £6,731,207; **exports**, £9,514,974; **public debt**, £39,069,227.

**Governor**: Sir Herbert C. Chermiside, G.C.M.G., C.B.—**Lieutenant-Governor**, Sir Hugh M. Nelson, P.C., K.C.M.G.

**Ministry**: *Premier, Chief Secretary and Railways*, Hon. A. Morgan.—*Education*, Hon. A. H. Barlow.—*Public Works and Mines*, Hon. W. H. Browne.—*Treasurer*, Hon. W. Kidston.—*Public Lands*, Hon. J. T. Bell.—*Attorney-General*, Hon. J. W. Blair.—*Home Secretary*, Hon. P. Airey.—*Agriculture*, Hon. D. F. Denham.

**Agent-General in London**, Hon. Sir Horace Tozer, K.C.M.G. **Chief Clerk**, J. M. Grant, Westminster Chambers, 1, Victoria Street, S.W., and 49, Eastcheap, E.C. (City Branch).

**South Australia** comprises the central section of Australia, and stretches across the entire continent from north to south. The older portion, South Australia proper, lies between 129° and 141° E. long., and from the sea to 26° S. lat. To this was added in 1863 the **Northern Territory**, lying between 129° and 138° E. long., stretching up to the Indian Ocean, and containing an area of 523,620 sq. m., with a population of 4890 and about 20,000 aborigines. The capital is Palmerston, on the noble harbour of Port Darwin. Mineral and agricultural resources considerable. Cotton growing is to be encouraged. Local administration is in the hands of a Resident, but the Government have invited the Commonwealth to assume control of the Territory. Various islands on both the south and north coasts belong to the colony. The whole colony, thus constituted, contains an area of 903,690 sq. m., and a population of 389,727. Capital, **Adelaide**; pop., with surrounding suburbs, 163,430. There is much fair pasture-land; but the soil and climate of the south are chiefly adapted for the growth of wheat, which has already made the colony the "granary of Australasia," and for vine and olive, both of which are now extensively planted. The mulberry thrives, but sericulture has yet to be introduced. The climate of the south is one of the most agreeable and healthy in Australia. The chief minerals are copper, gold, silver, and lead, copper being easily first. **Executive**, the Governor and responsible Ministry. **Parliament** consists

of Legislative Council and House of Assembly. Council consists of 18 members, half retiring every three years. £50 freehold or £20 annual leasehold, or £25 annual rent with a six-months' registration, qualifies for the franchise. The Assembly contains 42 members elected triennially by adult suffrage. Members of both Council and Assembly are paid £200 per annum. No member can sit in either House and in the Commonwealth Parliament at the same time. For local government purposes there are 32 municipal and 140 district councils. The Church of England, the Roman Catholics, and Wesleyans, are the principal denominations. Wool, wheat, and copper are the chief exports. There are 1882 miles of railway open.

Revenue, 1903-4, £2,510,955; expenditure, £2,543,185; imports, 1902, £6,073,782; exports, £7,698,514; public debt, £28,547,995.

Governor, Sir George R. Le Hunte, K.C.M.G. Lieutenant-Governor, Rt. Hon. Sir S. J. Way, Bart., D.C.L.

Ministry: Premier and Chief Secretary, Hon. J. G. Jenkins.—Treasurer and Commissioner of Crown Lands, Hon. H. R. Butler.—Attorney-General and Education, Hon. R. Homburg.—Public Works and Industry, Hon. J. Vardon.

Agent-General in London, Hon. Allerdale Grainger. Secretary and Registrar of Inscribed Stock, J. B. Whiting, Threadneedle House, 28, Bishopsgate Street, E.C.

Tasmania is an island south of Australia, and separated from it by Bass's Straits, 120 miles across. Formerly called Van Diemen's Land. Extends 210 miles north to south, and 200 miles west to east. The area is 26,215 sq. m., or (including the islands belonging to the colony) 26,375 sq. m., with a pop. of 174,233. Capital, Hobart, pop. 34,682, in the south. Second city, Launceston, pop. 21,294. Several groups of islands are looked upon as being within the colony, including the Furneaux group, King Island, and Brunel Islands. Ruled by a Governor and responsible Ministry. There are also a Legislative Council of 18 members elected for a term of six years, and a House of Assembly of 35 members elected for three years by manhood suffrage with a 12 months' residential qualification. Members are paid £100 per annum. For local government there are municipal councils, town boards, and road and water trusts. As to religion, the Church of England, Roman Catholic and Wesleyan Methodist are the chief denominations, numbering respectively 30,810, 87,343, and 11,639 adherents. The climate is most healthy and temperate. The minerals found are copper, gold, tin, coal, and silver. Wool, wheat, oats, and hay are largely produced, and agriculturists are beginning to turn their attention to fruit and hops. There are 620 miles of railways, of which about 459 are Government property. The Administration of Mr. Propping resigned office in July 1904, and Mr. Evans formed a new Ministry.

Estimated revenue, 1904-5, £861,900; expenditure, £849,434; imports, 1903, £2,593,810; exports, £2,843,108; public debt, £9,318,400.

Governor, Sir Gerald Strickland, K.C.M.G.

Ministry: Premier, Hon. J. W. Evans, M.H.A.—Treasurer and Minister for Mines, Hon. Charles Stewart, M.H.A.—Chief Secretary, Hon. William Moore, M.L.C.—Attorney-General, Hon. Crosby Gilmore, M.H.A.—Lands and Works, Hon. Alexander Hean, M.H.A.

Agent-General in London, Hon. Alfred Dobson,

C.M.G.—Secretary, Herbert W. Ely, 5, Victoria Street, S.W.

Victoria is the smallest in size and southernmost in position of the colonies in Australia. It occupies the south-eastern corner, and is divided from New South Wales on the north by the Murray river, and from South Australia on the west by the 141st meridian of E. long. Area, 87,884 sq. miles; pop. 1,205,513, including 9400 Chinese and 565 aborigines. The capital is Melbourne, the largest city in Australia (pop. 502,120), situated on Hobson's Bay and the river Yarra. Executive is vested in the Governor and responsible Ministry. There are two Houses of Parliament. The Legislative Council consists of 35 members, elected for six years by male citizens possessing freehold property worth £10 per annum or leasehold with tenure of at least five years, worth £15 per annum, or occupying as tenant property of the same annual value, unless possessed of educational qualification. The Legislative Assembly of 68 members is elected triennially by ratepaying qualification or manhood suffrage. Members of the Lower House are paid £300 a year. For local government the colony is divided into 60 urban and 148 rural municipalities, each with an elective Council. The chief religious denominations are the Church of England, Presbyterians, Methodists and Roman Catholics. Agriculture, mining and manufactures employ the bulk of the population. The chief products are gold, wool, wheat, and butter. The gold produced in 1902 was £3,062,028. Coal is found of good quality, with enormous deposits of brown coal. There are 3303 miles of railway in operation. Mr. Irvine, Premier of Victoria, resigned (Feb. 9th, 1904) owing to ill-health, and Mr. Thomas Bent, Minister of Public Works, then formed a new Ministry (18th).

Revenue, 1902-3, £6,954,619; 1903-4, £7,508,250; expenditure, 1902-3, £6,759,960; 1903-4, £6,914,993; imports, 1903, £17,859,171; exports, £19,707,068; public debt, 1904, £52,424,600.

Governor, Major-Gen. the Hon. Sir Reginald A. J. Talbot, K.C.B.

Ministry: Premier, Treasurer, and Minister for Railways, Hon. Thomas Bent, M.L.A.—Attorney-General and Solicitor-General, Hon. J. M. Davies, M.L.C.—Public Works and Public Health, Hon. E. H. Cameron, M.L.A.—Lands and Agriculture, Hon. John Murray, M.L.A.—Mines, Hon. D. McLeod, M.L.A.—Chief Secretary and Labour, Hon. Sir Samuel Gillott, M.L.A.—Education, Hon. A. O. Sachse, M.L.C.—Water Supply, Hon. Geo. Swinburne, M.L.A.—Portfolios without office, Hon. William Pitt, M.L.C., Hon. J. E. Mackey, M.L.A., and Hon. T. Langdon, M.L.A.

Agent-General in London, Hon. J. W. Taverner (Hon. Alfred Dobson Acting Agent-General).—Secretary, A. W. Arkill. Offices, 142, Queen Victoria Street, E.C.

Western Australia comprises all the western half of Australia beyond the 129th meridian of E. long. It is 1480 miles N. to S. and 1000 E. to W., and has a coastline of 5200 miles. Area, 975,920 sq. m.; pop., 1903, 224,311. Capital, Perth, pop. 44,373; chief port Fremantle, pop. 24,000. Representative government was first given to the colony in '70 in a limited form; but in '90 the Imperial Parliament gave a new constitution, vesting the administration in a Governor and Parliament. The Legislative Council, or Upper House, contains 30 members elected for six

years; the Legislative Assembly, or Lower House, contains 50 members elected for three years. Electors to the Council must have resided in the State for six months, and possess £100 freehold or £25 per annum leasehold, or be householders to the value of £25, or occupy or mine Crown lands rented at £10 per annum. The qualifications of electors to the Assembly, who may be of either sex, are—six months' residence in the district; or the possession of £50 freehold or £10 leasehold, or holding a house of the value of £10, or leasing Crown lands at £5 per annum. For local government purposes there are 45 municipal councils and 91 district roads boards. The climate varies considerably, for the colony stretches over twenty degrees of latitude, but the inhabitants laud it as the healthiest in the world. In the north and north-east there are large pastoral tracts, suitable also in parts for tropical products. The products of the colony are gold, wool, pearl shells, pearls, timber, sandal wood, and guano. The gold is found at Kimberley, in the N.W., Yilgarn, in the S.W., and at several points between these two districts. The chief fields are the Murchison, the Ashburton, and the Pilbarra, but the reefs extend for about 1200 miles. The Coolgardie field, in the S.W., became famous during '95. The production in 1902 was £7,947,662, and the industry employs 20,476 men. There are 2145 miles of railway open, of which 1516 belong to the Government. In the June 1904 elections the Labour party won 22 seats, as compared with only 8 held by them previously, while 18 Ministerialists and 8 Independents were returned. When the Assembly met in August the Government were defeated, and a new Labour Ministry was formed, with Mr. Daglish as Premier.

**Revenue**, 1903-4, £3,550,016 (with surplus carried forward from previous year, £3,781,675); **expenditure**, £3,698,312. **Imports**, '03, £6,769,922; **exports**, £10,324,732; **debt**, 1904, £15,225,536.

**Governor**, His Excellency Admiral Sir Frederick G. D. Bedford, G.C.B.

**Ministry**: *Premier, Colonial Treasurer, and Minister for Education*, Hon. Henry Daglish, M.L.A.—*Mines and Justice*, Hon. Robert Hastie, M.L.A.—*Lands*, Hon. John Michael Drew, M.L.C.—*Works*, Hon. William Dartnell Johnson, M.L.A.—*Colonial Secretary*, Hon. George Taylor, M.L.A.—*Railways and Labour*, Hon. John Barkell Holman, M.L.A.—*Without Portfolio*, Hon. Wm. Charles Angwin, M.L.A.

**Agent-General in London**, Walter Hartwell James, Esq., K.C.—**Secretary**, Reginald C. Hare, Esq.—**Engineer**, C. S. R. Palmer, M.I.C.E.—**Assistant**, E. E. Salter. **Office**, 15, Victoria Street, Westminster, S.W.

**British New Guinea** comprises the south-eastern part of the island, the Trobriand, Woodlark, d'Entrecasteaux and Louisiade groups, and the adjacent islands south of the 8th parallel south latitude. It is bounded on the west by Dutch and on the north by German territory. Its area is about 90,540 sq. m., 87,786 sq. m. on the mainland, and 2754 sq. m. of islands; and the population is estimated at about 350,500, of whom only 500 are Europeans. A protectorate was proclaimed over the territory in '84, and in '88 it was definitely annexed. In Nov. 1901 the Government of the Australian Commonwealth undertook the administration, and the transfer was made in 1903. It is administered by a Governor, who resides at Port

Moresby (pop. 1640). There are six magisterial divisions, each under a resident magistrate. The country is being gradually settled, and it is hoped that the natives may be trained to use their tribal lands for commercial purposes. The climate favours the cultivation of all tropical products. Much of the interior is still in the stone age, and aboriginal methods of cultivation and industry are still general amongst the population. All minerals, except coal, are reserved to the Crown. The chief exports are trepang, copra, pearl-shell, gold and sandal-wood. The London Missionary Society has been established in the island since 1870, and has done much good work.

**Executive Council**: *Administrator*, Capt. F. R. Barton.—*Government Secretary*, Anthony Musgrave, C.M.G.—*Chief Judicial Officer*, His Honour C. S. Robinson.

### NEW ZEALAND.

New Zealand is a Crown colony, consisting of a group of islands in the South Pacific, about 1200 miles E. by S. from Australia. There are two large islands: **North Island**, 500 m. by 250, area 44,468 sq. m.; **South Island**, sometimes also called **Middle Island**, 500 m. by 200, area 58,525 sq. m.; also **Stewart Island**, area 665 sq. m.; Chatham, Auckland, and other islands at some distance E. and S., are 813 sq. m. **Area** of entire colony, 104,471 sq. m.; **population** 851,063, exclusive of the Maoris, who number 43,143. **Capital**, Wellington, pop. (including suburbs) 49,344; **chief cities**, Dunedin, 52,390; Auckland, 67,226; Christchurch, 57,041.

The Cook, or Hervey, Islands, a group of six islands, with a few islets, which, with other groups, were annexed to the Colony in Oct. 1900, lie in the eastern Pacific, between 18° 15' and 21° 47' S. lat. and 157° and 160° W. long, and are the only British possession in the eastern Pacific between Fiji and the Marquesas. They are very fertile and healthy. **Area**, 106 sq. m.; **population** about 6000. The chief island is **Rarotonga**, others being Mangaia, Atiu, Mauke, Mitaro, Takutea, the Aitutaki group, and the Hervey group, including Manuae and Te Au-o-tu. The principal products are coffee, copra, and limejuice, with a considerable export of oranges and other tropical fruits to New Zealand.

Other islands dependent on New Zealand are Niue, the Palmerston Atoll, Penryn, Suvaarow, Manahiki and Rakahanga, Danger Island and Massan. **Area** about 120 sq. m.; **pop.** about 600.

Government is carried on by a Governor, who is advised by a responsible Ministry. Of the two houses of parliament, the Legislative Council consists of 46 members nominated by the Governor for life (except those nominated subsequently to Sept. 17th, '91, after which date all appointments are for seven years only), the **House of Representatives** of 80 (including 4 Maoris) members elected triennially on an adult suffrage. The qualifications for electors are residence in the colony for a year, and in the electoral district for three months. Members of the Lower House receive £300, and of the Upper House £200 a year. For local government the country is divided into 91 counties and 103 boroughs, the counties being further divided into town districts and road districts. There is a **Government Insurance Department**, and all the more important public works are in the hands of the Government and

other public bodies, and have been carried out for the most part on the co-operative system, the Government providing the materials and letting out the work to parties of artisans and labourers at fixed rates. An eight-hours day prevails, and a Conciliation and Arbitration Act is in force. About 40 per cent. of the inhabitants belong to the Church of England, 22 per cent. are Presbyterians, and 10 per cent. Methodists. Education is compulsory, free, and secular; and the University of New Zealand, which has four colleges, at Dunedin, Christchurch, Wellington, and Auckland, confers degrees. Ports defended by heavy batteries, mines, and torpedo-boats. A permanent force of artillery and engineers 250 strong is maintained, and the volunteer force numbers over 4000. The majority of the population are engaged in agricultural and pastoral pursuits, and a big frozen meat industry is being fostered. There are also important coal, gold and silver mines. The gold exported in 1902 was £1,951,433. There are 2404 miles of Government railway, as well as numerous roads and water communication. There are over 200 daily, weekly, and monthly periodicals. The chief exports are wool, frozen meat, sheep skins and pelts, tallow, butter, gold, gum, and grain.

The leading dailies are the Government organ, the *Auckland Star*, edited by Mr. T. W. Leys (London office, Imperial Buildings, Ludgate Circus, E.C.), and the *New Zealand Herald* (London office, 30, Fleet Street). At Wellington, the seat of government, may be mentioned the *New Zealand Times* (London office, Imperial Buildings, Ludgate Circus), the Government organ, and the *Evening Post* (London office, 30, Fleet Street). Christchurch has the *Lyttelton Times*, edited by Mr. S. Saunders (London office, Imperial Buildings, Ludgate Circus), and the *Press*, edited by Mr. W. A. Triggs (London office, 30, Fleet Street), both morning dailies, *Truth*, an evening daily, and the *Canterbury Times* and *Weekly Press*, both weekly papers. The *Otago Daily Times* (London office, 30, Fleet Street) is the morning daily at Dunedin; the *Dunedin Star* (London office, Imperial Buildings), edited by Mr. Mark Cohen, is an evening Opposition journal.

Revenue, 1903, £7,021,385; expenditure, £6,434,281; imports, 1903, £12,788,675; exports, £15,010,378; public debt, £57,522,215.

Governor and Commander-in-Chief, The Right Hon. Lord Plunket, K.C.V.O.

Ministry: Prime Minister, Colonial Treasurer, Minister of Labour, and Minister of Defence, Minister of Education and Minister of Immigration, Rt. Hon. Richard J. Seddon, P.C.—Railways, Colonial Secretary, Postmaster-General, Industries and Commerce, and Public Health, Tourist and Health Resorts, Hon. Sir J. G. Ward.—Native Minister and Commissioner of Stamp Duties, Hon. J. Carroll.—Public Works and Marine, Hon. W. Hall-Jones.—Justice and Mines, Hon. J. McGowan.—Lands, Agriculture, and Commissioner of Forests, Hon. T. Y. Duncan.—Commissioner of Trade and Customs, Hon. C. H. Mills.

Agent-General in London, Hon. W. P. Reeves, 13, Victoria Street, S.W.—Secretary, Walter Kennaway, C.M.G.

### History, 1904.

The Governor forwarded to Mr. Lyttelton, Secretary of State for the Colonies, a strong protest expressed by the Ministry against the

proposal to introduce Chinese labour into South Africa (Jan. 20th). Mr. Lyttelton replied that he fully recognised the title of all self-governing colonies to express their opinion on so important a question, but H.M. Government's policy was to treat the Transvaal as though it were itself a self-governing colony, unless a distinct Imperial interest were concerned.

The retiring Governor, Lord Ranfurly, left Wellington with the warm appreciation of the colony for his valuable services; and his successor, Lord Plunket, was welcomed by the Premier and Ministers, and assumed office (June 20th). Mr. Seddon presented his ninth Budget (July 12th), and said that the year had ended with a net surplus carried forward of £649,740. He said that a new system of investigation in connection with Old Age Pensions had proved very successful, and had reduced the roll of pensioners, and the expenditure, to a marked degree. The past year had been favourable to the farmers and stockowners, and the Government would push on energetically with the throwing open of the remaining Crown lands for settlement. Parliament was prorogued (Nov. 8th). The Legislation of the Session included a Licensing Act; a Mining Companies Act, bringing the registration and winding up of mining companies under the Companies Act; an Act providing for the appointment of a High Commissioner in lieu of an Agent-General; and a Midwives Act, providing for the registration and better training and examination of midwives, and for the establishment of State maternity homes.

A New Zealand Exhibition is to be held at Christchurch in 1905.

### WESTERN PACIFIC.

The office of High Commissioner for the Western Pacific was created by an Order in Council of 1877 to provide a Civil Court for the settlement of disputes between British subjects living in these islands. The High Commissioner's jurisdiction extends over all islands in the Western Pacific not within the limits of the colonies of Fiji, Queensland, and New South Wales, and not within the jurisdiction of any civilised power. In '93 the jurisdiction was extended to foreigners, and in most cases to natives residing in British settlements or protectorates within the limits of the Order, including the New Hebrides (*q.v.*) and the Melanesian groups. The High Commissioner is the Governor of Fiji, and his Court includes the Chief Justice of Fiji and every other Judge of the Supreme Court acting as Judicial Commissioners, and a number of Deputy Commissioners appointed by the High Commissioner. Certain naval officers commanding men-of-war on the Australian station are at times appointed Deputy Commissioners.

High Commissioner, E. F. im Thurn, Esq., C.B., C.M.G.—Chief Judicial Commissioner, C. H. Major.—Resident Deputy Commissioner, Solomon Islands, C. M. Woodford.—Resident Deputy Commissioner, Gilbert and Ellice Islands, W. Telfer Campbell, Esq.—Resident Deputy Commissioner, New Hebrides, Capt. E. G. Rason, R.N.

Fanning Island. Area 15 sq. m.; pop. 150. It is a landing-place for the Pacific Cable.

Fiji. An island group and British Crown colony in the South Pacific, about 1200 miles from Auckland, N.Z. Fiji is a corruption of

Viti, the native name. Consists of two considerable islands: **Viti Levu**, 4,112 sq. m.; **Vanua Levu**, 2,432 sq. m.; and 225 smaller. Total area, 7,435 sq. m.; total pop. 121,074. Capital, **Suva**, in Viti Levu; second town, **Levuka**, in Ovalau. Island of **Rotumah** (area, 14 sq. m., pop. 2192), to the north, annexed to Fiji in '81, is administered by a Commissioner. The islands are mountainous, well wooded, with luxuriant vegetation and fertile soil, tropical, the larger being of volcanic origin, the smaller of coral formation. The cultivation of sugar, fruits, tobacco, Para rubber, and copra is the chief industry. The forests contain valuable timber. Climate tropical, but healthy and favourable to Europeans. Natives, Polynesian with Papuan intermixture; are peaceable, orderly, becoming Christianised and civilised. Europeans number 2548, and there are about 20,000 Indian and Polynesian labourers. In '74 the "king" and chiefs voluntarily ceded the group to England. Fiji is administered by the Governor, who is also His Majesty's High Commissioner and Consul-General for the Western Pacific. The Legislative Council consists of 6 official and 6 unofficial members, appointed by the Governor. Local government is largely in the hands of the natives through village and district councils. The New Zealand Parliament in Oct. 1900 asked the Imperial Government to sanction the incorporation of the colony with New Zealand, but H.M. Government were unable to assent. Two State-aided public schools, and many native schools carried on by the Wesleyan and Roman Catholic missions, the former being in a large majority. The chief exports are sugar, copra, fruit, and spirits.

**Governor and Commander-in-Chief**, E. F. im Thurn, Esq., C.B., C.M.G.—*Chief Justice*, C. H. Major.—*Attorney-General*, A. Ehrhardt.—*Colonial Secretary and Receiver-General*, A. W. Mahaffy.—*Agent-General for Immigration*, A. R. Coates.

**Gilbert and Ellice Islands.** The Gilbert Islands have an area of 166 sq. m., pop. 35,200, and enjoy a considerable trade. The Ellice Islands have an area of 14 sq. m.; pop. 2400.

**Phoenix Group** include eight islands. Area 16 sq. m.; pop. 59.

**Pitcairn Islands.** Area 2 sq. m.; pop. 126. There is a Parliament of seven members.

**Solomon Islands.** The British islands lie in the Western Pacific, between 7° 30' and 13° S. lat. and 150° and 163° E. long., and include Guadalcanar, San Christoval, Malaita, New Georgia, Gela, Tulagi, as well as Santa Cruz, Vanicoro, and the islands ceded by Germany in '99, including Choiseul, Ysabel, the islands in Bougainville Straits, and Lord Howe's group. British protection extends over all the islands between the Solomon and the Torres groups, and a Resident has his headquarters at Tulagi. The natives are Melanesians, and most of them cannibals. Area about 8400 sq. m. Population includes 91 Europeans. The chief exports are copra, ivory, nuts, pearl-shells, etc. The sago palm grows in vast numbers. As to the German Islands see GERMANY.

**Tonga Isles**, or the Friendly Islands, are governed by an hereditary monarch, King George Tubou II., and a legislative assembly of two orders—viz., 31 nobles, and 31 elected representatives of the people, with an executive consisting of a ministry nominated by the King. Three groups of islands, called Tonga,

Haabai, and Vavau, constitute the kingdom. By the Samoa agreement, '99, Germany renounced in favour of Great Britain all her rights over these islands, including the Savage Islands (pop. 5000). Mr. Basil Thomson, British Commissioner of the Tonga Islands, proclaimed a Protectorate at Tonga (May 19th, 1900), and at Niue in Savage Island (April 21st). Sites for a coaling station and a fortified port were secured at Vavau harbour. The trade of the islands is mainly with Australia and New Zealand. Chief exports are copra, bananas, and oranges. Area 390 sq. m.; pop. 18,959, including about 210 whites. Revenue, 1901, £20,900; expenditure, £20,893. Capital, Tongatabu.

**British Agent and Consul**, Hamilton Hunter, Esq., C.M.G.

**Union or Tokelau Islands** include Nassau and Danger Islands. Area 7 sq. m.; pop. 1050.

## MISCELLANEOUS ISLAND POSSESSIONS.

**Ascension Island.** In the South Atlantic, 960 miles from the African coast. The port is called Georgetown, and is furnished as a naval station, with batteries and storehouses, for British ships on the West Coast of Africa, under the control of the Admiralty. Used as a coaling depot for the West African squadron. Area, 35 sq. m.; pop. 266. Turtles, for which the island is famous, are found in abundance between December and May.

**Governor**, Capt. R. K. McAlpine, R.N.

**Falkland Islands.** A Crown colony and naval coaling depot in the South Atlantic, about 300 miles east of Magellan's Straits. Capital and port, Stanley, on East Falkland, which island contains 3000 sq. m.; West Falkland has an area of 2300 sq. m., and the smaller islands of the group cover about 1200 sq. m. Pop. 2044. South Georgia, an island group, 1000 miles E.S.E., has been annexed to the colony. Its area is 1000 sq. m., but it is snow-covered, sterile, and uninhabited. The Falklands consist of low grassland and moorland. The flora and fauna are Patagonian. Wool and frozen mutton are exported to the United Kingdom, which sends about 90 per cent. of the imports and takes nearly all the exports, the balance going to S. America. The Governor is assisted by an Executive and a Legislative Council.

**Governor and Chief Justice**, W. L. Allardyce, C.M.G.

**Executive Council:** The Governor.—*Colonial Secretary*, W. Hart Bennett.—*Treasurer*, W. A. Thompson.—*Colonial Surgeon*, E. T. Born.

**St. Helena.** Is an island in the South Atlantic belonging to Great Britain, 1140 miles from the African coast, and 800 miles S.E. of Ascension, the nearest land. Port and capital is Jamestown, pop. 2000, which is an Imperial coaling station. The opening of the Suez Canal and the consequent diversion of shipping from the island have led to its continuous decline of late years. It is administered by a Governor and Executive Council. Area, 47 sq. m.; pop. 3914, including the garrison (474). The chief industries are fishing and agriculture.

**Governor**, Lieut.-Col. H. L. Gallwey, C.M.G., D.S.O.  
**Executive Council:** Lord Bishop of St. Helena; Officer commanding the Troops.—G. N. Moss; H. J. Bovell; W. T. Williams.

**Mauritius.** An island in the Indian Ocean 500 miles east of Madagascar, 2000 miles from India, and 2300 from the Cape. It is a British Crown colony. **Area**, 705 sq. m.; **pop.** 377,364, including 262,770 of Indian origin or descent. The island is divided into nine districts, Capital and chief port, **Port Louis** (pop. 56,000). A **Governor** presides over the administration, which is conducted by Executive and Legislative Councils. Of the Executive Council of 7 members 5 are official and 2 elected. Of the Council of Government, numbering 27 members, 8 are *ex-officio* members, 9 nominated by the Governor and 10 elected. The capital is strongly defended, and the strength of the garrison is about 2400. There is now a constabulary of about 750. French is spoken all over the island, but both languages are used in the Council of Government, and English in the Courts of Justice. The State aids the Churches with grants, the Roman Catholics being in a large majority. There is a Royal College, and also many Government and other schools. The chief products are sugar, rum, vanilla, aloefibre and oil. **Dependent appanages** of the colony, under the administration of its Governor, are various groups in the Indian Ocean. **Rodrigues**, the **Oil Islands**, including **Diego Garcia** and the **Chagos group**, and the **St. Brandon group**, are the chief of them. Their total area is 172 m.; **pop.** 5119. **Rodrigues** comes first in importance, and abounds in fruits. It lies 344 miles east of Mauritius, and is under the administration of a Magistrate appointed by the Governor of Mauritius. **Pop.** 3681. The **Oil Islands** include the **Chagos** and **Trois Frères Islands**. **Diego Garcia** (pop. 526) is the most important, and with its spacious bay is used as a coaling station for steamers. The **St. Brandon** or **Cargados Islands** are mostly mere sandbanks. **Governor**, Sir C. Boyle, K.C.M.G.

**Executive Council:** *Officer commanding the Forces*, Col. C. T. E. Metcalfe, C.B.—*Colonial Secretary*, Sir Graham J. Bower, K.C.M.G.—*Procureur and Advocate-General*, F. T. Piggott.—*Receiver-General*, J. J. Brown.—*Auditor-General*, G. R. Dick.—H. Leclézio, C.M.G.: W. T. A. Edwards, C.M.G.

**Seychelles Islands.** These were until Nov. 1903 dependent upon Mauritius, but on Nov. 6th were made a separate Crown colony. They lie in the Indian Ocean about 935 miles north of Mauritius, and include the **Amirantes**, **Cosmoledo**, **Providence**, **Aldabra**, and other groups. The largest and most populous of them is **Mahé** (area 55½ sq. m.), whose capital, **Victoria**, has a safe and commodious harbour, and is the headquarters of H.M. East Africa squadron. The **Seychelles** are under a Governor, with Executive and Legislative Councils. **Area** 148 sq. m.; **pop.** 20,275. **Exports**, cocoanut oil, vanilla, and guano.

**Governor**, W. E. Davidson, Esq., C.M.G.  
**Executive Council:** *Legal Adviser*, A. K. Young.—*Treasurer*, G. H. Griffiths.—*Auditor*, L. O. Chitty.

## BRITISH MUSEUM.

This Museum was founded in the year 1753, when the collection of Sir Hans Sloane and the Harleian collection of manuscripts were acquired, and an Act of Parliament was passed for providing one general repository for the better reception and more convenient use of the said collections, and of the Cottonian Library,

and of the additions thereto." The famous collection of MSS. made by Sir Robert Cotton, which was presented to the nation by Sir John Cotton, his descendant, in 1700, was virtually, however, the beginning of the Museum. The above collections were then designated "The British Museum," deposited in Montagu House, Bloomsbury, in 1754, and opened to the public on Jan. 15th, 1759. In 1816 temporary additions had to be made to the old building to accommodate the Elgin marbles, and by '45 the four sides of the present Museum, designed by Sir Robert Smirke, were erected, and Montagu House removed. Further additions afterwards became necessary, and in '57 the magnificent reading-room, with its book-galleries, was built. During the years '80-83 the transference of the natural history collections was made to the new Museum in Cromwell Road, South Kensington. Space for the future extension of the buildings has been provided by the purchase in '95 of the rows of houses, with their gardens, which abut on the Museum on the east, north, and west; the ground thus secured forming, together with that already occupied, an isolated square plot of 13 acres.

**Departments.**—Originally there were only three departments in the Museum: viz., MSS., Printed Books (including coins and medals, and prints and drawings), and Natural History. The MSS. Department has been considerably increased by the addition of private collections, including the famous collection of Royal MSS. presented by George II. in 1757, and by purchase, till it now contains upwards of 55,000 volumes, besides Greek, Coptic, and Latin papyri, charters, and seals. The **Printed Book Department** now contains the enormous number of about 2,000,000 volumes, and receives, under the Copyright Act of '42, a copy of every book published in the United Kingdom. The annual increase from all sources amounts to about 46,000 volumes, exclusive of continuations, music, newspapers, etc. The National Library contains not only the finest and most extensive collection of English literature in the world, but also the best library in each European language existing out of the country in which that language is spoken. The progress of printing is splendidly illustrated by the collections in this department. The General Catalogue of the Library has recently been printed. The **Oriental Printed Books and MSS. Department** was established in '92. The **Antiquities Department** was formed in 1807, and in '61 was subdivided into three departments—viz.: 1. **Greek and Roman Antiquities**, which include the Hamilton collection, purchased in 1772, the Townley marbles, purchased in 1805, and, by later additions, the Parthenon sculptures, better known as the Elgin marbles, the Phigaleian marbles, the Payne-Knight collections, the Lycian marbles, the Mausoleum remains, and many other choice specimens of Greek sculpture, bronzes, fictile vases, gems, and ornaments. 2. **The Coins and Medals**, originating in the Cottonian and Sloane collections, which have grown to be a very large and interesting department, and include magnificent specimens of Anglo-Saxon, English, Greek, Roman, Oriental, and other coins. In '72 the finest specimens of Greek and Roman coins in the Wigan collection were purchased for £10,000. 3. **The Egyptian and Assyrian Antiquities**, known up till '86 as the Oriental Antiquities Department, which are an especially valuable and complete collection of Egyptian, Babylonian,

Assyrian, Phœnician, and Semitic antiquities. The names of Sir Henry Layard, Sir Henry Rawlinson, and other explorers are inseparably connected with this department, which contains vast stores of invaluable information as to the history, the literature, and the social life of the peoples named. The **British and Mediæval Antiquities and Ethnographical Collections** were, till '66, attached to the last-named department, but in that year they were formed into a separate department. It contains all antiquities found in the British Isles, Anglo-Saxon, Celtic, or Roman, and glass-work, pottery, arms, ivories, and other antiquities illustrating life in the Middle Ages. There are also fine collections of glass, pottery, and majolica, of prehistoric antiquities, of ethnographical objects, and of Oriental antiquities. The **Prints and Drawings Department** contains one of the most noted collections of its kind. The original drawings of old masters, etchings, and engravings of the various schools of eminence, are of extreme interest and value.

The Museum is open on weekdays from 10 a.m. to 6 p.m.; after 4 p.m. in January, February, November, and December, and after 5 p.m. in March, September, and October, only certain of the galleries remain open: viz.,—on Mondays, Wednesdays, and Fridays, exhibitions of manuscripts, printed books, prints and drawings, porcelain, glass, majolica, prehistoric, British, Anglo-Saxon, mediæval and ethnographical collections; on Tuesdays, Thursdays, and Saturdays, Egyptian, Assyrian, Greek and Roman galleries (exclusive of the Vase Rooms and Bronze Room); American collections, and the Waddesdon Room. On Sunday afternoons the Museum is open from 2 to 4 p.m. in January, February, November, December; from 2 to 5 p.m. in October; from 2 to 5.30 p.m. in March and September; from 2 to 6 p.m. in April, May, June, July, August. The Museum is closed on Good Friday and on Christmas Day. Students are admitted to the several departments under regulations to be obtained from the Director. Admission to the reading-room is by ticket. A reader's ticket is granted to persons over twenty-one years of age on a written application, stating object of researches, etc., and accompanied by a recommendation from a householder, who must be a person of recognised position, and who must certify that the applicant will make proper use of the reading-room. The authorities will not accept the recommendations of hotel and lodging-house keepers in favour of their lodgers. The total number of visitors to the Museum in 1903 (exclusive of readers) was 920,848, of whom 858,800 attended during week-days, and 62,048 on Sundays. The average daily number of visitors was 2761 on week-days and 1193 on Sundays. The visitors to the reading-room numbered 209,713, a daily average of 692. **Director and Principal Librarian**, Sir E. Maunde Thompson, K.C.B., I.S.O., D.C.L., LL.D., V.P.S.A.

**Brooke, Rev. Stopford A., M.A.**, was b. 1832. Ed. at Trin. Coll., Dublin, where he graduated ('56), winning the Downe Prize and Vice-Chancellor's medal for English verse. He was formerly Chaplain to Queen Victoria and to the Empress Frederick of Germany. In '80 Mr. Brooke seceded from the Church of England because he could not accept the orthodox views on miracles, and became minister of Bedford Chapel, Bloomsbury. In

'95, however, after a lengthy illness, he found himself compelled to retire from the post. He is the author of several works, among which are "Life and Letters of the late F. W. Robertson," a "Primer of English Literature," an able review of which is to be found in Mr. Matthew Arnold's "Miscellaneous Essays," "The Early Life of Jesus," several volumes of sermons, a volume of poems issued '88, a "History of English Poetry," a work on Early English Literature, which subject he has made peculiarly his own, a lecture delivered in '93 entitled "Theology in English Poetry," an able criticism of "Tennyson: his Art and Relation to Modern Life" ('94), "The Old Testament and Modern Life" ('96), and a book on Browning in 1902.

**Bryan, William Jennings**, was b. at Salem, Marion County, Illinois, March 19th, 1860. Ed. first at a public school at Salem, he afterwards went to the Whipple Academy at Jacksonville, and then to Illinois College, where he took high honours in classics. Deciding to follow a legal career, he studied at the Union Law College, Chicago, and first practised for himself at Jacksonville. In '87 he removed to Lincoln, Nebraska, and in '90 he was elected to Congress as an extreme Free Silver man. Re-elected in '92, he afterwards lost his seat because of his uncompromising views on the Silver question, which alienated some of his own supporters. His oratorical abilities were then made good use of in advocating the Silver cause, while he still kept up his law practice and edited an Omaha newspaper. In '96, at the Democratic Convention at Chicago, he was nominated for the Presidency, but was beaten at the election on Nov. 3rd, when Mr. McKinley received an overwhelming majority of votes. At the beginning of the Spanish-American war he was appointed Colonel of the Nebraska Volunteers (June 4th, '98), but saw no fighting. In 1900 he was again nominated for the Presidency. The late Mr. McKinley, however, was returned (Nov. 6th) with an increased majority. Mr. Bryan declared in 1903 that he would not stand for the Presidency again, and at the end of the year visited England, and afterwards went on a European tour. As to his part in the 1904 election, see UNITED STATES, Political Parties.

**Buckle, George Earle**, son of the Rev. George Buckle, canon of Wells Cathedral, was b. near Bath 1854. He is editor of the *Times*, to which post he was appointed in '84, having previously been connected with the editorial staff of that journal. He was ed. at Honiton Grammar School, Winchester, and New Coll., Oxford, of which he was a scholar. He won the *Newdigate Prize for English Verse* in '75, took a First Class in *Literæ Humaniores* '76, and a First Class in Modern History in the following year. He was subsequently elected to a Fellowship of *All Souls' Coll.*, and was called to the bar at Lincoln's Inn in '80.

## BULGARIA.

Bulgaria is bounded on the north by the Danube, on the west by Servia, on the south-west and west by Turkey, and on the east by the Dobruja. By the Treaty of Berlin, '78, it was constituted an autonomous and tributary principality under the suzerainty of the Porte. In '85 Eastern Roumelia was united to Bulgaria, and the amount of tribute and the

share of the Turkish debt to be assumed by Bulgaria were left to be fixed by the Powers. The executive power is vested in the Prince, assisted by a council of ministers, and the legislative power in a single chamber, the *Sobranje* or National Assembly, elected for five years by manhood suffrage in the proportion of one member to every 20,000 of the population. There is also a Great *Sobranje*, consisting of delegates elected in the proportion of one to 10,000 of the population, to which constitutional and other questions, such as a vacancy on the throne or the acquisition of territory, must be referred.

The State religion is that of the Orthodox Greek Church, but its Government is independent of the Orthodox Communion, and is carried on by the Bulgarian Exarch and the national Synod of Bishops. There are 643,253 Mahometans amongst the inhabitants. Education is free and obligatory. Theoretically the State owns the land, but the practice is that the land is held on a perpetual lease by a multitude of small farmers, who pass it on to their heirs, and pay one-tenth of the produce as rent. All minerals belong to the State. The chief exports are cereals, eggs, and other agricultural and pastoral produce. The bulk of the trade is with Austria-Hungary, Belgium, Great Britain, Turkey, and Germany. Railways (1020 miles) connect Sofia with Constantinople and Belgrade, and Kustchuk with Varna.

Military service is popular, and the peasantry have a great deal of excellent military spirit. The officer is also efficient, and the Government has taken very great care in selection and training, the Russian army being the pattern. The forces are divided into three categories: the Regular Army, the Reserve and the Militia, and all Bulgarians are liable for personal service, with few exceptions, from the age of 20 to 45, substitution not being permitted. The country is divided into six divisional districts, and the annual contingent is about 18,000 men. The peace strength is: Infantry, 1300 officers and 28,550 men; cavalry, 200 officers and 3850 men; field artillery, 280 officers and 5020 men; mountain artillery, 45 officers and 900 men; fortress artillery, 65 officers and 950 men; engineers, 18 officers and 1900 men; transport, 20 officers and 160 men; total, 1900 officers and 41,330 men. The total war strength is 3810 officers, 202,500 men, and 29,200 horses. In addition Bulgaria can count upon at least 20,000 *Komitajis*, a force of semi-trained and experienced guerillas. The infantry arm is the 8 mm. Mannlicher rifle.

Area (including Eastern Roumelia, now also known as Southern Bulgaria), 38,390 sq. m. pop. 3,744,283. Capital, Sofia, pop. 67,920. Revenue, 1903-4, £4,246,536; expenditure, £4,245,976; imports, 1902, £2,849,860; 1903, £3,272,103; exports, 1902, £4,147,380; 1903, £4,322,946; foreign consolidated debt, 1902, £7,867,322; floating debt, £3,099,291; Public Debt, Jan. 1904, £11,759,675.

Ministry: President of the Council and Minister of Foreign Affairs, Gen. R. Petroff.—Minister of War, General Savoff.—Finance, Mr. Payakoff.—Commerce and Agriculture, Mr. Ghennadieff.—Interior, Mr. Petkoff.—Justice, Mr. Staikoff.—Public Instruction, Mr. Shishmanoff.—Public Works, Ways, and Communications, Mr. Popoff.

Agent to Great Britain, M. Dimitri Tzokoff, 51, Queen's Gate, S.W.

British Minister and Consul-General at Sofia, Mr.

G. W. Buchanan, C.B., C.V.O.—Vice-Consul at Sofia, Mr. Gerald Toulmin; at Philippopolis, Mr. R. A. Fontana; at Rustchuk, Mr. W. H. Dalziel; at Varna, (temp.) Lt.-Col. P. H. H. Massy.—Acting Consular Agent at Bourgas, Mr. D. E. Tacchella.

#### Sovereign.

Prince Ferdinand was b. in Vienna, Feb. 26th, 1861, and is the youngest son of Prince Augustus of Saxe-Coburg and Princess Clémentine of Bourbon-Orleans, a daughter of Louis Philippe. He has served as an officer in the Austrian army, and possesses large estates in Hungary. After the deposition of Prince Alexander in Sept. '86, Prince Ferdinand received a deputation from the *Sobranje* in '87, offering him the vacant throne. He accepted the offer, and on Aug. 14th took the oath to the Bulgarian constitution at Tirnova. His sovereignty was not formally recognised by the Porte and the Powers until Feb. '96. He married (April 20th, '93) Princess Marie Louise of Parma, daughter of the Duke of Parma; and has two sons, of whom the eldest, Prince Boris, was in '96 admitted to the Orthodox Greek Church. The Princess Marie Louise died Jan. 31st, '99.

#### History, 1904.

An agreement with Turkey was signed (April 8th) by which the Government pledged itself to prevent the formation of revolutionary committees and of armed bands in Bulgaria, as well as to prevent all acts and conspiracies directed against Turkey, and to prevent the introduction into the neighbouring vilayets of all explosives or poisons. Turkey agreed that the reforms agreed upon between Turkey, Austria, and Russia for the vilayets of Salonika, Monastir and Kossovo should be carried out, with a general amnesty, and that assistance should be granted to refugees by the Imperial authorities for rebuilding their homes. The Customs restrictions imposed by Turkey upon articles from Bulgaria and Eastern Roumelia were to be rescinded, and railway trains to be allowed to cross the frontier without hindrance. A protocol was signed as to the special arrangements concerning the measures for ensuring the security of the frontier, the regulation of the postal and telegraph service, and the reciprocal extradition of criminals and deserters. A new loan of £4,000,000, with interest at 5 per cent., was arranged in November, the price of issue being 82. Two Bulgarian banks took up £1,000,000, and French financiers the rest. The *Sobranje* passed an extraordinary credit of £1,708,000 for military purposes (30th), of which £1,000,000 was provided out of the loan.

Buller, General Sir Redvers Henry, V.C., G.C.B., G.C.M.G., was b. 1839. Ensign '58. Served in the campaigns in China ('60), Ashanti ('73-4), South Africa ('78-9), when he commanded the Frontier Light Horse in the Zulu war and won his V.C., Egypt ('82-4), and Soudan ('84-5). Has received six medals with sixteen clasps, and five other decorations. All his regimental service has been in the 60th King's Royal Rifles. He has held twelve staff appointments, was Quartermaster-General of the Army '87-90, Adjutant-General of the Army '90-97, and succeeded the Duke of Connaught in the Aldershot command '98. In '82 he married Audrey, daughter of the 4th Marquis Townshend, and widow of the Hon. G. T. Howard. He was Under-Secretary for Ireland for a short time in '87. In '99

he was appointed to the chief command of the British forces in South Africa, and proceeded to Cape Town. The development of affairs, however, led him to take personal charge of the force directed to relieve Ladysmith, and when his attack on the Boer position at Colenso was repulsed (Dec. '99), the general situation became so serious that Lord Roberts was sent out as Commander-in-Chief. General Buller finally succeeded in relieving Ladysmith, and in due course drove the Boers out of Natal and took part in the fighting in the Eastern Transvaal. He returned home in Oct. 1900. On his arrival he was made an honorary freeman of Southampton (Nov. 10th), and received an enthusiastic welcome there and at Aldershot. On Jan. 10th, 1901, he resumed his command at Aldershot, and on Oct. 1st was given the command of the First Army Corps at Aldershot; but on Oct. 22nd was retired on half-pay, in consequence of a speech which he made in London on Oct. 10th, in reply to charges made against him in respect of a heliogram sent by him to Sir George White after Colenso, and in respect of his general fitness to command an Army Corps. During 1902 much controversy was aroused on this subject, the Government refusing to comply with the General's request that the telegrams relating to the fighting for the relief of Ladysmith should be published. Address: Downes, Crediton, Devon.

**Bülow, Count Bernhard von**, was b. in 1849, a son of Herr von Bülow, who was Foreign Secretary of Germany under Prince Bismarck, '73-9. He entered the German Foreign Office in '73, and acted as Secretary of Embassy in Rome, St. Petersburg, and Vienna, holding the important post of *Chargé d'Affaires* to Greece during the Russo-Turkish war. At the conclusion of that war he was appointed one of the Secretaries of the Berlin Congress, and after more diplomatic service in Paris and St. Petersburg, he was appointed Minister to Roumania '88, and to Italy '93. While he acted in the former capacity the commercial treaty between Germany and Roumania was concluded. During '97 he acted as Foreign Secretary while Baron von Marschall was on leave, and was at last definitely appointed to that office. In '99 he concluded the treaty with Spain, whereby the Caroline, Mariana and Felew Islands were ceded to Germany, and upon this achievement he was appointed *Count* Bülow. In Oct. 1900, on the resignation of Prince Hohenlohe, he succeeded him as Chancellor of the German Empire and Prime Minister of Prussia. He is married to a Princess of Campo Reale, stepdaughter of a former Italian minister, Mignetti. See GERMANY.

**Burgin, George B.**, novelist and journalist, was b. at Croydon, Jan. 15th, 1856, his father being the late Mr. J. Burgin, barrister. He was ed. at Totteridge Park Public School. He accompanied Baker Pasha to Asia Minor as Secretary of the Reform Commission in Armenia. Returning to England in '85, he became sub-editor of the *Idler*, and afterwards of *To-Day* and the *Bookseller*. He has written short stories for most of the leading periodicals and a large number of novels since 1894, the more recent being "The Way Out," 1900; "A Son of Mammon," and "A Goddess of Gray's Inn," 1901; "A Wilful Woman," 1902; "The Shutters of Silence," and "The Ladies of the Manor," 1903; "The Land of Silence" and "The

Hermit of Bonneville," 1904. Mr. Burgin is the general editor of the "New Vagabond" Series of monthly novels, and senior hon. sec. New Vagabonds Club. Address, 3, Rosebery Gardens, Middle Lane, Crouch End.

**Burian, Baron Stephen, of Rajecz**, appointed Imperial Finance Minister for Austria-Hungary and Administrator of Bosnia-Herzegovina, in succession to the late M. de Kallay, in 1904. He was b. Jan. 1851, and is a Hungarian of Slovak descent. Educated at the Oriental Academy, he entered the diplomatic service, and in '75 became Vice-Consul at Bucharest, in '82 Consul at Moscow, and in '86 at Sofia, receiving while there the rank of Consul-General and finally of Minister. In '95 he went into the Foreign Office at Vienna, afterwards becoming Minister to Wurtemberg and to Greece, '97-1904. He knows the Balkans well.

**Burnand, Sir F. C.**, the editor of *Punch*, was b. Nov. 1836. Ed. at Eton and Trin. Coll., Cambridge. Called to the bar '58, he practised for two years, then returned to the dramatic and literary work which he had commenced before he was called, principally devoting himself to burlesque, of which "Ixion," and "Black-eyed Susan" may be said to have inaugurated the era of "long runs." He joined the *Punch* staff in Feb. '63. Wrote several musical pieces for the German Reed Entertainment. Wrote "Contrabandista," "Cox and Box," and "The Chieftain" (94), comic operas, music by Arthur Sullivan; also "Pickwick" and other operettas with music by Edward Solomon. Among his travesties, "The Ride to Khiva," "One and Three," "Chickin Hazard," "Gone Wrong," "Across the Dark Continent," and "Strapmore," went through a considerable number of editions. He has written over a hundred pieces, chiefly burlesques and extravaganzas. Among his dramas and comedies, "The Turn of the Tide" and "Our Club" enjoyed great popularity, as did his adapted libretto of Audran's "La Cigale" and his version of "La Belle Hélène." Author of "Happy Thoughts" in *Punch*, which, republished separately, ran to thirty editions. Became editor of *Punch* ('80). Later productions include "Very much Abroad," "Quite at Home," "Rather at Sea," which form part of the "Happy Thoughts Series"; the "Zigzag Guide to the Kent Coast," illustrated by Phil May, and several pieces written for Mr. Augustine Daly's theatres in London and New York, including "The Lady of Ostend." Knighted June 24th, 1902, his name appearing in the list of Coronation honours.

**Butler, Lieut.-General Sir William F.**, K.C.B., was b. 1838, entered the 69th Regiment (now 2nd Batt. Welsh Regiment) in '58, served on special duty in Canada, Red River Expedition '70, Ashanti '74, Zululand '78-9, Egypt '82 and '84; commanded the troops at Alexandria '90-3, and the S.E. (Dover) District '93-8. In '98 he was given the South African command, but was recalled in '99 to take up the command of the Western (Devonport) District. For a time he held the Aldershot command, and in Nov. 1901 he was appointed President of a War Office Committee to deal with the question of reform in the different branches of the service. He is a brilliant writer, and has published "The Great Lone Land," "The Wild North Land," "Far Out" and lives of

Gordon, Sir Charles Napier, etc. Lady Butler is the famous painter of military pictures—"The Roll Call," "The Camel Corps," etc.

**Butt, Clara** (Mrs. Kennerley Rumford), was b. at Southwick, in Sussex, Feb. 1st, 1873. After studying at Bristol she gained a Royal College of Music scholarship, and in '92 appeared for the first time in London at the Albert Hall in the "Golden Legend," and directly after-

wards at the Lyceum in the opera "Orfeo." Her success was at once assured, and she is now recognised as the first of our great contralto singers. She has taken part in the four last Handel Festivals. Her marriage with Mr. Kennerley Rumford took place in Bristol Cathedral on June 26th, 1900. Address: Compton Lodge, South Hampstead, and St. Aubyn's Mansions, Hove.

## C

### CABLE COMMUNICATIONS OF THE WORLD.

According to a monograph prepared by the United States Bureau of Statistics in 1902, the submarine telegraphs of the world number 1750. Their aggregate length is nearly 200,000 miles; their total cost is estimated at £55,000,000, and the number of messages annually transmitted over them is more than 6,000,000. There were 370 cables owned by companies, with an aggregate length of 171,679 miles, and 1380 cables owned by nations, with an aggregate length of only 21,528 miles (but in the latter class the All-British Pacific Cable was not included).

Sir J. Wolfe Barry is the authority for the statement that there are 225,000 miles of cable throughout the world, considerably more than half of which are British. The capital held in the United Kingdom in cable enterprise is £30,000,000, and the international messages with Great Britain number more than 100,000,000 words per annum, of which one-fifth are government and press messages. There are forty cables which touch England. See WIRELESS TELEGRAPHY.

The British Pacific Cable was completed on Oct. 31st and was opened for traffic on Dec. 8th, 1902. The rate per word for cable messages between England and Australasia is 3s. The cable is "all-British," and runs from Vancouver, on the west coast of Canada, to Fanning Island, Fiji, and Norfolk Island in the Pacific, and thence by means of two cables to New Zealand and Queensland respectively. Its total length is 7838 nautical miles. It was constructed by the Telegraph Construction and Maintenance Company, whose tender was for the sum of £1,795,000, at the cost of the Governments of the United Kingdom, Canada and the Australasian Colonies, whose proportional interests in the undertaking are: the United Kingdom five-eighths, Canada five-eighths, and New South Wales, Victoria, Queensland, and New Zealand one-ninth each. Revenue, 1903-4, £80,118; expenditure, £167,869, including £77,545 for interest and sinking fund and £35,500 placed to reserve for depreciation and renewals, leaving the working expenditure at £54,824. There is a Board of Control representing the Imperial Government, Canada, New South Wales, Victoria, Queensland, and New Zealand. The General Manager is Mr. C. H. Reynolds. Office, Queen Anne's Chambers, Tothill Street, Westminster, S.W. On August 9th, 1902, the American Pacific Cable was sanctioned, and it was completed on July 4th, 1903. It was laid by the Commercial

Pacific Cable Company from San Francisco to Honolulu, the Hawaiian Islands, the Midway Islands, Guam, Luzon in the Philippine Islands, and thence to the Chinese coast, the U.S. Government retaining the right to purchase the cable on stated terms.

**Caine, Thomas Henry Hall**, the eminent novelist and dramatist, was b. of Manx parentage in 1853, and commenced his career as an architect in Liverpool. From contributing to both the *Builder* and the *Building News* he became connected with journalism, joined the staff of the *Liverpool Mercury*, and wrote in the *Academy* and the *Athenæum*. Resided with Dante Rossetti in London till the poet's death in '82. Published "Sonnets of Three Centuries" ('82), and also "Recollections of Rossetti," while in '83 "Cobwebs of Criticism" appeared. His skill as a novelist has been exemplified in "The Shadow of a Crime" ('85), "A Son of Hagar" ('86), "The Deemster" ('87), which was dramatised under the title of "Ben-my-Chree" ('87), "The Bondman" ('90), "The Scapegoat" ('91), "The Manxman" ('94), a dramatic version of which was performed by Mr. Wilson Barrett, and which began the era of the one-volume novel; "The Christian" ('97) of which nearly 100,000 copies were sold in England, and as many more in the United States, within the first year after publication, and which had a great success as a play both in the States and in this country; "The Eternal City" (1901), a dramatised version of which was produced at His Majesty's Theatre in Oct. 1902; and "The Prodigal Son," 1904, which was published in 9 different languages on the same day. Mr. Hall Caine has travelled in Iceland ('90), in Russia ('92) on behalf of the persecuted Jews; and in '95 visited the States and Canada, where he represented the Society of Authors, and obtained important concessions from the Canadian Parliament as to the Canadian Copyright demands. Since '97 he has passed each winter in Rome. He was elected to the Manx House of Keys in 1901, and has since taken a prominent part in the public affairs of the Isle of Man. He is a J.P. Address: Greeba Castle, Isle of Man.

**Cambron, M. Pierre Paul**, the French Ambassador in London, was born in 1843, and was trained as a barrister in early life. For some years he was engaged in Departmental administrative work, being appointed *Prefet du Nord* in '77. He went as Resident to Tunis in '82, and there made his mark. In '86 he was appointed Ambassador to Spain, and was transferred to Constantinople in '91. Here he

proved himself a very strong man, so strong that it is said the Sultan cordially hated him. In '98 he succeeded Baron de Courcel at the French Embassy at Albert Gate, S.W. G.C.V.O. Received hon. D.C.L. degree at Oxford, June 1904.

**Campbell, Rev. R. J., M.A.**, was b. in London in 1867, and is the son and grandson of Nonconformist ministers. His childhood was spent near Belfast, in the north of Ireland, and he was educated in part privately, and in part at the Bolton High School, and University College, Nottingham. After some work as a teacher he entered Christ Church, Oxford, in '91, and took an honours degree in Modern History and Political Science. While at Oxford he resolved to enter the Congregational ministry, and in '95 he became minister of Union Street Church, Brighton, a church with a history, which had dwindled into insignificance. He very soon filled the church, and an arrangement was made by which Mr. Campbell and his church migrated to Queen's Square Congregational Church, then without a pastor, thus forming a united church in a fine building. This church was crowded every Sunday during Mr. Campbell's ministry, and his name became famous. On Dr. Parker's death Mr. Campbell first undertook the Thursday morning services at the City Temple, and in March 1903 was chosen as the great preacher's successor. Mr. Campbell is a keen politician on the Liberal side, and actively opposed the Education Act, urging all whom he addressed to join in the Passive Resistance movement. He was formerly a member of the Brighton School Board. An article written by him in the *National Review* for Oct. 1904 on "Sunday Observance" contained some severe criticism of "a considerable part of our working-class population," which excited much controversy. Address: Hill Lodge, Enfield.

### CANALS, BRITISH AND FOREIGN.

The latest Board of Trade returns (1898) as to canals in the United Kingdom give the following particulars:—

#### Mileage.

	Canal Companies.	Railway Companies.	Total.
	Miles.	Miles.	Miles.
England and Wales . .	2,157	959	3,116
Ireland . .	491	96	587
Scotland . .	69	84	153
Total . .	2,717	1,139	3,856

#### Capital Expenditure in Pounds Sterling.

	Canal Companies.	Railway Companies (estimated).	Total.
	£	£	£
England and Wales . .	20,175,418	8,969,527	29,144,945
Ireland . .	1,583,829	310,272	1,894,101
Scotland . .	1,254,047	1,504,860	2,758,907
Total . .	23,013,294	10,784,659	33,797,953

#### Traffic in Tons.

	Canal Companies.	Railway Companies.	Total.
	Tons.	Tons.	Tons.
England and Wales . .	30,691,259	4,913,085	35,604,344
Ireland . .	676,034	32,140	708,174
Scotland . .	158,739	1,064,595	1,223,334
Total . .	31,526,032	6,009,820	37,535,852

#### Revenue in Pounds Sterling.

	Canal Companies.	Railway Companies.	Total.
	£	£	£
England and Wales . .	1,590,686	331,305	1,921,991
Ireland . .	108,148	6,566	114,714
Scotland . .	14,640	52,369	67,009
Total . .	1,713,474	390,240	2,103,714

The profits of Canals were assessed at £3,493,590 in 1893-4, and have remained practically stationary since then, the assessment for 1902-3 being £3,391,805.

The drawbacks to the existing system are many. Besides the divided ownership, there is an absence of uniformity in the width of channels and locks. Through traffic is thus subjected to great disadvantages, and necessitates either trans-shipment or the employment of barges too small for economical working.

At a meeting of the Worcester Chamber of Commerce in July 1904, and, later on, at a meeting of the Association of Chambers of Commerce at Manchester on Sept. 28th, the question of the nationalisation of canals was discussed. Mr. S. W. Royse, of Manchester, moved the following resolution proposed by the Manchester Chamber:—

"That in the opinion of this Association the time has arrived when the British Government should take over the whole of the canals of the country, and work them in the public interest; or, in the alternative, that the canals should be transferred to a national Public Trust, with a Government guarantee, supervision, and control."

On a show of hands 65 voted for and 72 against the resolution; but a vote by Chambers having been claimed, resulted in 61 Chambers for and 40 against the resolution. As this was not a two-thirds majority (which would have been in this case 67 Chambers) no action was taken.

Sir A. Henderson, M.P., chairman of the Great Central Railway Company, said on Aug. 10th, 1904, that that company's canals had cost them nearly £1,000,000 sterling. "It had been suggested in some quarters that a public trust should acquire all canals, and this company might be willing to sell theirs on reasonable terms."

A scheme giving powers to local authorities to form Canal Trusts and to acquire improved lines of waterways to serve their districts was included in the Canal Traffic Bill, which was adopted by the Canals Committee of the Association of Chambers of Commerce; but it failed to get a second reading in the sessions of 1901, 1902 and 1903. This was the suggestion made,

by Mr. A. Lee at a meeting of the Society of Arts on Nov. 30th, 1904. The Mansion House Association on Railway and Canal Traffic resolved, Dec. 15th, 1904, that the canals and inland waterways of the United Kingdom, exclusive of any trading interests of the present proprietors in respect of the carriage or warehousing of merchandise, should be vested in a public trust or trusts under one control, with a Government guarantee; and asked the Government to promote a Bill to this effect in the 1905 Session.

A Foreign Office Report (No. 604, Miscellaneous) was published in April 1904 dealing with the Canals and other Navigable Waterways of Belgium. The total length of such waterways is 1360 miles, giving the high proportion of 1 mile of waterway to every 84 sq. miles of territory. About 85 per cent. of these are under the direct control of the State, which in addition holds a large number of shares in the canals conceded to private companies. The remainder are locally administered. The State control does not extend beyond the administration and levying of the tolls necessary for their improvement and maintenance. During the last 25 years £16,000,000 have been spent on the improvement of the canals and ports of the country. The barges are privately owned. The Belgian manufacturer has thus been enabled to obtain his raw materials and to send out his manufactured goods to the ports at the cheapest possible rates. In 1902 31,850 barges, with a tonnage of 5,705,731 tons, entered, and 33,250 barges, with a tonnage of 3,686,585, cleared from Antwerp.

Another Foreign Office Report (No. 613, Miscellaneous) on the projected Rhine-Neckar-Danube Ship Canal, published in June 1904, gave on the authority of Dr. F. Rose, then H.M. Consul at Stuttgart, some figures as to the importance of waterways in Germany. The number of canal and river boats increased from 17,653 with a carrying capacity of 1,400,000 tons in 1877 to 22,564 with a capacity of 3,400,000 tons in '97. The cost of transport per mile and ton was stated to be reduced to something less than  $\frac{1}{4}$ . The Prussian Diet had projects for new canals before it in 1904 involving a total estimated expenditure of over £14,000,000.

By an Imperial Decree of June 11th, 1901, Austria-Hungary is committed to works for new canals connecting the Danube, Oder, Moldau, Elbe, and Weichsel rivers, and improving existing waterways, at a total expenditure of £31,000,000, of which £10,400,000 is to be spent during the period 1904-12.

France has the best canal system in Europe, but, on the authority of Dr. Rose, is contemplating additional expenditure amounting to £20,000,000, although the total expenditure on new canals and improvements in waterways up to 1904 was about £100,000,000.

Dr. Rose concluded his report thus: "A comparison of the two methods of transport (railways and waterways) is altogether in favour of the waterways, a fact which seems to be much more keenly appreciated on the Continent than in the United Kingdom. A canal ship of 600 tons carries as much goods as 60 railway wagons, requires only  $\frac{1}{30}$ th of the hauling power necessary on level railroads, is  $\frac{1}{3}$ rd cheaper in carriage per ton, is worked at a lower rate of expenditure for men and materials, and can load and unload at any place on the route, in addition to other minor advantages."

See also ENGINEERING, specially Black Sea

and Baltic Ship Canal, French Port and Canal Improvements, Manchester Ship Canal, and Prussian Canal Schemes; also Italy.

**Carnegie, Andrew**, was b. at Dunfermline, Scotland, Nov. 25th, 1837, and went with his family to the United States in '48. Beginning life without the usual school education, and after working in various humble positions, as a telegraph messenger for instance, he got a footing in the railway world and became superintendent of telegraphs for the Pennsylvania Railroad Company. The foundation of his great fortune was laid, however, when he took a leading share in the establishment of iron works at Pittsburg, which eventually developed into the vast concern known as the Carnegie Steel Company, located at the Homestead Works. When the Company was amalgamated with others into one great trust, in Feb. 1901, Mr. Carnegie's interest in his Company was agreed at \$400,000,000. He has long been known as a philanthropist, and has given millions to build free libraries, art galleries, and various other educational and charitable institutions, notably in Pittsburg and Alleghany cities, though he has made many benefactions in the United Kingdom also. In June 1901 he signed a deed of trust devoting \$10,000,000 "for the benefit of the Universities of Scotland and the youth of that country who desire the benefit of a university education." (See UNIVERSITIES, Scotland.) Continuing his benefactions in 1902, Mr. Carnegie made one especially notable gift to Mr. John Morley—the library of the late Lord Acton, containing between 60,000 and 80,000 volumes—leaving it to him to decide its purposes and destination. Mr. Morley afterwards gave it to Cambridge University. Down to the end of 1902 Mr. Carnegie's gifts for libraries and educational institutions were established by the Library as amounting to nearly £46,000,000. In 1903 he gave his native town of Dunfermline, Pittencrieff Park and Glen and \$2,500,000 in 5 per cent. bonds, producing an annual revenue of £25,000, "all to be used in attempts to bring into the monotonous lives of the toiling masses of Dunfermline more of sweetness and light"; and arranged for the construction of a building in which to house the Court of Arbitration at The Hague, at a cost of \$1,500,000.

**Cash on Delivery.** See POST OFFICE.

**C. D. Acts.**—The English C. D. Acts were passed in the years 1864, 1866, and 1869. The 1869 Act applied the system of regulation to 18 military and naval stations, where it remained in force until 1883. It was then suspended, and finally repealed in 1886. The Annual Report of the Army and Navy Medical Department show that the admissions of cases to hospital for venereal diseases per 1000 soldiers, or sailors, since '83 have been:—

	Per 1000 soldiers.	Per 1000 sailors.	Per 1000 soldiers.	Per 1000 sailors.
1884 .	271	203	1803 .	105
1885 .	275	183	1894 .	182
1886 .	267	168	1895 .	174
1887 .	252	178	1896 .	158
1888 .	224	162	1897 .	140
1889 .	212	184	1898 .	133
1890 .	212	169	1899 .	122
1891 .	197	152	1900 .	93
1892 .	201	150	1901 .	105
				118

It should be understood that the above figures are numbers of cases, not of men—i.e. the same

men are often admitted several times in the course of a year. It is calculated that the average number of men per thousand at any one time in hospital on account of these diseases is about a tenth of the figures given above. The International Federation for the Abolition of State Regulation of Vice was founded in 1875, and has its headquarters in Geneva. The British Committee exists to promote its work in the British Empire. Chairman, Mr. H. J. Wilson, M.P.; Hon. Sec., Mrs. Josephine E. Butler; Secretary, Miss Forsaith. Office, 17, Tothill Street, Westminster, S.W.

### CENSUS, 1901.

The first census of Great Britain was taken in 1801, and the first complete census for the United Kingdom in 1821. The last decennial census, taken on Sunday, March 31st, 1901, was therefore the eleventh for Great Britain and the ninth for Ireland. The following table shows the figures from 1821 to 1901:—

Year.	United Kingdom.	England & Wales.	Scotland.	Ireland.*
1821 .	20,893,584	12,000,236	2,091,521	6,801,827
1831 .	24,028,584	13,896,797	2,364,386	7,767,401
1841 .	26,709,456	15,914,148	2,620,184	8,175,124
1851 .	27,368,736	17,927,609	2,888,742	6,552,385
1861 .	28,927,485	20,066,224	3,062,294	5,798,967
1871 .	31,484,661	22,712,266	3,360,011	5,412,377
1881 .	34,884,848	25,974,439	3,735,573	5,174,836
1891 .	37,732,922	29,002,525	4,025,647	4,704,750
1901 .	41,458,721	32,527,843	4,472,103	4,458,775

\* The decennium 1841-51 was marked by the potato famine in Ireland.

Of the 41,458,721 persons in the United Kingdom in 1901, 20,102,408 were males and 21,356,313 were females, the latter exceeding the males by 1,253,905, and the proportions being 1062 females to 1000 males. Looking at the three divisions of the United Kingdom, the proportions of females to 1000 males are 1068 in England and Wales, 1057 in Scotland, and 1027 in Ireland. Taking into account, however, the men serving abroad in the army, navy, and merchant service, the excess of females is reduced from 1,253,905 to 886,169, and the proportion of females to 1000 males from 1062 to 1043.

The age distribution of the population in 1901 was as follows:—

Ages.	Numbers.	Proportion in 1,000,000 at all Ages.
Under 5	4,692,453	113,184
5	4,430,918	106,876
10	4,270,672	103,010
15	4,174,965	100,702
20	3,998,414	96,443
25	6,606,655	159,356
35	5,002,109	120,653
45	3,700,991	89,269
55	2,562,828	61,816
65	1,417,866	34,199
75	528,201	12,740
85 and upwards	72,649	1,752

The marriage condition was as follows: Of the 20,102,408 males in 1901, 12,524,053, or 62·3 per cent., were bachelors; 6,867,250, or 34·2 per cent., were husbands; and 711,105, or 3·5 per

cent., were widowers. Of the 21,356,313 females, 12,724,647, or 59·6 per cent., were spinsters; 6,998,823, or 32·8 per cent., were wives; and 1,632,843, or 7·6 per cent., were widows. Though the proportion of married people to the total population is higher than it was in 1891—34·2 and 32·8 in 1901, compared with 33·1 and 31·7 in 1891—yet if persons under 20 be left out, the proportion is distinctly lower than it was in '91.

The principal occupations of the male inhabitants of the country were, at the three last censuses, as follows:—

	1881.	1891.	1901.
Genl. or Local Govt.	135,734	172,989	221,149
Commercial Clerks .	212,067	277,565	365,352
On Railways (excluding platelayers, gangers, packers, & railway labourers).	165,507	221,647	320,514
On Roads (carmen, cabmen, etc.) . . .	341,373	434,307	595,327
On Seas, Rivers, Canals, Docks, Harbours, etc.) . . .	222,644	251,559	277,850
Messengers, Porters, etc. (not Railway or Government) . . .	151,629	204,088	211,330
Agriculture . . .	2,302,331	2,249,756	2,109,812
Mines and Quarries .	610,342	753,534	937,482
Metals, Machines, Implements . . .	775,342	887,371	1,118,747
Ships and Boats . .	75,222	97,064	127,283
House Building . .	831,394	833,733	1,130,425
Wood, Furniture, Fittings, etc. . .	196,560	217,076	276,591
Brick, Cement, Pottery, and Glass . .	112,144	119,764	152,795
Paper Printing, Books, etc. . . .	140,377	185,653	219,621
Textile Fabrics. . .	602,553	640,332	594,742
Dressworkers and Dealers . . . .	435,685	473,189	492,149
Foodworkers and Dealers . . . .	472,182	573,812	670,384
Makers of Spirituous Drinks, Publicans, Wine and Spirit Merchants, etc. . .	131,926	130,306	146,078

The occupations of females were:—

	1881.	1891.	1901.
Teachers, Lecturers, etc.	146,014	170,377	201,716
Domestic Service . .	1,595,678	1,748,954	1,641,154
Charwomen . . . .	99,528	116,133	126,696
Laundry, etc. . . .	201,752	210,793	226,690
Textile Fabrics. . .	828,232	879,529	867,259
Dressworkers and Dealers . . . .	792,712	881,647	903,646
Foodworkers and Dealers . . . .	100,414	155,517	195,393

The condition as to physical infirmities may be stated thus:—

	Total.	Males.	Females
Blind . . . . .	32,823	16,935	15,888
Deaf and dumb . .	21,855	11,852	10,003
Mentally deranged .	177,995	84,936	93,057

**Chalmers, Mackenzie Dalzell, C.B., C.S.I.,** Permanent Under-Secretary of State for the Home Department, is the second son of the late Rev. F. S. C. Chalmers, D.D., vicar of Nonington, Kent; b. 1847; ed. at King's Coll., London, and Trin. Coll., Oxford (B.A. '68, M.A. '71). He was called to the Bar, Inner Temple, '69, and served in the Bengal Civil Service '69-72. Appointed a Revising Barrister '81, Counsel to Board of Trade '82, County Court Judge '84; in '93 he was Chief Justice of Gibraltar, and in '95 Commissioner of Assize. He was Legal Member of the Council of the Governor-General of India '96-9, Assistant Parliamentary Counsel to the Treasury '99-1902, Parliamentary Counsel to the Treasury 1902-3, and in Aug. 1903 was appointed to succeed Sir Kenelm Digby at the Home Office. He is a member of the Statute Law Committee and a J.P. for Warwickshire.

### CHARITABLE SOCIETIES.

The following list includes most of the principal charitable and philanthropic institutions that have offices in London, and are either wholly or in part dependent upon voluntary contributions. The figures indicate the last reported annual receipts. The list does not include charities connected with the City of London (see LONDON PAROCHIAL CHARITIES). Hospitals and Dispensaries will be found in an article under that heading.

**Actors' Benevolent Fund** (£3859), C. I. Coltson, 8, Adam Street, Strand, W.C.

**Additional Curates' Society** (54,880, including £7941 legacies), Canon Petit, 39, Victoria St., Westminster, S.W.

**After-Care Association for Poor Persons discharged recovered from Asylums for the Insane** (£648), H. T. Roxby, Church House, Dean's Yard, Westminster, S.W.

**Aged Pilgrims' Friend Society and Homes** (£12,580), J. E. Hazelton, 83, Finsbury Pavement, E.C.

**Aged Poor Society and Almshouses** (United income £2023), J. H. Behan, Sec., 39, Gerrard St., Soho, W.C.

**Alexandra Orphanage, Junior Branch of Orphan Working School** (£9595), Alex. Grant, 73, Cheapside.

**Annuitants' Homes, Miss Sheppard's** (£508), M's. Chadwick, Hon. Sec., 27, Ossington St., Bayswater, W. The Homes are: two in Ossington St., three at The Grove, Hammer-smith, one at 32, Watterton Rd., W., and one at 20, Artesian Rd., Bayswater.

**Apprenticeship Society for Assisting the Apprenticing of Children of Dissenting Ministers of Evangelical Churches** (£295), Athro A. Knight, Bryn Towy, Brockley, S.E.

**Architects' Benevolent Society** (£900), Percivall Currey, Hon. Sec., 9, Conduit St., Hanover Sq.

**Army Scripture Readers' and Soldiers' Friend Society** (£4680), Col. G. Philips, 112, St. Martin's Lane, W.C.

**Artists' Benevolent Fund** (£2385), Percy Edsall, 149, Strand, W.C.

**Artists' General Benevolent Institution** (£4445), D. G. H. Gordon, 41, Jermyn St., S.W.

**Association for Placing Orphans in Private Families** (£90), Mrs. Senior, 98, Cheyne Walk, Chelsea, S.W.

**Association for Promoting the General Welfare of the Blind** (£1800), Lieut.-Col. Sydney Seife, 258, Tottenham Court Rd., W.

**Asylum for Fatherless Children** (see Reedham Orphanage).

**Baptist Union Publication Dept.** (£422), Rev. J. H. Shakespeare, 4, Southampton Row, W.C.  
**Benevolent Society of Blues for the Relief of Persons Educated in Christ's Hospital, their Widows and Orphans** (£1260), Wm. Lempriere, Christ's Hospital, E.C.

**Benevolent or Strangers' Friend Society** (£800). Exclusive of the sums raised by district committees for special relief. B. H. Gerrans, 72, Finsbury Pavement.

**Benevolent Society of St. Patrick, for Educating Clothing, Partly Feeding, and Apprenticing Poor Children born of Irish Parents in or near London** (£2890), A. F. R. Daniel, 61, Stamford St., S.E.

**Biggs's Charity to Printers** (£420), Joseph Mortimer, 20, High Holborn.

**Blind Female Annuity Society** (see Royal Blind Pension Society).

**Booksellers' Provident Institution** (£2341), G. Lerner, 28, 29, 30, Paternoster Row, E.C.

**Boys' Home Industrial School** (Incorporated Society) (£4651), M. H. Embley, Regent's Park Rd., N.W.

**British and Foreign Sailors' Society** Rev. E. W. Matthews; Passmore Edwards Sailors Palace, Limehouse, E.

**British Home and Hospital for Incurables** (£8600), Edgar Penman, 72, Cheapside.

**British Medical Benevolent Fund** (for grants, £1807; for annuities, £2504); W. E. Sargent, M.R.C.S., 11, Chandos St., Cavendish Sq., W.

**British Orphan Asylum** (£5915), C. T. Hoskins, 27, Clement's Lane, E.C.

**Brixton Orphanage for Three Hundred Fatherless Girls** (£2300), Miss Bird, Superintendent, 57, Barrington Rd., Brixton.

Consult, for further and fuller information, Low's "Handbook to the Charities of London," and "The Classified Directory to the Metropolitan Charities."

**Charity Commissioners for England and Wales, The.** The Charity Commission was created by the **Charitable Trusts Act 1853** (16 & 17 Vict. c. 137). Four commissioners were appointed, three of them being paid; and two at least of these three (one of the two being the Chief Commissioner) must be barristers-at-law of not less than twelve years' standing at appointment. No paid commissioner can sit in the House of Commons during tenure of office. The Board are empowered, "from time to time, as they may see fit, to examine and inquire into all or any charities in England and Wales, and the nature and objects, administration, management, and results thereof, and the value, condition, management, and application of the estates, funds, property, and income belonging thereto." Certain large exceptions, however, are specified: the Universities of Oxford, Cambridge, London, Durham, and all colleges or halls of any of them; all cathedral or collegiate churches, all buildings registered as places of worship, with the Registrar-General of Births, etc., and *bonâ fide* used as places of meeting for religious worship; Queen Anne's Bounty; the British Museum; friendly or benefit societies, savings banks, institutions or societies for religious or other charitable purposes, funds or property of missionary or similar societies, and generally all undertakings (independent or dependent) wholly maintained or carried on by voluntary contributions. But this exemption "shall not extend to any cathedral, collegiate, chapter, or other schools"; the colleges of Eton and Winchester, however, were exempted by the amending Act of '55. The secretary to the Commission for the time being is a corporation sole, by the name of "The Official Trustee of Charity Lands," for taking and holding charity lands; and the Commissioners from time to time appoint, with the approval of the Treasury, "The Official Trustees of Charitable Funds," who must lay their accounts before Parliament yearly. The original jurisdiction of the Commissioners was subsequently extended by another **Charitable Trusts Act**, passed in '60, and other Acts. In '74 the Endowed Schools Acts Amending Act transferred to them all the powers and duties of the Endowed Schools Commissioners. But under the Board of Education Act '99 any of the powers of the Commissioners in regard to Education may by Order in Council be transferred to the Board of Education; and Orders in Council were issued in August 1900, July 1901 and August 1902, transferring to the Board of Education all powers conferred on the Charity Commissioners by the Endowed Schools Acts, the Charitable Trusts Acts, and other Acts specified, so far as those powers relate to endowments held solely for educational purposes, with reservation as to the powers relating to the vesting or transfer of lands or funds of endowments and the powers of appointing the official trustees of charitable funds. The Board of Education

were also given equal and concurrent powers with the Charity Commissioners of inquiring into charities, etc. In '82 the Prison Charities Act empowered the Commissioners to make schemes respecting prison charities. In '83 the Municipal Corporations Act empowered them to make schemes for the administration of the property of certain dissolved corporations. In '83, also, the City of London Parochial Charities Act empowered them to inquire into and to frame schemes for the future application and management of the Parochial Charities of the City of London. In '89 the Welsh Intermediate Education Act empowered them to make schemes for educational endowments and certain rates and Treasury grants in Wales and Monmouthshire. An account of their proceedings under the above-mentioned Acts will be found in their **annual reports** (Eyre & Spottiswoode). The annual report gives an analysis of the orders made by the Commissioners during each year. The present Commissioners are Sir George Young, Bart., Chief Commissioner; C. A. Cook, Esq., and A. Griffith-Boscawen, Esq., M.P. (unpaid). Secretary, Richard Durnford, Esq. Offices: Ryder Street, St. James's, S.W.

**Charity Organisation Society, The,** was established with the object of improving the condition of the poor—(1) by promoting co-operation among existing charities and between charities and the poor law; (2) by securing due investigation and fitting action in all cases; and (3) by repressing mendicity. The Archbishop of Canterbury is President of the Society, which consists of a federation of district committees. The primary objects of the local committees are to afford to all charitable institutions and individuals an easy means of exchanging information and of working together, to prevent overlapping in relief, and to secure the investigation of cases with a view to referring them to the proper quarter for assistance. In suitable cases assistance is given in the form of loans. It also investigates cases of begging-letter writing. An annual "Charities Register and Digest" is published, containing detailed information respecting charities in or available for London (price 5s.). **Organ, Charity Organisation Review** (monthly, price 6d., or 7s. 6d. per annum); other papers are issued. Secretary, C. S. Loch. **Central Office**, 15, Buckingham Street, Adelphi, W.C. (After March 25th, 1905) Denison House, Vauxhall Bridge Road, S.W.

**Cheyne, Rev. Thomas Kelly, D.Litt., D.D.** was b. in London 1841. Ed. at Merchant Taylor's School and Worcester Coll., Oxford. Elected ('60) Fellow of Balliol Coll., and in '81 was appointed rector of Tendring, Essex. In '83 he received an honorary D.D. degree at the tercentenary of the University of Edinburgh, and in '91 was similarly honoured at the ninth jubilee of Glasgow University. In '85 he became **Oriel Professor** of the Interpretation of Holy Scripture at Oxford, and a **Canon of Rochester**; in 1904 a member of the British Academy. Professor Cheyne is one of the most eminent authorities on **Biblical exegesis**. By his articles in the *Encyclopædia Britannica* (75-81) he co-operated with the late Professor Robertson Smith in naturalising the Continental methods of criticising the Old Testament. His **Bampton Lecture**, '89, on the Psalter, excited much controversy, in consequence of his seeking to show that all or

almost all the Psalms were of a post-Exilian origin. In '97 he delivered the American Lectures on the study of religions, with reference to Jewish religious life after the exile. He was a member of the Old Testament Revision Company, and is the author of numerous works on the Old Testament, including "The Prophecies of Isaiah" (5th ed. '89), "Job and Solomon" ('87), "The Book of Psalms" ('88; re-written 1904); "Aids to the Devout Study of Criticism" ('92), "Founders of Old Testament Criticism" ('93), an "Introduction to the Book of Isaiah" ('95), a new Translation of the Book of Isaiah, a new edition of the Hebrew text of Isaiah ('97-8), "Jewish Religious Life" ('98), "Biblical Problems, and the New Material for their Solution" (1904). He was also co-editor with Dr. J. Sutherland Black of the now completed *Encyclopædia Biblica*. Address: South Elms, Oxford, and The Precincts, Rochester.

### CHILDREN, EMPLOYMENT OF, ACT, 1903.

The Act came into operation on Jan. 1st, 1904, and applies to the United Kingdom.

SECT. 1 enables any local authority "to make bye-laws: (i) prescribing for all children, or for boys and girls separately, and with respect to all occupations or to any specified occupation—(a) the age below which employment is illegal; and (b) the hours between which employment is illegal; and (c) the number of daily and weekly hours beyond which employment is illegal. (ii) Prohibiting absolutely, or permitting subject to conditions, the employment of children in any specified occupation."

Under sect. 2 "any local authority may make bye-laws with respect to street trading by persons under the age of sixteen," and may prohibit such street trading, except subject to specified conditions as to age, sex, or otherwise, or subject to the holding of a licence to trade to be granted by the local authority, may determine the days and hours during which, and the places at which, such street trading may be carried on, and require such street traders to wear badges. The expression "street trading" is defined to include the hawking of newspapers, matches, flowers, and other articles, playing, singing, or performing for profit, shoe-blackening, and any other like occupation carried on in streets or public places.

SECT. 3 prescribes that: (1) A child shall not be employed between the hours of nine in the evening and six in the morning—provided that any local authority may, by bye-law, vary these hours either generally or for any specified occupation; (2) a child under the age of eleven years shall not be employed in street trading; (3) no child who is employed half-time under the Factory and Workshop Act, 1901, shall be employed in any other occupation.

Bye-laws are not to have any effect until confirmed by the Secretary of State, who is to hear objections, and may order a local inquiry with respect to objections thereto. Penalties are incurred by persons employing a child or other person under the age of sixteen in contravention of the Act; by the parent or guardian of a child or other person under the age of sixteen, who conduces to the commission of the alleged offence by wilful default, or by habitually neglecting to exercise due care; and by any person under the age of sixteen who contravenes the provision of any bye-law as to street trading made under the Act.

One of the sections of the Act regulates the employment of children in theatres. This matter was dealt with in sect. 3 of the Prevention of Cruelty to Children Act, '94, which prescribes that a petty sessional court, or in Scotland the School Board, may grant a licence for such time and during such hours of the day and subject to such restrictions and conditions as the court or board think fit, for any child exceeding seven years of age:

(a) To take part in any entertainment or series of entertainments to take place in premises licensed according to law for public entertainments, or in any circus or other place of public amusement as aforesaid; or

(b) To be trained as aforesaid; or

(c) For both purposes;

if satisfied of the fitness of the child for the purpose, and if it is shown to their satisfaction that proper provision has been made to secure the health and kind treatment of the child taking part in the entertainment or series of entertainments or being trained as aforesaid, and the court or board may, upon sufficient cause, vary, add to, or rescind any such licence. Provision is made by which a factory inspector may see whether the restrictions and conditions of any licence under this section are duly complied with.

SECT. 11 of the 1903 Act prescribes that the above section of the Act of '94 shall have effect as if re-enacted in this Act: provided as follows:—

(1) A licence under that section shall not be granted to any child under the age of ten years; and

(2) Any inspector or other officer charged with the execution of this Act shall have and may exercise all the powers of an inspector of factories and workshops under that section, and that section shall apply accordingly.

**Children's Country Holidays Fund, The**, organises holidays, never less than two weeks, for poor city children by boarding them with country cottagers, who are paid 5s. a week per child; and much good has resulted from the movement. The C.C.H.F. sends about 34,000 children annually. **Treasurer**, The Earl of Arran; **Secretary**, R. H. Tawney; **Office**, 18, Buckingham St., Strand. Similar efforts in Liverpool, New York, Berlin, etc., have been equally successful.

**Children's Fresh-Air Mission, The**, was established in '82 to provide change of air for poor children in London, specially in the Holborn, Clerkenwell, and St. Luke's districts. In 1903, 3375 children were thus sent out into the country for two or three weeks, making a total since '82 of 54,128 children. The **Treasurer** is Mr. Walter Hazell, the **Secretary** Mrs. Percival, and the **Office** is at St. Peter's Schools, Onslow St., Clerkenwell Road, E.C.

### CHILE.

A republic on the west coast of South America, bounded by Peru on the north and Argentina on the east, which declared itself independent of Spain on Sept. 18th, 1810. Under the Constitution voted in '33 it is governed by a President elected indirectly for five years by delegates nominated by ballot, who is not re-eligible, and to whom the executive power is confided, and a Senate and Chamber of Deputies forming the legislature. The **Senate**, of 32 members, is elected by the provinces for six years; the **Chamber**, of 94 members, by

the departments for three years, by electors possessing a small property qualification. The republic is divided into 23 provinces, and these are subdivided into 74 departments and one territory. These figures include the provinces of Antofagasta ceded by Bolivia in '84, and of Tarapaca and Tacna ceded by Peru in '84. The province of Tacna was ceded originally for ten years, with the understanding that at the end of that period a plebiscite should decide whether it should remain Chilean or revert to Peru. That plebiscite has never taken place, and negotiations for carrying it out fell through owing to revolutionary movements in Peru. Latterly Chile has moved in the direction of the view that Tacna should be retained in order to secure a scientific frontier, and has greatly strengthened her hold on the province. As to Antofagasta, Chile claimed that province not only under the '84 treaty of truce, but as having been hers before. A treaty was signed in June 1903, however, granting Bolivia a seaport; and by another treaty, signed Oct. 17th, 1904, Bolivia definitely recognised the sovereignty of Chile over the province, Chile undertaking to pay the war claims. Boundary difficulties with Argentina were settled by arbitration in 1902.

The establishment of the active army is about 18,000 men, and the formations are: 10 regiments of infantry, 8 of cavalry, 20 batteries of artillery, and a corps of engineers. The war strength is stated to be 150,000 men, including a part of the national guard, while the remainder of that force numbers about 350,000 men, who have received very little training.

The Chilean navy and army are administered from the same office. All service for both army and navy is obtained by conscription. The numbers of officers and men on the active list are variously stated to be from 6000 to 8000. The executive officers are distributed as follows: 1 vice-admiral, 4 rear-admirals, 11 captains, 18 commanders, 16 lieutenant-commanders, 25 lieutenants, and 36 midshipmen. The strength in ships built and building on Nov. 30th was:—

#### Built.

Battleships	2
Armoured cruisers	2
Protected cruisers	6
Torpedo vessels	5
Torpedo-boat destroyers	6
Torpedo boats	24
Submarine	1

The principal dockyards are situated as follows: Talcahuano, one dock, takes any warship; Valparaiso, two small floating docks, take cruisers.

The Roman Catholic is the State religion, but all others are tolerated; gratuitous education is given at the national charge, but is not compulsory. Wheat, wine, nitrate, copper, silver, iodine, etc., are the chief products of the country. Half the population are engaged in agriculture, but the mineral wealth of the country is considerable. The yield of nitrate, in which industry a large amount of British capital is employed, is very large. There are 2880 miles of railway, of which 1335 belong to the State. The capital is Santiago, pop. about 300,000; and other chief towns are Valparaiso, 133,000; and Concepcion, 50,000. The Conversion Law of Feb. 11th, '95, changed the currency from paper to gold, at the rate of 18d. per peso or dollar.

Area, 290,829 sq. m.; pop. (1902) 3,300,000. Revenue, 1901, £9,647,724; expenditure, £9,818,550; debt, 1901, external £17,230,680, internal about £6,000,000 sterling; imports, 1901, £10,447,557, 1902, £9,932,115; exports, 1901, £12,888,373, 1902, £13,940,997.

President, Señor Riesco (elected June 25th, 1901).

Legation in London, 29, Queen's Gate Terrace, S.W.—*Minister Plenipotentiary*, M. Domingo Gana.—*First Secretary*, Don Victor Eastman.—*Consul in London*, A. Torres, 10, Lime Street, E.C.

British Minister at Santiago, A. S. Raikes. *Consul-General*, Sir B. Cusack Smith, K.C.M.G., Valparaiso. *Consuls*, G. L. Ansted, Coquimbo; C. N. Clarke, Iquique.

#### History, 1904.

In his Message to Congress the President said that the financial relief resulting from the sale of the warships had given the Government a considerable surplus for 1903, amounting to £1,202,700. This would be used in improving the ports, especially Valparaiso (May 31st). The Financial Committee of the Chamber approved a Bill postponing the conversion of the paper currency, and a further issue of paper money to the value of £25,000,000. A treaty with Bolivia was signed at Santiago (Oct. 17th), by which Chile's sovereignty over the province of Antofagasta was definitely recognised, as stated above. The treaty also included an arrangement as to railway construction, and a provision giving Chile most-favoured-nation treatment. Germany was nominated as arbitrator in case of any future difficulties arising between the two countries. As usual, there were several changes of Ministry during the year, the last recorded Administration being formed by Señor Bello on Oct. 31st.

#### CHINA, EMPIRE OF.

The most populous, and, excluding Siberia, the largest empire in Asia. China Proper is remarkable as the most compact nationality in the world, having an area estimated by the Chinese Government in 1902 at 1,532,420 sq. m., with a pop. of 407,253,029. The rest of the empire includes the dependencies of Manchuria, Mongolia, Tibet, Jungaria, and Eastern Turkestan, which cover an area of about 2,744,750 sq. m., and contain about 18,710,000 souls. See accounts of these on p. 112.

The government of the country is in theory most carefully organised, although in practice it is far otherwise. At its head is the Emperor, supreme priest and king. The Nei-ko, or Cabinet, which includes two Manchu members, two Chinese, and two assistants from the Hanlin or Great College, administers the empire under the supreme direction of the General Board of State Affairs, which was by an Imperial Edict (April 23rd, 1901), substituted for the previously existing Privy Council.

Seven boards or councils, each presided over by a Manchu and a Chinese, are entrusted, in subordination to the Nei-ko, with all civil appointments, with all financial matters, with the direction of rites and ceremonies, with military affairs, with public works, with criminal jurisdiction, and with the conduct of naval affairs. The Wai-wu-pu, or Ministry of Foreign Affairs, is entrusted with the control of foreign affairs, the maritime customs, etc. The Board of Censors is theoretically superior to the central administration,

and in practice possesses considerable power, through the right of access to the sovereign which its members enjoy. The eighteen provinces are divided among a certain number of viceroys or governor-generals, who are assisted by governors of departments and districts, and by the "taotais" of the cities. Capital Peking, with a pop. estimated at about 1,000,000.

The Chinese army came under close observation during the Boxer Rebellion, and, although in many ways it gave proof of want of organisation, it was recognised that in armament, training, and the things that go to make up the efficiency of an army, remarkable progress had been made. General Frey, who commanded the French forces in China, says it is a mistake to hold that the Chinese Government has any repugnance to the creation of military forces. Before the war with Russia Japanese officers were employed in training the Chinese forces. It was never easy to ascertain facts concerning the Chinese forces. They may be divided into the old armies, comprising the Imperial or Banner troops; the new armies, composed of troops of comparatively recent formation (since the war with Japan); and the Mongolian and Thibetan Militias, which in peace time only exist on paper.

The elite of the old armies is composed of the Shen-Che-Ying or Black Flag troops, now a force of real value, and the Pa-Ki or Eight-Banner men. The former are said to number 50,000 men with the colours. Next in importance to the Black Flags came the Banner men of the army of Manchuria, composed of soldierlike troops, but some of them still armed with bows and arrows, or with the old gingall. The Banner men have been estimated at something like 300,000. Service with the Manchus is hereditary, and the Banner men are still the chief support of the Ta-tsing dynasty. The army of Manchuria must be profoundly affected by the War. The Luh-ying or Green Flags, with a paper strength of 500,000 men, scattered through the empire, possess little military value, and as now organised can be of no real service.

The new armies consist of enrolled or conscript armies (irregulars), strength about 100,000 men, raised at the initiative of the viceroys and governors of provinces in the event of revolution or of war with Europeans; and the active armies, dressed like Europeans, and formed of the best men drawn from the Green Flag Army—strength 210,000 men. These troops occupy important strategic points, and are under the orders of the provincial authorities. The best of them are in the province of Chi-Li, where the army was reorganised by Yun-Hu and Lu-Chang. A summary of the reorganisation was given in the ANNUAL 1902, but there is no certainty as to how far it has been carried out.

Before the Boxer troubles, Major A. E. J. Marshall, of the British Army, one of the best authorities, summed up the number and disposition of the whole available force of China thus:—

#### FIGHTING TROOPS.

Manchurian Field Force .. ..	50,000
Manchurian Irregulars .. ..	20,000
Fighting Braves .. ..	125,000
Chien-Chun, or Disciplined Troops ..	10,000
	<hr/> 205,000

#### RESERVES UNDER ARMS.

Peking Field Force .. ..	13,000
Banner Troops in Peking .. ..	75,000
Banner Troops in Provinces .. ..	95,000
Luh-Ying, or Green Flags .. ..	500,000
	<hr/> 689,000

The three chief religions established in the country are Confucianism, Buddhism, and Taoism, the Buddhists largely preponderating. The State religion, however, is Confucian. Education is to a very large extent the monopoly of a special literary class of the population, and literary examinations are the chief gate to the public service, despite the Imperial Edict of 1902 which decreed that universities should be established in each province, colleges in each prefecture, and schools in each district. Something has been done in this direction, but it is of a very perfunctory character. Agricultural pursuits occupy the majority of the people, the chief products being tea, silk, cereals, and sugar. Of the exports (see below) silk accounted for £8,920,434 in 1901, and tea for £2,738,355. The land is freehold, and is held by families in small holdings, an annual land-tax of from 1s. to 6s. 6d. per acre being paid to the Government. There is much coal in all the provinces, and in the Lui-Yang district, in the province of Hu-nan, there is a vast coalfield, the area of which is about 21,000 sq. miles. The coal here is worked to some slight extent at present, and finds an outlet through Hankow, on the Yang-tse-Kiang. There are also large quantities of coal in the provinces of Chihli, Shantung, Sze-Chuan, Shansi and Honan. Iron ore is also plentiful in Shansi. The greater part of the country is only very partially developed, and much benefit will accrue to native and foreign trade when a proper system of railways is established. Little has been done in this direction at present, though many concessions have been granted.

Various ports, called the treaty ports, which number forty-two in all, have been thrown open to European trade, and about 19,000 Europeans reside in these ports, of whom over 5400 are British subjects. Shanghai is the great foreign centre, with a European population of 7300, and a native population of about 600,000. The Imperial Customs dues on foreign trade are collected and the coast-lights are administered by the great service known as the Imperial Maritime Customs of China. Nearly 900 Europeans are engaged in its service, of whom about 500 are British.

An Agreement between Great Britain and Germany was concluded Oct. 16th, 1900 (see eds. 1901-2). Another Agreement was concluded in 1902 between Great Britain and Japan, for the text of which see JAPAN. By the Commercial Treaty between China and Great Britain signed Sept. 5th, 1902, the likin were abolished throughout the empire in return for a surtax on imports equal to one-and-a-half times the duty provided for in the Protocol of 1901, and a surtax of one-half the 5-per-cent. duty on exports. Provision was also made for a national currency uniform throughout China, revision of the mining regulations, the adoption of rules for the navigation of inland waters, and the protection of British trade marks in China.

Various districts have been "leased" to European powers: e.g., Wei-hai-Wei in Shantung, and the Kow-lung district opposite Hong Kong, to Great Britain; Port Arthur, Talienvan, and a strip of territory to Russia; Kiao-Chau in Shantung to Germany; and the bay of Kwang-Chau-Wan, opposite to Hainan Island, with two islands commanding the entrance to the bay, to France.

The revenue and expenditure are estimated at from £12,000,000 to £15,000,000. Imports, 1902, £39,118,115; 1903, £40,908,750; exports, 1902, £30,693,946; 1903, £31,124,900. The proportion of imports sent by Great Britain and her Colonies was £30,085,832 in 1902 and £29,751,718 in 1903, and of exports to Great Britain and her Colonies £12,926,435 in 1902 and £13,871,393 in 1903, the two amounting to 61 per cent. in 1902 and 65 per cent. in 1903 of the whole trade of China. The debt in 1900 amounted to about £55,755,000, including the loan to cover the war indemnity to Japan; and in 1901 China agreed to pay to the Powers, in 39 annual instalments, an indemnity of 450,000,000 taels (about £67,500,000 at 3s. per Hai-kuan tael), making the total debt £123,255,000. With the exception of a railway loan of £2,300,000, this debt is secured on the Imperial Maritime Customs.

**Administration:** *Grand Secretary*, Prince Ching. *High Commissioner of Education*, Chang Pe-hsi. *President, Board of Commerce*, Prince Tsai-chen. *Commander-in-Chief Army and Navy*, Yuan-Shih-Kai.

**General Board of State Affairs: Members**—Prince Ching (President), Kun Kang, Wang-Wen Shao, and Lu Chuan Lin, with the Viceroy Lio Kun-yi and Chang-Chih-tung as associate members.

**Imperial Chinese Customs:** *Inspector-General*, Sir Robert Hart, Bart., G.C.M.G.; *Deputy* Sir Robert E. Bredon, K.C.M.G.

**Minister Plenipotentiary in London**, His Excellency Chang, Ta-jen, 49, Portland Place, W. *Councillor of Legation*, Sir Halliday Macartney, K.C.M.G., 3, Harley Place, W.

**British Minister at Peking**, Sir Ernest Satow, G.C.M.G. *Secretary*, Hon. Lancelot Carnegie, M.V.O. *Commercial Attaché*, J. W. Jamieson, Shanghai.

**British Consuls-General:** *At Tientsin and Peking*, L. C. Hopkins.—*At Canton*, James Scott.—*At Shanghai*, Sir Pelham Warren, K.C.M.G.—*At Hankow*, Sir Ed. H. Fraser, C.M.G.—*At Cheng-tu*, A. Hosie.—*At Yun-nan-fu*, W. H. Wilkinson.—*At Niu-chwang*, H. E. Fulford, C.M.G.

**Chief Justice of Supreme Court for China and Korea**, H. S. Wilkinson, Shanghai.

### Dependencies.

**Manchuria** (area 363,610 sq. m., pop. 8,500,000) was occupied by the Russians at the time of the Boxer outbreak, and though it should have been evacuated under the terms of the Manchurian Convention, signed April 8th, 1902, it remained under Russian control. See RUSSO-JAPANESE WAR.

**Mongolia** (area 1,367,600 sq. m., pop. 2,580,000) lies between Manchuria and Chinese Turkestan.

**Chinese Turkestan** (area 550,340 sq. m., pop. 2,200,000), to the north of Tibet, and to the east of the Pamirs, contains the important towns of Kashgar, Yarkand and Khotan. British and Russian representatives are stationed at Kash-

gar, which is a large trading centre, but Russian influence is in the ascendant.

**Tibet** (area 463,200 sq. m., pop. variously estimated at from 3,000,000 to 6,000,000) lies on the slopes of the Himalayas, between Kashmir and the Chinese province of Szechuen, with Chinese Turkestan on the north. The capital of the country is Lhasa (estimated pop., 10,000). The people have long refused to allow travellers to explore their country, which—by reason of its physical characteristics alone, its great mountains, and its height above the level of the sea—is of extreme interest. The Dalai Lama was—until he was deposed by the Chinese in 1904—the supreme ruler, but there is another Grand Lama, with a greater reputation for spiritual power and learning, at Tashe-Lhunpo, a great monastery near Shigatse, the second city of Tibet. The Dalai Lama was assisted by a Council composed of a Prime Minister and 9 councillors, of whom 5 are priests and 4 laymen. The country is divided into 4 "lings," each governed by a lama. There is an Amban, or Chinese Resident, at Lhasa, who represents the Chinese Government in the country, China having assumed the suzerainty of the country early in the eighteenth century. After the Chino-Japanese war, however, the authority of China was flouted by the Dalai Lama, who was under the influence of a man named Ghomang Lobzang, who had become a Russian subject under the name of Dorjief, and acted as the agent of the Russian Government at Lhasa. In 1901 he arranged a treaty with Russia, which was never sanctioned, and which is said to have contained a clause promising Russia's aid against the British Government, although the Russian Government formally denied the existence of any such treaty. The three great monasteries outside Lhasa really govern the country, through the Tzong-du or Great Assembly. The religion, of course, is that of Buddha. By virtue of a treaty of commerce concluded with Tibet early in '93, Yatung, a town in the Chumbi valley, on the Indian-Tibet frontier, was opened for trade, with an Indian Government official and a Chinese official stationed there. By the terms of the treaty, all articles, except munitions of war, drugs, and intoxicating liquors, were to pass free of duty for the first five years. The import of tea from India was prohibited for the same period. The treaty still remains in force, but see below. The chief imports are cotton and woollen goods, metals, chinaware, indigo, matches, silk, and tobacco. The exports are mostly wool, musk and ponies being the only other items of note. Imports, 1902-3, £76,848; exports, £132,680. A British mission under Col. Younghusband was despatched during 1903 by the Indian Government to meet Tibetan and Chinese officials to discuss trade relations between India and Tibet, and to secure the observance of the Anglo-Tibetan Conventions of '90 and '93. The mission reached Khamba Jong in July, this place being about 30 miles on the Tibetan side of the border; but there it remained encamped till November, owing to the unfriendly attitude of the Tibetans. It was then resolved to order the mission to advance to Gyantse Jong, about 50 miles nearer to Lhasa and 150 miles from that city, and to occupy the Chumbi valley, which is a wedge of Tibetan territory projecting between Bhutan and Sikkim. A force

under Brigadier-General J. R. L. Macdonald was appointed to accompany and escort the Mission.

The Mission remained at Chumbi for some time at the beginning of 1904. The Lama Dapen, the senior of the five Tibetan generals, in an interview with Colonel Younghusband, urged him to returned to Gnatong, declaring there would be serious trouble if the Mission advanced. The Chinese Government ordered Yu-Kang, the Chinese Amban at Lhasa, to meet the British Commissioner and co-operate with him. The Mission left Chumbi and arrived at Phari (March 27th), on the road to Gyantse. When it had reached a point about 4 miles beyond Tanu, the Lhasan generals again approached, and demanded that the Mission should retire to Yatung (31st). Colonel Younghusband, however, definitely refused, and in view of the attitude of the Tibetans, who barred the way, it was resolved to disarm them. The operation was conducted with the utmost patience and forbearance, but a sudden attack made by a few Tibetans at the instance of the Lhasa Dapen or general led to the order being given to fire on them, and they were mown down by Brigadier-General Macdonald's troops. Some further resistance was experienced at Guru, but the village was soon cleared and occupied. Gyantse was reached (April 11th), after some more fighting, chiefly at Khangma. The Tibetan fort at Gyantse was surrendered without resistance (12th). Colonel Younghusband received a despatch from the Amban at Lhasa (May 3rd), saying that the Dalai Lama refused to supply him with transport to Gyantse or to send a Tibetan representative at all. The garrison at Gyantse were attacked (5th), but the Tibetans were beaten off with a loss of 200 killed and 80 wounded. The attack took place during the absence of a great part of the garrison on an expedition to the Karo Pass, where fighting also took place. The Tibetans returned unopened (June 2nd) a letter from Colonel Younghusband demanding that the Amban should go to Gyantse with qualified Tibetan representatives to settle the difficulties outstanding. Attacks upon the British posts at Falla and Khangma on June 2nd and 7th were repulsed, and a severe defeat was inflicted on the Tibetans holding Gyantse jong and town (28th), after which an armistice was arranged and a deputation of Tibetan delegates had an interview with Colonel Younghusband (July 2nd). Nothing resulted from this, however, and the Jong was captured by the British force (6th). The next day the Monastery and the rest of Gyantse town were occupied without resistance. Colonel Younghusband issued a Proclamation (13th) stating that the Mission would proceed to Lhasa to obtain the necessary redress for the insults offered to representatives of the British Government; and the advance to Lhasa began at once, the city being reached (Aug. 3rd) without the firing of a shot after the passage of the Karo-la Pass. The *Times* correspondent sent home some most brilliant word-pictures of the city, dominated by the gigantic Potala Palace, of a rich maroon colour resting on white masonry and crowned with roofs of gold of a Chinese pattern. The structure is about 430 feet in height and between 800 and 900 feet in length. The Dalai Lama had fled, but the Amban at once waited on Colonel Younghusband and promised to assist in

arriving at a settlement. After considerable negotiation a formal treaty was signed (Sept. 7th) in the Dalai Lama's apartments in the Potala. The Regent left in charge affixed the Dalai Lama's seal, and the Council, the three great Monasteries and the National Assembly also sealed the treaty. The terms, according to the text given by the *Times* correspondent at Peking (15th) included the following stipulations. Tibet agreed to establish markets at Gyantse and Garlok, in addition to Yatung, for British and Tibetan trade, with Tibetan and British officials stationed thereat; and Great Britain agreed to alter by separate arrangement any objectionable features in the Convention of 1893. Tibet agreed to pay Great Britain an indemnity of £500,000 in three yearly instalments, commencing on Jan. 1st, 1906, Great Britain meanwhile continuing to occupy the Chumbi valley for 3 years, as security for the due payment of the indemnity and the performance of the conditions as to trading stations. It was provided that if the indemnity should not be paid, Great Britain should continue in occupation of Chumbi. Tibet agreed to demolish all forts between the Indian frontier and Gyantse on the trade routes. Tibet also agreed not to sell, lease, or mortgage any Tibetan territory to any foreign Power, without the consent of Great Britain, and not to allow any foreign Power to concern itself with Tibetan affairs, or to construct roads or railways or open mines in Tibet. By order of the Chinese Emperor the Amban issued a Proclamation (Sept. 15th) announcing that the Tashi Lama of Shigatse was appointed to succeed to the spiritual dignities of the Dalai Lama. The British Expedition left Lhasa on its return journey (23rd), the Regent invoking the blessing of Heaven on General Macdonald for having spared the monasteries from violation and giving him a gold image of Buddha. The journey was safely but with difficulty accomplished, owing to the late season.

### Sovereign.

The Emperor, Tsai-Tien Kwang-Hsu, is the son of Prince Chun, and his mother, who died in 1896, was a sister of the present Empress-Dowager. Born in '72, at Peking, he ascended the throne on Jan. 22nd, '75. He married, in '89, his cousin, a daughter of Duke Kwei, who is a brother of the Empress-Dowager. During the early part of his reign the Empress-Dowager Tsu-Hsi, who was b. Nov. 17th, 1834, was supreme, though nominally the Emperor assumed full control of the Government in '89. He is himself in favour of progress, and in '98 he issued several edicts in favour of reforms; but the only effect was that in Sept. '98 the Empress-Dowager restored the Regency and relegated the Emperor to the background again. Each Emperor can appoint his successor from among those of his own family who belong to a younger generation than his own.

### Railways.

Including the Russian lines in Manchuria, there were about 2800 miles open at the beginning of 1904, 1600 being Russian and the rest built by China or by European or other concessionaires.

The Imperial Railway of North China has a length of 580 miles, and runs between Peking and Tientsin and Niu-chwang, with extensions

to Chingwangtao and Hsin-min-tun, 40 miles west of Mukden. This line was restored to Chinese control by Great Britain and Russia in 1902.

The Russian Railway through Manchuria to Vladivostok has been complete for some time, and a branch leaves the main line at Harbin, running through Kirin and Mukden to Port Arthur.

The short line between Shanghai and Wosung, 18 kilometres, is said to be paying its way.

A line from Peking to Hankow is being constructed by a Franco-Belgian syndicate, and is complete from Peking to Chingting, and from Hankow northward to a distance of nearly 300 miles in 1904.

A concession for a line from Hankow to Canton was granted to the American China Development Co., but the controlling interest has been found to be Belgian, and complications arose in 1904.

The Canton to Fat-shan branch (11 miles) of the Canton-Hankow line was opened Nov. 15th, 1903, and the continuation of the line to Samshui, on the West River, was completed in 1904.

A line from Canton to Macao is to be built by a Chino-Portuguese syndicate.

A concession has been long granted for a line from Kow-loon (Hong-Kong) to Canton—100 miles—but nothing has been done.

A contract for the construction of the Shanghai-Su-chau-Nanking Railway was signed at Shanghai on July 9th, 1903, by Sheng and the representatives of the British and Chinese Corporation, with which the Peking Syndicate is now amalgamated. The work must be begun within one year and completed within five. This undertaking will result in a great development of trade on the Lower Yangtze.

The British Peking Syndicate has constructed a line from the coal-fields in Ho-nan to the Wei river, giving access by water to Tien-tsin; and they intend to extend the line to Tse-chau, the centre of the South Shansi coal-fields.

The Anglo-German trunk line from Tientsin to Chin-kiang, which is then to join the British line, for which a concession has been given from Chin-kiang to Shanghai, is still not commenced. The Germans are to build the section from Tientsin to the Shantung border, and the British the section thence to Chin-kiang.

The German Shan-tung railway, which runs from Tsin-tao on the coast, was opened as far as Chinan, the capital of Shan-tung, a distance of 247 miles, in 1903. The Chinese Government granted concessions during 1903 for extensions from Te-chau, on the Grand Canal, to Chingting-fu, on the main line from Peking to Hankow; and from Yen-chau to Kai-fong-fu, the capital of Ho-nan, where it will join the new Belgian line to Ho-nan-fu.

A Russian concession was granted for a line, guaranteed by the Chinese Government, from Chingting-fu, on the Peking-Hankow main line, to Tai-Yuen-fu, the capital of Shan-si (217 miles).

A contract, sanctioned by Imperial edict, was signed by the Belgian Compagnie Générale des Chemins de Fer et Tramways en Chine (Nov. 12th, 1903) for the construction of a line from Kai-fong-fu to Ho-nan-fu (250 kilometres), traversing from east to west the region of the Yellow River, with the right of extension to Si-ngan-fu.

The French line from Lao-kai to Yun-nan-sen is open from Hanoi to Viétri, and complete to Yenbay.

## History, 1904.

The Commercial Treaty with the United States was formally ratified by the Emperor, despite Russia's efforts to prevent it (Jan. 9th). Under the treaty Mukden and An-tung, in Manchuria, were opened to foreign trade; and under the similar treaty with Japan, ratified on the same day, it was provided that Ta-tung-Kau should be opened as a treaty port. The development of the negotiations between Japan and Russia was followed with the keenest interest at Peking, and Prince Ching and the Viceroy Yuan Shih-Kai gave assurances to the Japanese Minister that in the event of war China would maintain strict neutrality (15th). Great excitement was caused at Peking by the outbreak of hostilities between the two Powers, and by the Japanese successes at Port Arthur and Chemulpo (Feb. 8th). For details of the progress of the war see RUSSO-JAPANESE WAR. An Imperial edict proclaiming China's neutrality, and enjoining the strict observance thereof throughout the Empire, was published (12th), and the Japanese Government officially stated that they had strongly advised this course for China's adoption through their Minister at Peking. At the same time China was advised that this declaration of neutrality imposed upon her the obligation of seeing that it was scrupulously observed by both belligerents, and that no Chinese territory, except Manchuria, should be made the scene of warlike operations. In a note addressed to the Japanese Government (13th) China expressed her intention of acting on this advice; and in reply the Japanese Government declared that the war was being waged "not for the purpose of conquest, but solely in defence of her legitimate rights and interests, and consequently that the Imperial Government have no intention to acquire a territory as a result of the conflict at the expense of China."

The Chinese Minister in London, to whom, in accordance with treaty obligations, the draft of the Transvaal Labour Ordinance was sent, replied to Lord Lansdowne (Feb. 11th) that he found nothing in it to object to so far as regulations for the supervision and protection of Chinese immigrants were concerned. He asked, however, that the ordinance should provide for power being given to the Consul of the country of the immigrant to visit the mines and inspect the places prepared for their accommodation; that corporal punishment should be forbidden; that the "importers" of labour should be *bona-fide* employers of labour, and not dealers or speculators in labour; and that repatriation should take place to the port of embarkation. The Anglo-Chinese Labour Convention, containing the regulations for the importation of Chinese labourers into the Transvaal, and their control there, was afterwards signed by Lord Lansdowne and the Chinese Minister in London (May 13th).

A number of Imperial Decrees were issued during July. One, referring to the straitened condition of the finances of the country, and the effect of the war, ordered the abolition of the post of Customs Superintendents at Canton, and at Huaiian on the Grand Canal, besides other provincial posts. Another edict (18th) ordered an inquiry into the methods of collecting the land tax. A treaty between Portugal and China was signed at Shanghai (Nov. 11th), its provisions resembling those of the treaties with Great Britain, the United

States and Japan. It also dealt with Macao, affording China improved facilities for the prevention of the contraband opium traffic, and dealing with the colony's rights as to the navigation of the West River, and the rice trade with the mainland. A contract was also signed for the construction of a railway from Macao to Sung-shin by a Chino-Portuguese syndicate.

Sir Robert Hart drew up an important scheme for the reorganisation of the financial and military resources of the country, which was published in April. He advocated a uniform land tax at the rate of about 2s. 6d. per acre of cultivated land, which would produce a revenue of 400,000,000 taels, or about £53,000,000, as compared with the 80,000,000 to 90,000,000 taels of existing revenue. With this revenue the army could be reorganised, and 4 Army Corps, each consisting of 50,000 men, created; 3 new squadrons could be added to the navy, each consisting of 10 battleships and 10 first-class cruisers, with smaller vessels; 4 arsenals could be provided; the Civil Service could be reformed; 10 Governor-Generals, 20 Provincial Governors, 20 Provincial Treasurers, 20 Provincial Judges, 100 Taotais, 200 Prefects, 2000 District Magistrates and 20,000 Police Magistrates could be appointed and adequately remunerated; education could be provided for; and a postal and telegraph department could be set up.

The *Times* correspondent at Peking reported (Nov. 11th) that China had made proposals for the settlement of the vexed question whether the International Indemnity of 1901 should be regarded as a gold or silver debt. In return for the remission of the payment of interest on arrears, in return for calculating the rate of exchange at the average daily rate for the month instead of at the rate of the last day of the month only—a system which placed China at the mercy of rates arbitrarily imposed by the Bankers' Commission—such calculation to be retrospective and to apply to payments already made, and in return for crediting China with the interest on the proceeds paid monthly to the Bankers' Commission for the semi-annual payments of interest on the indemnity, China undertook to pay the whole indemnity on a gold basis. The foreign Ministers jointly protested (Dec. 1st) against the levying by the Chinese authorities of additional transit dues, as contrary to the commercial treaties.

**China Association, The**, is a society of merchants and others interested in the Far East, having for its objects the representation of the interests of the British mercantile community in their relations with the Chinese and Japanese, and the promotion of trade and intercourse with China and Japan. **Hon. Sec. and Treas.**, Joseph Welch; **Office**, 159, Cannon Street, E.C.

**China League, The**, was formed by Members of Parliament and others interested in the Far East in 1900. **The Hon. Secretaries** are Messrs. A. R. Burkill and G. Jamieson, C.M.G.; the **Secretary** is Mr. E. G. Wall; and the **Office** is at Dacre House, Victoria Street, S.W.

**Choate, Joseph Hodges**, American lawyer, succeeded Mr. Hay as U.S. Ambassador to Great Britain in '99, arriving in England on March 1st of that year. B. at Salem, Massachusetts, Jan. 24th, '32, and a graduate at Harvard

University, '52, he has attained eminence at the American Bar, to which he was admitted in '55. Mr. Choate is a cousin of Rufus Choate, the great American lawyer, orator, and senator, and was for long counted as one of the leading lawyers in the States. In '98 he was president of the American Bar Association. He was chairman of the convention held to revise the Constitution of the State of New York in '94. He received the LL.D. degree from Amherst in '87, Harvard '88, Edinburgh '99, Cambridge 1901, Yale 1901, St. Andrews 1902, Glasgow 1904, and the D.C.L. from Oxford in 1902. He is of course a Republican, an admirable speaker, and has written addresses on Abraham Lincoln, Rufus Choate, Admiral Farragut, Education in America, Benjamin Franklin, and Alexander Hamilton. His departure from England was foreshadowed in Dec. 1904. **Address**: 4, Carlton Gardens, S.W.

**Christian Evidence Society**. Founded in 1870 by the then Bishop of London, the late Earl of Harrowby, and others, Churchmen and Non-conformists, with the conviction that it was necessary to do something to counteract the progress of unbelief amongst various classes. **President**, Archbishop of Canterbury; **Chairman**, the Lord Chancellor; **Sec.**, Rev. R. V. F. Davies, M.A.; **Assistant Sec.**, R. Thomson. **Offices**, 34, Craven Street, W.C.

**Christie, Sir William H. Mahoney, K.C.B.**, D.Sc. (hon.), M.A., F.R.S., **Astronomer Royal**, was b. at Woolwich 1845, is a son of the late Prof. S. H. Christie, F.R.S., was ed. at King's Coll. School, London, and Trinity Coll., Camb., and became a Fellow of his college. Graduated B.A. ('68) as fourth wrangler. Appointed ('70) chief assistant at the Royal Observatory, Greenwich, London. On Sir G. B. Airy's retirement ('81) appointed **Astronomer Royal**. He contrived and introduced several valuable improvements in the scientific apparatus there in use, including new forms of spectroscope, of alt-azimuth, and of domes. He is the author of the "Manual of Elementary Astronomy" and various scientific papers. K.C.B. Nov. 9th, 1904. **Address**: Royal Observatory, Greenwich.

**Cinque Ports, The**. A group of seven ports (originally five, whence the name) situated on the south coast of England (in Sussex and Kent). **Hastings, Romney, Hythe, Dover and Sandwich** were the original ports, **Winchelsea and Rye** being added afterwards. The original Cinque Ports were created by William the Conqueror, and were endowed with various important privileges in consideration of their furnishing a certain quota of ships of war, for the king's use, when demanded. The **Lord Wardenship**, of which Lord Curzon is the present holder, is now only an honorary dignity. Its holders have no special jurisdiction.

**City Churches Preservation Society, The**. founded in 1894, has been instrumental in saving St. Mildred's, All Hallows, Lombard Street, and St. Mary Woolnoth from demolition. The Society considers that to destroy any of the beautiful City churches would be unnecessary and an act of vandalism. **Chairman**, Mr. Edwin Freshfield. **Hon. Sec.**, Mr. Alfred Moore, 7 Leadenhall Street, E.C.

**City of London College**. This institution (known as the Metropolitan Evening Classes at Crosby Hall) was founded in 1848 by the Rev. Charles Mackenzie, M.A., and was constituted the City of London College in '60. The

building in White Street, Moorfields, was erected in '83. The "Mitchell" wing, in Rope-maker Street, was added in 1904 at a cost of £28,000. It is now a constituent Institute of the "City Polytechnic." Day and evening classes are held in the various branches of science, literature, art, and commerce, and a commercial day school has been established. There are large and commodious chemical, physical, biological, and physiological laboratories, also Art studios, to meet the requirements of the students. There are also a good library and a spacious reading-room. Principal, Sidney Humphries, B.A., LL.B.; Secretary, David Savage, F.C.I.S.

### CIVIL SERVICE.

This is one of the oldest institutions of the country, and probably dates from the earliest monarchical times. It is only within perhaps the last hundred years that the English Civil Service has assumed its present vast proportions. The Civil Service comprises all persons who serve the King in a civil capacity, as opposed to those employed in the military and naval services. The total number of persons so employed cannot be far short of half a million. The chief department of the Civil Service is the **Treasury**, which exercises a control over all other departments, and from whom alone authority is obtained for all expenditure. Perhaps next in importance is the **Exchequer and Audit Department**, which is charged with the audit of the accounts of all other departments, and is required to see that the expenditure of each is in accordance with the authorities received from the Treasury. The **Foreign Office** (including the diplomatic service), the **India Office** and the **Colonial Office**, together with the **Home Office**, probably rank next amongst the numerous departments of the Home Civil Service. The three revenue departments—namely, the **Post Office**, **Inland Revenue**, and **Customs**—are of course important branches of the service; there are also, among what are known as the spending departments, the **War Office**, **Admiralty**, **Board of Trade**, **Office of Works**, **Education Office**, **Privy Council Office**, the **Stationery Office**, and many other smaller offices.

A Parliamentary Return issued in 1903 showed that the total number of persons in the Established Civil Service on March 31st, 1902, was 107,782. Of these there were in the—

Post Office . . . . .	77,035
Admiralty . . . . .	8,869
Inland Revenue Department . . . . .	5,388
Customs Department . . . . .	3,877
Prisons Commissioners, U.K. . . . .	3,754
Board of Education . . . . .	1,125
Trade . . . . .	1,093
War Office . . . . .	1,039
Local Government Boards, U.K. . . . .	598
Supreme Court, England . . . . .	459
" Ireland . . . . .	243
Office of Works, England . . . . .	294
" Ireland . . . . .	103
Home Office . . . . .	289
British Museum . . . . .	281
Ordnance Survey . . . . .	205

and smaller numbers in other departments of the Service.

Most of the clerkships in the Civil Service are now thrown open to public competition, and the various offices are grouped into two grades. The recommendation of the **Playfair Commission**

which sat in 1874 to inquire into the Civil Service—namely, that the Service should be divided into a **Higher** and a **Lower Division**, with a specified scale of salaries irrespective of office for each division—has never been fully carried out. Most of the better-class offices are grouped under Grade I., and the remainder under what was formerly known as Grade II.; in these latter, however, most of the vacancies are being filled up by the appointment of Lower Division clerks under the **Playfair** scheme.

The Civil Service Commissioners conduct the examinations not only for home services, but also for Indian, military, naval, and colonial services. The **Secretary of the Civil Service Commission** is Mr. Stanley M. Leathes, M.A. (An annual report is published by Eyre & Spottiswoode.) For details see **FINANCE, NATIONAL**; see also **BRITISH EMPIRE (Indian Civil Service)**. Full particulars of all examinations for the Civil Services, and of the situations to be competed for, can always be obtained on application to the **Civil Service Commission, London, W.**

**Clarke, Sir Edward G., K.C.**, was b. in London, Feb. 15th, 1841. His father was Mr. J. G. Clarke, a jeweller. He was ed. at the City Commercial School, City of London Coll. and King's Coll., London, and obtained a writership in the India Office by open competition '59, but retired Oct. '60. He became Tancred Law Student in '61; was called to the Bar, Lincoln's Inn, '64; created Q.C. '80; and elected a benchor of his Inn '82. He was made Solicitor-General in Lord Salisbury's '86 Administration, and received the honour of knighthood. Sir Edward was for some time a reporter in the House of Commons, and was on the literary staff of the *Morning Herald and Standard*. He made his mark in the celebrated Penge case, and successfully defended Mrs. Bartlett in the notorious Pimlico poisoning case. He has published three volumes of political and forensic speeches. His principal speech in the House of Commons was on Feb. 13th, '93, when he followed Mr. Gladstone in the debate on Home Rule. He declined to take office in '95 because of the regulations as to private practice imposed on the Solicitor-General and Attorney-General, and in '97 refused the offer of the appointment of Master of the Rolls. He was M.P. for Southwark '80, and for Plymouth '80-1900. In regard to the Transvaal question he strongly attacked Mr. Chamberlain's diplomacy in the House of Commons in Oct. '99, expressing the opinion that if Parliament had been sitting in August and September there would have been no war, and eventually he retired from Parliament because of his differences with his constituents on this point. Address: Thorncote, Staines.

**Clarke, Sir George Sydenham, K.C.M.G., F.R.S.**, Secretary of the Committee of Imperial Defence, was b. in 1848, and is a son of the Rev. W. J. Clarke of Folkestone. Ed. at Haileybury and Wimbledon, he passed first both into and out of the R.M.A., Woolwich, and entered the Royal Engineers '68. He was on the Staff of Cooper's Hill '71-80, served in Egypt and the Soudan '82 and '85, and then went to the War Office. For his services as Sec. to the Colonial Defence Committees, '85-92, he was made a K.C.M.G. '93. He also acted as Sec. to the Royal Commission on Navy and Army Administration in '88, and was a member of the Committee appointed in 1900 to

inquire into the organisation of the War Office. During the Boer war he was Supt. of the Royal Carriage Dept. at Woolwich. Governor of Victoria 1901, member War Office Reconstruction Committee 1903, and in 1904 appointed to the post he now holds. He married in '71 Caroline, eldest daughter of the late Gen. R. H. Fellowes. He has published works on "Imperial Defence," "Fortification," etc.

**Clifford, Rev. John, M.A., LL.B., B.Sc., F.G.S., D.D.**, President of the Baptist Union '88 and '99, President of the National Council of Free Evangelical Churches '98, was b. Oct. 16th, 1836, at Sawley. In Feb. '93, during the course of a lecture, he stated that when a boy of eleven he was a "threader" in a lace factory, and had often worked from 4 a.m. on the Friday till 6 p.m. on the Saturday. In '55 he entered the General Baptist College. After his third year at the College he accepted an invitation from the Praed Street church, Paddington. He graduated B.A. at London University in '61,

B.Sc. with honours in Logic and Philosophy, and in Geology in '62, in '64 taking the degree of M.A. (bracketed first); and in '66 that of LL.B. with honours in the Principles of Legislation. The honorary degree of D.D. was conferred on him in '83 by Bates' University, U.S.A. His growing success at Praed Street led to the erection of **Westbourne Park Chapel**, which was opened Sept. '77, and in which he still continues to minister. He visited Australia and the States during '97. He was the protagonist of the Passive Resistance Movement in 1903 and 1904. His works include the following: "Is Life worth Living?" "The Dawn of Manhood," "Daily Strength for Daily Living," "Christian Certainties," "The Inspiration and Authority of the Bible," "Typical Christian Leaders," "Social Worship," "God's Greater Britain," "The New Education Bill: What is at Stake" (1902), and "The Secret of Jesus" (1903). Address: 25, Sunderland Terrace, Westbourne Gardens, W.

**Cobden Club.** Chairman of Committee, Lord Welby; Secretary, G. H. Perris, 28, Victoria Street, S.W.

**Coleridge-Taylor, S.**, composer, was b. in London, 1875. His father, a West African, studied medicine at King's College, London; his mother was English. He greatly distinguished himself at the Royal College of Music, where his masters were Professor Stanford (composition), Mr. Henry Holmes

(violin), and Mr. Algernon Ashton (pianoforte). Several of his works attracted attention at the college students' concerts, but to the general public he first became known through the "Orchestral Ballade in A Minor," written for Gloucester (Three Choirs) Festival, '98. His cantata "Hiawatha's Wedding Feast," was warmly welcomed in '99, when also he composed for provincial festivals a "Solemn Prelude" for orchestra (Worcester), the over-

ture to the "Hiawatha" trilogy (Norwich), and the second part of the trilogy "The Death of Minnehaha" (Hanley). The complete trilogy was performed several times in 1900. In that year he also composed the incidental music to "Herod" at Her Majesty's Theatre. In Jan. 1902, his "Blind Girl of Castel Cuillé" was produced by the Royal Choral Society at the Albert Hall, and he also published a Coronation March. In 1903 his cantata "The Atonement" was produced at the Hereford Festival. In 1904 he composed several works for the violin and a large number of songs. At the invitation of a choral society which bears his name in Washington, U.S.A., he went there in October to conduct performances of "Hiawatha." He has been for some years conductor of the Rochester Choral Society, and was recently appointed conductor of the Handel Society, 10, Upper Grove, South Norwood, S.E.

### COLOMBIA.

Colombia is a republic of South and Central America, bounded on the east by Venezuela, on the south by Brazil and Ecuador, on the west by the Pacific, and on the north by the Caribbean Sea. Formed by the union in 1861 of nine states as the "United States of New Granada," which in '63 became the "United States of Colombia." After the termination of the revolution which prostrated the country in '84-5, a new constitution was promulgated in August '86 by the National Council of Bogota. By this constitution the independence of the nine States was abolished, a central authority was set up, and the country was styled the "Republic of Colombia." The nine States became simple departments, their presidents being reduced to governors under the direct nomination of the President of the Republic, whose term of office is six years. The legislature consists of a Senate and House of Representatives.

As a result of the rejection by Parliament of the Panama Canal Treaty with the United States, an uprising took place in Panama on Nov. 3rd, 1903, independence of the Republic was proclaimed, the State officials were arrested, and a provisional Government was formed. The Colombian troops which had held Colon abandoned it, and, despite the protests of Colombia, the *de facto* Government of Panama was constituted and recognised by the United States, most of the Isthmian municipalities joining the new Republic. See **ENGINEERING** and **PANAMA**.

A treaty was signed in Nov. 1904 submitting a boundary dispute with Ecuador to the arbitration of the German Emperor.

The national religion is Roman Catholicism, but other religions are tolerated. Primary education is free, but not compulsory. All able-bodied citizens are liable to military service. Industries are chiefly confined to agriculture and the rearing of cattle. Coffee is grown, the department of Cundinamarca producing the famous Bogota coffee; but the civil war has lately paralysed the business. Cocoa and bananas are also cultivated. The great attraction of Colombia is its mineral wealth. Rich mines of gold, silver, iron, copper, lead, etc., and emerald mines, which are the property of the Government, exist in the country. From Oct. '99 till Nov. 1902 a civil war progressed in a desultory fashion, crippling the national industries, and paralysing

all commercial intercourse with the interior. The great rise in exchange has also caused much embarrassment.

**Area**, 482,274 sq. miles; **pop.** estimated at between 4,000,000 and 5,000,000. **Capital**, **Bogota** (pop. 120,000). **Estimated revenue** 1903, £852,052; **estimated expenditure**, £903,115. **Imports** '98-9, £2,216,605; **exports**, £3,831,557 (no later data available); **foreign debt**, 1903, £2,805,502, of which it is understood that Panama will assume a share.

**President**, Señor Marroquín.

**Commander-in-Chief**, Gen. A. Vasque-Coboz.

**Minister Plenipotentiary in England**, Dr. Ignacio Gutiérrez Ponce, 42, Holland Rd., Kensington, W.—**Consul-General**, Don Guillermo R. Calderón, 103, Newgate Street, E.C.—**Vice-Consul** Mr. Leopold Schloss.

**British Minister and Consul-General at Bogota**, George Earle Welby, Esq.

### COLONIAL CONFERENCE, 1902.

The Conference met at the Colonial Office on June 30th, Mr. Chamberlain presiding, and held ten meetings in all, the last taking place on Aug. 11th. The following Premiers of self-governing colonies were present: Sir Wilfrid Laurier (Canada), Sir Edmund Barton (Australia), Mr. Seddon (New Zealand), Sir Gordon Sprigg (Cape Colony), Sir Albert Hime (Natal), Sir Robert Bond (Newfoundland), Lord Onslow (Parliamentary Under-Secretary of State for the Colonies), and Sir Montague Ommanney (Permanent Under-Secretary for the Colonies) were present. Sir John Anderson, of the Colonial Office, was present as **Secretary to the Conference**. In the 1903 ed. there appeared a full summary of Mr. Chamberlain's opening speech, and the text of the official summary of resolutions passed by, and the results of, the Conference. We give below such of these as are of current interest or importance.

Mr. Chamberlain, in his opening speech, said they all had the same paramount object at heart—namely, "if we possibly can, to draw closer the bonds which unite us, and to confirm and establish that Imperial unity upon which the security, and, I think I may add, the very existence of the Empire depends." As to the political relations, H.M. Government, while they would welcome any approach which might be made to a more definite and a closer union, felt that it was not for them to press this upon the Colonies. The demand, if it came and when it came, must come from the Colonies. If it came it would be enthusiastically received in this country. He proceeded: "Gentlemen, we do want your aid. We do require your assistance in the administration of the vast Empire which is yours as well as ours. The weary Titan staggers under the too-vast orb of its fate. We have borne the burden for many years. We think it is time that our children should assist us to support it, and whenever you make the request to us, be very sure that we shall hasten gladly to call you to our Councils. If you are prepared at any time to take any share, any proportionate share, in the burdens of the Empire, we are prepared to meet you with any proposal for giving to you a corresponding voice in the policy of the Empire."

The Conference resolved: "That it would be to the advantage of the Empire if Conferences were held, as far as practicable, at intervals not exceeding four years, at which

questions of common interest affecting the relations of the mother country and His Majesty's Dominions over the seas could be discussed and considered as between the Secretary of State for the Colonies and the Prime Ministers of the self-governing Colonies. The Secretary of State for the Colonies is requested to arrange for such Conferences after communication with the Prime Ministers of the respective Colonies. In case of any emergency arising upon which a special Conference may have been deemed necessary, the next ordinary Conference to be held not sooner than three years thereafter."

As to **Imperial Defence**, Mr. Chamberlain submitted a paper showing that the ordinary military and naval expenditure of the United Kingdom—not including the extraordinary war expenses—represented an expenditure per head of the population of the United Kingdom of 29s. 3d. per annum; in Canada the same expenditure worked out at 2s. per head; in New South Wales at 3s. 5d. per head; in Victoria 3s. 3d.; in New Zealand 3s. 4d.; and in the Cape and Natal between 2s. and 3s. That, he thought, was not a fair distribution of the burdens of the Empire, and no one would believe that the United Kingdom could for all time make this inordinate sacrifice. It was inconsistent with the present position of the Colonies and with their dignity as nations that they should leave the mother country to bear the whole, or almost the whole, of the expense.

As to **Commercial Relations**, papers as to the trade between the Colonies and the mother country, and the trade between the United Kingdom and foreign countries, were presented, which showed (1) that the Empire might be self-sustaining; (2) that the Empire at the present time, and especially the United Kingdom, derived the greater part of its necessities from foreign countries, and exported the largest part of its surplus produce also to foreign countries. This trade might be the trade, the inter-imperial trade of the Empire. H.M. Government desired to establish the principle of free trade within the Empire, while recognising the exigencies of all new countries; but they were aware, unfortunately, that up to the present no proposal so far-reaching had come to them from any of the Colonies. On the question of a **preferential tariff for British goods**, he examined closely the result of the action taken by Canada in this direction, and demonstrated that all it had done had been to check the decline in the importation of British goods into Canada, which had been going on owing to the tariff on manufactured goods. He said: "I think the very valuable experience, somewhat disappointing and discouraging, as I have already pointed out, but the very valuable experience which we have derived from the history of the Canadian tariff, shows that while we may most readily and most gratefully accept from you any preference which you may be willing voluntarily to accord to us, we cannot bargain with you for it; we cannot pay for it unless you go much further and unable us to enter your home market on terms of greater equality. . . . So long as a preferential tariff, even a munificent preference, is still sufficiently protective to exclude us altogether, or nearly so, from your markets, it is no satisfaction to us that you have imposed even greater disability upon the same goods if they come from foreign markets, especially if the articles in

which the foreigners are interested come in under more favourable conditions."

The Conference resolved:

"1. That this Conference recognises that the principle of preferential trade between the United Kingdom and H.M. Dominions beyond the seas would stimulate and facilitate mutual commercial intercourse, and would by promoting the development of the resources and industries of the several parts, strengthen the Empire.

"2. That this Conference recognises that, in the present circumstances of the Colonies, it is not practicable to adopt a general system of a Free Trade as between the mother country and the British dominions beyond the seas.

"3. That with a view, however, to promoting the increase of trade within the Empire, it is desirable that those Colonies which have not already adopted such a policy should, as far as their circumstances permit, give substantial preferential treatment to the products and manufactures of the United Kingdom.

"4. That the Prime Ministers of the Colonies respectfully urge on H.M. Government the expediency of granting in the United Kingdom preferential treatment to the products and manufactures of the Colonies, either by exemption from or reduction of duties now or hereafter imposed.

"5. That the Prime Ministers present at the Conference undertake to submit to their respective Governments at the earliest opportunity the principle of the resolution, and to request them to take such measures as may be necessary to give effect to it."

The representatives of the Colonies are prepared to recommend to the respective Parliaments preferential treatment of British goods on the following lines:—

**Canada.**—The existing preference of 33½ per cent., and an additional preference on lists of selected articles—(a) by further reducing the duties in favour of the United Kingdom; (b) by raising the duties against foreign imports; (c) by imposing duties on certain foreign imports now on the free list.

**Australia.**—Preferential treatment not yet defined as to nature or extent. (See *Australia*, p. 96, ed. 1904.)

**New Zealand.**—A general preference of 10 per cent. all-round reduction of the present duty on British manufactured goods, or an equivalent in respect of lists of selected articles on the lines proposed by Canada—namely (a) by further reducing the duties in favour of the United Kingdom; (b) by raising the duties against foreign powers; (c) by imposing duties on certain foreign imports now on the free list. (See *New Zealand*, p. 97, ed. 1904.)

**The Cape and Natal.**—A preference of 25 per cent. or its equivalent on dutiable goods other than specially-rated articles to be given by increasing the duties on foreign imports. (See *South African Customs Convention*, p. 70, ed. 1904.)

The Canadian representatives claimed that, in consideration of the preference given by them to the products of the mother country, Canadian food products should be exempted in the United Kingdom from the duties imposed by the 1902 Act; but Mr. Chamberlain, on behalf of the Imperial Government, was unable to agree to this. He did not think the material results to the trade of the United Kingdom were as great as the Canadian Ministers claimed, and the change proposed would be

an important departure from the established fiscal policy of the United Kingdom. If the Canadian proposals could be entertained at all, as to which he would not commit himself, it would be necessary for Canada to offer some material tariff concessions beyond those which she had already voluntarily given.

**Combes, Emile**, French statesman; b. at Roquecourbe, Department of Tarn, Sept. 6th, 1835. He was ed. at a Catholic seminary, and studied medicine, but also philosophy and history, and joined to the degree of M.D. that of Doctor of Letters. He published a book on the "Psychology of St. Thomas Aquinas," and became a contributor to the *Revue Contemporaine*. Rarely returning to his birthplace, he fixed himself at Pons, in the Charente, and turning his attention to public affairs, he filled many important posts, from that of mayor and county councillor upwards. In '85 he was elected Senator by his department. Whilst Vice-President of the Senate he became in '95 Minister of Public Instruction. He took a foremost part in the various measures which have reorganised primary and secondary education, and became recognised as a specialist in educational matters. Proposed by his predecessor, M. Waldeck-Rousseau himself, he succeeded him in June 1902 as Président du Conseil des Ministres, under M. Loubet. One of his first and most important duties was the application of the new Associations Act, restricting the clerical influence on education, and in his fulfilment of this task opponents have reproached him with needless rigour. He was the reporter of the Act when it came before the Senate. On becoming Prime Minister he declared his intention to apply the Act with resolute thoroughness, to reduce the period of military service to two years, and to establish a general income tax. See FRANCE.

**Commerce, Association of Chambers of, of the United Kingdom.** This Association was formed in 1860, and incorporated in '75, for the purpose of discussing and considering questions concerning trade, commerce, manufactures, and shipping; and for the collection and dissemination of information from time to time on matters affecting these subjects and the general commercial interests of the country. The Association is in direct communication with various Government departments, and has been instrumental in passing several Acts of Parliament. It holds an annual meeting early in the year in London, and an autumnal meeting in the provinces, at both of which resolutions suggested by the various local chambers of commerce are discussed, with a view to action being taken thereon. At these meetings the President of the Board of Trade and a representative of the Foreign Office usually attend, in order to ascertain the views of the commercial community on important mercantile topics. The membership of the Association consists not of individuals, but of chambers of commerce, 103 of which are members and send delegates to the meetings of the Association. **President**, Sir William H. Holland, M.P.; **Secretary**, E. W. Fithian. **Offices**, Parliament Mansions, Victoria Street, Westminster, S.W.

**Commercial Travellers' Association** (United Kingdom) was established in 1883, and has branches throughout the kingdom. In connection with it is the **United Kingdom Commercial Travellers' Benefit Society** (**Secretary**, H. G. King. **Offices**, 104, High Holborn, W.C.).

The Association is managed by a Central Board, and holds an annual Conference. Monthly organ, *On the Road*. **Hon. General Secretary**, Fred Coysh, 42, Weston Park, Crouch End, London, N.

**Commissionaires, Corps of.** The members of this institution, which was founded in 1859 by the late Capt. Sir E. Walter, K.C.B., are retired soldiers and sailors of His Majesty's regular forces. At first the Corps was composed of wounded men who had served in the Crimea and the Indian mutiny; but very shortly the demand for the services of Commissionaires led to an increase in the number, which has been steadily maintained, and now exceeds 2800. There are divisions in Belfast, Birmingham, Bristol, Edinburgh, Glasgow, Leeds, Liverpool, Manchester, Newcastle-on-Tyne, Nottingham, and Cardiff, all being subject to the same discipline and regulations. The men are employed in every capacity where high qualifications are required, and thus may be engaged for permanent or temporary service. **Office**, 419, Strand, W.C.

**Commons and Footpaths Preservation Society.** This Society was formed in 1865 for the preservation and protection of common land, roadside waste, village greens, footpaths, bridle-paths, and other rights-of-way by land and water, and open spaces generally throughout the country. The society has a number of branches in England and Wales, and a large number of local authorities are affiliated to it. The minimum subscription is 5s. per annum, while a 10s. 6d. subscription entitles a member to legal advice gratis. In '99 the **National Footpath Preservation Society** was amalgamated with the Commons Preservation Society. See also SCOTCH RIGHTS OF WAY. **Secretary**, Mr. Lawrence W. Chubb. **Offices**, 25, Victoria Street, Westminster, S.W.

## CONGO FREE STATE.

The Congo Free State was constituted and defined by the general Act of the International Congo Conference of Berlin, '85, and entered into treaties with all the great Powers, by which its status as a sovereign power, under Leopold II., King of Belgium, was recognised and its boundaries were settled. It was declared perpetually neutral, and freedom of trade was established in the basin of the Congo, while rules were laid down for the protection of the natives and the suppression of the slave trade. By a Convention made in '90, Belgium, to which King Leopold had bequeathed all his sovereign rights in the State, was given the right of annexing the State after a period of ten years. This Convention expired on June 3rd, 1901, and the Belgian Government, after considerable discussion, carried a bill suspending the payment of interest or capital in respect of the loans advanced by Belgium to the Congo Free State, with a view to their being wiped out eventually by the annexation of the State to Belgium. The Bill reaffirmed Belgium's right of option to annex the State, the understanding being that the King should choose the moment for annexation, his Majesty's will securing the State to Belgium in case of his death. The central Government is at Brussels, and consists of King Leopold, and three departmental chiefs, for Foreign Affairs, Finance, and the Interior, under a Secretary of State. At Boma there is a Governor-General, with a local government; and European Commissioners, assisted by civil

and military officials, govern the fourteen administrative districts. Among the chief exports are rubber, ivory, nuts, palm oil. The bulk of the trade is with Belgium. Gold, copper, and other metals have been discovered. Districts are suitable for growing sugar, cotton, coffee, etc. The army consists of about 13,450 natives commanded by European officers. The State has 7 steamboats on the Lower Congo and 30 on the Upper Congo, besides a small flotilla of sailing boats. A railway some 250 miles long connects Matadi and Stanley Pool. As to other railway projects, including the Congo Free State section of the Cape to Cairo line, see **ENGINEERING (Cape to Cairo Railway)**.

The area is estimated at 900,000 sq. m., and the population at about 30,000,000. The European population in 1903 was 2483. The capital is Boma, on the Lower Congo. Revenue, 1903, £1,123,600; expenditure, £1,210,622; imports, 1903, £997,339; exports, £2,558,216; public debt, £3,160,000.

**Central Government at Brussels:** *Ministers of State*, Baron von Eetvelde and Baron Descamps.—*Secretary of State*, ———.—*Chief de Cabinet*, M. A. Baerts.—*Treasurer-General*, M. H. Pochez.—*Foreign Affairs and Justice*, Chevalier de Cuvelier: office, 20, Rue de Namur.—*Finance*, M. H. Droogmans.—*Interior*, Commander C. Liebrechts.—*Contrôle*, M. Arnold.

**Local Administration at Boma:** *Governor-General*, General Baron Wahis.—*Vice-Governors*, Major Wangermée, M. Fuchs, and Commander Costermans.—*Secretary-General*, M. Van Damme.—*Justice*, M. Gohr.—*Finances*, M. H. Delhaye.—*Force Publique*, Major Warnant.—*Administrative Service*, M. Vandenplas.—*Tra-vaux de Défense*, Commander Bernard.

**British Consul at Boma**, M. Casement.  
**Consul-General in London**, M. Houdret, 130, London Wall, E.C.

History, 1904.

The reply of the State to the charges of forced labour, slavery, and cruelty formulated in 1903 by Mr. Casement, British Consul in the Free State (referred to in the 1904 edition), appeared (Mar. 15th) in the form of a pamphlet published at Brussels. The decrease in the population of certain districts was attributed to the sleeping sickness, epidemics, and migration following on the abolition of slavery. The payment in kind of taxes was defended. As to the charges of cruelty, it was asserted that the natives had traded on the credulity of Mr. Casement in order to evade the payment of taxes. While isolated acts of cruelty were admitted, the general charges were declared to be unfounded, and the natives themselves, not Congo agents, were said to be responsible for the barbarous practices complained of. It was announced, however, that a searching and impartial inquiry into the allegations should be made, and H.M. Government expressed their satisfaction at this (April 19th) and suggested (June 6th) that a special commission should be entrusted with the inquiry. A Commission of Inquiry was afterwards appointed (July 23rd), and the Government left to the members "full and unrestricted liberty, autonomy, and initiative," in order that they might arrive at "a full and entire revelation of the truth." The official instructions were made public (Sept. 14th), and stated that formal orders had been issued to officials and agents of all grades in the Free State to give to

the Commission their unreserved aid and co-operation in fulfilling their allotted task, while unlimited power was given to the Commission to receive evidence from whatever source. The Commission arrived at Boma and proceeded towards the interior (Nov. 7th).

**Connaught and Strathearn, H.R.H. Prince Arthur William Patrick Albert, 1st Duke of (creat. 1874), Earl of Sussex, P.C., K.G., K.T., K.P., G.C.B., G.C.S.I., G.C.M.G., G.C.I.E., G.C.V.O., Field-Marshal, Inspector-General of the Forces and President of the Selection Board, Colonel of the Grenadier Guards, Colonel of the Army Service Corps, and Col-in-Chief of the 6th Dragoons, Highland Light Infantry, the Rifle Brigade, and the Royal Dublin Fusiliers, A.D.C., was b. 1850. The third son of H.M. Queen Victoria. Mar. the Princess Louise Margaret, youngest dau. of Prince Frederick Charles of Prussia ('79). There are three children: Princess Margaret Victoria Augusta Charlotte Norah, Prince Arthur Frederick Patrick Albert, K.G., and Princess Victoria Patricia Helena Elizabeth. Commanded 1st Brigade, 1st Division, in the Egyptian Expedition ('82). Has been Commander-in-Chief at Bombay, and of the Southern District in England. In April '93 he was promoted to the rank of full General, was Commander-in-chief at Aldershot '93-8, and was promoted Field-Marshal in June 1902. By the death of Prince Alfred of Saxe-Coburg in '99, he became the heir-apparent to the Duchy; but he and his heirs renounced their rights in favour of the young Duke of Albany, who succeeded in 1900. He was installed as Grand Master of Freemasons (July 17th, 1901), an office which was resigned by King Edward VII. on succeeding to the throne. He headed the special mission to Madrid in May 1902, invested the King with the Order of the Garter, and himself received the Order of the Golden Fleece. The Duke and Duchess left England on Nov. 29th to attend the Indian Coronation Durbar at Delhi on Jan. 1st, 1903, as representatives of the King and the Royal Family. H.R.H. was appointed Inspector-General of the Forces and President of the Selection Board as from May 1904, and, after the King's visit to Ireland, he left Dublin to take up his new duties. Address: Bagshot Park, Surrey; Clarence House, St. James's, S.W.**

CONSUMPTION, PREVENTION OF.

See MEDICAL SUMMARY, 1904, as to Report of Tuberculosis Commission.

Consumption kills nearly 40,000 persons every year in this country alone. The death rates per million living from this cause during the last thirty-five years are as follows, in quinquennial periods:

1866-70 . . . 2,448	1886-90 . . . 1,635
1871-75 . . . 2,218	1891-95 . . . 1,462
1876-80 . . . 2,040	1896-1900 . . 1,323
1881-85 . . . 1,830	

There is a great difference in the mortality in the two sexes. In the last five years for which statistics have been prepared—1897-1902—consumption was fatal to 1,529 out of every million males, but to only 1,114 out of every million females.

**National Association for the Prevention of Consumption and other forms of Tuberculosis.** The Association aims at the education of public opinion and the stimulation of individual initiative by means of a central bureau for

the collection and distribution of information as to modes of diffusion of tuberculosis and measures of prevention. All communications should be addressed to the Secretary, at the office, 20, Hanover Square, W.

A National Committee for the Establishment of Sanatoria for Workers suffering from Tuberculosis has been formed, with Mr. C. H. Garland as Chairman. Secretary, Mr. W. G. Bunn. Offices, 54, Gray's Inn Road, W.C.

### *Consumption Sanatoria.*

The following are some of the principal establishments in Great Britain for the open-air treatment of consumption.

**Altadore**, Kilpedder, county Wicklow, among the Wicklow Mountains, stands 750 feet above sea level in its own grounds of 630 acres. Climate bracing, subsoil gravel, rainfall below average. Accommodation for 16 patients. Terms 3 guineas. Greystones station, 5 miles. Resident Physician, Dr. J. C. Smyth.

**"Belle Vue,"** Shotley Bridge, county Durham. Accommodation for 20 patients. Resident Physician, Dr. E. W. Diver.

**Cotswold**, near Stroud, Gloucestershire. Accommodation for 38 patients. Resident Physician, Dr. F. K. Etlinger.

**Crooksbury Sanatorium**, Crooksbury Ridges, Farnham, Surrey, is situated south of the "Hog's Back," between Godalming, Farnham, and Haslemere, on one of the highest sandstone hills in Surrey, within easy railway distance of London. It is well sheltered, and has large grounds covered with pinewoods and heather. There are 22 beds. Terms 5 guineas weekly. Nearest station Farnham (3½ miles). Resident Physician, Dr. F. Rufenacht Walters.

**Dartmoor Sanatorium**, Chagford, S. Devon. Proprietor and Resident Physician, Dr. A. Scott Smith.

**Dr. Johns Sanatorium**, Alderney Manor, Parkstone, Bournemouth. Accommodation for 25 patients. Proprietor and Resident Physician, Dr. W. D. Johns.

**Dunstone Park**, near Paignton, South Devon. Accommodation for 10 patients. Resident Physician, Dr. T. Carson Fisher.

**East Anglian Sanatorium**, Nayland, Suffolk. Accommodation for 25 patients. Resident Medical Officer, Miss Ethel Stacey, L.S.A.

**Grampian**, Kingussie, N.B. Accommodation for 20 patients. Medical Director, Dr. Walter De Watteville.

**Hailey Sanatorium**, Ipsden, Wallingford. Accommodation for 50 patients. Resident Physician, Dr. Frank Fowler.

**Heatherside Sanatorium**, Surrey. A country extension of the Brompton Hospital for Consumption, opened by the Prince and Princess of Wales, June 25th, 1904. It is on the road between Chobham and Frimley, about 30 miles from London, stands on gravel and sand at 400 feet above O.D., and has accommodation for 100 patients, with grounds of 20 acres in pinewoods. Secretary, W. H. Theobald.

**Ipsden Industrial Sanatorium**. Incipient cases only accepted. Staff as at Hailey Sanatorium.

**King Edward VII. Sanatorium**, Lord's Common, near Midhurst. The foundation stone was laid by His Majesty Nov. 3rd, 1903. The Sanatorium is intended "for the classes above the very poor, but unable to meet the expense of prolonged residence in private sanatoria."

The site covers 151 acres, and the building will stand at an elevation of 500 feet. Number of beds, 100.

**Kingwood**, Peppard Common, Oxon. Accommodation for 12 patients. Resident Physician, Dr. Esther Colebrook.

**Knocksualtach Sanatorium**, Kirkmichael, Perthshire. Accommodation for 6 ladies. Resident Medical Superintendent, Dr. Mary F. Nannetti.

**London Open Air Sanatorium**, Pinewood, Nine Mile Ride, Wokingham, for the treatment of early cases of pulmonary tuberculosis among the educated middle classes, is situated in 82 acres of pine forest. Each patient has a separate bedroom facing south, with electric light. Sixty-four cases can be accommodated. Terms 3 guineas weekly. Wokingham (3½ miles) is the nearest station. Two resident medical officers and two visiting physicians. For particulars apply Secretary, London Open Air Sanatorium, 20, Hanover Square, W.

**Mendip Hills Sanatorium**, Hill Grove, Wells, Somerset. Accommodation for 22 patients. Chief Physician, Dr. C. Muthu.

**Moorcote**, Eversley, Winchfield, Hants. Accommodation for 15 patients. Resident Physician, Dr. Hayden Browne.

**Mundesley Sanatorium**, Norfolk. Accommodation for 25 patients. Resident Physician, Dr. Bardswell.

**National Sanatorium**, Bournemouth. (Patron, His Majesty the King.) For the necessitous poor suffering from consumption in the early stage. Three acres of grounds. Present accommodation for 84 patients (male and female). Patients admitted by Governor's letter and the payment of 7s. 6d. per week. This Sanatorium is supported by voluntary contributions; additional support is urgently needed, being at present in debt to the amount of over £1000 owing to the extension and improvements recently carried out. Resident Medical Officer, Dr. A. L. Bunting; Secretary, A. G. A. Major.

**Nordrach-in-Wales** (Pendyffryn Hall). Accommodation for 23 patients. Resident Physician and Proprietor, Dr. G. Morton Wilson.

**Nordrach-upon-Dee**, Banchory, N.B. Senior Physician, Dr. David Lawson.

**Nordrach-upon-Mendip**, the first Sanatorium to be established on the Mendip Hills. Stands in 65 acres of garden, meadow, and woodland, 862 feet above the sea. Accommodation for 40 patients. Rooms lighted electrically and heated with hot-water pipes. Terms 4 and 5 guineas weekly; a few rooms at 6 guineas. The Sanatorium lies in the midst of a vast track of open moorland, with sheltered valleys. Special attention to patients' exercise and diet. Nearest station Langford (G.W.R.) Address, Secretary, Nordrach, Blagdon, Bristol. Telegraphic Address, "Nordrach, Blagdon." Resident Physician and Proprietor, Rowland Thurnam, M.D.; Assistant Physician, Charles Wheeler, M.D.

**Painswick Cottage Sanatorium**, Gloucestershire. Accommodation for 12 patients. Resident Physician and Proprietor, Dr. William McCall.

**Rostrevor Sanatorium**, Pinegrove, Warrenpoint, co. Down. Grounds of about 40 acres, rising from 300 to 500 feet. X-ray and high-frequency current apparatus; far from dusty roads. Accommodation for 24 patients. Terms 3½ guineas. Howard Sinclair, M.D., L.R.C.P., Resident Physician.

**Rudgwick Sanatorium**, Sussex. Accommoda-

tion for 12 to 14 patients. **Medical Director, Dr. Annie McCall.**

**Stourfield Park Sanatorium, Pokesdown, near Bournemouth.** Accommodation for 45 patients. Resident medical officer, who, whilst he does not undertake the individual care of any case, is retained in order to carry out the treatment as advised by the various physicians who are in charge of the different patients.

**Vale of Clwyd Sanatorium, Llanbedr, Ruthin, North Wales.** Accommodation for 22 patients. **Medical Officers, Drs. Grace Calvert and Cecil Fish.**

**Whitmead Hall, near Farnham, Surrey.** Accommodation for 18 patients. **Resident Physician, Dr. J. Hurd-Wood.**

**Woodburn Sanatorium, Morningside, Edinburgh.** Accommodation for 20 patients. Two resident physicians. Apply to Mrs. Mears, L.R.C.P.I.

## CO-OPERATION.

### Distributive Societies.

The first impulse to co-operation in England was given by Robert Owen, and so vigorous was the propaganda of his followers that in 1830 there were nearly 3000 co-operative societies. Utopian economics and want of business management proved fatal to the great majority, and only 19 Scotch and 18 English societies founded in the first period of the co-operative movement still survive. Modern co-operation dates from the establishment of the **Rochdale Pioneers' Society** in 1844, on whose model all subsequent societies have based themselves. The primary object of a co-operative society is distribution, and it aims at saving for the members the shopkeeper's and, if possible, the wholesaler's profits. There is no limit to membership; any one may join. Each person joining must take up one or two £1 shares, paying always 1s. on entrance, and the remainder, if he chooses, out of his accumulating dividends. The maximum share of capital which one person can hold is £200. Goods are sold at the ordinary retail prices, and each purchaser receives checks or vouchers corresponding to the amount of purchases. Half-yearly or quarterly these are paid into the store, and the surplus of receipts over cost is divided among the members at so much per pound of purchases. This is the dividend, or "divy." Non-members may deal at the stores, and receive dividend as a rule at half the members' rate. The rate of dividend is usually between 2s. and 3s., but runs up to 3s. 6d. or 4s. Four or five per cent. interest is generally paid on capital. The store is managed by a committee elected by the members, each member having one vote. The first department of a store is usually grocery and provisions. Most stores, even the smaller ones, bake their own bread, and find it most successful. Hardware, drapery, boots and shoes, coal, tailoring, and furnishing generally constitute branches of every large store. Butchery is also a common feature, but this department is attended with more difficulty and has generally a lower rate of profit than other departments. As a general rule, credit is not given, and dividends are calculated, not on the dealings with the separate departments, but on the business of the store as a whole. In 1903 there were, according to the **Co-operative Union report**, 1481 distributive societies, with 1,987,768 members, £24,217,134 share capital,

£57,512,917 sales, and £8,993,562 profit. The distributive societies also carry on various productive departments, e.g. baking, corn-milling, bootmaking, tailoring, and dressmaking, the total output in this direction being more than £5,000,000 annually.

The **English Wholesale Society** was started in 1863, primarily for the purpose of wholesale buying. It is a federation of co-operative societies, none other being allowed to become shareholders or purchasers. Each society takes up one £5 share for every 10 members. A general committee of 16 sits at Manchester, and two branch committees of 8 at Newcastle and London. The branch committees of London and Newcastle also appoint representatives to sit on the general committee at Manchester. Quarterly meetings of delegates from the society members are held. In 1903 it had 1133 members, £2,840,620 share and loan capital, £19,333,142 sales, and £348,882 profit. It began the manufacture of boots at Leicester in 1873, and has since added soap, candles, biscuits, sweets, preserves, pickles, lard, woollens, clothing, flannels, tobacco, hosiery, brushes, starch, printing, and corn-milling to the various industries carried on in its large factories. The capital employed by this society in production is £1,208,920, its output of manufactures £3,182,614, profit thereon £92,756, and the number of persons employed 11,198. It owns 6 vessels of 4879 tons, has numerous creameries in Ireland, has purchasing agencies in Canada, United States, Denmark, Germany, Sweden, Greece, and Australia, and has its own tea plantations in Ceylon. It also does a banking business with societies exceeding £44,000,000.

The **Scottish Wholesale Society** was started in 1869 on lines similar to the English Society, but admitting its employees to collective membership on certain terms. In 1903 it had 278 society members and 383 shareholders amongst the employees; its share and loan capital was £1,979,728, its sales £6,395,487, and profits £254,070. It manufactures boots and shoes, tweeds, blankets, drapery, shirts, furniture, preserves, sweets, soap, and tobacco, besides engaging in printing and corn-milling. In 1903 its productive capital was £643,315, output of manufactures £1,627,624, profit thereon £90,697, and productive employees 4713. The two wholesale societies act as agents for each other. Their business is done at nearly cost price, plus a commission to cover expenses. There are also 8 **Corn Mills** owned by federations of retail societies and consumers, which in 1903 had a capital of £392,258, sales £1,373,155, and profit £78,214; and 19 baking societies (also consumers' federations), with a total capital of £371,126, sales £557,849, and profits £75,735.

### Productive Societies.

Apart from the production carried on by the distributive societies, there is a great activity on the part of a large number of societies organised specially to carry on a variety of manufactures. The old form of such societies was the "self-governing workshop," as instituted by the Christian Socialists of 1852, where the capital and management were provided by the workpeople, to whom, therefore, went the profits. Despite a great amount of help from trade unions and co-operative stores the movement was a failure, and in 1883 only 1 "productive societies" remained. In 1884 the

**Labour Association** (22, Red Lion Square, Holborn, W.C.)—re-named in 1902 the **Labour Copartnership Association**—was started by E. Vansittart Neale, E. O. Greening, G. J. Holyoake, J. M. Ludlow, Thomas Blandford, and others to advocate the establishment of a new class of society, the labour copartnership. Its essential idea was that, in virtue of their position as workers, the workers should receive a share in the profit and should be allotted a share in the management. The actual division of profit and management between capital and labour is left to each society, and a great variety actually exists, a share in profit being sometimes also given to customers.

The **Co-operative Productive Federation** is a business organisation to assist such societies. The Federation includes 59 societies. The **Co-operative Union Report** shows, in 1903, 117 productive societies (excluding wholesale, corn-milling, and baking societies) with £677,424 capital (in shares and loans), £1,142,137 sales, and £54,310 profit. About 40 per cent. of the capital is found by co-operative societies and trade unions, and 60 per cent. by employees. Probably the bulk of their trade is done with co-operative stores. Notable copartnership societies are Hebden Bridge Fustian, Leicester Hosiery, Burnley Self-Help, Leicester Equity Boot and Shoe, W. Thomson & Sons, Kettering Clothing, Kettering Boot, Newcastle Household Furnishing. Also 239 distributive societies give their employees a share of their profits. The copartnership principle is also adopted by some private firms and companies, notably the South Metropolitan Gas Company.

The **Co-operative Union** (General Secretary, J. C. Gray; offices, Long Millgate, Manchester) is the organising and propagandist centre of the movement, and was formed 1869. The governing body is the **Central Board**, which meets at Congress time. Its members are appointed by the sectional boards of the seven districts into which the United Kingdom is divided. The work of the board throughout the year is conducted by committees—education, production, propaganda, defence, parliamentary, exhibitions, international, and joint arbitration committee with trade unionists, being those for 1903. It devotes special efforts to inducing societies to devote a part of their profits to educational purposes, 858 societies voting £78,499 in 1903. It also organises the annual Congress. The 1904 Congress was held at Stratford (London), and was attended by 1376 delegates representing Co-operative Societies in all parts of the United Kingdom. There were in 1903, 1206 societies members of the Union, contributing an income of £8896.

The **Women's Co-operative Guild** was started in 1883, to educate women in co-operative principles, and increase their power and activity in the movement. It has 18,556 members in 359 branches. Its main lines of work have recently been in the spread of co-operation among the poor and on the housing question; it, too, holds an annual congress.

**Co-operation in Agriculture.**—Seventy-three distributive (including wholesale) societies in 1903 farmed 7,196 acres, with a capital of £147,511, and made a net aggregate profit of £3155 and a loss of £4225. Two farming societies with a capital of £4835 farmed 475 acres and made a profit of £85. In the article on AGRICULTURE, pp. 10-11, full particulars are

given as to the operations of the **Agricultural Organisation Society** and the **Irish Agricultural Organisation Society, Ltd.**; and in the article on **RANKING**, p. 40, details will be found as to **Agricultural Credit Societies** and **Co-operative Credit Banks**.

The **Co-operative Insurance Society** does a large business amongst societies in insurance against fire risks, the sums assured in 1903 being £19,326,737; it had also £200,483 fidelity assurance policies and £180,535 life. It makes a speciality of small policies for weekly payments. See also **INSURANCE**.

**Press.**—The *Co-operative News*, issued by the Co-operative Newspaper Society, Manchester; the *Wheatshaf*, issued by the English Wholesale Society, Manchester; *Labour Copartnership*, issued by the Labour Copartnership Association, London, and many local organs. **Consult:** Annual Congress Reports published by the Co-operative Union, and the Board of Trade Reports on Workmen's Co-operative Societies; also the Annual Returns published by the Chief Registrar of Friendly Societies.

#### Co-operation on the Continent.

The **International Co-operative Alliance** now includes 517 societies and 110 individual members in Great Britain, Germany, France, Holland, Belgium, Denmark, Austria, Russia, Italy, Sweden, Spain, Switzerland, Servia, Australia, the United States, Bulgaria, Cape Colony, Greece, Hungary, India, Roumania, and the West Indies. Its object is to further the growth of co-operation, and it has held six congresses: in London 1895, Paris '96, Delft '97, Paris 1900, Manchester 1902, and Budapest 1904. Co-operative distribution in rural districts, the admissibility or not of State aid to Co-operation, centralisation of co-operative banking by means of a central bank, and the backward condition of co-operation in certain eastern and northern countries of Europe, with the causes and proposed remedies, were the subjects of discussion at Budapest. A series of reports were also presented showing the progress of the movement in 25 countries. In **France** productive societies form the most vigorous part of the movement, and devote themselves chiefly to building, house-painting, and furniture-making. They get most of their custom from the State and municipalities, their contracts for the Paris Exhibition of 1900 amounting to several millions of francs. They received a State subsidy of 200,000 francs in 1904. The *Familistère* at Guise, founded by M. Godin as "a co-operative association of labour, capital, and ability," and the *Maison Leclaire* at Paris, are among the best known of French institutions. There are also numerous baking societies, and 1038 co-operative credit associations, mostly agricultural, the larger proportion being of the Raiffeisen type. In **Germany** there were in 1903 14,280 credit societies, 1994 distributive societies, 550 building societies, 5907 agricultural societies, 824 artisan societies, and 506 other forms of co-operative societies. The chief propagandist body is the General Union of German Trade and Industrial Self Help Co-operative Societies, which carries on the tradition of Schulze-Delitzsch, but it has recently expelled the distributive societies as being inimical to the interests of the middle classes. These

distributive societies have since established a new Co-operative Union, which includes 685 societies. The first Congress of the new Union was held at Dresden in May 1903. In Belgium the People's Banks have grown from 311 in '94 to 1706 in 1901. In the towns the co-operative societies form part of the Socialist movement, there being about 250 such, with collective sales amounting to 40,000,000 fr., distributive and productive, the "Vooruit" Baking Society being well known; in the rural districts the clergy govern the societies. In Denmark practically the whole agriculture of the country is organised on a co-operative basis in dairies, bacon-curing factories, egg export societies, etc. In Switzerland and Holland the Co-operative Societies have established "Unions" on the same lines as the British Co-operative Union for the purpose of better organisation and propaganda. In connection with these Unions Annual Congresses are held, at which representatives from other countries are present.

### COPYRIGHT, BRITISH AND FOREIGN.

Before an English author has given his work to the world by publishing it, he can restrain any one else who may have had access to it from doing so without his authority by an action at common law; and just as, before he publishes his work, he is the owner of that work, and can restrain any one else from using it without invoking the statute, so the very act of publication invests the author with statutory copyright without further formality on his part. But if he wishes to sue any one for infringing his right, he must first register his name as the proprietor of it at Stationers' Hall, and this registration need not precede an alleged infringement.

**British Copyright**, obtained by first publication in the United Kingdom, extends to every part of the British Dominions, now, or hereafter to be acquired, subject, in details, to the local laws of the territory in question.

**British copyright in books** endures from the date of first publication for the life of the author and seven years after his death, or for a period of forty-two years, whichever period shall be the longer. Copyright in posthumous works dates from publication. "Publication" is best defined as the making of a thing public by offering it for sale. Of every book published, and of every subsequent edition, which is not merely a reprint, a complete copy with everything appertaining thereto must be delivered within a month to the British Museum, and within twelve months to the following libraries on demand: Bodleian, Cambridge, Advocates' (Edinburgh), and Trinity College (Dublin). Labels, charts, plans without literary additions, perforated cards and contrivances in cardboard, cannot be copyrighted as books, but may be protected under Patents, Engravings, or Trade Marks Acts.

**Playright** endures from the date of the first representation for forty-two years, or for life and seven years thereafter. To obtain copyright in a drama it must be first printed, and to obtain playright it must be first performed, within the United Kingdom. An English dramatist who produces his play for the first time in the United States may protect his work here either by giving a single copyright performance here or else by invoking

the common law against infringers of his unpublished work.

**As to music**, the period of protection is the same as for books. A sheet of music in which the performing right is reserved must bear a notice to that effect. When the copyright and performing right are in different hands, the owner of the performing right can oblige the owner of the copyright to print the reservation notice on each sheet. Any original adaptation or arrangement of non-copyright music enjoys protection in the same manner as original compositions.

**The right in lectures** endures for twenty-eight years from the date of first publication. The delivery of a lecture to the public at large without restriction is taken as publication, and invests the author with the statutory right. The reporter of a public lecture delivered orally has copyright in his printed report as against the lecturer's right (to print) if the lecturer has no manuscript.

**Copyright in paintings, drawings, and photographs** endures for the life of the author and seven years after his death. To become invested with copyright the maker must be domiciled within the British Dominions, but the work may be executed anywhere. In order to sue he must register the work at Stationers' Hall, which registration must in these cases precede an infringement alleged. The author of a photograph is the "artist" taking it; his life furnishes the term of copyright, and by the assignment for valuable consideration implied in his salary, the firm employing him becomes the proprietor. On the same principle the purchaser of a photograph, *i.e.* the person commissioning it, becomes the owner of copyright in it; and until the case of *Boucas v. Cook*, decided in 1903, it was always held that, without express agreement in writing from the author (*i.e.* the photographer or the firm employing him), he had no right to reproduce it. The law now stands that, in the absence of express agreement to the contrary, any one who pays for the taking of a photograph may reproduce it at will. The negative, however, is the property of the photographer. If he reproduces the photograph without the consent of the sitter he may be sued for breach of contract. Of photographs taken otherwise than for valuable consideration, that is, free to the sitter, the proprietors, his employers, are the owners of the copyright, and can reproduce it at will. **Copyright in prints** endures for twenty-eight years, and action for infringement must be taken within six months of the alleged offence. The print must be designed and executed in Great Britain (the nationality of the author is disregarded), and publication alone in this country is not sufficient. The name of the proprietor and the date of first publication must appear on each print. The exhibition of a piece of sculpture, whether private or not, is held to be publication. The right endures for fourteen years from the date of first publication, with an extension for another fourteen years if the sculptor be still living at the termination of the first period. Registration is not necessary.

**Foreign.**—By the International Act of 1886 a literary or artistic work first produced in any part of the British Possessions obtains the benefit of the English copyright laws in the same manner as if it had been first produced in the United Kingdom, subject to the copyright

laws, if any, of the particular colony. It follows that a work so produced obtains copyright in those foreign countries which are members of the Berne Convention, and such foreign countries enjoy the reciprocal right in the British Colonies. The following **British Colonies have local copyright laws:** India, Ceylon, Canada, Australia, New Zealand, the Cape, Natal, Hong Kong, Tasmania, Newfoundland. Of these Canada is the only one of importance as regards Imperial copyright.

**Canadian copyright** endures for twenty-eight years, with power of renewal for a term of fourteen years. A British author wishing to protect himself in Canada must register his work there before or simultaneously with its publication elsewhere, and print and publish there within a month of its publication elsewhere, or otherwise cheap reprints of his books may be imported into Canada (under the Foreign Reprints Act). In no case does the sole and exclusive liberty of printing and publishing a work in Canada subsist after the expiration of copyright in the work elsewhere.

**Copyright in the United States of America** endures for twenty-eight years from first publication, with an extension for a term of fourteen years on re-registration of the right within six months of the termination of the first period, and compliance in other respects with the terms of the Act. Copyright of a British book is secured in the United States by its simultaneous publication in both countries; but the United States edition must be manufactured in the United States and of American materials, excepting dramatic and musical pieces, and maps and charts, which may be manufactured in England. On or before the day of first publication of a work in the United States, the author must deliver to the Librarian of Congress at Washington a printed copy of the title of the work to be protected and two copies of the work itself (and one copy of every subsequent edition wherein any substantial change shall have been made), manufactured in the United States, excepting of a dramatic or musical piece, or a map or chart, which may be made in England.

By the **Berne Convention**, made in 1887, supplemented by the Act of Paris, 1896, the following countries bound themselves together to secure to an author belonging to any one of them the same protection and rights in all the others as the laws of those countries afforded, or might thereafter afford, to natives:—Great Britain and the British Dominions, Germany, Luxembourg, Austria-Hungary, Belgium, Denmark, France, Hayti, Italy, Spain, Sweden, Switzerland, Tunis. An author enjoying copyright in any of the countries belonging to the Union (and his representatives) has the exclusive liberty of authorising the translation of his work during the entire period of his right over the original work; but the exclusive right of translation shall cease to exist if the author shall not have availed himself of it during a period of ten years from the first publication of the original work by causing to be published in one of the countries of the Union a translation in the language for which protection is claimed. Performing right may be authorised during the same period and under the same conditions.

The **standard works on the Law of Copyright** are by Macgillivray (Murray), Scrutton (Clowes), and Copinger (Stevens).

## COSTA RICA.

Costa Rica is the southernmost republic of Central America, lying between Nicaragua on the north and Colombia on the south. Capital, **San José**, with a population of 25,000. It is governed by a President elected for four years and a Chamber of 32 representatives, elected in the proportion of one member for every 8000 inhabitants, for four years by the "respectable" inhabitants, half of the deputies retiring every two years. Constitution promulgated in 1870, but frequently interrupted by pronunciamientos, and practically suspended from '70 to '82. Army 600 strong, with militia of 12,000, and 35,000 on a war footing. Education compulsory and free. There were 327 primary schools with 21,913 scholars in '97. All religions tolerated, but the Roman Catholic is the State religion. Chief exports coffee and bananas. Valuable metals exist in various parts of the country, and the gold mines are being steadily developed. A state railway runs between San José and San Domingo de San Alatio, 46 miles.

Area, 23,000 sq. m.; pop., 1903, 322,618. Revenue, 1902, £510,590; 1903, £468,109; expenditure, 1902, £563,317; 1903, £418,145. Foreign debt, reduced in 1885 to £2,000,000. The bondholders met in January 1904, and resolved, in consequence of the continued suspension by the Government of the payment of interest, to resume their full rights under the arrangement of 1885, by which the bonds bear interest at 5 per cent., instead of the 3 per cent. and 2½ per cent. agreed upon in '97. Internal debt, £814,538. Imports, 1902, £907,160; 1903, £1,005,068; exports, 1902, £1,163,350; 1903, £1,504,450.

President, Ascensión Esquivel, elected May 8th, 1902.

**Ministry: Foreign Affairs**, Leonidas Pacheco. — **Commerce and Finance**, J. Jimenez. — **War and Marine**, Tobias Zúñiga. — **Police and Home Secretary**, Manuel de J. Jimenez.

Minister to France, Germany, Spain, and Belgium, Señor M. M. Peralta.

Consul-General in London (acting), Roman Lopez, 58, Lombard Street, E.C.

British Minister, H. W. Harrison, C.M.G. (Chargé d'Affaires), (resides at Guatemala).

British Consul in San José, F. N. Cox.

**County Councils Association. Secretary**, G. M. Harris. Office, 9, Parliament Mansions, Westminster, S.W.

**Courtney, Rt. Hon. Leonard H., P.C.**, son of Mr. J. S. Courtney, Penzance, was b. July 6th, 1832, and graduated ('55) at St. John's College, Camb., as 2nd Wrangler (bracketed 1st Smith's Prizeman). He was elected Hon. Fellow of St. John's '89; called to the bar, Lincoln's Inn, '88; Benchers '89; Professor of Political Economy at University College, London, '72-5. Successively Under-Secretary of State for the Home Department ('80), for the Colonies ('81-2), and Financial Secretary to the Treasury ('82-4). From '86 till '92 he was Chairman of Committees in the House of Commons, in which capacity he achieved a reputation for ability and firmness; and in '89 he was made a P.C. He was formerly leader-writer for the *Times*. He married in '83 Miss Catherine Potter, a lady well known for her exertions in behalf of the better housing of the poor in the East End of London. He was appointed Chairman of the

London Unification Commission in '93, and proposed as a successor to Viscount Peel in the Speakership in '95, but declined. He strongly condemned the Jameson raid, and advocated the evacuation of Egypt in '96. In '98 the University of Cambridge conferred upon Mr. Courtney the hon. degree of LL.D., when the public orator alluded to him as the "Cato of the House of Commons." In '99 he opposed the Government on their policy as to the decrease of the provision for the reduction of the National Debt, the Clerical Tithe Bill, and regarding the Transvaal; and in 1900 he retired from Parliament, having sat as M.P. for Liskeard '76-85, and for the Bodmin Division from '85 till 1900; Chairman Royal Commission on Civil Service Superannuation 1902-3. Address: 15, Cheyne Walk, S.W. Reform and Athenæum.

**Craigie, Mrs. (John Oliver Hobbes)** is the eldest daughter of Mr. J. Morgan Richards, and was b. at Boston, U.S.A., Nov. 3rd, 1867. Her literary career began in '91 with the publication of "Some Emotions and a Moral." "The Sinner's Comedy" followed in '92, "A Study in Temptations," in '93; and amongst her subsequent works have been "The Gods, Some Mortals, and Lord Wickenham," in '95, "The School for Saints," in '97, "Love and the Soul Hunters" in 1902; and in '98 a successful play, "The Ambassador," and a one-act drama, "A Repentance." She was part author of "The Bishop's Move," played at the Garrick, in 1902; and in 1904 "The Flute of Pan" was produced at the Gaiety Theatre, Manchester. She is a contributor to the *Times*, *Fortnightly Review*, *Anglo-Saxon Review*, *Encyclopædia Britannica*, *North American Review*, etc. She was received into the Roman Catholic Church in '92. Address: 56, Lancaster Gate, W.; Steephill Castle, Ventnor; St. Lawrence Lodge, St. Lawrence; The Albany, Piccadilly.

**Crane, Walter**, poet and painter, was b. 1845, and first exhibited at the Royal Academy '62. He was a member of the old Dudley Gallery Committee '66-81, elected a member of the Institute of Painters in Water Colours in '82, resigned later, and now belongs to the Old Society of Painters in Water Colours. He was the first President of the Arts and Crafts Exhibition Society. He has published "Walter Crane's Picture Books," and many poems illustrated by himself, the principal one being "The Sirens Three." An interesting exhibition of his work was held in London during '91, which has since made a tour in the United States, Germany, Austria, Copenhagen, Norway, Sweden, and Switzerland; and a second and larger collection was by invitation of the Hungarian Government exhibited in Budapest in 1900, and at Turin in 1902, receiving a Special Diploma of Honour at the latter place, and the Order of the Royal Crown of Italy (commendatore). He was chairman of the committee for organising the Exhibition of British Arts and Crafts in the Art section of the St. Louis Exhibition, 1904, and designed and painted the frieze for the galleries of the British Art section there. Among his principal pictures are "The Renaissance of Venus," "The Bridge of Life," "Neptune's Horses," "Freedom," "The Chariots of the Hours," "The World's Conquerors" ('98), and "The Fountain of Youth" (1902). In '92 he published "The Claims of Decorative Art," in '96 "Decorative Illustration of Books," in '98

"The Basis of Design," and in 1900 "Line and Form." He was Art Director to the Manchester Municipal School of Art '93-6, Principal of the Royal College of Art '98-9, and is now a member of the Advisory Council on Art to the Board of Education. He has illustrated an edition of Spenser's "Faerie Queene" and "The Shepherd's Calendar," and Shakespeare's "Two Gentlemen of Verona," "The Tempest," and "The Merry Wives of Windsor." He was one of the European artists engaged on the International Bible of Amsterdam, having designed five full-page subjects, as well as the whole of the ornamental headings and text ornaments for that work. The Albert gold medal of the Society of Arts was awarded to him in 1904 for his work in connection with art and industry.

**Cremation.** The disposal of the human body after death by the process of cremation, which rapidly resolves the body into its component elements, in an absolutely innocuous manner, is now largely practised throughout the civilised world, where formerly burial in the earth only was carried out. This modern movement in its favour commenced about twenty-five years ago. Crematoria have been established in this country at Woking, Golder's Green, Hendon, Manchester, Glasgow, Liverpool, Hull, Birmingham, and Darlington. Others are in course of erection or in contemplation. Cremation societies have been instituted in every European country, and many of the States of America possess them also, and cremation in these States has become a regular practice. The cremation of an adult by either of the two processes employed is completed in about an hour and a half, and the ashes, which are perfectly white, weigh about 4 lb. The cost of reduction, were it to become common, would be less than 30s.; but at present it is more than treble this sum, owing to the necessity of heating the crematory every time for each cremation. There were 475 cremations in England in 1903, and 3673 in America, in 1902. By the Cremation Act, 1902, burial authorities are enabled to establish crematoria, and regulations were ordered to be made by the Home Secretary as to the maintenance and inspection of all crematoria. These regulations were made in 1903, and provide that no cremation of human remains shall take place except in a crematorium of the opening of which notice has been given to the Home Secretary; that it shall be illegal to cremate the remains of a person who is known to have left a direction to the contrary: that no cremation shall be allowed until after due registration of the death of the deceased, or a coroner's certificate as to the cause of death, etc.; and that no cremation shall take place unless on application signed and a statutory declaration as to the particulars made by an executor or the nearest surviving relative, or, on satisfactory grounds, some other person. Further, in all cases a certificate by the deceased's medical man and by a medical referee, or a post-mortem certificate, or a coroner's certificate, is required. **Hon. Secretary** of Cremation Society of England, J. C. Swinburne Hanham, 324, Regent Street, London, W.

#### CRETE.

Crete is an island in the Mediterranean, lying to the south of the Ægean Sea and Archipelago. Area about 3300 sq. m.; pop.

303,543. Chief cities, Candia (pop. 22,331); Canea (pop. 24,537); and Retimo (pop. 9311). There are about 33,000 Moslems and 269,000 Christians. The island was conquered by the Turks in 1669, but never really submitted, and continually rose in insurrection against them. The Powers finally intervened at the end of '95. The promised reforms, however, were not carried out, and early in '97 a Greek force landed in the island. The Powers, however, disapproved of this action, and ultimately the Greek troops were withdrawn, the Powers undertaking to set up autonomy under the nominal suzerainty of the Sultan, and to secure the withdrawal of the Turkish forces also. The evacuation was completed in Nov. '98, and on the 26th Prince George (second son of the King of Greece, b. June 24th, '69) was appointed as **High Commissioner** for a term of three years (renewed on Dec. 15th, 1901). The Prince arrived at Canea and assumed office (Dec. 21st, '98). A Constitution was then prepared, and adopted in April '99, under which an Assembly of 74 deputies, 4 of whom are Mahometans, was elected for two years. The inhabitants elect 64 and the Prince nominates 10. The executive power rests in the High Commissioner and a Council of three members, exclusive of the Prince's Financial Adviser. Since '90 systematic exploration has led to archaeological discoveries of surpassing interest, and the excavations at **Knossos** and **Phæstos** have revealed a wonderful picture of Mycenæan civilisation. The chief products are olive oil, fruits, tobacco, cotton, and silk, and trade is carried on chiefly with Greece and Turkey. **Revenue and Expenditure** about £200,000. **Imports**, 1903, £580,174, consisting chiefly of food-stuffs and textiles; **exports**, £439,167, largely olives and olive oil. The Government signed a Convention (Aug. 6th, 1901), by which the **Ottoman Public Debt** renounced all rights and privileges in the island in return for 1,500,000 fr. and the concession of the salt monopoly for twenty years.

During 1904 the High Commissioner's autocratic administration gave rise to great and increasing discontent, and in the western district there was even a revolt. Dr. Jannaris was imprisoned, a deputation of Cretan notables who presented a petition of grievances was insulted by the Prince, and numerous complaints were made of his intimidation of Parliament, the practical suppression of the rights of the press, and the substitution of Greeks from Athens for Cretans in all influential posts. Towards the end of July the Prince notified his intention of going personally to the Powers to ask them to consent to the final union of Crete with Greece, failing which he proposed to resign. He left Crete on Aug. 27th to visit the European Courts; and the *Paris Temps* published on Nov. 27th the text of the memorandum addressed by him to the Ministers for Foreign Affairs of England, France, Russia, and Italy. In this he stated that by resolutions passed on Aug. 19th the Christian population in all the provinces of the island requested him on their behalf to implore the Great Powers not to delay the union of the island with Greece.

*British Consul-General at Canea*, Esmé Howard, C.V.O.

## CUBA.

Cuba is considerably the largest of the West India Islands, and lies between Florida and the Caribbean Sea. It was a Spanish pos-

session from the time of its discovery till, by the Treaty of Paris, Dec. 10th, '98, after the war with the United States, it was relinquished by Spain and became an independent State under American suzerainty. After the insurrection which began in '95 had gone on for some years the United States Government sent a formal demand to Spain for the evacuation of the island in April '98. After the war which followed, Spain relinquished the island, and General Wood took over its administration for the United States. A Constitutional Convention assembled in Nov. 1900, and adopted a constitution providing for a republican form of government, with a President, Vice-President, Senate, and House of Representatives. Thereupon the United States Congress authorised the transfer of the government to the people of Cuba, subject to the following stipulations: (1) No treaty with any other foreign Power impairing the independence of Cuba or allowing military or naval occupation of the island; (2) the right of the United States to intervene for the discharge of her obligations under the Treaty of Paris; (3) the validation of all acts of the existing Military Government; (4) the lease or sale to the United States of such coaling or naval stations as the President should deem necessary, with the reservation for future consideration of the ownership of the Isle of Pines; and (5) no loans to be issued unless the revenue showed a surplus sufficient for their service. These conditions were accepted, included in the Law of Constitution, and confirmed in the permanent treaty between Cuba and the United States, which was signed in May 1903.

The **United States Naval Stations** were agreed upon during 1903. One is at Bahia Honda, a few miles west of Havana, and the other is at Guantanamo, which dominates Santiago and the eastern end of the island and commands the Windward Passage.

The **Presidential and Congressional Elections** took place on Feb. 24th, 1902. The formal transfer of the Government to the Cuban authorities took place on May 20th, 1902. A reciprocity treaty with the United States was signed (Dec. 12th, 1902), and is to continue in force for five years. It allowed 20 per cent. reduction on all Cuban products, with a 20-per cent. preference to Cuba if similar treaties were made by the United States with other countries. An average reduction of 30 per cent. was made on American products entering Cuba.

Cuba is divided into six provinces. The capital is **Havana**, a splendid city (pop. 275,000). Other towns are Santiago, 43,000; Matanzas, 36,500; and Cienfuegos, 30,000. Education, neglected for years, was reorganised under the American administration, and is now compulsory. The chief products are sugar and tobacco, and though both have shown signs of declining in late years, they have revived very considerably since the Spanish rule ended. Sugar accounted in 1902 for over £6,000,000, and tobacco for over £5,000,000 of the exports. Timber and fruits are also increasingly exported, and there are valuable iron, manganese, and copper mines. There are 1120 miles of railway.

The area is about 44,000 sq. miles, and the population (99) 1,572,797, of whom about one-third are mulattoes or negroes. **Revenue**, 1902-3, £3,553,009; 1903-4, £3,458,000; **expenditure**, 1902-3, £3,067,990; 1903-4, £3,365,000; **imports**, 1902, £12,427,093; 1903-4, £15,500,000; **exports**,

1902, £12,989,761; 1903-4, £19,400,000. A loan of \$35,000,000, redeemable in 30 years, was authorised by the House of Representatives (Aug. 14th, 1902), the issue price being 90 and the rate of interest 5 per cent., and the object being to assist sugar-cane growers. Another loan of \$35,000,000, for educational schemes, public works, etc., was arranged in 1904.

**President**, Señor T. Estrada Palma, elected Feb. 24th, 1902. He was for many years head of the Cuban party in the U.S.A., and was chosen President of the brief Republic declared in '97.

**British Minister and Consul-General**, L. E. G. Carden, Havana. *Consul at Santiago*, R. Mason.

**Cuban Minister in London**, Señor Rafael

Montoro, 3, Grosvenor Mansions, Victoria Street, S.W.

**Culme-Seymour, Admiral Sir Michael**, Bart., G.C.B., G.C.V.O., appointed **Vice-Admiral of the United Kingdom** and Lieutenant of the Admiralty thereof in July 1901, is the 3rd Bart., and was b. March 13th, 1836. Ed. at Harrow, he entered the Navy in '50, and has seen active service in Burma '52, the Baltic '54, Black Sea '54-5, and China '58. He was private sec. to First Lord '74-76, and was first and principal A.D.C. to H.M. Queen Victoria '99-1901. Appointed Rear Admiral '82, Vice-Admiral '88, and Admiral '93, he commanded the Pacific Squadron '85-7, the Channel Squadron '90-92, the Mediterranean '93-97, and was made Commander-in-Chief at Portsmouth '97.

## D

**Danube International Commission.** By an agreement come to at the Berlin Conference, 1878, the Commission, which consists of delegates from Russia, Great Britain, Austria-Hungary, Germany, France, Italy, and Turkey, with representatives from Bulgaria, Roumania, and Serbia, was created in 1883 for 21 years. The term of authority of the Commission expired on May 7th, 1904, but provision was made for its continuance for another three years unless one or other of the contracting parties denounced the agreement 12 months in advance. The Commission regulates the navigation of the river as an international highway from the Iron Gates to the Black Sea, and has the right to prevent any works on the arms of the Danube which would interfere, directly or indirectly, with the navigation. The headquarters of the Commission are at Galatz, in Roumania.

**Deaf, Training College for Teachers of the**, Castle Bar Hill, Ealing, London, W. This College was founded in 1878 by the "Society for Training Teachers of the Deaf and for the Diffusion of the 'German' System," for the purpose of supplying English teachers of the "German" or Pure Oral system of teaching the deaf. The Society's practising school attached to the Training College has been certified by the Board of Education under the Elementary Education (Blind and Deaf Children) Act, '93, while a house has been provided for deaf girls sent by local authorities under the same Act. The Training College and School are open to the inspection of visitors on Tuesdays during term time from 10 to 4. **Chairman of Committee of Management**, E. Symes Thompson, Esq., M.D., F.R.C.P. The **Lady Superintendent and Secretary** is Mrs. Arthur Kinsey.

**Deakin, Alfred**, is a native of Victoria, to which colony his father went from England in the fifties. He was born Aug. 3rd, 1856, educated at the Church of England Grammar School, Melbourne, and Melbourne University, and was called to the Victoria Bar in '78. He was for some time on the staff of the *Melbourne Age*, and soon became a prominent politician. He was Commissioner of Public Works in the Victoria Cabinet '83, and afterwards became Solicitor-General. He made

a study of the irrigation question, and in '87 visited England as a Victorian representative at the Colonial Conference. He strongly advocated the Federation cause, and pursued his profession as a barrister with marked success. In 1900 he again visited England, representing Victoria during the passage of the Commonwealth Act, while he became Attorney-General in the first Commonwealth Ministry under Sir Edmund Barton as Premier. On the retirement of the latter to become a Judge of the High Court in 1903 Mr. Deakin succeeded him, holding office till 1904. See *Australia*, p. 88.

### DEATH DUTIES.

Under the provisions of the Finance Act, 1894, estate duty is payable on all property, real or personal, settled or not settled, which passes on the death of any person dying after the Act came into force as follows:—

Value of the Estate.		Rate per cent. of Estate Duty.
£101 to	£500	£1.
£501 "	£1,000	£2.
£1,001 "	£10,000	£3.
£10,001 "	£25,000	£4.
£25,001 "	£50,000	£4 10s.
£50,001 "	£75,000	£5.
£75,001 "	£100,000	£5 10s.
£100,001 "	£150,000	£6.
£150,001 "	£250,000	£6 10s.
£250,001 "	£500,000	£7.
£500,001 "	£1,000,000	£7 10s.
£1,000,001 and upwards.		£8.

To ascertain the percentage of duty payable, all the property passing on the death of its owner is to be aggregated so as to form an estate. By the Finance Act, '94, the principal value of any property liable to the new estate duty is to be estimated on the price which, in the opinion of the Commissioners, the property would realise if sold in the open market at the time of the death of the deceased; but, as regards agricultural property, the value is not to exceed twenty-five years' purchase of the property, as assessed under Schedule A of the Income Tax Acts, after deducting £5 per cent. for expenses of management. Disputes as

to valuation of the property may be referred to the High Court, or to the County Court where the amount is less than £10,000. Duty on real property may be paid by **eight yearly or sixteen half-yearly instalments**. It is provided by the Finance Act, '96, that estate duty on annuities may be paid by **four equal annual instalments**. A few other minor amendments of the Finance Act of '94 have been since made, chiefly by the Finance Act 1900, with reference to the principle of "aggregation."

**Legacy duty** is payable on legacies and shares of residue under a will or intestacy, and is applicable to personal property, except leaseholds either within the United Kingdom or abroad of a person who died domiciled in the United Kingdom. The rate of this duty is as under viz. :—

Legacies to children, or father, mother, or lineal ancestors, £1 per cent. (but no legacy or succession duty is payable where the new estate duty is charged);

To brothers or sisters or their descendants, £3 per cent.;

To brothers and sisters of the father and mother of deceased, or any descendant of such brothers or sisters £5 per cent.;

To brothers and sisters of grandfather or grandmother, or any descendants of such brothers or sisters, £6 per cent.;

To persons of other degrees of consanguinity, or strangers in blood, £10 per cent.

**Succession duty** is payable on the interest that an individual takes as successor to a deceased person on real or leasehold property in the United Kingdom, or on legacies charged upon the proceeds of sale of real estate of a person who died domiciled in this country, irrespective of the situation of the property; also on personal property included in a settlement, whether that property was at home or abroad. The duty varies in a similar manner to the legacy duty.

See FINANCE, NATIONAL, for the produce of these duties in 1903-4.

**Delcassé, Théophile**, French Minister for Foreign Affairs, was b. at Pamiers, March 1st, 1852, educated at Paris, and began his career as a journalist. He was elected to the Chamber in '89 for Foix, the chief town of the Ariège department, and in '93 he became Under-Secretary for the Colonies under MM. Ribot and Dupuy. It was mainly through his efforts that colonial affairs were entrusted to a distinct department. He became Colonial Minister in the Dupuy Cabinet of May '94, and has always been a consistent advocate of colonial expansion. When M. Brisson formed his ministry, after the fall of the Méline cabinet, in '98, he entrusted Foreign Affairs to M. Delcassé, and it fell to his lot to deal with the difficult position at Fashoda. He accomplished the task with great ability, and retained his portfolio in M. Dupuy's ministry, after the defeat of the Brisson administration. In '99 he negotiated the agreement with Great Britain as to the Nile Valley and Central Africa, and still remained Foreign Minister when M. Waldeck-Rousseau succeeded M. Dupuy. His proposals as to the demands which should be made of the Chinese Government after the Boxer outbreak of 1900 received the general assent of the Powers. In June 1902 he retained his post at the Foreign Office when M. Combes succeeded M. Waldeck-Rousseau as Premier, and visited England with the President in 1903. Together

with Lord Lansdowne he prepared the Anglo-French Agreement signed on April 8th, 1904, by which all questions pending between the two countries were settled, and the *rapprochement* between them was formally sealed. He belongs to the moderate section of the Radical Republicans in domestic politics. He married in '86, and has two children.

## DENMARK.

The kingdom of Denmark consists of Zealand, Funen, Laaland, and other islands in the Baltic, the peninsula of Jutland, and the Faeroe Islands or Sheep Islands in the North Atlantic. The constitution of the kingdom of Denmark was settled by the charter of 1849 (modified in '55, '63, '65, and '66). The executive power is vested in King and ministers, the legislative in the Rigsdag or Diet acting jointly with the sovereign. The Rigsdag is composed of the Landsthing (or Upper House of 66 members—12 Crown nominees appointed for life, and 54 indirectly elected by electoral bodies, in which large taxpayers are well represented, for eight years), and the Folkething (or House of Commons of 114 members directly elected by universal suffrage for three years). Members of both houses are paid 11s. 1d. a day while the Rigsdag is sitting for the first 6 months of the Session, and then 6s. 8d., and their travelling expenses. The Rigsdag must meet every October, and all money bills be submitted first to the Folkething. For local government the country is divided into 18 counties, each under a governor, and these are subdivided into hundreds and parishes. The towns are administered by mayors.

**Military service** is obligatory on all able-bodied men who have reached the age of 22. A reorganisation of the Danish army was introduced in '94, and the late War Minister, General Bahnson, calculated that the contingent brought under training 7947 men yearly. The service in the first line of the army is 8 years and in the second line 8 years; but, reckoning 14 years only, and allowing for waste, the General concludes that by the year 1910 Denmark will be able to mobilise 83,000 men, of whom 58,500 will be infantry, 5000 cavalry, 6800 field artillery, and 8600 fortress artillery. The really effective force would be about 70,000. At present the peace strength is 31 battalions, 16 squadrons, and 12 field batteries, with fortress artillery and engineers; but the number with the colours varies according to the period of the year, the men not being kept continuously under training. The strength is increased on mobilisation to about 66,000.

The Danish Admiralty is presided over by a Director, who is also Chief of the Staff (Rear-Admiral Jöhncke). The principal departments are presided over by naval captains, with the exception of the Hydrographical and Meteorological Departments, which are under the control of specialists. The Department of Construction is usually presided over by the Vice-Admiral of the Fleet. The Navy numbers about 4000 of all ranks. The executive officers are divided as follows: 1 vice-admiral, 2 rear-admirals, 16 captains, 38 commanders, 63 lieutenants, 33 sub-lieutenants, and 23 midshipmen. The Naval Estimates for the year 1904-5 total £317,605 (5,774,646 kr.). The strength in ships built and building on Nov. 30th was :—

Built.	
Battleships	4
Coast defence vessels	4
Protected cruisers	5
Torpedo boats	25

**Building.**

Coast defence vessel	1
----------------------	---

At Copenhagen there are three small docks.

A treaty of arbitration was concluded with Great Britain on June 10th, 1904, by which the two countries agreed to submit to the Hague Court all differences not settled by the ordinary diplomatic methods, except only cases where the vital interest or the honour of either party should be involved.

The State religion is Lutheran, and the King must be a member of that Church, but all others are tolerated, and there are no disabilities to dissenters. Education compulsory and free for children from 7 to 14 years of age, the public schools being maintained by communal rates. The chief newspapers are the *Radical Aftenbladet*, the Conservative *National Tidende* and the Independent *Berlingske Tidende*. Recent agricultural returns show that the foreign demand for Danish agricultural produce continues to increase. Cattle breeding is at the same time taking more and more the place of arable farming. Above all, dairy farming is being pursued with unparalleled skill and success. About five-sixths of the land is possessed by small freeholders and peasants. There are 21 agricultural or horticultural schools in the country, and a veterinary and agricultural college at Copenhagen, to which the State makes an annual grant of £21,110. The export of butter and other dairy produce is now the main source of the wealth of Denmark, and this was recognised by the formation of an Agricultural Department under a responsible Minister in May '96. Of the total exports given below, agricultural produce accounted for no less than £17,500,000 in 1903. Length of railways 1879 miles.

Area, 15,360 sq. m.; estimated pop. 2,464,770. Population of the capital, Copenhagen, 378,250, or with suburbs, 476,806. Revenue, 1901-2, £3,718,755; 1902-3, £4,205,856; expenditure, 1901-2, £4,162,417; 1902-3, £4,196,972; public debt, 1903, £13,600,000; imports, 1903, £24,702,778; exports, £19,585,558.

Ministry: Premier and Minister for Foreign Affairs, Prof. Deuntzer.—Justice, M. Alberti.—Public Instruction, M. Christensen Stadil.—Finance and Public Works, M. C. Hage.—Agriculture, M. O. Hansen.—Marine, Admiral Jöhncke.—War, Colonel Madsen.—Home Secretary—M. Sörensen.

British Minister at Copenhagen, Sir W. E. Goschen, K.C.V.O., K.C.M.G.—Sec., Hon. R. Lister, C.V.O.—British Consul at Copenhagen, Capt. J. Boyle, C.V.O.—Vice-Consul, C. H. Funch, Esq.

Consul at Thorshavn, H. M. Villiers.

Danish Minister in London, M. de Bille, 24, Port Street, S.W.

**Colonies.**

Greenland is an extensive region or island lying north-east of America, extending into the Polar regions. The interior is all ice, but parts of the south and west coast are habitable, with verdant pasturage, some shrubbery, and mossy valleys. Principal exports: oil of seals and whales, fox, seal, and reindeer skins, eider-down, feathers, and cryolite. The chief trade is

with Denmark. Area of the colonised portion, 46,740 sq. m.; pop. 11,895, of whom 309 are Europeans and the rest natives.

Iceland is a large island, 130 m. east of Greenland, and 850 m. west of Norway. Area, 39,756 sq. m.; pop. 7800. Capital, *Reykjavik* (pop. 8000). The Legislature, called the *Althing*, consists of two Houses, the Lower containing twenty-four members elected by household suffrage, and the Upper twelve members, six elected and six nominated by the King of Denmark. Under laws adopted in 1903, a Minister for Iceland, nominated by the King, resides at *Reykjavik*, and is responsible for the administration. Exports: wool, dried fish, mutton, ponies, and sheep. Their value averages about £425,000, and the imports about £460,000. Manufactures domestic.

Minister for Iceland, M. Hannes Hafstein (appointed Feb. 1st, 1904).

British Consul, John Vidalin, *Reykjavik*.

Santa Cruz or St. Croix. A West Indian island, the largest of the Virgin group. Capital, *Christianstadt*. It is governed, in connection with St. Thomas and St. John, by an officer appointed by the Crown. The negroes who make up the bulk of the population are chiefly engaged in the cultivation of the sugar-cane. Area, 118 sq. m.; pop. 35,156. A treaty providing for the sale of the West Indian islands to the United States was signed Jan. 1st, 1902, and ratified by the United States Senate Feb. 17th, but rejected by the Landsthing Oct. 22nd, 1902.

British Consul, H. McDougal, St. Thomas.

**Sovereign.**

King Christian IX. was b. April 8th, 1818. He is a son of the late Duke William of Schleswig-Holstein-Sonderburg-Glücksburg, and father of Queen Alexandra, of the dowager Empress of Russia, and the King of Greece. He is a K.G., G.C.B., and a general of the British Army. By the Treaty of London, signed May 8th, '52, he was appointed the successor to the throne of Denmark, and, by the law of succession of that country, passed July '53, he ascended the throne on the death of King Frederick VII., Nov. 15th, '63. In the beginning of his reign arose the famous dispute about the duchies of Schleswig and Holstein, which by the Treaty of Peace of Vienna ('64) he had to surrender. He married in '42 the Princess Louise, the daughter of the Landgrave William of Hesse-Cassel. Her mother was a sister of Christian VIII., the predecessor of Frederick VII. Queen Louise died in '98. The heir to the throne is the Crown Prince Frederick (b. June 3rd, '43; married July 28th, '69, to Princess Louisa, daughter of King Carl XV. of Sweden and Norway), whose second son, Prince Karl, was married to H.R.H. Princess Maud in '96.

**Political Parties.**

The Conservatives, or Right, long contended that under the constitution the Folkething had not—like the English House of Commons—the supremacy in matters of taxation and finance, and the power of practically deciding who should be the ministers. They maintained that the King and Landsthing together might overrule the Folkething. The Left were parliamentary men attached to the English system. Hence there arose an apparently interminable dispute, with the Landsthing and

the Ministry on one side and the majority of the Folkething on the other. This majority, however, gradually divided into two parties, Radicals and Moderates. M. Hörring became Premier in Aug. '99, and in April 1900 a new Conservative Cabinet under M. Sehösted was formed, which, after an overwhelming defeat at the polls, gave way to a Radical administration under Prof. Deutzer, in July 1901. The Landsthing after the election in Sept. 1902 contained 29 Conservatives, 11 Independent Conservatives, 25 Radicals, and 1 Socialist. The Folkething at the dissolution in June 1903 consisted of 92 Radicals, 14 Socialists, and 8 Conservatives. The election resulted in the return of 86 Radicals, 16 Socialists, and 12 Conservatives.

**Dewar, Sir James, F.R.S.,** Fullerman Professor of Chemistry, Royal Institution, London, was b. at Kincardine, Sept. 20th, 1842; and ed. at Dollar Academy, and Edinburgh Univ. He holds the degrees of M.A. and Hon. LL.D. Glasgow, St. Andrews, and Edinburgh; D.Sc. Oxford and Victoria; is Professorial Fellow of St. Peter's Coll. Camb., F.I.C., F.C.S., a Vice-President of the Royal Society and a Director of the Davy-Faraday Research Laboratory at the Royal Institution. With Sir Frederick Abel he invented cordite, and he has distinguished himself by his researches into the properties of matter at low temperatures, and into the nature and properties of atmospheric air. He was the first to liquefy and solidify hydrogen. Knighted June 24th, 1904. 21, Albemarle Street, W.; 21, Scroope Terrace, Cambridge.

**Dibdin, Sir Lewis T., K.C., D.C.L.,** Dean and Official Principal of the Court of Arches, was b. in 1852, being a son of the late Rev. R. W. Dibdin, of London. He was educated at St. John's College, Cambridge, and graduated in '74 as senior optime in the Mathematical Tripos, afterwards going to the Bar. He gained a large Chancery practice, and was appointed official counsel to the Attorney-General in charity matters in '95. In 1901 he took silk. In '86 he was appointed Chancellor of Rochester, of Exeter in '88, and of Durham in 1891; and he has made himself known as one of the ablest ecclesiastical lawyers of the day. On the resignation of Sir Arthur Charles in 1903 he was appointed Dean of Arches, Auditor of the Chancery Court of York, Judge under the Public Worship Regulation Act, and Master of the Faculties, and afterwards knighted.

#### DISESTABLISHMENT.

The "Society for the Liberation of Religion from State Patronage and Control," popularly known as the **Liberation Society**, exists for the purpose of securing the freedom of all Churches. The Episcopal Church in England and Wales and one of the Presbyterian Churches in Scotland are endowed out of national funds, and are controlled by Parliament. Prior to 1869 this condition existed in Ireland, where the Protestant Episcopal Church was so supported and controlled, but in that year Mr. Gladstone's **Irish Church Act** abolished that condition. The objects of the Society, formally stated, are:—The abrogation of all laws and usages which inflict disability or confer privilege on ecclesiastical grounds; the discontinuance of all payments from public funds, and of all compulsory exactions, for religious purposes. After an equitable satisfaction of existing interests, the application of

the national property now held in trust by the Established Churches of England and Wales and of Scotland to other and strictly national purposes; and, concurrently therewith, the liberation of those Churches from State control. A Bill brought in by the Liberal Government in '04 for the **Disestablishment of the Church in Wales** would have left that Church in possession of the buildings and endowments which have resulted from the pious liberality of its own adherents since the passing of the Act of Uniformity in 1662, and doubtless that policy would be adopted in the case of any future Disestablishment measure. The Liberation Society's present operations are educational, parliamentary, electoral, and legal. It holds numerous meetings, and by lantern-slide and other lectures carries on a vigorous propaganda in all parts of the country. It circulates large numbers of publications. Its monthly organ is *The Liberator*. The Liberation Society's chief office and depot for publications is 2, Serjeant's Inn, Fleet Street; Secretaries, Mr. John Fisher and Mr. Sydney Robjohns.

The **Church Committee for Church Defence and Church Instruction** is the organisation on the other side. Its object is to give instruction to the people in town and country in all matters connected with the history of the Church; to encourage learning the truth and soundness of the position of the Church of England; and also to combine men and women of every shade of political and religious opinion in the maintenance and support of the Established Church; and generally to encourage the co-operation of the clergy and laity for the promotion of measures conducive to the welfare and efficiency of the Church. No question touching doctrine is entertained at its meetings. Secretary, Mr. T. Martin Tilby, Church House, Westminster.

**Douglas, Major-Gen. G. W.,** Second Military Member of the Army Council and Adjutant-General to the Forces, was b. in 1850. He joined the 92nd Highlanders in '69, and served with them in the Afghan and Boer wars, taking part in the action of Charasiah and the march to Kandahar. He was D.A.A. and Q.M.G. during the Suakin expedition in '84, and then served at Aldershot, as brigade-major, '93-5, and as Assistant Adjutant-General '95-8. He went out to South Africa on Sir R. Buller's staff as A.A.G., and was Chief Staff Officer to Lord Methuen, being mentioned in despatches for his part in the battle of Magersfontein. He was then given the command of the 9th Infantry Brigade, and promoted major-general. On his return he took up the command of the 1st Infantry Brigade at Aldershot in 1901, and in 1902 of the 2nd Division of the Aldershot Army Corps. He was given his present appointment on Feb. 13th, 1904.

**Dowden, Edward, M.A., LL.D., D.C.L.,** Litt.D., Professor of English Literature at Dublin University. He was b. at Cork in 1843, and ed. privately and at Dublin Univ., and in '67 was appointed to the chair he now fills at that University. He was Clark Lecturer in English Literature at Trin. Coll., Cambridge, '93-'6, Commissioner of National Education for Ireland '96-1901, and is a Trustee of the National Library of Ireland. His contributions to literature are numerous, and include "Shakspeare: his Mind and Art," an "Introduction to Shakspeare," "Studies in Literature," lives of Shelley and Southey, a "History of French

Literature," and editions of many of the English classics. Highfield House, Rathgar, co. Dublin.

**Doyle, Sir A. Conan**, the grandson of John Doyle, the famous political caricaturist ("H. B.") was b. at Edinburgh in 1859. His education began at Stonyhurst in Lancashire, and was continued in Germany. At both schools the irrepressible literary leanings of the future novelist broke forth in the shape of school magazines which he edited. In '76 he commenced to study medicine at the Edinburgh University, and remained there for five years. His first essay in literature was "The Mystery of the Sassassa Valley," written at the age of nineteen, and published in *Chambers' Journal*. From '82 till '90 he practised his profession at Southsea, writing all the while various short stories, some of which have been since published under the title of "The Captain of the Polestar." After "A Study in Scarlet," "Micah Clarke," and "The Sign of Four," came "The White Company," which led to the final abandonment of medicine for literature. "The Adventures of Sherlock Holmes," and "The Memoirs of Sherlock Holmes," formed a brilliant series of detective stories, to which a continuation was commenced in the *Strand Magazine* in August 1900. In '93 "The Refugees" was published; and in '94 he wrote a short play, "A Story of Waterloo," successfully produced by Sir Henry Irving, and a volume of stories called "The Red Lamp." "The Exploits of Brigadier Gerard," and "Rodney Stone," one of his best stories, followed in '96, "Uncle Bernac" in '97, "The Tragedy of the Korosko," a volume of poems ("Songs of Action") in '98, "A Duet" in '99, "The Hound of the Baskervilles" in 1902, and "The Adventures of Gerard" in 1903. He volunteered for service in the Transvaal War, and in 1900 gave his medical services for some months in the hospitals there, afterwards publishing a history of the war, entitled "The Great Boer War." In October he stood as Unionist candidate for Edinburgh (Central Div.), but was not returned. In 1902 he published "The War in South Africa: its Cause and Conduct," of which translations have appeared in most foreign countries, the expense being defrayed by the sale of the book and by contributions offered for that purpose. Knighted June 26th, 1902. D.L. for Surrey. Address: Undershaw, Hindhead, Surrey.

#### DRAMA, THE, 1904.

Had success corresponded with zealous effort the dramatic record of 1904 would have been one of unchequered fortune. But this was not the case. In the desire to depart from well-worn paths a few managers ventured upon experiments that in some instances proved so disastrous as to cause immediate withdrawal of the novelties and a return to older methods of attraction. Meantime the popularity of light plays, with or without musical accompaniment, remained steady. The *Orchid* was a fixture at the Gaiety, and *The Earl* and *the Girl* bore transference from the Adelphi to the Lyric.

Adaptations of modern stories brought forward as part authors several writers new to metropolitan programmes, and fresh names were also encountered in the list of composers associated with musical pieces. The Hon. **Mrs. Alfred Lyttelton's** play of workroom life, "Warp and Woof," created a stir in fashionable circles, and **Mr. Alfred Austin** (Poet

Laureate) submitted at the Garrick a neat curtain raiser called "A Lesson in Harmony." The more familiar contributors to the stage were represented by Messrs. Pinero, Henry A. Jones, Robert Marshall, Carton, Bernard Shaw, Grundy, and Louis N. Parker, whilst Mr. W. S. Gilbert was welcomed back to the footlights with a novel whimsicality.

Notable additions to London managers were made in Mrs. Brown Potter at the Savoy and Mr. Otho Stuart at the Adelphi, the latter having the courage to start with an original poetic play entitled "The Prayer of the Sword," by Mr. J. Bernard Fagan. Owing to extensive structural alterations there was no autumn drama at Drury Lane.

Besides an entire company in the musical piece "The Prince of Pilsen," **America sent us** two favourite actresses in Miss Ethel Barrymore, who brought Mr. H. H. Davies' comedy "Cynthia," and Miss Eleanor Robson, the sympathetic representative of Mr. Zangwill's "Merely Mary Ann." In return, among English visitors to the States towards the close of the year were Sir Charles Wyndham and Miss Mary Moore.

Following the announcement of retirement on his stage jubilee in 1906, **Sir Henry Irving** at Cardiff in September commenced a farewell tour of the provinces, and was everywhere enthusiastically received. His repertory included a revival of Tennyson's *Becket*.

**Mr. Tree's** annual Shakespearean revival at His Majesty's on an imposing scale was "The Tempest." His Repertoire Company did excellent work in the suburbs with "Julius Cæsar," "The Merry Wives of Windsor," and other artistic reproductions. At the Court early in the year Mr. J. H. Leigh continued his Shakespearean campaign with "Romeo and Juliet," "Two Gentlemen of Verona," and "Timon of Athens." In November "The Taming of the Shrew" was revived at the Adelphi.

#### Poetic and Romantic Dramas and Important Revivals

were presented in the following order:—

- Jan. 9. Court. **The Question** (Bertram B. Ashford and John Strange Winter). Principals, Margaret Halstan, Kate Rorke, E. O'Neill, Titheradge, Hermann Vezin.
9. Court. **Bohémus** (adapted from French by John Davidson). Thirza Norman, W. Dennis, C. Lander.
11. Royalty. **Swift and Vanessa** (A. O'D. Bar, tholeyns). Mrs. A. Scaife, Dora Barton-Beveridge.
26. Avenue. **The Perils of Flirtation** (Walter Frith).
- Feb. 2. King's Hall, Covent Garden. **The Philanthropists** (adaptation of Brieux's "Les Bienfaiteurs"). Stage Society. S. Fairbrother, G. Burnett, C. V. France, E. W. Gardén.
8. Camden. **An Actor's Romance** (Theodore Kremer).
9. Wyndham's. **The Jailbird** (M. Maartens).
11. Imperial. **A Queen's Romance** (John Davidson's adaptation of Victor Hugo's "Ruy Blas"). Mrs. P. Campbell, Lewis Waller, C. Fulton.
16. Garrick. **The Arm of the Law** (adapted from Brieux's "La Robe Rouge"). Mr. and Mrs. Bouchier.

- Jan. 17. Court. *Romeo and Juliet* revival. J. H. Leigh, C. Lander, Thirza Norman.
18. Avenue. *A Man of Honour* (W. S. Maugham) revival. Muriel Wylford, Ben Webster.
29. Pavilion. *The Temptress* (W. P. Sheen).
- Mar. 14. Court. *A Soul's Tragedy* (Robert Browning). Stage Society: Janet Alexander, Ben Webster, A. Brydone.
17. St. James's. *Love's Carnival* (adapted by Rudolph Bleichmann from the German "Rosenmontag"). Lilian Braithwaite, G. Alexander.
21. King's, Hammersmith. *The Never-Never Land* (Wilson Barrett).
- April 2. Comedy. *Sunday* (T. Raceward). Julia Neilson, F. Terry.
4. Grand, Islington. *The Bridge of Sighs; or a Poor Girl's Love Story* (O. Brand).
4. Royal, Stratford. *The Beautiful Avenger* (F. A. Scudamore).
8. Court. *Two Gentlemen of Verona*, revival. Ellen O'Malley, T. Norman, J. H. Leigh, Acton Bond, Devereux.
9. Wyndham's. *The Sword of the King* (Ronald Macdonald). Ida Molesworth, May Harvey, Ben Webster, C. Fulton.
16. Apollo. *The Wheat King* (Miss E. Page and Mrs. Ashton-Jonson). E. Beringer, M. Carson.
16. Imperial. *Miss Elizabeth's Prisoner* (R. N. Stephens and E. Lyall Swete). Misses G. Lane and Lottie Venne, Lewis Waller, Swete.
27. King's, Hammersmith. *The Good Hope* (from the Dutch). Revived by Ellen Terry.
28. Terry's. *The House of Burnside* (adapted by Louis N. Parker from "Le Maison"). K. Rorke, C. Addison, E. Terry, G. Shelton.
- May 15. Court. *Ina* (R. O. Prowse). Stage Society: M. Halstan, N. McKinnel.
16. Grand, Islington. *The Woman from Nowhere* (Arthur Shirley).
18. Court. *Timon of Athens*, revival. J. H. Leigh, H. Vezin, F. Cooper.
23. Terriss. *A Disgrace to her Sex* (Walter Melville).
26. Lyric. *Hippolytus* (translation from Euripides by Gilbert Murray). E. Olive, Ben Webster.
- June 1. Duke of York's. *The Edge of the Storm* (Margaret Young). Miss G. Elliott, Forbes Robertson.
4. Avenue. *A Gentleman of France* (Harriet Ford). M. Carson, E. Beringer.
6. Kennington. *The Sadducee and the Sinner* (Cyril Hallward).
6. Camden. *Warp and Woof* (Mrs. Alfred Lyttelton). Mrs. P. Campbell, C. Aubrey Smith.
13. Kennington. *Richard Lovelace* (Laurence Irving). L. Irving.
18. Duke of York's. *Mice and Men*. Revival by Forbes Robertson.
23. His Majesty's (Clement Scott matinée). *Flower o' the Rose* (W. J. Locke). G. Alexander.
26. Court. *Where there is Nothing* (W. B. Yeats). E. L. Swete, Harcourt Williams, Dora Barton.
- July 4. Grand, Islington. *Home Sweet Home* (F. Lindo).
7. Imperial. *The Password* (A. Ramsey and R. de Cordeva) Mr. and Mrs. C. Sugden.
12. Duke of York's. *The Pharisee's Wife* (G.

- Paston). Madge McIntosh, Darragh, Aubrey Smith, Graham Browne.
- Aug. 1. Crown. *A Daughter's Crime* (Russell Vann).
- Sept. 3. Royalty. *Eriksson's Wife* (C. St. John).
3. St. James's. *The Garden of Lies* (Sydney Grundy). G. Alexander, Lilian Braithwaite.
5. Coronet. *Marguerite* (adapted by Michael Morton from "La Montansier"). Lena Ashwell, F. Mills, C. Groves.
14. His Majesty's. *The Tempest*, revival. Tree, Viola Tree, Norah Kerin, L. Brough, W. Haviland, B. Gill, L. Calvert.
19. Adelphi. *The Prayer of the Sword* (J. B. Fagan). Lily Brayton, Oscar Asche, Lyell Swete, W. Hampden.
29. Savoy. *The Golden Light* ("George Darling"). Produced by Mrs. Brown Potter, who played principal part; Abingdon, G. Hare.
- Oct. 6. Imperial. *His Majesty's Servant* (Sarah B. Elliott and Maud Hosford). Evelyn Millard, L. Waller, H. V. Esmond.
15. Savoy. *Forget-Me-Not*, revival. Mrs. B. Potter, F. Kerr.
5. Savoy. *Cavalleria Rusticana* (dramatic version). Mrs. B. Potter.
17. Alexandra. *Vilma* (adapted from French by Pierre Berton). Mrs. L. Waller.
17. Avenue. *The Master of Kingsgift* (Mrs. Tom Kelly). Frank Cooper, E. O'Neill.
18. St. James's. *The Decree Nisi* (J. Bates).
24. Elephant and Castle. *The Coal King* (E. Martin and F. Llewellyn).
31. Garrick. *The Walls of Jericho* (Alfred Sutro). Mr. and Mrs. Bouchier.
- Nov. 12. Shaftesbury. *The Flute of Pan* (Mrs. Craigie). Olga Nethersole, Annie Hughes, H. Waring, Somerset.
12. Savoy. *For Church or Stage* (Rev. Forbes Phillips). Mrs. Brown Potter.
23. Grand, Islington. *Lady Hamilton; or, The Last Signal* (H. F. W. Wood). M. Lacy, J. Cross.
- Dec. 6. Savoy. *Pagliacci* (C. Brookfield). Mrs. B. Potter, C. Warner.
12. Court. *Margot* (adapted from Daudet by May Pardon). Miss Darragh, Graham Browne.

**Comedy and Farce,**

whether quaint, fantastic, or grotesque, prospered to a far greater extent than serious pieces, even when songs and concerted musical numbers were not added to the action. Capt. Robert Marshall made a great hit with *The Duke of Killierankie*, which, although undergoing change of domicile, was before the public for nearly the whole of the year. Mr. Pinero reverted to the comic vein with *The Wife Without a Smile*, and Mr. Henry A. Jones presented two humorous plays of modern life in *Joseph Entangled* and *The Chevalier*. Much curiosity was evinced in Mr. Gilbert's *The Fairy's Dilemma*. Whilst the Haymarket was being rebuilt Messrs. Harrison and Maude moved to the New, and there successfully produced Messrs. Jacobs and Parker's *Beauty and the Barge*. The chief productions were:—

Jan. 9. Haymarket. *The Widow Woos* ("M. E. Francis" and Sydney Valentine). Mary Brough and S. Valentine.

19. Haymarket. *Joseph Entangled* (H. A. Jones). Cyril Maude, H. Waring, F. Volpé, Miss E. Jeffreys, Mrs. C. Calvert,

- Jan. 20. Criterion. *The Duke of Killiecrankie* (R. Marshall). Eva Moore, M. Illington, W. Grossmith, Graham Browne.
27. Terry's. *Love in a Cottage* (Basil Hood). Irene Rooke, Janet Alexander, F. Cooper, B. Thomas, Vane Tempest.
- Feb. 13. New. *My Lady of Rosedale* (J. C. Carr's adaptation of Capus's "La Châtelaine"). Charles Wyndham, A. Bishop, E. Norwood, Misses Mary Moore, M. Terry Lewis, and G. Kingston.
15. Duke of York's. *Captain Dieppe* (Anthony Hope and Harrison Rhodes). H. B. Irving, D. Boucicault, E. O'Neill, Irene Vanbrugh, M. Clements.
- March 3. Wyndham's. *When a Man Marries* (Murray Carson and Nrah Keith).
8. Imperial (revived at). *A Marriage of Convenience*. Lewis Waller, Grace Lane.
13. Duke of York's (revived at). *His Excellency the Governor*. H. B. Irving, D. Boucicault, Irene Vanbrugh.
14. Court. *'Op o' Me Thumb* (Frederic Fenn and Richard Pryce). Stage Society. Hilda Trevelyan.
31. Terry's. *A Maid from School* (Frank Stayton). Kitty Loftus, H. Sleath, J. H. Barnes.
- April 4. King's, Hammersmith. *The Electric Man* (Charles Hannan).
14. St. James's. *Saturday to Monday* (F. Fenn and R. Pryce). G. Alexander, Vane Tempest, Lilian Braithwaite.
20. Duke of York's. *The Rich Mrs. Repton* (R. C. Carton). Miss Compton, Eric Lewis, D. Boucicault, A. E. Matthews.
26. Court. *Candida* (Shaw). Kate Rorke, N. McKinnel, G. Barker.
- May 3. Garrick. *The Fairy's Dilemma* (W. S. Gilbert). Mr. and Mrs. Bouchier, Jessie Bateman, O. B. Clarence, S. Valentine, J. Robertshaw.
5. New. *The Bride and Bridegroom* (Arthur Law). C. Wyndham, Mary Moore, Vane Featherston.
13. Royalty. *The Money Makers* (George Rollit). L. Fairfax, Claire Romaine, L. Brough, Mark Kinghorne.
16. Wyndham's. *Cynthia* (H. H. Davies). Ethel Barrymore.
25. Haymarket. *Lady Flirt* (adapted from the French). Ellis Jeffreys, Cyril Maude.
28. Savoy. *Who's Who?* (adapted by Sidney Dark from the French). Fannie Ward, C. W. Somerset, E. Dagnall, Ivan Berlyn.
- Jan. 16. Garrick. *A Lesson in Harmony* (Alfred Austin). A. Bouchier.
16. New. *The Liars* (revived by Wyndham).
16. Wyndham's. *The Finishing School* (Max Pemberton). Annie Hughes, J. H. Barnes, Ben Webster.
23. His Majesty's. *The Conversion of Nat Strange* (Malcolm Watson). A. Bouchier.
- Aug. 27. Garrick. *The Chevalier* (H. A. Jones). Mr. and Mrs. Bouchier, S. Valentine.
29. Royalty. *The Chetwynd Affair* (R. Kennedy Cox). Miss Granville, C. Tearle.
30. New. *Beauty and the Barge* (W. W. Jacobs and L. N. Parker). Cyril Maude played a bargee.
30. New. *That Brute Simmons* (Arthur Morrison and H. C. Sargent).
- Sept. 1. Criterion. *Winnie Brooks, Widow* (M. Watson). Ada Reeve, Eric Lewis, Robb Harwood.
8. Duke of York's. *Merely Mary Ann* (Israel

Zangwill). Eleanor Robson, H. Ainley, G. du Maurier.

- Oct. 1. Comedy. *His Highness My Husband*. (Adapted by William Boosey from "Le Prince Consort.") M. Clements, Lottie Venne, L. Boyne, Eric Lewis.
12. Wyndham's. *A Wife without a Smile* (A. W. Pinero). L. Fairfax, M. Illington, D. Boucicault, E. M. Lowne.
- Nov. 1. Court. *John Bull's Other Island* (Shaw). Ellen O'Malley, L. Calvert, Shine.
14. Camden. *Mrs. Dering's Divorcee* (Percy Fendall).
15. Criterion. *The Freedom of Suzanne* (Cosmo G. Lennox). Marie Tempest, A. Ferrar, Aynesworth.
19. St. James's. *Lady Windermere's Fan* (Oscar Wilde), revived. M. Terry, L. Braithwaite, B. Webster.
29. Adelphi. *The Taming of the Shrew* (revived). Lily Brayton, Oscar Asche.
- Dec. 5. Comedy. *Charley's Aunt* (B. Thomas), revived. Stanley Cooke.
5. Camden. *The Housekeeper* (M. Wood and B. H. Maxwell). Mr. and Mrs. Rendal.
10. Terry's. *Comedy of Errors* (revived by Elizabethan Stage Society).

### The Musical Pieces

that obtained a firm hold of the public were again remarkable for skilful combination of song, dance, and spectacle. Brilliant colouring seemed indispensable to lively tunes and smart action. At the same time there was strong evidence of a desire to augment the value of the vocal ability employed. The popularity of an English version of Messager's *Véronique*, which in its original form attracted much attention at the Coronet in the summer of 1903, proved that well-chosen importations would still be effected with safety. The principal productions were:—

- Feb. 10. Savoy. *The Love Birds* (George Grossmith, jun., Percy Greenbank, and Raymond Roze). Kate Cutler, Blanche King, Lottie Venne, G. F. Goldin.
18. Comedy. *Amorelle* (Barton White, Ernest Boyd Jones, Gaston Surfette), revival. Willie Edouin, Mabelle Gilman, L. Barraclough.
19. Prince of Wales's. *The Darling of the Guards* (burlesque introduced into "The School Girl"). Arthur Roberts.
- March 5. Daly's. *The Cingalee; or Sunny Ceylon* (Tanner, Monckton, and others). Isabel Jay, Sybil Arundale, Gracie Leigh, Hayden Coffin, R. Barrington, Huntley Wright.
- April 12. Prince of Wales's. *La Poupée* (revival). Edna May, Willie Edouin, N. Salmond, R. Cunningham.
- May 14. Shaftesbury. *The Prince of Pilsen* (Frank Pixley and Gustave Ludess). American company, led by John W. Ransone.
18. Apollo. *Véronique* (English version by H. Hamilton). Ruth Vincent, R. Brandram, George Graves, F. Emney, L. Rea, A. Fitzgerald.
- June 14. Strand. *Sergeant Brue* (Owen Hall, J. Hickory Wood, Liza Lehmann). Willie Edouin, Arthur Williams, F. Soutar.
- Sept. 9. Vaudeville. *The Catch of the Season* (Seymour Hicks, Cosmo Hamilton, and others). Zena Dare, Hicks, S. Sothern.

Dec. 12. Avenue. Ladyland (Eustace Ponsonby and Frank Lambert). Ethel Irving, G. Ulmar, G. Delaporte, G. Giddens, R. Green.

### French and German Seasons.

Madame Sarah Bernhardt and Madame Réjane paid short visits in the summer, and each submitted her latest Parisian novelty. With the first-named this was Sardou's *La Sorcière*, produced with all the original spectacular appointments at His Majesty's on June 20th; and with the second it was *La Montansier*, the cast including M. Coquelin, at the Prince of Wales's, June 17th. Madame Réjane also appeared in "Zaza." A specially interesting event during Madame Bernhardt's brief stay was her performance in the original French with Mrs. Patrick Campbell of Maeterlinck's *Pelléas et Mélisande* at the Vaudeville on July 1st. Madame Bernhardt chose the male character.

By a compact French company led by M. Abel Tarride, Mlle. Martha Regnier, and Mlle. Gabrielle Dorziat, some excellent performances took place at the Avenue under the management of MM. Félix Riche and Louis Hillier. Particularly successful representations were those of Colus's "Antoinette Sabrier" (June 18th), Berton's "Yvette" (June 22nd), and Capus's "La Bourse ou la Vie" (June 27th).

German plays, with frequent changes of programme, lasted into spring at the Royalty, where on Feb. 29th was presented Hauptmann's much-discussed "Hannele." The autumn season, held at the Great Queen Street Theatre, started on Nov. 7th with Blumenthal and Kadelburg's "Die Grosstadtluft."

### Some Miscellaneous Events.

- April 17. Court. The Way of the World (Congreve), Mermaid Society revival. Ethel Irving, Mrs. T. Wright, C. M. Hallard.
- June 13. Royalty. Venice Preserved (Otway). Otway Society revival.
- July 18. Botanical Gardens, Regent's Park. The Wild Goose Chase (Fletcher). M. Soldi, P. Kirwan.
- 19. Garrick. Rosencrantz and Guildenstern (W. S. Gilbert's burlesque). Performance for charity by dramatic authors.
- Oct. 29. Court. Dr. Faustus (Marlowe). Elizabethan Stage Society revival. Mr. Hubert Carter in title part.
- Nov. 8. His Majesty's. Trilby (revived for Actors' Benevolent Fund benefit). Miss Viola Tree played the heroine.
- 13. Royalty. The Knight of the Burning Pestle (Beaumont-Fletcher). Mermaid Society. Mrs. T. Wright, Kemble, N. Playfair.
- 15. Court. Aglavaine and Selyvette (A. Suto's translation of Maeterlinck). E. Olive, T. Norman, W. Hampden.
- 21. Royalty. The Broken Heart (Ford), Mermaid Society revival. J. Rooke, F. Lascelles, J. H. Irvine.
- 28. Royalty. The Confederacy (Vanbrugh), Mermaid Society. Mrs. J. Wright.
- Dec. 5. Royalty. The Maid's Tragedy (Beaumont and Fletcher), Mermaid Society. Dora Hole, H. T. Edgar, W. H. Kemble.
- 6. Lyric. The Merchant of Venice. Mr. Norman Forbes played Shylock; Miss Ellen Terry Portia.

Dublin. The Most Rev. J. F. Peacocke, Archbishop of, is the son of Mr. George Peacocke, M.D., and was b. in 1835. He was ed. at Trinity College, Dublin, where he graduated B.A. (Senior Moderator in History and English Literature) in '57. He won the Regius Professor of Divinity's first premium, and obtained a first class in the Divinity testimonium examination in '58. He proceeded M.A. in '63, B.D. '77, and D.D. '83, and was ordained deacon '58 and priest '59. After holding several curacies he was appointed canon of St. Patrick's Cathedral, Dublin, in '75. He was incumbent of St. George, Dublin, '73-'78, and rector of Monkstown from '78 to '94. In '94 he was appointed Professor of Pastoral Theology in Trinity College, Dublin, and in the same year he was consecrated Bishop of Meath. He married in '65 Caroline Sophia, daughter of Major John Irvine, D.L., of Killadeas, co. Fermanagh. On the death of Lord Plunket, in '97, he was elected by the Bench of Bishops to succeed him as Archbishop.

Durand, Sir Henry Mortimer, G.C.M.G., K.C.S.I., K.C.I.E., H.M. Ambassador at Washington, was b. 1850, and is the second son of the late Major-Gen. Sir H. M. Durand, R.E. Ed. at Blackheath School and Eton House, Tonbridge, he entered the Indian Civil Service by examination in '70; was called to the Bar by Lincoln's Inn '72, and went out to Bengal as assistant-magistrate and collector '73. He was soon appointed to the Indian Foreign Department, and became assistant-secretary. In '79 he served through the Kabul campaign as Political Secretary to Lord Roberts; was appointed Under-Secretary of the Foreign Department '80, and Secretary '84-'94. In '93 he led the Durand Mission to the Ameer of Afghanistan and negotiated the "Durand Agreement" on the frontier difficulties. In '94 he went as British Minister to Persia, and in 1900 was appointed Ambassador at Madrid. On the death of Sir Michael Herbert in 1903 he was selected to succeed him at Washington. In '75 Sir Mortimer married Ella, daughter of Mr. Teignmouth Sandys.

Duse, Eleonora, Italian actress of the first rank, was b. at Vigevano Oct. 3rd, 1850. She appeared about '80 on the Italian, chiefly Roman stage, as leading lady in the plays of Dumas and Sardou, but afterwards played parts of greater depth, in which she achieved unsurpassed successes. She earned golden opinions by her combined force and gracefulness, in '92 appearing at Vienna and Berlin, in '93 at New York, and her recent visits to England have, by an unanimous accord, re-affirmed her triumphs. Although she appears chiefly in grave parts ("Magda," "Nora," "Adrienne Lecouvreur"), her versatility has also allowed her to please in the lighter vein of Dumas' "Francillon" as the hostess in Goldoni's "Locandiera." Her tragic force, together with pathetic suffering, softness and gentleness in woe, she demonstrated anew in London, in "Gioconda," the play which her friend Gabriele d'Annunzio (*q.v.*) wrote for her in '98. In 1903 she produced the same author's "Francesca da Rimini."

Dykes, Rev. J. Oswald, M.A. (Edin. and Camb.), D.D. (Edin. and Glasgow), b. at Port Glasgow 1835, graduated at Edinburgh '54, studied theology at New College (Edin.), Heidelberg, and Erlangen. Ordained minister of the Free Church, East Kilbride, Lanark, '59;

elected colleague of Dr. Candlish in Free St. George's, Edinburgh, '61. Compelled to resign this important charge through feeble health in '64, he visited Australia, where he remained for three years. In '69 he became minister of Regent Square Presbyterian Church, London. He left this charge in '88, when he was appointed Principal and Barbour Professor in the Theological College, Queen Square, now located at Cambridge and

known as Westminster College. **Works:** "Beatitudes of the Kingdom" ('72), "Laws of the Kingdom" ('73), "Relations of the Kingdom" ('74), "From Jerusalem to Antioch," ('74), "Abraham" ('77), "Daily Prayers" ('81), "Sermons" ('82 and '92), "The Law of the Ten Words" ('84), "The Gospel according to St. Paul" ('88), "Plain Words on Great Themes" ('92). Address: The Lodge, Westminster College, Cambridge.

## E

**Earl Marshal, The**, is one of the great officers of State, and takes precedence next after the Lord High Constable. The latter office ceased to be hereditary in 1521, since which it has been only temporarily revived for successive coronations, and once for a trial by combat, which, however, did not take place. The Lord High Constable and the Earl Marshal were formerly judges of the ancient Court of Chivalry; but when the former office ceased to be hereditary, the sole jurisdiction in questions of honour and arms was vested in the Earl Marshal, who is head of the College of Arms (see GARTER KING OF ARMS). The office of Earl Marshal is hereditary in the family of the Duke of Norfolk.

**Early Closing Association and Traders' Parliamentary Alliance**. Founded for promoting: (1) An abridgment of the hours of labour in all departments of industrial life, wherever unduly prolonged—especially on Saturday nights; (2) the adoption of a Saturday or other weekly half-holiday; (3) the abolition of unnecessary Sunday labour; (4) the early payment of wages; (5) the promotion of a profitable employment of leisure hours; (6) the promotion of the interests of traders and their assistants in matters requiring municipal or legislative control. For report of Select Committee on Early Closing see SESSION, sect. 124 in 1902 ed. The Committee recommended that Town Councils should be authorised to pass Provisional Orders regulating the closing of shops. **President**, Rt. Hon. Lord Avebury; **Secretary**, James A. Stacey; **Assistant-Secretary**, Albert Larking. **Offices**, 21, New Bridge St., E.C.

**Ecclesiastical Commissioners, The**, owe their origin to the Act 6 and 7 Will. IV., c. 77. Incorporated for the purpose of making schemes to carry out the recommendations of certain earlier commissions appointed to inquire into the endowment of bishoprics, the state of cathedral and collegiate churches, the best way of providing for the cure of souls, etc. The Act provided that the two Archbishops, the Bishop of London, the Lord Chancellor, Lord President, and First Lord of the Treasury for the time being, as well as a Secretary of State named by the sovereign, with three others therein named, should be of the commission. A subsequent Act added all the remaining bishops in England and Wales, the Chief Justice, and others. Membership of the Church of England has always been an indispensable condition of acting as a Commissioner. By an Act of 1856 the Church Building Commissioners had their powers transferred to the

Ecclesiastical Commissioners. Generally it may be said that the function of the Ecclesiastical Commissioners is to make increased provision out of their common fund (arising from a readjustment of cathedral and episcopal revenues) for the cure of souls in necessitous parishes. The proceedings of the Commissioners are controlled by numerous Acts of Parliament, and various duties have from time to time been imposed upon them—e.g., the formation of new parishes and alteration of boundaries where required, the augmentation and endowment of poor benefices in populous places, the sale and leasing of glebe lands, etc., etc. Since '40, when the common fund was first created, the Commissioners have augmented or endowed about 6000 benefices. The total increase in the incomes of benefices resulting from the operations of the Commissioners exceeds £1,091,010 per annum, and may be taken to represent a capital sum of £32,830,000. The Commissioners determined to appropriate in grants towards the augmentation and endowment of benefices, etc., during 1904, the sum of £250,000 of capital. Besides those named above the Commissioners are: Earls Stanhope, Brownlow, Egerton of Tatton and Cawdor, Viscount Halifax, Lord Burghclere, C. B. Stuart-Wortley, K.C., M.P., J. E. Talbot, M.P., H. Hobhouse, M.P., Sir Lees Knowles, Bart., M.P., and A. H. A. Morton, M.P. **Secretary**, Sir A. De Bock Porter, K.C.B. **Office**, 10, Whitehall Place, S.W.

**Economics and Political Science, The London School of**, was established in 1895 to provide special courses of study suited to the needs of business men, civil and municipal servants, journalists, and those engaged or about to engage in other branches of administration, public and private; it also makes provision, in connection with the **British Library of Political Science**, which contains much material of great value to the investigator for research in economics and political science, by the provision of courses of lectures on methods of investigation, by the award of studentships varying in value from £25 to £200, and by the co-ordination of various agencies for providing the student engaged in research with the help he needs. The School is a constituent College of the University of London in the Faculty of Economics and Political Science (including Commerce and Industry), and prepares students for the degrees of B.Sc. and D.Sc. Full particulars may be obtained on application to the Director of the School at Clare Market, W.C.

## ECUADOR.

Ecuador is a republic of equatorial South America, constituted in 1830 by separation from the original republic of Colombia. Under the Constitution of '84, modified in '87 and '97, it is governed by a President elected for four years, with the assistance of a Congress composed of a Senate of 32 members, elected for two years, representing the 16 provinces, and a Chamber of 42 Deputies, representing the people, which is elected every two years. The electors to both Chambers must be adults able to read and write, and holding the Roman Catholic faith. Primary education is free and obligatory. The foreign commerce centres in Guayaquil (pop. 51,000). The chief products are cocoa, indiarubber, hides, coffee, sugar, and cotton. Gold and other minerals exist in considerable quantities, but the country badly needs opening up. Army about 4350 officers and men, with a National Guard which can be made up to 30,000. Between Ecuador, Peru, and Colombia there have been for some time boundary disputes, at present unsettled. But by a treaty between Ecuador and Colombia signed in Nov. 1904 the Ecuador-Colombia boundary is submitted to the arbitration of the German Emperor.

Area (including the Galapagos Islands, which have an area of 2400 sq. m., pop. 400), 120,000 sq. m.; pop. 1,280,000, of whom nearly 900,000 are Indians. Capital, Quito, pop. 80,000. Revenue, 1902, £1,342,000, 1903, £1,051,700; expenditure, 1902, £1,332,000, 1903, £1,232,900; debt, 1901, £671,000 (purchased by the Guayaquil and Quito Railway Co.); imports, 1902, £1,444,300; exports, £1,810,600.

President: General Leonidas Plaza (1901-5). Ministry: Vice-President, B. A. Baquerizo.—Foreign Affairs, M. Valverde.—Finance, Juan F. Game.—War and Navy, Gen. Flavio E. Alfaro.—Interior, G. S. Cordova.

Minister in Europe, Señor Don E. Dom y de Alsúa (Chargé d'Affaires), 4, Rue de la Bienfaisance, Paris.

Consul General in London, Celso Nevares, 46, Lombard Street, E.C.

British Minister Resident and Consul-General, W. N. Beauchler, Esq. (resident at Lima, Peru).—Consul at Quito, L. Söderström.—Consul at Guayaquil, Alfred Cartwright.

## EDUCATION IN THE UNITED KINGDOM.

### I. ENGLAND AND WALES.

1. Primary Education.
2. Secondary Education.
3. Technology and Higher Education in Science and Art (including Evening Schools).

### II. SCOTLAND.

1. Elementary and Higher Grade Schools.
2. Secondary and Technical Education.

### III. IRELAND.

### IV. REFORMATORY AND INDUSTRIAL SCHOOLS.

### V. HIGHER EDUCATION OF WOMEN.

### VI. OPPOSITION TO THE EDUCATION ACT, 1902 (Passive Resistance, etc.).

### I. ENGLAND AND WALES.

Since April 1st, 1900, the central educational authority for England and Wales has been the Board of Education, established by the Board of

Education Act, '99. This Board has also vested in it certain educational powers of the Charity Commissioners and of the Board of Agriculture. The Board of Education consists of a President, the Lord President of the Council, His Majesty's Principal Secretaries of State, the First Commissioner of His Majesty's Treasury, and the Chancellor of the Exchequer. The President is appointed by His Majesty, and holds office during his pleasure. The cost of administration, including inspection and examination of schools, was during the financial year 1903-4, £408,103.

The principal officers of the Board are President, The Marquis of Londonderry, K.G. Parliamentary Secretary, Sir Wm. R. Anson, Bart., M.P.

Permanent Secretary, Robert L. Morant, Esq., C.B.

Accountant-General, John Bromley, Esq.

Principal Assistant-Secretaries:—Elementary Branch, H. M. Lindsell, Esq., C.B.; Secondary Branch, Hon. W. N. Bruce; Technological Branch, F. G. Ogilvie, Esq.

Director of Special Inquiries and Reports, H. F. Heath, B.A., Ph.D.

Chief Inspector Elementary Schools, Cyril Jackson.

Chief Inspector Secondary Schools, W. C. Fletcher.

Chief Inspector Technology and Higher Education, C. A. Buckmaster.

The duty of the Board of Education is to administer in England and Wales the law as to education which is contained in many Acts, commencing with the Act of 1870, of which the Education Act 1902 is the most important.

A very full digest of this Act appeared in the 1903 and 1904 editions. It abolished School Boards and School Attendance Committees, and set up new Local Education Authorities throughout England and Wales—viz., (1) In counties and county boroughs, the councils in both cases acting through Education Committees; (2) in non-county boroughs with a population of over 10,000, and urban districts with a population of over 20,000, the councils of those boroughs or urban districts acting similarly through Education Committees. The Act imposed upon the new authorities the duty of providing for all public elementary schools within their areas which were necessary, the Board schools being termed provided, and the Voluntary schools non-provided. In regard to "education other than elementary," the county councils are the local authorities over their entire areas, with power to raise a rate not exceeding 2d. in the £ per annum; but the authorities referred to in (2) above have concurrent powers to the extent of raising a 1d. rate per annum. In regard to elementary education the jurisdiction of county councils does not extend over the areas referred to in (2). The provided schools are managed by a body of managers appointed by the local education authority, and (in the case of county councils) the minor local authority. The non-provided schools have a body of managers, four appointed under the provisions of the trust deed of the school and two appointed by the local authority.

Sect. 4 of the 1902 Act deals with Religious Instruction. A council, in the application of money under the higher education part of the Act, shall not require that any particular form of

religious instruction or worship or any religious catechism or distinctive denominational formulary shall or shall not be taught in any school, college, or hostel aided but not provided by the council; and that in any school, college, or hostel provided by the council there shall be no religious test for pupils, and no catechism or distinctive denominational formulary is to be taught; but this is subject to the exception, as regards these provided establishments, of cases where the council, at the request of parents of scholars, at such times and under such conditions as the council think desirable, allow any religious instruction to be given in the establishment otherwise than at the cost of the council, though in the exercise of this power no unfair preference is to be shown to any religious denomination. In a higher school or college receiving a grant from or maintained by a council, a day or evening scholar shall not be required to attend or abstain from attending any Sunday school, place of religious worship, religious observance or instruction in the school or college or elsewhere; and the times for religious worship or for any lesson on a religious subject shall be conveniently arranged for the purpose of allowing the withdrawal of any such scholar therefrom.

Sect. 7 of the Act, as to the maintenance of schools, enacts that the local education authority shall maintain and keep efficient all public elementary schools within their area which are necessary, and have the control of all expenditure required for this purpose, other than expenditure for which, under this Act, provision is to be made by the managers; but, in the case of non-provided schools, only so long as the following conditions are complied with:—The managers of these schools must carry out any directions of the local education authority as to the secular instruction to be given in the school, including any directions with respect to the number and educational qualifications of the teachers to be employed for such instruction, and for the dismissal of any teacher on educational grounds; and should the managers fail to carry out any such direction the local education authority may carry it out themselves; but no direction given under this provision shall be such as to interfere with reasonable facilities for religious instruction during school hours. The local education authority have power to inspect the school, and their consent shall be required to the appointment of teachers, though that consent is not to be withheld except on educational grounds; and their consent shall also be required to the dismissal of a teacher, unless the dismissal be on grounds connected with the giving of religious instruction in the school. On the other hand, the managers of the school are to provide the schoolhouse free of charge, except for the teachers' dwelling-house (if any), to the local education authority for use as a public elementary school, and shall, out of funds provided by them, keep the schoolhouse in good repair, and make such alterations and improvements in the buildings as may be reasonably required by the authority, though such damage as the authority consider to be due to fair wear-and-tear in the use of any room in the schoolhouse for the purpose of a public elementary school shall be made good by the authority. Should the authority have no suitable accommodation in the provided schools, the managers of non-provided schools are required to allow the

authority to use any room in the schoolhouse out of school hours free of charge for any educational purpose on not more than three days in the week. But the managers of a school maintained but not provided by the authority, in respect of the use by them of the school furniture out of school hours, and the authority in respect of the use by them of any room in the schoolhouse out of school hours, shall be liable to make good any damage caused to the furniture or the room, as the case may be, by reason of that use (other than damage arising from fair wear-and-tear), and the managers must take care that, after the use of a room in the schoolhouse by them, the room is left in a proper condition for school purposes. Any question arising under this section between managers and local education authority is to be determined by the Board of Education. One of the conditions required to be fulfilled by an elementary school in order to obtain a Parliamentary grant is that it is maintained under and complies with this section. In non-provided schools assistant teachers and pupil teachers may be appointed, if it is thought fit, without reference to religious creed and denomination, and, in any case in which there are more candidates for the post of pupil teacher than there are places to be filled, the appointment is to be made by the local education authority, who are to determine the respective qualifications of the candidates by examination or otherwise.

The "Kenyon-Slaney clause," which is really subsect. 6 of sect. 7, is in the following terms—that is, as it appears in the Act:—"Religious instruction given in a public elementary school not provided by the local education authority shall, as regards its character, be in accordance with the provisions (if any) of the trust deed relating thereto, and shall be under the control of the managers: Provided that nothing in this subsection shall affect any provision in a trust deed for reference to the bishop or superior ecclesiastical or other denominational authority so far as such provision gives to the bishop or authority the power of deciding whether the character of the religious instruction is or is not in accordance with the provisions of the trust deed."

The last subsection of sect. 7 gives the managers of a non-provided school all powers of management required for the purposes of carrying out the Act, and (subject to the powers of the local education authority conferred previously under this section) the exclusive power of appointing and dismissing teachers.

Sects. 8 and 9 deal with New Schools from the points of provision and necessity. Where it is proposed by the local education authority or any other persons to provide a new public elementary school, notice must be given, and the managers of any existing school or the authority (if the latter are not themselves making the proposal), or any ten ratepayers concerned, may, within three months after the notice is given, appeal to the Board of Education on the ground that the school is not required, or that a provided school or a non-provided school, as the case may be, is better suited to meet the wants of the district than the proposed school, and any school built in contravention of the decision of the Board on such appeal is to be treated as unnecessary. Any transfer of a public elementary school to or from the local education authority is for the purposes of this

section to be treated as the provision of a new school. Under the ninth section the Board, in deciding whether a school is necessary or not, and as to the provision of a new school, are to have regard to the interest of secular instruction, to the wishes of parents as to the education of their children, and to the economy of the rates; but a school for the time being recognised as a public elementary school is not to be considered unnecessary in which the number of scholars in average attendance is not less than thirty.

April 1st, 1903, was the earliest day which could be conveniently fixed for any Council to put the Act into operation; and by Aug. 1st, 1904, the Act had come into operation in the area of every local education authority under the Act, with the exception of the counties of Cardigan, Monmouth, and Pembroke, the county boroughs of Cardiff and Swansea, and the urban district of Edmonton. (But see Sect. VI. as to opposition to Act.) The details and statistics given below belong (in part) to the period prior to the adoption of the Act, but are arranged under the three heads now adopted by the Board of Education in their reports: viz. 1, Elementary Education; 2, Secondary Education; 3, Technology and Higher Education in Science and Art (including Evening Schools).

As to the Education (London) Act, 1903, which came into operation on May 1st, 1904, see LONDON COUNTY COUNCIL.

Under the provisions of an Order in Council, March 3rd, 1902, a Teachers' Registration Council was constituted for the registration of teachers in two columns, A and B. Those in column A are certificated elementary teachers, and those in column B are teachers (not being elementary teachers) who have obtained a university or equivalent degree or diploma, have had a year's training in pedagogy, have passed an examination in the theory of teaching, and have spent a year as teacher at a recognised school (not being an elementary school). According to the latest returns, about 85,000 names have been entered in column A during the year; and under column B 5229 applications were received, and 4045 teachers registered. Up to the end of 1903, five teachers had been registered in column B under regulation 5(2), which permits of the registration of persons who have proved themselves to be exceptionally qualified teachers, but do not fulfil all the conditions of registration.

### 1. Primary Education.

The 1904 Code marked a fresh departure in educational method in the Elementary Schools. The spirit that presided at the modification is revealed by the opening paragraph in the "Introduction":—

"The purpose of the public elementary school is to form and strengthen the character and to develop the intelligence of the children entrusted to it, and to make the best use of the school years available, in assisting both girls and boys, according to their different needs, to fit themselves, practically as well as intellectually, for the work of life."

The extent to which the code is simplified is seen in the list of subjects, in which "the Board have attempted to emphasise the essential character of a curriculum as a discipline or means of education; to exhibit . . . the course of instruction as a connected and coherent whole." English Language includes speaking

with correct pronunciation, reading aloud with intelligence and clear enunciation; Arithmetic includes oral and written descriptions of the processes used; knowledge of common phenomena is to have special reference to the formation of a habit of intelligent and accurate observation; Geography is to start from first notions of the physical features of the earth, and specially of British Isles and possessions; History is to be largely that of the British Empire; and these and drawing, singing, physical exercises and needlework are all to be taught, as far as possible, in relation to each other and with reference to the surroundings of the children. An excellent list of special subjects is also treated in the same spirit.

On the date to which the last return relates (Aug. 31st, 1903) there were in England and Wales, under inspection—

14,253 Voluntary (now non-provided) and  
6,011 Board (now provided or authority) schools—

Total, 20,264; the former with accommodation for 3,725,855, and the latter for 3,069,629 scholars—total, 6,795,484.

The average attendance was 5,047,129, or a percentage of 84.47 of the number on the register.

The total Government grants for all articles of the Code for day schools was £5,322,793.

This does not include the amount contributed in lieu of school fees, which amounted to £2,548,992.

**Grouping of Schools.**—So far as the Board of Education had any information when their Report was compiled, the arrangements for grouping schools, under the Act of 1902, affected 514 Council Schools and 278 Voluntary Schools.

At the passing of the first Education Act in '70, accommodation was provided for only 8.75 per cent. of the population, whereas in 1902 the percentage was 20.25. The cost of elementary education has steadily increased. In '72 the cost per head was £1 7s. 5d.; in '79, £1 16s. 10½d.; in '85, £1 19s. 1½d.; and in 1902, £2 6s. 3½d. in Voluntary schools and £3 os. 9½d. in Board schools.

In the transitional condition of the national educational finances, adequate statistics are at present lacking for the compilation of the table usually given here showing the total amount raised for the maintenance of public elementary day schools in England and Wales.

**Higher Elementary Schools.**—Of these schools 28 had been provided by School Boards, and one by Voluntary managers. Twenty-seven of these still exist, and two new ones have been recognised by the Board. Of the two that ceased to be Higher Elementary Schools, one has become a secondary school and the other an ordinary public elementary school. Nine proposals for the establishment of new Higher Elementary Schools, or for the conversion of existing schools into such schools, were under the consideration of the Board when the report was published. These schools received a total grant of £18,968. The number on the registers was 8236, the average attendance 7839. Instruction was given in manual work to 24 schools; in cookery to 17; in laundry to 3; and in domestic economy to 1. The total number of teachers was 397: viz., 303 certificated (of whom 48 were graduates), 8 uncertificated (but graduates), 11 assistant teachers, and 75 teachers of special subjects.

**Other Schools.**—Of elementary schools certified as efficient which do not claim grants 108 were examined, the average attendance at which was 3999, with 39 certificated and 80 uncertificated teachers. Examinations in drawing and manual instruction were held by the Board of Education in 21 elementary schools not aided by grants. In these schools grants amounting to £229 for drawing were earned, and four of the schools earned grants amounting to £35 in respect of manual instruction. These grants will not be payable after April 30th, 1905.

**Physical training** for both boys and girls is now an integral part of the curriculum of every Public Elementary School; and was taught in 23,346 departments. A Syllabus of Physical Exercises has been drawn up, which is gradually to take the place of the Model Course issued in Sept. 1902, and is expected to be of greater educational value than that which it replaced. School libraries have been established in 8453 schools, and savings banks in 6073.

**Blind, Deaf, Defective and Epileptic Children.**—Under the Elementary Education (Blind and Deaf Children) Act, '93, there were in 1903, 40 schools and institutions for blind and 60 for deaf children, with accommodation for 1739 blind and 3579 deaf children. The numbers on the books were 1667 and 3240 respectively. Under the Elementary Education (Defective and Epileptic Children) Act, '99, there were 108 day schools and institutions, with accommodation for 4877 children, and 4698 children on the books. In London, Bristol, Birmingham, and Nottingham, voluntary after-care committees have been established, the members of which take over the blind, deaf, and defective children as they leave school, find them work, and generally supervise their welfare.

#### Teachers and Training Colleges.

**Teaching Staff.**—In 1903, in the schools under inspection, there were at work 70,886 certificated teachers (one to every 71·20 children in average attendance), 24,438 pupil-teachers, 38,156 assistant or provisional assistant teachers, and 17,820 additional women teachers. Of the certificated masters 7403, and of the certificated mistresses 23,579, were untrained.

**Training Colleges.**—There are 66 training colleges for elementary school teachers under inspection by the Board of Education and in receipt of Government grants: viz., 20 for men, 32 for women, and 14 for both men and women; 47 colleges are residential, and 19 day training colleges. Of the 47 residential colleges 32 are connected with the Church of England; 3 (including one for blind students) undenominational; 6 British; 2 Wesleyan; and 4 Roman Catholic. The number of resident students was 4488, and of day students 2214. The number of candidates for admission to training colleges in 1903 was 14,619, of whom 2845 failed. Of the successful candidates 2428 were men and 9346 women. During 1903, 39 training-college students were sent to France and Germany for periods of residence and training. The grant paid to the training colleges was £169,791. A capitation grant of £10,973 was also earned upon courses of instruction in science and art taken in the colleges.

Important new Regulations for the training of teachers were issued in 1904. Much greater

liberty is given in the conditions under which students otherwise qualified may obtain a **One-Year's Course** mainly devoted to professional training. A greater variety of type in training colleges is recognised; the arrangements for inspection and examination are considerably modified, and a greater variety of examinations alternative to that held by the Board of Education is permitted. Emphasis is laid upon the necessity of providing a wide and liberal course of study, particularly for those whose general education has not been carried far before entering college. Colleges are cautioned against aiming at academic distinctions for their students at the cost of overtraining the student's powers, or of the neglect of professional training. As to systems of study, great stress is laid upon the "scientific method" applied to history, literature, language and philosophy, as well as to the study of natural phenomena. Much importance is also attached to "nature study," so conducted as to encourage accurate observation and the careful recording of what is seen, with a view to the growth of an independent habit of thought. **Students are of five classes: Two-Year Students; Third-Year Students,** or two-year students of special merit to whom additional educational facilities are offered, the year's training to be taken either at the college, or elsewhere, or abroad; **Certificated Students,** certificated teachers not previously trained, admitted for a **One Year's Course; Three-Year Students,** in colleges closely connected with a university, and offering a course of study leading up to a degree; and **One-Year Students,** who have passed certain requisite examinations and seek special professional training. The ends aimed at in the new Regulations are increased thoroughness in training in the principles and methods of teaching children, the impartation of a wide and liberal education, and the formation of character.

#### National Union of Teachers.

The National Union of Teachers was founded 1870. **Objects:** (1) to promote the spread of education; (2) to bring practical knowledge to bear on educational legislation; (3) to unite the school teachers in a strong professional organisation; (4) to watch the interests and advance the welfare of schools and teachers. The Union provides legal advice, defence, and assistance for its members, professional advice and protection against unjust management or inspection of schools. Its organ is the *Schoolmaster*. **Conferences** are annually held at Easter. The thirty-fifth annual conference was held at Portsmouth, April 4th to 7th, 1904, the President being Mr. George Sharples. There are now 463 local associations in England and Wales, with 50,650 members. The N.U.T. Examinations Board holds examinations for pupil teachers, conducts commercial examinations annually, and issues teachers' diplomas in various subjects. There are a **Provident Society, Benevolent Fund, Orphan Fund, and Orphan Homes** in connection with the Union. Nearly £20,000 is raised yearly for benevolent purposes. **Secretary, J. H. Yoxall, M.P. Office, 67 and 71, Russell Square, W.C.**

#### Societies.

The National Education Association was established in '89 to promote a system of national education which shall be efficient,

progressive, unsectarian, and under popular control. The constitution and policy of the association are controlled by a council of 300 members, representing all parts of England and Wales, which is elected annually by the subscribers, branches, and affiliated bodies. **President**, Rt. Hon. A. H. D. Acland; **Treasurer**, Rt. Hon. Lord Stanley of Alderley; **Chairman of Executive Committee**, Mr. C. Morley, M.P.; **Secretaries**, Mr. A. J. Mundella and Mr. T. E. Minshall. **Offices**, Surrey House, Victoria Embankment, W.C.

The National Society for Promoting the Education of the Poor in the Principles of the Established Church, was instituted in 1811 and incorporated in 1817. The income for 1903 was £24,548. **President**, the Archbishop of Canterbury; **Secretary**, Rev. Canon Brownrigg. **Offices**, The Sanctuary, Westminster.

The British and Foreign School Society was instituted in 1808. The income for 1903 was £43,784. **President**, Rt. Hon. A. H. D. Acland; **Secretary**, Mr. Alfred Bourne, B.A. **Offices**, 114, Temple Chambers, Temple Avenue, E.C. **Froebel Society**, 4, Bloomsbury Square, W.C. **Secretary**, Miss Noble.

## 2. Secondary Education.

The Education Act, 1902 (see above) makes provision for supplying or aiding the supply of education other than elementary; but previously there had existed no statutory power to enable any department to secure a sufficient and efficient supply of second-grade schools. For higher education and principal secondary schools, see Higher Education of Women, p. 148; also PUBLIC SCHOOLS AND UNIVERSITIES.

The new Regulations for Secondary Schools define a Secondary School eligible to receive grants as one that offers to its scholars, up to and beyond the age of 16, "a general education, physical, mental, and moral, given through a complete graded course of instruction, of wider scope and more advanced degree than that given in Elementary Schools." The curriculum must extend over at least four years, and the pupils must not begin the course under the age of 12. Each school must be under a body of governors, and may not be conducted for private profit. Grants can be earned by each scholar on the scale of 40s., 60s., 80s. and 100s. for the first, second, third, and fourth years of the course respectively, besides special grants for special courses, science and art. The instruction must be "such as gives a reasonable degree of exercise and development to the whole of the faculties, and does not confine this development to a particular channel . . . or to that kind of acquirement which is directed simply at fitting a boy or girl to enter business in a subordinate capacity with some previous knowledge of what he or she will be set to do." The course must be complete—that is, must lead up to a definite standard of acquirement in the various branches of instruction. The minimum provision of instruction recognised by the Board is the four-years' course; "but the earlier education leading up to this course, and the further education (if any) given beyond it, are regarded by the Board as forming with it a single organic and progressive system." The Regulations, therefore, require that the curriculum of the whole must be submitted for approval.

Under the Welsh Intermediate Education Act, '89, in the year ending March 31st, 1903, the

Treasury grant was claimed by 93 County Schools. Two other schools, not entitled to a grant, were inspected and examined, making a total of 95 schools inspected and examined under the direction of the Central Welsh Board, and comprising 18 schools for boys, 21 for girls, 47 dual and 9 mixed schools. The Education Act, 1902, does not affect the schemes made under the Welsh Intermediate Education Act, except by providing that the new Local Education Authority shall, in the case of each county and county borough, be substituted for the County Governing Body constituted by the scheme.

**Inspection of Schools.**—The number of schools inspected under the Board of Education Act, '99, in 1903 was 135, as compared with 95 in the previous year. Of these 25 were inspected on application of the county authorities aiding them; 23 were proprietary schools; 33 were private schools; 75 were schools for boys, 49 were schools for girls, and 11 were mixed schools for boys and girls; 61 were schools receiving grants under the Regulations of the Board for Secondary Day Schools.

**Associations of Masters and Mistresses.**—For many years, the only professional body for expressing the ideas of educationists was the College of Preceptors. There have since been founded:—The **Headmasters' Conference** (1870), representing the chief endowed schools of the country—**Secretary**, R. R. Campbell, 5, Stone Buildings, Lincoln's Inn, W.C.; the **Incorporated Association of Head Masters**—**Secretary**, H. Bendall, 37, Norfolk Street, Strand, W.C.; the **Incorporated Association of Assistant Masters in Secondary Schools**—**Secretary**, C. J. Mackness, 27, Great James Street, W.C.; the **Association of Head Mistresses** (incorporated '96)—**Secretary**, Miss Ruth Young, 92, Victoria Street, Westminster, S.W.; the **Incorporated Association of Assistant Mistresses in Public Secondary Schools** ('84)—**Secretary**, Miss Macklin, 22, Berners Street, W.; the **Teachers' Guild** ('85)—**Secretary**, H. B. Garrod, M.A., 74, Gower Street, W.C.; the **Private Schools Association, Incorporated**—**General Secretary**, H. R. Beasley, 9, Bedford Court Mansions, Bedford Square, W.C.; the **Association of University Women Teachers**—**Secretary**, Miss Gruner, 48, Mall Chambers, Kensington, W.; and other similar associations.

## 3. Technology and Higher Education in Science and Art (including Evening Schools).

The institutions under this head comprise:—  
(i.) Secondary Day Schools, Division A (formerly called Schools of Science).

(ii.) Secondary Day Schools, Division B (formerly called Secondary Day Schools simply).

(iii.) Science Classes.

(iv.) Schools of Art; and

(v.) Art Classes.

In Division A there were 226 schools, with 31,090 students under instruction. In Division B there were 142 schools in England and 66 in Wales and Monmouthshire. Of the English schools, 114 were endowed, 2 were county or municipal schools, 6 were established by articles of association, and 10 by religious bodies; and the Welsh schools were working under the Welsh Intermediate Act. Day science classes in Science and Art were held in 554 schools, with 53,585 scholars, earning a

grant of £45,781. **Science Examinations** were held at 1,488 centres, and 13,080 elementary, 5522 advanced certificates were earned, and 955 in honours. **Art Examinations** were held in 1166 centres; 478 first-class certificates were earned in elementary design, 23 first-class honours for design and modelling, and 17,743 first-class in remaining subjects. **Seven Royal Exhibitions, 22 National Scholarships, and 6 Free Studentships** to the Royal College of Science, London, were awarded, the number of competitors being 182. **Twenty-nine Local Exhibitions** in Science, tenable at any institution where science instruction is given, were awarded. There were 126 competitors for the 4 **Whitworth Scholarships** and Exhibitions of £125 tenable for three years, and the 30 for £50 tenable for one year. Forty-five teachers received aid to enable them to attend different universities for advanced instruction in science. The **Summer Courses for Science Teachers** held at the Royal College of Science were attended by 156 teachers—viz., 122 from England and Wales, 27 from Scotland, and 7 from Ireland. 363 scientific objects were lent to 15 science schools and classes.

There were 231 **Schools of Art**, in which 49,121 students were under instruction; and the number of students attending the annual examinations was 20,461. The total grants to **Schools of Art** amounted to £49,634, an average of 20s. 3d. per student under instruction. Examinations in Art were held at 1166 centres. Of the 89,992 papers worked, 52,445 were successes; 1,013 certificates conferring varying teaching qualifications were issued. **Ten Royal Exhibitions** (tenable for two years, 25s. a week during college session, and one third-class railway fare each session to and from Royal College of Art) and 24 **Local Scholarships** (tenable for three years, £20 a year) were awarded, 158 students competing; 9 **Local Exhibitions** were also awarded, and 513 **Free Studentships** (£3 each to School of Art in lieu of the students' fees). 128 attended the **Summer Courses for Art Teachers and Students** at the Royal College of Art. 15,782 objects of art were lent to schools of art and art classes. For the **National Art Competition** 5722 works selected from the total number submitted from schools of art and art classes were examined, and 4 gold medals, 69 silver medals, 197 bronze medals, and 393 prizes of books were awarded.

#### The Technical Instruction Acts.

According to a return issued as a Parliamentary paper in July 1904, of the 49 county councils in England (excepting the county of Monmouth), 45 are applying the whole of the residue under the **Local Taxation (Customs and Excise) Act, '90**, and 3 are applying a part of it, to **Technical Education**. Of the 64 county boroughs, 61 are applying the whole, and 3 a part, to **Technical Education**. Four county councils, 31 county boroughs, 101 boroughs, and 211 urban districts are making grants out of the rates under the **Technical Instruction Acts**. In 31 cases local authorities are also aiding **Technical Instruction** out of the rates under the **Public Libraries and Museums Acts**. In Wales and Monmouth the 13 counties and 3 county boroughs are levoting the whole of the residue to **Intermediate and Technical Education**, chiefly under the **Welsh Intermediate Education Act, '89**; and 11 Welsh counties and county boroughs

and 12 boroughs and urban districts are making grants out of the rates under the **Technical Instruction Acts**. In England and Wales the total amount expended on **Technical Education** during the year was £1,191,998. In addition, the amount raised by loan on the security of the local rate under the **Technical Instruction Act, '89**, mainly for erection of **Technical and Science and Art Schools**, was £149,665; outstanding loans, £1,159,941; and balance in hand of moneys received and allocated to **Technical Instruction** £598,989. The total amount devoted annually to **Intermediate and Technical Education** under the **Welsh Intermediate Education Act, '89**, was £42,201.

See also **LONDON COUNTY COUNCIL**.

#### Evening Schools.

According to the latest report published, the **Evening Schools** (inspected under the minute of July 1901), which earned a grant in 1903, numbered 5,624; masters, 17,280; mistresses, 6,835—total, 24,115; boys and men, 403,629; girls and women, 253,965—total, 657,594, of whom 67 per cent. qualified for grant. The number who obtained free instruction was 152,039. The subjects taught were very numerous, including all kinds of manual training, elementary science, French and German, political and domestic economy, horticulture, agriculture, etc., etc. A large number of the scholars took only one subject each, and others only two or three subjects. Of the students 22 per cent. were between 12 and 15 years; 53 per cent. between 15 and 21; and 25 per cent. over 21. The total males were 61 per cent.; females, 39 per cent. The total grant paid by the Board was £285,126, or an average of 12s. 11d. per scholar.

#### Museums, Colleges, etc.

Considerable progress has been made with the new Museum buildings. 304 students attended the **Royal College of Science**, of whom 165 were free Government students. Chemistry was studied by 123; mathematics, 114; Mechanics, 70; Biology, 21; Geology, 71; Metallurgy, 65; and Mining, 45. The summer courses for teachers in July 1903 were attended by 165 students. In the **Royal College of Art** the students numbered 119 men and 48 women—total, 167. The number of Art teachers and students admitted to the summer courses was 109, besides 31 elementary school teachers specially selected to follow a course of Instruction on Primary Drawing in connection with the Circular on Primary Drawing issued by the Board.

#### Commercial Education.

The **Oxford and Cambridge Schools Examination Board**, after conferring with representatives of the Chambers of Commerce, have adopted a scheme under which certificates are granted for proficiency in commercial knowledge preparatory to entering upon a mercantile career. A scheme for junior and higher commercial education has been drafted by the committee of the London Chamber. All information in connection with future examinations, past papers, etc., can now be obtained at the offices of the London Chamber of Commerce (g.v.), Botolph House, Eastcheap, E.C. The Society of Arts (John Street, Adelphi, W.C.) conducts commercial examinations annually in more than 300 London and provincial centres. At King's College, the City of London School, the Central Foundation

Schools (under the control of the Charity Commissioners), the Y.M.C.A. (Aldersgate Street branch), and the Polytechnic Y.M.C.I., among other institutions in London, special provision has been made for a course of education in accordance with the scheme of the London Chamber. A new faculty of Economics (including commerce and industry) has been established in the University of London, and a new development has been given to the courses in higher commercial subjects at the London School of Economics. A special commercial department has recently been established at University College School. The curriculum of the school extends over three years, and is specially designed to fit pupils for a commercial life.

## II. SCOTLAND.

In Scotland, education is under the control of a Committee of Council on Education: Office, Dover House, Whitehall.

Secretary, J. Struthers, C.B.

Assistant Secretaries, G. Todd, I.S.O., and G. Macdonald.

Senior Chief Inspector, A. E. Scougal.

### 1. Elementary and Higher Grade Schools.

During the year ending August 31st, 1903, in the Elementary and Higher Grade Schools there were 785,473 scholars on the register, being a percentage of 17·18 to the population. The number of day schools receiving grants was 3149, of which 2793 were public schools, 20 Church of Scotland, 4 Free Church, 66 Episcopal, 192 Roman Catholic, and 74 undenominational and other schools. Of the scholars on the register 14,670 were between 14 and 15, and 6980 above 15. These figures include 4655 scholars in 36 Higher Grade Schools or Departments, of whom 2956 were under 15 and 1483 between 15 and 17, while 216 were over 17. The average attendance for the whole number was 85·21 per cent., and for the Higher Grade Schools taken separately, 97·0. The Higher Grade Schools provide a regularly organised course of instruction extending over at least three years, and possess a correspondingly more numerous staff and special equipment. It is found that of the scholars who attend the first year's course 55·4 per cent. go on through the second year's course, and 38·7 per cent. go on through the third year's course. Instruction supplementary to the day school is now provided under the Continuation Class Code (see below, Secondary Education).

The amount of Parliamentary grants to day schools under inspection was £766,541; and the total cost of maintenance per child in average attendance was £2 18s. 8d. in public schools, and £2 8s. 6½d. in voluntary schools. Savings banks exist in 112 schools, and school libraries in 728.

The staff employed in teaching the 664,741 children in the ordinary day schools consisted of 12,105 certificated teachers, 2555 male and 205 female assistant and 6145 pupil-teachers, and 6 monitors—total 19,126. The supply of teachers is drawn mainly from 8 Training Colleges, 3 of which are connected with the Church of Scotland, 3 United Free Church, 1 Episcopal and 1 Roman Catholic. In these Training Colleges there were 1385 students, of whom 465 were taking advantage of the arrangement by which they might—at the expense of the colleges—attend certain university classes as a part

of their curriculum. There is also provision made by the Code for 1895 for a class of students called "King's Students," who receive the chief part of their instruction at the universities. The total number of King's Students in 1903 was 193.

Under the Education of Blind and Deaf-mute Children (Scotland) Act, '90, the school boards pay from £10 to £20 each for the instruction of 215 deaf-mute, 131 blind, and 2 both blind and deaf-mute children. Thirteen institutions not otherwise on the grant list, and 25 ordinary annual-grant schools, with special provision for the instruction of such children, are under inspection in various parts of Scotland. Grants were paid at the rate of £3 3s. in each case for 682 ordinary scholars, and a further grant of £2 2s. each for 675 scholars who had made satisfactory progress in manual instruction.

On account of the difficulties in the administration of the Education Acts in the Highlands and the Islands, extra grants, amounting to £10,814, have been paid to 695 out of 706 schools inspected.

### 2. Secondary and Technical Education.

The number of secondary schools now under inspection is 100, of which 32 are Higher-class Public Schools, 24 Endowed Schools, and 44 schools under voluntary managers who have invited the inspection of the Department. In connection with the inspection of higher schools an important feature is the Leaving Certificate Examination, which is accepted by a large number of university and professional authorities in lieu of preliminary examinations held under their directions. In 1903, Leaving Certificates were granted to 398 candidates, and Intermediate Certificates to 750. The minimum age for Leaving Certificates is 17, after four years' instruction at a recognised school, and for Intermediate Certificates 15, after two years. The cost of inspection of higher-class schools and of the Leaving Certificate Examination is mainly met from the money available under the Education and Local Taxation Account (Scotland) Acts, from which also large grants are made to Higher-class Secondary and Technical Schools, and to Agricultural Education.

Under the Continuation Class Code, grants to the amount of £104,391 were paid on account of 81,681 pupils who had already completed their day-school course. The grants for Science and Art instruction in Secondary Schools amounted to £13,937, for 4,599 students. One-fourth of the expenditure for Continuation Classes has to be provided locally, and is derived from the residue allotted to town and county councils under the Local Taxation (Customs and Excise) Acts.

Grants were made to three Agricultural Colleges for the purpose of fostering the scientific study of agriculture by a select body of students, and also of ensuring the making of the results of scientific research known as widely as possible. The following grants were made: The Agricultural Department of Aberdeen University, £500; Edinburgh East of Scotland College of Agriculture, £1650; West of Scotland Agricultural College, £2041; expenses of inspection, etc., £64 17s. 6d. These are the figures for 1902-3, the latest published.

Improvements have been made in the Edinburgh Museum of Science and Art. The staff

has been increased, the entrance fee abolished, and the museum is now opened for three hours on Sunday afternoons. Additions have also been made to the museum library.

### III. IRELAND.

In Ireland, elementary education is under the control of eighteen Commissioners of National Education, with an office in Dublin. Mr. W. J. M. Starkie, M.A., Litt. D., is Resident Commissioner, and Messrs. P. E. Lemass, I.S.O., and W. J. Dilworth are Secretaries. Chief Inspectors, E. Downing and A. Purser.

For secondary education there are (a) a Board of Commissioners of Education and (b) an Intermediate Education Board.

#### 1. Elementary Education.

The Commissioners of National Education in Ireland, in the latest report issued previous to our going to press, state that in 1902 there were 8712 schools in operation, with an average of 747,864 pupils on the register, and an average daily attendance of 487,098, of whom 11,070 were above fifteen years of age. The daily attendance showed an average of 65·1 per cent. of the number on the register. The religious denominations of the pupils were: Roman Catholics, 550,185, or 74·7 per cent.; of the late Established Church, 88,528, or 12·0 per cent.; Presbyterians, 83,149, or 11·3 per cent.; Methodists, 9066, or 1·2 per cent.; of other denominations, 6158, or 0·8 per cent. In 2077 schools under Roman Catholic teachers exclusively, 5·1 per cent. of the pupils are Protestants; in 875 schools under Protestant teachers exclusively, 9·3 per cent. of the pupils are Catholics; and in schools under Roman Catholic and Protestant teachers conjointly, 68·6 of the pupils are Roman Catholics and 31·4 per cent. are Protestants. There are 5722 schools attended solely by one denomination; 4199 schools with 367,807 pupils being Roman Catholic, and 1523 schools with 116,521 pupils, Protestant. Exclusive of Model and Poor-Law Union Schools (where the management is official), there are 7644 under clerical management and 873 under lay management. Besides the ordinary schools, there are 30 model schools, with an average of 8969 pupils on the rolls and a daily attendance of 6550. Convent and Monastery Schools number 373, with an average of 110,769 pupils on the rolls and an average daily attendance of 77,240 or 69·7 per cent. of the number on the rolls. 147 Workhouse Schools were in operation, with 4450 on the rolls and an average attendance of 3645. Grants were made to 1036 Evening Schools, in which most of the pupils are over 14 years of age, and many are adults.

The gross total of teachers was 12,997, of whom 8253 were principals, 3724 assistants, and the rest junior, manual, and industrial teachers. This number does not include 295 convent and monastery teachers, and the teachers of workhouse schools. The percentage of trained teachers to the total was 55·2. There are 7 Training Colleges receiving grants.

The aggregate expenditure on the schools from all sources was £1,240,710, giving an average of £2 11s. 6d. for each child in attendance. Of this amount, £69,229 was received from subscriptions, endowments, and school pence. The grants to training colleges amounted to £53,130.

As the residue under the Local Taxation Act is not available for technical education, the Board of Education for England and Wales continues to allow the Irish science and art schools and classes to participate in the national competition and examinations in science and art under the Board. Local authorities also make grants out of rates under the Technical Instruction Act, '89, and the Public Libraries Acts.

#### 2. Secondary Education.

A Board of twenty Commissioners of Education (ten appointed by the Lord Lieutenant and ten by Local Boards of Education) administer certain educational endowments producing a total annual revenue of £7423. This sum is variously apportioned to eleven secondary schools, with a total accommodation of 1282 and a total number on the rolls of 671—an increase of 2 on that of the previous years.

The Intermediate Education Board is an examination Board, administering a large original endowment and an annual income derived from Local Taxation Duties. During 1903, 5987 boys and 1922 girls—total 7909—presented themselves for examination held at 235 centres. There passed 3746 boys, 1164 girls—total 4910—a percentage of 62·6 boys and 60·5 girls. Among the subjects in which the pupils were examined were Greek, Latin, English Composition and Literature, History and Geography, French, German, Irish, Italian, Spanish, Mathematics, Book-keeping, Short-hand, Music, Experimental Science, Drawing, etc. The cost of administration was £6633, of examinations £10,843, rewards £11,356, school grant £57,318.

### IV. REFORMATORY AND INDUSTRIAL SCHOOLS.

#### Great Britain.

There are, according to the 47th annual report, for 1903, of H.M. Inspector of Reformatory and Industrial Schools for Great Britain, 222 such schools—viz., 45 reformatory, 139 industrial, 14 truant and 24 day industrial schools, of which 2 are reformatory, and 8 industrial school ships. Of the industrial schools, 18 are managed by county authorities. The rest, as well as the reformatories, except the Glasgow Girls' Reformatory, are under voluntary management. The truant and all the day industrial schools are under the new education authorities. There were 27,873 (22,954 boys and 4919 girls) under sentence of detention in reformatories and industrial schools at the close of 1903, or a decrease of 963 boys and of 299 girls as compared with 1902. In addition there were 3396 children—27 fewer than in 1902—attending day industrial schools, and 272 children on licence from those schools. The amount expended on day industrial schools in 1903 was £39,269, as against £35,948 in 1902; on reformatory schools £133,002, as against £128,065 in 1902; and on industrial schools (including truant schools) £457,790, as against £463,729 in 1902. The amount recovered from parents, and in Scotland from parents and parochial boards, during the year for reformatory schools was £7438, an increase of £200 on previous year, and for industrial schools £21,477, an increase of £104 on previous year.

The figures show that the number of children in ordinary industrial schools remains almost stationary, but the number of children in truant schools shows a downward tendency. There was a total decrease of 267 admissions in comparison with the previous year.

### *Ireland.*

In Ireland there are 2 reformatory schools for Roman Catholic boys, 3 for Roman Catholic girls, and 1 for Protestant boys (none for girls). There were under detention in these schools, at the end of 1903, 556, showing a decrease of 5 as compared with 1902. Of these 393 were Roman Catholic boys, 49 Roman Catholic girls, and 114 Protestant boys. The number committed to reformatory schools during the year was 124, an increase of 6 over the previous year. The total cost, covered by Treasury grants, local rates, other sources, and industrial profits, was £14,625, a decrease of £383. There are in Ireland 67 industrial schools, with a total number of children in detention of 8324, of whom 3270 are Roman Catholic boys, 4126 Roman Catholic girls, 544 Protestant boys, and 384 Protestant girls. The cost of these industrial schools during 1902 was £152,318, a decrease of £4384. The income is derived from Treasury, local rates, other sources, and industrial profits. Among "other sources" were contributions from parents, £479 to reformatory and £1013 to industrial schools.

### V. HIGHER EDUCATION OF WOMEN.

The Higher Education of Women has made great advances since the Report of the Royal Commission on Secondary Schools was issued in 1868. The National Union for Improving the Education of Women, formed under the presidency of the Princess Louise, in consequence of that report, founded in '72 the Girls' Public Day School Company, which, with the Church Day Schools Company, has raised the standard of girls' education throughout the land, and prepared the way for the Higher—that is, University and College—Education of Women. These two Companies have now 64 schools and 1200 pupils, entirely taught and officered by women, many of whom have had a college training. Some of these schools, e.g. the G.P.D.S. Co.'s School at Clapham, are recognised by the Board of Education as training colleges for teachers for secondary schools.

### *Training Colleges.*

The National Union founded, in '77, the Teachers' Training and Registration Society, out of which has grown the Maria Grey Training College, Salisbury Road, Brondesbury (Principal, Miss Alice Woods). The Winkworth Hall of Residence for students in this College was opened in Sept. '99 (Warden, Miss Mabel Case); fees from 36 to 48 guineas per session. The Principal has a few bursaries to give to students who cannot afford the full fees. Students are not admitted under 19 years of age, and must already hold some recognised degree or certificate of knowledge. "Gilchrist" travelling scholarships for women teachers are offered at the college from time to time.

The Cambridge Training College for Women was incorporated Jan. '93 (Principal, Miss H. Powell). This college is one of the institutions formally recognised by the Order in

Council, Jan. 21st, 1902. Fee for the year's course of thirty weeks, £75.

The St. George's Training College, 5, Melville Street, Edinburgh (Principal, Miss M. R. Walker), was opened in '86. It offers "George Heriot" bursaries of £30 per annum for competition in September of each year among graduates entering on a course of study at the college. No student is admitted to the college in preparation for any teachers' examination unless she holds some recognised qualifying certificate. Fees, 21 guineas per annum. The St. George's High School for Girls is in connection with the college.

The London County Council Day Training College, attached to the University of London, was inaugurated Oct. 7th, 1902, to provide for duly qualified persons of either sex engaged in or intending to enter the teaching profession, or who are making a special study of the theory, history, and practice of education (Principal, Prof. Adams; Normal Mistress, Miss Margaret Punnett, B.A.). A hundred scholarships of £25 a year for men and £20 a year for women are awarded by the Technical Board of the London County Council. Application should be made to the Executive Officer, Education Office, Victoria Embankment, W.C. A permanent college building will shortly be erected in Southampton Row; the college is temporarily housed in 9, Southampton Street, High Holborn. Premises for the accommodation of students are being provided in the north of London.

A training college for teachers in secondary schools for girls was opened in 1902 by the Church Education Corporation at Cowley Grange, Oxford (Principal, Miss Mackenzie Smith). It has been renamed Cherwell Hall. Fees for teaching, board and residence, £65 per annum. There is a scheme of scholarships and bursaries and a loan fund. Apply to the Hon. Sec., Miss Margaret Bernard, High Hall, Wimborne.

The St. Paul's Girls' School, Brook Green, Hammersmith, W., on the foundation of the Worshipful Company of Mercers, was opened in Jan. 1904 (Principal, Miss Gray). Tuition fees, payable in advance, £7 per term.

St. Leonard's School, St. Andrews; Roedean School, Brighton; and Wycombe Abbey, Bucks, are large residential establishments founded to give to girls similar advantages to those open to boys in our great public schools.

Cheltenham Ladies College (Principal, Miss D. Beale, LL.D.), established 1854, incorporated 1880, prepares for the London B.A. or B.Sc. Examination. Girls under 18 reside in one of the 13 boarding-houses approved by the Council. Those over that age are in St. Hilda's, Cheltenham. Fees from £54 to 93 guineas. There is a foreign department and a department for the training of teachers.

### *University Education.*

Oxford and Cambridge now offer many facilities to women desiring advanced education. At Cambridge the triposes, or honour examinations for the B.A. degree in mathematics, classics, natural science, moral science, history, mediæval and modern languages, law, mechanical science, Semitic languages, Indian languages and theology, have, since '81, been open to such women as have passed a specified preliminary examination.

**Girton College** (Mistress, Miss Constance Jones) was founded at Hitchin in '69, removed to Cambridge in connection with the Association for Women's Lectures in Cambridge, and incorporated in '72. It now numbers about 137 students, with seven resident women lecturers, a vice-mistress, a junior bursar, and a librarian. Entrance and scholarship examinations are held in London in the months of March and June. Fee £1. The income from the Pfeiffer Bequest of £5000 is devoted to scholarships. Students can attend University lectures in Cambridge, in addition to those provided by the college. The college fees (inclusive of both university and college charges) are £105 per annum. The College has recently been enlarged, and a chapel added.

The South, now called "Old" Hall, **Newnham College**, Cambridge (Principal, Mrs. Sidgwick), was opened in '75, and incorporated in '80. The North, now called "Sidgwick" Hall (Vice-Principal, Miss B. A. Clough) followed in '80, Clough Hall in '88, and the Pfeiffer building in '93; 150 students and 12 resident tutors form the collegiate body. A beautiful and convenient library, the gift of Mr. and Mrs. Yates Thompson, has been added to the College. There is a small hospital for infectious diseases. An entrance examination is held annually in March at Cambridge in mathematics and languages. Scholarships and exhibitions are awarded yearly to students for the various tripos examinations. No student, unless reading for a tripos examination, with a reasonable prospect of obtaining honours, is allowed to reside at the college for more than two years without special permission. Fees, inclusive of board, lodging, and teaching, are from £30 to £35 per term. Women are admitted by the Council as out-students of the college if they either (a) reside with their parents or guardians in Cambridge, or (b) are not generally resident in Cambridge, but are *bona-fide* students, pursuing definite study, over thirty years of age, unable to afford the cost of residence in one of the halls, or in other exceptional circumstances, and accustomed to support themselves. Out-students' fees are about £12 per term. Application for admission as out-students should be made to the Principal, Newnham College, Cambridge.

In Oxford the principal honour examinations of the University (in classics, natural science, history, mathematics, jurisprudence, theology, Oriental studies, the degree of B.C.L., the examinations for the degrees of Bachelor and Doctor of Music, and, since May 1903, the School of Modern Languages), are open to women. The second public examination (pass degree) of the University is open to women, as well as Pass Moderations. Certificates are awarded as the result of the examinations, and in the case of honours the names are entered in the *University Gazette*; but the B.A. degree is not conferred upon women. The University, in '97, established in Oxford a professional examination for teachers, and arranged a course of training in Theory and Practice of Teaching. To these women are admitted on precisely the same terms as men (apply to Miss A. J. Cooper, 22, St. John Street). The "Philip Walker" Studentship in Pathology, of the annual value of £200, tenable for three years, is not confined to members of the university, and is open without limitation of age or sex. Women students of Oxford

have now special privileges in regard to degrees in Trinity College, Dublin University.

**Somerville College**, Oxford (Principal, Miss Maitland), founded in '79, incorporated in '81, the name changed from "Hall" to "College" in '94, has 80 students, 5 resident tutors, and a librarian. There is no entrance examination, but all students are expected to pass "Responsions" before entering the college, unless they have passed one of the examinations accepted as equivalent. In all cases two languages and Mathematics are required. Fees, inclusive of board, lodging and teaching, vary from £86 to £92 per annum, according to the rooms selected. The college is undenominational in principle. The Council confers certificates showing all the examinations passed by the student, recording the term of residence, and stating that the student has qualified for the degree. A new library and additional students' and tutors' rooms were opened by the Rt. Hon. John Morley, M.P., in June, 1904. Miss Cornelia Sorabji, L.L.B. Bombay, sometime of Somerville College, was (1904) appointed Legal Adviser to the Court of Wards, Bengal, to safeguard the interests of "Purdah" ladies. Scholarships and exhibitions are competed for annually in April. All scholars are expected to work for the Honours examinations of the University of Oxford. A Fellowship of £100 per annum, open to women who have resided 12 terms in Oxford and taken an Honours Examination, was subscribed for in 1903 by friends of the college, and is in the gift of the Council.

**Lady Margaret Hall**, Oxford (Principal, Miss Wordsworth), was also founded in '79. It is conducted on the principles of the Church of England, with provision for the liberty of members of other religious bodies, and numbers about 54 students and 3 resident tutors. Candidates for entrance, who have not yet passed Responsions, or an equivalent, are expected to pass an entrance examination in two foreign languages and elementary mathematics. Scholarships are offered each June.

**St. Hugh's Hall**, Oxford (Principal, Miss Moberley), founded in '86, has room for 34 students. The fees for board, lodging, and tuition are from £70 to £90 a year. The conditions of entrance are the same as for Lady Margaret Hall. The Hall is intended for members of the Church of England.

"**St. Hilda's**" (Lady Resident, Mrs. Burrows) is a Hall of Residence founded in '93 by Miss D. Beale, LL.D., Principal of Cheltenham Ladies' College, and enlarged in '95, for old Cheltonians and others who may desire a year or more of study before entering on professional work. Twenty-five students are now in residence. The charges are similar to those at Somerville College.

Lecture arrangements for women in Oxford are under the management of a joint association for educational purposes, consisting of representatives of the women's college or halls of residence, and of the home students, with the tutors in the principal subjects, and others interested in education. A member of the Hebdomadal Board sits as a member of this association (Secretary, Miss A. M. A. H. Rogers, 39, Museum Road, Oxford). Unattached students are allowed, under certain conditions, to reside in Oxford under the censorship of

Mrs. A. H. Johnson, 8, Merton Street. A system of teaching by correspondence (apply to Mrs. A. H. Johnson) was set on foot in '83.

The University of London (see UNIVERSITIES) confers its degrees equally upon men and women. Women students are received at the **Royal Holloway College**, Egham, opened in '87 (Principal, Miss Emily Penrose). The object of the college is to provide the instruction necessary for the London degrees in science and arts, the preliminary M.B., the examinations of the University of Oxford and of the Royal University of Ireland. Instruction in music, drawing, and painting is provided. The entrance examination, held in July, includes English, foreign languages, and arithmetic. Scholarships are competed for in July. All scholars must read for Honours. Other students are under no such restriction. There are 143 students, 10 resident women lecturers, and 12 non-resident professors and teachers. Terms, inclusive of board, lodging, and instruction, are £90 per annum. No student may enter for less than one year, or reside for more than four years, without special leave. Non-resident students must in general reside with their parents or guardians. Fee £10 a term. They are required to pass an entrance examination. The college is a recognised "school" of the London University.

**Bedford College**, London, incorporated '49 (Principal, Miss Ethel Hurlbatt), offers scholarships and prepares resident and non-resident students for the London degrees in arts and science. By the "University of London Act," Bedford College became a "school" of the University. The final courses in Chemistry and Physiology are recognised as qualifying for the first M.B. Lectures are given in all branches of general and higher education. Fees for board and residence from £58 to £68 per annum. Tuition fees for the London examinations from £27 to £48 a session. Students are not received into residence under seventeen, and, if necessary, have their acquirements tested by preliminary examination. An art school (Prof. George Thomson) is attached to the College, as well as a Teachers' Training Department (Head, Miss Mary Morton). Special facilities are now given to foreign students. It is proposed to acquire a new site and buildings for the college, which now has about 265 resident and non-resident students. Meanwhile an extra house (No. 7, York Place) has been opened by the college.

The Women's Department of King's College, Kensington Square (Vice-Principal and Secretary, Miss L. M. Faithfull), provides lectures and classes as preparation for the London and Oxford examinations. The Art School, under Mr. Byam Shaw, R.I., and Mr. Vicat Cole, R.B.A., has been entirely reorganised during the year 1904, and the studios improved. A special course of Biblical study (arising out of the Vacation Courses held in Oxford 1903 and Cambridge 1904) is arranged for the session 1904-5. A residence for 25 students is under the charge of Miss E. Faithfull, King's Hall, 32, De Vere Gardens. A Physics Laboratory for students of the Intermediate B.Sc. Examination is now fitted up. Advanced students for the final B.Sc. do their work at the College Laboratories in the Strand. King's College, by the Act of '98, is a "school" of the University of London in all its faculties, and matriculated students of the Women's Depart-

ment rank as "internal" students of the University.

**Westfield College**, Hampstead, founded in '82 (Mistress, Miss Maynard), receives about 40 students; but they are not compelled to take the entire course, or to enter for any University examination. Candidates are required to pass an entrance examination in Scripture, English, arithmetic and geography, with two extra subjects (languages and mathematics), unless they have passed some equivalent. Fees, £105 per annum. Scholarships are competed for each year in June. Since July 1902 Westfield College has been admitted as a "school" of the University of London in the Faculty of Arts. A new library and lecture-rooms were finished and ready for use in Nov. 1904. Students of University College, London, the London School of Medicine for Women, or of the Slade School of Art, can reside, under collegiate rules, at **College Hall**, Byng Place, Gordon Square (Principal, Miss Melhuish, B.A.). Two Pfeiffer Scholarships are given in connection with residence at College Hall. There is accommodation for about 40 students. The lectures and laboratories of University College, London, are open to women. Apply to the Lady Superintendent, Miss Morison. There were about 400 women students during the session 1903-4.

The London School of Economics, Passmore Edwards Hall, Clare Market, W.C., provides teaching, and prepares men and women for examination in all subjects connected with commerce, industry and kindred subjects. Fees £10 per session. Apply to the Director, H. J. Mackinder, Esq., M.A. A students' library and common room are provided.

The London School of Social Economics, for men and women, is established at the Caxton Hall, Westminster (Hon. Sec., Mrs. G. F. Hill). Examinations are held and certificates given. Fees, £12 12s. per session, or £5 per term.

**Victoria University** follows the example of London in conferring its degrees upon women. (Secretary of the Women's Department, Miss Edith Wilson, 223, Brunswick Street, Manchester.) A hall of residence (Ashburne House, Victoria Park, Manchester) (Warden, Miss H. Stephen) was opened in Oct. '99, completed in 1901. Fees for board and residence 12 to 20 guineas per term of 11 weeks. Three bursaries are offered.

The University of Liverpool's charter provides that all courses shall be open to women. An enlarged Hall of Residence for women students is now open at Beech Hill, Fairfield. Fees £40 to £55 per session. Warden, Miss M. E. Tabor. The University of Birmingham grants degrees to women, and has recently (Oct. 1904) opened a University House for women students at 215, Hagley Road, Edgbaston (Principal, Miss S. M. Fry). The provincial colleges of Bristol and Nottingham also provide for women (Warden of the women students at Bristol, Miss Earle). No halls of residence as yet. The University of Durham, since '95, by special Supplementary Charter, grants degrees to women except only in Divinity. A women's hall of residence was opened in Oct. '99 and enlarged 1902 (Warden, Miss Elizabeth Robinson, The Abbey House). Scholarships for women students are offered in June of each year. Apply to the Censor of Women Students, Mrs. Ellershaw, 46, North Bailey, Durham. The Durham College of Science at Newcastle-on-Tyne (Secretary, H. F. Stock.

dale), represents the faculties of science, medicine, and engineering in the University of Durham, and is open to students of either sex. A University Hostel for women is open at **Eslington Tower**, Jesmond, [Newcastle-on-Tyne (Mistress, Miss Perry). Fees for board and residence from 40 guineas per session.

In **Ireland** the Royal University of Ireland (Dublin) offers degrees to women, and also exhibitions and scholarships. Women students are received at **Alexandra College**, Dublin (Warden, The Very Rev. the Dean of the Chapel Royal), founded in '66, the degrees of the University opened to it in '78. During the year 1904 a great change has taken place in University Education in Ireland by the opening of Trinity College, University of Dublin (in consequence of a letter from King Edward VII., Jan. 1904, following on a recommendation of the report of the Irish University Commission, issued March 1903) with its degrees, teaching and prizes to women. Women students or graduates of other universities are entitled to every privilege granted to men of the same standing. The "King Edward" prize is given annually to the student who makes the highest total of marks in the examination for the degree of B.A.

In **Scotland** the classes of the University of St. Andrews, both professorial and tutorial, in Arts, Divinity, Science, and Medicine are open to women students, and the University confers all degrees upon them on the same terms as upon men. The diploma of LL.A. is also granted to them. **University Hall** (Warden, Miss Frances H. Melville, M.A. Edin.), opened Sept. '96, accommodates 24 students. Fees for board and residence about £60 per annum. Scholarships, value from £40 to £15, are competed for in October. There is no entrance examination to the Hall, and students may come into residence to prepare for the Preliminary Examinations of the University. Mr. Andrew Carnegie, Rector of the University, in Oct. 1902, gave £1500 for a Union for the women students. The authorities purchased on behalf of these students a house—79, North Street—previously known as St. Kentigern's Hostel. The house is close to the United College.

At **Edinburgh University** women are admitted to the Arts classes with the men, and on the same terms as regards academic privilege. **Masson Hall**, 31, George Square, Edinburgh, opened in '97, is intended for the accommodation of women students of the University (Warden, Miss F. H. Simson, M.A.). The **Muir Hall** of Residence, 12, George Square, Edinburgh (Lady Superintendent, Miss Robertson), is a residence for women students of medicine in the University.

**Queen Margaret College, Glasgow** (Hon. Secretary, Miss J. A. Galloway), by incorporation in '93 is now the women's department of the University of Glasgow as a non-resident college for women governed by the University Court and Senate. Women are there prepared for all degrees in arts and medicine of Glasgow.

**Queen Margaret Hall** (Lady Superintendent, Miss C. M. Birrell), with an average of 33 students, provides a residence for students attending Queen Margaret College. Clinical work is done at the Royal Infirmary and other local hospitals. Terms for board and residence from £32 to £40 per annum. In the Scotch Universities both men and women students

alike benefit by the provisions of the "Carnegie Trust" (1901). See **UNIVERSITIES**.

In **South Wales** the classes of University College, Cardiff, in arts, science, and medicine are open to women students, and the degrees of B.A., B.Sc., M.A., D.Sc. of the University of Wales are conferred upon them. Students can take the first two or three years of a medical course and proceed to the Universities of London, Edinburgh, Glasgow, etc. Dispensary classes can be attended at Cardiff Infirmary. There are Secondary, Elementary, and Kindergarten Training Departments. Entrance scholarships of the value of £42 and under are competed for annually. In connection with the college is the **Aberdare Hall** of Residence for women students (Principal, Miss Kate Hurlbatt) which is now (1904) being enlarged and will accommodate 60 students. Terms for board and residence £32 to £42 10s. per annum. College fees in Arts £10, in Science 13 guineas per annum. By a regulation of the Council of University College both men and women students now wear academic dress.

The **University College of North Wales** (Bangor) gives the same advantages to women as to men in preparation for the London and Welsh degrees and for the medical preliminaries of Edinburgh and Glasgow. A new University Hall for Women Students (Warden, Miss Hilda Lane), was opened in '97. Open entrance scholarships (from £30 to £10 in value) are offered to men and women alike.

**University College, Aberystwyth**, prepares for the requirements of the London and Welsh examinations for B.A., M.A., B.Sc., for degrees in medicine, and the entrance examinations of the older universities. Entrance scholarships, open to women, are competed for annually. **Alexandra Hall** of Residence (Principal, Miss E. A. Carpenter) has rooms for 207 students.

### Medical Training.

For the special study of medicine, women are eligible for the medical degrees of the University of London (South Kensington, S.W.), the Royal University of Ireland (Earlsfort Terrace, Dublin), the conjoint examination of the Royal College of Physicians and the Royal College of Surgeons in Ireland (Dawson Street, Dublin), the Colleges of Physicians and Surgeons, **Edinburgh**, the Faculty of Physicians and Surgeons, **Glasgow** (conjoint), the Society of Apothecaries, London, and the University of Durham. It is easier, and takes a shorter time, to pass the colleges than the Universities, but by the regulations five years is the required period for which a student must be registered as such. Students are not admitted under the age of eighteen, and, unless matriculation has been taken, a preliminary examination in English, Latin, and one other language, elementary mathematics, and arithmetic, has to be passed before registration. The necessary hospital work in the case of London can be done at the New Hospital for Women, 144, Euston Road, or at the Royal Free Hospital. Every medical student must apply for registration at the office of the General Medical Council, 299, Oxford Street, W., within 15 days after the commencement of professional study. The whole course of medical study for the Universities of London and Ireland, the Society of Apothecaries, and the conjoint colleges can be completed at the London School

of Medicine for Women (Secretary, Miss Heaton, 8, Hunter Street, Brunswick Square, W.C.). The greater part of the course for Durham and Glasgow can also be taken at this school. Students desiring to spend one year only at the Newcastle College of Medicine (University of Durham) are advised to take their fourth or fifth year here. The Universities of Calcutta, Madras, and the Punjab also accept the certificates of the school as qualifying for their examinations. Certain courses in Biology, Physics, Chemistry, etc., are open to ladies preparing for examinations in science. Ladies desiring to study medicine with a view to practice may, by permission of the Executive Council, attend certain classes upon payment of the fees, without passing the examination in arts. Art students are admitted to the classes of anatomy and practical anatomy. Graduates of foreign universities can occasionally be admitted to attend the hospital practice without holding a post, when the accommodation will permit. In Scotland and Ireland women students are admitted to the local hospitals. At the Royal Infirmary of Edinburgh arrangements are made for the clinical education of women, giving accommodation according to the demands of the Triple Qualification Board, £300 having been raised and presented to the Infirmary in recognition of the "fact that women students have been admitted to qualifying instruction in its wards." Valuable scholarships are annually competed for at the London School in September, and resident and other appointments at the Royal Free Hospital are open to students who have obtained their diplomas. Particulars may be found in the *Lancet* newspaper from time to time. In addition to College Hall (see above) there are eight sets of students chambers at the school, 8, Hunter Street, W.C. Apply to the Secretary, from whom also a list of lodging-houses in the neighbourhood can be obtained. Boarding-houses for medical students (women) at 3, Endsleigh Gardens, W.C. (Mrs. Greene) (fees, 20 guineas per term of 12 weeks), at 5, Endsleigh Street, W.C. (Mrs. Clarke Kerr), and at 23 and 32, Mecklenburgh Square, W.C. (Mrs. Wright) (fees, 15 to 18 guineas per term, with special arrangements for the vacation).

## VI. OPPOSITION TO THE EDUCATION

ACT, 1902.

### *Passive Resistance Movement.*

During 1904 the spirit of Nonconformist opposition to the Education Acts remained unchanged. The policy of Passive Resistance was maintained in the provinces with increasing numbers and determination. Owing to the operation of the Act in the Metropolis the movement extended there, and many well-known Free Churchmen, like Dr. Clifford, Dr. Horton, Rev. F. B. Meyer, B.A. (President of the National Free Church Council), and Rev. J. H. Shakespeare, M.A., appeared before the magistrates for refusing to pay the sectarian portion of the education rate. At the time of going to press the statistics of the movement were as follows: Summonses, 138,345; sales, 1500; imprisonments, 75.

Included in those who have suffered imprisonment there are: Mr. W. A. Parker (third time), Alderman O'Connor, Rev. Udy Bassett (Bible Christian), Rev. W. H. Higgins (Baptist),

Rev. J. B. Anderson (Baptist), Rev. Thomas Champness (Wesleyan), Rev. Freer Bell (Primitive Methodist), Rev. J. S. Finch (Bible Christian), Rev. J. Shepherd (Primitive Methodist), Rev. A. W. Galpin (Congregational), Rev. W. S. Stanwell (Primitive Methodist), Mr. Edwyn Holt (Liberal candidate for the Wirral Division of Cheshire), Rev. Sydney Harris (Wesleyan), Rev. G. Baldwin (Primitive Methodist), Rev. S. S. Henshaw (Primitive Methodist), Rev. Peter Miller (Baptist), Rev. A. O. Shaw (Baptist), Rev. W. J. Potter (Baptist).

The churches which have contributed the largest proportion of adherents to the Passive Resistance movement during the year are the Baptists and Primitive Methodists, and in like proportion they have found more "prisoners." The Congregationalists at first did not join prominently in the policy, but a considerable number of well-known men in their ranks are now supporting it, including Dr. Goodrich (the Chairman of the Union), Rev. J. A. Mitchell, B.A. (Secretary), Dr. Horton, Rev. H. Arnold Thomas, M.A., Dr. A. Rowland, Dr. Barrett, Mr. Albert Spicer (ex-Chairman), and the Rev. R. J. Campbell, M.A., J. H. Jowett, M.A., Rev. C. Silvester Horne, M.A., and the Rev. J. D. Jones, M.A. At present the Wesleyans, as a church, remain in the opposite camp, though there are notable exceptions, like the Rev. Thomas Champness and Dr. Wenyon. The Acts have also called forth opposition from some Churchmen, who refuse to pay a portion of the education rate.

Various legal points raised during the controversy were settled during the year. The overseers in East Ham, who refused to take part payment of the rates and challenged the decision of the Stipendiary when he advised that this plan should be adopted, lost their case in the High Courts. Passive Resisters have, in most instances, been unsuccessful in attempting to prove excessive distraint. A notable exception was the Ringmer case, where a large amount of household furniture was seized for an unpaid rate of 15s. Objection was taken to the votes of Passive Resisters at several revision courts in September, on the ground that as the whole of the rates were not paid the franchise could not be maintained. Where the point was raised the decision of the Revising Barrister went against the Resister, with a few exceptions mentioned below. Throughout the whole of the country (it is estimated, about 160 disfranchisements occurred, principally in the following towns: Scarborough, 55; Newcastle-under-Lyme, 7; Tottenham, 20; Southgate, 1; Fulwood, 3; Oldham, 1; Marlborough, 12; Stafford, 25; Hereford, 12; Woodstone, 1; Gloucester, 2; Southampton, 1; Beckenham, 1; Fulham and Burnham, 1; Stockton Heath, 1; Long Sutton, 2; Whitstable, 1; Chumleigh, 2; Portsmouth, 1; Richmond (Yorks), 1; Blandford, 1; Hasland, 2; Peterborough, 1. In six districts—Clayton-le-Moors, Winchester, Blandford, Bristol, St. Leonards, and Andover—the Revising Barristers decided against the objectors, mainly upon the grounds stated by Mr. Joseph Sharpe, the revising barrister at Clayton-le-Moors, Accrington, who said that, in his opinion, the education rate did not come within the meaning of the statute specifically disfranchising a person for not having paid the poor rate. What was called the "poor rate" was here, as in other places, made up of rates for the relief of the poor,

county council rates, etc., but on the Clayton-le-Moors demand note the education rate appeared as a separate item. It was collected along with the poor rate for the sake of convenience, but was separable, and not, therefore, poor rate in the legal sense of the term. The Elementary Education Act of 1870 made it clear, in his judgment, that the rate was not a disqualifying one. Sect. 33 gave powers for the overseers to collect money for educational purposes outside boroughs, but sect. 10 read as follows: "The parent, not being a pauper, of any child who is unable, by reason of poverty, to pay the ordinary fee for such child at a public elementary school, or any part of such fee, may apply to the guardians having jurisdiction in the parish in which he resides; and it shall be the duty of such guardians, if satisfied of such inability, to pay the said fee, not exceeding threepence a week, or such part thereof as he is, in the opinion of the guardians, so unable to pay. The parents shall not by reason of any payment made under this section be deprived of any franchise, right, or privilege, or be subject to any disability or disqualification." Acting upon this principle he could not possibly hold that any person was debarred from a vote by refusing to pay the education rate under the Act of 1902. The Scarborough Resisters took the case to the High Courts, but the decision of the Revising Barrister was upheld.

The organisation responsible for the propagation of Passive Resistance principles is the **National Passive Resistance Committee**, Memorial Hall, Farringdon Street, E.C.: **Chairman**, Dr. Clifford; **Secretary**, Mr. James Everett.

#### **Wales and the Education Act.**

The opposition in Wales to the Education Act, and the determination to resist it until the complete control and management of all schools should be vested in the bodies levying the education rate, was persevered in during 1904. On March 1st, 1904, the only county councils which had not passed a resolution to withhold the rate from the non-provided schools were those of Breconshire and Radnorshire. The County Council Elections in March resulted in the return of majorities in favour of the "no rate" policy in every case, and afterwards every county and town council in Wales, except Carmarthen and Wrexham, carried "no rate" resolutions. A meeting of delegates from the county, borough, and urban district education authorities was held at Llandrindod Wells on April 5th, and "re-affirmed the protest of the nation against the provisions of the Act, recorded its unalterable decision to so administer the Act as to minimise the injustice without inflicting any avoidable hardship upon non-provided schools, and pledged itself to resist attempts to compel Welsh councils to enforce demands which involve inroads on the fundamental rights of British citizenship and invade the sacred domain of conscience."

The action of the Government in face of this attitude was the introduction and passing of the Education (Local Authority Default) Act, 1904, for particulars of which (and of the Bishop of St. Asaph's Bill), see SESSION.

The "plan of campaign" by which this Act was met was described in an official manifesto issued after the Welsh National Convention at Cardiff on Oct. 6th. The manifesto first

described the manner in which the Act would operate.

"Under the Education Act, 1902, all grants earned by all schools, Church and council alike, are paid to the council. The council now devotes to the maintenance of Church schools every penny of grants earned by them, and they thus as a rule receive more money than they ever did before for school maintenance. But this does not satisfy the parson's greed. Like the daughter of the horseleech, his cry is ever 'Give, give.' However much may be given him, the Coercion Act now empowers the Board of Education first to retain in its own hands all grants earned by all the schools of a county; secondly, to hand over from that fund whatever sums the parsons may require for the maintenance of Church schools; and, thirdly, to pay the councils for the purposes of Church schools only what remains."

"The plan of campaign" was thus outlined. "In considering the plan of campaign we must remember that the whole object of the present struggle is to prevent the parson seizing grants earned by our children. While these children attend public elementary schools they will be earning grants. While they earn grants the parson possesses power to steal the money. Therefore the only way open is to prevent our children attending grant-earning schools. This involves the closing of the council schools and the withdrawal of all children possible from Church schools. But let there be no apprehension for the children. We are not going to leave the children. We shall open a free school for all children in every town, village, and neighbourhood. These schools will be held in the Nonconformist chapels or school-rooms attached thereto. Teachers formerly employed in council schools will be engaged for these schools. No child shall be deprived of educational facilities, and the education imparted will be efficient. Indeed, the moral influence of education imparted under such circumstances will be incalculable. A whole generation will be reared in the healthy atmosphere of an energetic struggle for religious and civil rights. These schools, however, will earn no grants, and funds for their maintenance will be necessary. Such funds can only be secured by voluntary contributions. English Nonconformists promise us substantial assistance, but we must do our part. This plan will only be adopted in the particular county which the Government may attack under the Coercion Act. The other counties can assist by contributing to its education funds."

Another feature of the year was the establishment of a **National Council of Education for Wales**, representative of all the local education authorities in the principality, which the majority of the councils had adopted by Dec. 1904. The scheme, which was sanctioned by the Board of Education, provides that the members of the Council, numbering 60 in all (51 elected and 9 nominated, including 2 women) shall be appointed annually for a year, ending on May 1st in the year after election. The matters referred to the Council are "matters relating to the training of teachers and the examination and inspection of schools together with such other matters as the combining councils may, with the sanction of the Board of Education, from time to time determine." The representation is based on the population of the districts of the combining councils.

## EDWARD VII.

Edward VII., "by the Grace of God of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas King, Defender of the Faith, Emperor of India," was b. at Buckingham Palace, Nov. 9th, 1841; created Prince of Wales and Earl of Chester, by patent under the Great Seal, on Dec. 4th of the same year; baptised at St. George's Chapel, Windsor Castle, Jan. 25th, '42. Ed. at Christ Church, Oxford (D.C.L. '68), and at Trin. Coll., Camb. (LL.D.), and Edin. Univ. (LL.D.); also LL.D. Dublin ('68), and Calcutta ('74). He is colonel-in-chief of 1st and 2nd Life Guards, Royal Horse Guards, Royal Regiment of Artillery, and the Corps of Royal Engineers, colonel 10th Hussars, hon. colonel of the Oxford and the Cambridge University Corps, of the Middlesex Civil Service Corps of Rifle Volunteers, of the 3rd Batt. Gordon Highlanders, and the Sutherland Highland Rifle Volunteers, hon. admiral of the Fleet. He holds the rank of field-marshal in the German and Austro-Hungarian armies, and is colonel-in-chief of the 1st Dragoon Regt. of the Guard and the 5th Pomeranian Blücher Hussars in the German Army. He is also colonel of the Austro-Hungarian 12th Regt. of Hussars. Admitted to the Middle Temple, called to the bar and to the bench of that Society (Oct. 31st, '61). His Majesty was an Elder Brother of Trinity House; also Grand Master of the United Grand Lodge of Freemasons of England ('74-1901); President of the Society of Arts and of St. Bartholomew's Hospital.

He married (March 10th, '63) H.R.H. the Princess Alexandra Caroline Mary Charlotte Louisa Julia, eldest daughter of Christian IX., King of Denmark, and sister of the ex-Empress of Russia and the King of Greece. On her marriage the House of Commons voted her an annual allowance of £10,000, and £30,000 in the event of her surviving the Prince. The King and Queen celebrated their silver wedding, '88. There have been six children born of the marriage—the Duke of Clarence and Prince Alexander, who have both died, the Duke of Cornwall and York, who is the heir-apparent to the throne, Princess Louise, Duchess of Fife, Princess Victoria, and Princess Maud, married in '96 to Prince Karl of Denmark.

The King's Civil List was settled by the Civil List Act, 1901, which adopted the recommendations of a Select Committee that sat during 1901 under the chairmanship of the then Chancellor of the Exchequer, Sir M. Hicks-Beach. A full report of the Committee's recommendations and a discussion of the whole subject appeared under Session, sect. 66, in the 1902 ed. The details of the Civil List and of the annuities paid to members of the Royal Family are given under FINANCE, NATIONAL, sect. III. The Queen receives £33,000 as her share of the Privy Purse. The contingent annuity of £30,000 formerly provided for Her Majesty the Queen Consort in the event of her surviving His present Majesty was increased to £70,000; and a contingent annuity of £30,000 was provided for H.R.H. the Princess of Wales in the event of her surviving H.R.H. the Prince of Wales. The King, in addition to his Civil List, receives the revenues of the Duchy of Lancaster (£61,000 in 1903), and the heir apparent those of the Duchy of Cornwall (£72,393 in 1903). Balmoral and Osborne were

bequeathed to the King by the late Queen, and His Majesty owns Sandringham. Balmoral and Sandringham are maintained out of the Privy Purse, but Osborne (Osborne House was given by the King to the nation in 1902) is charged upon the Civil List. His Majesty pays income tax on the Privy Purse, as did the late Queen.

In the winter of '71, while staying with his family at his country seat, Sandringham, Norfolk, His Majesty was attacked with typhoid fever, which it was feared would prove fatal, but after several weeks' prostration he recovered, and on Feb. 27th, '72, he attended a public thanksgiving in St. Paul's Cathedral. He visited Canada and the United States in '60, and the Holy Land in '62, and went on a tour through India in '75-6. In company with the Queen he made a tour through Ireland ('85), and met with a cordial reception. He evinced an active interest in the promotion of the series of Exhibitions held at South Kensington, and succeeded in establishing the Imperial Institute. In '93 he became a member of the Poor Law Commission; and in '94 did important service to his country at St. Petersburg, whither he went on the death of the Czar in November. During '96 His Majesty won the Derby and the St. Leger, the former victory exciting a scene of unparalleled enthusiasm at Epsom. In the Jubilee Celebrations of '97 His Majesty took a prominent part, especially in regard to the Prince of Wales's Hospital Fund for London. A young man named Spido shot at His Majesty as he was leaving the Nord Station at Brussels (April 4th, 1900), *en route* for Denmark. The bullet missed the King, fortunately. Spido alleged as his motive that he wished to kill His Majesty because he had caused thousands of men to be killed in South Africa. On the death of H.M. Queen Victoria (Jan. 22nd, 1901), His Majesty ascended the throne as King Edward VII., took the oath (23rd), and was proclaimed with the usual ceremonies (24th). In August the King and Queen were present at the funeral of the ex-Empress Frederick at Potsdam.

The Coronation Service was fixed for June 26th, 1902, but His Majesty was taken ill at Aldershot on June 15th, and had to cancel all public engagements prior to the Coronation festivities. On Monday, June 23rd, the King and Queen proceeded to London, but on the following day it was announced that the King was suffering from perityphilitis, and an operation was immediately performed. The King expressed the hope that the provincial celebrations would be held as arranged, and many of them were so held on June 26th, or shortly after that date; but they were greatly modified, and in many places abandoned, and in every place the Thanksgiving Services were turned into Services of Intercession. The list of Coronation Honours was published by especial command of the King, who also instituted an Order of Merit and a decoration for members of the Civil Service, called the Imperial Service Order. On Tuesday, July 15th, His Majesty was able to leave London and embark on the *Victoria and Albert* at Portsmouth, proceeding thence to Cowes. His convalescence progressed rapidly, and on Aug. 6th he proceeded with Queen Alexandra to London, and on the 9th the Coronation Service took place in Westminster Abbey. On Sunday, Aug. 10th, their Majesties, with the Royal Family, attended a

**Thanksgiving Service** at the Chapel Royal, and services of thanksgiving were held in St. Paul's Cathedral and throughout the Empire. The **Coronation Review of the Fleet** took place at Spithead on Aug. 16th; and a **Royal Progress** through London on Oct. 25th, followed by a **Thanksgiving Service** at St. Paul's on the 28th. The **King's Birthday** was celebrated at Sandringham on Nov. 9th, amongst the guests present being the German Emperor. The King of Portugal was a guest of the King at Windsor afterwards, arriving on Nov. 17th.

The year 1903 was one of **Royal visits**. Early in April the King visited **Portugal**, where he was the guest of King Carlos at Lisbon. After a brilliant week His Majesty proceeded to **Gibraltar** (April 8th), to **Malta** (16th), to **Naples** (23rd), to **Rome** (27th), where he stayed for some time with the King of Italy, and paid a visit to the Pope. From Italy he came to **France**, arriving at Paris May 1st, and leaving Cherbourg for England (5th). The results of this prolonged tour were most important, and were at once made manifest, home and foreign opinions uniting in a tribute to the great and beneficent influence exercised by the King in the domain of foreign affairs. The relations of Great Britain with Italy and Portugal were drawn closer and firmer, and a veritable *rapprochement* was brought about with France. In July **President Loubet**, accompanied by M. Delcassé, paid a return visit to His Majesty; in August His Majesty was received by the Emperor of **Austria-Hungary** at Vienna (31st), and in November the **King and Queen of Italy** were welcomed at Windsor. Nearer home, **Scotland and Ireland** were also visited, the former in May. A **Lévée** and a Court were held at Holyrood for the first time in more than eighty years. The Irish visit lasted from July 20th to August 1st.

In 1904 the King and Queen were present at the State opening of Parliament on Feb. 2nd. A visit was paid by their Majesties to **Denmark**, and lasted from March 28th to April 18th. A week later (25th) their Majesties left London on another visit to **Ireland**, where they again had a most enthusiastic reception. The first stone of the Royal College of Science at **Leinster Lawn, Dublin**, was laid by the King (28th). Afterwards they were entertained by Lord and Lady Ormonde at **Kilkenny Castle**, and by the Duke and Duchess of Devonshire at **Lismore Castle**, visiting the **Kilkenny and Waterford Agricultural Shows**. The return to London took place on May 5th. In June the **Archduke Friedrich of Austria** paid an official visit to His Majesty, and presented the insignia of his appointment as **Field Marshal in the Austro-Hungarian Army**. On June 23rd H.M. the King left London for **Kiel**, where he was received on the 25th by the German Emperor, and entertained during the progress of the **Kiel Regatta**. A visit was paid to **Hamburg** (28th), where His Majesty was entertained to luncheon at the **Rathhaus**, and the King returned to England on the 30th. In July the King and Queen attended in State at the ceremony of laying the foundation stone of **St. Bartholomew's Hospital** new building (6th), and the King sent a donation to the hospital of £1000. On the 19th the foundation stone of the new **Cathedral at Liverpool** was laid by His Majesty, who was accompanied by Her Majesty the Queen, their Majesties going on to cut the first sod of the **King's Dock at Swansea** (20th) and to inaugurate the **Birmingham Welsh Water Supply Scheme** at

**Foel**, near **Rhayader** (21st). In August His Majesty went to **Marienburg** for three weeks, and while there received a visit from the Emperor of **Austria**. The **King and Queen of Portugal** arrived at **Windsor Castle** (Nov. 15th) on a visit which, with intervals spent in other visits in England, lasted till Dec. 9th.

**Efficiency League**, founded 1903, "to raise the standard of duty among public servants." **President**, Mr. Arnold White; **Hon. Sec.**, Mr. W. H. Charnley; **Office**, Board-room, Lancaster Avenue, Manchester.

## EGYPT.

A state, nominally dependent on Turkey, under the rule of **Abbas Hilmi**, the seventh of the dynasty founded by **Mehemet Ali** in 1811. The first four rulers bore the title of **Vali** or **Viceroy**, but in '66 **Ismail**, then ruler, received from the Sultan the title of **Khedive** or king, and the succession was made direct from father to son, instead of descending, in accordance with the original treaty, to the eldest male of the family of **Mehemet Ali**. From '79 to '83 the country was under the dual control of **France and Great Britain**, but in the latter year **Great Britain** intervened after **Arabi Pasha's** rebellion, and since then has practically governed the country. The **British occupation**, at first regarded as temporary, has by force of circumstances become firmly established, and the predominant position of **Great Britain** was formally recognised by **France** in 1904.

By the **Anglo-French Agreement** (signed April 8th, 1904) **H.M. Government** declared that they had no intention of altering the political status of **Egypt**, and the **French Government** declared that they would not obstruct the action of **Great Britain** by asking for a time limit to be fixed for the **British occupation**, or in any other manner. The **French Government** also assented to very considerable modifications in the international arrangements established in **Egypt** for the protection of foreign bondholders, the modifications being contained in a draft **Khedivial Decree** annexed to the Agreement. The Decree gives the **Egyptian Government** a free hand in the disposal of its own resources so long as the punctual payment on the **Debt** is assured, and limits the functions of the **Caisse de la Dette** to receiving the assigned revenues on behalf of the bondholders, and ensuring the due payment of the coupon. The **Caisse** can no longer, under the Decree, interfere in the general administration of the country. Further, the land tax was assigned to the service of the **Debt**, instead of the **Customs duties** and railway receipts, and a sum of £5,500,000, which had accumulated in the coffers of the **Caisse** since 1890 from the economies of the conversion effected in that year, was set free to be used by the **Egyptian Government**. The provisions which required the consent of the **Caisse** to the raising of new loans, and which fixed a limit to the Government's administrative expenditure, were also abolished. **H.M. Government** declared their adhesion to the **Treaty of 1888** providing for the neutrality of the **Suez Canal** in time of war. The post of **Director-General of Antiquities** in **Egypt** is to continue to be entrusted to a **French savant**. **French schools** in **Egypt** are to enjoy the same liberty as in the past, the rights of **French officials** in the **Egyptian service** were safeguarded, and the principle of commercial liberty was laid down. The Agreement was

made binding for thirty years, with a provision for the extension of the period for five years at a time, unless this stipulation should be expressly denounced at least one year in advance. **Germany and other Powers**, including Austria-Hungary, Italy, and Russia, formally approved the Khedivial Decrees, and undertook not to obstruct the action of Great Britain in Egypt; while H.M. Government gave an assurance to those Powers that their commerce with Egypt should enjoy most-favoured-nation treatment for thirty years.

The Earl of Cromer is **H.M. Agent at Cairo**, and has a seat in the Council of Ministers, in which, with the Khedive, rests the real legislative authority. There are, however, provincial boards for local affairs, and a General Assembly and Legislative Council for national affairs, but with limited powers. The **General Assembly** consists of the Ministry, the Legislative Council, and 46 popularly elected members; its consent is required to new taxes, and it must be summoned every two years. The **Legislative Council** consists of 30 members, of whom 14 are nominated, and its powers are chiefly consultative. The judicial system is somewhat complex. The Consular Courts try cases of crime brought against foreigners; the Native Courts, instituted '84-9, are occupied with civil actions between natives, and crimes by natives; and there are also courts of religious law for Mahometans. The **Mixed Tribunals** were instituted in '75 as a substitute for the Capitulations, under which each country transacted its legal business in its own Consulate. They deal with civil actions between persons of different nationalities, or between natives and foreigners, and to some extent with criminal offences of foreigners. They were set up for a period of five years, and ever since have been renewed periodically for periods of five years. The Powers have agreed to the prolongation of the Tribunals for five years from Feb. 1st, 1900, pending the discussion by an International Commission of various reforms suggested by the Egyptian Government. One of the Government's main points is that the powers of the Mixed Tribunals should be limited so far as the Government's acts are concerned. The chief religion is that of Islam, the Moslems numbering nearly 9,000,000, but there are about 730,000 Christians, of whom 608,000 are Copts with the Patriarch of Alexandria at their head. There are many Government Coptic and Mahometan schools.

The **Egyptian army**, under strong leadership and the command of British officers, has shown excellent quality. All the inhabitants are liable for service—six years in the army, five in the police, and four in the reserve, and there are always about 150,000 young men on the rolls for conscription; but the burden is very light, and the men are all selected. The peace strength is about 9000 officers and men. The cavalry are recruited from the fellahen of the Delta. The infantry battalions are drawn mostly from the fellahen, but several are Soudanese blacks. The first are filled by conscription, and have about 800 men each, mostly fellahen, in 6 companies. The interior economy and drill of the recruits is excellent, and the musketry good. The arm is the Martini-Henry. In the Soudanese battalions the service is voluntary. This force was raised largely from the Khalifa's black riflemen, but men from Lower Egypt have been enlisted.

The artillery is the force that shows most markedly the impress of the European training. The horse battery has Syrian horses and light Krupp guns. The field batteries have Krupp mountain guns carried by mules, with a second line of camels. There is also a battalion of garrison artillery, organised as in our service.

The **Egyptian Army** has been reduced recently, owing to the smaller demand for its services, and some of the Soudanese have been disbanded. The command is vested in Major-Gen. Sir Reginald Wingate, with the title of Sirdar. The Intelligence Department reports the strength to be 18,273, including: cavalry, 789; camel corps, 629; Arab battalions, 206; artillery, 1258; infantry, 10,280.

The **British forces in Egypt** are 4 regiments of infantry, 1 of cavalry, 1 field and 1 mountain battery, and detachments of engineers, etc., with a strength of 5593 (including 124 Royal Malta Artillery) in 1904-5. The Egyptian Government contributes £87,000 annually towards maintenance of the British troops.

Length of railways in Egypt proper 2183 miles. Principal products, cotton, sugar, and cereals, about two-thirds of the population being engaged in agriculture. The fellahen, or small cultivators, receive advances from the **Agricultural Bank** up to £307 10s., or in a few cases to £512 10s., the loans being limited to 50 per cent. of the selling value of the land on which the advance is made. The Government guarantees interest at the rate of 3 per cent. on the Bank's capital, and the Bank charges 9 per cent. interest on its advances to the cultivators. The Bank takes all responsibility, but the Government through its tax-gatherers collects the money due to the Bank with the land tax. The Bank is under the auspices of the National Bank of Egypt, and has a capital of £2,500,000. On Dec. 31st, 1903, the outstanding loans amounted to £2,241,415, the average amount of each loan being about £27 15s. The development of the country's commerce and industry in recent years has been most marked, and her prosperity is steadily increasing. But the cultivated area can never extend beyond the region which is capable of being watered by the Nile. Lord Cromer's annual report for 1903 showed a surplus of £E744,000. He said that, besides the money spent on the maintenance and the clearance of lands, a sum of nearly £E10,000,000 had been spent on irrigation during the last 18 years, and all but £E2,000,000 of this was provided out of revenue. Further, the Suakin-Berber Railway, estimated to cost £E1,750,000, authorised by the Ministerial Council, would be paid out of the surpluses of past years. The material progress made during the last 20 years was remarkable, but a far greater degree of prosperity was attainable in the future.

**Area of Egypt** (excluding the provinces reconquered in the Soudan), 400,000 sq. m., of which about 12,976 sq. m. are settled. Pop. about 9,750,000, including about 113,000 foreigners, of whom 38,000 are Greeks, 24,000 Italians, 20,000 British, and 14,000 French. Cairo has a population of 570,000, and Alexandria of 320,000.

**Revenue**, 1902, £12,231,325; 1903, £12,775,300; **expenditure**, 1902, £10,291,000; 1903, £12,013,000; **exports**, 1902, £18,057,425; 1903, £19,596,462; **imports**, 1902, £14,566,275; 1903, £10,550,572; **public debt**, 1904, £102,187,000. The United Kingdom's share of the import trade was in

1902 36·7 per cent. and in 1903 35·3 per cent., and of the export trade 52·3 per cent. in 1902 and 52·6 per cent. in 1903.

**Ministry:** *President of the Council and Minister of the Interior*, Mustapha Fehmy Pasha, G.C.M.G.—*Foreign Affairs*, Boutros Pasha Ghaly, K.C.M.G.—*Finance*, Mazloum Pasha.—*Public Works and Instruction*, Fakhry Pasha, Hon. K.C.M.G.—*War*, Abani Pasha.—*Justice*, Ibrahim Fuad Pasha.

**Advisers to H.H. the Khedive:** *Financial*, Vincent Corbett; *Interior*, P. Machell.—*Judicial*, Mr. McIlwraith, C.M.G.; *Public Works*, Sir W. E. Garstin, G.C.M.G.

**Under-Secretaries of State:** *Finance*, A. Mitchell-Innes.—*Irrigation*, A. L. Webb.—*State Buildings*, Mr. Perry.—*Public Instruction*, Yacoub Pasha Artin.—*Postmaster-General*, Saba Pasha.—*Director-General of Customs*, A. Chitty.—*President of Railway Administration*, Major Johnstone, R.E.—*Controller-General of Accounts*, Harari Pasha.—*Director-General of Sanitary Department*, Sir Horace Pinching, K.C.M.G.

**British Commissioners:** *Caisse de la Dette*, Mr. H. de la Rosa Burrard Farnall, C.B., C.M.G.; *Domains Administration*, J. Gibson; *Daira Sanieh*, Dr. H. Crookshank Pasha.

**H.B.M. Agent and Consul-General**, Earl of Cromer, G.C.B., G.C.M.G., K.C.S.I., C.I.E., P.C., etc.—*Secretary of Legation*, M. de Cardonnel Findlay, C.M.G.—*Consuls*, A. D. Alban, Cairo; E. B. Gould, I.S.O., Alexandria; D. A. Cameron, Port Said.

**General Commanding Army of Occupation**, Major-Gen. Slade, C.B.

**Sirdar of Egyptian Army and Governor of the Soudan**, Major-Gen. Sir Reginald Wingate, K.C.B., K.C.M.G.

### Ruler.

**Abbas Hilmi**, eldest son of the late Tewfik Pasha, succeeded his father as the seventh Viceroy and third Khedive of Egypt Jan. 7th, 1892. He was b. July 14th, '74, and at the time of his father's death was studying at the Theresianum Academy at Vienna, where he had been for five years. He married Princess Ikbal Hanem, and has issue by her four daughters, a son and heir, Prince Mohammed Abdul Mohneim, born Feb. 20th, '99, and another son. He has a brother, Mohamed Ali, born in '75. His Highness's attitude to England during the earlier part of his reign was not a very friendly one, but he gradually came to see the real position of the country, and its dependence on England. He visited England officially in June 1900, and was warmly received, and again in 1903 and 1904. He has an annual allowance of £100,000.

### The Egyptian Soudan.

By the '96, '97, '98, and '99 campaigns the Government re-established its authority over the provinces in the Soudan, temporarily abandoned in '82 and '83, and during the rule of the Mahdi and the Khalifa. A convention between the British and Egyptian Governments, settling the details for the administration of the Soudan, was signed (Jan. 19th, '99). The supreme military and civil command is vested in a Governor-General appointed by the Khedive with the consent of H.M. Government. The importation and exportation of slaves is absolutely prohibited, and special attention is paid to the

enforcement of the Brussels Act of '90 as to the import, sale and manufacture of firearms and distilled or spirituous liquors. Import duties on entering the Soudan are not payable on goods coming from Egyptian territory, but such duties may be levied on goods coming from elsewhere than Egyptian territory, in the case of goods entering the Soudan at Suakin or any other port on the Red Sea littoral, not exceeding the corresponding duties for the time being leviable on goods entering Egypt from abroad. The Soudan has been divided into eight first-class provinces—viz., Khartoum, Gezira, Dongola, Berber, Senaar, Kassala, Kordofan and Bahr-el-Ghazal; and three second-class districts—viz., Fashoda, Wady Halfa, and Suakin.

An agreement was concluded between Great Britain and France (March 21st, '99), by which the Bahr-el-Ghazal and Darfur were recognised as being reserved to Great Britain, France keeping Wadai, Bagirmi, and Kanem; while from the Nile to Lake Chad, and between the 5th and 15th parallels of latitude, the two Powers mutually conceded equality of commercial treatment, France thus obtaining the right to establish commercial relations on the Nile and its affluents. On Dec. 12th, '99, the Soudan was declared open to all comers, and the railway from Khartoum to Cairo was completed. As to the Cape to Cairo Railway, see **ENGINEERING**. The Gordon Memorial College at Khartoum, opened Nov. 8th, 1902, aims at giving educational training specially adapted to the needs of the Soudanese, and a primary school system is being carried through. Area estimated at 950,000 sq. m., pop. at 1,870,500. Khartoum has a pop. of 8000 and Omdurman 48,000.

### Egyptian Irrigation.

The history and description of the great Assiout barrage and Assouan dam were given in our last and previous editions. The completion of the Assouan dam was announced on July 31st, 1902, the great enterprise being practically brought to a close eleven months earlier than contract time: though the formal opening by the Duke of Connaught was deferred to Dec. 10th. The Ziftah barrage, which is midway between Cairo and the sea, and forms a complement to those at Assouan and Assiout, was opened by the Khedive on March 7th, 1903. It is 408 yards long, and comprises 50 arches, each 16½ ft. broad; there is also a lock 184 ft. long and 40 ft. wide. The total cost was £450,000. Early in 1904 it was stated that 170,000 acres of land had been brought under perennial cultivation by means of the works at Assiout and Assouan. The accounts with Messrs. Aird for these works were finally closed, the sum paid for the barrage and dam being £E3,258,706, the total cost, including indemnities, etc., being £E3,439,864. On Aug. 9th an important and comprehensive report on the Upper Nile and the control of the waters for irrigation purposes was issued by Sir W. Garstin, of the Public Works Department, with a covering letter from Lord Cromer. In brief, Sir W. Garstin proposed to cut a new channel for the White Nile 200 miles long, thus avoiding the marsh country, and to regulate the outflow into it from the great lakes by dams. As an alternative he would train the Bahr-el-Gebel channel, damming the tributaries, and planting the banks with ambatch trees. By either means 50 per cent. would be added to the

White Nile volume at Khartoum. This is the most striking feature of the report; but there are others, including the regulation of the Blue Nile, and also of the river Gash, for the benefit of Kassala. Lord Cromer, in his general approval of the programme, says it would cost ££21,400,000, and would occupy ten or fifteen years. Lord Cromer proposes, first of all, to spend ££24,000 a year on further investigations. Next to spend ££5,400,000 as follows:—In providing Middle Egypt with perennial irrigation, ££1,000,000; in reorganising Egyptian railways, ££3,000,000; in raising the new Assouan dam, ££500,000; and in remodelling the Rosetta and Damietta branches of the river, ££900,000. He would then like to proceed with the proposed diversion of the White Nile into a new channel, at a cost of ££5,500,000. Another ££9,000,000 would be needed for the regulation of the great lakes, the construction of barrages between Assiout and Keneh, and the perennial irrigation of Upper Egypt. The estimated result of these works would be to give water all the year round to 750,000 acres which now only have a partial supply; to bring water by pumps to 100,000 acres; and to add 800,000 acres to the area under cultivation. The increased revenue from taxation would amount to ££1,205,000 for Egypt alone.

### Suez Canal.

This waterway is the property of an Egyptian company, authorised by the Viceroy in 1856, and confirmed by the Sultan ten years later, the concession having been granted to the late M. de Lesseps for 99 years from Nov. 1869. The general management is conducted from Paris, and the statutes are framed in accordance with French Company Law. In 1875 the British Government purchased the Khedive's shares for nearly £4,000,000 sterling. The affairs of the Canal are carried on by an Administrative Council of 32 members, of whom 10 are British, 3 of the latter being nominated by the Government. Both the Parliamentary and the Administrative reports for 1903 exhibited the continued prosperity of the undertaking. The latter, prepared for the annual meeting in Paris in June 1904, announced an increase of 5 fr. in the dividend, bringing the payment up to 130 fr. (£5 4s.) per share. The surplus of receipts over expenditure exceeded the profits of the previous financial year by £36,352. According to the report issued as a Parliamentary paper, the net tonnage for the year showed an increase of 658,875 tons as compared with that of 1902, and of 1,083,448 tons as compared with that of 1901. Notwithstanding the reduction of 50 centimes in the tonnage dues from the beginning of the year, the transit receipts in 1903 amounted to 103,620,268 fr., being a decrease of only 99,752 fr. as compared with those of 1902—which, however, were higher than in any previous year since the opening of the Canal. The increase in the traffic during 1903 is attributed more especially to the numerous consignments of manufactured goods and supplies for the Far East; the quantity of coal during the last few months of the year being about 200,000 tons more than during the same period of 1902. The shipments of wheat from India to ports in the United Kingdom were also considerably greater last year, amounting to 866,000 tons as compared with 449,000 tons in 1902. The number of vessels which passed

through the Canal was 3,699 in 1901, 3,708 in 1902, and 3,761 in 1903, of which 2,075 in 1901, 2,165 in 1902, and 2,278 in 1903 carried the British flag. There was an increase last year as compared with 1902 in the tonnage of British vessels, which amounted to 6,252,819 tons in 1901, 6,772,911 tons in 1902, and 7,403,553 tons in 1903. During the same period the tonnage of German vessels has fluctuated from 1,762,624 in 1901, to 1,707,322 tons in 1902, and 1,773,265 tons in 1903. The percentage of British vessels and their net tonnage increased in 1903, being 60·6 and 62·2 respectively, as against 58·4 and 60·2 in 1902, and 56·1 and 57·8 in 1901. The percentage of German vessels and their net tonnage was 13·1 and 14·9 respectively, as compared with 12·9 and 15·2 in 1902 and 13·8 and 16·3 in 1901, while the percentage of net tonnage of the other maritime nations using the Canal in 1903 remained practically stationary as compared with the preceding year. During the autumn an agitation was commenced in London to secure a reduction in the dues.

**Egypt Exploration Fund, The.** Founded 1882, for the purpose of historical investigation in Egypt. The work is conducted on the principle of careful examination of all details, and preservation of the objects found in the course of the excavations. The minor antiquities afford valuable evidence as to the history of civilisation by illustrating the influences of Egypt, Assyria, Asia Minor, Syria, Greece, and the peoples of the Mediterranean coasts and islands on one another. After the claims of the National Museum of Egypt have been satisfied, the portable antiquities found are divided between the British Museum and various public collections in Great Britain, America, and the Colonies. The distribution depends mainly on the amount of support contributed by the several districts represented by the museums. Annual illustrated volumes are published, giving the results of each season's work. During the season 1903-4 Prof. W. M. Flinders Petrie excavated at Ehnasya. The results of his work were exhibited at University College, London, during July. Prof. Petrie has now (1904-5) returned to Egypt, and Mr. N. de G. Davies to his task of copying sculptures and paintings; while Messrs. B. P. Grenfell and A. S. Hunt have again gone out to the Fayoum to search for Greek papyri. The XXVth Memoir of the Egypt Exploration Fund, being Prof. Petrie's report of his excavation at Ehnasya, is now published. In '97 the Society started a *Græco-Roman Branch*, for the discovery and publication of the remains of classical antiquity and early Christianity in Egypt. There has since appeared the first volume of the *Oxyrhynchus Papyri*, including a third-century fragment of St. Matthew's Gospel, a poem by Sappho, considerable portions of known and unknown Greek literature, and a long series of official and private documents. A second volume contains historical documents of the first century A.D.; and a third volume, now ready, deals with the *Fayoum Towns* and their papyri. Three further volumes have been issued—one on the *Tebtemis papyri* and two more volumes of the *Oxyrhynchus papyri*. In addition to its work of exploration, the Society commenced in '90 an *Archæological Survey of Egypt*. The object of this survey is to map, plan, photograph, and copy all the most important sites, sculptures, paintings, and inscriptions in the valley

of the Nile between Cairo and Assouan. Up to the present time its work has been devoted to the celebrated XIth-dynasty tombs of Beni Hasan and El Bersheh, to the Old Kingdom tombs at Sheikh Said and El Gebrawi, and to the XVIIIth-dynasty tombs of El Amarna. Thirteen memoirs—viz. *Beni Hasan I., II., III. and IV., El Bersheh I. and II., Hieroglyphs, and the Mastaba of Ptahehetep I. and II., Sheikh Said, and Deir el Gebrawi I. and II., and El Amarna I.*, have been issued to annual subscribers to the Survey. For the last eleven years the Fund has also published, under the editorship of Mr. F. L. Griffith, an annual *Archæological Report on Egypt and Egyptology*, containing not only an account of the progress of Egyptology and reports by the Society's explorers, but also papers by experts on Coptic and Græco-Roman research, and full bibliographies. The Report is illustrated, and contains maps and plans. An *Atlas of Ancient Egypt*, with letterpress, and a sixpenny *Guide to the Temple of Deir el Bahari*, a volume of Coptic Osstraca by Mr. W. E. Crum, and the *Logia Jesou, or Sayings of Christ*, have also been issued. The *Offices of the Fund* are at 37, Great Russell Street, W.C. (opposite the British Museum). There is also an office at 8, Beacon Street, Boston, Mass., U.S.A. **President**, Sir John Evans, K.C.B.; **Secretary**, Miss Emily Paterson.

**Eisteddfod.** The name of an annual bardic congress in Wales, having for its objects the preservation of the music and the general literature of the Principality, the maintenance of the Welsh language and ancient national customs, and the cultivation of a spirit of patriotism among the people. Its origin is lost in antiquity, but it is certain that three such congresses were held in the reign of Edward III., one of them being under the patronage of Earl Mortimer. For history see ed. '88. A *Gorsedd* (this word means *throne*, but in an Eisteddfodic sense it signifies the four-and-twenty stones of the Druidic circle, whence a year and a day beforehand the Eisteddfod is proclaimed "in the face of the sun, the eye of light," and where bardic and musical degrees are conferred), is held at the conclusion of each Eisteddfod, and the place of the next festival is announced.

**Elgar, Sir Edward**, Mus.D. (*honoris causa*) Cantab. and Durham; hon. LL.D. (Leeds), composer, is a son of Mr. W. H. Elgar, organist, and was b. at Broadheath, Worcestershire. He was ed. privately, and after some months in a solicitor's office he followed his true bent and devoted himself to music, becoming organist of St. George's Catholic Church, Worcester. In '89 he married the only daughter of the late Gen. Sir Henry Roberts, K.C.B. His work as a composer has made a deep impression in the musical world and gained for him already a high place. In '92 he published "The Black Knight," in '96 at the Worcester Festival "Lux Christi," and at the North Staffordshire Festival "King Olaf," an Imperial March, a Te Deum, and "The Banner of St. George," in '97; at the Leeds Festival, '98, "Caractacus"; at the Norwich Festival, '99, "Sea Pictures"; and at the Birmingham Festival, 1900, a beautiful setting of Newman's poem "The Dream of Gerontius," since performed at Düsseldorf, and repeated at the Lower Rhine Festival at Whitsuntide, 1902, the first time such a compliment has been

paid to an English work. It has since been performed many times in Germany and the States. During 1901 he published a concert overture "Cockaigne," "Pomp and Circumstance" (Military marches); incidental music to "Grania and Diarmid," etc., during 1902 a "Coronation Ode," and his oratorio "The Apostles" was produced at the Birmingham Festival, 1903, and at the Lower Rhine Festival at Cologne in May 1904. An "Elgar Festival," a unique event in the annals of English music, was held at Covent Garden in March 1904. Knighted June 24th, 1904. Address: Plas Gwyn, Hereford.

## EMIGRATION AND IMMIGRATION.

The Emigrants' Information Office was established in 1886 to supply intending emigrants with information respecting emigration, chiefly to the British colonies, and is under the direction of the Colonial Office. The classes most required in the colonies are generally farm labourers and others connected with the land, skilled miners, female domestic servants, farmers with £200 capital, and, to a limited extent, competent mechanics with a little money. Hardly any assisted passages are now granted, Natal, Western Australia and Queensland giving the most encouragement. The importance of the subject is shown by the fact that the *exodus* from Great Britain has averaged since 1853 250,000 persons annually (including foreigners), of whom the majority have gone to the United States. There was an increase in the number of emigrants from British ports in 1903, as compared with 1902. Printed particulars, which are revised quarterly, are exhibited at every post-office, and at more than 1000 public libraries, urban district councils, and institutions; and free circulars and penny and other handbooks of all the principal colonies, and some foreign countries, with maps and full details, can be obtained post free, or on personal application, from the Chief Clerk, at 31, Broadway, Westminster, S.W.; the circulars can also be obtained at any of the above libraries, urban district councils, and institutions. Letters to the office need not be stamped. A professional handbook, price 3d., is issued for barristers, solicitors, medical men, police, teachers, nurses, railway men, etc. A monthly report is also compiled by this Office for the *Labour Gazette*, published by the Labour Department of the Board of Trade. **Editor of Publications**, Mr. Walter Paton, M.A.

**Self-Help Emigration Society**, for benefiting the underpaid and unemployed in Great Britain, by assisting applicants whose character and fitness are assured to emigrate. **Introductions** are furnished to the Society's correspondents, who are men of position resident in Canada, Australia, New Zealand, Tasmania, and South Africa, and work is usually provided for the emigrants on their arrival. During eighteen years ending 1903 7453 persons have been thus located, at a cost of £44,130 for ocean and rail fares. A large proportion of this cost has been contributed by the emigrants and their friends. In 1903 the emigrants assisted numbered 718. The income of the Society exceeded £5576, inclusive of emigrants' contributions. Applications from intending emigrants should be made to the **Secretary**, Mr. Edward Wilson Gates. **Office**, Memorial Hall Buildings, Faringdon Street, London.

**Emigration Statistics.**

The following statistics were issued during 1904 relating to emigration from the United Kingdom during the ten preceding years :—

	Total, including Foreigners.	Emigrants of British and Irish Origin only.
No. of emigrants in 1903	449,006	259,950
" " 1902	386,779	205,662
" " 1901	302,575	171,717
" " 1900	208,561	168,825
" " '99	240,696	146,362
" " '98	205,171	140,644
" " '97	213,280	146,460
" " '96	241,952	161,925
" " '95	271,772	185,181
" " '94	226,827	156,030

Fuller details as to emigration and immigration in 1903 appeared in a Parliamentary Paper issued by the Board of Trade during 1904 :—

	1903.	1902.	1901.
	No.	No.	No.
To and from Countries out of Europe :—			
Outward . . .	449,006	386,779	302,575
Inward . . .	199,685	170,874	165,018
Balance Outward	249,321	215,905	137,557
To and from European Countries :—			
Outward . . .	699,901	636,311	613,843
Inward . . .	814,441	773,624	702,555
Balance Inward . .	114,540	137,313	88,712
Net Balance Outward	134,781	78,592	48,845

These figures include both emigrants and immigrants, in the strict sense of the words, and travellers.

Of the emigrants to countries out of Europe, 251,941 went to the United States.

99,582 " " British N. America.  
12,573 " " Australia and New Zealand.  
62,824 " " the Cape and Natal.

Of the total of 449,006 emigrants to countries out of Europe, 259,950 were of British and Irish origin and 181,539 were of foreign origin, there being a small number whose nationality was not known.

Of the 199,685 immigrants from countries out of Europe, 112,914 were British and Irish, and 82,390 were foreigners, there being also a small number whose nationality was not known.

**Alien Immigration.**

In 1888 a Select Committee was appointed to inquire into the immigration of destitute aliens, and reported in favour of repressive legislation after sitting for two Sessions. In '94 Lord Salisbury introduced an Aliens Bill into the House of Lords, empowering the Board of Trade to prohibit the landing of any alien who was either an idiot, insane, a pauper, or likely to become a public charge, and reviving the power to expel any foreigner who was a

danger to the public peace here or likely to promote crime elsewhere. After second reading in the Lords the Bill was dropped. The Queen's Speech promised a measure for checking the importation of destitute aliens in '96, but nothing was done. In '98, the Earl of Hardwicke brought in a Bill in the Lords "to regulate the immigration of aliens." The Bill was passed in the Lords and sent to the Commons, but not further proceeded with.

A Royal Commission was appointed (Mar. 21st, 1902) to inquire into and report upon (1) the character and extent of the evils which are attributed to the unrestricted immigration of aliens, especially in the Metropolis; (2) the measures which have been adopted for the restriction and control of alien immigration in foreign countries and in British Colonies; and to advise what remedial or precautionary measures it is desirable to adopt in this country, having regard to the above matters and to the absence of any statutory power to exclude or expel any individual alien or class of aliens from its borders. The Commission consisted of Rt. Hon. Lord James of Hereford (Chairman), Lord Rothschild, the Hon. Alfred Lyttelton, K.C., Sir Kenelm Edward Digby, K.C.B., Under-Secretary for the Home Department, Major W. E. Evans-Gordon, M.P., Mr. Henry Norman, M.P., and Mr. William Vallance, clerk to the Guardians of Whitechapel; secretary, F. E. Eddis, Esq.

The Report of the Commissioners was published as a Blue-book [Cd. 1741] in August 1903, and contains much valuable information on the question, and on alien immigration legislation abroad. The localities chiefly affected in this country are London and such industrial centres as Birmingham, Cardiff, Leeds, Liverpool, Manchester, Reading, Sheffield, and a portion of the mining districts of Scotland. The Commissioners held that it had not been proved that there was any serious displacement of skilled English labour, although it was proved that the industrial conditions under which many of the aliens work in London are very bad. They held that no case had been established for the total exclusion of such aliens, but recommended that State regulations should be adopted and enforced to prevent the country from being burdened with undesirable aliens, and to provide for their expatriation where necessary. The recommendations urged the establishment of a Department of Immigration, the adoption of improved methods to secure correct statistical returns as to alien immigration from shipowners, the granting of powers, on the order of a court of summary jurisdiction, to deport undesirable aliens (criminals, prostitutes, and bad characters), and to debar any immigrants suffering from infectious or loathsome disease or mental incapacity from landing. As to overcrowding, the Commissioners recommended that the existing law should be enforced with greater efficiency, and that increased power should be obtained especially to bring all dwellings within specified areas under the Public Health Act, to prohibit immigrants from settling in proscribed areas, and to register all alien immigrants (not trans-migrants). Lord Rothschild and Sir Kenelm Digby signed dissenting memoranda, objecting that the existing law was sufficient if thoroughly administered, and the number of inspectors increased, without giving power to proscribe certain areas, and to establish a separate Immigration Department. Lord

Rothschild added that the native and alien Jewish population in London did not exceed 110,000.

See SESSION, Sect. II., for details and discussion of the **Aliens Bill** and **Criminal Aliens Bill** in the 1904 Session of Parliament.

### **Aliens in the United Kingdom.**

According to the 1901 Census the total alien population of the United Kingdom was 286,925 in 1901, as compared with 219,523 in 1891, which represents an average annual increase of 6740. The percentage of aliens to the total population is 69 per cent., as compared with 1'38 per cent. in Germany, and 2'66 in France.

The Board of Trade Report already referred to estimated that "the net influx of foreigners into the United Kingdom in 1903 amounted to about 14,000, or nearly 10,000 less than in 1902."

The following table shows for 1903 and the two previous years the nationalities of alien immigrants (other than seamen) not described in the Alien Lists to be *en route* to other countries:—

*Nationalities.	1903.	1902.	1901.
Russians and Poles .	30,046	28,511	20,914
Norwegians, Swedes, and Danes . . .	4,702	5,028	4,725
Germans . . . .	7,502	6,965	6,730
Dutch . . . .	3,761	2,456	2,199
French . . . .	6,495	6,637	5,816
Austrians and Hungarians . . . .	4,005	3,144	2,342
Italians . . . .	7,045	7,734	7,185
Roumanians . . .	565	1,282	1,162
Other nationalities .	5,047	4,714	4,351
Total . . . .	69,168	66,471	55,464

\* Including 40 aliens whose nationality was not ascertained.

The Russians and Poles and Roumanians consist principally of Jews. Of the former, 23,780, or 79 per cent., and of the latter 412, or 73 per cent., arrived in London.

Many of these immigrants from Russia, Poland, and Roumania, who were not stated in the Alien Lists to be *en route* to other countries, subsequently left the United Kingdom within the year; and deducting those who were thus known to have left the country, the figures were reduced to 59,429 for 1903, 58,488 in 1902, and 51,585 in 1901.

During 1903 special returns were obtained by the Local Government Board for the purpose of ascertaining the number of aliens in receipt of Poor Law relief in England and Wales on July 1st, 1903. The total number of aliens relieved on the date mentioned was 1753, or about 7 per 1000 of the alien population of England and Wales according to the Census of 1901. This number comprised 587 indoor paupers, 694 outdoor paupers, and 472 insane in asylums. In London, the aliens relieved represented 0'74 per cent. of the total pauperism. In the 94 Provincial Unions in which aliens were relieved, they represented 0'33 per cent. of the total pauperism of those Unions. The total number of aliens relieved represented 0'22 per cent. of the total number of paupers relieved in the whole of England and Wales.

**Employers' Liability.** A comprehensive article on this subject appeared in the '96 and

'97 eds., giving full details of the law on the subject, of the Act of '80, and of Mr. Asquith's Bill of '93 and the proceedings upon it. In the Session of '97 the **Workmen's Compensation Act** was passed, and in 1900 another Act extended its operation to agricultural labourers. See under LAW, 1903, an account of the decisions of the Court of Appeal on cases under the Act.

**Engineering Standards Committee.** The Committee is composed of the official representatives of the Institutions of Civil, Mechanical and Electrical Engineers, the Institution of Naval Architects, and the Iron and Steel Institute. Controlled by the Committee are 12 sectional committees, and under these 18 sub-committees. Standard rolled sections for constructional work, a standard specification for steel used in the hulls of ships, a specification for boiler steel, standard specifications for locomotive parts, standard rail-sections for railways, tramways, electrical plant standards, etc., have been or are being prepared by the committees. The necessary funds are provided by the five Institutions named, the railway companies, the leading engineering firms, and by a grant from H.M. Government. Chairman, Mr. James Mansergh, P.P. Inst. C.E. Secretary, Mr. Leslie S. Robertson, M. Inst. C.E. Offices, 28, Victoria Street, S.W.

### **ENGINEERING SCHEMES.**

Below will be found, arranged in alphabetical order, descriptions of the chief industrial engineering schemes in progress in this country and abroad.

**Aberfeldy Aerial Line.**—This, the largest aerial ropeway installation in Great Britain, was opened on Aug. 6th, 1904, by the enterprise of the Highland District Council Committee. It is 2½ miles long, and is supported by 37 trestles of lattice steel placed about 100 yards apart and varying in height from 25 ft. to 40 ft. The ropeway runs from Gatehouse Quarry down to an unloading platform at Aberfeldy, the difference in altitude between the two places being 1000 ft., so that the descending full skips draw up the empty ones. The carrying capacity of the ropeway is about 10 tons per hour. By this means manufactured stone can be got to Pitlochry for 4s. 6d. per ton, against 7s. per ton by cart haulage over the rough roads.

**Adam's Bridge Railway and Canal.**—(See former eds.) A new proposal for the partial utilisation of the islands and shoals which lie between the Indian mainland and Ceylon was published in Aug. 1903. It is a scheme put forward by the South Indian Railway to close up the Pamban Channel, a narrow pass of only 12 ft. depth which divides the island of Rameswaram from the Peninsula, and to make a ship canal for ocean steamers through the island itself. It would be 3½ miles long, of a bottom width of 80 ft., and the entrances, which would be protected from the monsoons, would with very little dredging have a depth of 30 ft. It was further proposed to bring the railway over the filled-up Pamban Channel to connect with a fully equipped dock to be constructed in the middle of the canal, and to continue the line into the interior of Rameswaram Island by a bridge over the canal. The cost was estimated at £577,000, and as ocean liners have at present to go south of Ceylon, it was hoped to divert much of the traffic. A ferry service might further be established across Palk Strait. In

the Administration Report on Indian Railways for 1903, issued in Sept. 1904, it was stated that the project was under consideration.

#### **African Transcontinental Telegraph.**

—We have given accounts of the progress of this line in previous editions. In Oct. 1903 the wire was reported to be in good working order up to Ujiji, Lake Tanganyika. It is understood that it is not the intention of the British South Africa Co. to continue the extension northwards for the present.

**Argentine Great Cableway.**—During 1904 this aerial line, which is believed to be the longest and to possess the highest engine station in the world, was in course of construction. Descending from a point in the Andes 14,933 ft. above sea level to Chilcietio station on the Argentine Northern Railway, which is 3430 ft. above the sea, it runs a distance of 22 miles, crossing rocks and precipices and chasms 2800 ft. wide, with a valley of 650 ft. at its deepest point. In some places iron towers 130 ft. high support the line. The length of wire rope to be used is 87 miles, cars carrying 1100 lb. of ore each will be used, and the capacity of the ropeway is estimated at 44 tons per hour. All the structural parts have had to be carried to the various sites by mules. Messrs. A. Bleichert & Co., of Leipzig, are doing the work.

**Bagdad Railway.**—In previous editions we have given an account of the revival of the idea to connect the Mediterranean with the Persian Gulf, and the success of the Germans, who control the Anatolian system, including the line to Konieh. The *Times* of Jan. 3rd, 1900, published what was described as a preliminary convention, which was agreed to on Dec. 23rd, '90. The following are the essential clauses, the Turkish Government also securing the right to buy up the line and then to work it or let it on lease to the Anatolian Company and no other:—

"The Anatolia Railway Company undertakes to construct within a maximum period of eight years, and to exploit, a railway line of the regular gauge of 1.44 metres from Konieh to Basra by way of Bagdad, on condition and guarantees to be determined by common agreement between the Sublime Porte and the said Company. It is understood that the Company will immediately undertake the necessary surveys, and as soon as possible submit to the approval of the Sublime Porte the draft conventions and estimates of rates."

In the spring of 1903 much discussion of a diplomatic character occurred in connection with the enterprise. Answering questions in the House of Commons on April 8th, Mr. Balfour said his view of the question as a whole was that this great international artery had better be in the hands of three nations than in the hands of one or two. On April 22nd the *Times* published portions of the text of a convention signed on March 5th, 1903, by the Ottoman Minister of Commerce and Herr A. Gwinner and other representatives of the Anatolian Company, which amplified the terms given above, and gave details of the payment of the kilometric guarantee and other charges by means of bonds based on an Ottoman 4-per-cent. loan. In the House of Commons on April 23rd Mr. Balfour said the Government had never been asked to assent to this Convention, which left the scheme entirely under German control, and in any case they could not be a party to it. From this time the discussion as to the financial prospects of the

enterprise, and even as to the possibility of its temporary abandonment, was largely confined to the Foreign press. A Berlin telegram of Nov. 16th announced the conclusion of a new financial agreement. By the original arrangement the German and French capitalists were to participate financially in the scheme in the proportion of 60 and 40 per cent. respectively. The Turkish Government, however, stipulated that the Anatolian Railway Company should enjoy a permanent 10-per-cent. interest in the proposed undertaking. According to the new agreement this claim will be met by a corresponding reduction in the German share of the capital. Moreover, the German and the French groups will each deduct 10 per cent. from their respective shares of the capital controlled by them, in order to admit of the participation of Austrian, Swiss, Italian and Ottoman financiers. The German group, represented by the Deutsche Bank, will, therefore, control 40 per cent. of the capital, the Imperial Ottoman Bank, acting on behalf of the French group, 30 per cent., the remaining interested countries jointly 20 per cent., and the Anatolian Railway Company 10 per cent. A Frankfurt telegram of Nov. 25th reported that a company had been floated there with a capital of £150,000 to construct the first section from Konieh to Ereğli. The board of the Bagdad Railway Company held their first meeting at Constantinople on Dec. 15th, and the transfer of the concession was made. The first meeting of the board of a new company formed for the construction of the Konieh-Ereğli-Bugurlu line (the first section of the Bagdad Railway) was held on Dec. 30th at Frankfurt. The contract for the laying of the section, 200 kilometres in length, was approved. This was completed in 1904 and opened on the Sultan's birthday, Oct. 25th.

**Behr Mono-rail Railway.**—See last ed.

**Birmingham Water Supply.**—The scheme has been described at some length in our previous editions. It was to bring the waters of the Elan and Claerwen and their tributaries in the counties of Cardigan, Radnor, Brecknock, and Montgomery, to Birmingham, a distance of over 70 miles. The lower end of the waterworks is at Caban Coch, on the river Elan, some three miles from Rhayader. The suggestion of this great project came from Mr. James Mansergh, F.R.S., the engineer, and the works have been constructed under a Birmingham Corporation Act of 1892 which was modified in 1896 and 1902, the carrying of it out being a triumph of municipal enterprise. The plans include six reservoirs, three in each of the two river valleys, and these when completed will have a total storage capacity of 18,000 million galls. In addition a dam divides the great Caban Coch reservoir of 500 acres; it is submerged, this unique feature of the scheme being introduced owing to the relatively high altitude of Birmingham. The Corporation itself undertook the work of constructing the reservoirs, filter beds, and about three miles of aqueduct; of the latter some 70½ miles of tunnelling, cut and cover, and pipe syphon work was let to contractors. The King, who was accompanied by the Queen, formally inaugurated the supply near Rhayader on July 21st, 1904. At that time the three reservoirs in the Elan Valley were completed, representing a storage capacity of 10,120 million galls. The water made its appearance in the Birmingham mains on Sept. 17th, and a few

days afterwards it was announced that about a third of the city's total supply was coming from the new Welsh source. The annual accounts, made up to the previous March, showed that £5,255,992 had been spent on the scheme. At the meeting of the Council on Dec. 6th the Water Committee reported that the quantity of water taken into distribution had reached an average of about 11,000,000 galls. a day. The total consumption in the district for the half-year ending Michaelmas averaged 19,250,000 galls. a day.

**Black Sea and Baltic Ship Canal.**—Another development of this much discussed scheme, which has been dealt with in several previous editions, appeared in a report published in July 1903, to the effect that the Austrian and German Governments had approached that of Russia with a proposal of their own. It was proposed to establish a connection between the Elbe and the Dniester, thus providing a direct waterway between the Black Sea, the North Sea and the Baltic, utilising en route the Weichsel (and its auxiliary the Sau) and the Oder. It was suggested that Odessa, Warsaw, Hamburg, Lubek, and Stettin, besides Vienna, would be much benefited. A little later a report was in circulation to the effect that an American syndicate had proposed to the Russian Government to construct a Baltic and Black Sea Canal for £32,000,000, which is one-third less than the officially estimated cost. According to the *Uhländ Verkehrszeitung* the plans had been deposited, showing that a commencement would be made at Riga, while at the other end the Dnieper would be utilised to the outlet at Kherson—the total distance from sea to sea being 1000 miles. On July 26th, 1904, the *Daily Chronicle* published a special article giving some details of another suggestion for a water route to cost £24,000,000. The idea, briefly, is to utilise the rivers Dnieper and Dwina at each end, a connecting link being formed by the rivers Lutscheza and Orschiza and a new canal of twelve miles in length.

**Bombay Dock Scheme.**—In Feb. 1903 particulars were published of a scheme of dock improvement involving an estimated expenditure of three crores of rupees. The scheme includes the construction of a new dock, with a water area of about 49½ acres, between Ballard Pier and the existing docks, having a depth of 33½ ft. and an entrance lock 600 ft. long; a dry dock of 800 ft. to 850 ft. length; and a dock-head pier, 1250 ft. long, where mail boats can moor, the passengers stepping from the vessel to the train. The latest estimate of total cost announced at the end of the year was Rs.33,269,836. A report by the Docks Committee published April 14th, 1904, gave a list of tenders received for the excavation and masonry of the new docks, and at a meeting held subsequently the tender of Messrs. Price, Wills and Reeves was accepted for Rs.18,561,015, the date for completion being June 1st, 1911. The work of removing the dam is to be carried out departmentally.

**Bosruck (Alpine) Tunnel.**—This is the chief feature in a new transalpine railway connecting Bohemia and the western provinces of the Austrian monarchy with the Adriatic by a north and south route. The railway is known as the Pyhrn line, is 25 miles long, and runs between Klaus Steyerling on the north and Selzthal on the south. There are in all six bridges, four viaducts, four smaller

tunnels, and the summit or Bosruck Tunnel. The last-named is about three miles long, with a summit-level of 2405 ft. above sea-level, the gradients at each end being 1 in 77 on the north side, where the entrance is 2356 ft. above sea-level, and 1 in 330 on the south side. The driving of the tunnel was commenced in 1902, and the line is to be opened in Oct. 1905. The cost of the new railway is estimated at £477,000, one half of which is chargeable to the Bosruck section.

**Brindisi Harbour Improvement.**—It was reported in Sept. 1904 that dredging was being carried on here not only to increase the normal depth of water in the inner harbour, but also to increase the area of deep water available for the largest steamers. Vessels of 525 ft. to 550 ft. in length, and drawing 25 ft., can now enter, and, when leaving, turn without hindrance. It is anticipated that eventually Brindisi will have one of the finest deep-water harbours in the world.

**Bristol Port Improvement.**—In 1900 the improvement or "dockisation" scheme now known as the Royal Edward Dock Works was represented by the publication of a report by Sir J. Wolfe Barry, Sir B. Baker, and Mr. Hurtzig, drawn up at the request of the special committee of the Corporation. This report was considered and adopted, practically unanimously, on Oct. 29th. By this scheme the improvements were to take place at Avonmouth, and meet the requirements of the new West India trade. The engineers' estimates (see last ed.) amounted to a total of £1,804,700. Dredging to cost between £4000 and £5000 a year. In Feb. 1902 a contract for the first portion of the works was let to Sir John Aird & Co. for £1,394,512. On March 5th the Prince of Wales cut the first sod. The new dock will have a length of 1120 ft., a width of 1000 ft., and a water area of 30 acres, the entrance lock being 875 ft. by 100 ft. The level of the water in the dock at high-water ordinary spring tides will be 53 ft.; at high-water ordinary neap tides, 25 ft. The corresponding levels in the entrance channel will be 47 ft. and 37 ft. The construction is to be completed in five years. The graving dock will be alongside the entrance lock, and will be practically of the same dimensions. The report of the trade of the port for the year 1903-4 was very encouraging. The foreign tonnage which entered amounted to 1,100,000 tons, being an increase of 170,000 tons over that of the previous year, which was itself a record. The coastwise tonnage also amounted to over 1,000,000 tons, or 115,000 tons in excess of the previous year. The dues reached a total of £149,000, being £20,000 over the returns for the previous twelve months. Early in the year the Town Council adopted a Docks Committee report recommending the improvement and reconstruction of the Bath, Netham Lock, Lysaght's Dock, Marsh and Bathurst Basin bridges at a cost of £20,556.

**Cairo New Bridges.**—After keen competition, on specifications which left the question of design as well as construction to the competitors, Sir W. Arrol & Co. secured the contract for three bridges to cross the Nile at Cairo, the sum fixed being £191,814. From the details published in May 1904, the new structures will replace the well-known bridge road which, beginning opposite the Boulevard de Koubry, crosses to the island of Boulak and

continues by the Pont des Anglais to the western shore. The new bridges will be in a more southerly position. The one lesser bridge will cross from near the Hospital Kasr-el-Din, opposite the northern end of Rodah, to the island, and will be 67 metres long. The second structure will cross from the Old Cairo Road, opposite the southern end of Rodah, to the island, and will be 83 metres long. The chief structure will be 535 metres (1760 ft.) in length—the Kasr-el-Nil, the present bridge, is only about 325 metres long—and will span the Nile from Rodah to Ghizeh, being, in fact, a continuation of the second bridge. At Ghizeh the new roadway will lead on to join the tramways westward, and on to the Pyramids. The largest bridge will be 65 ft. wide, carry a double tramway line, and will have a swinging portion, allowing two clear waterways of 65 ft. each. It was reported in August that on the Finance Minister agreeing to make monthly payments, the contract price was reduced by £6,000. The work is to be finished by July 1906.

**Cape to Cairo Railway.**—The progress of the Cape to Cairo line, with its growing network of feeders, was fully described and illustrated by a specially drawn map in our 1903 edition. As the crow flies, the distance between Cairo and Cape Town is about 5700 miles; and while from the north, and allowing for the river gap between Assouan and Wady Halfa, railhead has reached Khartoum, roughly 1400 miles, from the south the iron road in the late autumn of 1904 had been carried well beyond the Zambesi. The latest official statement was made by Sir C. Metcalfe, who is superintending the whole work, to Reuter's representative, and was published on Oct. 8th. He said good progress is being made north of the Zambesi, on the section known as the northern extension from Victoria Falls to Kalomo, the administrative centre of Barotseland, a distance of 100 miles. From Tanganyika it is probable that there will be two lines, one through the Congo and another through German territory. At the Victoria Falls, the engineers are hard at work at the cantilever bridge which is to span the Zambesi. The foundations are all in hand on the south side of the river; two of the bays are already erected. Work is in progress simultaneously from both banks of the Zambesi. The bridge will have ten bays in all, and the rate of progress is expected to be two bays a month. Immense quantities of material are already on the spot. An electric motor cable with a span of 900 ft.—the largest thing of its kind which has been attempted—carries the material from one bank of the Zambesi to the other. Sir Charles, who went into some detail of a land settlement scheme to encourage white settlers along the line of railway, in the shape of free grants of 160 acres each, added: "I am firmly of opinion that there will be not merely one line in this region, but that it will become a network of railways." It is interesting to state that the first through passenger train to the Victoria Falls left Cape Town on June 22nd. It was decided on Nov. 30th to continue the line, when it reaches Kalomo, for another 250 miles in a north-easterly direction to Broken Hill.

**Channel Ferry Scheme.**—See last ed.

**Channel Tunnel.**—In response to an appeal of the French Chamber of Commerce in London, M. Peltrean, a member of the Paris

Chamber of Commerce, presented a report on this enterprise to the latter body, which adopted it at a sitting on May 11th, 1904. The following are the conclusions which were entirely approved: "Considering that the establishment of a railway between France and England appears feasible; considering that this natural bond of union would be greatly to the economic interest of both countries; considering that this great enterprise, drawing still closer the ties of friendship between the two peoples, would become a work fruitful in good results for the peace and well-being of the world, we express the hope that land communication by rail will be established across the Channel." M. Peltrean, who went fully into the history of the scheme, dealt with its moral and social as well as its economic aspects. He accepted 250,000,000 francs as the probable cost of the tunnel, and 100,000,000 as the cost of a bridge, to which, however, various technical objections had been raised. At the meeting of the Channel Tunnel Company in London on Dec. 7th, Mr. T. Thackthwaite, who presided, said the time was fast approaching when they would again appeal to Parliament.

**Chinese Railways.**—See under CHINA.

**Colombo Harbour Works.**—These extensive works, which when complete will inclose an area of 660 acres at low water, were commenced in '94. They consist of two breakwaters, a graving dock, a slipway, and a coaling depot. The north-east breakwater, 1,000 ft. in length, and an island breakwater 2,670 ft. in length known as the north-west breakwater, are so arranged that on their completion they will give a northern entrance 700 ft. in width, having a depth of from 34 ft. to 36 ft. at low water, and a central entrance 800 ft. wide having a depth of from 39 ft. to 40 ft. at low water. The graving dock will be 700 ft. in length on the floor, 121 ft. in width at the copings, and 85 ft. at the entrance, with a depth of 30 ft. over the sill at low water. The slipway will have a gradient of 1 in 20, and at the outer end will be covered by 25 ft. of water. The coaling depot will have a net area of 24 acres and a storage capacity of 250,000 tons. The total cost is estimated at over £1,000,000 sterling. It was reported in Sept. 1904 that the breakwater works were nearly complete, and that the dock would be opened in 1906; the latter will be the largest and best in Asia.

**Danube Developments.**—In the autumn of 1904 a report from the British Consul in Bohemia was published to the effect that it had been decided to carry out the following works within twenty years:—(1) The cutting of a navigable canal from the river Danube to the river Oder; (2) connecting by a canal the rivers Moldau and Danube; (3) a canal from the Danube-Oder Canal to the Middle Elbe; (4) and from the Danube-Oder Canal to the river Weichsel.

**Dover Harbour.**—Work on the great National Harbour at Dover was actually commenced at the end of '97 or the beginning of '98 by Messrs. Pearson. The plan consists of (1) an extension of the existing Admiralty Pier in an east-south-east direction for a distance of 2000 ft.; (2) the erection of an east arm extending seaward in a south-westerly direction for a length of 3,320 ft. from the foot of the headland; (3) the construction of a breakwater 4200 ft. long, which, at a distance of

about three-quarters of a mile from the shore, will form on the south the outer sheltering arm of the harbour; and (4) the building of a sea-wall, 3850 ft. in length, extending from the Castle Jetty at the eastern end of East Cliff Terrace to the roof of the proposed east arm. The total area inclosed will be 685 acres. On Jan. 10th, 1901, the first block of the eastern arm was laid. At that date the sea wall was reported complete. According to the Naval Works statement issued in 1904 the total cost of the National Harbour was given at 3½ millions, and it was expected to be completed in 1907-8. The estimated outlay for 1903-4 was £515,000, and for 1904-5 £335,174. A new torpedo-boat harbour was spoken of in August. The last block of the Eastern breakwater of the Admiralty harbour was laid on Dec. 29th, 1904, and the Southern was progressing rapidly. In the western corner of the National Harbour is inclosed the **Commercial Harbour**, the memorial stone of which was laid in July '93. It was originally intended that this harbour should inclose 56 acres, but the area will now be increased to about 75 acres. The Prince of Wales's Pier, the shore end of which consists of an open-work iron viaduct 1200 ft. long, forms the eastern arm of this harbour. On July 1st, 1904, this pier was used for the first time for transatlantic traffic, when the Hamburg-American liner *Prinz Waldemar* called on her way to South America. It was stated at the time that the new landing-stage will accommodate large steamers at any state of the tide, and that the equipment of the pier and railway is of the most modern character. The *Builder* of July 15th added: "The pier itself will ultimately have a width of 245 ft., to provide still further for the requirements of the port. Railway lines have already been laid connecting the end of the pier with the shore, but a proposal is on foot to carry a viaduct direct from the South-Eastern Railway Station, next to the Lord Warden Hotel, to a point about half-way along the Prince of Wales Pier. This will leave a triangular area between the new viaduct, the pier, and the tidal harbour, and it is probable that the area in question will ultimately be filled in, to provide a site for the erection of quay sheds and other buildings."

**Edinburgh New Waterworks.**—It is hoped that this great enterprise will be completed by the autumn of 1905, the cost being estimated at £1,000,000 sterling. The scheme, which is being carried out by the Edinburgh Water Trust, is to supply the city with water from the sources of the Tweed, 36 miles away; and various sections have been let to different contractors, while from near Penicuik to Edinburgh the pipe track was undertaken by the Trust. In Sept. 1904 it was reported that the great puddle trench and dyke at Talla reservoir was approaching completion, when the valley will be flooded for two to three miles up the Talla Glen.

**Folkestone Harbour Extension.**—On July 12th, 1904, M. Paul Cambon laid the last stone of these works, which, commenced in '96, have been carried out by the South-Eastern and Chatham Railway Company at a total cost of £500,000. They comprise the extension, widening, and virtual reconstruction of the pier, six new landing-stages being provided, the construction of an overhead promenade, and the rebuilding of two railway stations. The old

wooden pier has been built in with granite; it has been widened to 75 ft., and it has been continued in a straight line for a distance of 300 ft., from which point there is a further extension of 600 ft., canted at an angle of 36° and carried in an E.S.E. direction so as to form a sheltering arm for the boats lying on the east side of the pier. On the eastern side of the pier four new landing-stages have been provided, each with its low-level stage for use at low tide, while their dimensions are such that they will accommodate the largest vessel of the South-Eastern and Chatham Company's fleet, which the old pier would not. On the west side of the pier two new berths for steamers have been provided, each with its high-water and low-water landing-stage; but these will be used only when the wind is blowing strongly from the east. The promenade constitutes the roof of station platform and buildings, and runs the full length of the pier, at the end of which is a miniature lighthouse 30 ft. in height. In addition to the station on the pier itself, the scheme included the rebuilding and improvement of the old harbour station.

**French Port and Canal Improvements.**—Early in 1901 was published a great general scheme prepared by M. Baudin, French Minister of Public Works, for the improvement of existing waterways and ports, and the construction of new canals. The sum involved was no less than £24,472,400 (see last edition for details). In pursuance of this policy the Senate on June 26th, 1903, passed a scheme involving the expenditure of over £10,000,000, all amendments being rejected in a few sittings. Its object is the improvement of some ten French ports and the construction of new and the deepening of existing canals in connection therewith. The sum of 29,000,000 fr. is to be spent on improving the navigability of the Garonne, the Orleans Canal, and a series of waterways in the north and south of France. New canals are to be constructed at a cost of 150,000,000 fr. They include the Canal du Nord, destined to cut off a bend of the Oise and supplement the Saint Quentin and Ourcq Canals, the Loire Canal, and other watercourses intended to link Combleux to Orleans, and Cete and Marseilles with the Rhone. The remainder of the credit will be devoted to improving the harbour accommodation at Dunkirk (where it is proposed to spend 26,000,000 fr.), Boulogne, Dieppe, Havre, Rouen, Saint Nazaire, Nantes (where the expenditure will be 22,000,000 fr.), Bordeaux, Bayonne, and Cete. It is part of the general scheme that local authorities should contribute 50 per cent. of the Government votes. Thus, Douai is finding 30,000,000 fr. for the Canal du Nord project, and in the spring of 1904 the Minister of Public Works visited the town to study the various questions connected with the cutting of the canal. It is interesting to add that the length of canals in France is 3012 miles, and that of the rivers and streams so used 4665 miles. The total tonnage of the cargo carried on all the internal waterways in 1903 was 33,057,630 tons, as compared with 30,546,761 tons in 1902.

**Gibraltar Naval Works** (see last edition). On Feb. 21st, 1903, a Blue Book was issued containing the "Report on Proposed Eastern Harbour and Docks" at Gibraltar, drawn up by Capt. T. H. Tizard and Mr. William Shield. Their estimate of the cost "after making due allowance for contingent

cies," was £6,500,000, and the time allowed for completion was ten years. Mr. Balfour, in the House of Commons on March 4th, replying to Mr. Gibson Bowles, said the report had been considered, but the Government did not think that the great expenditure which would be involved would bring with it any adequate results from the point of view of Imperial defence. The Naval Works statement issued in 1904 gave as the total sum to be expended at Gibraltar, including the commercial mole, at £1,908,000, the allotment of outlay being for 1903-4, £145,800, and for 1904-5, £199,689, when the works are to be completed. Water was let into the King Edward's Dock on July 8th; it will take the largest battleship, although the dock is the smallest of the three forming part of the scheme. It was fully completed by Nov. 7th.

**Gainsborough Water Boring.**—On March 23rd, 1904, the final stage of this undertaking was reached. The boring is the largest which has been sunk for waterworks purposes in this country, being 1515 ft. deep, and cost, with equipment, £16,500. The estimated supply from the borehole was 40,000 gallons per hour, but the pumping engine is designed to deal with 60,000.

**Galveston's Reclamation.**—Following the swamping of this port by the sea in 1900, it was decided to erect a sea wall, and to accept the proposal of Mr. Lindon Bates, of New York, to raise about one-fourth of the entire city, about two square miles, seven feet. It was announced in the autumn of 1904 that the sea wall had been completed, and formed the greatest structure of the kind in the world. It is 17,503 ft. long, 16 ft. wide at the base, and 5 ft. at the top, and stands 17 ft. above mean low tide, with a granite apron extending 27 ft. out on the gulf side. The contract price was £239,623, and the time of construction of the wall proper 1 year, 4 months, 17 days. As to the raising of the city, the plan includes the dredging of the necessary material from the sea, and a canal has been excavated at the back of the sea wall to admit of the passage of the barges containing the material, the quantity of which is given as 11,243,900 cubic yards. The canal will be filled up again as the work proceeds. This work will involve the raising of several hundred houses, and the diversion and reconstruction of the streets and railway lines. The cost of the whole, including the sea wall, is put at £1,116,145.

**Hebburn Graving Dock.**—This is the largest graving dock on the east coast of England, and has been constructed for the shipbuilding yard of Messrs. Robert Stephenson & Co. It is 700 ft. long on the floor from the inside of the caisson, 90 ft. wide at the bottom, and 111 ft. at the coping. It was formally opened by Lady Constance Emmott on Oct. 18th, 1904.

**Heysham New Harbour.**—This harbour, which has been formed on the Lancashire coast by the enterprise of the Midland Railway Co. for their Irish and Isle of Man traffic, has the permanent advantage of direct admission from the deep-water channel known as Heysham Lake, which penetrates the shoals of Morecambe Bay. The breakwaters which inclose the harbour area—about 500 acres in extent, with a dock, for the most part complete, some 150 acres in extent—are of very solid construction, and from over a mile apart at the land

end they extend seawards about three-fourths of a mile, converging there to a width of about 300 ft. There is a depth of 17 ft. in the harbour and of about 40 ft. at the entrance (low-water ordinary spring tides), with landing facilities at all states of the tide. Traffic was commenced on Sept. 1st, 1904.

**Indian Irrigation.**—In the spring of 1904 the report of the Irrigation Commissioners for 1901-3 was published in this country. They stated that the system was divided into three main classes—namely, canals, tanks, and wells, the total area irrigated being 44,000,000 acres. The capital outlay on the 39 canals and major works carried out up to the end of 1901, was 36,637 lakhs of rupees. The annual percentage of net revenue, after paying all working expenses, is 7·1 per cent. While the works in the Punjab yield a net revenue of 10½ per cent., those in Bombay and Bengal do not earn enough revenue to cover the interest charges on capital outlay. It was also stated that the only provinces in which there is a considerable field for new irrigation works which will prove remunerative are the Punjab and Sind. The projected schemes for these districts are the irrigation of the Lower Bari Doab and the cutting of the Sind Sagar Canal. In Madras the proposed great Tungabhadra storage scheme is not expected to prove remunerative. Altogether the Commissioners give a list of nine works for irrigating 6,500,000 acres at a cost of 4400 lakhs, the annual loss on which will amount to 73·72 lakhs.

**Jungfrau Railway.**—It was reported in July 1904 that the workmen engaged on this railway had reached an altitude of 9800 ft. The line, when complete, will be 12 kilometres (7·45 miles) long, and was opened to traffic in 1903 as far as Eigerwand, which is 2½ miles from the commencement. The level of the lower terminus is 6772 ft., whilst the Eigerwand station is at a level of 9406 ft., and the terminus immediately below the top of the Jungfrau is at a level of 13,428 ft. From this point a lift is to be erected to take up passengers the remaining 239 ft. to the top. The maximum gradient is 25 per cent., and a rack-rail is used. The line runs in the open up to the Eiger Glacier station, about 1½ mile from the beginning, but from this point to its upper terminus will be entirely in tunnel, which is 12½ ft. wide by 14½ ft. high. At the time mentioned 760 yards of tunnelling, which can only be carried on from one end, remained to be done, and the work was expected to occupy at least a year.

**Leeds Water Reservoirs.**—In Oct. 1904 the Leeds Corporation accepted the tender of Messrs. Macalpine & Sons of Glasgow to construct the new Colsterdale reservoir, which will form part of the waterworks extension, for £296,864. In all four reservoirs are to be built—the Colsterdale, which will be the largest, being 170 acres in extent and holding 1,352,000,000 gallons.

**Loch Linnhe Port and Dock Scheme.**—This project, which was brought forward in 1904 by Mr. Donald Fraser, Town Clerk of Fort William, N.B., has for its object the provision of a great home port for the Canadian and North Atlantic trade. The suggestion is that Loch Linnhe, which is an arm of the sea on the west coast of Scotland, be adapted as a tidal basin or wet dock, the entrance, Corran Narrows, being deep and 350 yards wide,

From this point to the other end at Fort William the loch is eight miles long and has an average width of a mile, while over nearly the whole of this fine area there is an abundant depth of water close in-shore, where wharves and piers could be erected. Farther on still there is a curved channel three miles in length, which leads to the east end of Loch Eil, another great sheet of deep water,  $6\frac{1}{2}$  miles long and  $\frac{3}{4}$  mile wide. Part of the scheme is to dredge this channel so as to increase its depth of  $2\frac{1}{2}$  fathoms to 4, and to erect locks in order to convert Loch Eil into a second wet dock. Thus the scheme would provide two great natural docks capable of taking the largest vessels. The means of distribution from the spot form another feature of the project. The western outlet of the Caledonian Canal is at the junction of the two lochs. By accelerating both the sea and the railway services it is computed that passengers from Halifax coming by Fort William would reach London 18 hours earlier than *via* Liverpool; further, the North British Railway Co. has a line authorised to run along the whole eastern shore of Loch Linnhe.

**London and Southampton Canal.**—See last ed.

**London Bridge Widening.**—This improvement was completed in 1904, and the formal inauguration by the Lord Mayor took place on March 28th. The roadway has only been widened about 6 in., on account of the approaches, but about 5 ft. 6 in. has been added to each of the footpaths. During the process of extension arrangements were made to construct a temporary foot-bridge on each side of the bridge to accommodate the traffic, the supports rising from the buttresses; the first of these footways was completed on Sept. 27th, 1902. Messrs. Pethick Bros., of Plymouth, were the contractors, and the greater part of the granite stonework was quarried at Dartmoor, but some of the old stones have been used. The widening cost £95,484, which was met out of the funds of the Bridge House Trust.

**London Electric Lines.** See article under LONDON.

**Madagascar, Railway in.**—In Oct. 1903 it was reported that operations were proceeding on the railway from Antananarivo to the coast, the first 19 miles of which were formally opened in Oct. 1902. When completed, the journey from Tamatave to the capital can be accomplished within 24 hours, but the work, which is being carried on by military engineers, is difficult, and the climate bad. About £800,000 had been expended upon it, and a further vote to a like amount had been passed.

**Manchester Ship Canal.** (See previous eds.)—This great undertaking, the first of its kind completed in this country, is 35½ miles long, average width 172 ft., and at bottom 120 ft. (but much wider between Barton and Manchester), depth 26 ft. There are four locks between the entrance at Eastham (opposite Garston, on the Mersey estuary) and the city, the total rise of the four steps being about 60 ft. The canal is mainly tidal up to the first locks, a distance of 21 miles; but the entrance itself is through locks, so that the necessary depth of water is always retained in the whole canal. The works were commenced at Eastham in Nov. '87, and the waterway was opened to public traffic from Eastham to Man-

chester on Jan. 1st, '94. Queen Victoria declared it open on May 21st. For the half-year ending Dec. 1903 the balance of net revenue was £101,517, and after paying interest on the first and second mortgage debentures and other charges £49,985 was handed over to the Corporation for debenture interest (making £80,045 for 1903), and £2661 carried forward. At the meeting on Feb. 18th, 1904, Mr. Bythell, the chairman, said that their new arrangement with the Corporation (described in our last edition) would reduce the Corporation interest from £225,000 annually to £160,000. The bill to authorise this transaction, and another for the deepening of the canal and other works, were passed during the Session. The accounts for the half-year ending June showed an available profit of £92,877, and the sum paid to the Corporation was £44,004. Speaking at the meeting on Aug. 7th, Mr. Bythell said that, notwithstanding a serious falling off in cotton freightages owing to the condition of the trade, the general receipts exhibited an increase. The increase in the depth of the canal from 26 ft. to 28 ft. would be secured between Eastham and Latchford by retaining 2 ft. more water, and between Latchford and Manchester they would have to dredge. The approximate receipts for the ten months ending October were £331,676, a comparative increase of £17,288.

**Mecca, Railway to.**—In the spring of 1900 it was reported that the Sultan had decided to construct a railway from Damascus to Mecca, chiefly for the benefit of pilgrims, and now known as the Hedjaz Railway. By February 1902 the line had been completed 25 miles southward of Mezarib (which is 63 miles from Damascus), and the earthworks had been finished for a further 40 miles. The work is still proceeding, and in July 1904 tenders were invited for the construction of five large metal bridges for the Haifa section.

**Midland Water Scheme.**—This project, which formed one of the features of Private Bill legislation in '99, brought into existence a body now known as the Derwent Valley Water Board. At their invitation the Midland Counties Institution of Engineers visited the works on April 26th, 1904, when the following account of the wide scope of the scheme was published. It is for the supply of water to the towns of Leicester, Derby, Sheffield, and Nottingham, and to the counties of Derby and Notts. It includes the construction of (1) five reservoirs for impounding the rivers Derwent and Ashop; (2) about 100 miles of aqueduct for distributing the water to various authorities; (3) about 20 acres of filter-beds at Bamford; and (4) a service reservoir at Ambergate. There will be three reservoirs on the river Derwent, called the Howden, Derwent, and Bamford reservoirs, and two on the river Ashop—the Haglee and Ashopton reservoirs. The main aqueduct extends from Howden to Ambergate reservoir, a distance of 30 miles. From that reservoir the pipes for distributing the water to Derby, Leicester, and Nottingham will commence. The scheme divides itself into three instalments, capable of yielding each about 11,000,000 gallons per day. It is estimated that the first instalment of the works will take about seven years to complete. The ultimate supply of water to each authority will be approximately as follows:—Leicester, 9·8 million gallons per day, Derby 6·8, Sheffield 6·8, Nottingham 3·9, Derby County 5·0, Notts

County—until 1930—1'0, total, 33'3 million gallons per day.

**Mont Blanc Railway.**—It was reported in Sept. 1904 that preliminary steps were being taken for the construction of this line. It is to commence at the existing station at La Fayette, and, following the southern slopes of the mountain will in the first place have its terminus at the Aiguille du Gouter, at a point 12,140 ft. above sea-level. The continuation of the line up to the extreme summit of the mountain, some 3000 ft. higher, is contemplated as the natural conclusion of the enterprise; but, in the first instance, provision is being made only for the construction up to the lower terminus named. For the most part the railway will be in the open. Of its total length of 18½ kilometres, there will only be about 3 kilometres in tunnel. Metre gauge has been adopted, the maximum slope being 232 millimètres per mètre. Each train will consist of a locomotive and two carriages, capable of accommodating 84 passengers in all. The traffic is expected to reach ten trains per day each way during the three summer months. The cost of the undertaking is estimated at £437,000.

**Newport (Mon.) Waterworks.**—This municipal undertaking was completed in 1904, and was opened by the Mayor on May 30th. The enterprise, which includes a new intake system at Newchurch and a reservoir at Llanvaches, provides storage for 400,000,000 gallons, and cost £380,000. The works include a tunnel of 2½ miles and a pipe-main 9 miles long. The old waterworks have a capacity of 261,000,000 gallons, and cost £278,000.

**New York's New Bridge.**—This great bridge across the East River, connecting Manhattan Island and Williamsburg, was opened on Dec. 19th, 1903. It is the largest single-span suspension bridge in the world, and was over seven years in course of construction. The entire length is 7654 ft., of which the river span is 1600 ft. The width is 118 ft., and it is supported by two steel towers 332 ft. high, each containing 13,048 tons of steel. The total amount of steel used in the bridge is 40,000 tons. There are two trackways, two elevated railways, two bicycle paths, four tramways, and two footways. The cost up to the date of opening was estimated at over 10,000,000 dollars.

**New York Rapid Transit.**—The first portion of this great undertaking, which has been described as the greatest engineering feat of the kind ever attempted, was opened on Oct. 27th, 1904, the trains running as far as 154th Street. The section in question is 9 miles long, and work on the others was then described as in active progress. The history of the scheme as a whole begins practically on Feb. 24th, 1901, when a contract was signed by the Rapid Transit Commission (on behalf of the City) and Mr. J. B. Macdonald for the construction of the whole underground system in 4½ years for £7,000,000. The contractor was to build and equip the line according to the plans prepared by the engineers of the Commission, and to maintain and operate the line for a term of fifty years from its completion. A comprehensive summary of the work as then planned is as follows: length of all sections, 109,570 feet; total excavation of earth, 1,700,228 cubic yards; earth to be filled back, 773,093 cubic yards; excavation of rock, 921,128 cubic yards; tunnelling through rock, 368,666 cubic yards.

Of local stations there were to be 43, express stations 5; and 10 station lifts. The ceremony of cutting the first sod took place on March 24th, 1901. There are many new features in the undertaking, which is merely a subway, as distinct from a tunnel, for in the daytime artificial light is not required in the stations, which in most cases are approached by short straight staircases. Arcades have been constructed leading to the great stores, etc., and the names of the stations are emphasised by illustrations. Electricity is the motive power. Up to the date of the opening several modifications had been made in the original plan, the length of the whole line being then given at 20 miles, and the number of stations 49. It is intended to continue the system under the Harlem River in one direction and to Long Island in the other.

**Niagara Utilisation.**—This great work has been described in our previous editions. The total energy of the Falls is calculated at 16,000,000 horse-power. Early in 1904 a report, prepared at the instance of the Toronto municipal authorities, was published, showing the present condition of affairs at the Falls. The capacity of the existing power-plants and those under construction on the American and Canadian side of the Falls was 675,000 horse-power, or 12½ per cent. of the total power available. Of the above, Canadian companies were developing 375,000 horse-power. Toronto consumed 30,000 horse-power. The average cost of a horse-power per annum to Ontario consumers was £7. It could be delivered from Niagara at a maximum cost of £3. From Toronto, on March 14th, it was stated that an agitation had been set on foot to protect the Falls from exhaustive drainage. In September an announcement was made that the Toronto and Niagara Power Co. had secured a right of way, for transmission purposes, between the Falls and Toronto, a distance of 86 miles. For the year ending June 30th, the gross earnings of the largest concern at work on the spot, the Niagara Falls Power Co., came to £225,284. Other income amounted to £22,987, and operating and other expenses were £42,906, leaving a net amount available for payments to security holders of £205,365.

**Nicaragua Ship Canal.**—(See former editions.)

**Panama Canal.**—In our last edition was traced the recent history of this scheme and that of its rival, the proposed ship canal through Nicaragua. On Nov. 3rd, 1903, the revolution broke out, and the independence of the Isthmus was declared. On Nov. 18th the Hay-Bunau-Varilla Treaty was signed at Washington, providing for the construction and control of the canal. Panama granted the use in perpetuity of a zone 10 miles wide, and the exclusive control for police, judicial, and other purposes; ceded territory for subsidiary canals and the coast-line within the zone; while as to the cities of Panama and Colon, if police and other matters prove unsatisfactory, the United States may undertake them. The canal is to be neutral, and open to the world's commerce. For these grants the United States were to pay \$10,000,000 on the ratification of the treaty, and \$250,000 yearly, beginning after nine years. The sovereignty of Panama over all her territory was recognised. The treaty was signed at Panama on Dec. 2nd, and President Roosevelt

dealt with the matter in his Message to Congress on Dec. 7th. Previously the United States had agreed to pay the existing company £8,000,000 for all their works and rights.

On May 8th, 1904, the Secretary of the United States Treasury signed the warrant for the £8,000,000 to be paid to the Panama Canal Co. In August it was stated that the customs dues of the United States were to be extended to the canal zone, by which all goods entering the zone from foreign countries and for use in constructing the canal must pay the same tariff as if the goods entered the United States. On Oct. 20th there was published a letter addressed by President Roosevelt to the Secretary for War directing him to proceed to the Isthmus of Panama and confer with the President and other Government officials, and to reassure them. In the letter he said: "We have not the slightest intention of establishing an independent colony in the middle the state, or of exercising any greater Governmental functions than are necessary to enable us conveniently and safely to construct, maintain, and operate a canal under the rights given to us by treaty."

Some striking statements were made by Mr. Malet, British Consul at Panama, in his report for 1903 issued in October. He said that the effect of the delimitation agreement between the United States and the Republic is that the town of Panama for all practical purposes is left without a seaport for foreign commerce, as the anchorage for vessels at Flamenco, and the wharf at La Boca, now called Port Ancon, which together constitute the port of Panama as far as ocean-going vessels are concerned, both lie within the territory of the United States. The towns of Panama and Colon are now confined to two small patches wedged in at the two extremities of the American zone, and their future commercial existence appears to be inseparably bound up with the leased territory, as it would be practically impossible for them to enforce any Customs regulations of their own which were not in harmony with those prevailing across the border. Except the town of Bocas del Toro, the remainder of the Republic contains no commercial centres of any importance, and the virtual economic annexation of Panama and Colon renders the Americans completely masters of the situation. The recent decision, by which all descriptions of merchandise from the United States are to be admitted into the zone duty free whilst all imports from abroad must pay duty in accordance with the United States tariff, had obviously been framed for the purpose of ensuring that the vast supplies of machinery and all other articles required for the construction of the canal shall be purchased, as far as possible, exclusively in the United States.

As to the work of completion, Mr. Wallace, the chief engineer of the Commission, speaking at Chicago on Sept. 20th, said his staff had solved the problem of diverting the Chagres River, which had so much hindered the Company. Later reports showed that a large quantity of modern machinery was being sent to the scene of operations. It was stated in October, however, that the remainder of 1904 and the whole of 1905 would probably be spent in preliminary work. By the spring of 1906 it is expected that the route will be entirely mapped out, and the actual work of digging begun, and then it

will take eight years to complete the work. The line already marked out by the French company will be followed pretty closely, except that, wherever possible, curves will be straightened. The estimated cost of completing the canal is \$150,000,000, to which must be added \$40,000,000 paid to the French Canal Company, and \$10,000,000 paid to the Panama Government for the grant of land, making a total of \$200,000,000. According to a memorandum by Admiral Walker, Chairman of the U.S. Commission, published in November, some 200 or 500 engineers and over 1000 labourers were employed, and, besides preliminary work, the excavation on the Culebra was in progress.

On Dec. 19th, the chief engineer of the Isthmian Canal Commission laid his report before the Committee of Commerce of the U.S. House of Representatives. He was in favour of a return to M. de Lesseps' original plan for a sea-level waterway as the best and cheapest in the end. He gave the cost at £60,000,000, and the time of construction at 20 years.

**Paris Metropolitan Railways.**—Early in '98 it was announced that the Government and the Paris Municipal Council had agreed to a normal-gauge system to be worked by electricity. The railway east to west from Vincennes to the Porte Maillot was opened on July 19th, 1900, and the branch from the Place de l'Etoile to the Trocadéro was opened on Oct. 2nd. The completion of the second section was announced in Oct. 1902: it runs from the Arc de Triomphe to the Place d'Anvers, at the foot of Montmartre. The earnings for 1903 showed a net balance of £151,434, and a dividend of 6 per cent. was declared. The charges arising out of the terrible accident at Couronnes Station, mentioned in our last edition, amounted to £46,000. Before closing its session on March 26th, 1904, the Municipal Council voted the conclusions of M. Félix Roussel's report as to the supplementary metropolitan system conceded: viz. Invalides and Porte de Chatillon; Place Gambetta and Porte du Danube; Trocadéro and Porte Saint-Cloud, and also the extension of Line No. 3 to the Porte de Champerret, together with a few lines of the supplementary system that are not yet conceded. The third section, from Avenue Villiers to the Place Gambetta, was opened as far as Père Lachaise on Oct. 17th. It includes a station in the Place de l'Opéra, right in front of the Opera House. Many improvements have been introduced throughout the whole system to guard against outbreaks of fire.

**Piræus Railway.**—The first part of the railway from Piræus to the Turkish frontier, *via* Athens, Damerli and Larissa, was opened on March 10th, 1904. The main line was finished as far as Thebes, there being also a branch from Skimatari to Chalcis, whereby communication between Athens and Thessaly is shortened by about 12 hours. When the whole railway, which is of standard gauge, is opened, it will allow of a direct service from Calais to Piræus, and will be the quickest route from England to Egypt and India.

**Plaueu Stone Arch Bridge.**—This bridge, which was in course of construction in 1904, is the longest of its kind in the world, having a span of 295 ft. The following table shows its leading features as compared with others:—

Name.	Country.	Span. ft.	Rise. ft.
Plauen ..	Saxony ..	295	—
Luxembourg ..	Grand Duchy ..	275	54
Morbegno ..	Italy ..	230	33
Cabin John ..	America ..	220	57
Jaremeze ..	Hungary ..	213	59
Grosvenor ..	England ..	200	42

It is built of masonry throughout, and its estimated cost is not more than £24,000, labour being cheap, while there is plenty of stone in the vicinity.

**Prussian Canal Schemes.**—On Nov. 14th, 1904, the Canal Committee of the Lower House of the Prussian Diet passed the first reading of the Bills providing for the construction of the Dortmund-Rhine Canal, the canalisation of the Lippe from its mouth to Hamm, the construction of supplementary works on the Dortmund-Ems Canal, the construction of a canal from Bevergen on the Dortmund-Ems Canal, a ship canal on the Weser at Hemelingen, and to bear a third of the cost of the building of the dams on the tributaries of the Upper Weser. The cost of the work thus sanctioned by the Committee is estimated at £12,287,500.

**Quetta-Nushki Railway.**—A Simla telegram of Aug. 28th, 1902, announced that Lord George Hamilton, Secretary for India, had sanctioned the construction of this line, which will be 82 miles long, and is estimated to cost in all 70 lakhs of rupees. The *Engineer* of Sept. 26th stated that the route selected involves passing through three mountain barriers—viz., the Chiltan, the Mashelak, and the southern tail of the Khwaja Amran range, which separate the Quetta Plateau from the Nushki Plain, by the intermediate steps of the Mastung and Sharud Plains.

**Regent's Canal Overhead Railway.**—In Dec. 1904 a scheme was mooted for an overhead suspended railway, on the principle adopted on the Barmen-Elberfeld-Vöhwinkel line described in our previous editions, to be run along the course of the Regent's Canal. This waterway between Paddington and the East of London is nearly 11 miles in length.

**Roker Pier (Sunderland Harbour Works).**—The final stone of this pier, which forms one of the arms of the new harbour on the Wear, was laid by the Earl of Durham on Sept. 23rd, 1903, the foundation stone having been placed in position by Mr. James Laing, chairman of the River Wear Commissioners, on Sept. 14th, 1885. The pier, which is of granite and concrete, is 2800 ft. long with an inward curve, the width being 35 ft. for a distance of 2000 ft. out and then 41 ft., the height above high water being 10 ft. At the end a great round-head has been constructed to a height 18 ft. above high water, and on this a lighthouse has been built, 54½ ft. high and with a bottom diameter of 31 ft. The cost of the new pier and lighthouse is given at £290,000. The other arm of the new harbour works is known as the New South Pier, inclosing a water space of 125 acres, with an entrance, accessible during heavy weather, of 38 ft. depth at high water. The whole scheme is estimated to cost £540,000, and the designing and construction have been carried out by Mr. H. H. Wake, M.Inst.C.E., engineer to the Commissioners.

**Rome to Naples Railway.**—It was stated in April, 1904, that a survey for an

electric railway between these cities had been made by a British company. It is to run from Rome across the Pontine Marshes to Terracina, and thence to Formio, a small town which is practically a suburb of the important garrison town of Gaeta, and thence to Naples, following more or less the line of the coast. Energy will be derived entirely from water-power, and mainly from the Tiber and the Volturno.

**Rotherhithe - Ratcliff Tunnel.**—On April 25th, '99, the London County Council decided to adopt a recommendation of the Bridges Committee to construct a tunnel under the Thames between Rotherhithe and Ratcliff. The total length of the tunnel and approaches, from Union Road on the south to Commercial Road East on the north, will be about 1¼ mile, and the dimensions will be slightly larger than the Blackwall Tunnel—30 ft. diameter external measurement, sufficient to obtain a carriage-way of 16 or 17 ft. and two footways of over 4 ft. each. During the session of 1900 Committees of both Houses passed the bill. At the first meeting of the Council after the recess, in Oct. 1903, the recommendation of the Bridges Committee to proceed with the work at an estimated capital expenditure of £1,340,000 was adopted. It was stated in the report of the Finance Committee that the improvement would not be completed for about 5½ years, and that the outlay would be spread over seven. At the meeting on Feb. 9th, 1904, the contract was let at £1,088,484.

**Sahara Telegraph Line.**—It was announced in Sept. 1904 that the French Government had decided to run a telegraph line across the Great Sahara desert. It is to start from In-Salah, in southern Algeria, and, running *via* Tidikalt, Tagemont, and Gao, will reach Timbuctoo, covering a distance of about 620 miles. The cost was estimated at £60,000, and the time for completion twelve months.

**St. Lawrence (Quebec) Bridge.** (See last edition.)

**Siberian Railway.** (See separate article under RUSSIA.)

**Simplon Tunnel.** (See former eds.) As will be seen below, serious interruptions occurred in the cutting of the tunnel during 1904. This great work will consist of two parallel tunnels, each about 66,000 ft. long, the distance between them being 57 ft., and connections will be made every 670 ft. One tunnel will be completed for railway traffic first; the other, which will be used for ventilation purposes, may be developed afterwards. By this means 1800 cubic ft. of air can be passed into the underground passages every second, bringing the temperature down to 77° Fahr. It was calculated that the Simplon Tunnel could be completed in the course of 5½ years, or in three years' less time than the St. Gothard Tunnel, although the latter is some 15,000 ft. shorter than the former, the Mont Cenis Tunnel being again some 6000 ft. shorter than the St. Gothard. The fact that the new tunnel will be at a level lower than the two others is also a point in its favour; and, although the first cost will be heavy, the working expenses are expected to be considerably less. While the altitude above the sea of the Mont Cenis is 4,247 ft., and that of the St. Gothard 3,789 ft., that of the Simplon is only 2,312 ft.

One terminus will be at Brieg, in the Rhône Valley, on the same level as the existing sidings of Brieg station. The Italian end will be at Iselle. On Dec. 21st, '96, the Federal Assembly at Berne and the Senate at Rome approved of the tunnel convention. It was estimated that the total cost will be £2,800,000: £2,000,000 is to be borne by the (Swiss) Jura-Simplon Company; £600,000 by the Swiss Government, raised by contributions from the different cantons, and £200,000 by Italy. Operations were commenced near Iselle on Aug. 15th, '98. The contractors are Messrs. Brandt, Brandau & Co., Hamburg, with whom is associated Col. Locher, Zurich. Excellent arrangements have been made for the care of the workmen, and the most modern drilling and other appliances are being used. During May 1904 work on the northern side was interrupted by the outbreak of another hot spring, and by a landslip, which obstructed the supply channel conveying the water for the power-station from the Rhône. The hot spring was first struck on May 16th, the flow being then 4½ gallons per second, and two days later the fault through which the water was flowing was laid bare. The quantity of water then amounted to 7½ gallons per second, and its temperature was 113 deg. Fahr. The quantity of power water for the drills and for refrigerating purposes being insufficient, it was decided to suspend the work of advance, but that of removing the debris proceeded until May 28th, when the supply channel from the Rhône was obstructed as stated, and the work was then stopped. On Sept. 6th a similar occurrence took place on the southern side, causing a suspension of drilling operations pending the completion of arrangements to deal with the outflow. On that date, when about 800 ft. of rock remained to be pierced, a hot spring discharging 20 gallons per second was tapped in the roof, the total outflow on this side being 195 gallons per second. The monthly report issued in December stated that work at the advance headings was still suspended, but that the heading in the parallel gallery on the south side had been pushed on about 30 ft. in advance of that in the main tunnel. The same hot springs had been struck, and thus the amount of hot water coming into the main tunnel was decreased.

**Staines New Reservoirs.** (See last ed.)

**Southwark Bridge Improvement.**—The Bill to carry out this project was abandoned by the City of London Corporation at the meeting of March 24th, 1904, owing to the action of a Parliamentary Committee, as detailed below. The scheme was of considerable importance to the City. At a meeting of the Corporation on Oct. 2nd, 1903, it was decided to put out to competition designs for a new Southwark Bridge, with instructions that they should be as artistic as possible. Two plans, prompted by the difficulties of the gradient, especially of the northern approach, were before the Court, and they adopted one which contemplated the lowering of the summit of the present bridge between 7 ft. and 8 ft., the improvement in the gradient of Queen Street, the raising of the level of Upper Thames Street between 3 ft. and 3 ft. 6 in., where the street intersects the northern approach, and the raising of the streets and lanes leading therefrom proportionately. The design proposed entailed a reconstruction of the bridge, the only portion

of the present structure to be utilised being the shore abutments. In the existing bridge the width between the parapet is 42 ft. 6 in.; the new City bridge was to have a width of 60 ft. 6 in. Independently of the necessity for a new structure, for reasons stated above, it appeared from recent surveys that parts of the the piers afforded indubitable signs of their prolonged wear-and-tear. The central span of the present bridge is 240 ft., which is still, and will probably remain, the largest cast-iron arch in the world, and the side arches have a span of 210 ft. each. It was designed by Rennie, and opened to the public in 1819. Before the Commons Committee on March 15th, 1904, the promoters produced the following interesting figures, to show how the bridge was avoided owing to the steep gradients. The return gives the number of vehicles passing over the four bridges from July 12th to July 19th, 1903:—

London Bridge . . . . .	125,373
Blackfriars Bridge . . . . .	112,305
Tower Bridge . . . . .	85,353
Southwark Bridge . . . . .	24,432

On March 17th the Committee decided against the raising of Thames Street as suggested; and at the further sitting, on April 14th, counsel for the Bill announced the Corporation's decision that, under the circumstances, it was undesirable to proceed with the measure.

**Suakin Atbara Railway.**—This line—also known as the Suakin-Berber Railway—which will be 332 miles long and 3½ ft. gauge, will extend from the Red Sea port of Suakin northwards through that province, then turning in a south-westerly direction and reaching the Atbara River about twenty miles from its junction with the Nile. From here it will run parallel to the river and join the existing line to Khartoum about a mile from the Atbara Bridge. The steepest gradient is 1 in 100, and the sharpest curve 5 degrees; the cost is estimated at about £5250 per mile. In July 1904 it was reported that the work was proceeding satisfactorily, and that the order for all the large bridges on the railway had been placed with Sir W. Arrol & Co., Glasgow, involving 3000 to 4000 tons of steel.

**Swansea's New Dock.**—On July 20th, 1904, the King laid the foundation stone of "The King's Dock" at Swansea. At first the dock will have an area of 66 acres, which may be easily increased when required to 107 acres. The entrance for vessels will be through a lock situated near to the end of the east pier. This lock will be made 875 ft. long between the sills of the inner and outer gates, and the width at the coping level will be 90 ft. The depth of water on the outer sill will be 40 ft. at high water of ordinary spring tides. The dock walls will be vertical, with areas in the rear for warehousing and railway sidings. The length of quays for general trade will be 7350 ft., and for coaling purposes 3200 ft., making a total of 10,550 lineal ft. In order to protect the entrance the present west pier will be extended 800 ft., and a new east pier will be built with an approach jetty extending from it to the lock, and alongside of this vessels will be brought to rest before entering the lock. The contract price is about £800,000, the contractors being Messrs. Topham, Jones & Railton, Westminster.

**Thames Barrage Scheme.**—At a meeting held on Feb. 10th, 1904, at Cannon Street

Hotel, Mr. James Casey, member of the Institute of Naval Architects, and Mr. Barber, M.Inst.C.E., propounded a scheme for the erection of a masonry dam between Gravesend and Tilbury, with provisions for the passage of shipping, a roadway on the top of the dam, and a railway tunnel underneath. The main feature of the scheme was the holding up of a regular quantity of water in the river at all states of the tide. The wharfingers who attended expressed no opinion on the matter, but a small committee was appointed. At a meeting of the Thames Conservancy Board on March 28th, Sir J. McDougall, L.C.C., said the project would mean increased flooding in London; and at the annual meeting of the same body on April 25th the matter was referred to the Board of Trade.

**Trans-Andine Railway.**—It was stated in August 1904 that one of the features of this line will be a spiral tunnel to be made for the purpose of carrying the railway through the summit on the Andes range. It will have a very steep gradient—viz. 1 in 12½—and traffic will be worked on the Abt rack system. To insure additional security, the rack will be trebled. The distance covered by the tunnel will be about 5 miles, but its actual length will be nearly double. The first section of the railway to Juncal is expected to be completed by March 1906.

**Transcaspiian Railways.** See RUSSIA.

**Trans-Pyrenean Railways.**—In Aug. 1904 it was announced that the French Minister of Foreign Affairs and the Spanish Ambassador to France had signed an important railway convention affecting the two countries. It was for the construction of three lines of railway across the Pyrenees, to run from Ax-les-Thermes to Ripoli, from Oloron to Quera, and from St. Giron to Lerida. All three routes—two of which involve long tunnelling—will affect Toulouse as a centre. It was proposed to take them all in hand simultaneously, and complete them in three years.

**Vauxhall New Bridge.**—At the meeting of May 19th, 1903, the London County Council decided upon a steel segmental-arch structure. At the meeting of Oct. 20th the tender for the superstructure, amounting to £142,942, offered by Mr. Charles Wall, of Chelsea, was accepted. Much progress had been made with the abutments and piers in Nov. 1904.

**Wear New Bridge.**—It was reported in Oct. 1904 that the contract for this road and railway bridge had been let to Sir W. Arrol & Co., of Glasgow. Including approaches, it will have a total length of about 1½ miles, the whole costing about £300,000. There will be two decks, the upper for the rails and the lower for the road. The main river-span is to be 350 ft., and the headway above high-water level of ordinary spring tides will be 85 ft. clear. On the south side of the river there will be one side-span of about 220 ft., and on the north side there will be two side-spans, each of 220 ft., the remainder of the length being made up of sixteen arches, with banking.

**Weston-super-Mare New Pier.** (See last edition.)

**Zuyder Zee Reclamation.** (See last edition.)

## ENGLAND AND WALES.

The area of England and Wales is 58,315 sq. m., and the population at the 1901 census was 32,527,843. The separate figures for England and Wales as given in 1901 and as estimated to the middle of 1904 are:—

	Area in sq. m.	Population 1901.	Population 1904.
England . .	50,939	30,811,420	31,976,794
Wales . . .	7,376	1,716,423	1,786,640
	58,315	32,527,843	33,763,434

In 1801 the population was 8,892,536; the increase to 32,527,843 in 1901 was an increase of 265·8 per cent., or 1·3 per cent. per annum. The proportion of males and females in 1901 was 15,728,613 males to 16,799,230 females, showing an excess of 1,070,617 females, an excess which is partially attributable to the fact that men serving in the army, navy, and the merchant service abroad are excluded from the reckoning. In '91 the excess was 896,723. The proportion of females has steadily increased since '51, having been successively 104·2, 105·3, 105·4, 105·5, 106·4, and 106·8 to 100 males. The number of separate families in 1901 was 7,036,868, as compared with 6,131,001 in '91, an increase of 14·80 per cent. as compared with 8·8 per cent. in the previous decade; and the average number of persons in a family fell from 4·73 per cent. in '91 to 4·62 per cent. in 1901. The birth rate declined from 37·89 per cent. in 71-81 and 34·24 per cent. in '81-91 to 31·57 per cent. in '91-01. The death rate also declined from 22·80 per cent. in 71-81 and 20·27 per cent. in 81-91 to 19·18 per cent. in '91-01. The number of inhabited houses increased from 5,451,497 in '91 to 6,260,852 in 1901, an increase of 14·87 per cent. as compared with 12·8 per cent. The average number of occupants to each inhabited house fell from 5·32 per cent. in '91 to 5·20 per cent. in 1901. The increase in population was distributed over the country very unequally. The counties with the highest rates of increase were generally those near London, as Essex, Kent, and Surrey, and the mining and manufacturing counties; whilst the rural counties show lower rates of increase, or even actual decreases. In urban districts there dwelt 25,058,355 persons, or 77 per cent. of the population, in 1901, as against 21,745,286, or 75 per cent., in '91. In rural districts there dwelt 7,469,488 persons, or 23 per cent. of the population, as against 7,257,239, or 25 per cent., in '91. It will be seen, therefore, that the urban population still continues to increase more rapidly than the rural, the rates being approximately 15·2 per cent. in urban districts and 2·9 per cent. in rural districts. The Administrative County of London had a population in 1901 of 4,536,541, as against 4,228,317 in '91, an increase of 308,224, or 7·28 per cent. Most of the central districts of London again showed decreases; but in the others, particularly those remote from the central area, the rate of increase was high, Lewisham, Wandsworth, and Fulham heading the list. The density of the population was in 1901 558 persons per sq. mile as compared with 497 per sq. mile in 1891 and 152 per sq. mile in 1801.

## ENGLAND AND WALES, LOCAL GOVERNMENT OF.

It is only within a comparatively recent period that a complete system of Local Government administration in England and Wales has been established. A sketch of the gradual evolution of the existing system, through the Municipal Corporations Acts of 1835 and '82, the Public Health Acts of '48, '72 and '75, the Local Government Acts of '58, '88 and '94, will be found in the 1900 edition. See also LONDON BOROUGH COUNCILS, LONDON COUNTY COUNCIL, etc.

The Lord Lieutenant of each county represents the Crown, but the position is mainly an honorary one. In each county there is also a Sheriff, "pricked" or appointed annually by the Crown, and a Clerk of the Peace (who is generally the Clerk of the County Council).

### Local Government Board.

This department was established by the Local Government Board Act, '71, and superseded the Poor Law Board, which had dealt only with Poor Law matters, and had existed since '47, when it took the place of the Poor Law Commissioners. The Local Government Board became the central department for Poor Law, Public Health, and other Local Government matters, and many duties were transferred to it that had previously been carried out by departments of the Home Office and the Privy Council. The year after the Board was established considerable changes were made by the Public Health Act, '72, and new duties of a very extensive character were imposed on the department. From that date to the present no session has passed without further additions being made to its work, so that there is not a local authority of any kind whatever that is not now to some extent subject to its control.

The Board has an extensive control over Boards of Guardians; it regulates and directs their procedure by orders issued without the authority of Parliament; and its sanction is necessary to most of their acts, including the appointment and dismissal of officers. Over the other authorities its power is not so complete, but County Councils, Town Councils, Urban and Rural District Councils, as well as Parish Councils, all have to obtain the Board's sanction to their proposals to borrow money, to make bye-laws, and to do many other things. The power of sanctioning loans enables the Board to impose conditions and see that the various works proposed by the Councils, such as works of sewerage, water supply, and housing, are properly carried out. It has power to enforce the performance of certain duties by local authorities—such as the provision of a proper water supply or system of sewerage. The Board has extensive powers of altering boundaries and areas; it can issue Provisional Orders for various local purposes which, when confirmed, have the effect of an Act of Parliament; and it reports to the Parliamentary Committees on the proposals of Local Authorities in Private Bills. In connection with County and County Borough Councils the Board performs an important work in managing the Local Taxation Account.

Under the Burial Act, 1901, many powers and duties previously belonging to the Home Office were transferred to the Board, and by the

Housing of the Working Classes Act, 1903, provision is made for the transfer to the Board of the remaining powers of the Home Office as regards the housing of the working classes. The Local Government Board exercises most important functions as regards the country at large. It takes active precautions to prevent the introduction or spread of any specially dangerous diseases, such as plague or smallpox, and can prohibit the importation of infected articles. As respects London, the Board is the Department responsible for the maintenance of the water supply, and it has increased duties under the Metropolis Water Act, 1902.

The Board is represented throughout the country by a large staff of General Inspectors, who attend meetings of Boards of Guardians and inspect all Poor Law institutions; by Engineering Inspectors, who inquire into all proposals for sewage disposal works, water supply schemes, street improvements, and other undertakings that involve the raising of loans; by Medical Inspectors, who visit districts in which any epidemic disease breaks out, and report upon it and advise as to the steps needed to prevent its recurrence, and who inspect vaccination work; by Poor Law Medical Inspectors, whose duties extend to the medical supervision of workhouses, infirmaries, and Poor Law schools; and by County and District Auditors, who audit the accounts of practically all local authorities other than Municipal Corporations, and have power to disallow and surcharge against individual members all items of expenditure which in their opinion are illegal. An appeal can be made to the Board against any disallowance or surcharge, and it has power to grant remission. Under the Education Act, 1902, the Education accounts of Town Councils are subject to this audit.

The Board consists of a President (who is a Cabinet Minister), the five principal Secretaries of State, the Lord President of the Council, the Lord Privy Seal, and the Chancellor of the Exchequer; but the whole of the functions of the Board are vested in the President. Everything that the Board does is done in his name, and he is responsible to Parliament for all its acts. The Department is also represented in Parliament by a Parliamentary Secretary. The usual functions of the Board are, however, exercised by the Permanent Secretary and five Assistant Secretaries. The staff of the Department numbers over 600.

President: Rt. Hon. W. Hume Long, M.P.

Parliamentary Secretary: J. G. Lawson, M.P.

Permanent Secretary: Sir S. B. Provis, K.C.B.

Assistant Secretary and Chief General Inspector: W. E. Knollys, C.B.

### Police of England and Wales (Counties and Boroughs).

See previous editions for the various Acts from '39 to '56 relating to the appointment of police in counties and boroughs. The authorised strength of county and borough police was for the year ended Sept. 29th, 1902, 28,096. Out of this number there were 1360 in the Liverpool force, exclusive of 473 appointed at private cost. The Manchester force contained 1009 men, exclusive of 3 appointed at private cost; Birmingham 820, exclusive of 16 appointed at private cost; Leeds 572; Bristol

499, exclusive of 16 at private cost; and Sheffield 515, exclusive of 15 appointed at private cost. All these cities and boroughs and a few others of the more populous towns have a more or less efficient detective police service. Those for Liverpool, Manchester, Birmingham, Leeds, and Bristol appear to be very good.

### **Local Administrative Bodies and their Powers.**

The various local administrative bodies that now exist in England are as follows:—

County Councils for administrative counties, Municipal Corporations for county boroughs and non-county boroughs,

Urban District Councils for urban districts other than boroughs,

Rural District Councils for rural districts,

Parish Councils for parishes having a population of 300, or if with a less population by special grant from the County Council, and

Parish Meetings for every rural parish—that is, for every parish not comprised in an urban district or borough.

From the Parish Meeting, which consists of parochial electors (the units of local government), to the County Council, all are intimately related to one another, and are concerned in what may be described as the general good government of the country from the points of view of highways, sanitary and general health conditions.

Besides these, there are the Boards of Guardians for Poor Law Unions.

School Boards were abolished under the Education Acts, 1902 and 1903.

**County Councils.**—The Local Government Act, '88, which established County Councils, transferred to them the administrative powers of the Quarter Sessions. These included the erection and maintenance of county buildings, the provision of asylums for county lunatics, and the maintenance of reformatory and industrial schools, the erection and maintenance of bridges, regulation of locomotives, the division of the county into polling districts for election purposes, the execution of the Acts relating to the contagious diseases of animals, destructive insects, fish conservancy, weights and measures, wild birds, and other minor matters. One of the chief powers of County Councils is the control and maintenance of all main roads in their county. Among other powers are the carrying out of schemes under the Housing of the Working Classes Act, the provision of technical education, taking proceedings as regards the pollution of rivers, and the provision of isolation hospitals; and they have power to act on default of District Councils in respect to their obligations under the Public Health Acts and other matters. They distribute moneys received by them out of the Local Taxation Account to the authorities in their district. They have power to issue orders altering local areas, and can oppose and promote Bills in Parliament. They are the Local Education Authority over the whole of the county except in the larger boroughs and urban districts, and they maintain and control all elementary schools which receive a Government grant. They are also the Local Authority for higher education, and have power to levy a *2d.* rate for the purpose each year. Under the Motor Car Act of 1903 they register motor-cars and grant licences to the drivers.

Extensive powers now exercised by certain Government Departments may be transferred to a county council (if a majority of the local authorities in the county do not object) by means of Provisional Orders. For *personnel* of Councils see pp. 178-180.

**Borough Councils.**—Every Municipal Borough is invested with the powers conferred by the Municipal Corporations Acts, which are the most extensive powers of local government possessed by any local authority. In addition, every Municipal Corporation is the urban sanitary authority for the borough, and exercises all the powers of the Public Health Acts and of all the many statutes incorporated therewith. Indeed, the only important matter that does not come under their control is the administration of the Poor Laws. Some of the larger boroughs—*i.e.* (roughly) those with a population of 50,000 in 1888—are termed county boroughs, and in them the whole of the powers of a County Council, so far as they are applicable to a borough, are vested in the Corporation; but non-county boroughs are, for general county purposes—such, for example, as police, lunatic asylums, and main roads—deemed to be merged in the county, and have to pay their contribution towards the county rates. Town Councils have powers as to higher education; and in county boroughs and boroughs with a population of 10,000 the Councils are the Local Education Authorities.

**Urban District Councils.**—These may be said to be the public health and highway authorities in urban districts, and their powers are wholly derived from the Public Health Acts, supplemented by minor statutes, by certain provisions of the Local Government Act of '94, under which some few powers were transferred to them, and in some districts by local Acts specially obtained from Parliament for each particular district. These Councils have power to maintain, widen and improve streets, to suppress nuisances, to promote works of sewage disposal and for the supply of water, gas, and electricity to the town. They may establish baths and wash-houses, hospitals, markets, pleasure grounds, and public abattoirs. Their powers of regulation extend to the licensing of common lodging-houses, slaughter-houses, of hackney carriages, of dealers in game, explosives, petroleum, and of persons carrying on offensive trades. They make byelaws regulating the construction of new streets and buildings, the management of common and other lodging-houses, of slaughter-houses, of hackney carriages, of bathing, as to nuisances, and many other matters, all of which are directed towards the improvement of the sanitary condition of the district. In urban districts with a population of 20,000, the Councils are the Local Education Authorities.

**Rural District Councils.**—These Councils act for rural districts, and their general powers are similar to those of an Urban District Council, except that they are not so extensive. The Council is the sanitary authority under the Public Health Acts, but its powers of dealing with nuisances and similar matters are very limited. It also acts as highway authority as regards all the roads in its district except main roads. It is the duty of the Rural District Council to protect all public rights of way, and to prevent the obstruction or stopping up of any highway and the encroachment on the

roadside waste. Rural District Councillors represent their parish on the Board of Guardians.

**Parish Councils.**—These bodies are elected for all parishes which had, according to the census of '91, a population of 300. If a parish has less population than that it can obtain a Parish Council by petitioning the County Council to issue an order directing one to be elected. At present the general powers of a Parish Council are limited to a few matters, such as the appointment of overseers of the poor, the repair of footpaths, the purchase of fire engines, the management of recreation grounds and allotments, and the control of parochial charities. In certain cases it has power to establish a burial ground, to light the streets of the parish, or to set up a free public library and public baths and wash-houses. The moneys required by a Parish Council are generally obtained out of the poor rate.

**Parish Meetings.**—In every rural parish—that is, in every parish which is not in a municipal borough or in any other urban district—there must be a parish meeting at least once a year during the month of March, at which those persons who are registered as parochial electors of the parish and no others may attend. If the parish is entitled to have a Parish Council the Parish Meeting elects it. If not, then the Parish Meeting appoints overseers of the poor, and exercises certain of the powers of a Parish Council.

**Boards of Guardians.**—See 1902 edition for a sketch of the evolution of the poor relief system of this country. When the parochial system was put an end to, in 1834, by the **Poor Law Amendment Act of '34**, the Poor Law Commissioners were empowered to unite parishes into unions for the purpose of Poor Law administration, and in that way some 600 unions were formed out of the 15,000 parishes in the kingdom. The administration of this Act was placed in the hands of the Poor Law Commissioners, and their powers were afterwards continued in the hands of the Poor Law Board, which was established in '47, and were subsequently transferred to the **Local Government Board**, by which the former board was absorbed in '71, and in whose hands the Poor Law administration of the country is now vested. Locally the administration of the Poor Laws is vested in **Boards of Guardians**, who are elected for each of the 658 Poor Law unions into which England and Wales is now divided. These boards maintain workhouses for the indoor poor, and give out-relief to those who in their opinion are entitled to relief in their own homes. Besides workhouses, Boards of Guardians maintain infirmaries for the sick and schools and cottage homes for children. The administration of outdoor relief is conducted through the agency of relieving officers, each of whom has a district allotted to him, for the supervision of the poor in which he is responsible. The guardians are empowered to expend their funds in many ways which are indirectly connected with actual pauperism, such as in the administration of the **Vaccination Acts**, and the giving of medical relief to the labouring classes, none of which expenditure is reckoned as having the disqualifying taint which applies to actual Poor Law relief as such; it must be remembered that the

receipt of any ordinary relief at once disqualifies the recipient from the right to be on the register of electors for both Parliamentary and local elections. In addition to the funds which they raise from the poor rates by precepts on the overseers of each parish in their Union, Boards of Guardians are empowered to recover from the relatives of all persons who become chargeable as paupers such contributions as they think fit, and under the Poor Laws the relationship which carries this liability to contribute is kinship by blood in the direct ascending or descending line, so that collaterals do not bear it. Boards of Guardians receive grants from the County Council out of the proceeds of licence and excise duties towards many of their expenses, such as the salaries of officers, maintenance of lunatics, etc.

Other Poor Law authorities, who exercise power in relation to the relief of the poor, are (1) **The Metropolitan Asylums Board**, who are the managers of the Metropolitan Asylums District, constituted under the Metropolitan Poor Act ('67) for the reception and relief of fever and small-pox patients; (2) **The Managers of two Metropolitan Sick Asylum Districts**, constituted under the same Act; and (3) **The Managers of School Districts** formed under the Poor Law Amendment Act ('44) for the maintenance of district schools, to which children are sent by certain boards of guardians instead of being maintained in the workhouses or in schools provided by the guardians.

### **Election and Qualification of Members.**

The elections of all these bodies are now conducted by ballot and in similar manner to Parliamentary elections. Elections are held either triennially or annually (for a third of the body). Elections of Guardians, Urban and Rural District Councillors, and Parish Councillors, are regulated by special rules issued by the Local Government Board. **Parochial Electors**, i.e., persons on the parliamentary or local government register, are entitled to vote at these elections. The qualification for election as Guardian, District or Parish Councillor, consists in either being a Parochial Elector or having resided within the parish or district during the whole of the twelve months preceding the election. **Town Councillors** are elected by the burgesses, and the qualification for election consists in being a burgess and possessing or occupying property in the borough of a certain value. The qualification for a **County Councillor** is similar to that of a Town Councillor, but, in addition, peers owning property in the county, and persons registered as ownership voters for parliamentary elections, are qualified.

### **Rating Powers.**

The most generally levied rate is the **Poor Rate**, which is raised in every parish outside London by the Overseers of the Poor. It was instituted by the statute of 43 Elizabeth, and for over two centuries it was practically raised for and limited to the maintenance of poor persons unable through sickness or otherwise to maintain themselves or their families; but by degrees it became convenient to graft upon it other charges; and now County Councils, Boards of Guardians, Municipal Corporations as regards their expenditure under the Municipal Corporations Act, and as Local Education

Authorities, Rural District Councils, Parish Councils and Parish Meetings raise their funds for their various purposes out of this rate, either indirectly or by precept addressed to the Overseers. Thus County Councils levy a county rate upon Boards of Guardians of the various Unions in the county. These Boards in their turn raise the money which they require for Poor Law purposes, and for the purpose of meeting the county-rate precepts, by issuing contribution orders on the Overseers for the sums to be raised by means of the **Poor Rate**.

A different mode of raising money is, however, prescribed in respect of moneys required by Municipal Corporations when acting as sanitary authorities under the Public Health Act and by Urban District Councils. In both these cases a special rate called the **General District Rate** is levied, and this is assessed at a lower rate upon land than that which is charged on buildings and other properties. Rural District Councils have power to raise moneys for expenses chargeable to any particular parish by requiring the Overseers to levy a special sanitary rate; and Parish Councils have power by means of precepts upon the Overseers to require special rates to be raised for lighting and for public libraries.

For the purpose of preparing the Poor Rate a valuation list is made for each parish, containing particulars as to the gross rental and rateable value of all properties in the parish liable to be rated. These valuation lists are the basis for practically all the local rates. In London the Borough Councils act as Overseers and raise one rate for all purposes, called the **General Rate**.

The total amount raised by the Poor Rates during the year ended Lady Day, 1903, was £24,958,592. There is no fixed limit to the amount of the rate which may be raised by a local authority. Also see **Local Taxation Commission** below.

#### **Local Taxation Account.**

This is an Account kept at the Bank of England into which certain Imperial Revenues are paid for distribution by the Local Government Board to County and County Borough Councils in aid of Local Taxation. It was established under the Local Government Act, '88, when the system of direct grants by Parliament in aid of special services ceased. The Commissioners of Inland Revenue pay into the Account the proceeds of the duties on certain specified licences (beer, spirits, game, tobacco, etc.), called local taxation licences; and the amount of these licences ascertained to have been collected in each county is paid out of the Local Taxation Account to the council of such county. The Commissioners also pay into the Account 80 per cent. of half the proceeds of the Estate Duty; this grant is distributed among the counties in proportion to the share which the Local Government Board certified to have been received by each county during the financial year '87-8 out of the grants previously made in aid of local rates, and is used in relief of local taxation. In addition, there is paid into the Account 80 per cent. of the amount raised by certain Beer and Spirit Duties—viz., 3d. a barrel on beer and 6d. a gallon on spirits. The sums recorded by the Account for the year ended Lady Day, 1904, were as follows:—

Local Taxation Licences	£3,651,631
Estate Duty	2,096,163
Beer and Spirit Duties	1,192,499
Total	£6,940,293

Out of this amount £800,565 went to defray the cost of the Metropolitan Police, and £300,000 more was used for Police Superannuation generally. Practically all the rest was distributed among the County Councils in aid of local taxation.

There are separate Local Taxation Accounts for Scotland (*q.v.*) and Ireland (*q.v.*). The Local Taxation Accounts of the three countries also receive the amount of the Agricultural Grants allotted to them. See **FINANCE, NATIONAL**.

#### **Local Taxation Commission.**

The Royal Commission which was appointed in '96 "to inquire into the present system under which taxation is raised for local purposes and report whether all kinds of real and personal property contribute equitably to such taxation; and, if not, what alterations in the law are desirable in order to secure that result," has presented several reports: the first, dated December '98, dealing with valuation and the collection of rates; and the second, dated January '99, dealing with the rating of tithe rent-charge. The first Report was fully described in our 1901 ed. Its main suggestion was that the councils of counties and county boroughs should be the valuation authorities, and that the valuation lists of those authorities should be the basis on which rates and taxes for all purposes, whether imperial or local, should be raised. As regards the collection of rates the Commissioners recommended that the collection of all rates in Boroughs should be made by the Borough Councils, and in Urban Districts by the Guardians; and that all rates should, as far as practicable, be levied on one Demand Note, specifying the rateable value of the premises, the rate in the pound, and the amount of rates payable for each purpose, and the period for which the rate is made. These recommendations have not been carried into effect. In the second Report the Commission suggested that, pending their final recommendations, some measure of relief from rates should be given to the owners of tithe rent-charge not severed from the benefice. In consequence of this recommendation the Tithe Rent-charge (Rates) Act, '99, was passed exempting parochial incumbents from payment of one-half of the rates on their tithe rent-charge, and in 1901 the operation of this Act was extended to March 31st, 1906.

The Final Report of the Commission was issued in May 1901. It is fully dealt with in the 1903 ed., but it will be convenient to refer again to the principal suggestions. These are chiefly with a view to relieving the ratepayers. The view of the Commissioners was that a distinction should be made in local expenditure between services which are national in character and generally onerous to the ratepayers, and services which are local in character and beneficial to the ratepayers. Thus poor relief, police and criminal prosecutions, education, and the maintenance of main roads, are considered to be national services, and to meet the expenditure under these heads it is considered that State assistance is necessary. The Commis-

sioners consider that the funds for national services ought to be raised in accordance with the principle of ability, and they come to the conclusion that the grievances of the ratepayers can only be remedied by either a direct contribution from the Exchequer or the extension and development of the system of assigned revenues. These two methods—the system of direct contributions or grants-in-aid, and the system of assigned revenues—furnish the chief point of difference between the Commissioners. The Majority Report, signed by 12 of the members, favours the latter system, while a separate report by Sir E. Hamilton and Sir G. Murray advises the adoption of the other plan. The Chairman, Lord Balfour of Burleigh, also, is in favour of grants-in-aid rather than assigned revenues.

The Commissioners say that the basis of local taxation is too narrow, and that a greater share of the expenditure on the great "National" services should be defrayed otherwise than out of rates. They are of opinion that **personalty does not contribute sufficiently to local purposes.** The Report mentions certain revenues which might be assigned to local purposes, and contemplates an increase of about £3,000,000 in the amount annually paid from Imperial sources to the local authorities.

As regards agricultural land and tithe rent-charge, the Report states that when the reform of local taxation suggested is carried out, the present grants should cease. No alteration of the law is suggested with respect to the rating of shops, manufactories, railways, etc.

The rating of land values is not recommended.

Exemptions from rateability are not favoured, but it is suggested that where exemptions have in the past been granted by statute they should be allowed to continue, but that no further extension of the principle of exemption should be permitted.

#### Land Rating (Agricultural).

By the **Agricultural Rates Act, '96**, occupiers of agricultural land in England and Wales were exempted from payment of one-half of the rates otherwise payable on land during the five years ending March 31st, 1902. The period has since been extended by the 1901 Act for four years—i.e. to 1906. This exemption does not apply in respect of rates to which land is already assessed at only one-half or less than one-half its rateable value, such as the General District Rate in urban districts and the Special Expenses Rate in rural districts, nor does it apply to rates levied in respect of works primarily for the benefit of the land, such as drainage, walls, and embankments; but it operates as regards all the other important rates, including the Poor Rate, County Rate, Borough Rate, etc. **Agricultural land** is "any land used as arable, meadow or pasture land only; cottage gardens exceeding a quarter of an acre, market gardens, nursery grounds, orchards, or allotments, but does not include land occupied together with a house, as a park, gardens other than as aforesaid, pleasure grounds, any land kept or preserved mainly or exclusively for purposes of sport or recreation, or land used as a racecourse." To meet the deficiency thus arising, and to prevent a greater burden being placed on occupiers of other property, **grants-in-aid** are made by the Local Government Board to "spending authorities" out of the Local Taxation Account,

the Inland Revenue Commissioners paying the annual sum required into the Account out of the proceeds of Estate Duty on personal property. The "spending authorities" are the Councils of Counties, Boroughs, and Urban and Rural Districts, Boards of Guardians, and the Receiver of the Metropolitan Police District. The **total rateable value of agricultural land** in England and Wales in July '96, was £24,565,058; at Lady-day '99 it had fallen to £24,034,703. The total rateable value of all property had risen from £165,412,266 in '96 to £175,622,758 in '99. The **total amount of the grants** paid to authorities in England and Wales during 1903 was £1,328,000. Of this £389,000 went to County Councils, £355,000 to Rural District Councils and £501,000 to Guardians. These grants represent an average rate of about 1s. 1½d. in the £ on the total rateable value of agricultural land.

#### Local Taxation Returns.

Local authorities are required to make annual returns of their receipts and expenditure to the Local Government Board, who in due course publish the information thus obtained in summary form. The latest complete returns published are for the year 1901-2. These include summaries of the accounts of no less than **28,322 local authorities**, including 62 County Councils, 67 County Boroughs, 250 other Municipal Boroughs, 811 Urban District Councils for districts other than boroughs, 672 Rural District Councils, 6739 Parish Councils, 398 Parish Meetings, 658 Boards of Guardians, and 2545 School Boards, besides a host of other authorities, such as Hospital Boards, Harbour Boards, Commissioners of Sewers, Burial Authorities, etc.

The total receipts of local authorities in England and Wales during the year amounted to £121,554,966, and their total expenditure to £121,239,955.

(1) The receipts comprised the following items:—

	£
Public rates . . . . .	46,438,764
Grants out of moneys raised by the Imperial Government . . . . .	12,531,353
Rents and profits of property . . . . .	2,301,535
Revenue (gross) of local undertakings, such as gasworks, waterworks, tramways, &c. . . . .	20,462,833
Loans . . . . .	34,376,115

Thus 38 per cent. of the receipts came from public rates, 10 per cent. from Imperial grants, 12 per cent. from revenue from local undertakings, and 28 per cent. from loans.

(2) The expenditure comprised the following items:—

	£
Highways, bridges and ferries . . . . .	15,417,299
Poor relief and maintenance of pauper lunatics . . . . .	14,562,651
Education . . . . .	12,627,493
Police . . . . .	5,680,561
Sewerage and sewage disposal . . . . .	4,549,745
Gasworks, waterworks and other local undertakings . . . . .	27,170,171
Repayment of loans and interest . . . . .	18,336,837

Over 22 per cent. of the total expenditure was in respect of local undertakings, 15 per cent. for repayment of loans and interest, 10 per cent. for education, and 12 per cent. for poor relief.

County Treasurer, J. P. Wilton Haines, King Street, Gloucester.

**Hampshire** (or Southampton).—**Chairman**, The Earl of Northbrook, G.C.S.I.; **Clerk**, Henry Barber, LL.B., The Castle, Winchester; **Deputy Clerk**, F. V. Barber, LL.B.; **Chief Constable**, Major St. A. B. Warde, Hants Constabulary, Winchester; **County Surveyor**, W. J. Taylor, M.I.C.E.; **County Treasurer**, G. E. Yonge; **Deputy Treasurer**, E. V. Dashwood; **Director of Education**, D. T. Cowan.

**Herefordshire**.—**Chairman**, Col. Prescott-Decie; **Clerk**, J. R. Symonds, Hereford; **Chief Constable**, Capt. the Hon. E. S. Stanhope; **County Surveyor**, A. Dryland, Hereford; **Secretary for Education**, J. Wiltshire, Hereford.

**Sussex** (East).—**Chairman**, Rear-Admiral the Hon. T. S. Brand; **Clerk**, F. Merrifield, Lewes; **Chief Constable**, Major H. G. Lang, Lewes; **Surveyor**, F. J. Wood, Lewes.

**Sussex** (West).—**Chairman**, The Earl Winter-ton; **Clerk**, F. Merrifield, Lewes; **Chief Constable**, Capt. G. R. B. Drummond, Horsham; **Surveyor**, William McIntosh, Horsham.

**Warwickshire**.—**Chairman**, J. S. Dugdale, K.C.; **Clerk**, E. Field, Leamington; **Deputy Clerk**, H. Field; **Chief Constable**, Capt. J. T. Brinkley; **Surveyor**, J. Willmot; **Treasurer**, S. C. Smith, Lloyds Bank, Ltd., Warwick; **County Finance Clerk**, A. W. Fox, Warwick; **Director of Education**, Bolton King, Warwick.

**Westmorland**.—**Chairman**, F. Markham; **Clerk**, J. Bolton, Kendal; **Chief Constable**, Charles de Courcy Parry, Esq.; **Surveyor**, J. Bintley; **Treasurer**, G. E. Cartmel.

**Wiltshire**.—**Chairman**, Lord Edmond Fitzmaurice, M.P.; **Clerk**, R. W. Merriman; **Treasurer**, E. B. Merriman; **Accountant**, T. A. Dring; **Surveyor**, C. S. Adye; **Medical Officer of Health**, Dr. J. Tubb Thomas; **Analyst**, Dr. Bernard Dyer; **Chief Constable**, Capt. Sterne, R.N.; **Director of Education**, William Pullinger, County Offices, Trowbridge; **Secretary Agricultural Education Committee**, Charles Henry Corbett.

**Worcestershire**.—**Chairman**, J. W. Willis-Bund; **Vice-Chairman**, Robert Woodward; **Clerk**, S. Thornely, Worcester; **Chief Constable**, Lt.-Col. H. S. Walker; **Treasurer**, A. C. Cherry; **County Finance Clerk**, W. J. Moody; **Medical Officer**, H. G. Fosbrooke, D.P.H. (Cantab.); **County Surveyor**, H. Rowe; **County Road Surveyor**, J. H. Garrett; **Director of Education**, Dr. S. G. Rawson; **County Analyst**, C. C. Duncan; **Secretary Education Committee**, James Mason.

**Yorkshire** (East Riding).—**Chairman**, Lord Wenlock; **Clerk**, J. J. Bickersteth, Beverley; **Deputy**, J. R. Procter; **Chief Constable**, Major W. H. Dunlop; **Surveyor**, Alfred Beaumont.

**Yorkshire** (North Riding).—**Chairman**, John Hutton, M.P.; **Clerk**, W. C. Trevor, Northallerton; **Chief Constable**, Major R. L. Bower, C.M.G.; **Surveyor**, W. G. Bryning.

**Yorkshire** (West Riding).—**Chairman**, Alderman Charles G. Milnes Gaskell, Thornes House, Wakefield; **Clerk**, F. Alvey Darwin, Wakefield; **Deputy Clerk**, W. Vibart Dixon; **Treasurer**, W. Clarke; **Chief Constable**, Capt. T. Stuart Russell; **Architect**, J. Vickers Edwards; **Surveyor**, F. G. Carpenter; **Medical Officer**, Dr. J. R. Kaye, M.B.; **Registrar of Deeds**, T. B. Sugden.

## II. WALES.

**Anglesey**.—**Chairman**, Robert Williams Roberts; **Clerk**, J. Rice Roberts, Llangefni; **Chief Constable**, Lewis Prothero, Menai Bridge.

**Brecknockshire**.—**Chairman**, Right Hon.

Lord Glanusk; **Clerk**, H. Edgar Thomas, Brecon; **Chief Constable**, E. R. Gwynne; **Surveyor**, C. W. Best.

**Cardiganshire**.—**Chairman**, Thomas Evans, Esq.; **Clerk**, H. C. Fryer, Aberystwyth; **Chief Constable**, Edward Williams; **Surveyors**, R. Lloyd, D. Davies.

**Carmarthenshire**.—**Chairman**, John Lewis, Meiros Hall, Drefach, Llandyssul; **Vice-Chairman**, D. C. Parry, Stepney Street, Llanelly; **Clerk**, J. W. Nicholas, Carmarthen; **Treasurer**, R. Peel Price, Llandovery; **Chief Constable**, W. Philipps, Llandilo; **Surveyor**, C. H. Mounsey, Carmarthen.

**Carnarvonshire**.—**Chairman**, J. E. Roberts; **Clerk**, J. T. Roberts, Carnarvon; **Chief Constable**, Lt.-Col. A. A. Ruck; **Surveyor**, E. Evans.

**Denbighshire**.—**Chairman**, John Roberts; **Clerk**, W. R. Evans; **Deputy Clerk**, John Roberts; **Chief Constable**, Major T. J. Leadbetter; **County Surveyor**, R. L. Williams; **District Surveyors**, E. W. Jones and R. B. Adams.

**Flintshire**.—**Chairman**, Councillor James Woolley Summers; **Vice-Chairman**, Councillor E. Sydney Taylor; **Clerk**, Richard Bromley; **Chief Constable**, Major R. T. Webber; **County Surveyor**, Samuel Evans; **County Treasurer**, Thomas Williams; **Main Roads Inspector**, Robert Lloyd; **County Coroner**, F. Llewellyn Jones.

**Glamorgan**.—**Chairman**, J. Blandy Jenkins; **Clerk**, T. Mansel Franklen, Cardiff; **Deputy Clerk**, W. E. R. Allen, Cardiff; **Chief Constable**, L. Lindsay, Cardiff; **Surveyor**, T. Ll. Edwards, Bridgend; **Medical Officer**, W. Williams, M.A., M.D., Parade, Cardiff; **R. Fisher**, County Accountant.

**Merionethshire**.—**Chairman**, John Parry; **Vice-Chairman**, Robert Roberts; **Clerk**, Robert Jones, Portmadoc; **County Treasurer**, Hon. John Richards, Dolgelly; **Chief Constable**, Major T. W. Best, Barmouth; **Surveyor**, J. M. Jones, Trawsfynydd.

**Montgomeryshire**.—**Chairman**, A. C. Humphreys-Owen, M.P.; **Clerk**, G. D. Harrison, Welshpool; **Chief Constable**, W. J. Holland; **Surveyor**, G. A. Hutchins.

**Pembrokeshire**.—**Chairman**, Judge W. S. Owen; **Vice-Chairman**, Abel Thomas, K.C., M.P.; **Clerk of the Peace**, William Davies George; **Chief Constable**, T. Ince Webb-Bowen; **Surveyor**, T. George; **Assistant Surveyor**, Arthur H. Thomas, surer, Henry Pank, Peterborough.

**Radnorshire**.—**Chairman**, C. C. Rogers; **Clerk**, Hugh Vaughan Vaughan, Llandrindod Wells; **Chief Constable**, Major the Hon. C. E. Walsh; **Surveyor**, R. Wellings Thomas.

## ESPERANTO.

The British Esperanto Association was established in October 1904 as a national centre for the promotion of the use of Esperanto as an international medium of communication. This artificial key-language is the invention of Dr. Zamenhof, of Warsaw, who was born at Grodno, in Russian Poland, in 1859. From his boyhood he devoted his energies to its production and perfecting, but it was not until '87 that he ventured to submit it to general notice by the publication of his brochure "An International Language, by Dr. Esperanto." For the first ten years little apparent success rewarded him, but since '97 its progress has been rapid and

uninterrupted. There are now about 150 groups, situated in all parts of the world, and forming centres of active propaganda. Of these 29 are within the British Isles, the first being that at Keighley, in Yorkshire, which was founded in 1902. Apart from these official organisations, a very widespread and sympathetic interest has been aroused, as the ever-growing attention it receives from all sections of the press testifies.

Its own journals and magazines number more than twenty, and circulate in every civilised country. The chief of these "Gazetoj" are *La Lingvo Internacia*, a bi-monthly published in Paris; *La Internacia Scienca Revuo*, also published in Paris, both of which are printed entirely in Esperanto, and the various organs of the National Associations, which are usually printed in Esperanto and French, Russian, or English, etc., as the case may be. In England *The Esperantist* has been issued monthly since 1903, and *The British Esperantist* is about to be started as the official organ of the British Esperantist Association.

The merits and uses of Esperanto have appealed to all sections of the community. Educationists, scientists, tourists, commercial men, etc., are rapidly recognising its practical and valuable nature. The French Physical Society, the International Association of Electricians, the Touring Club de France, Sir William Ramsay, Profs. Becquerel, Berthelot, Carlo Bourlet, Dr. Lloyd of Liverpool University, Mr. W. T. Stead, Mr. Felix Moscheles, and many other well-known men and institutions are according it their active support. On the Continent it has already been added to the curriculum of many lycées and gymnasia, and independent classes are being arranged everywhere. Several international congresses have been held, notably at Dover and Calais during the motor-boat week in 1904; and an important assembly takes place at Boulogne early in 1905, at which Dr. Zamenhof is expected to be present.

The chief characteristics of Esperanto are its simplicity of construction, the facility with which it may be acquired, and the practical ease and euphony of its pronunciation. Its grammar is strictly scientific, its rules having been reduced to essentials, and being subject to no exceptions or irregularities. Its vocabulary consists of some nine hundred root forms, which have been selected from the most familiar languages, so that they may be easily acquired by any person of average education and intelligence. By co-ordination of these roots, by scientific modification by inflexion, and by an ingenious system of a few suffixes and prefixes, it is possible to convey in the exactest manner every shade of meaning. Its alphabet consists of 28 letters, each letter having an invariable sound, so that it is understandable as a spoken language by every nationality. In all these respects—in sound, in construction, in practicability and in adherents—it fairly claims to have beaten all its competitors, and provides at once an actual and proved instrument of communication with all who differ in their national forms of speech.

The President of the British Esperanto Association is Lieut.-Col. Pollen, LL.D., and the Hon. Secretary is Mr. Harald Clegg, 14, Norfolk Street, London, S.W., from whom Esperanto publications and all information can be obtained.

## ETHICAL SOCIETIES.

Ethical Societies are associations for promoting ethical culture. Their objects are: (a) by purely natural and human means to help men to love, know, and do the right; (b) to emphasise the moral factor in all personal, social, political, national, and international relations; (c) to affirm that moral ideas and the moral life are independent of beliefs as to the ultimate nature of things and as to a life after death; (d) to assist in developing the science of ethics. The ethical movement in America was initiated by Dr. Felix Adler of New York, and has spread to Philadelphia, Chicago, and St. Louis; also to Germany, Switzerland, Austria, and Italy. An International Committee exists: Secretary *pro tem.*, Mr. Gustav Spiller, 54, Prince of Wales's Road, Battersea, S.W.

The following Societies are established in London: South Place Ethical Society, Finsbury, E.C., Hon. Secretary, Mrs. C. F. Smith, 10A, Featherstone Buildings, Holborn, W.C. West London Ethical Society, which meets at Kensington Town Hall, Chairman, Stanton Coit, Ph.D., Hon. Secretary, W. Sanders, 18, Brynmaer Road, Battersea Park, S.W.; East London Ethical Society, Bromley Public Hall, E., Hon. Secretary, Mr. G. Spiller, 54, Prince of Wales Road, Battersea Park, S.W.; South London Ethical Society, Surrey Masonic Hall, S.E., Hon. Secretary, Mr. Harrold Johnson, "Launceston," Lindsey Road, Worcester Park; St. Pancras Ethical Society, Stanley Hall, Junction Road, N., Hon. Secretary, Mr. G. A. Smith, Dartmouth Park Lodge, N.W.; Battersea Ethical Society, Upper Town Hall, Lavender Hill, Hon. Secretary, Mr. A. Wright, 69, Parkside Street, Battersea, S.W.; Hampstead Ethical Institute, Hampstead Conservatoire, Swiss Cottage, Hon. Secretary, Miss J. Gowa, 22, Greencroft Gardens, Hampstead, N.W.; Ethical Religion Society, Steinway Hall, near Portman Square, W., Lecturer, Dr. Washington Sullivan; Wimbledon Ethical Society, 6, The Broadway, Wimbledon, Hon. Secretary, Mr. Fred Satchwell, 26, Prince's Road, Wimbledon; Forest Gate Ethical Church, Earlam Hall, Earlam Grove, Hon. Secretary, care of Earlam Hall, Forest Gate, E.; Wood Green Ethical Society, Fairfax Hall, Harringay, N., Hon. Secretary, Mr. Chas. F. Cooper, 36, Oakley Square, N.W.; Greenwich Ethical Society, Royal Hill Council School, Hon. Secretary, Miss G. Rowland, Lynn y Ddinas, Blackheath Rise, S.E.; North Kensington Ethical Society, Cornwall Hall, Notting Hill, Acting Secretary, Mr. J. Parslow, 56, Earlsmead Road, Kensal Rise, N.W.; East Ham Ethical Fellowship, Wakefield Hall, Hon. Secretary, Mr. J. A. McConnell, 68, Elizabeth Road, East Ham, E.; Plumstead Ethical Society, Conway Road Council School, Hon. Secretary, Mr. H. Elphick, 37, Hector Street, Plumstead.

There are also Societies at Bradford (Hon. Secretary, Mr. Alfred Musgrove, 60, Bowling Park Drive, Bradford), Croydon (Hon. Secretary, Mr. R. I'Anson, 53, Avondale Road, Croydon), Belfast (York Street Lecture Hall) Hon. Secretary, Mr. T. H. Gilliland, 40, St. Ives Gardens, Stranmillis Road, Belfast), Chesterfield (Hon. Secretary, Mr. Dentith, Avenue Road, Whittington Moor, near Chesterfield), Sheffield (Hon. Secretary, Mrs. Wolstenholme, 79, Burcot Road, Meersbrook, Sheffield), Nelson (Gen. Secretary, Mr. J. H.

Husband, 25, Raglan Street, Nelson), Liverpool (Hon. Secretary, Mr. H. Buxton, 4, Bertram Road, Sefton Park, Liverpool), Merthyr, S. Wales (Hon. Secretary, Mr. J. H. Murrin, 12, Court Terrace, Merthyr, S. Wales), Aberdare, S. Wales (Hon. Secretary, Mr. Wm. H. Davies, 25, Bell Street, Treccynon, Aberdare), and Cardiff, South Wales (Hon. Secretary, Mr. W. E. Jones, 67, Alfred Street, Roath, Cardiff).

The South, East, and West London, the St. Pancras, Battersea, Belfast, Greenwich, Merthyr, Nelson, North Kensington, and Wimbledon Ethical Societies, the Forest Gate Ethical Church, the Hampstead Ethical Institute, the Chesterfield Ethical Fellowship, and the Kingston Humanitarian Society, together with the Birmingham, Bolton, Hanley, Hyde, and West Bromwich Labour Churches, are federated into a Union of Ethical Societies, **Central Office**, 19, Buckingham Street, Strand, W.C.; **Secretary**, Miss Florence Winterbottom, 16, Sloane Street, S.W.

**Exeter Hall, Strand, London.** (Headquarters of the Central Y.M.C.A.) Erected in 1830-31 by Deering, for the holding of religious and philanthropic meetings. Celebrated as the scene of the religious meetings held annually in the month of May. Now the property of the Central Young Men's Christian Association, having been purchased and presented to that body by friends of the Institution at a total cost of £61,000. **General Secretary**, John H. Putterill; **Financial Secretary**, Clarence Hooper. See **YOUNG MEN'S CHRISTIAN ASSOCIATION**.

**Extradition.** Extradition is the surrender to a prisoner accused of a crime by the Government, in whose territories he has taken refuge to the Government of which he is a subject, so that he may be punished or dealt with according to its laws for an offence committed within its jurisdiction. In the absence of treaty stipulations there is no obligation according to international law for the asylum state to surrender and deliver to the demanding state persons who have committed crimes within the dominion of the latter country; yet, as a matter of courtesy and comity between nations, fugitives from justice have sometimes been surrendered to friendly nations without treaty. The crimes for which extradition may be granted are stated in schedules to the Extra-

dition Act of '70 and the Extradition Act of '73. Under these two statutes treaties have been concluded with most civilised states. In the event of a fugitive criminal escaping from this country evidence is taken on oath before a magistrate to prove the facts alleged. Such testimony is firstly authenticated by the magistrate before whom it was taken, and afterwards by the Home Secretary, the Foreign Secretary, and the diplomatic representative in London of the nation upon which the demand for extradition is to be made. The documents so verified as accurate are sent through the British representative in the state referred to; and if the criminal is arrested therein they are offered in evidence before a court of competent jurisdiction. If this foreign tribunal decides that a *prima-facie* case has been made out against the fugitive, he is surrendered and brought home to take his trial in England. If the evidence as to identity or other points against him is considered insufficient, the prisoner is remanded to obtain further proof, if this can be given, or he is immediately released. A demand by a foreign state having an extradition treaty with this country for the surrender of a fugitive criminal of that state who is suspected of being in the United Kingdom, is to be made to a Secretary of State by a diplomatic representative of that state. Unless the former thinks the offence is one of a political character, he may inform a police magistrate of this demand, and require his warrant for the apprehension of the criminal. If the criminal is brought before him he is to admit any testimony that tends to show that the offence is political or is not an extradition crime. If the evidence is such as would justify a committal for trial in England, or would show that the prisoner has been convicted, the magistrate is to send him to gaol, and after an interval of fifteen days, or if a *habeas corpus* is issued after the decision of the court, the Secretary of State may by warrant deliver him over to the representatives of the foreign country. If, however, the prisoner is not removed within two months he is to be discharged. The '70 Act applies with certain modifications to all British possessions. Consult "The Law and Practice of Extradition" (Stevens & Sons), by Messrs. H. C. Biron and K. E. Chalmers.

## F

### FACTORY AND WORKSHOP LEGISLATION.

For a complete summary of the Factory and Workshop Act 1901, which amended and consolidated all previous legislation having for its object the regulation of factories and workshops, see eds, 1902 and 1903.

The inspection of factories and workshops is carried out under the control of the Home Office, which employs for the work a special staff of 153 inspectors (including assistants), of whom 9 are women. These inspectors have full powers of entry to any factory, workshop, laundry, dock, wharf or other premises under the Act, or school where factory children are educated. They may call for any registers or

documents kept in accordance with the Act, and may conduct proceedings connected with their office before a magistrate. The Act prescribes limits of the hours in which women, young persons and children may be employed; also intervals for meals, certain holidays, and a weekly short day. When a person enters upon the occupation of a factory or workshop he must serve on the inspector for the district a written notice containing a description of the place, its machinery, and the work to be carried on there. Various prescribed notices must be affixed at the entrance to the factory or workshop, and a register kept in which to record particulars as to the children and young persons employed, accidents, cleaning, and

other matters dealt with in the Act. Periodical returns of the number, age, sex and occupation of persons employed are required from the occupiers of factories and workshops. The chief inspector appoints certifying surgeons, whose duty it is to investigate accidents and to examine young persons and children employed in factories and give certificates of fitness for employment. In the case of certain dangerous trades under Special Rules, a periodical examination by the certifying surgeon is required.

Workshops, workplaces, and (to a limited extent) factories are subject to the provisions of the law relating to public health. Local authorities, accordingly, are charged with the duty of seeing that such places are kept in a clean and sanitary condition, properly ventilated, and not overcrowded. They have special powers with regard to bakehouses. They are responsible for insuring that factories and workshops are provided with means of escape in case of fire. They must keep a register of outworkers, and see that the places where they work are not unwholesome. The zeal and efficiency manifested by different local authorities in discharging their duties in regard to workshops and workplaces vary considerably. The more progressive of them have appointed women inspectors to look after workshops employing female labour.

See LABOUR MOVEMENT for statistics.

The **Truck Acts** of '31, '87, and '96, the main objects of which are (1) to insure the payment of wages to workpeople in current coin of the realm, without imposing upon them any obligation to spend any part of such wages in any particular way or at any particular shop; and (2) to prevent fines or deductions being imposed unreasonably or without due notice to the worker, are, so far as factories and workshops are concerned, administered by the Factory Inspectors, who for this purpose have the same powers as under the Factory Acts.

Chief Inspector, Dr. B. A. Whitelegge, C.B., Home Office.

Deputy Chief Inspector, Mr. W. D. Cramp, I.S.O., Home Office.

Medical Inspector, Dr. T. M. Legge, Home Office.

Principal Lady Inspector, Miss A. M. Anderson, 66, Victoria Street, S.W.

**Fairbairn, Rev. A. M., M.A., D.Litt.** (Oxon.), D.D. (Edin. and Yale), LL.D. (Aberdeen), D.Litt. (Leeds), **Principal of Mansfield College, Oxford**, was b. 1838, near Edinburgh, and ed. at Edinburgh and Berlin universities. Commenced ministry (60) at Bathgate, Linlithgowshire, removing in '72 to Aberdeen. In '77 he became **Principal of Airedale College, Bradford**. For five years he lectured at his *alma mater*, Edinburgh University, on "The Comparative History of Religions," and in '92-4 was Gifford Lecturer at Aberdeen University. In '83 he was elected **Chairman of the Congregational Union of England and Wales**. The great work of his life, however, commenced with his removal in '86 to Oxford, and his appointment to the principality of **Mansfield College**. He is one of the constituent Fellows of the British Academy. He has visited and lectured in **America** at Yale University, at the University of Chicago (the Haskell lectures on Comparative Religion in India for '98-9), and

at Union Seminary, New York. Edited the **Hibbert Lectures, '88**, of the late Dr. Hatch. He is a frequent contributor to the *Contemporary Review*, and has also written many books, including "Studies in the Philosophy of Religion and History," "Studies in the Life of Christ," "Religion in History and in Modern Life," "Christ in Modern Theology," "Christ in the Centuries," "Catholicism, Roman and Anglican" ('99) and "The Philosophy of the Christian Religion" (1902).

## FINANCE OF THE UNITED KINGDOM.

### I. THE REVENUE.

### II. GRANTS IN AID OF LOCAL TAXATION.

### III. PUBLIC EXPENDITURE.

### IV. THE NATIONAL DEBT.

### V. THE BUDGET.

The **public revenue** is now derived from customs and excise duties, estate and legacy, etc., duties, stamps, land tax, house duty, property and income tax, the post office, the hereditary revenues of the Crown from woods, forests, and lands, and a number of miscellaneous sources. Duties on sugar, exported coal, and imported corn and flour have been recently imposed by Parliament at the instance of the Government, but the last impost—that on corn and flour, which was only enacted in 1902—was abolished in 1903. Little more than half a century ago scarcely a necessary of life, not to mention luxuries, escaped taxation; and an idea of the extent to which the system was carried may be gained from the statement that whereas the total number of articles and subdivisions of articles in the English Tariff of Import Duties was 53 in '75, in '59 it was 307, and in '40 no less than 1046. Of the aggregate revenue raised by the State, the bulk is paid into the Exchequer, but a large sum goes, as explained lower down, to the Local Taxation Accounts.

The **public expenditure**, which is met by issues from the Exchequer, may be classed under two heads: (1) **Consolidated Fund Services**, or sums the payment of which from the **Consolidated Fund** has been already authorised by Acts of Parliament, and which are issued at the proper time without the annual intervention of Parliament; and (2) **Supply Services**, which are the numerous items brought forward every year in Committee of Supply.

Under the first head are included the charges for interest and management of the National Debt, the Civil List and Annuities to the Royal Family, and many salaries and pensions which are set forth in some detail below, and which in the national balance sheet are included under "**Other Consolidated Fund Services**." In the Consolidated Fund Services are also now included certain payments to the Local Taxation Accounts as apart from the payments made directly to them and not passing through the Exchequer (see TABLES A, B and C). The total expenditure for Consolidated Fund Services in 1903-4 was £29,781,000, and for Supply Services £117,180,000.

The **financial year** ends on March 31st, and generally after but sometimes before that day the **Chancellor of the Exchequer** makes the financial statement of income, expenditure, and national indebtedness, known as the **Budget**.

TABLE A.—NATIONAL BALANCE SHEET.

## INCOME.

	(1) Budget Estimate, 1903-4.	(2) Exchequer Receipts, 1903-4.	(3) Budget Estimate, 1904-5.
1. Customs . . . . .	£ 34,640,000	£ 33,850,000	£ 36,450,000
Inland Revenue:—			
2. Excise . . . . .	32,700,000	31,550,000	31,500,000

<b>Total Supply Services</b>	<b>114,035,000</b>	<b>117,180,000</b>	<b>113,080,000</b>
<b>Grand Totals</b>	<b>143,954,000</b>	<b>146,961,000</b>	<b>142,880,000</b>
Balance . . . . .			730,000
			<b>£143,610,000</b>

There is a standing committee of the House of Commons for the examination of the accounts, showing the appropriation of the sums granted by Parliament to meet the public expenditure; and the Comptroller and Auditor-General reports to this committee whether or not the expenditure has been in accordance with the purpose for which it was granted.

Some useful information afforded by this committee to Parliament in respect of certain items of war expenditure will be found under SESSION, sect. 108.

## I. THE REVENUE.

As explained above, the revenue of the State collected by Imperial officers is paid part into the Exchequer and part to the Local Taxation Accounts. The aggregate revenue so raised amounted in 1902-3 to £161,319,000, and in 1903-4 to £151,341,000, and in the latter year £141,546,000 was paid into the Exchequer (see TABLE A), and £9,795,000 (in round figures) into the Local Taxation Accounts (see TABLE B). Here are the figures for the two years:—

	1902-3.	1903-4.
Aggregate Revenue raised by State .	£161,319,000	£151,341,000
(a) For the Exchequer	151,552,000	141,546,000
(b) For the Local Taxation Accounts .	9,767,000	9,795,000

The figures given below under the headings of Customs, Excise, etc., show the net receipts under the heads of duties; the total net produce, and the amount paid into the Exchequer, and in the case of Customs, Excise, and Estate Duties into the Local Taxation Accounts also. There is frequently a little variation between the total receipts and the total payments, a little being sometimes left in hand which may go to augment the payments in the next year.

**Customs Receipts.***Export.*

Coal, etc. . . . . £2,051,653

*Import.*

We subjoin figures showing the net produce from the principal articles contributing to Customs:—

Beer, Mum, Spruce, etc. . . . .	£22,395
Chicory . . . . .	54,411
Cocoa . . . . .	184,186
Cocoa Husks, Chocolate, and Cocoa Butter . . . . .	86,731
Coffee . . . . .	188,168
Corn, Grain, etc. . . . .	101,234
Currants . . . . .	106,615
Figs . . . . .	57,601
Plums (Dried or Preserved) . . . . .	43,100
Prunes . . . . .	11,764
Raisins . . . . .	230,662
Spirits (Colonial and Foreign):	
Rum . . . . .	2,345,235
Brandy . . . . .	1,266,832
Geneva . . . . .	235,596
Other Sorts . . . . .	813,703
Sugar:	
Refined and Unrefined . . . . .	5,344,361
Molasses and Glucose . . . . .	241,406
Articles containing Sugar and Saccharine . . . . .	147,297
Tea . . . . .	6,569,026
Tobacco and Snuff . . . . .	12,646,483
Wine . . . . .	1,338,168
All other articles . . . . .	16,951
Charges on deliveries from Bonded Warehouses . . . . .	45,134
Monies deposited and not appropriated to Goods(excess of repayments) Isle of Man: Duties, etc., collected in the island, exclusive of Tea, Tobacco and Wine . . . . .	(14,871)
and Wine . . . . .	53,771
Total . . . . .	£34,217,354

Of the total customs receipts £33,850,000 was paid into the Exchequer; £203,105 to the Local Taxation Accounts; and £83,259 on account of the Isle of Man.

**Excise.**

The following is the net produce under different heads of Excise duties:—

Beer . . . . .	£13,461,280
Spirits . . . . .	18,667,819
Railway Duty . . . . .	358,984
Saccharine . . . . .	906
Tobacco (Home-grown) . . . . .	47
Charges on delivery from Bonded Warehouses, etc. . . . .	5,207
Chicory, etc. . . . .	1,106
Coffee Mixture Labels . . . . .	2,506
Glucose Duty . . . . .	82,625
Licence Duties, viz.:	
Auctioneers, Appraisers, etc. . . . .	92,814
Beer and Cider, and Beer and Wine Brewers . . . . .	184,912
Dog . . . . .	8,591
Establishment, viz.:	
Armorial Bearings . . . . .	600,958
Carriages . . . . .	74,545
Male Servants . . . . .	542,528
Gold and Silver Plate (Dealers') . . . . .	160,870
Gun . . . . .	190,025
Hawkers and Pedlars . . . . .	64,939
Medicine (Patent) Vendors . . . . .	119,393
Pawnbrokers . . . . .	26,876
Refreshment House . . . . .	9,617
Spirits:	
Distillers and Rectifiers . . . . .	37,883
Dealers . . . . .	10,207
Publicans, including Grocers in Scotland and Ireland . . . . .	14,365
Tobacco Manufacturers . . . . .	167,616
Tobacco Dealers . . . . .	6,079
Wine and Sweets . . . . .	93,923
Other than the foregoing . . . . .	76,854
Locomotives on Highways . . . . .	2,450
Local Taxation Penalties . . . . .	2,503
Total . . . . .	8,239
	£36,863,509

Of the total net produce of Excise £31,550,000 was paid to the Exchequer, and £5,396,387 to the Local Taxation Accounts.

**Estate, etc., Duties.**

Estate Duty payable on property of persons dying after Aug. 1st, '94 .	£13,531,391
Probate and Account Duty payable on Personal Property of persons dying before Aug. 2nd, '94 .	67,981
Temporary Estate Duty payable in like manner on:	
Personalty . . . . .	3,637
Realty . . . . .	12,335
Legacy Duty . . . . .	2,966,959
Succession Duty . . . . .	698,184
Corporation Duty . . . . .	45,650

Total estate duties, including portion collected for local authorities . . . . .

£17,326,137

£13,000,000 was paid into the Exchequer and £4,195,581 to the Local Taxation Accounts.

**Stamps.**

Deeds and other Instruments not otherwise enumerated . . .	£3,303,442
Deeds, etc., Penalties . . .	6,192
Bills of Exchange . . .	690,046
Receipts, Drafts, and other <i>id.</i> Stamps . . .	1,559,699
Composition for the Duties on Bills and Notes of the Banks of England and Ireland, and of Country Bankers . . .	124,400
Cards . . .	23,818
Licences and Certificates . . .	172,752
Life Insurances . . .	69,729
Marine Insurances . . .	213,133
Medicines (Patent) . . .	323,446
Bonds to Bearer and Substituted Securities . . .	169,276
Companies' Capital Duty . . .	474,806
Contract Notes (above <i>id.</i> ) . . .	159,411
Loan Capital Duty . . .	22,403
Foreign Certificates . . .	15,729
Share Warrants . . .	65,757
<b>Total . . .</b>	<b>£7,394,039</b>

There was paid into the Exchequer £7,500,000.

**Land Tax, House Duty, Income Tax, Miscellaneous.**

The items Land Tax and House Duty speak for themselves. In regard to the **Property and Income Tax**, which was at the rate of *11d.* in the £, an approximate appropriation of the net receipts under the different schedules, if based on the statistics of assessments for 1902-3, would be:

**Schedule A**, Lands, Tenements, etc., £7,625,112;

**Schedule B**, Occupation of Lands, Tenements, etc., £213,503;

**Schedule C**, Annuities, Dividends, etc., £2,135,032;

**Schedule D**, Professions, Trades, etc., £18,117,267;

**Schedule E**, Public Offices, Annuities from Public Revenues, etc., £2,409,536.

The gross **Post Office receipts** were: postage stamps sold (£16,342,052), postage collected in cash (£395,906), postage from foreign and colonial offices (£166,150), commission on money orders (£155,923), commission on postal orders (£392,142), and certain miscellaneous receipts amounting to £38,602—total £17,490,774. The payments made out of these receipts include £568,360 to Inland Revenue department, £963,186 to railway companies on account of Parcel Post, and £376,999 postage collected for credit of foreign and colonial offices—the total of all such payments being £1,931,675, leaving the net receipts £15,559,100.

Under the heading of **Crown Lands** comes the produce of the Woods, Forests, and Land Revenues of the Crown, which was paid into the Exchequer and consolidated with the rest of the public revenue in return for the Royal Civil List (see below). The interest and dividend received in the year on 171,334 ordinary Suez

Canal Shares amounted to £913,302, and there was also received £22,849 dividend for the same period on 5,268 "actions de jouissance." Up to March 31st, 1903, 5268 ordinary shares had been drawn and paid off, and 375 were drawn and paid off in 1903-4. There was also received in respect of loans, including Sardinian, Greek, Fiji, and from the Wuchang Viceroy (£7,500 principal, £2,674 interest in respect of a loan of £75,000, to provide funds for the payment of troops of his province during the period of the Boxer Movement in China)—a total sum of £46,324.

"**Miscellaneous**" contains many items of interest. Small branches of the Hereditary Revenue brought in £32,531; and in other receipts are included £268 conscience money, £95,939 seigniorage on silver purchased for coinage, and £139,683 profit on bronze coinage. A great item under the head of Miscellaneous is £975,330 **Fee and Patent Stamps**. Among the sums in this last total are Companies' Registration, £69,914; County Courts, Ireland, £19,622; District Audit, £56,830; Judicature, England, £366,836; Judicature, Ireland, £33,075; Patents for Inventions, £239,731; Newspaper Registration, £316; *Edinburgh Gazette*, £3415; *London Gazette*, £6055. Nor should mention be omitted from the list of miscellaneous items of a sum of £198,525 paid by the Bank of England, and consisting almost entirely of the sum payable by the Bank out of the profits of issue for the year; and a sum of £1895 towards registration of money lenders.

**II. GRANTS IN AID OF LOCAL TAXATION.**

The portion of the Revenue paid into the Local Taxation Accounts for local services consists of Licence Duties, a share of the Estate Duty, an additional beer duty of threepence, an extra spirit duty of sixpence, and a further share of the Estate Duty for the Agricultural Rating, etc., grants. In this particular financial year (1903-4) the sums paid to the Local Taxation Accounts of England, Scotland, and Ireland from those sources amounted to an aggregate of £9,795,073. To this should be added £1,156,705 *ss. 7d.*, payments from the Consolidated Fund—a grand total of £10,951,778 *ss. 7d.*

The **Consolidated Fund payments** were as follow:—Exchequer contribution to Ireland under the Land Purchase (Ireland) Act, '01, £40,000; Agricultural Grant under sect. 48 of the Local Government (Ireland) Act, '98, £727,655; for equivalent of Local Taxation Licences, £212,260 *13s. 8d.*; and under the same Act of '98, £79,000; Increased Agricultural Grant under the Local Taxation Account (Scotland) Act, '98, £97,789 *11s. 11d.*: total, £1,156,705 *ss. 7d.*

The table which is given at the top of p. 187, shows the figures in more detail. The sum of £10,951,778 *ss. 7d.* therein given does not, however, represent the total amount of the subventions or aids from state revenues to local taxation. There still remain upon the Civil Service estimates, which are met by issues from the Exchequer, many charges transferred from local to Imperial funds, and certain other expenditure of a local character amounting to a considerable aggregate. Details of these grants in 1903-4 and the estimates for 1904-5 will be found in Table C.

TABLE B.

## PAYMENTS TO LOCAL TAXATION ACCOUNTS, 1903-4.

	England.		Scotland.		Ireland.		Total Payments

## III. PUBLIC EXPENDITURE.

*Civil List, Annuities, and Pensions.*

Turning to the Expenditure for National and Imperial purposes for 1903-4, some references to National Debt Charges and to the capital of the Debt will be found in Part IV.

Analysing the item "Other Consolidated Fund Services," there is first the sum of £470,000 issued on account of the Civil List under the Act 1 Edw. VII. c. 4, the items being as follows:

Class I. Their Majesties' Privy Purse	£110,000
„ II. Salaries of H.M. Household and Retired Allowances . . . . .	125,800
„ III. Expenses of H.M. Household . . . . .	193,000
„ IV. Works . . . . .	20,000
„ V. Royal Bounty, Alms, and Special Services . . . . .	13,200
„ VI. Unappropriated . . . . .	8,000

£470,000

Annuities to the Royal Family were also paid on the following scale:

H.R.H. George, Prince of Wales . . . . .	£20,000
H.R.H. the Princess of Wales . . . . .	10,000
H.R.H. Princess Christian . . . . .	6,000
H.R.H. Princess Louise (Duchess of Argyll) . . . . .	6,000
H.R.H. Duke of Connaught . . . . .	25,000
H.R.H. Duchess of Saxe-Coburg . . . . .	6,000
H.R.H. Duchess of Albany . . . . .	6,000
H.R.H. Princess Beatrice (Princess Henry of Battenberg) . . . . .	6,000
H.R.H. Princess Augusta (Duchess of Mecklenburg-Strelitz) . . . . .	3,000
H.R.H. the late Duke of Cambridge . . . . .	12,000
The Trustees for H.M. Daughters . . . . .	18,000

Total . . . . . £118,000

Civil List pensions, new grants being as before limited to £1200 per annum, were paid to the amount of £24,901. Under the Civil List Act these sums are not chargeable on the sum paid for the Civil List.

Retired allowances, etc., to members of her late Majesty's Household were paid to the amount of £21,825, and certain small pensions were paid to persons formerly on the Civil Lists of George IV. and William IV.

The following is a list of pensions for naval and military services, paid out of the Consolidated Fund in 1903-4, the amount and duration of the grants being: Lord Rodney (and all and every the heirs male to whom the title shall descend), £2000; Earl Nelson (and to whom the title shall descend), £5000; Lord Seaton (for life of present baron), £2000; Viscount

Hardinge (present viscount), £3000; Viscount Gough (to present viscount), £2000; Lord Raglan (for life), £2000; Lord Napier of Magdala (to present baron), £2000; and the heirs of the Duke of Schomberg, in perpetuity, £720: total, £18,720. The recipients of Pensions for political and civil services were the Countess of Mayo, widow of a Governor-General of India, £1000; Viscount Peel, late Speaker of the House of Commons, £4000; Sir C. L. Ryan, late Comptroller and Auditor-General, £1333; Viscount Cross, £2000; Lord George Hamilton at the rate of £2000 from Oct. 10th, 1903; Mr. Chaplin, M.P., £1200; Sir M. Hicks Beach, M.P., £1200; Sir John Gorst, M.P., £1200; and Lord Balfour of Burleigh, at the rate of £1200 from Oct. 26th, 1903.

Pensions for judicial services (England) amounted to £29,284; among the recipients being Lord Field, Sir Edward Fry, Sir Arthur Charles, Lord Brampton, the late Sir J. Rigby, Sir J. C. Day, and Sir Ford North, retired judges, each at the rate of £3500 from the date of their retirement; and several retired county court judges—who received £1000 each. A large sum is paid by way of compensation, some amounts being still issued to persons formerly attached to the old Courts of Requests, the Marshalsea, and the Ecclesiastical and Prerogative Courts. Other sums were paid as judicial pensions to retired judges in Scotland and Ireland.

#### Salaries, Allowances, etc.

The salaries and allowances comprise the sums of £5000 paid to the Speaker of the House of Commons, £20,000 to the Lord-Lieutenant of Ireland; the salaries of the judges, the Lords of Appeal in Ordinary receiving £6000 per annum each, the judges of the Court of Appeal, of the Chancery Division, and of the King's Bench Division receiving £5000 each, with the exceptions of the Master of the Rolls (£6000), and the Lord Chief Justice (£8000); two members of the Judicial Committee of the Privy Council at the rate of £400 each; the salaries of the county court judges £1500; the salaries of the Metropolitan police magistrates, one at £1800 and twenty-four at £1500 per annum; the salaries of the Scotch judges, sheriffs and sheriffs' substitutes, and of the Irish judges. Miscellaneous services charged on the Consolidated Fund include £16,216 paid to the Receiver-General of the Duchy of Cornwall, compensation for loss of duties on the coinage of tin; and £215,000 annuity under the Indian Army Pension Deficiency Act, '85. The cost of the Army and Navy will be found under those headings.

#### Civil Service Estimates.

The Civil Service Votes granted in the session of 1903, with the net estimates for 1904-5, are subjoined.

The net total of the Estimates for 1904-5 is £27,983,920. The original estimates for 1903-4 amounted to £26,561,033. The increase is therefore £1,422,887, of which no less than £1,262,893 arises under Class IV. (Education, Science, and Art). In the following abstract and throughout the detailed estimates, comparison is made, however, according to the usual practice, with the total grants made for the service of the year 1903-4 in the session of 1903. These include supplementary estimates to the amount of £354,416, making the total for

1903-4 (after allowing for the sum of £4,920 transferred for purposes of comparison to the vote for public buildings (Class I., 9) from Army votes) £26,920,369. Upon this comparison the total for 1904-5 shows an increase of £1,063,551.

Service.	1904-5.	1903-4. (Grants in Session of 1903.)
<b>CLASS I.</b>

<b>Total . . . . .</b>	<b>2,617,368</b>	<b>2,563,642</b>

CLASS I. (Increase, £53,626).—The increase under Revenue Buildings is chiefly for Post Office new works, alterations and enlargements due to growth of business. The continued growth of the Rates vote is, as in past years, due partly to the large amount of Government property, in respect of which contributions are made, but even more to the increased poundage of the rates themselves.

**CLASS II.** (Increase, £90,439).—The heaviest item of increase in this Class (£43,029) is for stationery and printing, for which the current year's provision had to be supplemented by an additional Estimate of £31,000 voted this session.

**CLASS III.** (Decrease, £57,726).—The Estimate for law charges is £6248 more than in 1903-4. It includes, however, special non-recurrent items of £6482 and £2000 for contributions to the Bank of England towards exceptional expenses in connection with the prosecution of bank-note forgers, and to the cost of the Whitaker Wright prosecution respectively. As regards the latter, it may be noted that the extradition expenses were provided for in the Supplementary Estimate for miscellaneous legal expenses voted this session (see *Supplementary Estimates, 1903-4, post*). In spite of the increase on general English and Scottish services the total of the Class shows a decrease of £57,726, owing to the reductions (amounting to £70,493) which have been effected on the Irish estimates. Of these the most important is that of £52,394 under Royal Irish Constabulary resulting from reductions in the force which have already taken place and others in immediate contemplation. Provision is included in 1904-5 for an average force of 10,383, as against 11,190 in the current year.

<b>Total . . . .</b>	<b>15,798,217</b>	<b>14,580,324</b>

**CLASS IV.** (Increase, £1,217,893).—The 1903-4 figures include a Supplementary Estimate of £45,000 for the relief of the **National Antarctic Expedition**, a service of a quite exceptional character, for which any provision that may prove to be necessary next year will be made in a similar form. The bulk of the addition naturally arises on the vote for the Board of Education, as the result of recent legislation; but Public Education (Scotland), Public Education (Ireland), and Universities and Colleges (Great Britain) also show substantial increases. The Board of Education (England and Wales) requires £985,131 more than in 1903-4. Of this increase £50,580 is for grants for training teachers, pupil teachers, etc., and £52,303 for grants in respect of education other than elementary. The principal increase, however (£889,888) is for grants towards expenditure on Public Elementary Schools. Of this £233,465 is due to the automatic growth in the amount required for the grants unaffected by recent legislation. As regards the new grants under the Education Acts, 1902 and 1903, the Estimates for 1903-4 included provision for half a year under the former Act only. In 1904-5 provision has to be made for a full year, and more scholars have to be provided for. Provision has also to be made for the new grants in respect of London for eleven months. The increase under the new Aid Grants is £1,249,000, against which must be set the saving on account of the superseded grants to Board and Voluntary Schools—net increase, £656,423. Universities and Colleges, Great Britain, will require an additional £32,100 to provide for grants for the new Universities at Liverpool and Leeds (for each of which £2000 is included), and for the proposed augmentation of the grants in aid of Colleges, for which £54,000 is inserted, or double the amount voted in the year 1903-4.

Treasury Chest Fund . . . .	—	103,000
<b>Total . . . .</b>	<b>2,006,288</b>	<b>2,223,998</b>

**CLASS V.** (Decrease, £217,710).—After deducting from the total for 1903-4 the additional Estimate presented in the summer of 1903 for the Treasury Chest Fund, Foreign and Colonial services still show a substantial decrease of £114,710 upon the current year's vote. The greater part of this reduction arises from the fact that no grant is required for Cyprus. Diplomatic and Consular Services require £13,287 more than in 1903-4. The automatic addition to the Uganda Railway Annuity, to repay sums borrowed from the National Debt Commissioners in 1903, imposes an additional charge of £23,524, which is, however, more than counterbalanced by a reduction of £25,400 under Somaliland. Colonial Services (apart from the British Central Africa Grant now transferred to this vote) show a decrease of £52,904, of which £35,500 is under Grants-in-aid of Local Revenues, £2300 under Boundary Commissions, and £8000 under Telegrams. The vote for 1903-4 included a non-recurrent item of £8,673 for the balance of purchase-money due to the Niger Company.

	1904-5.	1903-4. (Grants in Session of 1903.)

<b>Total . . . .</b>	<b>661,246</b>	<b>693,521</b>

**CLASS VI.** (Decrease, £32,275).—The vote for Savings Banks and Friendly Societies' deficiencies corresponding to that which is included in the 1903-4 figures was taken this session upon a Supplementary Estimate for the expiring year. Leaving this estimate out of account, there is an increase on the Class of £16,344. Superannuation and Retired Allowances are expected to require £16,815 more than in the previous year. The increase is automatic in character, and rather below the average amount.

	1903-4.	1903-4. (Grants in Session of 1903.)
<b>CLASS VII.</b> (Miscellaneous.)	£	£
Temporary Commissions .	50,000	52,000

Visit of the President of the French Republic . . .	—	8,000
<b>Total . . . . .</b>	<b>333,327</b>	<b>324,123</b>

**CLASS VII.** (Increase, £9204).—Compared with the original estimates for the year 1903-4, there is an increase upon this Class of £201,620, but the former included no provision for the Ireland Development Grant, the proportion accruing for the latter part of the year (£123,334) being taken in a Supplementary Estimate last session. For next year the statutory grant of £185,000 falls to be provided in full.

#### **Revenue Departments.** (Increase £289,427.)

In spite of savings upon staff, etc., amounting to some £17,000 consequent upon the repeal of the Corn Duty, the Estimate for Customs shows a net increase of £6000. Further provision to the extent of £16,000 has been required to cope with additional work arising from the Sugar Convention, and the establishment of the Statistical Office has been strengthened—at a cost of about £2500—in order to provide more complete statistics than heretofore of imports and exports. **Postal Services** (post office, packet services, and telegraphs) together show an increase of £208,827, as against £651,740 a year ago. The increase under Post Office is £126,224, mainly owing to general expansion in business and the growth of the superannuation charges. £16,200 less is required for manufacture of stamps, etc., owing to a reduction in the cost of manufacture of postal orders. Under **Telegraphs** there is an increase of £172,973, of which £46,589 is for terminable annuities in repayment of sums borrowed on telephone capital account, and £43,159 for telegraphs establishments, due chiefly to augmentation of the engineering staff. £35,000 more is asked for under the head of **Telegraph Rearrangement**, mainly in connection with the extension of the underground line to the north; the sum included for this service is £150,000. £19,000 more is needed for staff, etc., of telephone exchanges, owing to the extension of the system. The growing cost of common services divisible between Post Office and Telegraphs accounts for £33,742. On the other hand, the vote is relieved of the special item of £8000, included this year for the International Telegraph Conference, and £5000 less is required for payments to railway companies and others for transactions of public telegraph business. The non-effective charges on the postal votes show a heavy increase of £48,000, as against £19,040 last year, the number of pensioners having increased by 397 or

7 per cent. In view of this rate of growth, the margin for probable further increase has also been raised by £8500.

#### **Supplementary Estimates, 1903-4.**

Supplementary Estimates for the Civil Services in respect of the financial year 1903-4 were voted early in the session of 1904 to an aggregate amount of £286,177; among the items being £7300 for new works, alterations and additions at **Osborne** in regard to the adaptation of part of the building to the purpose of a Convalescent Home for Naval and Military Officers; £18,800 for **Improvements in the Mall**; £31,000 additional Stationery and Printing; £2000 in respect of expenses incurred in connection with the arrest and extradition of Whitaker Wright, and the case of the convict Lynchehaun; £29,500, Public Education, Ireland (this vote having been £100 more, but reduced under circumstances explained in Session, sect. 11); and £197,677 Savings Banks and Friendly Societies' Deficiencies.

#### **Supplementary Estimates, 1904-5.**

The Supplementary Civil Service grants made during the ordinary session of 1904 in relation to the financial year 1904-5 amounted to £74,297, the items being £5450, Osborne; Treasury, etc., £3090 (including £2960 salaries and expenses of the Committee of Imperial Defence); £49,000 Treasury Chest Fund, and £16,757 repayments to the Civil Contingencies Fund, in this last being £6273 expenditure incurred in connection with the visit of the King and Queen of Italy. Including supplementary estimates, the total votes for all the Supply services in the session of 1904 in respect of the financial year 1904-5 amounted to £112,654,364.

#### **Gross National Expenditure.**

Finally, in order to show the entire expenditure for which the State was responsible in 1903-4, there have to be added—(1) the expenditure to which the Public Revenue assigned to relieve Local Taxation is applied, and (2) the expenditure chargeable to Capital Account. These additions are made in the following statement:—

I. Expenditure chargeable against Exchequer Revenue (Table A, col. 5) . . . . .	£ 146,961,000
II. Expenditure chargeable against Local Taxation Revenue (Table B) . . . . .	9,795,000
	156,756,000

\* In addition to the liabilities given here, there are sundry contingent liabilities which it is considered the State is not likely to be called upon, to any material extent, to discharge.

Under the Capital Expenditure Money Act of last Session, power was taken to borrow by means of Exchequer bonds sums to be applied for the purpose of carrying out military, naval, and other works already sanctioned by Parliament, and which may amount to an aggregate of £9,250,000 (see SESSION).

It is usual to ascribe the origin of the National Debt to the year 1694, but in reality the earliest portion of it dates back to the reign of Charles II. In 1667 an Act was passed to encourage the advance of money to the Crown on the credit of the Exchequer, and London bankers lent very considerable sums on that security; but in 1672 the King closed the Exchequer, appropriating the funds to the extent of £1,328,526, on which, however, interest was paid until 1682, at the rate of 6 per cent. After the Revolution prolonged litigation took place; and

finally, by an Act of 1699, the Bankers' Debt was reinstated among the other national liabilities as from 1705, but at only half its capital value—viz., £664,263—and with the forfeiture of all arrears of interest, entailing a loss of about £2,750,000 upon the unfortunate creditors. The first regular loan of William III., obtained in 1694, consisted of £1,200,000. Since that time other advances have been made by the Bank, and also by the Bank of Ireland, and enormous loans have been negotiated for the Government. Thus, at the accession of Anne the debt had grown to nearly £13,000,000; when George III. ascended the throne it amounted to more than £100,000,000; at the conclusion of the American War, in 1784, it stood at £249,851,000, and though there was a small decrease during the period of peace, 1784-93, additions amounting to £601,500,000 were made during the French War, and after the battle of Waterloo the debt reached the startling figure of £885,000,000. Since that year it has been, to some extent, reduced, and at the end of the last financial year (March 31st, 1904) it stood at £762,629,777, as compared with £770,778,762 twelve months previously.

The National Debt is made up of (1) Funded Debt, (2) Terminable Annuities, (3) Unfunded Debt (see Table D, opposite), which shows the amount of each on March 31st, 1903 and 1904.

(1) This consists of the various stocks, and of the debts to the Banks of England and Ireland.

(2) These are annuities in which the payment is made for lives or terms of years, after which it ceases altogether. In estimating the amount of the Debt, these annuities are capitalised.

Sir M. Hicks-Beach rearranged and prolonged most of these annuities in '99, and reduced the fixed charge for the Debt from £25,000,000 to £23,000,000, estimating that there would still be left in that year a sum of £5,816,000, annually increasing in future years, for the reduction of the Debt. His calculations in this regard were upset by the financial requirements arising out of the campaign in South Africa.

(3) This consisted in the year under review of War Stock and War Bonds, Exchequer Bonds, and Treasury Bills. The total charge for the service of the Debt was, in '16, £32,457,000; in '66-7, £26,074,871; '73-4, 26,706,726; '76-7, £27,992,834; '79-80, £28,762,874; '85-6, £23,449,678; '86-7, £27,958,023; '88-9, £26,224,594; '89-90, £25,226,760; '91-2, £25,200,000; '94-5 and since, £25,000,000, until the year '99-1900, when it was lowered to £23,000,000. Owing to the War the Sinking Fund was suspended in both 1900-1901 and 1901-2, reducing the annual charge for the Debt in the one year to £18,453,000, and in the other to £18,319,000; but the Fund was re-established after the conclusion of peace in 1902. Following the automatic fall in April, 1903, of interest on Consols of from  $\frac{2}{4}$  to  $\frac{1}{4}$  per cent., Mr. Ritchie found himself with a lessened charge in that regard of £1,250,000 per annum. The interest on War Debt, amounting in the last financial year to close upon £4,500,000, was then without the fixed charge of £23,000,000, but he brought that interest within the fixed charge, raising this permanent charge to £27,000,000 per annum. Mr. Ritchie estimated that by the time the Transvaal Loan of £30,000,000 (not the guaranteed loan) in con-

tribution to the expenses of the war was paid, the Government would have a sinking fund of close on £9,000,000, which would be much more operative with Consols at or below par than it had been for some time past.

The National Debt may be regarded from two points of view: that of the dead-weight debt, for which there is nothing to show, and which on March 31st, 1904, amounted to £762,629,777, and that of the gross liabilities of the State, which at the same date stood at £794,498,100; and a comparison between the two sets of figures running over a series of years may be usefully made at this time. The total gross liabilities of the State is found by adding to the dead-weight debt certain other capital liabilities, the nature of which has varied from time to time, and against these were and are set certain estimated assets, and also the Exchequer balances at the Banks of England and Ireland. These assets long included outstanding local loans, until the establishment of the Local Loans Fund and the creation of Local Loans Stock in '88, when a large amount of ordinary stock was cancelled. It will be seen below that the difference between Actual Debt and Gross Liabilities was for several years comparatively small, but that in recent years considerable new capital liabilities have been incurred, which have materially changed the proportionate relations of the totals to each other. Parliament enacts that certain specified sums may be borrowed from the National Debt Commissioners in such amounts as may be required from time to time for the execution of certain works, some of which may be reproductive, the repayments of principal and interest being charged on the estimates and extended over a period of years. The system is quite outside the Debt system proper and its fixed charge. It is the capital liabilities still involved in these undertakings, which are set out in Table D, including those for naval and military works, which are gradually increasing the gross liabilities of the State. In the appended columns the figures are similar to some of those shown in Table D, only that they run back to earlier dates, column No. 1 showing the aggregate of the Funded Debt, the estimated value of the Terminable Annuities and the amount of the Unfunded Debt; No. 2 the Gross Liabilities of the State, and No. 3 the amount of the Local Loans outstanding until the separate stock was created.

## V. THE BUDGET.

Mr. Austen Chamberlain rose to unfold his first Budget, April 19th, 1904, in somewhat difficult circumstances, seeing that owing to the falling off in revenue and growth of expenditure he was known to have to face a considerable realised deficit on the financial year 1903-4, and a respectable prospective deficiency on the figures for 1904-5. In course of his statement he admitted the obligations they owed to both Sir W. Harcourt and Sir M. Hicks Beach for the huge revenue that we now raise. The financial out-turn of the year had been far less favourable than was anticipated when Mr. Ritchie introduced his budget twelve months previously. The great wave of prosperity which we had enjoyed for many years seemed at length to have spent its force, and the cycle of less prosperous years, which experience taught us to expect after every period of great expansion and prosperity, appeared at length to have overtaken us.

The official figures of revenue showed that the Exchequer receipts fell short of the estimate by no less a sum than £2,724,000. While Land Tax and House Duty exceeded the estimate, and Income Tax produced £300,000 in excess of what was anticipated, Customs, Excise, Death Duties, and stamps all did badly, and in the aggregate produced £3,140,000 less than the estimate. The non-tax revenue slightly exceeded the estimate.

The repeal of the corn duty had proved a more costly operation for the revenue than had been anticipated, while if they might judge from the course of prices since it had hardly produced that advantage to the consumer that was anticipated at the time. Tea and tobacco had both done well, the former having shown an excess of receipts over the estimate of nearly a quarter of a million. Excise showed a deficiency as compared with the estimate of the enormous sum of £1,150,000, and taking Customs and Excise together, they fell short of the estimate by nearly a million and a half sterling; the cold summer having affected the consumption of beer and the mild winter checked the consumption of spirits, while account must be taken of the fact that the people had less to spend.

Turning to expenditure, the Budget estimate was £143,954,000, but since then supplementary grants had been made to the extent of £4,488,000, bringing up the total to £148,442,000. Against this was to be set the realised savings of the previous year and the estimated savings of last year, the net result being that the Exchequer issues were £146,961,000, being an excess over the Budget estimate of £3,007,000. In addition to the £146,961,000 chargeable to the income account the Exchequer collected and paid over in relief of local rates £9,795,000, and provided for an expenditure of £7,305,000 on capital account on behalf of certain services for which the spending departments are authorised to borrow.

Exchequer expenditure having been £146,961,000, and Exchequer revenue having been £141,546,000, the year 1903-4 closed with a deficit of £5,415,000. The exact details of the proposals for providing for the deficit were as follow: To the extent of £2,880,000 it was to be permanently withdrawn from the Exchequer balance, that being the amount by which

the balance was abnormally swollen in previous years by borrowings in excess of requirements at the moment. This £2,880,000 having been raised to meet war charges, it appeared to the Government proper to employ it to meet what they regarded as the war charges of 1903-4, so that the money would thus be utilised for the purpose for which it was raised. A sum of £1,000,000 would be provided from the unclaimed dividend account, leaving the unclaimed stock alone; and the further sum of say £1,500,000 would be replaced from surplus revenue. It was with this object that it was proposed to provide for a large surplus of estimated revenue over estimated expenditure in 1904-5.

After adverting to the National Debt, which is dealt with in Part IV. (*ante*), the Chancellor touched comparatively the question of local indebtedness, remarking that if the national stocks and the stocks of local authorities were to regain their old credit, local authorities as well as the Exchequer must agree to restrict for a time their demands; stating that at the close of 1901-2 the total outstanding loans of local authorities in the United Kingdom amounted to £412,000,000, and contending that sooner or later it might be necessary to call a halt in this process of borrowing.

His estimate of Exchequer expenditure for 1904-5, including £500,000 for the operations in Somaliland, was £142,880,000, apart from an estimated sum of £9,696,000 which the State would collect and pay over in relief of local charges, and of further responsibilities on capital account. He estimated a total Exchequer revenue of £139,060,000 as against a total expenditure of £142,880,000, so that he had to make good a sum of £3,820,000 without allowing any margin for contingencies, and without making any further progress towards the restoration of the balance. He agreed that an *ltd.* income tax was too high a figure as a permanent rate for times of peace, and though he was obliged to ask the House to add an additional penny this year, in his opinion the income tax payer would have the first claim to relief, and he hoped the sacrifice he was now asked to make would not endure for long. This additional penny would yield in a full year £2,500,000, and should give him in the present year £2,000,000. The right hon. gentleman next turned to tobacco, proposing, while leaving the rate on the raw leaf at 3s., to introduce a new rate of 3s. 3d. on tobacco stripped before importation; to increase the duty on foreign cigars by 8d., and to put a similar luxury tax of 1s. per lb. on foreign cigarettes; to raise the moisture limit on tobacco to 32 per cent., and to modify the rates of drawbacks. The net result of these changes was an estimated gain in the revenue of £550,000. As he still required a sum of something like £2,000,000, he proposed to add 2d. a lb. to the tea duty, increasing it to 8d. per lb. He thus arrived at a total revenue of £143,610,000, against an expenditure of £142,880,000, or a surplus of revenue over expenditure of £730,000. This was a larger margin than it had been customary to allow in recent years, and it was from this source that he looked for the further restoration of the balance in the Exchequer beyond the amount he had already stipulated. (For discussion on Budget proposals see SESSION, sect. 41.)

## Exchequer Balances.

In illustration of the Chancellor of the Exchequer's Budget Statement the following tables are appended—

1903-4.	
Exchequer Balance on March 31st, 1903 . . . . .	£6,637,000
Augmented—	
(a) By repayment of sum voted as a Temporary Advance to the Transvaal and Orange River Colony in 1902-3 . . . . .	£ 3,000,000
(b) By excess of Repayments over Advances for purchase of Bullion . . . . .	80,000
(c) By temporary borrowing on the credit of Ways and Means . . . . .	2,000,000
	5,080,000
	11,717,000
Depleted—	
(a) By draft to meet Expenditure . . . . .	5,415,000
(b) By advances on various Capital Accounts unreplaced . . . . .	2,000,000
(c) By discount on issue of Exchequer Bonds . . . . .	38,000
	7,453,000

Exchequer Balance on March 31st, 1904 . . . . . £4,264,000

## 1899-1904.

The Balance on March 31st, 1899, was . . . . . £8,919,000

In the next five years,

## I. It was strengthened by—

(a) Borrowing . . . . .	£154,371,000
(b) Repayments in respect of Sardinian Loan . . . . .	285,000
(c) Temporary advance repaid by Transvaal . . . . .	3,000,000
	£157,656,000

## II. It was depleted by—

(a) Issue of part of old Sinking Funds of 1895-6 and 1896-7, represented by surplus revenue . . . . .	1,862,000
(b) Net advance on Bullion . . . . .	450,000
(c) Expenditure in Excess of Revenue . . . . .	157,961,000
(d) Advances on Capital Account . . . . .	2,000,000
(e) Discount on issue of Exchequer Bonds . . . . .	38,000
	162,311,000
	4,655,000

Balance on March 31st, 1904 . . . . . £4,264,004

## Budget Figures, 1903-4.

Estimated Revenue . . . . .	£ 144,270,000
„ Expenditure . . . . .	143,954,000
„ Surplus . . . . .	£316,000

## Actual Receipts and Expenditure.

Receipts . . . . .	£141,546,000
Expenditure . . . . .	146,961,000
Realised Deficit . . . . .	£5,415,000

## How the Deficit was to be Met.

Out of borrowings in excess of requirements . . . . .	2,880,000
Unclaimed Dividend Account . . . . .	1,000,000
Prospective Surplus Revenue (say) . . . . .	1,535,000
	£5,415,000

## 1904-5.

First Estimate of Revenue . . . . .	£139,060,000
„ „ Expenditure . . . . .	142,880,000
Prospective Deficit . . . . .	3,820,000
1d. on Income Tax . . . . .	£2,000,000
Tobacco Duties . . . . .	550,000
2d. per lb. on Tea . . . . .	2,000,000
	4,550,000
Margin for Contingencies . . . . .	£730,000
Final Estimate of Revenue . . . . .	£143,610,000
„ „ Expenditure . . . . .	142,880,000
Margin . . . . .	£730,000

## Indirect and Direct Taxation.

The following interesting information was officially supplied to Mr. Toulmin, M.P., showing the details of the yield of indirect and direct taxes for the years mentioned :

	Revenue from Taxes.		Proportion per cent.	
	Indirect.	Direct.	Indirect.	Direct.
	£	£	£	£
1893-4	45,790,000	36,944,000	55'3	44'7
1898-9	51,816,000	48,224,000	51'8	48'2
*1903-4	64,233,000	62,862,000	50'5	49'5

\* Based on Exchequer receipts, and excluding coal.

Fisher, Admiral Sir John A., G.C.B. Appointed Senior Naval Lord on the Board of Admiralty in Oct. 1904, was b. Jan. 25th, '41, and is the son of Capt. W. Fisher, 78th Highlanders. He entered the Navy in '54, saw service in the Chinese and Crimean wars, and distinguished himself in the Egyptian war '82. He was appointed Director of Naval Ordnance and Torpedoes in '86, Rear-Admiral '90, Admiral Superintendent Portsmouth Dockyard '91, Controller of the Navy '92, Commander-in-Chief North America and West Indies Station '97, Naval Delegate Hague Peace Conference '99, Commander-in-Chief Mediterranean '99-1902, Portsmouth Aug. 1903, and Senior Naval Lord 1904. He was a member of the Esher War Office Committee 1903. Appointed First and Principal Naval Aide-de-Camp to H.M. the King, Oct. 21st, 1904.

## THE FISCAL QUESTION.

### A HISTORICAL REVIEW OF THE MOVEMENT, 1903-4.

- I.—EVENTS OF 1903.
- II.—THE LIBERAL UNIONIST SPLIT.
- III.—PARLIAMENTARY PROCEEDINGS, 1904.
- IV.—THE PROPOSED COLONIAL CONFERENCE.
- V.—THE TARIFF COMMISSION.
- VI.—INDIAN AND COLONIAL OPINION.
- VII.—PUBLICATIONS AND ASSOCIATIONS.

#### I. EVENTS OF 1903.

It appears from a speech made by Mr. Ritchie, M.P., at Thornton Heath, on Nov. 18th, 1903, that Mr. Chamberlain, then Secretary of State for the Colonies, first laid his policy of Preferential Tariffs before the Cabinet in November 1902. Mr. Ritchie stated that he, as Chancellor of the Exchequer at that time, at once opposed the policy proposed by Mr. Chamberlain, and in March 1903 informed the Prime Minister that he could not prepare a Budget till the question was decided one way or the other, and if it were decided against the views he held he should decline to be responsible for the Budget and should have to tender his resignation. Mr. Ritchie and Mr. Chamberlain discussed the question in March 1903, and Mr. Chamberlain withdrew his opposition to Mr. Ritchie's views. The "Budget Cabinet" was held on March 31st, when Mr. Ritchie as Chancellor of the Exchequer placed his proposals before the Cabinet and they were agreed upon. Those proposals involved the dropping of the duty of 1s. per quarter on imported corn and flour, and in spite of great opposition statutory effect was finally given to the Budget by the Finance Act, 1903, and the duty was abandoned.

#### *The Birmingham Speech.*

It was at Birmingham on May 15th, 1903, that Mr. Chamberlain delivered the speech in which he urged that preferential tariffs stood first amongst the means of promoting the union of the British Empire. He said that since he left South Africa a great conference had been held of all the colonies in that region—the new as well as the old, Boers and Dutch being represented as well as the British; and this conference recommended the other legislatures of the different colonies to give the mother country preference upon all dutiable goods of 25 per cent. Last year (1902), at the Conference of Premiers, the representatives of Australia and New Zealand accepted the same principle, and pledged themselves to recommend to their constituents a substantial preference in favour of goods produced in the mother country. These recommendations and pledges would bear fruit just in proportion as we showed our appreciation of them, and they would depend largely upon the experience of Canada, which had been their precursor in a similar movement. Canada in 1898 gave us a preference on all dutiable goods of 25 per cent., which she in 1900 voluntarily increased to 33½ per cent. In 1902 the Ministers of Canada said, "We have done for you as much as we can do voluntarily and freely and without return. If you are willing to reciprocate in any way, we are prepared to reconsider our

tariff with a view of seeing whether we cannot give you further reductions, especially in regard to those goods in which you come into competition with foreigners; and we will do this if you will meet us by giving us a drawback on the small tax of 1s. which you have put upon corn." This was an offer which we had to refuse. If he could treat matters of this kind solely in regard to his position as Colonial Secretary, he should have said, "That is a fair offer—that is a generous offer from your point of view—and it is an offer which we might ask our people to accept." But speaking for the Government as a whole, not in the interests of the Colonies, he was obliged to say that it was contrary to the established fiscal policy of the country, and that we held ourselves bound to keep an open market for all the world, even if they closed their markets to us, and that, therefore, so long as that was the mandate of the British public, we were not in a position to offer any preference or favour whatever, even to our own children. We could not make any difference between those who treated us well and those who treated us badly. Mr. Chamberlain went on to say that Germany had retaliated on Canada for the preference she had shown us, and that this policy of reprisal was intended to deter other colonies from giving us the same advantage, and was justified by the belief that we were so wedded to our fiscal system that we could not interfere. This was putting us in a rather humiliating position, and he did not like it at all. How in such circumstances could we approach our colonies with appeals to aid us in promoting the union of the Empire, or ask them to bear a share of the common burden, when, if they showed us kindness, and gave us preference, we, who benefited by their action, could only leave them alone to fight their own battles against those who were offended by their action? Was this free trade? No, it was absolutely a new situation. It would be presumptuous to imagine what Mr. Bright or Mr. Cobden would have said to this state of things, but if they had been present among us now, and knew what this new situation was, he could not believe that they would have hesitated to make a treaty of preference and reciprocity with our own children.

#### *In the House of Commons.*

In the course of a debate in the House of Commons on May 28th, 1903, on a motion for adjournment made by Sir Charles Dilke, in order to raise the question of fiscal policy, Mr. Chamberlain dealt still more explicitly with the question. He urged again that the existing fiscal system of the United Kingdom provided no weapon wherewith to meet fiscal attacks upon the

Colonies, or upon the mother country, which were already serious, and which might become much worse. If that system was to be adhered to so rigidly as to make counter-attacks impossible, the British colonies should be so informed; but he believed that such a decision would put an insurmountable obstacle in the way of closer fiscal relations with the Colonies; and if the hope of such a relationship were abandoned, the idea of establishing closer political relations would also have to be dismissed, and a united Empire would then be beyond the bounds of possibility. They could not make arrangements with the Colonies until the country had declared itself. If such a declaration were made he should call another Conference of the Ministers of the self-governing Colonies, and he believed that terms giving us as much as we could give the Colonies could be secured. By us the preference must be given on raw material or upon food, or upon both. "But," he said,

"so far as I can see, it will not be necessary to put any tax at all on raw material. . . . Therefore it comes to this—if you are to give a preference to the Colonies—I do not say that you are—you must put a tax on food."

Suppose we imposed a duty on corn, it might be assumed that the working classes would pay three-fourths of it: the working classes were entitled to every penny of the three-quarters, and he would give them without hesitation the other quarter. The large sum available should be devoted to social reforms; and old age pensions, or anything else that cost large sums of money which had hitherto seemed to be out of reach of immediate practical politics, would become practical if this policy were carried out. His proposed tax was not intentionally protective; but incidentally, and so far as it went, it would be protective. There was no doubt whatever that the state of agriculture had been, and was, a serious question for the country. Anything which increased our home food supply would have some advantages which might be set against any disadvantages which accompany protection upon articles of food.

Mr. Balfour spoke in the course of the same debate, and said this country was no longer in the position in which it was in 1846. There was every prospect that in future foreign countries would manipulate their tariffs more and more to our disadvantage, and that we should find it increasingly difficult to secure markets for our manufactured goods. He asked, therefore, whether the time had not come for abandoning the doctrine that revenue was never to be raised for other purposes besides expenditure. He urged also that, if foreign countries should take the view that the self-governing Colonies could be treated as separate nations, we should resist their policy by fiscal retaliation. There could, of course, be no return to the old Protectionist policy of taxing articles in the interests of trade, but he questioned whether the working classes would repudiate a policy involving the taxation of food (which was essential if the system of Preferential Trade advocated by the Colonial Premiers was to be carried out) if it was likely to lead to an improvement in the fiscal and Imperial position of the country. The question could not be dealt with that Session, or the next, or the Session after that, as it would have to be most carefully examined and exhaustively thought out.

### *Reception of the Proposals in Parliament.*

The proposals thus made by Mr. Chamberlain, and more or less endorsed by Mr. Balfour, evoked the deepest interest in the United Kingdom and throughout the Empire. The Government, it was soon made clear, were not unanimous on the matter. Mr. Ritchie, then Chancellor of the Exchequer, and Sir Michael Hicks-Beach, his predecessor, expressed strong objections to Mr. Chamberlain's proposals. Mr. Ritchie said explicitly in the House of Commons, in the course of the discussion on the second reading of the Finance Bill June 9th, 1903:

"I cannot be a party to a policy which, in my opinion, would be detrimental both to the mother country and to the Colonies"; and avowed himself "a convinced Free Trader." Sir Michael Hicks-Beach said the promulgation of such a policy

"is dividing our party on this side of the House, and I venture to express my deep and conscientious conviction that if persisted in it will destroy the Unionist party as an instrument for good."

Lord Goschen declared in the House of Lords, June 15th, 1903, that the plan of Mr. Chamberlain amounted to "gambling with the food of the people." The Duke of Devonshire's view expressed on the same occasion is indicated in the following passage from his speech:—

"If these proposed changes are economically sound, then there is no question that they will be politically expedient. On the other hand, if these political advantages—I admit they are great—can only be purchased at the expense of privation, hardship and discontent on the part of our own people, then I say I can conceive no policy which would more certainly or more swiftly tend to the dissolution and disintegration of our Imperial Empire."

Many other members of the Government, however, as for instance Lord Lansdowne and Mr. Long, and many supporters of the Government, of course including Mr. Chaplin, Sir Howard Vincent, and others, welcomed the policy outlined by Mr. Chamberlain. So also did several Liberals, including the Duke of Sutherland, Mr. T. A. Brassey, and others.

The Opposition from the first condemned and resisted it. Lord Rosebery at Burnley on May 19th, 1903, indicated the nature of the objections, which he believed to be insurmountable, to such a policy. Lord Spencer, Sir Henry Campbell-Bannerman, Mr. Asquith, Sir Edward Grey, Mr. Bryce, Sir William Harcourt, Sir Henry Fowler, all strongly criticised the proposals as detrimental to the Empire.

The line taken by the Government in view of these circumstances was that there should be an inquiry, "a most careful examination of every side of the problem," as Mr. Balfour put it in the House of Commons (June 10th, 1903). The inquiry, said the Duke of Devonshire (June 29th, 1903), was being carried on "by the members of the Government for themselves." They were endeavouring to arrange the necessary information in a manner in which they would be able to consider it for themselves, and in due time the results of their examination would be communicated to Parliament and the country.

### "Freedom of Negotiation."

Speeches were delivered on the subject by Mr. Balfour and Mr. Chamberlain at the Constitutional Club (June 26th, 1903), when Mr. Chamberlain received an address and a casket in recognition of his services to the Unionist party. Mr. Balfour said: "It would be perfect folly on the part of the Conservative party or the Unionist party to make particular opinions on economic subjects a test of party loyalty." His object he stated thus: "What I desire, if it could be carried out, is freedom of negotiation for the purpose of increasing freedom of trade."

Mr. Chamberlain reiterated his view thus: "I have already indicated my opinion that a system of preferential tariffs is the only system by which this Empire can be kept together." He added that there was another branch of the subject. "I want that this Government should be placed in a position to negotiate with foreign countries and to see whether we cannot break down that wall of hostile tariffs, upon which in existing circumstances we have been unable to make the slightest impression. And I will go further, and say that if we failed in our negotiations at least we should retain for our own country a vast production—a vast opportunity for employment which is now lost, and which is driving our people into foreign lands." Other points in his speech may be noted as follows: He laid it down as "a mathematical truth" that imports of manufactured goods which we can make as well as any other nation coming into this country must displace labour. He suggested that even if bread were to be made dearer there could be a proportionate decrease in the price of some other articles, so that the cost of living should not be increased in the slightest degree. Old age pensions "had no part whatever in the question of a reform in our fiscal policy," but he had suggested that "inasmuch as any alteration of our fiscal system must necessarily largely increase the sums received in the shape of indirect taxation, a portion of those sums, at any rate, should be applied in order to provide old age pensions for the poor."

### No Debate in the House.

Various attempts were made to raise a debate on the question in the House of Commons, so as to enable it to be debated fully there, but this was not accomplished; and Lord Hugh Cecil was one of the Unionist M.P.s who spoke his mind very freely upon it. He said Mr. Balfour had sought "by every means in his power to restrict and limit within the closest dimensions the deliberative powers of the House." Sir M. Hicks-Beach asked (July 15th, 1903) if the Prime Minister would give facilities for a full discussion of the changes in fiscal policy proposed by Mr. Chamberlain, in order that the House might aid the country in the inquiry which it had been invited to engage in by the Government. Mr. Balfour said no useful purpose would be served by a discussion on a motion of a general abstract character; and, in reply to Sir Henry Campbell-Bannerman (who asked if the Government refused to afford an opportunity for discussion of a subject upon which Mr. Chamberlain had invited discussion, and which Mr. Balfour said had no party significance), he intimated that if Sir Henry desired to move a vote of censure no obstacle would be put in his way.

On the second reading of the Appropriation Bill, Aug. 11th, 1903, Mr. Balfour expressed

a hope that a very large instalment of figures would be issued within the next four weeks. Lord H. Cecil protested against what he described as the extraordinary use the Colonial Secretary had made of his official position, combining the prestige of a Minister of the Crown with the liberty, stretched to its utmost point, which the ordinary politician might exercise in the discussion of public matters. This was a constitutional scandal scarcely less than the attitude which his right hon. friend took up towards all proposals to discuss the policy which had been forced on the country. A similar discussion arose on third reading of the Bill, and the Session closed without any formal debate having taken place on the subject.

### The Professors of Economics.

A number of professors and teachers of economics sent to the *Times* (Aug. 15th, 1903) a letter setting forth reasons why they were opposed to any change in fiscal policy. Preferential tariffs would probably lead to the reintroduction of Protection, which would be detrimental to the country, and would engender irritating controversies between the different members of the Empire. They said:

"Our convictions on this subject are opposed to certain popular opinions, with respect to which we offer the following observations:—

"1. It is not true that an increase of imports involves the diminished employment of workmen in the importing country. The statement is universally rejected by those who have thought about the subject, and is completely refuted by experience.

"2. It is very improbable that a tax on food imported into the United Kingdom would result in an equivalent—or more than equivalent—rise in wages. The result which may be anticipated as a direct consequence of the tax is a lowering of the real remuneration of labour.

"3. The injury which the British consumer would receive from an import tax on wheat might be slightly reduced in the possible, but under existing conditions very improbable, event of a small portion of the burden being thrown permanently on the foreign producer.

"4. To the statement that a tax on food will raise the price of food, it is not a valid reply that this result may possibly in fact not follow. When we say that an import duty raises price, we mean, of course, unless its effect is overborne by other causes operating at the same time in the other direction. Or, in other words, we mean that in consequence of the import duty the price is generally higher by the amount of the duty than it would have been if other things had remained the same.

"5. It seems to us impossible to devise any tariff regulation which shall at once expand the wheat-growing areas in the Colonies, encourage agriculture in the United Kingdom, and at the same time not injure the British consumer.

"6. The suggestion that the public, though directly damaged by an impost, may yet obtain a full equivalent from its yield, is incorrect, because it leaves out of account the interference with the free circulation of goods, the detriment incident to diverting industry from the course which it would otherwise have taken, and the circumstance that, in the case of a tax on foreign wheat (English and Colonial wheat being free), while the consumer would have to pay the whole, or nearly the whole,

tax on all the wheat, the Government would get the tax only on foreign wheat.

"7. In general, those who lightly undertake to reorganise the supply of food, and otherwise divert the course of industry, do not adequately realise what a burden of proof rests on the politician who, leaving the plain rule of taxation for the sake of revenue only, seeks to attain ulterior objects by manipulating tariffs.

### **Changes in the Cabinet, 1903.**

The Cabinet met (Sept. 14th, 1903), and considered the Fiscal Policy, and Mr. Balfour's pamphlet on the subject, "Insular Free Trade," (Longmans, 1s.), was published (16th). The resignations of Mr. Chamberlain, Mr. Ritchie, and Lord George Hamilton were announced (18th), and of Lord Balfour of Burleigh and Mr. Arthur Elliot (21st), while the Duke of Devonshire followed suit (Oct. 6th, 1903). It transpired subsequently that Mr. Chamberlain had written to Mr. Balfour on Sept. 9th in anticipation of the Cabinet meeting, acknowledging that a preferential agreement with the Colonies involving the taxation of some articles of food was, even if accompanied by a reduction of taxation on other articles of food, unacceptable to the majority in the constituencies; that the policy could not therefore be pressed; stating that the feeling in favour of the other branch of fiscal reform, which would give the Government fuller discretion in negotiating with foreign countries and enable them to retaliate if necessary, justified the adoption of such a policy by the Government; and saying that he (Mr. Chamberlain) would resign in order to devote himself to explaining and popularising the cause he had at heart. Some feeling was aroused and much comment was excited by the disclosure of the fact that Mr. Ritchie and Lord George Hamilton did not know when they resigned of the existence of the above letter from Mr. Chamberlain, which, though dated Sept. 9th, was not communicated to the Cabinet at its meeting on Sept. 14th. Mr. Ritchie and Lord George Hamilton wrote their letters of resignation on Sept. 15th, "in ignorance of Mr. Chamberlain's resignation and

of the consequent elimination of all that related to Preferential Tariffs from the Government programme."

### **Mr. Balfour's "Sheffield Programme."**

On Oct. 1st, 1903, Mr. Balfour spoke at Sheffield at the annual meeting of the National Union of Conservative Associations, and declared that while he was opposed to the taxation of food, it was only because it was not within the limits of practical politics, and he did not think public opinion was ripe for it. He was in favour of Retaliation, however. Tariff attacks could only be met by Tariff replies. He said: "My request therefore to you to-night—the fundamental and essential request to which everything I have to say in the remainder of my speech is subsidiary and accidental—is that the people of this country should give to the Government of this country, from whatever party that Government may be drawn, that freedom of negotiation of which we have been deprived, not by the force of circumstances, not by the action of overmastering forces, not by the pressure of foreign Powers, but by something which I can only describe as our own pedantry and our own self-conceit." He admitted that without the imposition of taxes of food Retaliation could not be complete. He said categorically that he desired "to reverse the fiscal tradition which has prevailed during the last two generations" by asking the country "to reverse, to annul and delete altogether from the maxims of public conduct the doctrine that you must never put on taxation except for revenue purposes. . . . This country should again have what every other country in the world possesses, and that of which no other country in the world would think of depriving itself, the liberty to negotiate and something to negotiate with." He said: "My object is to mitigate, as far as circumstances allow, the injury done to us by hostile tariffs." Another passage of the speech ran thus: "I have been asked to give a lead. I think that request was a reasonable one. A man who, however unworthy, is called upon to lead a party must lead it, and so long as I am in that position I mean to lead it."

After Mr. Balfour's speech the National Union of Conservative Associations carried unanimously the following resolution:—

"That this Conference, believing that the changes which have taken place during the last fifty years in the conditions under which British Trade has been carried on necessitate the reconsideration of the fiscal system which we as a nation have adopted during that period, thanks the Prime Minister for having instituted an inquiry into the whole subject, and welcomes the policy which he has foreshadowed for securing to this country fiscal freedom in our negotiations and commercial relations with foreign countries."

### **Opening of the Campaign.**

On Oct. 6th 1903, Mr. Chamberlain, freed from the responsibilities of office, opened his campaign at Glasgow with a speech which attracted deep attention throughout the Empire and all over the world. The proposals made by him at Glasgow and in subsequent speeches may be thus summarised:—

**New Duties.**

On foreign corn and flour . . . 2s. per qr.  
On foreign meat and dairy produce 5%

Maize and bacon, however, are to be excluded from taxation, as the latter forms the food of some of the poorest of the population; while maize is a raw material to the farmers, who feed their stock with it.

The Colonies are to have a preference by exemption from the above duties; and a substantial preference is also to be given to them upon Colonial wines and also perhaps upon Colonial fruits.

**Duties Removed.**

These new duties are to be accompanied by the following remissions of duty:—

Tea . . . . .	3/4 of duty*
Sugar . . . . .	1/2 " "
Coffee and Cocoa . . . . .	1/2 " "
Foreign manufactured goods	10%†

\* Then at 6d. per lb.

† To be applied to foreign nations enforcing high duties on British manufactures, and to average 10%, being arranged according to the amount of labour expended on the manufactured goods.

**II. THE LIBERAL UNIONIST SPLIT.*****The Chamberlain-Devonshire Correspondence.***

On Jan. 11th, 1904, letters which had passed between the Duke of Devonshire and Mr. Chamberlain appeared in the public press. The correspondence had reference to the position of the Liberal Unionist Association in regard to the Fiscal Question.

On Oct. 23rd, 1903, the Duke of Devonshire wrote to Mr. Chamberlain expressing the opinion that it was inconsistent with the neutral position, which it had been agreed the Association should endeavour to maintain, to continue to subsidise local Liberal Unionist associations which, like that at Newcastle, had taken up a very decided position on the question of Tariff Reform. He added: "It must have occurred to most of us that it is almost impossible with any advantage to maintain under present circumstances the existence of the Liberal Unionist organisation; but before taking any steps in the matter I should be very glad to know your views."

Mr. Chamberlain replied on Oct. 26th, 1903: "I should not myself be willing to break up the Association without a struggle to retain it in existence to continue the work which it has hitherto so admirably performed." He added that he was convinced that "a vast majority of the rank and file of the Liberal Unionists" were with him and against the Duke. He suggested a general meeting of delegates from the Liberal Unionist Associations throughout the country to decide the question; but did not urge this course, being content to "go on as we are, with a neutral central organisation, dispensing its funds impartially to those associations which are in need of them, and which continue to support the Government, without reference to the views they hold, whether expressed or unexpressed, on the Fiscal Question."

At the time of the Dulwich and Lewisham bye-elections, in Dec. 1903, the Duke wrote a letter as President of the Unionist Free Food League, his colleagues concurring, expressing

the opinion that "an elector who sympathises with the objects of the Unionist Free Food League would be well advised to decline to give his support at any election to a Unionist candidate who expresses his sympathy with the policy of Mr. Chamberlain and the Tariff Reform League."

Mr. Chamberlain thereupon, on Dec. 22nd, expressed his regret at seeing the Duke's letter, and said: "Unless you have taken this step with the intention of breaking off all relations with the Liberal Unionist Association, the position can only be regularised by a vote approving your action, and passed either by the Council of the Central Association or by delegates from the Liberal Unionist Associations throughout the country."

The Duke wrote, on Jan. 2nd, 1904, referring to private communications which had passed, that he had done all that was in his power to avert the violent disruption of the Association, but gathered that Mr. Chamberlain considered it inevitable, since the procedure he suggested could only result in either Mr. Chamberlain and his supporters, or the Duke and his supporters, finding it impossible to continue to be members of the Association. He continued: "Deeply as I regret, I do not question the conclusion at which I assume you have now arrived—that the continuance of the existing Liberal Unionist organisation is no longer practicable or possible."

On Jan. 4th, 1904, Mr. Chamberlain ended the correspondence by stating that he strongly deprecated the dissolution of the Association, and would on his own responsibility call a general meeting.

***Reconstitution of the Liberal Unionist Council.***

A special meeting of the Liberal Unionist Council was accordingly held at the Westminster Palace Hotel on Feb. 3rd, 1904. It was convened and presided over by Mr. Chamberlain, and attended by 84 members out of a total of 120. Mr. Chamberlain moved: "That in the opinion of this meeting the existence and activity of the Central Liberal Unionist Organisation should be maintained." Sir Fortescue Flannery, M.P., seconded.

Mr. Andrew Johnston moved and Mr. H. Crawford Smith, M.P., seconded an amendment as follows: "That the revival of Protection for the benefit of certain manufactures in England would greatly strengthen the cause of Home Rule in Ireland, and that unless this Association is prepared to resist that policy the sooner it is dissolved the better." Only three voted for the amendment, and the original resolution was carried with only two dissentients.

The following resolutions were then carried:

"That the officers of this Association be instructed to assist, as heretofore, all Liberal Unionist candidates and Liberal Unionist associations that are prepared to support a Unionist Government without regard to their personal opinions upon the question of fiscal reform."

"That the Management Committee be requested to consider the present organisation of the Council and to prepare a scheme for its future management and for the fuller representation of the Liberal Unionist party, to be submitted to the annual meeting to be held in June at a convenient date to be fixed by the Committee."

The annual meeting of the Liberal Unionist Council was held May 18th, 1904, at the Westminster Palace Hotel. The Duke of Devonshire presided, and the resolutions carried on Feb. 3rd and set out above were considered, in view of the fact that the meeting on Feb. 3rd was not technically a meeting of the Council, but only of members of the Council. The Duke of Devonshire and Mr. Chamberlain both spoke, and formal resolutions were carried for the reconstitution of the Council on the basis of a fuller popular representation of the party, and the adoption of new rules which, the Duke pointed out, would "create a new political organisation," not merely to oppose Home Rule, but to take such a line as it might think fit upon any political questions that may be raised." The local associations were then invited to take the necessary steps to constitute an organisation on the lines indicated; and the Duke of Devonshire, in answer to a question by Lord Lichfield whether he should assist in the election of delegates to a meeting of the new Council, and whether Liberal Unionists who held Free Trade opinions should join the Council, said he could not recommend any of his friends to take part in the nomination of representatives to the new Council, and the answer to the second point must depend upon the attitude of the organisation to the fiscal question.

#### **The new Liberal Unionist Council.**

The meeting of the new Council was held in the Imperial Theatre, Westminster, July 14th, 1904, Mr. Chamberlain being in the chair. The representatives of 278 associations were present. The objects of the Council were stated to be: (1) To maintain the Parliamentary Union between Great Britain and Ireland, and the supremacy of the Imperial Legislature; (2) to promote throughout the United Kingdom the formation of Liberal Unionist associations; (3) to publish literature, to promote meetings, and provide speakers and lecturers, to help in securing Parliamentary candidates, and otherwise to assist Liberal Unionist associations in their work; (4) to secure from time to time the authoritative expression of the opinions of the Liberal Unionist party on questions of public policy and current legislation. On the proposition of the Duke of Bedford, seconded by Sir A. Henderson, M.P., the officers were appointed thus:—

President, Mr. Joseph Chamberlain.

Vice-Presidents, Lord Lansdowne and Lord Selborne.

Chairman of Committees, Sir Savile Crossley, M.P.

Hon. Sec., Mr. Victor Cavendish, M.P.

#### **The new Council and the Fiscal Question.**

The resolutions carried by the meeting urged on the Government the necessity of a Redistribution Bill, heartily approved the Aliens Bill, and dealt with the Fiscal Question as follows: "That this Council, believing that the time has come for a complete reform of our fiscal system, approves of the demand made by the Prime Minister for increased powers to deal with hostile tariffs and the practice of dumping, and further expresses its earnest hope that the ties of sympathy which already unite the British Empire may be strengthened by a commercial union with the Colonies, based on preferential

arrangements between them and the mother country." "That the officers of this Association be instructed to assist as heretofore all Liberal Unionist candidates and Liberal Unionist associations that are prepared to support the Unionist Government, without regard to their opinions upon the question of fiscal reform."

The August number of the official organ of the Imperial Tariff Committee, *Monthly Notes on Tariff Reform*, edited by Mr. C. A. Vince, stated that it was no longer possible to dispute the significance of the decision of the Liberal Unionist Council. More than 2000 Liberal Unionists, elected to represent 278 local Liberal Unionist organisations, and bringing with them the mandate of their colleagues, had adopted with practical unanimity the Crewe resolution—the most emphatic and determined of the 45 resolutions in favour of tariff reform of which notice had been given. The Liberal Unionist party was irrevocably pledged to tariff reform, and to support of Mr. Chamberlain.

#### **The Unionist Free Trade Club.**

Lord James of Hereford presided over a special general meeting of the Liberal Union Club on June 29th, 1904, called to consider the advisability of electing representatives to the new Liberal Unionist Council. An amendment moved by Mr. Arthur Elliot, M.P., and seconded by the Hon. F. Lambton, M.P., expressing the views of the Free Trade members of the Club, was defeated by 108 votes to 64. The minority thereon resigned membership of the Club and formed a Unionist Free Trade Club, the objects of which were stated to be "to maintain the Parliamentary union of Great Britain and Ireland and to uphold the system of Free Trade." The inaugural meeting of the Club was held on Dec. 1st, 1904, at Devonshire House. The Duke of Devonshire took the chair, and the officers elected were as follows:—

President, The Duke of Devonshire.

Vice-Presidents, Viscount Goschen, Lord Balfour of Burleigh, Lord James of Hereford, Lord George Hamilton.

Hon. Sec., Sir W. Cameron Gull.

### **III. PARLIAMENTARY PROCEEDINGS, 1904.**

Mr. J. Morley moved (Feb. 8th) the Opposition amendment to the Address, setting forth that effective deliberation on the financial service of the year was being rendered difficult by the conflicting declarations of Ministers; that the removal of Protective duties had for more than half a century actively conduced to the vast extension of our trade and commerce and to the welfare of the population, and that any return to Protective duties, more particularly when imposed on the food of the people, would be deeply injurious to the national strength, contentment, and well-being. Mr. G. Balfour opposed the amendment. He declared emphatically that the policy of the Government was not Protectionist. A policy of preference did not necessarily include Protection; and as to the policy of the Government, it was not incompatible with Free Trade principles. In fact, the Government were prepared to fight for those principles by negotiation. Sir H. Fowler entertained no doubt that members of the Government meant if they could to carry out the policy of Mr. Chamberlain. But at present that policy did not appear to be popular in the country, judging from the bye-elections. Lord

H. Cecil, as "a Conservative of 1895," said he could not vote against the amendment, for he agreed with every word it contained; but if he could be satisfied that the Government were going to oppose seriously the Birmingham programme, he might think it right to abstain from voting. Sir E. Grey observed that it would be impossible for the Government to limit the issue to Retaliation at the next General Election, because Mr. Chamberlain would have to be taken into account. As to the policy of Negotiation, backed by Retaliation, he questioned whether it would be useful. Mr. W. Churchill was inclined to regard the assurances of Mr. G. Balfour as inspired by tactical expediency, and for that reason he should vote for the amendment. Mr. Chaplin contended that the policy of retaliation, though better than nothing, would not do all that was required. Mr. Lyttelton said the Government would support Unionist members who supported honestly the Ministerial fiscal programme, even if their personal opinions as to what ought to be done went beyond the lines laid down. Colonial preference was at present not a part of the Ministerial programme, but he begged members not to be in a hurry to commit themselves against it. Mr. Asquith declared that retaliation was the first step, and a long step, towards Protection. Countries which used the power of retaliation, he said, had not fared better than we had; and we should be unable to retaliate against some of our chief competitors, unless food and raw material were taxed. Mr. Wyndham defined the policy which the Government would submit to the country. They would, he said, ask for power to resume that freedom to negotiate for the purpose of obtaining commercial advantages which had not been in the hands of the British Government since 1860. Sir H. Campbell-Bannerman declared that the Government were cutting into the fibres of the Constitution, as they contemplated the imposition of tariffs by executive action, and the future disappearance of the control of the House over the taxation and finance of the nation. Mr. Akers-Douglas wound up the debate on behalf of the Government. He denied that the Government were in favour of Protection, which they had not defended, and did not intend to defend. In reply to the query whether they were going to fight for Free Trade, he would say that they were going to fight for even freer trade, their object being to secure reductions of hostile tariffs. The amendment was rejected (Feb. 15th) by 327 votes to 276.

#### *In the Lords.*

The Earl of Crewe asked H.M. Government (Feb. 18th) what steps they proposed to take to give effect to the policy of "Negotiation and Retaliation," and moved that no duty upon imports into the United Kingdom from foreign countries, or from British colonies and dependencies, should be imposed, modified, or removed without the formal consent of Parliament to each such proposal. Lord Balfour declared that retaliation was not a final policy, but commercial war. The Marquis of Salisbury, rising for the first time to address their lordships' House, maintained that Protection formed no part of the policy of the Government. Being anxious to safeguard the rights of Parliament, the Government would not oppose such words as would involve that proposition.

They preferred, however, to substitute their own words, and he moved by way of amendment, "This House, while affirming the constitutional doctrine that all the fiscal arrangements of this country must be subject to the full and effective control of Parliament over taxation, is not prepared to lay down rules for the guidance of future Parliaments as to the exact method in which such control should be exercised by them in cases which might arise." The Duke of Devonshire (Feb. 19th) explained that when he decided to remain in the Cabinet and exercise any influence he might possess in endeavouring to guide or restrain the action of his colleagues, he did not grasp the significance of the Prime Minister's letter accepting Mr. Chamberlain's resignation, otherwise his decision would have been different. He pressed for a clear pronouncement as to the relations of the Government and the Unionist organisation to the policy advocated by the tariff reformers. After further discussion, in which the Lord Chancellor, Lord James of Hereford, Lord Robertson, Earl Cadogan, and Earl Spencer took part, the Marquis of Lansdowne declared that the Government's ideal of Free Trade was as high and sound as that of their opponents. He pointed to the steady tendency on the part of foreign countries to raise their tariffs against us. In these circumstances the Government, instead of relying on most-favoured-nation treatment, desired to bargain for themselves. They did not want to provoke hostilities all over the world; but unless they could contemplate as a last resort the use of measures of this kind, it would be impossible for the British Government to hold their own in commercial negotiations with foreign powers. The Earl of Crewe's motion having been rejected by 98 votes to 47, the amendment of the Marquis of Salisbury was agreed to.

Earl Beauchamp called attention (March 3rd) to the references in Mr. Chamberlain's Glasgow and Birmingham speeches to the "offer of a preferential tariff" on the part of the self-governing Colonies, and moved for papers embodying such offer. The Duke of Marlborough maintained that the term used by Mr. Chamberlain was justified by the resolutions of the Prime Ministers at the Colonial Conference and the memorandum by the Canadian Ministers, which were disclosed in the Blue-book. Lord Rosebery regarded the declarations of the Colonial Ministers as nothing but a pious opinion, highly patriotic and Imperial, but not amounting to an offer which, in the words of Mr. Chamberlain, it would be "criminal and dangerous to neglect." The motion was withdrawn.

#### *Mr. Balfour on the Cabinet Changes.*

Mr. J. Ellis having inquired (March 7th) whether the Prime Minister would consent to publish the document "containing propositions embracing preferential tariffs and the taxation of food, which was brought before the Cabinet on the last day of last Session as an alternative to the document on Insular Free Trade," Mr. Balfour said the hon. member was under a misapprehension, as no alternative document was presented to the Cabinet. Of the two documents submitted, one was the pamphlet written with a view to possible publication, while the other was one of those confidential documents which a member of the Cabinet wrote for the use of his colleagues. These documents did

not contain contrary opinions. **Mr. J. Ellis** moved the adjournment of the House, to call attention to the omission of the Prime Minister to give the House a full account of the causes and circumstances of the resignations of a number of the members of his Cabinet. **Mr. Balfour** declared that up to the date of the last Cabinet, in August 1903, he had hoped to keep with him all his colleagues; but as no compromise was suggested upon the fiscal question by the members of the Government who afterwards retired, he then began to abandon any hope of the kind. The charge that he had "jockeyed" two members out of the Cabinet by keeping from them the fact that **Mr. Chamberlain** would resign, was a flimsy one; for his colleagues knew **Mr. Chamberlain's** intentions. What really drove them out of the Cabinet was their difference of opinion with the head of the Government in regard to the fiscal policy of the country. In any case, **Mr. Ritchie** and **Lord G. Hamilton** would have resigned. He had striven to preserve the unity of his party, and had never wavered from the principles which he had declared in public on this question of fiscal reform. **Lord G. Hamilton** said he left the Cabinet because he could get no guarantee from the Prime Minister that he did not regard Protection as fiscal reform. He adhered to the statement that the second pamphlet presented to the Cabinet by the Prime Minister contained propositions embracing preferential tariffs and the taxation of food. He and **Mr. Ritchie**, after the last Cabinet in the early autumn, still believed that **Mr. Chamberlain** was in the Government, and that there was to be some preferential taxation on food. The motion was negatived by 237 votes to 172.

#### *The Wharton Amendment.*

**Mr. Pirie** called attention (March 9th) to the public utterances of the Chancellor of the Exchequer and other members of the Government on the fiscal question, and moved a resolution condemning a policy of preferential and protective tariffs. **Mr. Balfour** said his expectation was, that after the General Election the Government would be able to adopt a policy dealing with what was called Retaliation and what was called dumping. It was certainly desirable that British negotiations in commercial matters should be put in a position to meet foreign negotiators on equal terms. He had plainly stated more than once that he did not think the public would accept proposals for the taxation of food or for fiscal union to the Colonies based upon such taxation. The motion was rejected by 289 votes to 243. It should be added that **Mr. Wharton** had placed on the paper an amendment to **Mr. Pirie's** motion, expressing approval of the explicit declarations of the Government that their policy of fiscal reform did not include either a general system of Protection or Protection based on the taxation of food; and it was freely stated that this alternative had been handed in with the concurrence of the Treasury Bench, and with the idea of putting the Free Traders in a difficulty; it was with equal freedom asserted that had not the hon. member, in deference to the strongly expressed opinion of a largely attended meeting of Ministerialists, hurriedly abandoned this proposal, the Government would have found themselves in a minority.

#### *Mr. Black's Motion.*

**Mr. Black** (May 18th) called attention to the declaration of certain Ministers that the Government was opposed to any tax upon food, and moved a resolution to the effect that, as protective taxation of food would be burdensome to the people and injurious to the Empire, the House welcomed the declarations of Ministers that the Government was opposed to such taxation. To this **Mr. Chamberlain** gave a hostile notice; but the amendment actually moved, by **Mr. Wyndham**, was one of which the Prime Minister had given notice, declaring that the House considered it unnecessary to discuss the question of fiscal reforms, in view of the statement that no proposals would be laid before the present Parliament, and expressing continued confidence in the Government. **Lord H. Cecil** supported the motion, as the Government seemed determined to avoid a decision on a fair and square issue. **Sir M. Hicks-Beach** accepted the Prime Minister's statement at Sheffield, that the taxation of food was not now in the region of practical politics, and did not believe that any advantage would be gained by passing the motion. **Mr. Chamberlain** supported the amendment, which proclaimed the confidence of the Ministerialists in the Government and relegated the discussion of the fiscal question to a future Parliament. **Lord G. Hamilton** appealed to the Government to state precisely what fiscal changes they would support, and what they would oppose. **Mr. Balfour** assured his noble friend that his policy was still what was known as the Sheffield policy. To that he had added nothing; nor had he detracted anything from it. He declined to deal further with the fiscal question, because discussions on that subject were purely abstract. **Mr. Asquith** urged that the amendment was a subterfuge to prevent the House from declaring itself against the protective taxation of food. It was a capitulation to the Birmingham policy, and its chief purpose was to postpone for a few weeks or months the inevitable appeal to the judgment of the nation. The motion of **Mr. Black** having been rejected, amid cheers and counter-cheers, by 306 votes to 251, the debate stood adjourned. A number of Free-fooders had decided to support **Mr. Black's** motion, and on the division 22 hon. gentlemen ordinarily classed as Ministerialists actually voted in its favour.

#### *Opposition Vote of Censure.*

**Sir H. Campbell-Bannerman** (Aug. 1st) moved a vote of censure, expressing regret at the action of Ministers who had accepted official positions in the Liberal Unionist Association, a political organisation which had formally declared its adhesion to a policy of preferential duties involving the taxation of food. The object of the motion, he said, was to ascertain how the Prime Minister reconciled his policy, as declared at Sheffield, with the conduct of the Marquis of Lansdowne, the Earl of Selborne, and **Mr. Victor Cavendish**, who by becoming office-bearers in the reconstituted Liberal Unionist Association, had given their support to the Birmingham fiscal policy. **Mr. Lyttelton** denied that there was anything ambiguous in the Prime Minister's attitude. His right hon. friend, while he had expressed sympathy with those who advocated preference,

had stated that he was not prepared to put it forward as a policy at the next General Election. Lord H. Cecil said if it should appear that the Government had decided not to go beyond the Sheffield programme, many Free Traders, including himself, would abstain from taking part in the division. Mr. Chamberlain said the object of the motion was to identify the views of the Prime Minister with his own. But he pointed out that if there had been no difference of opinion between Mr. Balfour and himself he would not have left the Cabinet. He left it because he recognised that his right hon. friend was not prepared to go as far as he was. That his policy would be accepted eventually he felt confident, and the sooner the issue was raised the better. On the question of Colonial preference he urged the Government to call a Conference to ascertain what the Colonies really desired, and what they were prepared to do. Mr. Balfour complained that his statements in regard to the fiscal question had been misunderstood, and asserted that no Prime Minister had ever made his position clearer. Mr. Asquith said the Government could not be regarded as hostile to food taxation when three Ministers had formed a Protectionist organisation from which all Free Traders were excluded. The motion was defeated by 288 votes to 210.

Mr. Balfour stated (Aug. 10th) that he did not propose at that time to call an Imperial Conference on the fiscal position of the Empire.

#### IV. THE PROPOSED COLONIAL CONFERENCE.

Lord Rosebery wrote to the *Times*, Aug. 3rd, 1904, welcoming this proposal under certain limitations. He said: "If the delegates assemble in the expectation that Great Britain is prepared to tax or narrow its supplies of food, it is very likely to lead to disappointment and to reaction. Nor, indeed, can it do good unless it be desired by the outer Britains as well as by the home country. It would, indeed, be best that they should signify an anxiety for such a conference before it is summoned. Further, there should be a clear basis for the conference, drawn up in conjunction with the Colonies, a basis agreed to by both parties. And, lastly, the British representatives should be not merely partisan or official, but men of national weight. Even under these conditions, a conference, it is obvious, cannot undo the evil of the last 14 months; but with the suggested safeguards it should bring the controversy to a practical issue. Only let me repeat my firm conviction that, unless it be desired by the Colonies, and assembled on a plain basis arranged beforehand, and freed from the party taint, it may do more harm than good."

Mr. Chamberlain wrote in reply, Aug. 4th, 1904: "I observe that Lord Rosebery complains that what he calls the obvious suggestion of a conference was not made before; but he does not explain why, in view of my neglect, he did not himself supply the deficiency. I admit that it seemed to me desirable in the first place to test the opinion of the country on the offer which, in spite of Lord Rosebery's denial, I still maintain was made by the Colonies on the occasion of the Conference of Premiers at the time of the Coronation.

"This point, however, is not of importance, since I hope that we have now arrived at the same conclusion on the main proposal. But I

am afraid that Lord Rosebery is still imperfectly informed as to the real issue. I entirely agree with him that the wishes of the colonists themselves should be an essential condition, and I trust that when these wishes have been expressed, whether before or at the conference, he will be prepared to give due weight to them. In this case, however, he must not at the outset bar out of consideration what will certainly be the main object of the colonists if they accept the proposal—viz., to see whether or not, in return for the preferences they have already given and are prepared to give to us, we, on our part, are ready to make that sacrifice of our economic orthodoxy which Lord Rosebery contemplated in 1888, and to reciprocate with a preference on those products of the Colonies, including corn and meat, the sale of which they desire to extend in this country. To suggest a conference on preference, while rigidly excluding all reference to taxes on food, would be in present circumstances a childish and almost an insulting proposition."

To this Lord Rosebery rejoined, Aug. 5th, 1904, "I am glad to have elicited Mr. Chamberlain's letter; the air is clearer, though he has killed his own proposal.

"The conference would have been suggested before, it appears, had it not been desirable to test the opinion of the country on Mr. Chamberlain's policy. He has now had enough of testing, and, finding the results almost uniformly unfavourable, he harks back to a conference. Now, one point stands clear as a result of that testing—that the country will not tolerate any taxation of its food supply. Yet Mr. Chamberlain regards a conference which excludes taxation of food as a mockery. Why, then, should he desire to summon a conference? Nothing has happened since the conference of 1902, except the question put to the country whether it will tax its food and the emphatic negative of its reply. Surely, then, to summon a conference in order to discuss the taxation of food with the Colonies is, to use Mr. Chamberlain's expression, a 'childish and insulting proposition'—childish as regards practical result, insulting to the people of this country who decline to be parties to such a scheme.

"So far as regards this country; now as to the Colonies. I do not now ask what their representatives would bring with them in the shape of offers; 'the preference they . . . are prepared to give to us'—that is an important, though not the most urgent matter. But could Mr. Chamberlain's scheme be carried out? Who could appear as delegates for Great Britain to discuss the taxation of food with the Colonies? Whom would they represent? Whence would be this mandate? It is obvious that after what has passed nothing but a general election, giving an overwhelming majority to the food taxers, could confer such a mandate. Could there be a more 'childish and insulting proposition' to the Colonies than to invite their statesmen to come thousands of miles to discuss the question with delegates without authority or national credentials in the teeth of every indication of public feeling in Great Britain."

#### Mr. Balfour agrees to call a Conference.

Mr. Balfour, at Edinburgh, Oct. 3rd, 1904, referring to the Colonial aspect of the question, said it was not possible to leave it "in the doubt in which it now inevitably stands." He

continued: "In my view we have got to a point where the only possible way of moving out of the *impasse* in which we now find ourselves—an *impasse* dangerous to the Empire as a whole—is to have a free conference with those self-governing Colonies and with India which would enable us to determine, one way or the other, in the first place whether these great dependencies desire an arrangement, and, in the second place, whether an arrangement be possible or be not. . . . The representatives of the free governing Colonies, with India and ourselves in this country, should meet in order to talk out this subject in the freest possible manner, without being bound by special views or special instructions. . . . Freedom in this case, free interchange of ideas, is of the very essence of success. But I do not believe you will induce either this country, or Canada, or Australia, or New Zealand, or India, to join in such a conference unless these various self-governing communities have the right to appeal to their respective electorates as to any scheme which may be hammered out. Of course, if they claim that liberty, that liberty, that necessity, must be equally claimed by us. My view, therefore, is that the policy of this party should be, if we have the power after the next election, to ask the Colonies to join in such a conference, and plainly intimate to them that those whom they send shall come unhampered by limitations in this direction or in that direction, but that as a necessary corollary, an inevitable set-off, to the complete freedom of discussion, any plan, or at all events any large plan, of Imperial union on fiscal or other lines, ought not to be regarded as accepted by any of the parties to the contract unless their various electorates have given their adhesion to the scheme."

Speaking at Luton, Oct. 5th, 1904, Mr. Chamberlain welcomed the decision of Mr. Balfour, but objected to a second general election after such a Conference, urging that "if the representatives came to an agreement, the agreement should be at once submitted to the Parliaments and Legislatures of the separate States concerned."

#### Other Opinions on the Conference.

Sir H. Campbell-Bannerman at Norwich (Oct. 26th, 1904) said: "Let us have the Conference by all means. The more conferences you have with the Colonies the better. The more free communication of ideas and desires you have with them the better. But it must be on some definite subject; and it must be also of such a nature as to exclude all possibility of any one being misled by it. Any restricted preference between the Motherland and the Colonies would be a farce—a fraud upon and a befooling of the Colonies—because the slightest consideration shows us that taxes upon food are involved. Mr. Chamberlain himself has said so, and such taxes are wholly opposed at once to the sentiment and the interest of the British people."

Lord Rosebery at Trowbridge (Oct. 29th, 1904) said he had always been in favour of Colonial Conferences; but this conference was not brought about by the circumstances of the Empire, or to unite the Empire. It was brought about by the circumstances of the Tory party, and it would be summoned together to unite the Tory party. He proceeded (1) to impugn the method which Mr. Chamberlain had adopted

to bring this matter before the public; (2) to charge him with attempting roughly, rudely, and inconsiderately to change the whole basis of the Empire; (3) to charge him with having thoughtlessly sacrificed, or offered to sacrifice, the fiscal independence of the country; (4) with having offered to the Colonies a one-sided preference without authority from the country—a step which it was easy to take, but very difficult—if possible—to retrace; (5) with having set the people of the Empire by the ears. He characterised Mr. Chamberlain's policy as one based upon the conception of "a mechanical Empire, with its commercial centre in this island. You will have under this policy an Empire of jarring interests, perpetually seeking revisions of the tariff in behalf of some particular portion of the Empire, and you will have an Empire jarred by the perpetual friction which must result from such contentions."

The Duke of Devonshire at Rawtenstall (Nov. 12th, 1904) said there was no agreement between the responsible and irresponsible portion of the Unionist party on the subject of a Colonial Conference. Last year Mr. Chamberlain told them that nothing could be more impolitic than to enter into negotiations with the Colonies until they had made up their minds what they were prepared to offer, and that it would be disastrous if they should come to an agreement and then find that it was repudiated by the country. Mr. Chamberlain's proposal seemed to have been fairly businesslike, if we had been prepared to accept the taxation of food. But Mr. Balfour was not going to test the opinion of the country as to the taxation of food; and, as everybody was to enter the Conference perfectly free, without any special views, and bound by no special instructions, he did not entertain any very strong hopes of the usefulness of a procedure so vague and undefined. He doubted whether statesmen would be very anxious to enter upon a deliberation of this character; but if they chose to do so, if they came knowing that the country was not committed to the taxation of food and that a very large section of opinion was irreconcilably opposed to it, he did not think it was the business of Free Traders to oppose the summoning of a conference. They would not be any more committed to the taxation of food after the conference than they were at present.

#### National Union of Conservative Associations, 1904.

The National Union of Conservative Associations met at Southampton (Oct. 28th, 1904). The following resolution was moved by Mr. Chaplin: "That this Conference agrees with the Prime Minister that the time has come for the revision of our fiscal policy, cordially supports his claim for power to deal with the evils arising from the unfair competition caused by the practice of dumping (to which it believes that the present want of employment and distress in the country are in great measure due). It likewise welcomes the recent declaration of the Prime Minister that if he is again returned to power he will invite a conference with delegates from the Colonies and India to meet free and unfettered in order to discuss, in the first place, whether the ideal of a fiscal union is one that commends itself to them, and, in the second place, to consider how it should be carried out." To this Mr. Moore Bayley

moved as an amendment: "That this Conference cordially approves of the fiscal policy of the Prime Minister as announced in his recent speech at Edinburgh." This amendment received 13 votes only, and the original resolution was carried with only 2 dissentients.

### ***The Conference and Imperial Defence.***

Sir M. Hicks Beach, M.P., introduced a large and influential deputation organised by the Imperial Federation (Defence) Committee, and including between 40 and 50 Peers and M.P.'s, ex-Colonial Governors, and others, which waited on Mr. Balfour, Dec. 12th, 1904, to urge upon the Government "that in any future conference which, as the result of the policy of H.M. Government, may be called between the representatives of this country and the Colonies, the subject of Imperial Defence may receive the consideration which its enormous and urgent importance demands in our view, and that it may be more urgently pressed upon the Colonies in the future than it has been in the past." Sir M. Hicks Beach said: "We would respectfully submit to you that it is the primary duty of H.M. Government to put this in the forefront as the most urgent and essential matter for consideration on such an occasion. And why? Because, although other matters may naturally and properly be discussed and dealt with, yet this, at any rate, is clear—that no scheme, however good, for binding the Empire more closely together, or for improving the trade relations between its different parts, can possibly be successful or pre-eminently effective unless it is protected and maintained by adequate sea power."

In his reply Mr. Balfour said the facts as to the relatively unimportant part which the Colonies bore in regard to Imperial Defence were undeniable, and were eminently worthy the attention of the self-governing Colonies. He had no doubt that they would more and more feel that they were required by the very nature of the tie which bound them to the Mother Country to bear more and more of the common Imperial burden. He then referred to the Colonial Conference, "which, as every one here knows, I greatly desire should be called in order freely to discuss affairs common to every part of our common Empire. . . . I quite admit that, though the question of closer commercial union with the Colonies, and though the discussion of the possibility of devising an arrangement for closer commercial union with the Colonies, may be the occasion for the summoning of the conference, it is impossible, and it would be improper, that any such conference should be confined to that or be prevented from discussing anything connected with the closer union of the Empire. Such restriction would violate the fundamental condition of such a conference, which is that the conference should be perfectly unhampered and unfettered. But if the conference is to meet thus unhampered and unfettered to discuss any of the questions which have been touched upon to-day, or the other questions to which I have distantly referred, I earnestly trust that the temper in which it will meet will not be how much can each fragment of the Empire get out of the other fragments of the Empire, but rather how much can each fragment of the Empire give to the common whole.

It is not what we are to get each for himself; it is not what we are to give to this or to that self-governing entity within our borders: it is what every self-governing fragment of this great whole can itself contribute to a common object, and of those common objects defence certainly stands in the very first rank."

### ***Mr. Balfour at Edinburgh repudiates Protection.***

On Oct. 3rd, 1904, the Scottish Conservative Club, Edinburgh, gave a dinner in honour of Mr. Balfour. In his speech Mr. Balfour said he adhered to the recommendations which he had made in "The Sheffield Programme." It had been criticised as Protectionist. Dealing with that criticism, he said: "What is a Protective policy? A Protective policy, as I understand it, is a policy which aims at supporting or creating home industries by raising home prices. The raising of prices is a necessary step towards the encouragement of an industry under a Protective system. The object of Protection is to encourage home industries. The means by which it attains that object is by the manipulation of a fiscal system to raise home prices. If the home prices are not raised, the industry is not encouraged. If the industry is encouraged, it is by the raising of prices. That is, in a nutshell, Protection properly understood." He continued: "I am personally of opinion that for this country in its existing circumstances Protection in the true sense of the word—Protection as I have endeavoured to define it and describe it to-night—is not the best policy. It is not one I have ever recommended, directly or indirectly, either to my colleagues in the Cabinet, to the House of Commons, or to the country. It is a policy which I do not believe to be expedient under existing circumstances; and I should never think, any more than my friend near me, of diminishing the zeal and earnestness of my support of a Conservative and Unionist party should that party take up a Protectionist line. I do not think that I could with advantage in such circumstances be its leader. A man can only lead his party if he believes in the party's policy; and although I do believe in the general scheme of politics which we in this room represent, I think I should have to leave it to others to deal with a policy of true Protection, if the country should decide that such a policy was in its opinion expedient at the present time."

Mr. Chamberlain at Luton (Oct. 5th, 1904) said that this was "a statement of the greatest importance," which "marked a stage in this great controversy." He went on: "Mr. Balfour began by repudiating for himself the name of Protectionist with which he declares his opponents belabour him. I also repudiate the name, although I admit I do not care one of your straws what my opponents are pleased to call me."

### **V. THE TARIFF COMMISSION.**

Speaking at Leeds on Dec. 16th, 1903, Mr. Chamberlain announced that a Tariff Commission would be formed, and the Tariff Reform League announced on Dec. 18th the work, scope and composition of the Commission. It included the following gentlemen:—

Col. Charles Allen.  
Mr. F. Baynes.  
Mr. J. H. Birchenough.  
Mr. C. Booth, F.R.S.  
Mr. H. Bostock.  
Mr. S. B. Boulton.  
Mr. Richard Burbidge.  
Sir V. Caillard, K.B.  
Mr. J. J. Candlish.  
The Rt. Hon. Henry  
Chaplin, M.P.  
Sir J. A. Cockburn,  
K.C.M.G.  
Mr. J. Howard Colls.  
Mr. J. G. Colmer,  
C.M.G.  
Mr. W. Cooper.  
Mr. J. Arthur Corah.  
Mr. J. W. Dennis.  
Mr. C. Eckersley.  
Mr. F. Elgar, F.R.S.  
Sir Charles Elliott.  
Mr. L. Evans.  
Mr. G. Flett.  
Sir C. Follett.  
Mr. T. Gallagher.  
The Hon. Vicary  
Gibbs, M.P.  
Mr. A. Gilbey.  
Mr. W. J. Goulding.  
Mr. W. H. Grenfell,  
M.P.  
Mr. F. L. Harris, M.P.  
Mr. J. M. Harris.  
Mr. W. Harrison,

Sir Alex. Henderson,  
M.P.  
Sir A. Hickman, M.P.  
Sir Alfred L. Jones,  
K.C.M.G.  
Mr. Arthur Keen.  
Mr. J. J. Keswick.  
Mr. I. Levenstein.  
Sir W. T. Lewis.  
Mr. R. Littlejohn.\*  
Mr. Chas. Lyle.  
Mr. A. W. Maconochie,  
M.P.  
Mr. H. D. Marshall.  
Mr. W. H. Mitchell.  
Mr. A. Mosely, C.M.G.  
Sir A. Noble, K.C.B.  
Hon. Charles Parsons,  
F.R.S.  
Sir Walter Peace,  
K.C.M.G.  
Mr. C. A. Pearson.  
Sir Westby Perceval.  
Mr. C. J. Phillips.  
Mr. J. Rank.  
Mr. R. H. Reade.  
Sir George Ryder,  
K.C.B.  
Sir C. C. Smith.  
Sir Charles Tennant.  
Mr. F. Tonsley.  
Sir John Turney.  
Mr. S. J. Waring, Jun.  
Mr. W. Bridges Webb.

sending more than 80 per cent. of the total number of persons employed in those trades. The report contained an exhaustive account of the relative positions of the British and foreign iron and steel trades, and the conclusions arrived at were as follows:—

Our inquiry has shown:—

(1) That the iron and steel industry of this country has declined relatively to that of other countries;

(2) That our export trade to foreign countries has diminished, while that to the Colonies has increased;

(3) That, although our trade with the Colonies has increased, the colonial market is increasing much more rapidly, and that foreign countries are securing a growing proportion of this colonial trade;

(4) That the relative decline of the British iron and steel industry is not due to any natural British disadvantages or want of skill and enterprise on the part either of British manufacturers or of British workmen;

(5) That it is due to the fact that the manufacturers of the United States and Germany, having secured control of their home markets by means of high tariffs and an organised system for the regulation of their export trade, are in a position to dump their surplus products upon the British and other markets, irrespective of cost;

(6) That the practice of dumping could not be carried on by foreign countries but for the British system of free imports;

(7) That the British fiscal system should be revised in such a manner as to check this practice, to maintain, so far as possible, our export trade to foreign countries, and develop our colonial market and increase the employment of the working classes;

(8) That these objects can be obtained by means of a system of tariffs arranged as follows:

(a) A general tariff, consisting of a low scale of duties for foreign countries which admit British wares on fair terms;

(b) A preferential tariff, lower than the general tariff, for those of our Colonies which give adequate preference to British manufactures, and framed with a view to securing freer trade within the British Empire;

(c) A maximum tariff, consisting of comparatively higher duties, but subject to reduction by negotiation to the level of the general tariff.

#### **A Provisional Tariff.**

To the report was appended a provisional scale of duties for the general tariff, of which the Commissioners said:—

"The following provisional scale of duties for the general tariff, in the calculation of which due consideration has been given to the proportion of labour involved at all stages of manufacture, has been prepared as an indication of the nature of the scheme which may hereafter be recommended for the iron and steel industry, when the inquiry into other trades and interests (including agriculture) has been completed. This provisional scale is concerned only with the iron and steel industry, as defined in paragraph 8 of this report and in the appendix."

Hon. President, Mr. Chamberlain.

Chairman, Sir Robert Herbert, G.C.B.

Vice-Chairman, Mr. C. A. Pearson.

Secretary, Mr. W. A. S. Hewins.

Assist. Sec., Mr. Percy A. Hurd.

Office, 7, Victoria Street, London, S.W.

The work of the Commission was stated to be to make the preliminary investigations in order that, should the electorate endorse Mr. Chamberlain's proposals for tariff reform, the actual introduction of the tariff should take place with as little delay as possible.

The first meeting of the Commission was held on Jan. 15th, 1904, when the rules of procedure were adopted. Special committees were afterwards formed to consider the manner in which the various trades should be dealt with, forms of inquiry were drawn up and sent out to manufacturers and others, the procedure as to the examination of witnesses was settled, a special committee was formed to deal with agriculture, and other committees on the iron and steel trades, the engineering and machinery trades, the textile trades, and on foreign tariffs were appointed. The work entrusted to the Committees was to investigate the effect of Mr. Chamberlain's proposals on the conditions applicable to the various industries, and to frame, where possible, a scientific tariff.

#### **Report on the Iron and Steel Trade.**

During July 1904 a report on the Iron and Steel Trades and the results of the Commission's inquiry with reference to those trades was published. Replies had been received to the Commission's inquiry forms from firms repre-

Description.	Range of duties expressed as ad-valorem rates.
Iron Ores . . . . .	Free.
Pig Iron . . . . .	5 per cent.
Iron and Steel: Puddled Bars, Ingots, Blooms, Billets, Slabs, Sheet Bars, Tin Plate Bars, or similar partly manufactured materials	6½ per cent.
Rails, Sleepers, and Fish Plates	
Girders, Joists, and Beams . . . . .	
Bars, round, square, flat, and sections other than above enumerated . . . . .	7½ per cent.
Slit Rods . . . . .	
Wire Rods . . . . .	
Plates . . . . .	10 per cent.
Sheets . . . . .	
Nails, Screws, and Rivets . . . . .	
Bolts and Nuts . . . . .	Duties in no case to exceed 10 per cent.
Tires and Axles . . . . .	
Railway Wheels and Axles . . . . .	
Crucible steel . . . . .	
and manufactures of Iron and Steel unenumerated . . . . .	

The engineering, machinery, shipbuilding, and the hardware, hollow-ware, and cutlery trades are to be the subjects of subsequent reports.

## VI. INDIAN AND COLONIAL OPINION.

### *The Indian Government's Views.*

In February 1904 a Blue Book (Cd. 1931) was issued giving the views of the Government of India on the question of Preferential Tariffs, dated Oct. 22nd, 1903. Assuming, as the only practical assumption, that India would, under a system of preferential tariffs within the Empire, maintain her import duties on British and Colonial goods at the existing rate, as required for revenue purposes, and would impose a higher rate on foreign imports, so as to give to British and Colonial imports a preference of about 25 per cent., the Government came to the conclusion that the results of such a system might benefit British and Colonial manufacturers a little. They pointed out that British imports into India to the amount of about £23,000,000 sterling per annum were practically secure from foreign competition under existing conditions, but there were imports of the value of about £10,000,000 in regard to which effective competition prevailed. In respect of these a substantial preference as against the foreigner would be of material benefit to the British manufacturer. The preferential advantage which India might hope to receive was neither large nor assured. If duties were not to be imposed on raw materials imported into the United Kingdom, India could receive no advantage in the home market on these. The duty on tea could be reduced; but there was very little room for preferential treatment in the case of tea. As to wheat, the supply from India, though increasing, was still uncertain: any advantage given would have to be shared with Canada, Australasia, and growers in the United Kingdom, and the duty would inevitably be small, and the preference, therefore,

also relatively of small amount. In the case of rice, India already supplied two-thirds of the demand in the home market. There only remained coffee, tobacco, and indigo, which would benefit by discrimination against the artificial product. The conclusion arrived at was: "We are of opinion that a preference of one-fourth, calculated on a very low rate of duty, would be of little material advantage to British manufacturers exporting their wares to India. A larger proportionate preference, or the same proportion calculated on a relatively high rate of duty, would be likely seriously to affect the trade of foreign countries in manufactured goods, and in proportion as it benefited the British manufacturer would tend to embroil us with the foreigner and provoke the latter to measures of retaliation."

After discussing the latter point the document proceeded:

"Our conclusions are as follows:—

"1. That without any such system of preferential tariffs within the Empire, India already enjoys a large, probably an exceptionally large, measure of the advantages of the free exchange of imports and exports.

"2. That if the matter is regarded exclusively from an economic standpoint, India has something, but not perhaps very much, to offer to the Empire; that she has very little to gain in return; and that she has a great deal to lose or to risk.

"3. That in a financial aspect, the danger to India of reprisals by foreign nations, even if eventually unsuccessful, is so serious, and their results would be so disastrous, that we should not be justified in embarking on any new policy of the kind unless assured of benefits greater and more certain than any which have, so far, presented themselves to our mind."

The possibility of India being fiscally attacked, even without hostile action on her part, was admitted, and it was shown that the possession of an import tariff had enabled India to negotiate with France in 1900, and with Russia in regard to her threat to increase the duty on Indian tea. The despatch concluded: "We would avoid all tariff wars, and we recognise that it would be a calamity should we become involved in such struggles with the important purchasers of our exported produce. In no circumstances whatever should we allow a policy of retaliation to develop into one of aggression. All that we seek is that we shall not be pledged in advance to accord equal treatment to the imports of all countries alike, irrespective of whether they penalise our exports or not. And we are hopeful that the mere announcement that our hands are free will of itself suffice to maintain us in the enjoyment of that considerable measure of free exchange which we already possess, and from time to time even to extend it."

### *In Canada.*

In Canada the proposals were favourably received, but with the reservation expressed by Mr. Crathern, ex-President of the Board of Trade, who said that Canada was not in a position to enter into a Free Trade agreement with England, as the millions of capital invested in Canada must have a certain amount of protection even in connection with Canadian trade with England. Sir Wilfrid Laurier, speaking at the banquet given in honour of

the delegates to the Congress of Chambers of Commerce of the Empire on Aug. 21st, 1903, said: "So far as Canada is concerned, I may say to our friends from the motherland that we are intensely desirous of having a preferential market for our food products in Great Britain, but we think the first step would come better from Great Britain than from ourselves, and we do not want to force our views on our brothers. If such an arrangement would not be satisfactory to them, for my part I do not want to have such an arrangement. If we are to have preference, it must be with the firm conviction that such an arrangement would be mutually proper. But if we are to expect the people of Great Britain to make concessions to us we must be prepared to make concessions to them."

Mr. Drummond, President of the Canadian Manufacturers' Association, which represents 1500 manufacturers, said, Nov. 20th, 1903, "We favour a policy of reciprocal trade with the Empire by means of preference against foreign States. To make the present Canadian preference in favour of Great Britain of real value, the basis of Canada's general tariff must be raised. Then orders for many lines of goods now going to the United States and Germany might be transferred to Great Britain. Canada must, however, necessarily provide under all conditions that the *minimum* tariff shall afford fair protection to Canadian producers, so that the high standard of wages and living may be retained on a parity with the wages paid in the United States."

Speaking at the annual meeting of the British Empire League at Ottawa (March 16th, 1904) the Postmaster-General of Canada, Sir W. Mulock, said he believed there were few Canadians who were not favourable to the Imperial Preferential Trade movement: but he considered it a mistake for the people of Canada to press their views on the subject unduly. The Finance Minister, the Hon. W. S. Fielding, announced a duty to prevent dumping in his Budget statement, June 7th, 1904. See CANADA, p. 80.

Sir Wilfrid Laurier, speaking at the Canadian Manufacturers' Association banquet at Montreal, Sept. 22nd, 1904, said: "It has been suggested that a bond of union would be found in a uniform tariff for the British Empire. The differences of civilisation, of climate, and of production make it impossible for us to have for Canada the same tariff as for India or Australia or South Africa. But what is possible is to have between the Motherland and the Colonies treaties of commerce. By mutual concessions, by granting and giving, we could develop the trade of Great Britain and her Colonies to the mutual advantages of all. I am well aware that the task is not without difficulty. We have some views in Canada and we have some in Great Britain. We cannot have the same tariff in Canada as in Great Britain; but when the Motherland has chosen its policy, and we have chosen ours, it should always be possible to come to some conclusion which will strengthen still more the friendly relations existing between us."

Opening his election campaign at Sorel, in Quebec, Sir Wilfrid Laurier said that the Government's policy on the question of Preferential Trade was still what he had stated at the Colonial Conference in 1902. The Government had given a preference to the United Kingdom

because they wished to develop commerce with England. He amplified this declaration at Guelph, Oct. 12th, 1904: "We have a place in our hearts for British preference, but the feeling is not mutual yet. It is true that preference would be a benefit, but would it not be more beneficial if the preference came from Great Britain? Undoubtedly it would. I tell you, fellow-countrymen, that the Government of Canada, as constituted to-day, are ready to go on and make a treaty of commerce with Great Britain to the extent of preference as soon as the British people are ready to give corresponding preference. The answer is no longer in our hands, but in those of the English people."

### In Australasia.

In Australia there was considerable diversity of opinion. The warmth of the Protectionist welcome to Mr. Chamberlain's proposals was tempered by the feeling to which the Melbourne *Age* gave expression, that Australia could not, even for the all-important claims of Imperial unity, consent to a policy that might endanger the industrial position; and that therefore preference could only be given by raising the Australian tariff against foreign countries "to the verge of prohibition," not by lowering it in favour of Great Britain. Mr. G. H. Reid, the leader of the Free Trade party, on the contrary, denounced this policy, and suggested that the tariff should be unconditionally reduced by 50 per cent. in favour of British goods, Great Britain not being asked to make any return.

The *Times* correspondent at Melbourne pointed out (*Times*, Oct. 7th, 1903) "that a very large proportion of the commodities Australia imports from foreign countries is not, and cannot be, produced in Great Britain. To tax these commodities to the 'verge of prohibition,' therefore, would merely injure ourselves without benefiting the British manufacturer in the slightest degree. The reciprocity offered will be quite valueless for one of the purposes Mr. Chamberlain has in view—that is, the opening to British manufacturers of an enlarged market for their goods in Australia."

Mr. Deakin, the Federal Premier, speaking at Ballarat (Oct. 29th, 1903), said: "The Colonial Conference of 1902 recognised that Imperial Free Trade was impracticable, and that each colony must look to its own self-development. We are pursuing the lines of that resolution when seeking to make Australia part of an Empire whose trade is worth having. A Protectionist tariff is essential for Australia, but nothing in that fact is antagonistic to closer trade relations. Mr. Chamberlain, with characteristic courage and resource, offers a preference. We are prepared to reciprocate. When his definite proposals are made they will receive cordial and generous consideration. The difficulty is that, while we are willing to make a reduction, our tariff scarcely admits of such a reduction. We will, however, gladly reduce where reduction is possible, and where we cannot reduce we will increase against the foreigner." The elections in December resulted in the return of a Protectionist majority.

Mr. Deakin, in the name of his colleagues and of the people of Australia, invited Mr. Chamberlain to go to Australia and expound his proposals there (Dec. 30th, 1903); but Mr. Chamberlain was unable to accept the invitation.

When **Mr. Watson**, leader of the Labour party, became Prime Minister, he said (Aug. 4th, 1904), with reference to the proposed Colonial Conference: "As regards Australia, I think a conference is not needed till Great Britain decides to adopt the principle of preference. The last Federal elections made it clear that Australia favours the principle. When Great Britain agrees I hope for valuable results from a conference laying down the general lines of mutual preferential tariffs before the separate Legislatures discuss details. For the present Australia awaits the mother country's decision."

After he had ceased to be Prime Minister he said (Oct. 9th, 1904): "We in Australia fully recognise that the decision with respect to preferential trade rests primarily with the people of Great Britain. We neither suggest nor desire that they should take any steps in that direction involving any sacrifice of their own material interests. At the same time, it is necessary to be under no misapprehension as to the attitude of the Commonwealth. My belief is that an overwhelming majority of Australians favour preference on grounds of mutual trade advantages."

**Mr. Reid**, who in his turn became Prime Minister, in a statement to the House of Representatives outlining the policy of the Commonwealth Government, said (Sept. 7th, 1904): "With regard to the preferential system, the Government proposed to follow the attitude of the Deakin and Watson Ministries which had been approved by the electors, namely, to wait until some definite proposal was submitted by the Imperial Government, and receive it in a fair and honest spirit. The British Government, however, had officially declared that it would not accept any system of preference that would entail taxing the food of the British people, and he believed that from the British point of view this was a just and statesmanlike attitude."

**Mr. Coghlan**, Government statistician for New South Wales, issued in October 1904 a report on the trade of the Commonwealth. Commenting on this report, the *Times* correspondent at Sydney said (under date Oct. 18th, 1904, the article appearing in the *Times* "Financial Supplement" of Nov. 28th): "What may be regarded as the most regrettable feature of **Mr. Coghlan's** figures is the material curtailment of imports from the United Kingdom. This, of course, has been the direct result of the present tariff. In the year 1900 the United Kingdom supplied £25,363,000 worth of goods to the Commonwealth, whereas last year (1903) the mother country only provided these States with commodities valued at £19,855,000, a reduction of no less than £5,508,000. Although the figures show that a large proportion of this diminished import from the old country has occurred in departments which represent re-exports of foreign goods from Great Britain, such as brandy and dried fruits, in consequence of increased local production, the fact remains that the general manufactures of England have come forward in much smaller quantities. For instance, in the important item of soft goods alone there has been a shrinkage of £2,400,000; while iron manufactures, machinery, boots and shoes, furniture, hats, fancy goods, spirits, manufactured tobacco, paints, and numerous other articles suggest a wholesale reduction of imports. The tariff, therefore, has primarily

affected the trade of the United Kingdom, and this in a manner which does not appear with regard to products of other countries. For instance, last year's (1903) imports from the United States showed a marked increase, which was largely due to heavy importations of breadstuffs and produce which followed the failure of the previous harvest. Then again, imports from France and Germany over the same period have diminished only in a smaller degree, while there are many branches of foreign trade in which our imports have expanded. The opening up of inter-State trade by the removal of provincial tariffs has promoted increased freedom of interchange of goods manufactured in the various States. The cost of both locally manufactured and imported goods, however, has been greatly increased by the incidence of a uniformly prohibitive tariff."

**Mr. Deakin** brought forward a motion in the House of Representatives (Dec. 8th, 1904) approving the encouragement of industry and commerce within the Empire, requesting the Prime Minister (**Mr. Reid**) to consider the existing openings for preferential trade between Australia and other Colonies, to obtain data for the preparation of a measure granting preference to British imports into Australia which compete solely with foreign imports, and authorising him "to offer to the United Kingdom preference on exports to Australia in return for preference on our exports to Great Britain and Ireland, such preference to be reciprocally adjusted according to schedules sanctioned by Parliament." **Mr. Reid** said the Government were unable to speak on the motion with a united voice, and he did not intend to do more than express his own views. He foresaw the difficulty of extending their exchanges with the motherland and at the same time protecting their own productions. The motion authorised the Government to offer preference for preference. This was impossible in the present state of politics in Great Britain. He thoroughly favoured **Mr. Balfour's** idea of a conference. If the British were in favour of preference his objection would go. If a preferential tariff were to be avoided, he was in favour of making the Australian tariff as nearly as possible a revenue tariff as against the Motherland. **Mr. Watson** said he believed Australia strongly favoured **Mr. Chamberlain's** policy, and the British Labour party was likely to alter its opinion with further knowledge. He was not inclined to reduce duties in favour of Great Britain. The motion ultimately lapsed through lack of time at the close of the session.

In New Zealand not only were the proposals welcomed, but legislation was carried providing for additional duties on foreign goods, amounting to 100 per cent. on cement, and from 50 to 20 per cent. on 38 other articles, the abolition of the duty on British tea, and the imposition of a 20-per-cent. duty on foreign teas.

### In Other Colonies.

In South Africa the proposals were welcomed, with Bond reservations, as tending to unify the Empire. The South African Customs Convention (see p. 66) was carried during the year, giving practical effect to the proposal of preferential trade.

In the West Indies also the idea of reciprocity within the Empire was warmly welcomed.

At the opening of the British Guiana Legislature the Governor, Sir J. A. Swettenham,

announced that the import duties would be lowered by way of preference to the British Empire in favour of such places as had claims on the consideration of the Colony—for instance, the United Kingdom and Canada (Feb. 17th, 1904).

Dr. Jameson, Premier of Cape Colony, speaking at Grahamstown in Dec. 1904, declared his entire adhesion to Mr. Chamberlain's fiscal policy, and hoped to see an Anglo-Colonial Conference called.

## VII. PUBLICATIONS AND ASSOCIATIONS.

### *The Board of Trade Blue Books.*

The first result of the Government's "Inquiry" appeared on Sept. 16th, 1903, in the shape of a big Blue Book entitled "British and Foreign Trade and Industry: Memoranda, Statistical Tables and Charts prepared in the Board of Trade" [Cd. 1761, price 3s. 6d.].

A Second Series of Memoranda, Statistical Tables, and Charts, dealing with British and Foreign Trade and Industrial Conditions, was issued on Dec. 21st, 1904 [Cd. 2337]. The volume makes 600 pages, and consists of 17 memoranda with 2 appendices. The memoranda are divided into 5 groups, dealing with—

1. The condition of the working classes—cost of living in the United Kingdom, fluctuations in employment, statistics of pauperism, emigration, and savings banks deposits in the United Kingdom and certain foreign countries.
2. Statistics as to wholesale prices of cereals and flour, and ocean freights in the United Kingdom and certain foreign countries.
3. Changes in Customs Duties on grain, flour, and meat in principal importing countries; the relative incidence of foreign and colonial import tariffs on exports of British manufactures; tariff treatment of British and Colonial products by foreign countries.
4. British and Foreign Trade Statistics—British imports and exports of manufactured and partly manufactured goods; sources of imports for first half of 1904; export trade of chief commercial countries with protected and other markets; the German Commission on Kartells, etc.
5. Statistics of distribution of population engaged in principal industries in United Kingdom and chief foreign countries.

The Appendices supplement and correct the information given in the first series published in 1903.

### *Publications on both sides.*

The following list of publications may be useful to those who wish to study the question for themselves in detail:

#### *Government Publications.*

The Board of Trade Blue Book—British and Foreign Trade and Industry, Memoranda, Statistical Tables and Charts (3s. 6d.).

Statistical Abstract for the United Kingdom, giving information as to Imports and Exports, Average Prices, Customs Tariffs, Receipts, etc. (1s. 3d.).

Annual Statement of Trade, 1903, Vols. I. (7s. 1d.) and II. (5s.).

Annual Abstract of Labour Statistics, 9th No. (1s.).

Statistical Abstract for the Colonies and India (1s. 9d.).

Colonial Import Duties Return (2s. 1d.). Foreign (1s. 11d.).

Statistical Abstract of the Principal Foreign Countries (1s. 6d.).

Abstract of Foreign Labour Statistics (1s. 4½d.). Memorandum on the Comparative Statistics of Population, Industry, and Commerce in the United Kingdom and some leading Foreign Countries (5½d.).

Reports on Tariff Wars between certain European States (France, Italy, Switzerland, Germany and Russia) (8½d.).

Bounties in Foreign Countries (6d.).

Statistical Charts for St. Louis Exhibition, illustrating Statistics of Trade, Employment and Conditions of Labour in the United Kingdom, 4s. 9d.

### *In support of Mr. Chamberlain.*

"Imperial Union and Tariff Reform" (Grant Richards, 1s.), an official reprint of Mr. Chamberlain's speeches, May 15th to Nov. 4th, 1903, with an introduction.

"A Speaker's Handbook" (Tariff Reform League, 1s.).

"Mr. Chamberlain's Proposals: What they mean and what we shall gain by them" (Grant Richards, 1s. By C. A. Vince, M.A., with a preface by Mr. Chamberlain,

"Economic Notes on Insular Free Trade," by Mr. A. J. Balfour, M.P. (Longmans, 1s.).

"Imperial Reciprocity" (Birmingham Tariff Committee, 6d.).

"Reciprocity in Trade," by Professor Knight (Simpkin, Marshall, 1s.).

"Imperial Fiscal Reform," by Sir V. H. P. Caillard (E. Arnold, 3s. 6d.).

"The Tariff Problem," by W. J. Ashley (P. S. King, 3s. 6d.).

"Return to Sanity" (Patriotic Press, 1s.).

"Free Trade Creed Examined and Exposed," by J. W. Martin (Simpkin & Marshall, 1s.).

"Twentieth-Century Free Trade," by E. H. Skrine (Simpkin & Marshall, 6d.).

"Sophisms of Free Trade," by J. B. Byles (Lane, 3s. 6d.).

"Free Trade a Failure from the First," by T. P. Gaskell (Macmillan, 2s.).

"Rise and Decline of the Free Trade Movement," by W. Cunningham, D.D. (Camb. Univ. Press, 2s. 6d. net).

"The Dynamics of the Fiscal Problem, by V. St. Clair Mackenzie (Wilson, 4s. net).

Tariff Commission Report: I. Iron and Steel Trades (King, 2s. 6d.).

### *Against Mr. Chamberlain.*

"Elements of the Fiscal Problem," by L. G. Chiozza-Money (King & Son).

"Free Trade and other Fundamental Doctrines of the Manchester School," edited by F. W. Hirst (Harper Brothers, 6s.).

"International Trade, an Application of Economic Theory," by J. A. Hobson (Methuen, 2s. 6d. net).

"Protection or Free Trade," by Henry George (English League for the Taxation of Land Values, 376-77, Strand, W.C., 6d.).

"Free Trade and Protection," a reprint of parts of "The Wealth of Nations," with introduction and statistical appendix by T. A. Ingram, B.A., LL.D. (Routledge, 1s.).

"Trade and the Empire," Mr. Asquith's speeches (Methuen, 6d.).

"Free Trade Movement," by J. Armitage Smith (Blackie, 2s. 6d.).

"Facts v. Fiction," Cobden Club's reply to Mr. Chamberlain (Cassell, 1s.).

"Reply to Mr. Balfour's 'Economic Notes,'" by H. Cox (Routledge, 1s.).

"Fiscal Reform Examined," by Bryce (1s.).

"Handbook for Speakers" (Free Trade Union, 6d.).

"Free Trade," by Mongrédien (Cassell, 1s.).

"Riddle of the Tariff," by A. C. Pigou (Johnson, 1s.).

"Labour and Protection," edited by H. W. Massingham (Unwin, 6s.).

"British Industries under Free Trade," edited by H. Cox (Unwin, 6s.).

"Free Trade," by Lord Avebury (Macmillan, 5s. net).

"Theory," by J. A. Hobson (Methuen, 2s. 6d.).

"The Hungry Forties: Life under the Bread Tax" (Unwin, 6s.).

#### Other Publications,

"Free Trade, Protection, Dumping Bounties, etc.," by H. A. Agacy (Longmans, 2s. 6d.).

"Fiscal Dispute made Easy," by W. H. Mallock (Nash, 1s.).

"Commerce and the Empire," by W. Pulsford (Cassell, 3s. 6d.).

"Shipping Trade and the Fiscal Policy," by N. Hill (Spottiswoode, 6d.).

"Protection in Germany," by W. H. Dawson (King, 3s. 6d.).

"Protection in the United States," by M. Low (King, 3s. 6d.).

"Protection in Canada and Australasia," by C. H. Chomley (King, 3s. 6d.).

"Protection in France," by H. O. Meredith (King, 3s. 6d.).

"Modern Tariff History," by P. Ashley (Murray, 10s. 6d.).

"Fifty Years of Progress," by Lord Brassey (Longmans, 2s.).

"Statistical Studies relating to National Progress in Wealth and Trade since 1882" (King, 2s.).

"Work and Wages: I. Foreign Competition," by S. G. Chapman (Longmans, 7s. 6d.).

"Canada and the Empire: an Examination of Trade Preferences," by E. S. Montagu and B. Herbert, preface by Lord Rosebery (King, 3s. 6d. net).

"Growth of English Industry and Commerce in Modern Times," by W. Cunningham, D.D. (Camb. Univ. Press, 25s. net).

"The Return to Protection," by William Smart, Adam Smith Professor of Political Economy, Glasgow University (Macmillan, 5s. net).

#### Fiscal Associations and Organisations.

A number of associations were formed during the year, both for promoting and for opposing Mr. Chamberlain's policy. The following is a list of the more important of them.

#### For Mr. Chamberlain.

**Imperial Tariff Committee, Birmingham.**—*President*, Rt. Hon. J. Chamberlain, M.P.; *Treasurer*, Edward Nettlefold, M.A., J.P.; *Hon. Sec.*, W. Byng Kenrich; *General Sec.*, C. A. Vince, M.A.; *Organising Sec.*, W. Jenkins; *Assistant Sec.*, A. E. Hunt, B.A.; *Office*, 39, Edmund Street, Birmingham.

**Tariff Reform League**, inaugurated July 21st, 1903 (Mr. Chamberlain later on became a vice-president).—*President*, Duke of Sutherland, K.G.; *Chairman of Council*, Duke of Westminster; *Chairman of Executive Committee*, Mr. C. Arthur Pearson; *Sec.*, Mr. J. Ratcliff Cousins; *Office*, 7, Victoria Street, Westminster, S.W.

**Birmingham and Midlands Women's Imperial Tariff Reform League.**—*Sec.*, Mrs. W. Furrow.

#### Against Mr. Chamberlain.

**Unionist Free Food League.**—*President*, the Duke of Devonshire; *Vice-Presidents*, Viscount Goschen, Sir Michael Hicks Beach, M.P., and Mr. C. T. Ritchie, M.P.; *Hon. Treasurer*, Lord James of Hereford; *Sec.*, Mr. F. H. A. Manners-Sutton; *Offices*, 36, Victoria Street, Westminster, S.W.

**Unionist Free Trade Club.** See p. 201.

**Free Trade Union.**—*Chairman of the Executive Committee*, Mr. Arnold Morley; *Hon. Secs.*, R. McKenna, M.P., and L. T. Hobhouse; *Office*, 8, Victoria Street, Westminster, S.W.

**Women's Free Trade Union.**—*Chairman of Committee*, Mrs. Herbert Gladstone; *Hon. Sec.*, Mrs. Bamford Slack.

**Cobden Club.**—*Chairman of Committee*, Lord Welby; *Sec.*, Mr. G. H. Ferris; *Office*, 28, Victoria Street, Westminster, S.W.

**People's League against Protection.**—*Sec.*, C. Sheridan Jones, 30 and 31, Temple House, Tallis Street, E.C.

**Food Supply in Time of War.** A Royal Commission was appointed in April 1903 "to inquire into the conditions affecting the importation of food and raw material into the United Kingdom in time of war, and into the amount of the reserves of such supplies existing in the country at any given period, and to advise whether it is desirable to adopt any measures, in addition to the maintenance of a strong fleet, by which such supplies can be better secured, and violent fluctuations avoided." The Commissioners are: H.R.H. the Prince of Wales, Lord Balfour of Burleigh (Chairman), the Duke of Sutherland, Lord Burghclere, Rt. Hon. Henry Chaplin, M.P., Rt. Hon. J. L. Wharton, M.P., Vice-Admiral D. H. Bosanquet, Sir J. Colomb, M.P., Sir Alfred Bateman, Sir H. Seton-Karr, M.P., Mr. Henry H. Cunynghame, C.B., Mr. E. Robertson, M.P., Mr. A. Emmott, M.P., Mr. John Wilson, M.P. (Mid Durham), Prof. Erskine Holland, D.C.L., Mr. A. S. Harvey (Messrs. Glyn, Mills, Currie & Co.), Mr. J. E. Street (Chairman of Lloyds), Lieut.-Col. R. Montgomery, V.D. (President of the Liverpool Corn Trade Association). The Secretary is Mr. W. H. Clark, Board of Trade. *Office*, 8, Delahay Street, Westminster, S.W.

## FOREIGN OFFICE.

This is the department of Government which conducts official intercourse with other States. By constitutional law the authority of the Sovereign is supreme; but by constitutional custom he may only act by the advice and on the responsibility of a Minister—the Secretary of State for Foreign Affairs. From early times the Sovereign had regarded the control of Foreign Affairs as the chief of the Royal prerogatives; and for long the Secretary of State (whose most important duties were in this department) merely carried out his directions. By a gradual process of development the power of the **Secretary of State for Foreign Affairs** increased by slow but certain steps, until he became a responsible Minister; while the direct authority of the Crown, in fact, it not in legal theory, steadily decreased. Even in modern times, however, constitutional practice requires the sanction of the Sovereign to matters of foreign policy; and in this connection Lord Palmerston (when Foreign Secretary) was reprimanded by Queen Victoria, in a special memorandum pointing out that she expected to be kept informed of what passed in interviews between him and Foreign Ambassadors or Ministers on important matters, and to have drafts of despatches submitted for her approval before signature. Lord John Russell, as Prime Minister, was an assenting party to the Queen's view. The Foreign Secretary conducts general negotiations, prepares or supervises despatches, and periodically gives receptions to the representatives of Foreign Powers. But questions of importance come before the Prime Minister or are discussed by the whole Cabinet under his presidency. The requisite continuity of general policy, amidst shifting political parties, is maintained by means of the permanent Staff of the Department. **Secretary of State for Foreign Affairs**, the Marquess of Lansdowne.

**Permanent Under-Secretary**, Sir T. H. Sander-son, G.C.B., K.C.M.G., I.S.O.

**Assistant Under-Secretaries**, Hon. Francis H. Villiers, C.B.; Francis A. Campbell, C.B.; Sir Eldon Gorst, K.C.B.

**Parliamentary Under-Secretary**, Earl Percy, M.P.

The representatives of the Crown abroad are members either of the Diplomatic Service or of the Consular Service, the duties of the former body being, generally speaking, political and ceremonial, of the latter, commercial and legal; though in the less important posts diplomatists undertake consular work, and occasionally consuls act in a diplomatic capacity.

### The Diplomatic Service.

The Diplomatic Service consists of (a) Ambassadors, (b) Ministers Plenipotentiary and Ministers Resident, (c) *Chargés d'Affaires*.

The **Ambassador**, according to historical theory, represents the very person of his Sovereign, and so can claim direct access to the Sovereign to whom he is accredited—a privilege of little practical importance in these days of constitutional rule. Further, he takes first rank in order of precedence.

The **Minister** is regarded as a mere agent of the Sovereign, and therefore holds an inferior position, though otherwise he has powers and duties similar to those of an Ambassador.

The **Chargé d'Affaires**, unlike the two former, is accredited not to the Sovereign, but to the

Minister for Foreign Affairs of the State in which he resides. Usually he is appointed to act temporarily, in the absence of the Ambassador or Minister.

These diplomatic Agents have to observe the political tendencies of the foreign Government, and report regularly thereon to their own Government; to carry on negotiations under instructions from the Foreign Secretary; to watch over the interests of British subjects abroad; and also to keep up social intercourse and develop friendly relations in the capital where they reside. Secretaries are attached to the Legations, and often Military and Naval Attachés. The appointment, in recent years, of commercial attachés in the Diplomatic Service is a symptom that the sphere of the diplomatist is extending, even though his duties have become less conspicuous owing to the development of the telegraph and of special correspondents.

### **The Consular Service.**

The Consular Service consists of (a) Consuls-general, (b) Consuls, (c) Vice-Consuls, and (d) Consular Agents. The Consul's duties, though less exalted than those of the Diplomatist, are considerably more various. In addition to giving general assistance to British subjects abroad, he has in particular to deal with numerous matters connected with shipping; to issue periodical reports on the trade of the place where he resides; to celebrate or register marriages where one of the parties is British; to register the births of British subjects; to take oaths and declarations, and perform other notarial functions. Besides this, in some countries, such as Turkey and China, he administers justice, where a British subject is concerned, either in his own court, or in conjunction with the native tribunal.

A Committee appointed by Lord Lansdowne to inquire into the constitution of the Consular Service reported in July 1903 that the existing system of nomination and age limits for the General Consular service should be abolished; that admission should be by limited competition; that the age should be from 22 to 27; that power should be reserved to the Secretary of State to appoint any person, regardless of age limit, to one of the higher posts for which special qualifications might be required. The Committee's recommendations were subsequently considered by an Inter-departmental Committee, and generally accepted, though some slight modifications were introduced in the grading, as well as in the salaries assigned to Vice-Consuls. The amendments are as follows: 1st grade, Consuls-General, salary £1000 to £1200; 2nd grade, Consuls-General (2nd class) and Consuls (1st class), salary £800; and 3rd grade, Consuls (2nd class), salary £600. Vice-Consuls, £350, rising by £15 to £450.

The names of the British Diplomatic and chief Consular representatives abroad are given in the articles on the countries to which they are accredited, or where they are stationed.

### **Passports.**

Foreign Office Passports are granted only to (1) natural-born British subjects, (2) the wives and widows of such persons, and (3) persons naturalised in the United Kingdom, the Colonies, or in India. Passports are granted to such persons as are known to the Secretary of State, or are recommended to him by some person who is known to him; or, in the case

of natural-born British subjects and persons naturalised in the United Kingdom, who produce a Declaration in a form obtainable at the Foreign Office, verified by some banking firm, mayor, magistrate, minister, physician, or other responsible person resident in the United Kingdom. In the case of children under 14 a Declaration made by the child's parent or guardian is required. In the case of persons naturalised in the Colonies a Letter of Recommendation from the Colonial Office, or in the case of natives from British India a similar letter from the India Office, is required. In all cases of naturalised British subjects the Certificate of Naturalisation must accompany the Declaration or Letters of Recommendation.

All applications for Foreign Office Passports must be made on a printed form obtainable from the Passport Department, Foreign Office, London, S.W. The charge for a Passport is 2s., and a further 2s. if the applicant does not reside in London and the Passport has to be sent by post. Persons abroad must apply to the nearest British Mission or Consulate. The bearer of every Passport must sign it as soon as he receives it, or its validity may be questioned and the *visa* refused.

Travellers intending to visit Russia, Turkey, Roumania, Persia, Venezuela, Hayti, or Eritrea must get their Passports *visés* at the Consulates-General in London or one of the other Consulates in the United Kingdom of the countries named. In the case of other countries this formality is not necessary except as an additional precaution, which is recommended in the case of Passports of old date. The Foreign Office, however, advise British subjects travelling abroad to furnish themselves with Passports, for even in those countries where they are no longer obligatory, they are useful as affording a ready means of identification in case of need. British subjects intending to reside in Germany or in Switzerland (where a Permit must be obtained from the authorities) should provide themselves with Passports.

### **FORESTRY.**

In Great Britain there are about 3,000,000 acres of woodlands, or less than 4 per cent. of the total area. The national woodlands include about 115,293 acres, but only about 57,304 are under timber crops in the New Forest, the Forest of Dean, and other smaller tracts. The imports of foreign forest produce in Great Britain amounted in 1903 to over £27,000,000.

In Feb. 1902 a Departmental Committee (Mr. R. C. Munro Ferguson, chairman; Mr. R. H. Hooker, of the Board of Agriculture, secretary) was appointed to inquire into and report as to the present position and future prospects of forestry, and the planting and management of woodlands in Great Britain, and to consider whether any measures might with advantage be taken, either by the provision of further educational facilities or otherwise, for their promotion and encouragement. The Committee reported in November, and the report was published in Jan. 1903 [Cd. 1319, 2d.]. They said that the area of waste, heather, and rough pasture or land out of cultivation in the United Kingdom on which afforestation could be profitably undertaken is 21,000,000 acres, and that afforestation would furnish remunerative labour to an increased rural population, land under forests requiring more labour than the same area under sheep.

The world is approaching a dearth in its supply of coniferous timber, which constitutes between 80 and 90 per cent. of the total British timber imports, and which can be grown in these islands, and the question is therefore a matter of grave national concern. Yet the Committee did not recommend a general scheme of State Forests. They recommended that the Alice Holt woods in Hampshire and an estate in Scotland should be acquired and used as demonstration areas by arrangement between the Commissioners of Woods and Forests and the Board of Agriculture. They further recommended the appointment of a lecturer on forestry at the Universities of Cambridge and Oxford, and that example plots be provided in connection with each of these centres and with Edinburgh; that a good grounding in forestry form an integral part of the curriculum of the agricultural colleges in Great Britain; that provision be made for the education of foresters and woodmen by employing students to work in the demonstration forests, by county council lectures and by scholarships; that the inquiry conducted in '05, concerning the area of woodlands, be repeated by the Board of Agriculture; and that the attention of corporations and municipalities be drawn to the desirability of planting with trees the catchment areas of their water supply.

A Conference of Welsh County Councillors resolved in Nov. 1903 to establish a School of Forestry for Wales and Monmouthshire. Mr. E. Robinson, of Boncath, who took the initiative, estimated the waste land in Wales on which timber could be grown at 1,000,000 acres.

Early in 1904 the Commissioners of Woods and Forests established a School of Forestry in the Forest of Dean, at Coleford, with Mr. C. D. Hanson, of the Indian Forest Department, as Instructor, primarily for the education of woodmen, and to fit students to become foremen on large estates.

The Scottish Office of Woods and Forests have entered into communication with certain Scotch landowners to secure suitable areas for planting.

The Board of Agriculture have taken steps to secure the establishment of at least two lecture-ships in forestry in England, and some of the leading universities and agricultural colleges have been giving attention to proposals under this head. The agricultural departments of the University College of North Wales, Bangor, and of the Durham College of Science, Newcastle-upon-Tyne, offer special advantages as centres of instruction in forestry, and grants in aid of the establishment of schemes of education in the subject are to be made by the Board to those institutions.

## FRANCE.

France, since the overthrow of Napoleon III. in 1870, has been a Republic governed by a President and two Chambers under the constitution of '71, revised in '75, '84, '85, and '89.

The legislature consists of the Assembly, sitting in two houses: viz., the Senate of 300 members, of whom 225 are indirectly elected for 9 years (one-third retiring every 3 years) by delegates chosen by the Municipal Councils and the Senators, Deputies, Councillors-General, and District Councillors of the Departments, there being also 75 Senators originally elected for life by the two

Chambers (though as these die the vacancies are filled up by the election of Senators for a period of 9 years only), and the Chamber of Deputies of 594 members, elected for 4 years by universal suffrage. The method of election is by *scrutin d'arrondissement*. Each Department is divided into *arrondissements* returning one Deputy, though where the population of the *arrondissement* exceeds 100,000, it is divided into two or more constituencies. Each elector votes for one Deputy only. Candidates are compelled to declare for which constituency they will stand. Voters are required to be over 21 and to have a 6-months' residential qualification. Both Houses can initiate and frame laws, except in the case of financial laws, which must first be presented to and voted by the Chamber of Deputies. Deputies and Senators are both paid at the rate of 9000 fr. a year.

The executive power is confided to the President, who is elected for seven years by the two Houses united in National Assembly, and receives 600,000 fr. a year, and a further allowance of 600,000 fr. for expenses. He appoints the Ministers and makes all civil and military appointments. War can be declared by the President only with consent of the two Houses, and his every act must be countersigned by a Minister. The *Conseil d'Etat* is a special body, composed of Councillors, *Maitres de Requêtes* and Auditors, all appointed by the President, and presided over by the Minister of Justice. Its function is to give advice upon administrative points submitted to it by the Government. The colonies are looked upon as being politically part of France, and are represented in the Senate by 4 Senators and in the Chamber by 10 Deputies.

## The Army.

The French army is administered by the War Department, or Ministry of War, with M. Bertheux at its head, assisted by a Military Cabinet and the chiefs of various bureaux. The chief of the general staff of the army is responsible to the Minister, and controls the directorates of infantry, cavalry, engineers, artillery, finance, etc. M. Bertheux took office upon the resignation, in Nov. 1904, of General André, whose position had become untenable owing to the system of espionage he had encouraged in order to republicanise the army.

In 1904 the effectives with the colours was estimated as follows: 29,000 officers, 520,831 men, and 142,474 horses; the gendarmerie, 683 officers and 24,034 men, being additional. The establishment was 515,600 men. The Active Army is constituted as follows: 560 battalions of infantry, 30 battalions of Chasseurs, 12 Foreign, 20 Zouaves, 24 Algerian Tirailleurs, 1 Saharan Tirailleurs, and 5 African Light Infantry: total, 651 battalions. The Cavalry form 31 regiments of Dragoons, 21 of Chasseurs, 14 of Hussars, 13 of Cuirassiers, 6 of Chasseurs d'Afrique, and 4 of Spahis (all of 5 squadrons). The organisation of the Artillery is as follows: Field batteries, 442; Horse batteries, 52; Mountain batteries, 22; Foot (or Fortress) batteries, 112; in all, 628. The Engineers (including Railway troops) number 7 regiments, 26 battalions and 3 Railway companies) with telegraphists, ballooning troops, etc.; and the Military Train has 20 squadrons (comprising 72 companies). The following is the peace strength by arms:—

## France. Algiers and Tunis.

Infantry .. ..	368,954	43,200
Cavalry .. ..	16,764	8,450
Artillery .. ..	74,936	3,875
Engineers .. ..	12,250	1,118
Train .. ..	8,560	1,850

In addition are 2500 non-commissioned officers and 13,000 men in the administrative troops, 4000 officers unattached, 420 officers and 3220 men in the military schools, and 2400 officers and 480 men supernumerary.

The forces are organised in 20 army corps, exclusive of the Paris garrison and Tunis; their headquarters being at Lille, Amiens, Rouen, Le Mans, Orleans, Châlons-sur-Marne, Besançon, Bourges, Tours, Rennes, Nantes, Limoges, Clermont-Ferrand, Lyons, Marseilles, Montpellier, Toulouse, Bordeaux, Algiers, Nancy.

Under the existing rules every Frenchman should serve three years in the Active Army, ten years in the Reserve of the Active Army, six years in the Territorial Army and six years in the Reserve of the Territorial Army. For administration, training and mobilisation, the units of the Territorial Army, as well as the Active Reserve, are attached to the corresponding units of the Active Army. A system of two years' service with the colours is about to be introduced, applying to the whole population, without exceptions, save for physical incapacity. M. Berteaux, now Minister of War, has been prominently associated with this scheme, which meets with general approval as passed by the Senate, but not as modified by the Chamber for political purposes. Under the existing rules there have been many exemptions, and members of the liberal professions have escaped with one year's service. The plan is now to make the service equal for all.

The Reserve Troops are: 145 Infantry regiments, 30 Chasseur battalions, 40 Cavalry regiments formed with the Line and Light Cavalry regiments of the Corps Cavalry brigades, 41 other squadrons formed with the Divisional Cavalry regiments, and 216 batteries of Field Artillery, 12 to each Artillery brigade. The Territorial Forces are 145 battalions of Infantry, 7 of Rifles, 10 of Zouaves, 40 battery groups of Field Artillery and 16 of Foot Artillery, 21 battalions of Engineers, and 19 squadrons of Train. There are special dispositions in regard to some army corps, and a large number of battalions and independent companies are employed in the Customs and Forest service. In regard to the localisation of the troops, it should be noted that a large force is quartered on the German frontier, where the 6th corps has been divided into two, and a new corps thus created. The Reserve of the Active Army includes about 1,320,000 men, and the Territorial Army and its Reserve about 2,270,000.

It has been estimated that the French Army, with its various Reserve and Territorial forces, includes 3,500,000 trained men on a war footing, and that 4,000,000 untrained might be embodied.

The French Colonial Army has been brought under the authority of the Ministry of War, and comprises 6 brigades of infantry, 12 battalions of field artillery, 6 mountain batteries, and 12 garrison batteries, with a strength of 1570 officers and 26,400 men stationed in France.

In Madagascar and Indo-China are 10 battalions of French and 18 battalions of native infantry, and 4 field, 6 mountain, and 5 garrison

batteries; in West Africa, 2 French and 8 native battalions, 2 mountain and 3 garrison batteries; in Martinique, 7 French and 10 native battalions, and 2 field, 3 mountain and 3 garrison batteries; and in various other stations some 6 French and 3 native battalions, with 1 mountain and 5 garrison batteries. For some time past France has been strengthening her military forces in French Indo-China, where there are now at disposal 3 brigades of troops in actual existence, with a reserve brigade. The approximate strength of the native forces in the colony is as follows:—

French infantry, 3 regiments .. ..	3,000 men
Foreign Legion, 4 battalions .. ..	3,000 "
Native infantry, 6 regiments .. ..	18,000 "
"Milice indigène" (native constabulary) .. ..	10,000 "
Total of infantry .. ..	34,000 "

**The Navy.**

The French Navy has for its head a Minister of Marine, who is almost always selected from the list of flag officers or from the members of Parliament. He has absolute freedom in the choice of his subordinates, and is only responsible to the Chambers. Subordinate to the Minister are the Chief of the Staff, a naval officer, and the Heads or Directors of the four main branches of business—Personnel, Matériel, Ordnance, and Account. There are also a number of more or less permanent boards and committees, which sit at the Ministry of Marine, and of which the Conseil Supérieur is the most important. This is presided over by the Minister himself, and includes all the flag officers holding important commands on shore or afloat in home waters, and able to attend the meetings of the board. This Council seldom meets more than once a year, when it is convened by the Minister of Marine and is consulted on such subjects as new construction, questions of defence and changes in naval matériel. There are also Boards concerned with the works (Conseil des travaux), with promotion, and with inspection. The Estimates before submission to Parliament are reported upon by a Budget Committee, generally in the spring preceding the year to which they relate; this Committee frequently modifies the estimates for the Navy and propositions of the Ministry of Marine. The estimates are as a rule voted in December.

Chief of the General Staff, Rear-Admiral P. A. Campion.

Comptroller, L. Chatelain.

Director of Construction, J. Thibauldier.

Director of Ordnance, General J. Puel.

Accountant-General, J. Guimbelot.

Director of Works, L. Renaud.

Director Medical Department, L. Devincq.

Hydrographer, Vice-Admiral E. M. Richard.

The French Navy is manned partly by conscription and partly by voluntary enlistment. The Inscription Maritime, dating back to 1683, contains the names of all male individuals devoted to a seafaring life from the 18th to the 50th year of age. Young men liable to service in the Army may, however, volunteer for service in the Navy. For administrative purposes France is divided into five divisions maritimes, and subdivided into twelve arrondissements maritimes.

The French Naval Estimates proposed for the year 1905 a total of £12,722,752 (318,068,813 fr.),

of which it is proposed to devote £3,593,880 (89,847,000 fr.) to new construction. The Estimates for 1904 were £12,517,273 (312,931,832 fr.), and the amount devoted to new construction £4,548,485 (113,712,127 fr.).

The number of officers and men on the active list of the French Navy in 1904 was 52,476, and the number in Reserve 49,340. The number of men effective in 1904 was less by 771 than the number available during the preceding year.

The executive officers of the French Navy are divided as follows:—15 vice-admirals, 30 rear-admirals, 125 captains, 215 commanders, 754 lieutenants, 420 sub-lieutenants, 170 midshipmen, and 67 cadets.

The number of ships built, building, and projected for the French Navy on Nov. 30th was:—

#### Built.

Battleships, 1st class . . . . .	20
do. 2nd class . . . . .	9
do. 3rd class . . . . .	1
Coast defence vessels . . . . .	14
Armoured cruisers . . . . .	18
Protected cruisers, 1st class . . . . .	7
do. do. 2nd class . . . . .	16
do. do. 3rd class . . . . .	17
Unprotected cruisers . . . . .	1
Torpedo vessels . . . . .	15
Torpedo-boat destroyers . . . . .	31
Torpedo boats . . . . .	233
Submarines . . . . .	26

#### Building.

Battleships, 1st class . . . . .	6
Armoured cruisers . . . . .	5
Torpedo-boat destroyers . . . . .	2
Torpedo boats . . . . .	20
Submarines . . . . .	14

#### Projected.

Armoured cruiser . . . . .	1
Scouts . . . . .	3
Torpedo-boat destroyers . . . . .	6
Torpedo boats . . . . .	74
Submarines . . . . .	34

NOTE.—The projected armoured cruiser is the *Edgard Quinet*, of 14,300 tons, which will be built at Brest. The scouts will be of 1600 tons displacement, and 18 knots speed.

The Government dockyards in France are situated as follows:—

**Cherbourg.**—One dock, takes battleships 14,000 tons; seven smaller.

**Brest.**—One dock takes battleships; others very small.

**Lorient.**—One dock takes battleships 14,000 tons; one takes small cruisers.

**Rochefort.**—Three docks, take small vessels only.

**Toulon.**—Three docks take battleships 14,000 tons; six others take cruisers.

Two battleships were launched for the French Navy during 1904: the *Democratie* at Brest on May 1st, and *Justice* at La Seyne on October 27th. The armoured cruiser *Victor Hugo* also took the water on March 30th at Lorient.

The following were the principal occurrences during 1904:—New regulations for the steam trials of vessels built for the French Navy came into operation in June. There are to be four trials in all: a coal-consumption trial, to last six hours; one trial at full speed for ten hours; one for three hours at the highest speed obtainable with three-quarters of the boilers; and a run of twenty-four hours at economical cruising

speed. Not more than three days are to elapse between any two of these trials, except under special circumstances.

A new *Defense Mobile*, to be called the Algerian Division, was formed in August, the first officer appointed to the new command being Rear-Admiral J. J. G. de Percin.

A Permanent Submarine Commission was inaugurated, the members being Rear-Admiral Phillibert (President), M. Ansoher (Chief Engineer), Commander Serres, Lieutenants Voisin and Care, and Engineers Bourdelle and Chapuis.

Vice-Admiral Bienaimé and Rear-Admiral Ravel were relieved of their posts as Commander-in-Chief and Chief of the Staff respectively at Toulon under circumstances which aroused considerable indignation among all ranks of the Navy.

Two serious accidents occurred: the *Leon Gambetta* ran on a rock while undergoing trials and sustained considerable damage, and a cartridge explosion took place on board the *Forbin*, five men being injured, but none, fortunately, killed. No regular manoeuvres were held, but several series of exercises by the northern squadron, representing an attack on various parts of the coast, were carried out, in which submarines played a large part. Disturbances and strikes prevailed in all the French dockyards during the year.

#### Local Government, Education, etc.

As to local government, the unit is the commune, governed by a municipal council and a mayor. The communes are combined into cantons, containing on an average 12 communes, and the cantons into arrondissements, governed by elective arrondissement councils and sub-prefects, these arrondissements again forming the Departments, of which there are 86, each with a Departmental Council, besides the territory of Belfort. Prefects, with large powers, represent the Executive, and control the Departments, and Sub-Prefects the Arrondissements. All religions are on a legal equality, every sect being entitled to a grant from the State if its numbers exceed 100,000. But the Roman Catholics form the large majority of the population. The Religious Associations Law of 1901 required all religious establishments to be registered and authorised by the State. Primary education, which was reorganised in '78 and '86, is free and obligatory for children from 6 to 13 years of age, and admirably organised. All teachers are laymen, and are paid by the State, except in the towns which number more than 150,000 inhabitants. Secondary education is given in the State lycées and communal colleges, in private establishments, and in ecclesiastical seminaries; there are also facilities, including lycées, colleges, and courses of secondary instruction, for over 19,000 girls. Numerous technical and special schools, besides 15 universities, complete the educational system. The legal system comprises for civil cases the Justices of the Peace, and above them the 26 Appeal Courts and the Courts of Cassation. Criminal cases, except petty offences which are dealt with at the Police Courts, come before the Police Correctional Courts, consisting of three judges, but no jury. An examining magistrate, the *juge d'instruction*, makes a preliminary inquiry, and may dismiss the case or send it for trial. Above these courts are the Assize Courts,

assisted by twelve jurors, the Courts of Appeal and the Criminal Court of Cassation. Tribunals of commerce and councils of experts deal with commercial cases.

### Newspapers.

France has over 300 daily papers, but many of them are simply political tracts without the slightest pretence to supply the features associated with either a British or American daily. Amongst the principal Parisian papers are the following:—

*Figaro*. Edited by M. Gaston Calmette.  
*Journal des Débats*. London correspondent, M. Paul Villars. M. de Nalèche is the editor.

The *Matin* ( $\frac{1}{2}$ d.) The editor is M. Stéphane Lauzanne; London correspondent M. J. Hedeman. It is the only French daily to possess a private wire from London, and by arrangement uses the *Times* English service of news.

*Le Petit Journal*. Founded in 1863, and had an average sale per day of 1,500,000 copies, but this number is now reduced.

*Le Petit Parisien* is a competitor to *Le Petit Journal*, and now claims to out rival the latter's circulation. The chief editor is M. Touchard, and its London correspondent M. George Dussol, 176, Fleet Street. Chief proprietor, M. Dupuy, formerly French Minister of Agriculture.

The *Siècle* is one of the best papers. The editor is M. Yves Guyot (q.v.), the eminent French economist.

The *Temps* is practically the organ of the Ministerial party, but is not in any way subsidised. Owned by a company, of which M. Hebrard is managing director. London correspondent, M. C. Schindler.

Amongst other dailies deserving a brief reference are the *Univers*, an extreme Catholic journal, the *Petit Bleu*, the *Soir*, an evening paper, the *Intransigeant*, Henri Rochefort's organ, the *République Française*, founded by Gambetta, Eugène Spuller, and M. Allain Targe; the *Aurore*; and the *Gaulois* with M. Arthur Meyer as director, and the *Soleil*, founded in 1873, claiming that "il est le journal de tous ceux qui sont restés fidèles à la monarchie constitutionnelle." The three principal illustrated papers are *L'Illustration*, *Mode Illustrée*, and *Vie Illustrée*.

### Industries and Statistics.

At the end of 1902 there were 24,298 miles of first-class railways being worked, and 3345 miles of local lines. Large advances, accounting for a considerable proportion of the public debt, have been made by the country to the railways, which will ultimately revert to the State. There were 3012 miles of canals used for internal navigation, and 4665 miles of rivers similarly used. The chief exports are textiles, wine, raw silk, wool, etc., leather, skins and furs, and small ware. Manufactures accounted for £96,540,000 of the exports in 1903, raw materials for £47,028,000, and food products for £26,524,000. The chief imports are wool, silk, coal, cotton, oil seeds, timber, hides, cereals, textiles, machinery, wine, food products. Raw materials accounted for £120,840,000 of the imports in 1903, food products for £38,440,000, and manufactures for £32,760,000. Agricultural operations engage nearly half the population, and include not only the growing of cereals, wheat principally, but roots, cattle, sugar, silk, wine, vegetables, and poultry and eggs. Coal and iron mines

exist, and there is a considerable fishing industry, besides the ordinary manufacturing pursuits. See TEXTILE INDUSTRIES as to cotton manufactures.

See AFRICA for details as to the trade or France with the African Continent.

Corsica, an island in the Mediterranean, separated from Sardinia by the Strait of Bonifacio, is a French Department. Area, 3376 sq. m.; pop. 276,829. Chief town, Ajaccio. There is a French torpedo-station there. British Consul, W. J. Holmes.

Area, 207,218 sq. m.; pop., 1901, 38,961,945. The birth rate is very low, and consequently the rate of increase is very slow. The population of Paris is 2,714,068. Other principal towns are Marseilles (pop. 491,161), Lyons (pop. 459,099), Bordeaux (pop. 257,471), and Lille (pop. 210,666). Estimated revenue, 1903-4, £150,116,906; 1904-5, £144,147,179; expenditure, 1903-4, £150,112,124; 1904-5, £144,141,666; public debt, 1903, £1,169,003,985; imports, 1902, ("special") £175,761,000; 1903, 192,040,000; exports, 1902 ("special"), £170,088,000; 1903, £170,092,000. Imports from the United Kingdom, 1902, £22,672,000; 1903, £22,276,000; Exports to the United Kingdom, 1902, £51,204,000; 1903, £47,680,000.

Ministry: Premier and Minister of the Interior and Public Worship, M. Combes.—Foreign Affairs, M. Delcassé.—War, M. Bertheux.—Marine, M. Pelletan.—Finance, M. Rouvier.—Public Instruction, M. Chaumié.—Justice, M. Vallé.—Commerce, M. Trouillot.—Colonies, M. Doumergue.—Agriculture, M. Mougeot.—Public Works, M. Maréjols.

Ambassador in London, M. Paul Cambon, Albert Gate House, Hyde Park, W.—Secretary, M. Geoffroy, Minister Plenipotentiary.—Consul-General, M. Auzépy.—Consul-Suppléant, M. Périer, 4, Christopher Street, Finsbury Square, E.C.

British Ambassador at Paris, Rt. Hon. Sir Francis Leveson Bertie, G.C.M.G., G.C.V.O., K.C.B. Secretary, of Embassy, Maurice de Bunsen, C.B., C.V.O.; Commercial Attaché, Sir H. Austin Lee, K.C.M.G., C.B.; Military Attaché, Major W. F. Bonham, D.S.O.

British Consuls-General: At Paris, A. Percy Inglis, Esq., 7, Rue d'Aguesseau; at Havre, W. R. Hearn; at Marseilles, M. C. Gurney. Consuls: Bordeaux, R. D. G. Macdonald; Brest, Captain H. Gye, R.N.; Calais, C. A. Payton; Cherbourg, M. E. Loftus; Dunkirk, E. Taylor; Lyons, L. C. Liddell; Nantes, R. S. Warburton; Nice, A. McMillan.

### President.

The President of France is M. Loubet, who was born at Marsanne, in the department of the Drôme, on Dec. 31st, 1838. His father was a farmer there. He became a barrister, practising at Montélimar, and soon took a prominent part in public life. Indeed, he has risen step by step from the Municipal Council of Montélimar to the Presidency of the Republic, passing through the Chamber of Deputies and the Senate en route, and having held the offices of Mayor of Montélimar ('70), President of the Consul-General of the Drôme ('83), Minister for Public Works ('87), Prime Minister (Feb. to Dec. '92) and President of the Senate '92. It was the Panama affair which caused the fall of his Ministry, but he was in no way implicated. As President of the Senate he was kept more or less outside

of parties, though he was known to be a Moderate with Radical tendencies. On the sudden death of President Faure, in Feb. '99, he was elected (18th) by a large majority to succeed him, and at once announced his firm resolve to uphold and defend the Republic. His uprightness, patriotism, and simplicity of demeanour have already made him the most popular President France has ever had. He has since his election been visited at Paris by the King of Sweden, the Queen-Dowager and Queen of Holland, the King of Belgium, the King of Greece, the Czar and Czarina, the King of Portugal, the King and Queen of Italy, and King Edward VII.; and has himself paid visits to the Czar at St. Petersburg, to King Edward VII. at Windsor, and to the King of Italy at Rome. He married in '69, his wife being the daughter of an ironmonger of Montélimar. There are three children, and his eldest son acts as his private secretary. His mother has reached the age of 90, and still resides on the farm at Marsanne.

### Political Parties.

A few years ago the two main groups in politics might have been roughly, but accurately, defined as Republicans and Reactionaries, the latter including the Royalists—followers of the Duc d'Orléans (*q.v.*), and Imperialists—(followers of Prince Napoleon Victor) (*q.v.*). Now, however, the only division is between the Government Republicans and the Opposition, an Opposition embracing the most diverse elements. In '95 a Radical administration was formed under M. Bourgeois, but the influence of the Socialists, upon whom M. Bourgeois had to depend for a majority in the Chamber, brought about its downfall; and a strong Moderate Republican administration under M. Méline succeeded in April '96, and held office till June '98, when it was replaced by a Radical Ministry with M. Brisson as President. The General Election in May '98 showed a notable increase in the numbers of the Radicals and Socialists elected. M. Brisson in turn succumbed in October '98, and was succeeded by a Ministry of "Republican Concentration" under M. Dupuy. To M. Dupuy in June '99 there succeeded a Cabinet of "Republican defence" under M. Waldeck-Rousseau, including representatives of almost all parties. Its chief enemies were the more regular Opposition headed by M. Méline, and the party of all the discontented and revolutionary, which sprang into prominence in 1900, called the Nationalists, including men like General Mercier, the supporters of M. Déroulède, the adherents of the *Patrie Française* League, Royalists and others. Their strength lay mainly in Paris. The general election on April 27th, 1902, resulted in the return of 360 Ministerialists of all shades, against 281 other candidates returned. The strength of the various groups was as follows: 111 Government Republicans, 99 Progressist Republicans (Mélinites), 129 Radical Republicans, 90 Socialist Radicals, 59 Nationalists, 50 Conservatives (anti-Republicans), 43 Socialists, and 6 Guesdist Socialists. The Progressists lost heavily in the election, and the Nationalists gained ground only in Paris. After the election a new Cabinet under M. Combes succeeded M. Waldeck-Rousseau's Administration in June 1902, the latter considering his mission ended. In 1904 a split took place amongst the Radical Socialists, a

large number of the group forming a new party called the Radical Socialist Left. The Municipal elections in May showed that the Ministry was very strong in the country, and that the Nationalist party was practically a spent force.

### History, 1904.

The Chambers reassembled (Jan. 12th). M. Brisson was elected President of the Chamber of Deputies, and M. Fallières of the Senate. A new treaty with Siam was signed at Paris (Feb. 13th): for details see article on SIAM. The treaty was afterwards voted by the Senate on Dec. 7th. The Criminal Chamber of the Court of Cassation, after an inquiry of some duration, acquitted (March 5th) in the application for revision of the Dreyfus case, and decided to order a supplementary inquiry into the fresh facts which had been adduced. In the course of the lengthy debates on the Government Bill for suppressing teaching by religious bodies in conventual and monastic schools within the next five years, the Government were defeated on a motion to make the period ten years, on account of financial considerations (15th). They offered no opposition to an amendment excluding from the operation of the Bill the institutions from which French missionaries are recruited, and the amendment was carried (21st). The Bill was finally passed (28th) by 316 votes to 269. Strong representations were made by M. Delcassé with regard to the criticisms of the Association's Law and the administrative action of the Government against the Bishops, which were uttered by the Pope in an address to the College of Cardinals. The fact that M. Loubet had not included a visit to the Vatican in the programme of his approaching journey to Rome, also led to strained relations.

An Arbitration Treaty with the Netherlands was signed (April 6th), and similar treaties were concluded with Spain (Feb. 27th), Netherlands (April 6th), Sweden and Norway (July 9th), and the United States (Nov. 1st), following on the lines of the treaties previously concluded, referring differences not affecting the vital interests, territorial integrity, or honour of either State, to The Hague Court.

A most important Agreement with Great Britain was signed (April 8th), consisting of (1) a Convention with regard to Newfoundland and West Africa; (2) a Declaration dealing with Egypt and Morocco; and (3) another Declaration relating to Siam, Madagascar, and the New Hebrides. The formal *pourparlers* in regard to this diplomatic recognition of the *entente cordiale* were begun when M. Loubet and M. Delcassé visited England in July 1903, and proceeded smoothly and amicably to a conclusion which gave the greatest satisfaction in both countries. The Convention provided for the abandonment of the French rights of landing on the Newfoundland Treaty Shore, the compensation for this abandonment taking a pecuniary form as to the individual fishermen involved, and the form of concessions of territory in the Gambia Colony, Sierra Leone, and Nigeria (see pp. 75, 77, 78, 83, for details). The Declaration as to Egypt and Morocco embodied the recognition by France of Great Britain's predominant position in Egypt, while the British Government recognised that it belonged to France to maintain order in Morocco and to assist the Moorish Government in improving the administrative, economic, financial, and

military condition of that country (see EGYPT and Morocco for full particulars). The second Declaration placed it on record that neither France nor Great Britain desired to annex any portion of Siamese territory; further regularised the position of Great Britain in Zanzibar and of France in Madagascar; and provided for putting an end to difficulties which had arisen in the New Hebrides as to land titles, etc. See SIAM, NEW HEBRIDES, and Madagascar (below). An additional clause was signed (20th) providing for the issue of postal orders available in either country.

The Anglo-French Agreement came before the Chamber (Nov. 3rd); and some criticisms of the arrangements relating to Newfoundland and of the concession with regard to Egypt were made, though other speakers, like M. de Pressense, M. Denys Cochin, and M. Jaurès, approved the agreements made with England. In replying, M. Delcassé said that in general what France had given up was particularly desired by England, and what England had conceded was specially precious to France. By 436 to 94 votes the Chamber approved the action of the Government, by 457 votes to 5 it confirmed the Convention concerning Newfoundland and West Africa, and by 443 votes to 105 it authorised the ratification of the entire Convention. The Senate approved the Agreement (Dec. 7th) by 215 votes to 37.

In October a treaty between France and Spain was signed dealing with the situation in Morocco. No official details were published, but it was stated that Spain was granted the right of developing her influence on the Rif littoral, including Tetuan and Tangier, subject to the maintenance in Morocco of the *status quo*. Spain agreed not to extend her fortifications on the North Atlantic, nor to cede her Moorish territory to any other Power than France.

President Loubet, accompanied by M. Delcassé, went to Rome (April 24th), to return the visit of the King and Queen of Italy to Paris in October 1903. They received a splendid popular welcome, and were entertained by the King in the Quirinal, where a State dinner took place (25th). The speeches of the King and of M. Loubet bore eloquent testimony to the cordial relations between the two countries. After seeing a military review (26th), and giving a banquet at the French Embassy (27th), the President, accompanied by the King, went to Naples (28th), where a naval review was held. The President then sailed for France. A formal protest was made by the Pope against the action of the President, as head of a Catholic State, in thus recognising the Power that deprived him of his dominions. In consequence of this incident, the French Ambassador to the Vatican, was recalled (23rd), the French Government repudiating the Note in which the Vatican protest was made, and further regarding as an offence the tone of remonstrance which found expression in a circular sent by the Vatican in regard to the incident to certain foreign Powers. The Chamber approved the Government's action by a large majority (27th).

A number of British working men visited Paris at the end of June, and M. Loubet received a deputation from them at the Elysée (July 4th), declaring that the more the friendly relations of the two countries increased the greater would his satisfaction be.

The Military Service Bill, providing for two

instead of three years' service, was adopted by the Chamber by 577 votes to 43, and, since amendments had been made in it, was sent up to the Senate (5th). On the same date the Senate, by a majority of 59, voted finally the Bill suppressing teaching by Religious Orders, and empowering the Government to close immediately all the schools dependent upon those Orders, though a period of ten years was allowed in the Bill for the work of transformation from such schools to State schools.

During July further friction arose between the Government and the Vatican. Monsignor Geay, Bishop of Laval, was requested by Cardinal Vannutelli to resign, whereupon the French Government asked for an explanation, since by the Concordat such an intimation should have passed through the Ministry for Foreign Affairs. The reply was that Cardinal Vannutelli only intended to give spiritual advice. Monsignor Le Nordez, Bishop of Dijon, was also requested, through the Nuncio, to abstain from carrying out certain of his duties, and the Government pointed out that this also was an infringement of the Concordat. A second communication, this time from Cardinal Merry del Val, was sent to the Bishop of Laval, ordering him to Rome on pain of deprivation of his episcopal powers. Hereupon the Prime Minister proposed, and the Cabinet sanctioned, the sending of an ultimatum requesting the Vatican to withdraw the letters in question, failing which an immediate rupture of diplomatic relations would follow. The Vatican replied to the effect that the Concordat nowhere stipulated that the Pope was not at liberty, without the previous consent of the French Government, to suspend a bishop from his functions, or to summon him to Rome for explanations. There had, therefore, been no violation of the Concordat. Diplomatic negotiations were at once broken off (July 30th). Meanwhile Monsignor Le Nordez had gone to Rome, in obedience to the Pope's summons, and, in consequence, the Premier notified him that his stipend had been stopped from the day he quitted his diocese without the Government's permission. The Bishop, however, resigned his office. The Bishop of Laval also went to Rome afterwards, and resigned his office. The action of the Vatican in this matter undoubtedly alienated many people of moderate views, while it exasperated the supporters of the Government. Speaking at Auxerre (Sept. 4th), the Premier said frankly that he was in favour of a policy of separation of the Churches and the State. He announced that next year 500 religious establishments out of the 3000 remaining to be dealt with would be closed.

The ex-Premier, M. Waldeck-Rousseau, died at Corbeil (Aug. 10th), and when the Chambers reassembled (Oct. 18th) a warm eulogy upon him was pronounced by the President of the Senate. In the Chamber several interpellations were addressed to the Government on the rupture with the Vatican, and the Premier, in a powerful speech, reviewed the history of the relations between the Vatican and the Government of the Republic since 1870, and declared that there had been deliberate disregard and violation on the part of the Vatican both of the Concordat and of the Organic Articles. Under the existing régime the bishops and priests seemed to have come to an understanding to try the patience of the Republic. Clericalism

had always opposed the Republic as an implacable foe. He warned the Chamber against attempting further negotiations with the Holy See; for, even if some *modus vivendi* were arranged, they would only become dupes and accomplices—dupes of those stipulations destined to safeguard the sovereign rights of the Republic which the Catholic doctrine rejected, and accomplices of the unavowed equivocations of the Vatican. In the result the Chamber passed a vote of confidence in the Government by 548 to 88 votes (Oct. 22nd).

An extraordinary debate took place in the Chamber (Oct. 28th) on the methods alleged to have been employed by the Minister of War, General André, or his staff, to rid the Army of Anti-Republican and Clerical partisans, and to promote and otherwise favour Republican officers. The General declared that he was ignorant of the existence of many of the letters which were adduced by M. Guyot de Villeneuve during the debate. In the result the Chamber censured the methods employed, but by 278 to 274 votes expressed confidence in the Minister. General André declared (Nov. 4th) that in his view the end justified the means when the Republic was in danger, but in some of the instances brought forward by the Opposition his subordinates had acted without authority; and the discussion ended with an overwhelming majority for the Government (343 to 236) on a resolution expressing the Chamber's confidence in the Government to ensure in the Army the necessary devotion to the Republic. A Nationalist Deputy, M. Syveton, made a violent physical assault upon General André, who some days later, on Nov. 14th, resigned office, and was succeeded by M. Bertheaux.

M. Combes introduced a bill for the separation of Church and State (Nov. 10th). It was referred to a Committee, and by it rejected on a "snap" division, whereupon the Deville Bill, a measure identical with the Government's, was adopted by the Committee (Dec. 2nd).

### French Colonies.

The total area of the colonies and dependencies of France is about 3,982,000 sq. m., with a population of about 52,000,000. The Minister of the Colonies controls their administration, and those which are not directly represented in the Senate and Chamber of Deputies, by the 4 Senators and 10 Deputies sent from the colonies, are for the most part represented on the Conseil Supérieur des Colonies, which consists of colonial senators and deputies, delegates, and other officials appointed to it. Most of the colonies show a deficit. The 1903 Budget showed a colonial revenue of £655,690 and expenditure of £1,455,000, exclusive of large expenditure on Algeria and heavy expenditure not included in the Colonial Budget. In 1904 the revenue was estimated at £663,465, and the expenditure at £4,414,324. The imports from the Colonies (including Algeria and Tunis) were in 1901 £18,084,000, and in 1902 £17,790,000. In 1901 foreign countries sent £8,359,000, and in 1902 £8,324,000. The exports from the Colonies were in 1901 £14,580,000, and in 1902 £15,848,000. In 1901 £7,162,000 went to foreign countries, and in 1902 £8,860,000.

### Colonies in North Africa.

**Algeria.** One of the Barbary States of North Africa, now a French province, administered

by a Governor-General assisted by a consultative Council. **Area**, 184,474 sq. m.; **pop.** (1901), 4,790,000. The area of the Algerian Sahara is estimated at 123,500 sq. m., and the population at about 50,000. Inhabitants of Algeria proper include, besides the natives, about 765,000 French and European settlers, and about 57,000 Jews. The population of Algiers is about 123,000. The country is divided into the three departments of Oran, Constantine, and Algiers, capital cities of same names, each sending one senator and two deputies to the National Assembly; also the Saharan borders, or "Territories of the South," which constitute a separate administration, with a separate Budget. During '99 and 1900 the whole series of oases commonly known as *Twat* were brought under French control, and the boundary was settled in October 1902. There are 2375 miles of railway. The products of the country include esparto and halfa grass, barley, wine, oil, tobacco, wool, iron and zinc ores, etc. Workable beds of phosphates have lately been discovered in the region between Oran and Tunis. The French forces maintained in Algeria consist of an army corps numbering 60,000 men. **Revenue**, 1902, £2,212,604; **expenditure**, £2,209,504. **Exports**, 1902, £11,886,880, of which £10,035,320 went to France; 1903, £11,800,000; **imports**, 1902, £13,027,440, of which £10,885,720 were received from France; 1903, £15,228,000.

Governor-General, M. Jonnart.

British Consul-General, F. Hay Newton.—*British Vice-Consul*, F. E. Drummond-Hay.

**Tunis.** One of the Barbary States of Northern Africa, lying east of Algeria, and bounded on the north and east by the Mediterranean, and on the south by the Sahara. The French troops invaded the country in '81, and established a protectorate '82. There is a French Resident-General responsible to the French Foreign Office, who controls the administration, and the military maintained in the country number 19,500 men. The Bey is Mohamed, born in '55, who succeeded June 11th, 1902, on the death of his father Ali Bey. Chief products are wheat, barley, wine, olive oil, zinc ore, phosphate of lime, dates, and esparto grass. There are about 588 miles of railway. **Area**, 51,000 sq. miles; **pop.** 1,906,000, including 60,000 Jews and 96,060 Europeans. **Capital**, **Tunis**, **pop.** 170,000. Bedouin Arabs and Kabyles form the majority of the population, the French numbering about 38,000 and the Italians about 67,000. **Revenue**, 1902, £1,191,474; 1903, £1,448,580; **expenditure**, 1902, £1,069,134; 1903, £1,111,501; **public debt**, £8,447,500. **Imports**, 1902, £2,918,887, of which £1,705,000 were received from France; 1903, £3,344,515 (£1,845,086 from France); **exports**, 1902, £2,027,205, of which £1,067,000 went to France; 1903, £2,855,946 (£1,652,772 to France).

Bey, H. H. Mohamed el Hadi Pasha Bey.

Prime Minister, Mohamed el Aziz Bou Attour.

French Resident-General, S. Pichon.—*Assistant Resident-General*, Baron d'Anthouard de Wasservas.—*Secretary-General*, M. Roy.—*Finance*, M. Ducroquet.—*Public Works*, M. Pavillier.

British Consul-General at Tunis, Mr. E. J. L. Berkeley, C.B.—*Vice-Consul*, Mr. H. B. Johnstone.

**French Somaliland** is a wedge of territory on the coast of the Gulf of Aden, which includes the two ports of Obok and Jibuti, and the

town of Tajura on the bay of the same name. The colony lies between the British Somali Coast Protectorate on the east and the Italian colony of Erythrea on the north-west. From Jibuti a railway has been built to Adis and Harar, in order to open up trade with Abyssinia. (For details see ABYSSINIA.) Coffee, gold, ivory, musk, and skins are the chief exports. The country is administered by a Governor, and the capital is Jibuti (pop. 15,000). The area is about 46,000 sq. m., and population about 250,000. Imports, 1903, £301,208; exports, £418,036.

#### Island Colonies.

**Comoro Islands, The.** A group of volcanic islands in the Mozambique Channel, between the east coast of Africa and the north-west coast of Madagascar. Area, 620 sq. m.; pop. 71,000. The group consists of four small elevated islands—Great Comoro (pop. 50,000), Mohilla, or Little Comoro (pop. 9000), Anjuan, erroneously called Johanna (pop. 12,000), and others. Mayotte (area 143 sq. m., pop. 11,640) has been a French possession since '43, and the other islands became French protectorates in '86. They are all under the Governor of Réunion, who appoints an Administrator for Mayotte and Residents for Great Comoro and for Mohilla and Anjuan. Sugar and vanilla are cultivated. Commercially the most important is Mohilla, which carries on a brisk trade with Madagascar, Zanzibar, Mozambique, and the rest of the mainland. The people are Mohammedans, speak Arabic, and are akin to the mixed races of Zanzibar.

**Madagascar.** A large island separated by the Mozambique Channel from south-eastern Africa. Prior to '95 the Government was an absolute monarchy under Queen Ranavalona III., a French Resident having since '85 controlled its foreign relations. In '95, however, France decided to make her protectorate effective. An expedition was sent out, and the island made a French colony, with General Gallieni as Governor-General and Commander-in-Chief (Sept. '96). There are about 7,800 French troops in the island, besides as many more native troops. An Administrative Council has been established at Tananarivo. Administrators have been appointed in all the provinces, courts of law have been formed, and education has been made obligatory on all children from 8 to 14. The Hovas, of Malay origin, are the predominant tribe, and long held the other tribes, of negro blood, in a condition of practical slavery. A great deal of missionary work has been done in the island, principally by the London Missionary Society, and a large majority of the natives were adherents of the Society till '95. Since then, however, it is alleged that the whole weight of French influence has been thrown on the side of the Catholic missions. The island has rich deposits of gold, copper, iron and lead, and magnificent forests of valuable timber. Coal is found in the north-west; rice, attle, hides, gum, india-rubber, wax, cotton, sugar, vanilla, lard, and coffee are exported to Mauritius, Réunion, and Europe. British trade with the island has been greatly diminished by the operation of the tariff instituted in '97. Under the Anglo-French Agreement of April 8th, 1904, the British Government withdrew the protest which they had raised against the introduction of the Customs Tariff established at Madagascar after the annexation of that island to France.

The total imports, 1902, were £1,691,561; 1903, £1,324,287; exports, 1902, £525,777; 1903, £658,845. Climate very hurtful to Europeans, especially on the east coast, though inland it is far more healthy. Cattle herding and agriculture are the principal occupations. Area 228,500 sq. m., pop. 2,505,237, including 15,524 Europeans. Capital, Tananarivo, a striking and well-built town (pop. 55,000, or with district, 260,000) upon a lofty hill about two hundred miles inland. Ports are Tamatave, pop. 11,000, on E.; Majunga, on N.W., pop. 6000. A railway is being built by the French authorities between Aniverano, which is accessible to boats of not more than 3 ft. 4 in. draught, and Tananarivo, a distance of 180 miles. Nossi Bé, a small island on the N.W. coast, held by France since 1843, and a flourishing trade-port, is a dependency of Madagascar. St. Marie, a small island on the north coast, taken by France in 1643, and Diego-Suarez, a French colony since '85, are also dependencies.

Governor, General Gallieni.

British Consuls: At Tamatave, A. Sauzier; at Antananarivo, T. P. Porter.

**Réunion.** A French colony consisting of an island 420 miles east of Madagascar, occupied by the French since 1638. It is administered by a Governor and a Council-General, elected by the inhabitants, and is represented at Paris by a Senator and 2 Deputies. It is divided into 2 arrondissements and 9 cantons. The capital and chief centre is St. Denis (pop. 32,850). Sugar is the staple product, but vanilla, rum, perfumes, and tapioca are also exported. Imports, 1903, £860,343; exports, £767,676. The bulk of the trade is with France. A railway connects the chief port, Pointe-des-Galets, with St. Benoît and St. Pierre. Area, 970 sq. m.; pop., 173,315.

British Consul: E. G. B. Maxse, C.M.G.

#### Colonies in French Central Africa.

**French Congo** is situated in Western and Central Africa, and bounded on the north-west by the Cameroons, on the north by Wadai, one of the Central Soudan States, recognised in '99 as being in the French sphere, on the east by the Bahr-el-Ghazal, on the south-east by the Congo Free State, and on the west by the Atlantic. France has possessed the Gaboon estuary and district since 1843, and in '94 she extended her rule over the inland part of the colony by an agreement made with Germany in March '94 settling the boundary between the French and German spheres from the southern boundary of the Cameroons to Lake Chad. The area of the colony is about 550,000 sq. m., and the population is variously estimated at from 8,000,000 to 15,000,000. It is under the control of a Commissioner-General, with an Administrative Council, and is divided into four districts for administrative purposes, subject to the Commissioner-General. Libreville (pop. 3000), on the northern shore of the Gaboon, is the capital, and the most important port in the interior is Brazzaville. The colony is one of the least developed of the French West African colonies, and entails a heavy burden on the French Colonial Budget. A railway between Libreville and the Congo is projected. The exports (ivory, ebony and other woods, rubber, and palm nuts and oil) were £365,980 in 1903, and the imports £248,950.

**British Consuls:** *At Boma*, R. Casement; *at St. Paul de Loanda*, A. Nightingale.

**French Central Africa** includes the states of Bagirmi, Wadai, and Kanem, recognised as French by the Anglo-French agreement of March 21st, '99, and great part of the Sahara. Wadai, which extends from Darfur to Kanem, and from French Congo to the Sahara, is the strongest native state in the Soudan. It has an estimated area of about 150,000 sq. miles, and a population of about 2,000,000. The Mabas, a Mahometan negro race, are the ruling tribe; but there are many Arabs also, and these carry on a wide commerce. The population profess adherence to the Mahdi-es-Senussi, the head of a sect which is by far the most powerful in Africa, and has its headquarters at the oasis of Kufrah, on the caravan route between Wadai and Benghazi. Kanem is a vassal state lying north-west of Wadai and north of Lake Chad, with an area of about 30,000 sq. m. and a pop. of about 100,000. Bagirmi, which lies south-west of Wadai, and to the south-east of Lake Chad, has an area of about 65,000 sq. m., and a pop. of about 1,000,000 Mahometan negroes. At the capital, Massenia, a French Resident is stationed. The French territory round Lake Chad was under a Government Commissioner till July 1902, but was then made subordinate to the Governor of French Congo.

#### Colonies in French West Africa.

French West Africa includes Senegal, French Guinea, the Ivory Coast, Dahomey, and the Senegambia and Niger Territories, of which accounts are given separately. French territory stretches inland from the coast to the Upper and Middle Niger, thence eastwards to Barraua, on Lake Chad, and north to Tunis and Algeria. The Anglo-French Convention of June 14th, '98, settled the respective spheres of influence of the two countries east and west of the Niger, but an alteration of the boundary to the east of the Niger was made by the 1904 Convention. The French Sahara territory embraces about 2,000,000 sq. miles, and the boundary between it on the west and the Spanish Coast territory of Rio de Oro and Adrar was determined by the Convention of June 17th, 1900. The supreme local power with regard to all French West African colonies is placed in the hands of a Governor-General, resident at Dakar, having as his auxiliary a Commandant-General of all the military forces in French West Africa, a Secretary, and a Council. There are three Military Territories, under the direct administration of the Governor-General. Two of them consist of the northern and north-eastern districts of what was formerly known as the French Soudan, and the other was formed as the result of the occupation of Say, Sinder and other towns in 1900. Timbuctoo (pop. 12,000) is the centre and chief town of one Territory. Mossi and Gurunsi are the chief towns in another, which includes the head waters of the Niger. Sinder is the headquarters of the third, in which posts have also been formed at Say, Koni and Maradi, and which serves to connect the Niger with the Chad region. There are about 8500 troops in the territories, which entail considerable expense upon the Home Government. Medina is the great centre of the gum trade. Rubber is exported, ostrich farms are being established and gold is found in some districts.

**Governor-General**, M. Roume, at Dakar.

**British Consul at Dakar:** Captain C. F. Cromie.

**Dahomey** lies between Lagos and Northern Nigeria on the east and Togoland on the west, and extends inland to the Military Territories. It was taken by the French in '92, the then sovereign, Behanzin, being defeated and dethroned. The colony is administered by a Lieut.-Governor with an Administrative Council. It is self-supporting, and receives no subsidy from the Home Government. Imports, 1902, £629,170, 1903, £450,570; exports, 1902, £541,955, 1903, £381,603. The bulk of the trade is with France, Germany, and the United Kingdom, the latter having much the largest share. The area of the country is about 60,000 sq. m., and the population about 1,000,000. The capital is Porto Novo (pop. 50,000). The old capital was Abomey, 70 miles north of Whydah. The chief products of the country are palm oil and palm kernels, while various manufactures are also springing up. The chief port is Kotonou, and a railway is being built thence inland.

**French Guinea.** This colony was detached from that of Senegal in 1890, and organised as a separate colony in '93. Portuguese Guinea forms the boundary on the north, and Sierra Leone on the south, whilst towards the interior the colony includes the rich protectorate of Futa Jalon. By the Anglo-French Agreement, signed April 8th, 1904, the Los Islands were transferred from Sierra Leone and made part of French Guinea. The islands have a population of 1422. The colony is administered by a Lieut.-Governor. Area about 95,000 sq. m.; pop. estimated at about 2,000,000. The capital and only important centre is Konakry, which is said to be supplanting Sierra Leone in the West Coast trade. A road is being built from Konakry to the Niger, and a railway from Konakry to Kouroussa on the Upper Niger has been definitely taken in hand. The first section of 94 miles, to Kindria, was opened for traffic in 1904. The colony is practically self-supporting. The chief products of the whole region are indiarubber, palm oil, sesame, and gum, but there has been a great decrease in the exports of rubber. In 1902 the imports were £419,788, exports £332,218. Great Britain takes most of the exports and sends the largest proportion of imports. The coast is generally low and sandy, and the climate is unhealthy.

**Ivory Coast.** The, was organised as a separate colony in 1893, having previously been under the Governor of Senegal. It lies between Liberia and the Gold Coast, and towards the interior includes the Kong territory as a protectorate, with other districts formerly forming part of the French Soudan, with which it is connected. It is administered by a Lieut.-Governor. Binger-ville is the capital, and Grand Bassam and Assinie are the other chief towns. Bonduku is becoming a centre of trade between the French Soudan and the coast. The area of the colony is estimated at 120,000 sq. m., and the pop. at 2,000,000. A railway to Kong has been surveyed and is to be built. The chief exports are rubber, palm oil, gold dust, and mahogany. The colony is self-supporting. Imports, 1901, £291,439; exports, £553,147.

**Senegal.** The colony is represented at Paris by a deputy, but is administered by a Lieut.-Governor. It originally consisted

of various settlements on the river Senegal, but now extends into the interior to the Niger and Senegambia Territories. The total area is about 806,000 sq. m., and the pop. about 4,523,000. Capital, **Dakar** (pop. 12,000). A great part of the country is fertile and rich in produce. Chief exports (£1,625,200 in 1903, mainly to France) are gum, indiarubber, nuts, and skins; imports, 1903, £2,066,520. The Senegal is navigable 750 miles up. There is a railway 163 miles long connecting Dakar, on the coast, just south of Cape Verd, St. Louis, at the mouth of the Senegal river, and Rufisque; another, from Kayes to Bafulabeh, 82 miles, is being extended to Bamoko on the Niger.

**Senegambia and Niger Territories.** These territories were separated as a consequence of the reorganisation brought about by a decree in Oct. 1902, and consist of the district formerly dependent on Senegal and the territories of the Upper Senegal and the Middle Niger. They include the districts of Kayes, Bafulabeh, Kita, Satadugu, Bamoko, Segu, Djenneh, Nioro, Gumba, Sokoto, and Buguni on the Upper Senegal, and the country included in the bend of the Niger. The Governor-General of West Africa is represented by a Delegate resident at Kayes. Population estimated at over 3,000,000. By the Anglo-French Agreement, signed April 8th, 1904, the frontier with British Gambia was modified in such a way as to assure Yarbatanda (which lies at the head of the navigable Gambia, 300 miles from the sea) and the landing-places belonging to that locality to Senegambia. Access to the navigable portion of the Gambia river and transit for sea-going merchantmen up the river were granted to France under arrangements subsequently made. The area transferred did not exceed 50 sq. miles, and its chief importance lay in the fact that it gave access by the river to the Senegambia hinterland.

#### Colonies in America and West Indies.

**French Guiana** is in South America, on the Atlantic coast, and is bounded by Dutch Guiana on the west and by Brazil on the south. A boundary dispute with Brazil, referred to the Swiss Government for arbitration, was settled Dec. 1st, 1900. The area is about 30,500 sq. m., and the population 32,908. The capital is Cayenne (pop. 12,612). The colony is used as a penal settlement, the penal population in 1902 being about 10,000; and is under a Governor with a Council-General of 16 members. It is represented at Paris by a deputy. Off the coast of the colony lies the Ile du Diable, where Captain Dreyfus was imprisoned. The climate is unhealthy. Gold is found, and forms practically the sole export, though there are valuable forests in the interior. Imports, 1901, £488,972; exports, £351,024.

British Consul, J. R. W. Pigott, at Paramaribo, Surinam.

**Guadeloupe** is one of the principal French possessions in the West Indies, and consists of two islands, Basse-terre and Grande-terre, separated by a narrow salt-water river, with five smaller dependent islands. It is situated in the Leeward group of the Lesser Antilles. Capital, **Basse-Terre** (pop. 7838); chief town, Pointe-à-Pitre (pop. 18,942). Products: sugar, rum, coffee, cotton, cacao, bananas, etc. The colony is represented at Paris by a senator

and two deputies, and has an area of about 680 sq. m., and a total population of 182,112. It is administered by a Governor with an elected Council.

**Martinique** is a West Indian island of the Windward group. It is administered by a Governor with a General Council. It is represented at Paris by a senator and two deputies. Area, 390 sq. m.; pop. (1901) 203,781. **Fort Royal**, or **Fort de France** (pop. 22,164), is the seat of government, and St. Pierre was the chief town till the volcanic eruptions from Mont Pelée in 1902, by which the town was completely destroyed, and a great part of the island was overwhelmed. The chief products are sugar, logwood, and cocoa. Imports, 1903, £815,582; exports, £604,163.

British Consul, H. J. Meagher.

**St. Pierre and Miquelon** are the chief islands of two groups near the south coast of Newfoundland, acquired by France in 1635. They are administered by a Governor with a Council-General and municipal councils. Capital, **St. Pierre**. The chief industry is codfishing. Area of groups, 93 sq. m.; pop. 6184 in Nov. 1902. Imports, 1903, £332,245; exports, £382,110.

#### Colonies in Asia.

**French India** consists of Pondicherry and other towns, in a district the area of which is about 196 sq. miles, and the population 273,185. Population of Pondicherry (1902) 47,154. The colony is divided into ten communes, with municipal government. A Governor, who is assisted by an elective general council, resides at Pondicherry, and a senator and a deputy represent the colony in Paris. The chief exports are oil seeds. Imports, 1901, £152,000; exports, £890,000.

British Consul, Lieut.-Col. A. de C. Rennick.

**Indo-China** is the name given to the French possessions in the Annamese peninsula. They include Cochin China, Annam, Cambodia, and Tonquin. In 1900 the Kwang-Chau-Wan territory, and the islands ceded with it to France by China in '99, were placed under the Government of Indo-China. M. Beau is the Governor-General of Indo-China, and the seat of government is at Hanoi, in Tonquin. There is a Superior Council, consisting of the administrative heads of the various colonies making up Indo-China, with the military and naval commanders-in-chief and representatives of commerce and agriculture, etc., which controls financial affairs, both general and local, and advises as to all local legislation. The possessions are all united in one Customs Union. The colony is one of the most prosperous of French colonies. The army consists of about 11,000 French and 15,000 native soldiers. Agriculture is the chief industry. The chief products exported are rice, pepper, cotton, coals, tea, sugar, silk, salt, copra, hides, etc. Several important railway projects are in course of execution, or completed. One line runs from Haiphong to Viétri (98 miles), and the Government is extending it to Laokai on the frontier (140 miles), while a company will further extend it from Laokai to Yunnansen (285 miles), and work the whole line, when completed, with a capital of 101,000,000 fr., including a subvention of 12,500,000 fr. from the Indo-China Government, which also guarantees the interest for 75 years on 76,000,000 fr. debentures. See **CHINA** (Railways). Another line runs from Hanoi to

Ninh-Binh (73 miles), and on to Vinh in Annam (133 miles), and to Hué and Saigon, thus connecting Annam with Tonquin and Cochinchina. A line is being built from Saigon to Tanlinh (82 miles), and another from Hué to Turane (65 miles), beyond which a continuation to Kwang-tsi (43 miles) has been surveyed. Area about 256,500 sq. m.; population, 18,500,000, mostly Annamese. Revenue, 1900, £1,080,300; expenditure, £2,079,600. Imports, 1902, £8,606,520; exports, £7,410,660. Imports of French origin amounted to £4,328,900, and exports to France and French colonies £1,612,080.

British Consul, T. F. Carlisle, at Hanoi.

Annam became a French protectorate in '84. Area, 52,000 sq. m.; pop. 6,400,000. Capital, Hué (pop. 50,000), near the coast, garrisoned by French troops. Annam proper stretches northward along the coast from French Cochinchina to Tonquin. Coal and iron have been discovered in abundance, and there are coal mines at Turane. There is a King named Thanh-Tai, but the government is in French hands. The various peoples belong to the Indo-Chinese race, a link between Chinese and Malays. Religion chiefly Buddhism. Polygamy prevails generally.

Cambodia has been a French protectorate since '63. Capital, Phnompenh (pop. 50,000), on the Mekong. The reigning sovereign is King Norodom, but there is a French Resident at Phnompenh (pop. 50,000), and each of the subordinate provinces is under the political and administrative control of a French Resident. The cotton industry is growing steadily. Area, 37,500 sq. m.; pop. about 1,100,000, of which 200,000 are foreign Asiatics.

Cochin-China consists of a portion of the old Annamese province of Champa, and comprises the whole of the Mekong delta, but comprehends little or none of Cochinchina proper. Area, 22,000 sq. m.; pop. 2,968,529. Capital, Saigon (pop. 47,577). The country is divided into 21 districts, each administered separately by a French officer, and is represented by one deputy at Paris. The French population numbers 4323, and there is an army of occupation of 2536 French troops, besides 2667 Annamese soldiers. Successful attempts have been made to develop the colony. The chief export is rice.

Tonquin was formerly a province of Annam, but was made a French colony in '84. The name is also spelled Tonkin. It is situated to the north of Annam, and lies to the east of the Shan States of Burmah, and to the south of the Chinese province of Yunnan. Area, including the Laos territory taken from Siam in '93, 145,000 sq. m.; pop. 8,000,000. The cost of administering the Laos territory (capital Luang Prabang, with a pop. of 40,000) is shared between all the colonies making up French Indo-China. Capital, Hanoi, on the Hanoi or Song-koi river, pop. 150,000. Principal port and chief seat of trade, Hai-phong. The chief export is rice. At Hongay, near Hai-phong, and at Kebao, there are coal mines worked by French companies. Copper and iron are also mined. The country is ruled by a Resident under the French Council of Indo-China.

#### Colonies in Oceania.

New Caledonia is an island in the South Pacific, lying to the south-west of the New Hebrides. Area, 7650 sq. m.; pop. about

51,000. It is a French penal colony, and the Loyalty Islands (area 800 sq. m., pop. 14,800) to the east of it are grouped with it as a dependency. Other dependencies are the Isle of Pines (area 58 sq. m., pop. 600), the Huon Islands, the Chesterfield Islands, and the Wallis Archipelago (area 40 sq. m., pop. 4500), north-east of Fiji. New Caledonia is governed by a Governor with an elective Council-General. The penal population is about 9750. The capital is Noumea (pop. 7000). Ores and minerals (nickel, chrome and cobalt) are worked and exported. Agriculture and cattle-breeding are also carried on successfully, and coffee is an increasing export. Imports, 1902, £538,000; 1903, £544,000. Exports, 1902, £491,000; 1903, £358,000.

British Consul at Noumea, A. G. Brophy.

Other Islands in Oceania belonging to France are the Society Islands, including Tahiti (area 600 sq. m., pop. 11,000, chief town, Papeete, imports, 1903, £155,975; exports, £183,656, consisting chiefly of copra, mother-of-pearl shell, and vanilla); and Moorea (area 50 sq. m., pop. 1600); the Leeward Islands, the Tabuai, and Raiavoe Islands (area 100 sq. m. pop. 1700); the Tuamotu Islands (pop. 5000); the Gambier (area 65 sq. m., pop. 600) and Marquesas (area 480 sq. m., pop. 4280) Islands. They are all administered by a Governor and an elective Council-General of 11 members. Total area about 1500 sq. m.; pop. about 30,000. See also NEW HEBRIDES.

British Consul at Tahiti, R. T. Simons.

Francis Ferdinand of Austria, Archduke, son of the late Archduke Charles Louis, by his second marriage with the Princess Maria Annunciata, daughter of Ferdinand II., King of the two Sicilies, was b. at Gratz, Dec. 18th, 1863, and is a lieutenant-general in the Austrian army. A few years ago he inherited the large fortune of his relative, the Grand Duke of Modena, and in so doing took the name of Este. On Feb. 1st, '89, he renounced the fortune and name in favour of his brother, Archduke Otho. The Archduke has never made any great figure in Austrian society, and, of course, holds aloof from politics because of his position. By the death of the Crown Prince Rudolph and the abdication of his father, who died in '96, he became the heir apparent to the Austrian throne. On July 1st, 1900, he contracted a morganatic marriage with Countess Sophia Chotek, a member of one of the noblest Austrian families, and formally declared that neither his wife nor any children of the marriage could have the rights of equal birth or any claim to succeed to the throne. Before the ceremony the Emperor made the bride Princess von Hohenberg. There are two children of the marriage, the second, born Sept. 29th, 1902, being a boy. In Feb. 1901 H.R.H. represented the Emperor of Austria at the funeral of H.M. Queen Victoria, and in June 1902 he came to attend the Coronation of Edward VII. He was appointed a Royal K.G. in July 1902, and in June 1904 he visited England to present to King Edward VII. the insignia of a Field-marshal of the Austro-Hungarian Army.

Free Church Boys' Camps (intended for boys at the great public schools and grammar schools, and conducted by University men). Secretary, Mr. C. B. Young, Mansfield College, Oxford.

## FREEMASONRY.

The Masonry of the present day—especially British Masonry—is famous for its charity. A committee of charity was formed in connection with the Grand Lodge in 1725. This committee is now called **The Board of Benevolence**, its province being to administer the **Fund of Benevolence**. To this Fund every one initiated in a lodge under the English constitution contributes; as long as he is a subscriber to a lodge in London 4s. a year is paid by his lodge for him to this fund, and 2s. if he subscribe to a country lodge, another 2s. going to the fund of his province (though this sum varies in different provinces). In 1788 Chevalier Ruspini, surgeon-dentist to George III., established the **Freemasons' Girls' School**, now known as **The Royal Masonic Institution for Girls**, and ten years later the **Royal Masonic Institution for Boys** was started. The **Institution for the Aged** is the youngest of the three, the Institution for the Men not having been established till 1842, and for the Widows not till '49. The **Girls' School** boards, clothes and educates 278 girls, and the **Boys' School** 340 boys; while the **Benevolent Institution** grants annuities to 528 persons—£40 a year to men and £32 a year to widows; there being now 236 men and 292 widows on the funds. It is also paying about £660 a year to widows of deceased annuitants. The total receipts of these three institutions in 1903 were: Benevolent Institution, £35,421; Boys' School, £40,776; Girls' School, £35,966 11s. The roll of the Grand Lodge to Sept. 1902 showed a total of 2405 warrants for lodges under the English constitution; but this does not represent the actual number of lodges now subject to Grand Lodge, as out of this total some 446 lodges have ceased to exist since '63, while some have merged in other lodges or gone under the jurisdiction of Colonial Grand Lodges.

The United Grand Lodge of England acknowledges only two species of Freemasonry—the **Graft** and the **Royal Arch**, both of which are exceedingly powerful. Scotch, Irish, American and Continental jurisdictions acknowledge other degrees; but these, with the exception of the **Mark Degree**, are not universal—that is, they are Christian degrees, and the Jew, the Turk, the Mohammedan and the Parsee will not join them. Strong endeavours were made forty years since to induce the Grand Lodge to recognise the Mark Degree, but the attempts were unsuccessful, and the Mark Masons established a Grand Lodge of their own in 1856. It has already 562 lodges in England and Wales and the colonies, with 45,140 registered Mark Masons subject to its authority; has a large Benevolent Fund, an Educational Fund, and out of the interest of its annuity funds grants £26 a year to each of seven decayed Mark Masons and £21 a year to each of eight widows. The charitable work of English Freemasonry does not end here, because there are several provincial organisations which grant annuities to local brethren and widows, and pay the expense of educating Masons' children.

The Duke of Connaught was elected on March 6th, 1901, as **Grand Master** (in succession to King Edward VII., who resigned the office on his accession, after holding it for twenty-six years), and his installation took place on July 17th. The Grand Lodge possesses many archæological curiosities in its library and

museum, to which valuable additions are constantly being presented. Consult Mackay's "Lexicon of Freemasonry"; Kenning's "Cyclopædia of Freemasonry"; Gould's "History of Freemasonry" (6 vols.). English Freemasonry has two London weekly newspapers devoted to its interests—the *Freemason* and the *Freemasons' Chronicle*—and one monthly, the *Masonic Illustrated*. The first-named has been established 33 years, and the second 27. In America Masonic papers are numerous, and they are also known in India, Australia, New Zealand, and other colonies.

**Fremantle, Admiral the Hon. Sir Edmund R., G.C.B., C.M.G.**, was appointed Rear-Admiral of the United Kingdom and of the Admiralty thereof on July 25th, 1901. He was b. June 15th, 1836, and is a son of the 1st Baron Cottesloe. Ed. at Cheam School, he entered the Navy in '49, and has seen active service in the Burmese War '52, New Zealand '64-6, Ashanti '73-4, and East Africa '88-9. He attained the rank of Captain '67, Rear-Admiral '85, Vice-Admiral '90, and Admiral '96, and has commanded on the East Indies and China stations, and at Plymouth. He won the Royal United Service Institution's Gold Medal for the best Essay on Naval Tactics in '80, and has written lives of Hawke and Boscawen. 44, Lower Sloane Street. United Service Club.

**Fremantle, The Hon. and Very Rev. W. H., D.D.**, Dean of Ripon, was b. in 1831, and is the second son of the first Baron Cottesloe. He was ed. at Eton and Balliol College, Oxford, taking a first class in classics and holding a Fellowship of All Souls '54-64. Ordained in '55, he became curate at Middle Claydon, vicar of Lewknor, resident chaplain to Bishop of London (Tait) '61-6, rector of St. Mary's, Bryanston Square '65, Fellow and Tutor of Balliol, '82-96, and Canon Residentiary of Canterbury Cathedral '82. In April '95 he was appointed to the Deanery of Ripon. He was Select Preacher at Oxford '78-80, and Bampton Lecturer for '83, and has written several theological works.

**French, Lieut.-General Sir John D.P., K.C.B., K.C.M.G.**, is the son of a naval officer, and himself entered the Navy at the age of 14, joining the *Britannia* in 1868. But, on reaching the age of 20, he left the Navy and entered the Army, obtaining a commission in the 8th Hussars. Fifteen years later he had risen to be Colonel of the 19th (Prince of Wales's Own) Hussars. He served with the regiment in the Egyptian campaign, '84-5, at Abu Klea and at Metemmeh, gaining a medal, two clasps, and a star. On his return to England he became Staff Colonel at the Cavalry Depot, Canterbury. Next he commanded the Cavalry Brigade at Aldershot, and only relinquished this position to command the Cavalry Division of the South African Field Force. He then received the local rank of Lieutenant-General. He is not only a dashing cavalry man, but a good soldier. He did good service as soon as he arrived in South Africa. The day after he reached Ladysmith he reconnoitred in force to Modder Spruit, and successfully engaged the Boers at Elandslaagte. After leaving Ladysmith he commanded the force in the Colesberg district till he was withdrawn to lead the mounted force which so brilliantly and successfully relieved Kimberley. His work during the rest of the campaign was no less arduous and useful. During 1901 he rendered

splendid service in the operations against Botha, and later on was given charge of the forces in Cape Colony. In Oct. 1901 he was appointed to succeed Sir Redvers Buller in the command of the First Army Corps; and in 1902, after the cessation of the war, he returned to England to take up his duties. He received the Cross of the Red Eagle of Prussia, 1902, the insignia of Grand Officer of the Legion of Honour from President Loubet in 1903, and the Cross of the Iron Crown of Austria, 1904. Hon. LL.D. Cambridge, 1903; hon. D.C.L. Oxford, June 1904. See ARMY, BRITISH.

### FRIENDLY SOCIETIES.

The Friendly Societies Act, '96, and the Collecting Societies and Industrial Assurance Companies Act, '96, consolidate all the law upon the subject. An annual report of the Chief Registrar of Friendly Societies is published. The societies include Friendly Societies proper, with their branches, Benevolent Societies, Cattle Insurance Societies, Working Men's Clubs, and specially authorised societies for various purposes, and in addition to these the Registrar has to deal with Workmen's Compensation schemes, Industrial and Provident (co-operative) Societies, Building Societies, Trade Unions, certified Loan Societies, Trustee Savings Banks, Railway Savings Banks, and certain Scientific and Literary Societies certified for exemption from

rates. The Registrar has exclusive jurisdiction in the settlement of disputes with the Post Office Savings Bank and Trustee Savings Banks. The figures (see table below) give an interesting summary of the latest information available as to the various classes of societies making returns to the Registrars of Friendly Societies in the United Kingdom, and as to Savings Banks.

**Central Office**, 28, Abingdon Street, S.W.  
**Chief Registrar**, Jas. Duncan Stuart Sim (salary £1200); **Assistant Registrar**, T. Hall Hall (£700); **Chief Clerk**, G. Brown (£500).

### The Chief Friendly Benefit Societies.

These societies are mainly products of the last century, during which their spread among the working classes was remarkable. The old local clubs are being fast absorbed into one or other of these, mismanagement having led to the dissolution of many of them, and their old and infirm members being left utterly destitute after contributing for years. **Slate clubs**, however, are still very popular. They give benefits for comparatively limited periods, require but small subscriptions, and share out at the end of each year among the members whatever surplus there may be after retaining a certain agreed reserve. The great friendly benefit societies may be divided into two classes—those whose branches are affiliated to the "order" or "unity," but separately registered; and those

<b>Grand Total . . . . .</b>	47,845	48,960	27,580,585	28,611,903	367,206,280	380,204,923

that are centralised, under one board of management, and having one common fund. In the former class (of which the Oddfellows, Foresters, and Shepherds are examples) the branches are independent as regards control of their own funds and their investments, but are under the supervision of the directorate of the order, who, upon the advice of their actuaries, require them to take any needful steps to maintain solvency, or, in cases of non-compliance, after due notice, expel them. They also assist such branches as appeal to them under exceptional strain. In the centralised societies, such as the Hearts of Oak, Rational and Church Temperance, no branch can be richer or poorer than another, and all members have equal rights, privileges, and advantages in proportion to their payments, which are usually on what is known as the sliding scale, insuring from 2s. 6d. to 20s. or 30s. weekly in sickness, and £2 10s. to £20 or £30 at death. To this the Hearts of Oak is the leading exception, all adults paying the same contribution and receiving the same benefit (18s. weekly and £20 at death). All these societies registered under the Friendly Societies Act are required to be valued quinquennially, when their future as well as present liabilities and assets are worked out, and any deficiency has to be provided against. Most of the friendly societies have their own ritual and regalia, and encourage by medals or otherwise the introduction of fresh members. There are many societies of the kind attached to the different trades and professions; some of the insurance companies transact this class of business (see INSURANCE), and there are innumerable shop clubs and sick funds, some compulsory, some voluntary.

#### Church of England Temperance Benefit Society.

—Founded 1878 by the late Canon Ellison, it has since accumulated funds exceeding £48,000, and has paid claims for sickness, accident, and death of over £60,000. Membership 10,000, in over 180 lodges. Abstainers and non-abstainers in separate sections. Females and juveniles admitted, and insurance business taken. During 1903 the contributions from members amounted to £10,016 and their claims to £5738 for sickness and £561 for death; management expenses, £1622; interest on investments, £1307. Under the control of an honorary executive council, but a meeting of delegates is held annually. That for 1905 will be held at Church House.

**President**, the Lord Bishop of London; **Chief Treasurer**, Mr. B. Hobbis, Mayor of Maidenhead; **Chief Secretary**, Mr. F. A. Hazzledine; **Registered Office**, Church House, Westminster. Bankers, London and Westminster.

**Druids, Order of.**—Established 1858. Invested funds amount to £163,457; members number 82,170 (including 13,396 juveniles). During 1903 the members contributed £71,000 to the sick and funeral funds, £11,417 to the management fund, £4000 for medical aid, hon. members and widows and orphans £2613; while they received £52,079 in sick benefits, £12,023 for deaths, medical aid cost £4645, and management £12,427, and £2082 was granted to widows and orphans and benevolent fund, and £2894 paid for district levies. **Grand Master**, Bro. R. W. Mason (Oswestry); **Grand Secretary**, Bro. John Westall, Great John Street, Lower Byrom Street, Manchester.—**The United Ancient Order of Druids** has a membership of 120,009, and a capital of £674,519. Its receipts for sickness and death amounted to £219,900, and its pay-

ments to £138,735. **General Secretary**, George E. Ricketts.

**Foresters, Ancient Order of.**—The earliest notice of Forestry may be said to be a list of members made in "Court No. 1" of the "Ancient Royal Order of Foresters" in the parish of Leeds, date 1790. General laws for the rule of Forestry were sanctioned on June 3rd, 1816; but the life of this "Royal Order" was practically cut short in '34, when, as the result of a momentous meeting at Rochdale, no less than 294 courts of the latter were incorporated in the Ancient Order of Foresters. Mr. G. F. Mandley became its first **High Chief Ranger**. Salford was the meeting-place of the first **High Court** ('35), when it was notified that 16,510 members had received certificates. In '32 Forestry was introduced into the United States, and there, as well as in Canada and Australasia, it has thriven. In '40 the first **Juvenile Foresters' Society** was formed, in Hull. It provided for funeral benefits only. An Order insurance fund was floated in 1902. At the end of 1903 the total membership was 929,720 (a net decrease of 3107 during the year), comprising 745,242 male adult benefit members, 9147 female members, 24,352 contributing widows, 22,241 honorary members, and 128,738 juvenile members. During that year, in the United Kingdom only, the Order paid for 9,028,919 days' sickness, or an average of 13'40 days per member, being an increase of '21 day on the 1902 average, while 103,608 members received one or more payments of sick allowance. The amount received in contributions, etc., and interest was £1,236,603, and that spent in sick, death, and other benefits, £841,186. No returns were furnished by 22 Courts (2534 members). There were 2039 members subscribing for old age pensions. The funds of the Order amount to £7,766,586, the net gain in funds in 1903 being £329,142. It has opened 185 Female Courts. The valuation recently completed shows an increase of liabilities in the last five years of 7 per cent., but a growth in assets of 12 per cent. The official magazine is *The Foresters' Miscellany*, published monthly. Reports are published quarterly by the Executive Council, and an annual report is issued called *The Foresters' Directory*, containing about 750 pages. The High Court will meet in 1905 at Newcastle-on-Tyne. **High Chief Ranger**, Bro. Wm. Simm; **Secretary of the Order**, J. Lister Stead, F.C.I.S., P.C.R.; **Central Office**, Oxford Street, Newcastle-on-Tyne.—**The Independent Order of Foresters** is a fraternal assurance society, providing life policies, old-age and disability benefits for its members. It is over 30 years old, and is worked on the lodge system. Its headquarters are at Toronto, Canada, but it is spreading in Great Britain and British Colonies, having now over 250,000 members. Its insurance benefit fund amounts to £1,448,005, and its sick and funeral fund to £20,793. **Gen. Manager and Supreme Chief Ranger**, Dr. Oronhyatekha; **Supreme Secretary**, J. A. McGillivray, K.C. **Head Office for Europe**, 24, Charing Cross, S.W.

**Free Gardeners, National United Order of.**—Established 1823, at Oldham, Lancs. Membership: adults, 62,788; juveniles, 9890; in 100 districts and 632 lodges. Total capital, £239,567. Contributions: sick and funeral fund, £75,138; management, £19,560. Paid for sick and death claims, £67,439; for benevolent, medical, and management funds, £8,140;

surplus, £8248. Its strength lies mainly in the North and Midlands, and it provided Redcar with a lifeboat. **Grand Master**, M. A. Drewry (42, Franklin Street, Hull); **General Sec.**, H. T. Finch. **Registered Office**, Grange House, Grange Road West, Middlesbrough.—There is also the **British Order of Ancient Free Gardeners**, with 56,500 members and £235,000 capital (office at Glasgow), and the **St. Andrew Order**, with 23,700 members and £44,000 capital.

**Hearts of Oak**.—Instituted June 1842. Limited to persons (not being miners) under 30 years of age when joining and (unless juveniles) earning not less than 24s. weekly. Number of members 277,500. The gross receipts in 1903 amounted to £623,320, of which £176,500 was added to the reserve fund, making a total of £2,850,000. The payments for sick allowance were £304,600, and death £53,230. The cost of management was 4·68 per cent. of the gross income. Over half of the investments are in ground rents. The Society sent 1898 members to convalescent homes, and relieved 1595 cases of special distress. It also maintains a lifeboat. Since its commencement it has paid claims to the amount of £7,135,151. The **Juvenile Society** was founded in 1887, and has 10,000 members. Its receipts for 1903 were £10,716, and disbursements £3927 for sickness and death. Total expenditure £19,105. Reserve fund £25,555. The **Executive Council** consists of 20 members, elected biennially. **President**, Mr. G. Unwin (London); **Secretary**, Mr. C. W. Burnes; **Offices**, 17, Charlotte Street, Fitzroy Square, W.

**National Deposit**.—Founded 1868, became "National" '72. Admits males between 7 and 55 and females between 7 and 50 in classes. The society differs from other societies in that members who receive no sick benefit receive back a certain proportion of their contributions. The sick benefit receivable is calculated on a member's deposit and class. The average annual sickness is less than three days per member. Number of members, 103,735; invested capital, £450,000. In 1903, £115,947 was received in contributions, and £44,959 in deposits (£22,898 withdrawn); while £32,954 was paid for sickness, £13,066 for medical aid, £1528 as old-age pay, and £937 towards funerals. Members' balances amounted to £335,149. **President**, The Duke of Northumberland, K.G.; **General Secretary**, Mr. C. Tuckfield. **Head Office**, 37, Queen Square, Holborn, W.C.

**Oddfellows, Independent Order of** (Manchester Unity).—One of the oldest of the friendly organisations. During the past quarter of a century this Society has received in contributions from its members £19,047,747 4s. 1d., and paid them for sick and funeral claims £18,413,380 6s. 11d., while the capital funds have earned over £6,000,000. At the end of 1903 the total adult membership (male and female) was 869,680, an increase of 7007 during the year. The Unity comprises 4920 lodges, divided into 458 districts. It has also 117,897 juvenile members. **Total capital** of the Order, belonging to Society, Districts and Lodges, amounts to £12,098,473 6s. 11½d. **Receipts** (1903)—contributions to sick and funeral fund, £985,204 2s. 4d.; interest, £380,748 14s. 6d.; admissions, £1434. **Expenditure**—sickness benefits, £767,289 0s. 11d.; funerals, £141,746 10s. 6d. Excess of receipts over expenditure was therefore £458,352 2s. The official publication is the *Oddfellows' Magazine*. The "A.M.C." will meet at Plymouth in 1905. **Grand Master**, E. F. Hind, Oxford House,

West Park, Chesterfield; **Secretary**, Thomas Collins; **Assistant Secretary**, Walter Collins, 97, Grosvenor Street, Chorlton-on-Medlock, Manchester.—There are also the **National Independent Order of Oddfellows**, with an adult membership of 63,727, a juvenile membership of 10,766, and a total capital of £335,058; the **Nottingham Ancient Imperial United Order**, comprising 41,293 adults and 5828 juvenile members, with a capital of £220,029. **Secretary**, W. A. Staton. The **Grand United Order**, with a total membership of 335,530, and funds amounting to £1,260,000. **Chief Secretary**, George Wilde, 24, Devonshire Street, All Saints, Manchester. The **Ancient Noble Order of United Oddfellows** (Bolton Unity), with 23,000 adult and 4000 juvenile members, and a capital of £97,500. **Secretary**, William Metcalfe, 96, Lancaster Avenue, Fennel Street, Manchester. The **British United Order**, with a membership of 17,530, and a capital of £54,200; and the **Improved Independent Order** (London Unity), with 7793 members, and £38,621 capital.

**Rational Association**.—Founded in Manchester in 1837 by Robert Owen, the "father" of the co-operative movement, and had at the close of 1903 a capital of £484,700, and a membership of 115,494, divided into 860 branches. "Governed by working men for working men," through delegate meetings, and has one common fund, which provides for sickness, deaths of members and their wives, relief of their widows and orphans, and payment of their contributions while sick. During 1903 the members contributed £113,080, and £70,244 was paid for sickness, £12,466 for deaths, £2908 for sick members' contributions, and £350 granted to widows and orphans. The management cost £4324, but the interest accruing from investments was £12,061, and there was a balance of over £28,000 in favour of the sick and funeral fund. **General Treasurer**, Councillor W. H. Beastow; **General Secretary**, Mr. J. Duncan; **Assistant Secretary**, Mr. J. W. Wootton. **Registered Offices**, Rational Buildings, Bridge Street, Manchester.

**Rechabites, Independent Order of**.—This is a total abstinence friendly society formed in 1835, and now possessing a membership of 200,000 adults (13,500 female) and 140,000 juveniles (36,000 female), including 35,000 in the Colonies; arranged in 5000 "tents" or branches. During 1903, 197 were opened and over 22,000 members added. The capital amounts to £1,500,000. The year's income from all sources was £367,000, and the payments for sickness, £146,000; for funerals, £20,000, for medical aid, £34,500; for other benefits, £6200; and management £50,000; altogether, £257,000. **High Chief Ruler**, Duncan Kirkwood (Belfast); **High Secretary**, Richardson Campbell; **Head Office**, 26, Bury New Road, Manchester.

**Royal Standard**.—This society, established in 1828, has a membership of 8361, and invested capital to the amount of £137,300; while it has paid £895,000 for sickness, death, and other claims. During 1903 the contributions from members reached £19,373 and the disbursements for sickness and death, etc., to £23,383; but £4934 accrued from interest and ground-rents, nearly £500 from fines, and the management cost £1615. **President**, Mr. A. Robinson; **Secretary**, Mr. W. Osborne Croft; **Offices**, 40, Great Ormond Street, Bloomsbury, W.C.

**Scottish Mechanics, Independent United Order of**, consists of 33 adult and 13 juvenile lodges.

The sixteenth annual report shows that the number of members was 7000, total sick funds £26,177 (an increase of £215); sick expenditure for 1903 £5804, funerals £907. **Grand Master**, George Smith; **Grand Secretary**, Thomas Gillies, 130, Causewayside, Edinburgh.

**Shepherds, Loyal Order of Ancient** (Ashton Unity).—Took its name from the fact of its founders having held their first meeting on Christmas Day (1826), at Ashton-under-Lyne. The ordinary membership is 126,769. There are also 33,738 juveniles, and 63,500 wives and widows. The total funds to the society's credit amount to £823,963 18s. 7d. During 1903 the receipts for sick and funeral, distress, medical aid, widow and orphan, management, juvenile, and extra funds amounted to £200,937; and the payments for sickness (£85,306), death (£19,196), and the other objects to £143,494, showing a gain on the year (including £19,640 interest from investments) of £57,443 4s. 5d. The annual meeting of 1904 was held at Hanley in Whit Week. **Chief Shepherd**, Bro. George Rose (Stoke-on-Trent); **General Treasurer**, George Cromar (Wrexham); **General Sec.**, John McNicol; **General Offices**, 274, Oxford Road, Manchester.—**The Ancient Order of Shepherds**, with 16,348 members and a capital of £99,977, received in contributions £12,887, and paid for sickness and death £10,824.

**Sons of Temperance** (National Division).—Established about 1854. Adult membership, 64,729 (in 751 divisions, forming 35 grand divisions), an increase on 1902 of 5331. There are also 39,330 cadets, who increased by 7764. The grand divisions, at the close of 1903, had in

hand benefit funds amounting to £262,554, the subordinate divisions benevolent funds stood at £4972, and the management funds at £6159—a gross total of £273,685. Sickness during 1903 cost the Society £37,353; accidents, £4703; deaths, £5327; doctors' fees, £4941. The cadet benefit funds amounted to £16,952. The mortality was under 6 per 1000. Managed by an executive council of twelve. Annual session of 1904 held at Oxford on Whit Monday. **Patriarch**, Wm. Scott (Winlaton); **Treasurer**, Councillor M. Gill (Penistone); **Patron** of Cadets, William Mees; **Scribe**, William Wightman, 26, Canterbury Road, Brixton, S.W.

**Teachers' Provident Society**. Has a membership of 8624, and a capital of £113,000. Received in contributions £36,871, and paid for sickness and death £4516.

**United Patriots' National**.—This society has now some 400 registered branches, divided into 16 districts, and numbers 28,082 members. It was enrolled Feb. 1843, since which time it has expended £723,000 for sickness and death, and has accumulated a capital of £160,000. During 1903 its total receipts from its branches amounted to £39,200 and its payments for ordinary and permanent sickness, funeral allowances, losses by fire, and relief of distress, £33,851. Its management expenses were more than balanced by the interest on its investments. The **General Committee** consists of one member from each district. A conference of delegates held quinquennially. **General Secretary**, Mr. Harry Wheeler; **Chief Office**, 64, Lamb's Conduit Street, W.C.

## G

**Game Laws**. Animals *feræ naturæ* (wild animals) are not in English law subjects of property, and therefore are not protected by the law of larceny. Special statutes, accordingly, have been enacted for the preservation of game, and these are known as the game laws. Game, as a legal term, comprises hares, pheasants, partridges, grouse, heath or moor game, black game and bustards (1 and 2 Will. IV., c. 32, s. 2). By the Ground Game Act, '80, it is provided that the occupier of land (the tenancy of which has been created since Sept. 7th, '80) shall have the right to kill ground game (hares and rabbits) thereon equally with the landlord, and shall be unable to alienate this right; but he may authorise certain others to kill his game.

### GARDEN CITIES.

Garden cities are settlements designed to enable workmen and others to live in healthy, uncrowded homes close to their work. The idea is one which has long possessed the minds of philanthropists and thinkers. One of the earliest attempts to put it into practice was the foundation, some few years ago, by Messrs. Lever Brothers, of the model village of Port Sunlight, on the Mersey. The plan was advanced a step further by Mr. George Cadbury, who placed in the hands of trustees an estate at Bournville, near Birmingham, for the benefit of the future residents, and expressed willingness to advance money to his own employees

and others for the erection of suitable dwellings on Building Society principles, with the addition of restrictions, whereby a certain amount of land shall always be kept clear round each dwelling, the power ever to erect other buildings upon the land being withheld.

The scheme for the founding of garden cities was first introduced by Mr. Ebenezer Howard, in his book "To-Morrow," published in '98. The "Garden City Association" was founded in '99, and during 1902 a limited liability company (the Garden City Pioneer Co., Ltd.) was formed—Mr. Cadbury, Mr. Alfred Harmsworth and Mr. W. H. Lever being amongst the subscribers—with a nominal capital of £20,000. This company was promoted to take initial steps, including the formation of a larger company, with a view to carrying out Mr. Howard's programme. **Organising Sec.**, G. J. H. Northcroft. **Office**, 347-51, Birkbeck Bank Chambers, London.

In September 1903 the present Garden City Company was formed, with a capital of £300,000, of which over one-third has been subscribed, and an estate of 3818 acres was purchased, near Hitchin, at a cost of about £40 per acre. There are two villages on the estate and a large number of buildings, the insurance value of which has been estimated at over £80,000. The estate, which is in a ring fence, may therefore be regarded as having been purchased at a reasonable figure. After the com-

pletion of the purchase the directors of the Company prepared a scheme for the development of the new town, and have already carried out a large part of the work of development, with the aid of expert engineering, architectural, and other advice. The whole of the estate was contoured, and the town laid out in relation to the existing features. After the completion of the plan, in the early spring of 1904, the directors began to construct roads, waterworks, and sewerage works, and to let plots of land for factories, residences, etc. The water and sewerage works are completed, and from two to three miles of roads are already laid out. Gasworks are in course of construction, and a temporary railway station has been made at the centre of the property, including a good siding. The Company expended over £20,000 during the winter of 1904-5 in development, and arrangements have been made to introduce banking, postal, and other facilities, so that the benefits of a town population can be secured along with the advantages of country life.

Sites for over 200 houses have been let, and arrangements have been made to erect workmen's cottages as required by manufacturers moving their works to the city. Of the latter six have definitely selected sites, including Messrs. G. Ewart & Co., Geyser Manufacturers; Messrs. Idris & Co., Ltd., Mineral Water Manufacturers; Messrs. The Garden City Press, Ltd., Printers; Messrs. Vickers & Field, Asphalt Manufacturers; Messrs. The Garden City Laundry Co., Ltd.; and Mr. A. Wilme Collier, Stationery Manufacturer; while a large number of firms, some of which employ hundreds of workmen, are considering the question of removal. A number of houses have been built, all of which are let, and a large number of plans are prepared for the erection of residences and cottages. The Company has not considered it desirable to push forward building operations until the necessary facilities were established; and now that these are well advanced it is probable that building operations will proceed very rapidly, and that a large population will be established in the Garden City within the next two or three years. A large number of those who are interested in social reform are taking up land in the new town, either for erecting country cottages with a large garden attached, or for small holdings. The experiment has now reached a stage when it is practically certain of success.

An Association des Cités-Jardins de France has been formed for the purpose of founding *villes industrielles* in France.

#### GAS UNDERTAKINGS.

The latest returns issued by the Board of Trade relate to the year ended Dec. 31st, 1902, for Companies' authorised undertakings, and to the year ended March 25th, 1903, for undertakings of Local Authorities. The main figures are as set out below:—

	Companies.	Local Authorities.
Number of undertakings . . . .	454	256
Capital Authorised . . . .	£91,594,055	£41,980,280
" Paid up and		
Borrowed . . . .	£77,129,037	£35,738,023

	Companies.	Local Authorities.
Receipts . . . .	£17,205,092	£9,554,984
Expenditure . . . .	£13,167,186	£7,215,502
Coal, Carbonised (tons) . . . .	8,520,004	5,589,215
Gas made (1000 c. ft.) . . . .	99,676,048	60,902,739
" (sold) . . . .	91,956,323	55,776,260
Gas Mains (miles) . . . .	17,512	11,632
No. of Consumers . . . .	2,197,987	1,970,738
" Public Lamps Lighted . . . .	333,308	294,828

In the "Gas Directory" published in 1904 (Messrs. Hazell, Watson, & Viney, Ltd.) particulars are given of the following gas undertakings:—

	Local Authorities.	Private Capital.
England . . . .	190	960
Wales . . . .	19	69
Scotland . . . .	52	208
Ireland . . . .	22	89
Foreign Companies with London Offices . . . .	..	24
Colonial ditto with London Offices . . . .	3	35
Total . . . .	286	1385

According to the *Gas World Year Book* there are 1232 gas undertakings in England, 257 in Scotland, 109 in Ireland, 135 in Australasia, 49 in Canada, 15 in other British possessions, and 21 British companies owning gas works abroad. The London Postal District is supplied with gas by 11 companies, which provide annually nearly 42,000,000 of cubic feet to over 800,000 customers. Slot meters and gas-cooking stoves are growing in public favour. Water-gas plant has been erected at 101 places, and is equal to manufacturing over 151,000,000 of cubic feet of gas every 24 hours.

**Geikie, Sir Archibald, F.R.S., hon. D.Sc.** (Camb. and Dublin), LL.D. (Edin., Glasgow, and St. Andrews), D.C.L. (Oxon), was b. at Edinburgh, 1835. Ed. at the High School and the University. Appointed to the Geological Survey in '55. On the extension of the Survey in '67 he was appointed director of the Survey of Scotland, and in Dec. '70 was nominated by Sir Roderick Murchison as first occupant of the chair of Mineralogy and Geology, founded in the University of Edinburgh by Sir Roderick and the Crown. From '81 till 1901 he was Director-General of the Geological Survey of the United Kingdom, and Director of the Museum of Practical Geology, London. Sir Archibald has been Foreign Secretary of the Royal Society, President of the Geological Society, and President of the British Association. In 1903 he was elected General Secretary of the Royal Society. He has written numerous works on geology, literary essays, and a volume of "Scottish Reminiscences." He is a Governor of Harrow School, Honorary Member of the Institute of Civil Engineers, a Correspondent of the Institute of France, Foreign Member of the Academy of the Lincei at Rome and of the Royal Academies of Berlin, Vienna, Stockholm, Christiania, Brussels, Göttingen, Munich,

the National Academy, Washington, etc. Town address: 10, Chester Terrace, Regent's Park, N.W., and Athenæum Club.

**Gentlemen-at-Arms.** A bodyguard to the sovereign instituted in 1509 by Henry VIII., and the oldest corps in H.M. service except the Yeomen of the Guard. Its members were "chosen of Gentlemen that be comen and extracte of Noble Blood." Towards the close of last century it fell into great degeneration, and the posts were systematically bought and sold. But the corps is now of a far higher social standard. It contains over forty members, all of them ex-commissioned officers of distinction. It is only mustered for duty on such occasions as drawing-rooms, levées, and great state ceremonies. The captain of the corps changes with the Ministry.

**Geological Survey.** This organisation was founded by Sir H. T. De la Beche, who commenced work single-handed in the south-west of England about 1830. The Geological Survey was officially recognised as a branch of the Ordnance Survey in '34. In '45 it was placed under the Office of Woods and Forests, and in '54 under the Department of Science and Art, now the Board of Education. A detailed summary of the progress of the survey is issued annually. The entire geological survey of England on the old series one-inch ordnance maps (scale 1 : 63,360) has been completed, with the exception of the drifts; the six-inch (scale 1 : 10,560) has been used for coal-fields and other important districts. The Geological Survey of the South Wales, Nottinghamshire and Derbyshire coal-fields on the six-inch scale is in progress, and the re-survey of Cornwall has been well advanced. The drifts were formerly neglected; but for many years past these have been mapped, and hence many sheets are issued in two editions—one showing the solid geology, while the other, or drift-map, shows the superficial deposits. The work is now published on the new series one-inch ordnance maps. An index map (scale 4 miles to 1 inch) has been issued, and is now printed in chromolithography, all the maps of the Survey issued up to '96 having been hand-coloured. The large survey maps are illustrated by horizontal and vertical sections, and by explanatory memoirs. The geological survey of Scotland was commenced in '54, and that of Ireland in '45. The geological map of Ireland on the one-inch scale has been completed, with the exception of the detailed mapping of the drifts; but a small staff is retained at the Dublin office and a detailed survey of the drifts has been commenced. The areas around Dublin, Belfast, and Cork have been surveyed, and that around Limerick is in hand. The Scotch survey is engaged partly on complicated work in the Highlands, and partly in the re-survey of the Scottish coal-fields. The maps of the Geological Survey can be obtained from the agents who sell the maps of the Ordnance Survey (*q.v.*). The survey of each country was formerly placed under a director, and all united under a director-general. The successive director-generals have been Sir H. T. De la Beche ('45-55), Sir Roderick I. Murchison ('55-72), Sir A. C. Ramsay ('72-81), and Sir A. Geikie ('81-1901). The title of director-general was abolished in 1901; and the Survey, with the associated Museum of Practical Geology, is now placed under a director. The present director is Dr. J. J. H. Teall. Office: 28, Jermyn Street, S.W.

## GERMANY.

The German Empire is a confederation of German states under the presidency of the Emperor William II., of Hohenzollern, King of Prussia. According to the constitution of April 16th, 1871, all the states of Germany form an eternal union; the direction of political and military affairs is vested in the Emperor, who may declare war, but if it is not defensive, the consent of the Bundesrath, or Federal Council, is required. The Imperial Army is under the supreme generalship of the Emperor, and there is a Minister of War for each of the four kingdoms, the Prussian War Minister being also Minister for the smaller states. The legislative functions of the empire are vested jointly in the Reichstag and the Bundesrath, and the Emperor has no veto on laws passed by these bodies. The latter, which represents the individual states of the empire, as the Reichstag represents the German nation, consists of 58 delegates, appointed by the governments of the individual states for each session. Of these, 17 sit for Prussia, 6 for Bavaria, 4 each for Würtemberg and Saxony, 3 each for Baden and Hesse, 1 each for Mecklenburg-Schwerin and Brunswick, and 1 each for the remaining states, including Hamburg, Lübeck, and Bremen. Alsace-Lorraine is represented by four Commissioners, who, however, may not vote. Of its functions, it may be said that the Bundesrath is mainly a confirming body, although it has the privilege of rejecting measures passed by the Reichstag. It has also a limited initiatory power, which it occasionally exercises. Members of the Bundesrath have the right of appearing in the Reichstag, and of speaking on any question in which the state they represent is directly interested. Members of the one chamber, however, are not eligible for election to the other, although they may sit in their respective provincial diets. The Reichstag is composed of 397 members, elected by universal suffrage and ballot for the term of five years. Of these 236 constitute the elected of Prussia, 48 represent Bavaria, 23 Saxony, and the remainder the other states in due proportion, ranging from 1 to 17.

### The Army.

The administration and command of the army are exercised through the great general staff, a most powerful and efficient organisation, by which the work of the army is prepared for in peace and moulded in war. It is at once a close and yet flexible organisation, which permeates the whole structure of the army, consisting for Prussia of about 200 officers. Nearly 100 of these are detached on service with the staffs of corps or divisions, while the remainder constitute the great general staff in Berlin. There is constant interchange between regimental work and staff work, and between the latter locally and with the headquarters' staff in Berlin. Scarcely any regimental officer rises high in his corps without having been called to staff service; so that the ideas of the staff are based upon practical experience, and react upon the whole army, to which they come as a kind of tradition of duty and policy, sharpening and directing the life and work of the army. Recently the inspection of the cavalry and artillery has been improved.

The forces are organised in 20 army corps (including the Guard Corps, and there are in

addition three Bavarian corps), and comprise 625 battalions of infantry, 482 squadrons of cavalry, 574 batteries of artillery, 38 battalions of foot artillery, 26 battalions of pioneers, 23 battalions of train, with a peace strength of 84,366 officers, 82,073 non-commissioned officers, 2,000 one-year volunteers, and 495,500 men. The estimates of 1905 provide for a progressive increase, whereby in the year 1910 the peace footing will be 505,839 privates and corporals, being an increase of 8 infantry battalions, 9 cavalry regiments, 2 battalions of foot artillery, 3 pioneer battalions, and 1 battalion of telegraph troops. The contingent annually embodied approaches 275,000 men. The service in the standing army is of six years, two of these with the colours in the infantry and three in the cavalry and horse artillery, and the rest in the reserve. A Bill has been brought in by the Federal Government to make the short service applicable to all arms. After quitting the reserve of the Active Army the soldier passes five years in the Landwehr and seven in its reserve.

The *North German Gazette* published (Nov. 28th, 1904) the text of a Bill, to be introduced during the 1905 Session, for increasing the annual strength of the German Army on a peace footing until it reaches the number of 505,839 men during the financial year 1909, at which figure it is to be maintained up to March 31st, 1910. According to the Bill, the several German States will by the year 1909 be contributing to the proposed strength of the peace footing of the German Army in the following proportions: Prussia, 392,979 men; Bavaria, 55,424 men; Saxony, 37,711 men; and Wurtemberg, 19,725 men. By this increase in the strength of the peace footing, it is calculated that at the end of the financial year 1909 the number of battalions of infantry will have been raised to 633, the number of squadrons of cavalry to 510, the number of batteries of field artillery to 574, the number of battalions of garrison artillery to 40, of pioneers to 29, of transport troops to 12, and of the army service (train) to 23.

The recruiting service of the Guard, consisting of the tallest and finest-looking men, is carried out by a committee consisting of officers specially nominated for the purpose. Under the system of recruiting there are always more men than are necessary to keep up the army strength, the surplus constituting the *Ersatz Reserve*.

The strength upon mobilisation has been estimated at 2,310,000 infantry, 151,000 cavalry, 329,000 artillery, 78,000 technical troops, 168,000 other formations, making a total of 3,036,000, trained men, but this number has now been further increased to 3,224,000.

### **The Navy.**

The Navy of the German Empire is under the supreme command of the Emperor, who takes a personal interest and direction in all matters pertaining to the Fleet. Questions concerning organisation, shipbuilding, changes in armament, and progress generally, are brought before his Majesty as the Chief of the Navy for decision. The Emperor is supplied, as a medium for executing his commands, with a Naval Cabinet, with a flag officer at its head. All matters concerning the promotions, appointment of officers, etc., are dealt with by this Cabinet. There are two other central

authorities, one of which has as its President the Secretary of State for the Navy, who represents the Navy in Parliament, and in whose office matters of organisation and administration are dealt with, and the other is the Admiral Commanding in Chief, under whose direction are the movements of vessels and squadrons. Orders and regulations concerning the Navy are issued by the Emperor himself, and they may be countersigned either by the Imperial Chancellor or the Naval Secretary of State. The department of the Naval Secretary of State consists of several branches, not unlike those in the British Admiralty, such as the Constructive Department, the Ordnance Department, and the Hydrographical Department. In the same division is the Department of Intelligence. In the office of the Admiral Commanding in Chief the business is that of war, and its preparation; a Chief of the Staff is at the head of various sections, engaged in drafting reports or making recommendations and suggestions upon such matters as training and education, plans of operations, studies of foreign navies, mobilisation, the political work of the Navy, and so on. Each section has at its head a naval officer, who is on the staff of the Commander-in-Chief.

Comptroller, Vice-Admiral Diederichsen.  
Director of Works, Rear-Admiral von Ahlefeld.  
Director of Construction, Rear-Admiral von Eickstedt.

Director of Ordnance, Captain Goetz.  
Accountant-General, Captain Capelle.  
Chief of the General Staff, Vice-Admiral Buchsel.

Chief of the Naval Cabinet, Admiral Baron von Senden-Bibran.

The men for the Navy are obtained by general conscription and voluntary enlistment. If the conscripts among the maritime population should not suffice for the wants of the Navy, resource is had to conscripts living on the islands and coasts of the Baltic and North Sea, or those connected with river and canal shipping. In addition to the recruits levied by conscription boys are entered voluntarily and engaged for nine years' term of service. The petty officers of the Navy are as a rule drawn from the ranks of those who enter as boys. The Naval Estimates are prepared every year by the Naval Secretary of State, and after being examined by the Imperial Exchequer are submitted to the Federal Council, and as passed by the Council are submitted to the Reichstag in the name of the Emperor. The principal discussion of the estimates takes place as a rule in the month of January, the financial year commencing on April 1st and ending on March 31st of the next year.

The total of the German Naval Estimates as proposed for 1905 is £10,216,900 (204,338,000 marks), the sum voted for the previous year having been £10,477,556 (209,551,124 marks). The sum to be devoted to shipbuilding in 1905 is £3,503,500 (70,070,000 marks).

The number of officers and men on the active list in 1904 was 35,352. Provision is made in 1905 for 38,025. The total number of able-bodied men liable for service in the Reserve is about 70,000.

The executive officers of the German Navy are divided as follows:—5 admirals, 7 vice-admirals, 17 rear-admirals, 63 captains, 137 commanders, 277 lieutenant-commanders, 772 lieutenants, 368 midshipmen, and 150 cadets.

The strength of the German Navy in ships built and building on Nov. 30th was:—

**Built.**

Battleships, 1st class . . . . .	16
do. 2nd class . . . . .	4
do. 3rd class . . . . .	12
Coast defence ships . . . . .	11
Armoured cruisers . . . . .	4
Protected cruisers, 1st class . . . . .	1
do. do. 2nd class . . . . .	8
do. do. 3rd class . . . . .	14
Unprotected cruisers . . . . .	20
Torpedo vessels . . . . .	2
Torpedo-boat destroyers . . . . .	37
Torpedo boats . . . . .	86
Submarines . . . . .	1

**Building.**

Battleships, 1st class . . . . .	6
Armoured cruisers . . . . .	3
Protected cruisers, 3rd class . . . . .	3

**Projected.**

Protected cruisers . . . . .	3
Torpedo-boat destroyers . . . . .	6

The German dockyards are situated as follows:—

**Kiel.** Two docks take any ship. Also two floating docks. Four docks take any ship up to 10,000 tons.

**Wilhelmshaven.**—One dock takes any ship; one takes up to 10,000 tons. Three floating docks; two new ones building.

The launches of German vessels during 1904 include the following:—**Battleships**, *Lothringen*, at Dantzig, on May 27th, and *Deutschland*, at Kiel, on Nov. 19th; **Armoured cruiser**, *York*, at Hamburg, on April 25th; and **Protected cruisers**, *Lubeck*, on March 27th, at Stettin, and *München*, on May 30th, at Bremen.

The vessels completed include the battleships *Braunschweig* and *Elsass*, the armoured cruisers *Prinz Adalbert* and *Friedrich Karl*, and the protected cruisers *Hamburg*, *Bremen*, and *Berlin*.

A new naval station has been created at Sonderburg, in the Baltic. The gunnery training-ships, which were formerly stationed at Kiel and Wilhelmshaven, have been removed to the new station.

Combined naval and military manoeuvres took place in the first two weeks of September. Under the ægis of the Fleet a strong expeditionary force was embarked, and landed at Altona, where fighting took place. The Fleet afterwards carried out tactical exercises in the North Sea.

The Fleet was reorganised by an Imperial Order in October. The active squadron was divided into two divisions, each under an admiral and the whole under the orders of the Commander-in-chief.

### Religion, Education, etc.

Owing to its federal constitution, the relations of Church and State vary in different parts of the empire, but liberty of conscience prevails. The Jesuit Law of 1872 excludes from the Empire the Order of the Society of Jesus and kindred orders in their corporate capacity, though the clause giving power to expel individual members of these orders was repealed in 1904. The Protestants form 62½ per cent. of the population, and Roman Catholics, with adherents of the Greek Church, 36½ per cent., Jews making up 1 per cent. of the remainder. Education is general and com-

pulsory throughout the empire for children of from 6 to 14 years. A Consular Report (1904) stated that the expenditure on elementary schools in the German Empire in 1902 was £20,759,900, of which £6,017,850 was paid by the State. There are elementary schools, supported from the local rates, in every town and village; and besides the elementary there is an admirable system of secondary education, including continuation schools for the working classes, middle schools for business life, gymnasia for the universities and learned professions, with modifications where necessary in favour of modern subjects and modern languages, and special schools for technical education. There are, besides, 21 universities in the empire. Uniform codes of civil, commercial, and criminal law prevail throughout the empire. The lowest courts are the *Amtsgerichte*, each with a single judge trying both civil and criminal cases. Above these are the *Landgerichte*, with a more extensive jurisdiction, including a criminal chamber with five judges and jury courts. The *Oberlandesgerichte* are the courts of second instance, and the supreme court (*Reichsgericht*), with 92 judges, appointed by the Emperor on the advice of the Bundesrath, sits at Leipzig.

### Newspapers.

The organ of the Government is the *Reichsanzeiger*, or *Imperial Gazette*. In Berlin the principal papers are: The *Vossische Zeitung*, organ of the Liberal party (London correspondent, Mr. Maurice Sasse); the *Berliner Tageblatt* (London correspondent, Mr. Otto Brandes); the *Lokalanzeiger* (London correspondent, Mr. Stiehlow), which possesses the largest circulation, but does not boast any political standing; and the *National Zeitung* (which, however, it is stated, will shortly be discontinued). In the provinces there are many papers of great importance. The *Cologne Gazette* takes rank somewhat similar to a combination of the *Times* and *Manchester Guardian*. In politics it is Liberal, with friendly leanings to the Government, who use it for the transmission of official news. The *Hamburger Nachrichten*, the *Augsburger Allgemeine Zeitung*, and the *Correspondent*, are also influential provincial journals. The *North German Gazette* is a well-known semi-official organ used largely by the German Chancellors. Editor, Herr Hugo Jacobi. The Socialists control a large section of the German press. Their principal daily paper is the *Vorwärts*. Amongst the leading illustrated journals are the *Leipziger Illustrirte Zeitung*, the *Gartenlaube*, and the *Woche*. Amongst the comics there are the old-established *Fliegende Blätter* of Munich, which is strictly non-political, the *Kladderadatsch* of Berlin (the German *Punch*), and the *Lustige Blätter*.

### Industries and Trade.

Agriculture is a very considerable industry, supporting about 19,000,000 of the population. The mining, metal works, textile (see TEXTILE INDUSTRIES) and other manufacturing industries employ and support a still larger number, and the chief articles exported are iron and iron goods, groceries and food products, drugs and chemicals, wool and woollen goods, cotton and cotton goods, anthracite coal and coke, instruments, machines and vehicles, earthen, ores, and precious metals, hardware, literary and art objects, fancy goods, clothing, silk and silk

goods, etc. Forestry and mining are both industries of great importance. The industries of the country have been developed enormously in recent years, and in actual tonnage the shipping of Germany stands second in the world. It possesses the fastest ocean liner afloat (see *MERCANTILE MARINE*). The chief imports are corn, groceries and food products, wool and woollen goods, cotton and cotton goods, earthenware, ores and precious metals, drugs and chemicals, wood, hides and skins, oils and fats, animals and animal products, silk and silk ware, cattle, etc. The commerce of the country has since '88 been administered by the *Zollverein* or Customs League, which embraces the whole of the states with the exception of a few small districts, as well as Luxemburg. Import duties are levied, the country's policy having been strongly protectionist since 1879. For commercial purposes there are 145 districts, each with its *Chamber of Commerce*; and these chambers, according to an American Consular report in 1903, have done more towards building up German commerce than any other one factor. Germany's tariff of July 15th, 1879, is still in force, though a new tariff was passed by the Reichstag in 1902.

Germany's trade has been as follows in recent years:—

Year.	Imports.	Exports.
1897 . . .	£243,232,200	£189,312,050
1899 . . .	289,181,400	237,630,050
1901 . . .	285,516,900	225,632,300
1902 . . .	290,288,800	240,641,650
1903 . . .	300,134,400	250,731,700

#### German Imports from the British Empire.

From	1902.	1903.
Great Britain . . . .	£30,532,000	£41,674,950
Gibraltar, Malta, and Cyprus . . . .	49,200	65,450
British East Africa . . . .	108,150	108,350
British South Africa . . . .	1,310,450	1,459,400
British West Africa . . . .	2,150,650	2,142,300
British India . . . .	11,917,600	14,192,400
British North America . . . .	472,300	486,050
British West Indies . . . .	330,200	353,200
Australasia . . . .	6,008,550	6,001,050
Totals . . . .	£52,879,100	£66,483,150

#### German Exports to the British Empire.

To	1902.	1903.
Great Britain . . . .	£48,277,050	£49,382,550
Gibraltar, Malta, and Cyprus . . . .	97,500	108,800
British East Africa . . . .	70,850	157,300
British South Africa . . . .	1,904,700	2,085,750
British West Africa . . . .	402,600	311,050
British India . . . .	3,511,150	4,493,500
British North America . . . .	1,936,700	1,791,750
British West Indies . . . .	102,150	108,250
Australasia . . . .	2,225,450	2,238,000
Totals . . . .	£57,583,150	£60,676,950

Compulsory insurance against sickness, accidents, old age and infirmity, has been in operation for some years. In 1902 4,800,000 persons received £10,300,000 sick benefit, 364,566 persons received £5,360,000 on account of accidents, and 1,100,020 persons received £6,050,000 on account of infirmity. Of the total amount—£21,790,000—£2,070,000 was contributed by the State, £10,500,000 by employers, and £9,100,000 by the insured. Most of the railways, which traverse 33,114 miles, belong either to the Imperial or the State Governments. There are 8832 miles of canals and navigable rivers. See *CANALS and ENGINEERING*.

#### Statistics and Diplomatic.

**Area** (with Alsace-Lorraine), 208,830 sq. m.; **pop.**, 1902, 56,813,000. Berlin has a population of 1,888,848; Hamburg, 705,738; Munich, 499,932; Leipzig, 456,124; and Breslau, 422,709. **Estimated revenue and expenditure, 1904-5**, £123,036,749, but net effective revenue £92,365,199, after taking into account the matricular contributions from the Federal States and the amounts repaid to them; **estimated revenue, 1905-6**, £97,262,389 (ordinary), and £14,815,655 (extraordinary); **estimated expenditure, 1905-6**, £112,078,045, including £88,132,927 recurring expenditure, £9,129,461 non-recurring expenditure, and £14,815,655 extraordinary expenditure; **public debt, 1904**, £155,175,000; **imports, 1902**, £290,288,800; **1903**, £300,134,400; **exports, 1902**, £240,641,650; **1903**, £250,731,700.

**Ministry:** *Chancellor of the German Empire*, Count B. von Bülow—*Secretary of State for Foreign Affairs*, Baron von Richthofen.—*Secretary of State for the Interior*, Graf von Posadowsky-Wehner.—*Secretary of State for War*, General von Einem.—*Secretary of State for the Admiralty*, Admiral von Tirpitz.—*Secretary of State for Justice*, Herr W. G. Nieberding.—*Secretary of State for the Imperial Treasury*, Baron von Thielmann.—*Secretary of State for Posts and Telegraphs*, Herr Kraetke.—*President of the Board of Railways*, Dr. Schulz.

**Ambassador in London**, Count Paul Wolff Metternich, 9, Carlton House Terrace, S.W.—*Councillor*, Count John of Bernstoff.—*Consul-General*, Freiherr von Lindenfels, 49, Finsbury Square, E.C.

**British Ambassador at Berlin**, Rt. Hon. Sir Frank Lascelles, G.C.B., G.C.M.G., G.C.V.O.—*Secretary of Embassy*, James B. Whitehead, Esq.—*Commercial Attaché*, W. S. Harriss-Gastrell.

**Consuls-General:** *At Berlin*, Dr. Paul Schwabach; *at Dusseldorf*, T. R. Mulvany, at Frankfurt-on-Main, F. Oppenheimer; *at Leipzig*, Baron C. von Tauchnitz; *at Hamburg*, Sir W. Ward. **Consuls:** Col. A. M. Brookfield (Dantzig), R. Bernal (Stettin), Dr. F. P. König (Dusseldorf), C. A. Niessen, C.V.O. (Cologne), H. Palmié (Dresden), P. Ladenburg (Mannheim), J. Krapp (Munich), F. Rose (Stuttgart).

#### Sovereign.

**William II.**, King of Prussia and German Emperor, is the eldest son of the late Emperor Frederick III., by Victoria, Princess Royal of England, and was b. Jan. 27th, 1859. He succeeded his father June 15th, '88, his mother, the Empress Frederick, surviving till 1901. Ed. at the gymnasium of Cassel, and submitted to the

ordinary discipline of that establishment until '77, when he entered the University of Bonn. He married on his twenty-second birthday, in '81, the Princess Augusta Victoria, of Schleswig-Holstein-Sonderburg-Augustenburg, b. Oct. 22nd, '58. His eldest son, Prince Friedrich Wilhelm, the Crown Prince, came of age on May 6th, 1900, having been born on May 6th, 1882; and was betrothed in Sept. 1904 to H.H. the Duchess Cecilia of Mecklenburg-Schwerin, younger sister of the reigning Grand Duke. The Duchess Cecilia was b. Sept. 20th, 1886. The Emperor has five other sons—Princes William, Adalbert, August, Oscar, and Joachim—and a daughter, Princess Victoria Louise. An International Labour Conference was inaugurated by the Emperor in '90. A state visit to Heligoland and to Amsterdam in '91 preceded his Majesty's arrival in England, accompanied by the Empress, in July. They were entertained at a series of splendid festivities, and the Emperor was presented with the freedom of the City of London. His Majesty sent a congratulatory telegram to President Kruger when Dr. Jameson's force was defeated in Dec. '95, an act which caused considerable surprise in Great Britain, though it was afterwards explained that His Majesty had no unfriendly intent towards this country. At all events, he atoned by sending a friendly telegram to the British 1st Royal Dragoon Regiment, of which he is hon. Colonel, on their departure for South Africa in Oct. '99, and in November gave £300 for relief of their widows and orphans. In October and November '98 he paid a visit, with the Empress, to Constantinople, where their Majesties stayed some time as the Sultan's guests, and went on subsequently to Palestine and Jerusalem. On Nov. 21st, '99, their Majesties, with two of their sons, paid a visit to H.M. Queen Victoria at Windsor Castle, and to H.R.H. the Prince of Wales at Sandringham. In April 1900 he sent a striking telegram to the Viceroy of India, saying that Berlin had subscribed over 500,000 marks for the Indian Famine Fund, and attributing this to the fact that "blood was thicker than water." In Jan. 1901 he left the festivities arranged to celebrate the bicentenary of the Prussian monarchy to attend the deathbed of H.M. Queen Victoria, and was present at the funeral. While in England he was appointed by King Edward VII. a Field-Marshal of the British army. He visited the King at Sandringham in Nov. 1902, and afterwards stayed with Lord Lonsdale for a few days at Lowther Castle. Some anxiety was caused by an operation which he underwent in Nov. 1903 for a polypos in the throat, but the growth was pronounced non-malignant and he soon recovered. In 1904 he went for a prolonged tour in March and April, visiting the King of Spain at Vigo, Gibraltar, the King of Italy at Rome, Malta, Sicily, Venice, and other places.

### Political Parties.

The centre of political life in the German Empire is the Reichstag, the constitution of which is somewhat complex. The general election of June '93 resulted as follows: Centre, 96 members; Conservatives, 75; National Liberals, 53; Social Democrats, 44; Radical Popular Party, 24; Imperialists, 23; Poles, 19; Anti-Semites, 17; Radical Union, 14; and a miscellaneous assemblage of the South German

People's Party, Guelphs, Danes, Alsations, etc., making 32 in all. In '94 a dead set was made by members of all parties, notably the Conservatives, against Count Caprivi, the Imperial Chancellor, who ultimately resigned in October, and was succeeded by Prince Hohenlohe. In '96 a section of the Conservative party, led by Dr. Stöcker, separated to form the Christian Socialist group, opposing both reactionary Conservatism and revolutionary Social Democracy. The Agrarian party lost much ground during the year, and what they lost the Liberals and Radicals gained. The National Liberal party showed a tendency to break up, the more progressive members of the party drawing towards the Moderate Radicals, and the more Conservative towards the agrarian and reactionary party. During '97, in prospect of the general election of '98, there were some efforts at promoting union between the various sections of the Liberals, but little came of it. The General Election took place in June '98, and resulted in the return of the following members: Centre, or Clerical party, 103; Social Democrats, 56; Conservatives, 53; Free Conservatives, 21; National Liberals, 48; Advanced Radicals, 30; Moderate Radicals, 13; Poles, 14; Anti-Semites, 12; South German People's Party, 8; Agrarians, 5; and a miscellaneous group of Hanoverian Guelphs, Alsations, Bavarians, and others. The Social Democrats thus gained heavily, but the Centre were still left with the balance of power in their hands. The Agrarian League claimed in 1902 to have 250,000 members. The Agrarians showed both their aggressiveness and their strength during the discussions on the Tariff Bill in 1902. The Reichstag closed April 30th, 1903, and the general election took place on June 16th. The result is shown by the following table:—

Party.	Strength April 30, 1903.	Strength June 1903.
Clericals . . .	105	100
Conservatives . .	72	73
Social Democrats .	58	82
National Liberals .	51	50
Radical Left . . .	34	26
Moderate Radicals	14	9
Poles . . .	14	16
Anti-Semites . . .	10	9
Alsace-Lorrainers .	10	9
Smaller parties and vacant seats . . .	29	23
	397	397

The outstanding feature was evidently the great success of the Social Democrats, who made denunciations of the tariff policy of the Government and advocacy of direct taxation in the form of income and property taxes in place of and in reduction of indirect taxation the leading features of their programme. The Agrarians suffered considerably, though very many of the Conservative and Centre parties are members of the Agrarian League. The number of votes cast for Social Democrat candidates was 3,010,771 as against 2,107,076 in '98. The Government rely on the Conservatives, Clericals, and National Liberals for their majority, and therefore muster about 223 supporters, without counting the smaller parties.

**History, 1904.**

The Federal Council assented to the Bill passed by the Reichstag repealing paragraph 2 of the Law of July 4th, 1872, dealing with the Jesuits and prohibiting them from settling in Germany (March 8th). Considerable excitement amongst the Protestant part of the nation followed, and the National Liberals strongly attacked the measure, which occasioned a breach between them and Count von Bülow. Having concluded the debate on the Navy Estimates, in regard to which proposals for increasing the number of officers of the higher grades were defeated, and many reductions were made, the Reichstag adjourned for the Easter Recess (10th). A Bill establishing Commercial Arbitration Courts, for the adjustment of disputes between employers and employed, was passed by the Reichstag (June 16th), the Session then being adjourned until Nov. 29th.

King Edward VII. arrived at Kiel on a visit to the Emperor (June 25th), who was present at Holtenau Lock, with the Crown Prince, Prince Henry of Prussia, and a large suite to welcome him. A State dinner was given in the evening in His Majesty's honour on board the *Hohenzollern*, and the King, in responding to the toast proposed by the Emperor, referred to his desire to see the Kiel Regatta as the chief cause of his visit, together with the desire to knit even more closely "those intimate family relations which have so long united our Houses." The Government and Krupp dockyards were visited, and a regatta of all the ships' crews took place (27th). The King visited Hamburg (28th), and was entertained at luncheon by the Burgomaster and senate.

The death of Count Ernst, Prince Regent of Lippe-Detmold since '97 (Sept. 26th), gave rise to some controversy and difficulty as to his successor. The Government of the Principality had passed a law giving the succession to his eldest son, Count Leopold, but the Federal Council in '99 had declared its own competence to deal with the matter under Article 76 of the Imperial Constitution, empowering it to decide controversies between federated States. Count Leopold formally assumed the Regency (27th), but a protest against his action was addressed to the Federal Council by the Government of the Principality or Schaumburg-Lippe, and the Emperor telegraphed that he could not recognise the assumption of the Regency by Count Leopold, nor allow the military to take the oath, till the legal situation had been cleared up. The Federal Council afterwards decided, on Nov. 18th, that the points in dispute between the Schaumburg-Lippe and Lippe-Biesterfeld lines should be submitted to a court of arbitration, and the troops were ordered to take the oath of allegiance to Count Leopold.

The year was largely occupied by the negotiations for the renewal of commercial treaties with various countries. The treaty with Belgium was concluded in June, with Russia (July 28th), with Roumania (Oct. 8th), with Switzerland (Nov. 12th), with Servia (29th), and a treaty with Italy was signed. Negotiations with Austria-Hungary were broken off, the latter country refusing to accept Germany's proposals (30th). The Chancellor stated, however (Dec. 9th) that communications had been received from the Austro-Hungarian Govern-

ment which warranted the prospect that an understanding could be arrived at.

An Agreement between Great Britain and Germany providing for arbitration on the now familiar lines was signed (July 12th), and a similar treaty between Germany and the United States was signed at Washington (Nov. 22nd).

**German States.**

The States constituting the German Empire are as follows, arranged in alphabetical order:

**Alsace-Lorraine**, administered as the Reichsland by a Governor-General, called the Statthalter, Prince Hohenlohe-Langenburg, appointed (1894) by the Emperor, with a Ministry, Council of State, and Provincial Committee of 58 members. Over 76 per cent. of the inhabitants are Roman Catholics. Capital, Strassburg (pop. 151,040). Area, 5604 sq. m.; pop., 1,719,470.

**Anhalt**, a Duchy under Duke Friedrich (b. Aug. 19th, '56, succeeded Jan. 24th, 1904; heir, Prince Edward, b. '61). The Diet has 36 members. Capital, Dessau (pop. 50,849). Area, 906 sq. m.; pop., 316,027.

**Baden**, a Grand Duchy under the Grand Duke Friedrich I., who was b. '26, and succeeded his father, the Grand Duke Leopold, '52. By right of succession the government of the duchy belonged to his brother Louis, who was older than himself; but Duke Friedrich had to assume the government, his brother being mentally incapacitated. As a ruler he has proved himself a firm ally of Prussia, and in the war of '70-71 against France his troops fought side by side with Prussia. In home politics he showed himself a stern opponent of the Jesuits, and in '55 he put an end to their influence in the duchy. His wife is a daughter of William I. of Germany, and his heir is Frederick, born July 9th, '57. There is a representative assembly called the Landtag, of two Chambers, the lower elected by the people and containing 63 members. Nearly two-thirds of the population are Catholics. The capital is Carlsruhe (pop. 97,185). Pop. of Mannheim 141,131. Area, 5823 sq. m.; pop., 1,867,944.

**President of Ministry**, Dr. W. Nökk.

**British Chargé d'Affaires**, A. J. Herbert (resides at Darmstadt).—**Consul at Mannheim**, P. Ladenburg.

**Bavaria**, a Kingdom under King Otto, b. '48, succeeded '86, though his uncle Prince Luitpold (b. '21) has acted as Regent for him ever since his accession. The legislature includes an Upper House of 81 members and a Chamber of Representatives of 159 members. Though the army forms an integral part of the German army, it has, in time of peace, its own administration. Area, 29,286 sq. m.; pop., 6,176,057. Revenue and expenditure, £22,745,234. Debt, £80,011,876. The population of Munich, the capital, is about 500,000, and of Nuremberg 261,081. Over 70 per cent. of the population of Bavaria are Roman Catholics.

**Ministry: Minister of State and Foreign**, Baron Von Podewils.—**Instruction and Public Worship**, Dr. von Wehner.—**Justice**, Herr Ferdinand Miltner.—**Finance**, Hermann von Pfaff.—**War**, General Baron Von Asch zu Asch.—**British Minister Resident at Munich**, R. T. Tower, Esq.

**Bremen**, a Free City and State, governed by two Burgomasters, a Senate of 16 members

and a Bürgerschaft of 150 members elected for six years. **Area**, 99 sq. m.; **pop.**, 224,882. The second part of the Empire.

**Brunswick**, a Duchy, governed by Prince Albrecht as Regent since '85. The 3rd Duke of Cumberland is the heir, but his refusal to give up his claim to the throne of Hanover excluded him from the succession, when Duke William I. died in '84. The Landtag, therefore, elected the present regent. The legislature consists of a Chamber of 48 members. Capital, Brunswick (pop. 128,226). **Area**, 1424 sq. m.; **pop.**, 464,333.

**Hamburg**, a Free City and State, governed by two Burgomasters, a Senate of 18, and a Bürgerschaft of 160 members chosen for six years, though half have to be elected every three years. **Area**, 158 sq. m.; **pop.**, 768,349. The chief seaport of the Empire.

**Hesse**, a Grand Duchy under the Grand Duke Ernst Ludwig (b. Nov. 25th, '68, succeeded March 13th, '92; married, '94, to Princess Victoria of Saxe-Coburg; the marriage was dissolved in Dec. 1901). The legislature consists of two Chambers, the second containing 50 elected representatives. **Area**, 2966 sq. m.; **pop.**, 1,119,893. **Revenue** and expenditure, £4,133,000. **Debt**, £13,321,002.

**President of Ministry**, Dr. Rothe.

**British Chargé d'Affaires**, Arthur Herbert, Esq.

**Lippe**, a Principality under Prince Karl Alexander (b. Jan. 16th, '31, succeeded March 20th, '95), and from '97 to 1904 governed by a Regent, Count Ernst, who, however, died Sept. 26th, 1904 (see History below.) There is a Diet of 21 members. **Area**, 469 sq. m.; **pop.**, 138,952.

**Lübeck**, a Free City and State, governed by a Burgomaster, Senate of 14 members, and Bürgerschaft of 120 members. **Area**, 115 sq. m.; **pop.**, 96,775.

**Mecklenburg-Schwerin**, a Grand Duchy under the Grand Duke Friedrich Franz IV. (b. April 9th, '82, succeeded April 10th, '97, married 1904 to Princess Alexandra Louise, daughter of the Duke of Cumberland. His younger sister, the Duchess Cecilia, was in Sept. 1904 betrothed to the German Crown Prince. The Diet is composed of the burgomasters of the chief towns and landed proprietors who have a feudal right to a seat, of which only a small proportion of those qualified (nearly 800) avail themselves. Chief towns, Rostock (pop. 54,735), and the capital, Schwerin (pop. 38,672). **Area**, 5135 sq. m.; **pop.**, 607,770.

**Mecklenburg-Strelitz**, a Grand Duchy under the Grand Duke Adolphus Frederick (b. July 22nd, '48, succeeded May 30th, 1904; married '77 Elizabeth, Princess of Anhalt; heir, Adolphus Frederick, b. '82). The Diet is constituted like that of Mecklenburg-Schwerin. Capital, New Strelitz (pop. 11,340). **Area**, 1131 sq. m.; **pop.**, 102,602.

**Oldenburg**, a Grand Duchy under the Grand Duke Friedrich August (b. Nov. 16th, '52, succeeded June 13th, 1900). The Grand Duchy includes the Duchy of Oldenburg, and the principalities of Lübeck and Birkenfeld. The Diet consists of 37 deputies elected for three years. Capital, Oldenburg (pop. 26,797). **Area**, 2479 sq. m.; **pop.**, 399,183.

**Prussia**, a Kingdom under King Wilhelm II. The Constitution of '50, frequently modified since, vests the executive authority in the King, with a Council of Ministers, and the

legislative in the King with the Landtag, composed of an Upper House of the princes of the royal family, the nobility, including life peers and other members nominated by the King, and a representative element; and of a Lower House of 433 members, indirectly elected for five years. The Kingdom is divided into 14 provinces, each under a Governor, and these are again divided into counties, circles, towns, and communes. Religious liberty is guaranteed by the Constitution, about two-thirds of the population are Protestants, and the State Church is the Evangelical. Agriculture supports over 10,000,000 of the population. Manufactures of all kinds are carried on with the utmost vigour and success. The mineral riches are great, especially coal, iron, and zinc. The chief towns are Berlin (pop. 1,888,848), Breslau (422,709), Cologne (372,529), Frankfurt-on-Main (288,989), Hanover (235,649), Magdeburg (229,667), Düsseldorf 213,711, and Stettin (210,702). **Area**, 134,622 sq. m.; **pop.**, 34,472,509. **Revenue**, 1904-5, £137,799,608; expenditure (ordinary), £129,212,052; (extraordinary), £8,587,583; **public debt**, 1904, £346,124,285.

**Ministry: President and Foreign Affairs**, Count B. von Bülow. — **Finance Minister**, Baron von Rheinbaben. — **Minister of Interior**, Baron von Hammerstein-Loxten. — **Justice**, Herr Schönstedt. — **Commerce**, Herr Möller. — **Agriculture**, Gen. von Podbielski. — **Public Works**, Major-Gen. Budde. — **War**, Gen. von Einem. — **Secretary of State for Imperial Post Office**, Herr Kraetke. — **Instruction and Worship**, Dr. Sturt.

**Reuss, Älterer Linie**, a Principality under Prince Heinrich XXIV. (b. March 20th, '78, succeeded April 19th, 1902). Regent, Prince Heinrich XXVII. There is a legislature of 12 members. Capital, Greiz (pop. 22,346). **Area**, 122 sq. m.; **pop.**, 68,396.

**Reuss, Jüngerer Linie**, a Principality under Prince Heinrich XIV. (b. May 28th, '32, succeeded July 14th, '67). There is a Diet of 16 members. Capital, Gera (pop. 45,634). **Area**, 319 sq. m.; **pop.**, 139,210.

**Saxe-Altenburg**, a Duchy under Duke Ernst (b. Sept. 16th, '26, succeeded Aug. 3rd, '53). There is a Chamber of 30 members, elected for three years. Capital, Altenburg (pop. 37,110). **Area**, 511 sq. m.; **pop.**, 194,914.

**Saxe-Coburg and Gotha**, a Duchy under H.R.H. Prince Charles Edward (Duke of Albany). He is the son of the late Prince Leopold, the 4th son of Queen Victoria, and Princess Helena of Waldeck, and was b. in '84. On the death of Prince Alfred, the son and heir of the 1st Duke of Edinburgh, then the reigning Duke of Saxe-Coburg, in '99, the Duke of Connaught, the next in order of succession, resigned his rights in favour of the Duke of Albany, who was then recognised as the heir-presumptive, and went to Coburg to receive a German education. He succeeded his uncle on the death of the latter in Aug. 1902, but till he attains the age of 21 the government is vested in the Hereditary Prince Ernest of Hohenlohe-Langenburg. K.G. 1902. There is a Chamber of 11 representatives for Coburg and of 19 for Gotha, which meets in common for common affairs. Capital, Gotha (pop. 34,651). **Area**, 755 sq. m.; **pop.**, 229,550.

**British Minister Resident**, Viscount Gough, K.C.V.O.

**British-Consul-General, Baron von Tauchnitz** (Leipzig).

**Saxe-Meiningen**, a Duchy under Duke Georg II. (b. April 2nd, '26, succeeded Sept. 20th, '66). There is a Chamber of 24 representatives. Capital, Meiningen (pop. 14,518). **Area**, 953 sq. m.; **pop.** 250,731.

**Saxe-Weimar**, a Grand Duchy under the Grand Duke Wilhelm Ernst, b. June 10th, '76, succeeded Jan. 5th, 1901. There is a Chamber of 33 representatives. Capital, Weimar (pop. 28,489). **Area**, 1388 sq. m.; **pop.** 362,873.

**Saxony**, a Kingdom under King Frederick August, b. May 25th, '65, succeeded Oct. 15th, 1904. He m. the Archduchess Louise Nov. 21st, '91, but the marriage was dissolved in Feb. 1903. The heir-apparent is the Crown Prince George, b. Jan. 15th, 1893. Parliament consists of two Chambers, the Upper including princes of the royal house, representatives of the Lutheran and Roman Churches, the nobility, the universities, the landed proprietors, etc., and the Lower 82 representatives, indirectly elected. There are great textile manufacturing in the kingdom. Chief towns, Dresden (pop. 495,700), Leipzig (456,124), Chemnitz (206,913). **Area**, 5787 sq. m.; **pop.** 4,202,216. **Revenue and expenditure**, £5,325,000. **Extraordinary expenditure**, £2,000,000. **Debt** about £50,000,000.

**Ministers of State: President and Minister of the Interior and Foreign Affairs**, Herr von Metzsch.—**War**, Gen. von Hausen.—**Worship and Instruction**, Herr von Seydewitz.—**Finance**, Dr. Rüger.—**Justice**, Dr. Otto.

**British Minister Resident, Dresden**, Viscount Gough, K.C.V.O.—**Consul**, H. Palmié.—**Consul-General Leipzig**, Baron von Tauchnitz.

**Schaumburg-Lippe**, a Principality under Prince Georg (b. Oct. 10th, '46, succeeded May 8th, '93). There is a Diet of 15 members. Chief town, Buckeburg (pop. 5625). **Area**, 131 sq. m.; **pop.** 43,132.

**Schwarzburg-Rudolstadt**, a Principality under Prince Günther (b. Aug. 21st, '52, succeeded Jan. 19th, '90). There is a Chamber of 16 members elected for three years. Capital, Rudolstadt (pop. 22,405). **Area**, 363 sq. m., **pop.** 93,059.

**Schwarzburg-Sondershausen**, a Principality under Prince Karl Günther (b. Aug. 7th, '30, succeeded July 17th, '80). There is a Diet of 15 members. Chief town, Arnstadt (pop. 14,421). **Area**, 333 sq. m.; **pop.** 80,898.

**Waldeck**, a Principality under Prince Friedrich (b. Jan. 20th, '65, succeeded May 12th, '93). There is a Chamber of 15 representatives. Prussia manages the finances. **Area**, 433 sq. m.; **pop.** 57,918.

**Württemberg**, a Kingdom under King Wilhelm II. (b. Feb. 25th, '48, succeeded Oct. 16th, '91). The legislature consists of two Chambers, the Upper representing the royal princes, nobility, etc., and the Lower of 93 members, 30 appointed by different classes and 63 elected by the citizens, for six years. Agriculture is the chief industry. Chief town, Stuttgart (pop. 181,463). **Area**, 7534 sq. m.; **pop.** 2,169,480. **Revenue and expenditure**, 1903-4, £4,556,544. **Debt**, £24,758,427.

**Ministry: President and Minister for War**, General von Schnürlein.—**Minister of Foreign Affairs**, Freiherr von Soden.—**Finance**, Herr von Zeyer.—**Public Worship**, Dr. Von

Weizsäcker.—**Interior**, Herr von Pischek.—**Justice**, Dr. Von Breitling.

**British Minister at Stuttgart**, R. T. Tower, Esq.—**Consul**, Dr. Rose.

### German Colonies.

The German Colonial possessions have an **area** of 1,024,262 sq. m., with a population of about 13,500,000, including only about 8000 Europeans, of whom rather more than 5000 are Germans. The Estimates for 1904 put the Colonial revenue at £579,327, the expenditure at £1,924,156 and the Imperial grant in aid at £1,344,830. The Estimates for 1905 showed the Colonial revenue to be £781,820, the expenditure £4,578,227, and the Imperial subsidy £3,796,407, of which £2,332,150 was required for suppressing the insurrection in German S.W. Africa. The total external trade of the Colonies shows some advance. Exports rose from £685,000 in '98 to £1,062,000 in 1902. Imports rose from £1,596,000 in '98 to £2,680,000 in 1902. The colonies in the most favourable position financially are German S.W. Africa, Togoland, and the Cameroons.

### i. Colonies in Africa.

**Cameroons.** A territory on the Bight of Biafra, West Africa, annexed by Germany in 1884. Its coast line extends for about 200 miles along the Bight, and inland it is bounded by Nigeria on the north-west and the French Congo on the south and west. It is administered as a German Protectorate by an Imperial Governor, and there is a local representative council. The capital is Duala, but the chief town is Cameroon. Cacao and tobacco are grown, rubber is exported, and a flourishing trade is carried on in ivory and palm-oil. Cocoa is becoming a considerable export. A Plantation Co. has taken up a concession of about 34,000 sq. m., and is developing it, having commenced a railway from Victoria to Moliko and Lisoka. **Area** 191,130 sq. m., **pop.** 4,000,000, of whom about 670 are Europeans. **Revenue and expenditure**, 1903, £183,275, including £79,130 Imperial subsidy. **Exports**, 1902, £306,600; **imports** £649,800.

**British Consul**, A. Nightingale, St. Paul de Loanda.

**German East Africa.** The German possessions in East Africa lie immediately to the south of British East Africa, and have an estimated **area** of about 400,000 sq. miles, with a **population** of 6,850,000, including about 1269 Europeans, of whom 1008 are Germans. Lake Tanganyika forms the western boundary, and thence a line to Lake Nyasa and the river Rovuma form the south-west and southern boundaries. Several stations have been established by the German East Africa Company, and the chief ports are Dar-es-Salaam (pop. 13,000), Bagamoyo (pop. 13,000), Kilwa (pop. 10,000), and Tanga (pop. 5000). Captain Count von Goetzen is the **Governor** of the colony, and a number of communes, with administrators and district councils have been formed. There is a military force of about 1900 and a police force of about 650. An edict dated Nov. 29th, 1901, forbade from that date the creation of slaves by sale or in any other way, provided means for the emancipation of slaves, and in other ways prepared the way for the mitigation and eventual abolition of slavery. The products of the country are coffee, tobacco,

cotton, ivory, caoutchouc, and gum. Gold has been found in many parts of the colony, and coal exists at the north-west end of Lake Nyasa. The Usambara railway runs from Tanga to Pongwe and Karagwe (54 miles), and will be taken on to Momo (28 miles). The Government have guaranteed interest on the cost of a line between Dar-es-Salaam and Mrogoro, and the German East African Railway Co., with a capital of £1,050,000, was formed in June 1904 to construct and work it. Revenue and expenditure, 1903, £435,575, including £280,740 Imperial subsidy. Imports, 1902, £433,670; exports, £258,645. As to the African Transcontinental Telegraph see ENGINEERING.

British Consul-General, B. Cave, Esq.

**German South-West Africa** has a coast-line extending from Cape Frio to the mouth of the Orange river, and is bounded inland by British territory. The area is estimated at 320,000 sq. miles, and the population at 200,000, including about 4750 Europeans. There has been considerable Boer immigration since the South African War. Coast infertile and desolate; inland are richer tracts. Damaraland is the name of the northern district, Namaqualand and Luderitzland lying to the south. The German South-Western Africa Colonial Company holds and works the coast lands. The country is apparently rich in copper and in agricultural resources, though as yet it is quite undeveloped. Guano is exported. The capital is Great Windhoek, 180 miles inland from Walvisch Bay, which belongs to Cape Colony. A railway from Swakopmund on the coast to Windhoek, about 237 miles long, was opened on June 20th, 1902. A special agreement between the German Government and the British South Africa Company was reported (Nov. 9th, '99), whereby the Company undertook not to continue its railway to the West Coast of Africa from Rhodesia or Bechuanaland, south of 14° N. lat., except from a point on the Anglo-German frontier to be agreed upon with the German Government; and not to construct a railway from the Company's territories to the west coast north of 14° N. lat., until a railway line has been built south of that degree through German South-West Africa. A railway 400 miles long is contemplated from Otavi to Port Alexander in Angola, the enterprise being in the hands of an Anglo-German Company, and intended as the first section of the line which is ultimately to connect the Cape to Cairo Railway with the West Coast. The company will also construct a line from the mines to Swakopmund.

Revenue and expenditure, 1903, £412,717, including £306,428 Imperial subsidy. Imports, 1902, £419,360; exports, £108,320.

A rising broke out amongst the Hereros in the north of the colony early in January 1904, and they destroyed a railway bridge at Osona, near Okahandja, and cut a telegraph line to Windhoek (12th). Attempts to send reinforcements from Windhoek failed, and Windhoek itself was threatened and cut off from telegraphic communication. Many of the settlers lost everything, and fled to the Government stations, where only weak detachments remained as garrisons, the bulk of the colonial troops having gone south to deal with a rising of the Bondelzwarts. The Imperial Government at once arranged for a despatch of reinforcements. Windhoek and Okahandja were

relieved (28th), and it was then found that 44 settlers, women, and children had been murdered by the Hereros, apart from the losses in the fighting. Lieut. Franke took Omaruru by storm (Feb. 4th), but was then invested there by the insurgents, who were stated in March to number about 5000. The Governor consequently asked for a reinforcement of 1000 men. Major von Glasenapp, commanding the Marines division of the expeditionary force recently sent out, was surprised by the Hereros near Owikokorero (March 13th), and suffered considerable loss. In another engagement, near Okaharni, the division suffered the loss of 31 killed and 16 wounded, though the enemy were driven off (April 2nd). Lieut.-General von Trotha was appointed commander-in-chief in the colony (May 4th), Colonel Leutwein being left entrusted with the civil administration. Reinforcements to the number of 1500 were also ordered to be sent out, bringing up the number of German troops in the colony to 4500. When all was ready the Herero position at Waterberg was attacked and captured (Aug. 12th), and the enemy were dispersed with heavy loss. Fresh trouble arose in October, however, through a rising of the Bondelzwart Hottentots and the Witbois in the southern part of the colony. The Colonial Estimates for 1905-6 contained a statement that the expenditure incurred and contemplated at that time (Nov. 27th) on account of the insurrection amounted to £6,500,000. Fighting was still going on in December.

**Togoland** is situated on the Slave Coast in Upper Guinea, between the Gold Coast Colony on the west and Dahomey on the east; proclaimed a protectorate in 1884. It includes Little Popo and Porto Seguro, and is administered by an Imperial Governor, assisted by a local council representative of the merchants. The coast-line is only 32 miles long, but inland the protectorate widens considerably, and includes the fertile country of Sansanne Mangu, Yendi, and all the territories of Chakosi. Area, 34,800 sq. m.; pop. 2,500,000, of whom only 168 are Europeans. The capital is Lome, but Togo is the chief native town, and has 8000 inhabitants, of whom only about 150 are Europeans. Revenue and expenditure, 1903, £53,624. Imports, 1902, £303,800; 1903, £298,833; exports, 1902, 205,296; 1903, £177,006. Chief exports, palm oil, gum, and ivory. Cotton is being grown with very satisfactory results. A railway is to be built connecting Lome with Little Popo, and it is ultimately to be joined by a line from Lome to Misahoche.

British Consul, Capt. C. F. Cromie, at Dakar.

## ii. Colonies in the Pacific, etc.

**Bismarck Archipelago.** A group situated N. of the eastern part of New Guinea, including islands formerly called New Britain, New Ireland, and New Hanover. They have been a German possession since '84. As to government see Kaiser Wilhelm's Land below. Area 20,000 sq. m.; pop. 188,000, including about 280 Europeans. Chief exports copra and cocoanut fibre. Revenue and expenditure, 1903-4, £48,461. Imports, 1902-3, £80,152; exports, £44,983.

**Caroline Islands.** This archipelago, or group of islands, in all numbering five hundred, lies between the Philippines and the Marshall Islands, in the Pacific Ocean, and to the north

of German New Guinea. After the Spanish-American war, the Caroline, Pelew, and Marianne or Ladrone Islands (except Guam, ceded to the United States in '98) were left under Spanish rule; but they were sold during '99 to Germany for about £837,500. The chief islands in the Caroline group are Yap, Ponape, and Kusai. **Area**, 560 sq. m.; **pop.** 36,000. The **Pelew group**, the most westerly of the groups, consist of 26 small islands, the largest of which is Babel-thuap. The **pop.** is about 10,000. The **Ladrones** are divided into two groups, the northern and southern. The former are volcanic and uninhabited, and the latter have a population of about 10,000. **Area** of Ladrones 420 sq. m. For administrative purposes there are three divisions: (1) the Eastern Carolines, capital **Ponape**; (2) the Western Carolines and Pelew Islands, capital **Yap**; (3) the Ladrones, capital **Saypan**. The whole group was put under the Governor of German New Guinea. The chief export is copra. **Revenue and expenditure**, 1904-5, £16,085, including £8244 Imperial subsidy.

**Kaiser Wilhelm's Land** is the German portion of New Guinea, and lies to the north of the British territory. Its area, with Long Island, Dampier Island, etc., is about 72,000 sq. m., and the population 110,000. The administration was formerly in the hands of the German New Guinea Company and an Imperial Commissioner, but the Imperial Government assumed the control of the protectorate on April 1st, '99. The seat of government is Herbertshöhe, in the Bismarck Archipelago, an Imperial Commissioner presiding over the Archipelago, Kaiser Wilhelm's Land, and the Solomon Islands. Tobacco, cotton, coffee, and the coco-palm are cultivated with much success, and there are rich forests. **Revenue and expenditure**, 1903, £49,500, including £44,125 Imperial subsidy. **Imports**, 1902-3, £28,053; **exports**, £9883.

**Kiao-Chau**, a German protectorate in the Chinese province of Shantung, was occupied by Germany in Nov. '97, and formally ceded to her on a 99 years' lease by China in Jan. '98. The territory conceded with the town stretches about 160 miles along the coast, and a neutral zone, with an area of about 2500 sq. miles and a population of about 1,200,000, surrounds the district and the bay. **Area** of the protectorate (exclusive of the bay) about 200 sq. miles; **pop.** about 20,000. A dock is being built, and the place is to be made a fortified coaling station though for commercial purposes the port is to be declared free. Railways run inland from Tsintau to Tsi-nan-fu and I-chau, so as to serve the extensive coalfields of Wei-hsien and Pashan, and a line is to be built from the Shantung frontier to Tientsin. See CHINA. The protectorate is administered under the German Navy department by a Governor. **Revenue and expenditure**, 1904-5, £640,673, including £615,938 Imperial subsidy. **Imports**, 1901-2, £953,902; **exports**, £243,294.

**Marshall Islands**. These have been German since 1885. They include the Ratak and Ralik Islands. **Area**, 150 sq. m.; **pop.** 15,000. The chief island and capital is Jaluit, and there the Imperial Commissioner resides. Copra is the chief export. **Imports**, 1902-3 £20,510; **exports**, £27,226.

**Samoa Islands**. By an agreement made between Great Britain and Germany Nov. 9th, '99, and approved by the United States in Jan.

1900, Upolu (area 345 sq. m.), and Savaii (area 660 sq. m.), were assigned absolutely to Germany; and Tutuila and the other islands to the United States. Equality as to freedom of trade was reserved to all three nations, which had previously jointly guaranteed the independence of the islands. The award of King Oscar of Sweden as to the claims of residents in the islands on account of the fighting in '99 was given in Oct. 1902, and found the British and United States Governments responsible for the losses sustained. The population is 39,000, of whom 450 are whites and 650 half-castes. The islands are administered, together with adjacent smaller islands, by a Governor, with a native High Chief and Council. The town and port of Upolu is Apia. Chief exports, copra and cocoa beans. **Revenue and expenditure**, 1904-5, £28,685, including £11,526 Imperial subsidy. **Imports**, 1901-2, £76,905; 1902-3, £118,844; **exports**, 1901-2, £49,238; 1902-3, £94,499.

**Solomon Islands**. The German islands are administered from Kaiser Wilhelm's Land, and until '99 included Isabel, Bougainville, and other islands; but by the Samoa agreement with Great Britain (concluded Nov. 14th, '99) all the islands, except Bougainville and Buka, were ceded to Great Britain. The islanders are in demand as labourers in Queensland and in New Guinea, and Germany reserved her right to hire them for such purposes. Stations have been established by the Melanesian Mission, but the natives are treacherous, and many of them are cannibals and head hunters. Sandal-wood and tortoise-shell are the chief products.

**Gilchrist Educational Trust**. A fund left by the late Dr. John Borthwick Gilchrist (1759-1841) to trustees, "for the benefit, advancement, and propagation of education and learning in every part of the world, as far as circumstances will permit." The income is applied to the support of scholarships for young men and young women, awarded on the result of competitive examinations; in occasional grants to Educational Institutions under special circumstances; and to the delivery of high-class lectures for the people, at a charge for admission of 1d. each per lecture. **Secretary**, R. D. Roberts, M.A., D.Sc. **Office**, 1, Plowden Buildings, Temple, E.C.

**Girls' Friendly Society, The** (Patroness, Queen Alexandra; Presidents, the Archbishop of Canterbury and the Archbishop of York). It has for its object the banding together in one society of women and girls, as associates and members, for mutual help, religious and secular, besides encouraging purity, dutifulness, temperance, thrift and fidelity, and providing help in sickness. Branches exist in 1382 places, and members (who number 156,885, from the age of 12 and upwards) are introduced from one branch to another wherever they may go. The organisation extends to various towns on the Continent, and in Australia, New Zealand, India, Africa, and Canada. Clubs, classes, homes of rest, registry-offices and protected emigration form part of the scheme.

**Godley, Sir Arthur, K.C.B.**, Permanent Under-Secretary of State for India since 1883, is the only son of John Robert Godley, late of Killigarr, co. Leitrim, and was b. in '47. Ed. at Rugby and Balliol College, Oxford; entered

as a student at Lincoln's Inn '69, and was called to the Bar '76. From '72 to '74 and from '80 until '82 he was private secretary to the late Mr. Gladstone, then Prime Minister and First Lord of the Treasury, who appointed him a Commissioner of Inland Revenue in '82; and he was selected for the position he now fills in '83. Lady Godley, whom he married in '71, is a daughter of Walter Charles, first Lord Northbourne.

### GOLD FIELDS AND PRODUCTION.

Gold is found in all parts of the world, but often in such small quantities as to render it impossible for it to be obtained at a profit. Practically its sources are two—(1) **alluvial river deposits**, and (2) **quartz containing reefs or veins**. The methods of extracting gold from the ore are becoming every year more complete and scientific. The ore is in the first place crushed by heavy stamps, which leave the gold deposited on plates. Then the residue, known as "tailings," undergoes treatment by cyanide, with the result that some gold which was not separated in crushing is secured. Even the ore then remaining, and known as "slimes," is now made to yield its quota, though until recently it was considered quite worthless. Further, as in Western Australia, smelting and various special processes are employed, with a fair amount of success, in the case of ores of so refractory a character that the above methods prove inadequate.

The following table gives a bird's-eye view of the world's production during the last half-century, the figures for 1903 being necessarily only approximate:—

Year.	Australasia.	United States.	Whole World.
	£	£	£
1851	1,319,000	11,000,000	17,200,000
1855	11,277,000	11,000,000	27,015,000
1860	10,554,000	9,200,000	23,850,000
1865	10,253,000	10,600,000	24,040,000
1870	8,939,000	10,000,000	21,370,000
1875	7,326,000	6,700,000	22,700,000
1880	6,174,000	7,200,000	22,130,000
1885	5,597,000	6,400,000	21,250,000
1890	6,004,000	6,600,000	24,260,000
1892	6,835,000	6,600,000	29,900,000
1894	7,282,000	7,900,000	36,765,000
1896	9,290,000	10,915,000	41,714,000
1898	13,750,000	13,253,000	59,538,000
1899	17,448,000	14,600,000	64,653,000
1900	14,852,000	16,277,000	53,883,000
1901	16,384,000	15,733,000	54,800,000
1902	18,249,000	16,000,000	59,210,000
1903	19,380,000	14,718,000	65,105,000

Among the gold fields of the world the **Witwatersrand**, though discovered only 19 years ago, is now the most important, and it is here that gold mining has attained its most scientific development. The nature of the reefs is so regular as to enable them to be located when they are an unusually long way below the surface, and this has led to the opening up of a great many so-called "deep" mines, where shafts are sunk to an immense distance below the surface before the reef is struck. Recent investigation tends to show that the real reef area, of which the Witwatersrand forms a part, is really very much larger than was at one time supposed, and that in circular or semicircular

form it extends to portions of the Transvaal formerly deemed quite destitute of gold. The practical problem which has concerned the Transvaal mining industry since the war has been that of an efficient and continuous labour supply, and the inability to secure a sufficient number of Kafir workers has led to the introduction of Chinese coolies under special conditions and restrictions. At present their employment is hardly more than an experiment, but reports are pretty unanimous as to the efficiency of the Chinese labourers, and as to the good effect that their employment will have upon the industry.

Gold production in **Western Australia**, as will be seen from the table below, continues to increase. Here, again, the whole development has taken place within a comparatively recent period, and under great difficulties in the way of transport and owing to lack of efficient water supplies. The latter deficiency has now been remedied, so far as the Kalgoorlie field is concerned, by providing an artificial supply from a great distance at very considerable cost. The development of the Western Australia gold industry has been checked and delayed by the unpopularity brought upon it owing to the mismanagement of some properties in which British investors were interested, and there is no present prospect of the boom of '99 being repeated. At the same time there is every indication that the industry will continue to grow in a quiet but steady way.

The third column in the table below records the progress of gold mining in **India**, in the Colar district. There the ore is comparatively rich in gold, but has hitherto proved expensive to work. Now, however, expenses are being materially lessened by the introduction of electrical power supply by the Government of Mysore.

The output of the three countries above described has been as follows:—

Year.	Witwatersrand.	Western Australia.	India.
	oz.	oz.	oz.
1890	494,817	34,209	104,932
1892	1,210,869	59,548	163,140
1894	2,024,163	207,131	209,729
1896	2,280,892	281,265	321,878
1897	3,034,679	688,603	389,779
1898	4,295,602	1,050,182	415,147
1899	4,369,166*	1,539,212	440,249
1900	251,891	1,472,990	493,342
1901	238,993†	1,879,389	504,348
1902	1,690,098	2,177,442	514,291
1903	2,859,477	2,430,310	597,786
1904	3,303,905*	2,175,508*	563,998*

\* Including 300,000 oz. estimated to have been extracted after the declaration of war.

† Seven months only; crushing resumed in May 1901. This and subsequent Witwatersrand figures are in *fine* ounces.

‡ Eleven months.

In **Rhodesia** steady progress is being made, the output in 1899 being only 65,300 ounces, while in 1901 it had reached 172,150 ounces; in 1903 the total was 231,870 ounces, and during the first eleven months of 1904 239,637 ounces. While the development has been steady, the industry has not yet reached a position of real importance. The discovery was reported during 1904 of **Banket reefs**, the accounts of which

are of a most favourable character, though at present operations in connection with them have only been of an experimental kind.

In other parts of the world the principal areas in which British investors are interested are: New Zealand, Queensland, British Columbia, Klondyke, and West Africa. No developments of any importance occurred in connection with any of these countries during 1904.

**Goluchowski, Count Agenor**, Austro-Hungarian Minister for Foreign Affairs, was b. in 1840. He entered upon his diplomatic career in the Ministry for Foreign Affairs, and in '72 was appointed Attaché and afterwards Secretary of Embassy at Berlin. He then went to Paris as Counsellor of Embassy, and there married a daughter of Prince Joachim Murat. He was Minister at Bucharest, '87-'93. He is a large landed proprietor in Galicia, and has sat as a Conservative in the Austrian Chamber of Peers. He was appointed Minister of Foreign Affairs on Count Kalnoky's resignation in May '05.

**Gould, F. Carruthers**, the greatest political cartoonist of the day, was b. at Barnstaple in 1845, and was ed. in that town. He entered a local bank at the age of 16, and at 20 came up to London and entered a stockbroker's office, eventually himself becoming a member of the Stock Exchange. As a boy his genius for caricature was noticeable, and on the Stock Exchange he found plenty of material ready to his hand. In '79 he began to illustrate the Christmas number of *Truth*, but his first journalistic work was done on the *Pall Mall Gazette* and *Budget* when Mr. Stead was editor. He very soon became a regular member of the staff, and with his colleagues transferred his services to the *Westminster Gazette* when the former paper passed into Mr. Astor's hands. For years his pictorial commentary on the proceedings at Westminster has been brilliant in the extreme, and latterly he has done the literary commentary also with equal success. His "Cartoons for the Crisis," during the general election of '95, afterwards republished separately, firmly established his reputation as a political caricaturist, and he has since enhanced it. He is now assistant editor of the *Westminster Gazette* and editor of *Picture Politics*.

### GREECE.

This country gained its independence in the famous struggle of 1821-29, after centuries of subjection to Turkey, and was in '30 declared a kingdom under the protection of Great Britain, France, and Russia. Under the Constitution of '64 the executive is vested in the King and his responsible ministers. The legislative authority is in the hands of the Boulé, a chamber of 235 representatives elected by manhood suffrage for four years. The deputies are each paid about £72 per session. The Greek orthodox Church, governed by a permanent council called the Holy Synod, is the State religion, but complete liberty of worship prevails.

The **Standing Army** consists of ten infantry regiments, eight battalions of light infantry and rifles, three cavalry regiments, and three regiments of field artillery. The Gendarmerie consists of sixteen divisions, and the men are borne upon the strength of the line. The peace strength of the army is about 280 officers and 25,000 men. As a matter of fact these numbers are never attained under ordinary circum-

stances, the number with the colours varying from 16,000 to 18,000. There are three general commands. The total war strength is 82,000 men and 114 guns. Including the territorial army, and its reserve, there are said to be some 160,000 men available, but the organisation is very defective. The Evzonoi highlanders are by far the best troops.

Service is for 2 years with the colours and 8 in the reserve, 8 in the National Guard and 10 in its reserve; the cavalry, however, spending 10 years in the National Guard and 8 in its reserve.

Education is compulsory between the ages of 5 and 12, but the law is not enforced, and illiteracy largely prevails. The chief industry is agriculture, carried on largely by peasant proprietors, and the chief exports are currants, ores, wines, fruit, and olive oil. There are 643 miles of railway open. There are large numbers of Greeks outside the limits of the kingdom. In Asia Minor there are probably about 2,000,000, in European Turkey about 4,000,000, and large numbers dwell in Crete, Cyprus, etc. The population of Athens was in '96, 111,486.

In the war with Turkey, which arose in '97 out of Greek sympathy with Crete, Greece was defeated, and had to pay an indemnity of £14,000,000, and to submit to a strategic reconstruction of the frontier in Turkey's favour. She also had to accept international control in financial matters in the shape of a Financial Commission established at Athens, to which the revenues from specified duties and the State monopolies in salt, petroleum, matches, etc., are assigned for the payment of the interest on the external debt. The Financial Commission has entrusted the administration of the monopolies and the collection of the assigned revenues to a Greek Company, which acts under the control of the Commission.

**Area** about 24,528 sq. m.; **pop.** ('96) 2,433,806, estimated, 1903, 2,645,175. **Revenue**, 1900 (£1 = 40 drachmai), £2,803,354; 1902, £2,861,112; **expenditure**, 1900, £2,843,152; 1902, 3,020,312. **Public Debt**, 1904, £33,063,704 (£28,424,120 gold and £4,639,584 paper); **imports**, 1901, £5,620,248, 1902, £5,489,174; **exports**, 1901, £3,759,753; 1902, £3,186,539.

**Ministry: Premier and Minister of the Interior**, M. Theotokis.—**Foreign Affairs**, M. Romanos.—**Finance**, M. Kalogeropoulos.—**Justice**, M. Levidis.—**Public Instruction**, M. Lombardos.—**War**, General Smolenski.—**Marine**, M. Spiro Koumoundouros.

**Minister in London**, M. D. G. Métaux, 1, Stanhope Gardens, S.W.—**Consul-General**, T. Stavridis, 40, Old Broad Street, E.C.—**Secretary of the Consulate General**, J. Methodios Ioannides.

**British Minister at Athens**, Sir Francis E. H. Elliot, C.K.M.G.—**Secretary of Legation**, Ch. des Graz.—**British Delegate on International Financial Commission**, H. P. Harvey, C.B.—**Consuls**: C. A. Blakeney (Corfu), F. B. Wood (Patras), Hon. R. Walsh (Piræus), W. H. Cottrell (Syra), and A. A. C. Merlin (Volo).

### Sovereign.

**George I.** (Christian William Ferdinand Adolphus George), is the second son of King Christian of Denmark, and a brother of the Dowager Empress of Russia and Queen Alexandra; b. 1845. Chosen King of Greece in '63, in succession to Otho I. King George married

in '67 Princess Olga, daughter of the Russian Grand Duke Constantine, and has five sons and one daughter. An attempt to assassinate him was made in '98, but happily failed. The eldest son and heir-apparent is Prince Constantine, Duke of Sparta, b. Aug. 2nd, '68, who married Princess Sophia of Prussia, sister of the Emperor William II., in '89. The second son, Prince George (b. '69), has been High Commissioner in Crete since '98. Another son, Prince Andrew, married Princess Alice, eldest daughter of Prince Louis of Battenberg, in 1903. The present King is of the Lutheran faith, but by the constitution his heirs and successors must be members of the Greek Orthodox Church.

### *Political Parties.*

Until '90 the two chief party leaders were **M. Tricoupi** and **M. Delyanni**, but in '90 a section of the Opposition under **M. Delyanni** broke away from him to follow **M. Ralli**, the chief of the Neo-Hellenic party. **M. Tricoupi** withdrew from political life in '95, and died in '96. **M. Delyanni** remained in office till April '97, when the popular feeling against him aroused by the Greek reverses during the war with Turkey led the King to dismiss him. **M. Ralli** succeeded as Premier, but on Oct. 2nd, '97, was succeeded by **M. Zaimis**, who had formerly been a follower of **M. Delyanni**, and whose accession to office led to a split among the Delyannists. **M. Zaimis** resigned (Nov. 7th, '98). At the general election which followed in Feb. '99, the Tricoupists, under **M. Theotokis**, gained a large majority, and **M. Theotokis** became Premier. The constitution of parties was as follows: Tricoupists, 128; Delyannists, 37; Zaimists, 28; and 14 Independents. In Nov. 1901 **M. Zaimis** returned to office, and in Dec. 1902 **M. Delyanni** took office once more. On his fall in June 1903, first **M. Theotokis**, then **M. Ralli**, and then **M. Theotokis** again, formed an administration.

### *History, 1904.*

When the Chamber met after the Christmas vacation (Feb. 1st) the Finance Minister, **M. Simopoulos**, introduced the Budget for 1904, and **M. Theotokis** introduced a series of measures for the reorganisation of the army. The annual number of recruits was increased from 6600 to 13,600 by abolishing various grounds of exemption from military service, but the period of service was reduced from two years to eighteen months. A special Army Fund was proposed, to which the sum of 4,500,000 drachmai was to be allotted yearly, in order to provide for the service of a loan of 40,000,000 drachmai required for the purchase of military material. Economies had been effected in the expenditure, but these measures, said the Prime Minister, would necessitate fresh taxation, and the Government proposed to increase the duties on imported wheat, and the taxes on licences, house property, etc. The Opposition protested against the increased taxation, particularly in regard to imported cereals, and eventually it was agreed to substitute an assignment of one-tenth of the total customs receipts of the kingdom, and to make good the loss to the ordinary revenue by a general increase of the import duties.

The first section—from Piræus to Skimatari—of the new railway from Piræus to Demerli,

connecting Thessaly with the capital and the principal seaport, was opened by the King (March 19th). The International Financial Commission issued its sixth annual report for the year ended Jan. 13th, 1904 (April 1st). The receipts amounted to £1,805,890 (3,307,867 f. gold and 63,595,914 paper drachmai). The expenditure was £1,574,188 (1,266,354 f. gold and 5,894,312 paper drachmai), leaving a balance of £231,702 (2,041,513 f. gold and 5,701,602 drachmai).

**M. Simopoulos**, the Finance Minister, resigned office (Oct. 16th) and was succeeded by **M. Kalogeropoulos**. An agreement with Great Britain was signed (Nov. 23rd) containing modifications, in favour of specified British products, of the commercial treaty of 1886 and of the Convention of 1890, in return for the withdrawal of the British protest against recent legislation with regard to the current tariff. The agreement is to remain valid for five years.

The Prime Minister (Dec. 21st) outlined his new financial programme, embodying many economies, and remodelling certain taxes to make a saving of 7,500,000 drachmai (£300,000), by which to carry out the proposed military reorganisation. He also submitted Bills for reducing the number of deputies from 234 to 150, for enlarging the electoral districts, and for forbidding, to a great extent, the candidature of military officers at elections. The Minister of Finance submitted the Budget for 1905, amounting both in receipts and in expenditure to 121,700,000 drachmai (£3,042,500).

**Greenwich Hospital.** This ancient institution was originally a Royal Palace, and was appropriated as "a memorial of the virtues of good Queen Mary, of the love and sorrow of King William, and the great victory of La Hague," to receive disabled seamen and relieve the widows and orphans of seamen. In '67 it was resolved to close the Hospital as an asylum for disabled seamen, and to devote the Hospital funds to pensions for officers and men, the education and maintenance of their children, gratuities to relatives dependent on men who died in the naval service, etc. In '85 the management was reformed, and a Director of Greenwich Hospital was appointed. The present Director is **Mr. C. H. R. Stansfield**. The funds are derived from the investment of over £4,000,000 of capital, landed estates in the north of England, house property at Greenwich, and Exchequer grants amounting to £21,000 a year.

**Gresham College.** The Gresham Lectures, as well as the College in which they are delivered, owe their institution to the munificence of **Sir Thomas Gresham**, the "Royal Merchant" of Queen Elizabeth. By his will, dated July 5th, 1575, **Sir Thomas** bequeathed certain rents growing out of the Royal Exchange, which he built, to the Corporation of the City of London, and to the Mercers' Company, for the "erecting and maintaining of divers lectures in sundry faculties"—divinity, law, physic, geometry, astronomy, music, and rhetoric. The lectures were organised and commenced in June 1597. The buildings of **Gresham House**, which had thus become Gresham College, were pulled down in 1768, and the General Excise Office erected on the site, the property having been acquired by the Crown for an annuity of £500. In '76, whilst the Earl of Selborne was Master of the Mercers' Company, the Gresham Lecturers submitted two schemes for the improvement of

the Lectures, and the recommendations under this head were adopted, the principal being that all the Lectures should be delivered in English instead of Latin and English, twelve lectures to be given in each year by each Professor. The names of the present Gresham Lecturers are as follows: **Physic**, E. Symes Thompson, M.D.; **Rhetoric**, J. E. Nixon, M.A.; **Astronomy**, Rev. E. Ledger, M.A., F.R.A.S.; **Law**, G. H. Blakesley; **Geometry**, W. H. Wagstaff, M.A.; **Music**, Sir J. F. Bridge, M.V.O.; **Mus. Doc. (g.v.)**; **Divinity**, Rev. W. H. Thompson, B.A., LL.D.; Clerk to the Gresham Committee, Sir John Watney, Mercers' Hall, E.C.

**Gripenberg, General Oscar Casimirovitch**, appointed to command the second Manchurian army, Sept. 25th, 1904, was b. in 1838. He first gained distinction in the Crimea, and by his services at the time of the Polish insurrection in '63, and in the Turkestan campaigns of '67 and '68, when he gained the Cross of St. George and a sword of honour, and was appointed aide-de-camp to the Czar. In the Russo-Turkish war he was in command of the Moscow Regiment of Guards, and for his services was promoted to be Major-General. Subsequently he held various appointments in Russia, and at the time when he was chosen for the command of the 2nd Manchurian Army he was in command of the Vilna Military District.

## GUATEMALA,

Guatemala is the most northerly republic of Central America, bounded on the west and north by Mexico, on the east by British Honduras and Salvador, and on the south by the Pacific. It formerly formed part of the Confederation of Central America, but the Republic was established in 1847. Governed by a President, elected for six years. The legislative power is vested in a National Assembly, elected by universal suffrage for a term of four years, and a Council of State of 13, part elected by the Assembly and part nominated by the President. Roman Catholicism is the chief religion, but liberty prevails. Education free and compulsory. Army numbers about 7000 officers and men, with militia about 57,000. The soil is very fertile, and the cultivation of rubber is being encouraged. Minerals are found, but are little worked. A new railway uniting the Central, Southern and Western Departments was opened Nov. 21st, 1903, and there are in all over 400 miles of line open. Chief products: coffee, rubber, hides, bananas, and sugar. Area, about 50,000 sq. m.; pop. 1,647,300, of whom 60 per cent. are pure Indians. Capital, Guatemala la Nueva, pop. 75,000. Revenue, 1903, £220,000. External debt, 1903, £1,741,104. The regular service of the loan has been suspended. A general meeting of the bondholders of the External Debt was held on Dec. 1st, 1904, and carried a resolution protesting "energetically against the conduct of the Guatemalan Government in allowing its External Debt to remain in total default during five years, and its action in repudiating on three successive occasions the agreements

entered into for the settlement of the debt by its duly accredited agents, and declares that the proposals of settlement contained in the *ad referendum* agreement of July 13th, 1904, made with Dr. Padilla, acting on behalf of the Guatemalan Government, are withdrawn, and that the bondholders now claim their full rights under the arrangement of '95." Imports, 1901, £851,791; 1902, £803,373; 1903, £594,327; exports, 1901, £1,503,897; 1902, £1,806,300; 1903, £1,343,707.

President: M. Estrada Cabrera, elected in '99, and re-elected 1904 for the period 1905-11.

Ministry; *Foreign Affairs*, Juan Barrios.—*War*, Luis Molina.—*Education*, J. Antonio Mandujano.—*Home and Justice*, Juan J. Argueta.—*Exchequer*, Guillermo Aguirre.—*Public Works*, José Flamenco.

Consul-General and Chargé d'Affaires in England, T. Tible-Machado, 31, Westminster Palace Gardens, Victoria Street, S.W.

British Minister at Guatemala, (Chargé d'Affaires) H. W. Harrison, C.M.G.—*Commercial Agent in Central America*, F. W. Melville, c/o British Legation, Guatemala.—*Consul at Guatemala*, H. A. R. Hervey.

Guildhall School of Music, Victoria Embankment, E.C., was established by the Corporation of London in '80, for the purpose of providing high-class instruction in the art and science of music at a moderate cost. Lessons in any branch of music can be had at fees varying from £1 11s. 6d. to £4 14s. 6d. per term. There are 110 scholarships, etc. Principal, Dr. W. H. Cummings, F.S.A.; Secretary, Mr. H. Saxe Wyndham; Lady Superintendent, Mrs. Charles P. Smith.

Guyot, Yves, b. at Dinan, Sept. 6th, 1848, is the son of a barrister at Rennes, where he pursued his early studies. He is an energetic Free-Trader, and as such was made, in '79, an honorary member of the Cobden Club. When still young he took a part in the revolution of Sept. 4th, '70, which, on the news of the surrender of Sedan, established the third Republic. An ardent reformer, but not a socialist, he became a member of the Municipal Council of Paris in '74, and conducted a campaign against the Prefecture of the Police in '78. He was elected a member of the French Parliament in '85, and took office as Minister of Public Works in '89. Appointed editor of the *Siccle*, an old-established Liberal paper, in which he now writes on economic subjects, he wrote "La Tyrannie Socialiste" ('93), "Les Principes de '89 et le Socialisme" ('94), "L'économie de l'Effort" ('96), "Le Bilan de l'Eglise" and "La Question des Sucres" (1901). He was one of the prominent leaders in the defence of Dreyfus, and waged a successful campaign for the abolition of the Continental sugar bounties. After their abolition by the Brussels Conference in 1902, he was honoured by a public banquet at the National Liberal Club. He has recently published "Les Conflits du Travail et Leur Solution," in which he argues that the contract of labour is a contract of exchange.

## H

**Hall, Marie**, violinist, was b. in Newcastle-upon-Tyne in April 1884, where she made her *début* as a violinist in 1894. At 14 she gained a scholarship at the R.A.M., of which she was unable to avail herself. A year afterwards her exceptional talent attracted the attention of some Bristol musicians, who placed her under Prof. Johann Kruse in London. Later she studied for a year with Prof. Sevcik (teacher of Kubelik and Kocian) of Prague, and very successfully played in public. She first appeared in London at St. James's Hall, Feb. 16th, 1903, when her remarkable technique and fine tone were unanimously recognised. 10, Loudoun Road, London, N.W.

**Hamilton, Lieut.-Gen. Sir Ian, K.C.B., D.S.O.**, was b. at Corfu, Jan. 16th, '53, and is the son of Col. C. Hamilton. Ed. at Cheam and Wellington College, he entered the Army in '72, served in the Afghan war, the '81 campaign in South Africa, and was wounded at Majuba. He also saw active service in the Egyptian and Soudan campaigns, in Burma, Chitral, and Tirah. At the beginning of the Boer War he distinguished himself at Elands-laagte and Ladysmith, and was one of Lord Roberts's most efficient subordinates in the advance upon Johannesburg. He returned to England in Jan. 1901 to become Military Secretary to Lord Roberts, and on Nov. 9th sailed for South Africa again to take up his appointment as Chief of Staff to Lord Kitchener. After the conclusion of peace he resumed his duties as Military Secretary at Headquarters, and on April 23rd, 1903, was appointed Quartermaster-General. He was sent to Manchuria in 1904 to represent the Indian Army in the war, and on his return in the early part of 1905 he will take the command of the Southern Military District.

**Hamilton, Sir Edward W., K.C.B., K.C.V.O., I.S.O.**, Permanent Financial Secretary to the Treasury, eldest son of the Bishop of Salisbury, was b. at Salisbury, July 7th, 1847; educated at Eton and Christ Church, Oxford; and entered the Treasury '70. He served as Private Secretary to Right Hon. R. Lowe '72-3, and to Mr. Gladstone '80-5. In '85 he was appointed Principal Clerk Finance Division, in '92 Assistant Financial Secretary, in '94 Assistant Secretary, and in 1903 Joint Permanent Secretary. He has published a book on the National Debt and a monograph on Mr. Gladstone. He is also a Bachelor of Music.

**Hardinge, Sir Charles, K.C.M.G., K.C.V.O., C.B.**, British Ambassador at St. Petersburg, is 2nd son of the 2nd Viscount Hardinge, and was b. 1858, was ed. at Harrow and Trinity College, Cambridge, and entered the Diplomatic Service in 1881. He was at Constantinople till '84, then went to Berlin, and was appointed to Washington in '85. Here he was promoted to be Second Secretary. He was at Sofia '87-91, at Paris for three years, and then became Secretary of Legation at Teheran '96-8, and at St. Petersburg '98-1903. He was appointed Assistant Under-Secretary of State for Foreign Affairs in Feb. 1903, and in March 1904 Ambassador at St. Petersburg. He married in '90 the Hon. Winifred Sturt, da. of the late Lord Alington.

**Hardy, Thomas**, author, was b. 1840, in Dorsetshire, and commenced his career as a church architect. For an essay dealing with "Coloured Brick and Terra-cotta Architecture," he received the medal and prize of the Institute of British Architects. His first noteworthy literary effort was a novel published in '71, entitled "Desperate Remedies." In '74 the work which made him generally known appeared in the pages of *Cornhill Magazine*—"Far from the Madding Crowd." Other novels from his pen have been "Under the Greenwood Tree" ('72), "A Pair of Blue Eyes" ('73), "The Hand of Ethelberta" ('75-6), "The Return of the Native" ('78), "The Trumpet Major" ('80), "A Laodicean" ('81), "Two on a Tower" ('82), "The Mayor of Casterbridge," "The Woodlanders," "Wessex Tales," "A Group of Noble Dames," "Tess of the D'Urbervilles" ('91), which was held by some of the critics to be the finest of all his works, "Life's Little Ironies" ('94), "Jude the Obscure" ('95), and "The Well-Beloved" ('92 and '97). In '98 was published "Wessex Poems," his first volume of verse, written at intervals, and illustrated by the author. A second volume of verse, "Poems of the Past and the Present," appeared in 1901; and in 1904 the first part of a Napoleonic drama of a remarkable kind, in blank verse, entitled "The Dynasts." In June '93 Mr. Hardy produced a dramatic piece called "The Three Wayfarers." "Tess" also has been dramatised and played in America. He was made J.P. for Dorchester in '84, and for Dorsetshire in '94. Athenæum and Savile Clubs.

**Harmsworth, Sir Alfred C., Bart.**, the principal proprietor of the *Daily Mail*, was b. July 15th, 1865, at Chapelizod, co. Dublin, and is the eldest son of the late Alfred Harmsworth, barrister. Ed. at the Stamford Grammar School, he founded *Answers*, and later on the *Daily Mail*, while he is one of the proprietors of the *Evening News* and other journals, the *Harmsworth Magazine* and other publications. He equipped the Jackson Arctic expedition in '94. Made a baronet, July 24th, 1904.

**Harris, Vice-Admiral Sir Robert H., K.C.B., K.C.M.G.**, President of the Royal Naval College, Greenwich, was b. Oct. 12th, 1843. He has been Commodore of the Training Squadron, was A.D.C. to her late Majesty Queen Victoria, British member of the Council of Admirals which pacified Crete in '97-98, when he received his K.C.M.G., and Commander-in-Chief on the Cape Station during the Boer war, after which he received his K.C.B. and the cordial thanks of Lord Roberts. He was appointed Vice-Admiral in 1901 and President of the Royal Naval College in Aug. 1903. He has written several books on naval subjects.

**Hart, Sir Robert, Bart., G.C.M.G.**, Director of Chinese Imperial Maritime Customs, is the eldest son of Mr. Henry Hart, of Portadown, co. Armagh, and was b. 1835. Ed. at Taunton Wesleyan School, and Queen's Coll., Belfast, he entered the Consular Service in China '54. In '59 he resigned in order to join the Chinese Maritime Customs. He was appointed Inspector-General in '63, and in '85

assumed his present post. He has many Chinese decorations. During the Boxer outbreak he underwent the siege in the British Legation at Peking, and has since published his somewhat remarkable views on the position in China under the title, "These from the Land of Sinim." His academic and honorary distinctions include hon. M.A. and LL.D. Queen's University, Ireland, hon. LL.D. Michigan University, Hon. Member Royal Asiatic Society, Hon. Fellow Royal Statistical Society, and Hon. Member Institut de Droit International. He has been decorated by the sovereigns of almost every European country except Russia, was given the Peacock's Feather, China, in '85, and the brevet title of Junior Guardian of the Heir Apparent, China, in 1901.

**Hauptmann, Gerhart**, dramatic poet, was born at Salzbrunn, in Silesia, Nov. 15th, 1862. He passed from agriculture to art, to university studies in natural science; settled for some time as sculptor in Rome, later on in Switzerland and Berlin, visited America, returned to agriculture to become thoroughly familiar with the peasant classes. Married in '84, he published in '85 his first poem, an epic in classical style. But he soon, under the influence of Ibsen, turned to the drama, and created a great sensation by his powerful, sometimes horrifying, pictures of the lives of the lower middle and lower classes. "Before Sunrise" ('89) was followed by "A Peace Festival" ('90), and "Lonely Men" ('91). But the greatest effect he produced by "The Weavers," depicting powerfully the circumstances of an industrial population. There followed "Our Colleague Crampton," dealing with the drink mania, and "Der Biberpelz" ('92), the latter played in London 1901, satirising abuses of functionalism. "Hannele" has a religious colouring. His powerful historical drama "Florian Geyer," a picture of the peasant war in the sixteenth century, repelled many by its occasionally crude realism. He regained favour by the partly mystical "Versunkene Glocke" and by "Fuhrmann Henschel."

**Hay, Colonel John**, American Secretary of State since '98, was b. at Salem, Indiana, in 1838, and ed. at Brown University. He was a barrister practising in the Supreme Court of Illinois till '67, when he gave up his profession in order to become private secretary to President Lincoln. He also served as his aide-de-camp, and took an active part in the field as Adjutant and Lieut.-Colonel. After President Lincoln's death he continued his political and diplomatic career, and was appointed Secretary of Legation and Chargé d'Affaires at Paris ('65), Vienna, and Madrid. He then became President Hayes' First Assistant Secretary of State '79-81. Colonel Hay has long been favourably known through his literary efforts, the "Pike County Ballads" having won him high favour with the reading public. In conjunction with Colonel Nicolay he wrote the "Life of President Lincoln," a task for which he was specially fitted. In Feb. '97, on President McKinley's accession, he was appointed Ambassador to Great Britain, a post which he filled with distinction till, at the call of duty, he accepted the office of Secretary of State in '98. See UNITED STATES.

**Hayashi, Viscount Tadasu**, Japanese Ambassador to Great Britain, was ennobled for his distinguished services at the Japanese Foreign

Office during the war with China. He came to England in 1866 to study, and while still a young man began his official career in his own country. He was first Governor of the province of Kobe, but was then transferred to the Foreign Office, and after the Chinese War assisted in the negotiation of the treaty of peace. He was next sent as Minister to St. Petersburg, and in the autumn of '99 he was appointed to succeed Mr. Kato as Ambassador in London, where he took up his duties in July 1900. He served in '99 as Japan's chief delegate at the Hague Peace Conference.

### HAYTI.

Hayti, called Hispaniola by Columbus, and afterwards San Domingo, is the second largest island of the Antilles, lying between Cuba and Puerto Rico. **Area**, 28,249 sq. m.; pop. 2,310,000. There are **two states** in the island. The larger is the **Republic of San Domingo** (*q.v.*). The **Republic of Hayti** occupies the western portion of the island. **Area**, 10,204 sq. m.; pop. estimated (1903) at 1,347,140, the vast majority being of pure African blood. Capital, **Port-au-Prince**, pop. 70,000. It was originally a French colony, but was proclaimed independent in 1804, and is governed under a constitution drawn up in '89. The executive power is in the hands of a **President**, elected for seven years by the Senate and Chamber of Representatives, in whom rests the legislative power. The **Chamber of 95 members** is elected directly for three years by all male citizens, and the **Senate of 39 members** indirectly for six years. The religion is Roman Catholic, and elementary education is free. There is an army of about 7500 men, and a navy of five small vessels. Agriculture is the main occupation of the country, but comparatively little is done to till the fertile soil. The principal product is coffee, and the bulk of the trade goes to Havre. Cocoa and cotton are grown, the latter in increasing quantity. Minerals exist, but are unworked. **Revenue**, 1902, £660,379; 1903, £747,475; **expenditure**, 1902, £990,433; **debt**, 1904, £6,026,403 (including external £2,618,324, internal £3,040,959, and floating debts £367,120); **exports** (coffee, mahogany, logwood, cotton, cocoa, turtle-shells, and hides), '99, £2,800,000; **imports**, 1900, £981,688.

**President**, General Nord Alexis.

**Ministry**: *Foreign Affairs and Public Instruction*, Murville Frère. — *Interior and Police*, Emmanuel Thézan. — *Justice and Worship*, J. J. F. Magny. — *Finance and Commerce*, Cajuste Bijou. — *Army and Navy*, Cyriaque Célestin. — *Public Works and Agriculture*, Nèrè Numa.

**Legation**: *Minister Resident*, Dr. S. Viard, Artillery Mansions, 75, Victoria Street, S.W. — *Consul*, M. Maurice Erdmann, 32, Fenchurch Street.

**British Consul-General** at Port-au-Prince, A. G. Vansittart.

**Historical Manuscripts Commission**. A Royal Commission was appointed in 1869 to examine and report upon the collections of manuscripts in the possession of private families and municipal authorities, who have rendered the commissioners every assistance in the investigation and classification of manuscripts illustrative of history, constitutional law, and general literature. Numerous reports and many appendices thereto have been issued by the Commission, describing some hundreds of

private collections of manuscripts in Great Britain and Ireland. The Commission at present is constituted as follows: The Master of the Rolls (chairman); the Marquess of Ripon, K.G.; the Earl of Crawford, K.T.; the Earl of Rosebery, K.G.; Lord Edmond Fitzmaurice, M.P.; the Earl of Dartmouth; Lord Alverstone; Lord Hawkesbury; Lord Stanmore, G.C.M.G.; Lord Lindley; Sir Edward Fry; Sir H. C. Maxwell-Lyte, K.C.B.; Mr. John Morley, O.M., LL.D., D.C.L.; and Professor C. H. Firth, M.A., with Mr. R. A. Roberts as **Secretary**. The reports are prepared by various inspectors acting under the authority of the Commission, many of the historical papers examined being deposited by their owners in the Public Record Office for the purpose. **Office**, Public Record Office, Chancery Lane, W.C.

**Historical Society, Royal.** Hon. Secretary, H. E. Malton, M.A., 3, Old Serjeant's Inn, W.C.

**Hofmeyr, Jan H.**, South African journalist and politician, is the leader of the Afrikaner Bond, and has often represented Cape Colony at Colonial and other conferences. For some years Mr. Cecil Rhodes found him a staunch ally; but after the Jameson Raid he broke with Mr. Rhodes, and in the elections of '98, as wire-puller of the Bond caucus, was active in his opposition to him. At one time Mr. Hofmeyr advocated total separation of South Africa from England; but after the Transvaal War of '82 he acted as mediator between the Boers and the Cape Government, especially over the Swaziland question, and it was through his influence that a solution of the difficulty was arrived at. He was prominent in the negotiations which followed on the Bloemfontein Conference, '99.

**Home Arts and Industries Association.** Founded Nov. 1884. Supported by voluntary contributions. Its aim is to teach hand-work to the children of the poorer people by means of classes taught voluntarily by members of the association, and through such training to revive hand-work, and keep the people from the evils of idleness and drink. An annual exhibition of the work done in the classes is held in the gallery of the Royal Albert Hall (usually in May). **President**, The Rt. Hon. Earl Brownlow; **Hon. Treasurer**, Mr. A. K. Hitchens; **Director**, Miss Dymes; **Secretary**, S. C. Hendrey. **Office** and studios, Royal Albert Hall. **Bankers**, London and County Bank, High Street, Kensington, Branch.

### HOME OFFICE, THE.

The Home Office is the senior of the Departments of the Principal Secretaries of State. Its functions, which formerly extended to foreign, colonial, and military affairs are now strictly confined to the United Kingdom, and in some matters to England and Wales only. The affairs of the Isle of Man and the Channel Islands, however, still come to the Home Office.

The Home Secretary's duties are multifarious, and cover a wide range of subjects. He is, speaking generally, the medium of communication between the Crown and its subjects. **Addresses and Petitions to the Throne** are presented and answered through the Home Secretary; **Royal Warrants and Licences** relating to peerages, titles, decorations, changes of names and arms, and Royal Commissions are issued by him; and he is the authority for granting

**Certificates of Naturalisation.** He is the adviser of the Sovereign in the exercise of the prerogative of mercy in all cases arising in England or Wales, and it is on his advice that all pardons and remissions of sentence are granted to convicted persons. Hence the decision whether in cases of murder the capital sentence is to be carried out rests with the Home Secretary, and is among the most important and difficult of his duties. He also grants the licenses—formerly called "tickets of leave"—on which convicts are conditionally released before the expiration of their sentences.

To the Home Secretary belongs the general administration of the prison system in England and Wales, the maintenance of Broadmoor Criminal Lunatic Asylum, and the custody of all criminal lunatics, and the execution of the law relating to the Extradition of fugitive offenders from or to the United Kingdom. Apart from his action in the exercise of the prerogative of mercy, he is associated with the judicial system of England and Wales, for it is on his recommendation that **Recorders, Metropolitan Police Magistrates, and Stipendiary Magistrates** are appointed, and Commissions of the Peace are issued, and Courts of Quarter Sessions granted to Municipal Boroughs. He has also certain powers in the settlement of the salaries of Coroners, Clerks of the Peace, and Clerks to Justices. As the Minister to whom Parliament looks for the maintenance of order, he has under his direct supervision and control the **Metropolitan Police Force**, consisting of about 16,000 officers and men, and he has extensive powers in regard to the County and Borough Police Forces in England and Wales. The police bye-laws made by Municipal Corporations and County Councils which deal with such subjects as street betting, street music, the lighting of vehicles, etc., are subject to the Secretary of State's allowance. The reformatory treatment of habitual drunkards is another matter which comes within the jurisdiction of the Home Secretary, who makes regulations as to the treatment, both of inebriates who voluntarily resort to Retreats and of those who are committed by courts of law to Inebriate Reformatories. There are two "State" Reformatories, established and maintained by the Prison Commissioners, and at present eight "certified" Reformatories maintained by philanthropic bodies and local authorities.

Another of the most important features of Home Office work in modern times is the administration of many statutes relating to industrial questions. The laws which Parliament has passed for protecting the workers in mines, quarries, factories, and workshops are administered by the Home Office, which makes rules and orders of a legislative character for the protection of life and health in dangerous industries, and enforces them by means of a large staff of inspectors (40 Inspectors of Mines and Quarries and 140 Inspectors of Factories and Workshops). It is also the central authority (for England and Wales) under the Employment of Children Act, 1903, and the Shop Hours Act 1904. Byelaws made under the former Act and closing Orders made under the latter by local authorities require the confirmation of the Secretary of State. The Acts providing for Workmen's Compensation and those preventing the abuses arising from Truck in the payment of wages are also under the general charge of the

**Home Office.** Another staff of inspectors (4 in number) is charged with the task of seeing that the requirements of the **Explosives Act**, 1875, and the orders made under that Act, are carried out in the interest of public safety. The law concerning the **Housing of the Working Classes** (*q.v.*) is administered, so far as London is concerned, by the Home Office; and steps are taken to secure that railway or other schemes involving the displacement of any considerable number of persons of the working class shall contain proper provisions for rehousing. The Home Office is also an educational authority. The **Reformatory and Industrial Schools** established by voluntary agencies or local authorities for the special training of children who are either criminal or living in circumstances in which they are in danger of falling into crime, are supported mainly out of Parliamentary Votes, and are placed under the inspection and supervision of the Home Department. More than 20,000 children and youths are being trained in these schools.

The Home Office administers the **Acts relating to Anatomy**; its sanction, speaking generally, is necessary for the exhumation of human remains, and it has recently been charged by Parliament with the duty of prescribing regulations under which the practice of **Cremation** may be allowed. It is the Government Department concerned with the **Licensing Acts**, and makes regulations for the procedure governing the payment of compensation in certain cases of the extinction of licences under the Act of 1904; it issues orders for the **Protection of Wild Birds**; administers and enforces the law relating to **Experiments on Living Animals**; performs important functions regarding the custody, care, and repatriation of the inmates of lunatic asylums, who are by statute entitled to free communication with the Secretary of State; and it is the authority for laying down rules as to the care of children who have been taken out of their parents' custody under the **Prevention of Cruelty to Children Act**, and for deciding whether in any particular case such children shall be allowed to emigrate under the auspices of the guardians appointed under that statute, or shall be removed to other custody. Finally, the Home Office is a **Statistical Department**, publishing annually volumes of statistics as to the judicial business of the country (civil and criminal) as to mines and quarries, and as to factories and workshops, and from time to time preparing such returns on special subjects as Parliament may require of it.

**The Chief Permanent Officials are:—**

**Under-Secretary of State**, M. D. Chalmers, Esq., C.B., C.S.I.

**Assistant Under-Secretaries of State**, H. H. Cunynghame, Esq., C.B., and C. E. Troup, Esq., C.B.

**Principal Clerks**, H. B. Simpson, Esq., W. P. Byrne, Esq., C.B., and M. Delevingne, Esq.; **Acting Principal Clerk**, J. Pedder, Esq.

**Chief Inspector of Factories**, Dr. A. Whitelegge, C.B.

**Chief Inspector of Explosives**, Capt. J. H. Thomson.

**Inspector under Inebriates' Acts**, Dr. R. W. Branthwaite.

**Inspector of Reformatories**, J. G. Legge, Esq.

**Home Rule.** In the '94 edition, under the heading **SESSION**, Part I., sect. 3., and Part II., sects. 79-107, full particulars are given as to the provisions and progress of the Home Rule Bill,

which was introduced by Mr. Gladstone in the Session of '93. See also **IRELAND**.

## HONDURAS.

Honduras is a Republic in Central America, established in 1839, just before the Confederation of Central America broke up. Governed by a **President and Congress**, elected by popular vote for four years. Religious liberty is guaranteed by the Constitution, but Roman Catholicism prevails. Education is free, compulsory from 7 to 15 years of age, and secular. Army about 500, but there is a militia of about 20,000. The country possesses great agricultural resources and much mineral wealth, but these have been neglected because of the lack of capital and transport. Agriculture, however, is now showing signs of development. The revenue is derived mainly from the customs and from government monopolies in spirit, powder, and tobacco. **Chief products:** bananas, tobacco, sugar, indigo, wheat, gold, silver, and cattle. **Area**, 43,000 sq. m.; **pop.** about 600,000, the majority of whom are Indians. **Capital**, Tegucigalpa, pop. 12,600. **Revenue**, 1902, £287,500; **expenditure**, £264,500; **imports**, 1902, £257,501; **exports**, £401,441; **debt**, £5,398,570. The loans were raised for the purpose of constructing an inter-oceanic railway, but a small proportion only was expended for this purpose. The arrears of interest amount to £14,500,000.

**President**, Dr. Bonilla (elected Feb. 1903).

**Minister in London**, Señor Don Angel Ugarte, Queen's Hotel, Leicester Square, W.

**Consul-General in London**, M. J. Kelly, 8, Idol Lane, E.C.

**British Minister** (at Guatemala), H. W. Harrison (Chargé d'Affaires).

**British Consuls**, A. E. Melhado at Truxillo, R. J. Maclachlan at Puerto Cortes, Colin W. Campbell at Tegucigalpa, and Robert Motz at Amapala.

**Hope, Anthony**, is the pen-name of one of the most brilliant of the younger novelists of the day. His real name is Mr. A. H. Hawkins, and he is a younger son of the Rev. E. C. Hawkins, vicar of St. Bride's, Fleet Street, and was b. in London, Feb. 9th, 1863. He was ed. at Marlborough Coll. and Balliol Coll., Oxford, of which college he was a scholar. He gained a first class in Classical Schools in '85, and took his M.A. degree in '89. He took the step which is apparently necessary to success in literature by devoting himself at first to the law, and was called to the Bar at the Middle Temple in '87. His significantly named first book, "A Man of Mark," was published in '90, and there have since followed, "Father Stafford," "Mr. Witt's Widow," "Sport Royal," "Half a Hero," "The Prisoner of Zenda," "The God in the Car," "The Dolly Dialogues," a collection of exquisitely finished dialogues, "Count Antonio" ('95), "Comedies of Courtship" and "The Heart of Princess Osra" ('96), "Phroso" ('97), "Simon Dale" and "Rupert of Hentzau," a sequel to the "Prisoner of Zenda" ('98), "The King's Mirror" ('99), "Quisante" (1900), "Tristram of Blent" (1901), "The Intrusions of Peggy" (1902), and "Double Harness" (1904). A dramatic version of "The Prisoner of Zenda" proved very successful in '96. A comedy, "The Adventure of Lady Ursula," was successfully produced in the United States, and in London ('98), "English Nell," a dramatised version (in collaboration with Edward Rose), was brought out in Aug. 1900, and "Pilkerton's

Peerage" was produced at the Garrick in 1902. Mr. Hope married in 1903 Elizabeth, daughter of Mr. Charles Sheldon, of New York. Address: 41, Bedford Square, W.C.

**Hopwood, Sir Francis J. S., K.C.B., C.M.G.,** Permanent Secretary to the Board of Trade, was b. in 1860, and entered the Board of Trade as assistant law clerk in '86. He was appointed assistant solicitor in '88, and afterwards private secretary to the President of the Board. In '93 he became Secretary to the Railway Department, and was created C.M.G. for his services in connection with Colonial fisheries and other maritime questions. He was a delegate to the '95 International Railway Congress in London, and to the International Railway Congress in Paris, 1900, and was then made C.B. He acted as hon. sec. to the chairman of the Select Committee which inquired into the Jameson Raid in '96, and has often been given special official work in Colonial matters. In Aug. 1900 his name was prominent in connection with the Taff Vale Railway dispute. A Royal Commissioner on London Traffic 1903. He was appointed to succeed the late Sir Courtenay Boyle as Permanent Secretary in May 1901, and was promoted K.C.B. in the same year.

**Horological Institute, The British,** has for its main object the encouragement of the English watch trade. Technical classes and examinations are held by the Institute at its headquarters, Northampton Square, E.C., and certificates of competency are granted. It publishes monthly the "**Horological Journal**," which circulates among watchmakers, jewelers, and silversmiths. There are 245 members and 19 associates. **Secretary, F. J. Britten.**

**Horsley, Sir Victor, F.R.S., F.R.C.S.,** is a son of Mr. J. C. Horsley, R.A., and was b. at Kensington, 1857. He was ed. at Cranbrook School and University Coll. Hospital, and was Professor Superintendent of the Brown Institution '84-90; Fullerian Professor at the Royal Institution '91-3, and Professor of Pathology at University College '93-6. In '85 he acted as secretary to the Royal Commission on Hydrophobia. He took his M.D. at Halle. He was knighted June 26th, 1902.

**Horton, Rev. Robert F., M.A., D.D.,** Congregational minister, was b. 1855, ed. at Shrewsbury, whence he went to New Coll., Oxford ('74), where he commenced a brilliant college career by obtaining First Class in Moderations, and was President of the Union, and in '78 a First in Classical Greats. Elected Fellow of his college '79, but excluded from an examinership in the Rudiments of Faith and Religion by reason of his Nonconformist views. He began his ministry at Hampstead ('80), and his success there soon necessitated the building of a larger church, in the Lyndhurst Road, which was opened in '84. Chairman of the Congregational Union 1903. He has published "**Inspiration and the Bible**," '87; "**Revelation and the Bible**," '93; a course of lectures on "Preaching," delivered at Yale, and subsequently issued in book form as "**Verbum Dei**," '93; "**The Cartoons of St. Mark**," '94; "**The Teaching of Jesus**," '95; "**The Life of John Howe**," "**The Book of Proverbs**," in the Expositor's Bible, "**The Art of Living Together**," '96; "**The Four Pillars of the Home**," "**Oliver Cromwell, a Study in Personal Religion**," "**Success and Failure**," "**The Women of the Old Testament**," all in '97; "**Brief Sermons to Busy Men**,"

"**England's Danger**," "**The Commandments of Jesus**," '98; "**Alfred Tennyson: a Saintly Life**," 1900; "**The Pastoral Epistles**," (Century New Testament), and "**The Trinity**," 1901, and "**The Dissolution of Dissent**" 1902. He was summoned as a "**Passive Resister**" in Aug. 1904. Address, Chesils, Christ Church Road, Hampstead, N.W.

## HOSPITALS AND DISPENSARIES

**King Edward's Hospital Fund for London** was formed in 1897, on the initiative of H.M., who was then Prince of Wales, to commemorate the 60th anniversary of Queen Victoria's reign. The total paid to the Fund for the eleven months ending Dec. 31st, '97, was £227,552. The total receipts in '98 were £39,272, in '99 £48,536, in 1900 £51,549, in 1901 £53,189, in 1902 £604,803, and in 1903 £83,484, making a total of £1,108,385. The awards have amounted to £433,326, and more than £664,000 has been invested. The procedure is that hospitals lying within a radius of seven miles from Charing Cross, or within the London County Council area, send in applications for grants, and a special Visiting Committee then inspect the hospitals and report to the Distribution Committee, who make recommendations to the Council of the Fund, the attention of the governing bodies of the hospitals being also called to defects in accommodation and management. Since '97 the total number of beds reopened as free beds has been 443. **Founder and Patron, H.M. King Edward VII.** The **President** is H.R.H. the Prince of Wales; the **Treasurer** is Lord Rothschild; the **Hon. Secs.** are the Right Hon. Sir Savile Crossley, Bart., M.V.O., M.P., Sir John Craggs, M.V.O., and Mr. J. Danvers Power; and all communications should be addressed to the Hon. Secretaries, King Edward's Hospital Fund for London, 81, Cheapside, London, E.C.

**The League of Mercy.**—Incorporated by Royal Charter to promote the welfare of Hospitals, by securing support for King Edward's Hospital Fund by obtaining small subscriptions. In its 5-years' existence (to end of 1903) the League has contributed £32,000 to the London Hospitals, and made several grants to provincial hospitals. In connection with the League the "**Order of Mercy**" has been instituted by H.M. the King as a reward for distinguished *personal service*. **Patron of the League and Sovereign of the Order, His Majesty the King.** **Grand President and Lady Grand President, T.R.H. The Prince and Princess of Wales.** **Hon. Treasurer, Sir Henry Burdett, K.C.B.** **Hon. Secretaries, Lord Wolverton, Sir William J. Collins, M.D., Mr. J. Harrison, M.V.O.** **Hon. Registrar, Mr. E. W. Wallington, C.M.G.** **Organising Secretary, Mr. Reginald G. Lund.** **Offices, 29, Southampton Street, Strand, London, W.C.**

**The Metropolitan Hospital Saturday Fund** is a regular weekly collection controlled by the delegates of the Metropolitan Hospital Saturday Fund (which is quite distinct from the Hospital Sunday Fund), in aid of Hospitals and Dispensaries under the auspices of the Hospital Saturday Fund. The total collected in 1903 amounted to £23,278, and donations, etc., amounted to £395, the whole being divided amongst 195 hospitals, dispensaries and other institutions. The Offices of this fund are at 54,

Gray's Inn Road, W.C. Secretary, Mr. W. G. Bunn.

The Metropolitan Hospital Sunday Fund was founded in '73 by the late Dr. James Wakley, editor of the *Lancet*, and by the then Lord Mayor, Sir Sydney H. Waterlow, Bart., who is still its Vice-President. The total sum collected on behalf of the Hospital Sunday Fund during 1903-4 was £63,065. The financial year closes October 31st, and the report of the Council is published in the third week of December. Secretary, Sir Edmund Hay Currie; address, Mansion House, E.C.

The "Bischoffsheim" Ambulance Service of London (late Hospitals Association, Street Ambulance Branch) was established in '89 for the succour and safe removal of cases of street accident in the Metropolis. Possesses 57 stations, of which 30 are public thoroughfare stations, 11 are at fire-stations, and 16 are at hospitals. Office, St. Mary's Hospital, Paddington, W. Treasurer, Mr. H. L. Bischoffsheim; Hon. Secretary, Mr. Thomas Ryan, Secretary of St. Mary's Hospital, W., to which address all urgent communications should be sent.

### Hospitals and Dispensaries in London.

The following list comprises the most important, with their last notified annual income and secretary's address:—

**Alexandra Hospital for Children with Hip Disease** (£5247), Stanley Smith, Queen Sq., Bloomsbury.

**Belgrave Hospital for Children** (£1741), Percy Gates, 7, Victoria St., Westminster, S.W.

**Bethlem Hospital** (£45,000), A. H. Martin, Steward, Lambeth, S.E.

**British Hospital for Diseases of the Skin** (£785), Albert Wills, Hon. Sec., 29, Euston Road, N.W.

**British Lying-in Hospital** (£2439), A. C. Wickins, Endell St., Long Acre, W.C.

**Cancer Hospital**, The, free—no letters of admission required (£9822 ordinary, £11,643 extraordinary), F. W. Howell, Fulham Rd., S.W.

**Central London Ophthalmic Hospital** (£1952), Harry R. S. Druce, 238a, Gray's Inn Rd., W.C.

**Central London Throat and Ear Hospital** (£2597), R. Kershaw, Gray's Inn Rd., W.C.

**Charing Cross Hospital** (£24,324), Arthur E. Reade, Agar St., Strand, W.C.

**Chelsea Hospital for Women** (£5951), Herbert H. Jennings, Fulham Rd., S.W.

**Cheyne Hospital for Sick and Incurable Children** (£2628), H. Kemp Welch, Cheyne Walk, Chelsea. Legacies £900.

**City Dispensary** (£999), G. Noble Farmer, 98, Cannon St.

**City of London Hospital for Diseases of the Chest** (£10,163), H. T. Dudley Ryder, Hospital, Victoria Park, E.

**City of London Lying-in Hospital**, established 1750 (£5110), R. A. Owthwaite, 102, City Rd.

**City Orthopaedic Hospital** (£2650), E. Derenth, 27, Hatton Garden.

**Convalescent Hospital for Seamen** (included under Seamen's Hospital Society), P. Michelle, Seamen's Hospital, Greenwich.

**East London Hospital for Children and Dispensary for Women** (£10,518), T. Hayes, Shadwell, E.

**Evelina Hospital for Sick Children** (£6600), Alfred Yorke, Southwark Bridge Rd., S.E.

**Finsbury Dispensary** (£796), W. H. Pratt, 6A, Brewer St., Goswell Rd., E.C.

**Foundling Hospital** (£25,338), W. S. Wintle, M.A., Guilford St.

**German Hospital** (£9450). Secretary, W. F. Cochran, German Hospital, Dalston, N.E.

**Mrs. Gladstone's Free Convalescent Home for the Poor**, more especially of the East of London (£1209), Lieut.-Colonel Neville, Hon. Sec.; James Atfield, Assist. Sec. Office, 38, Parliament St., S.W.

**Great Northern Central Hospital** (£15,088), Lewis H. Glenton-Kerr, Holloway Rd., N. The local hospital for North London.

**Guy's Hospital** (£47,082). H. Williams, Clerk. Office, St. Thomas St., Borough, S.E.

**Hampstead General Hospital**, the local hospital for Hampstead (£2536), George Watts, Hon. Sec., 1, Parliament Hill Rd., Hampstead, N.W.

**Hospital for Consumption and Diseases of the Chest** (£32; including legacies, £12,000). W. H. Theobald, Brompton.

**Hospital for Diseases of the Skin**, the oldest special hospital for cutaneous diseases; Finsen Light, X-rays, High Frequency treatment daily (£1595). George A. Richardson, 52, Stamford St., Blackfriars, S.E.

**Hospital for Diseases of the Throat** (£5609), W. Holt, 32, Golden Sq., Regent St.

**Hospital for Epilepsy, Paralysis and other Diseases of the Nervous System** (Incorporated), (£1944), H. Howgrave Graham, 4, Maida Vale.

**Hospital for Sick Children** (£12,357), Stewart Johnson, 49, Great Ormond St., W.C., and Cromwell House, Highgate.

**Hospital for Women** (£6198), David Cannon, 30, Soho Sq., W.

**King's College Hospital** (£15,841), Capt. H. S. Tunnard, Lincoln's Inn Fields, W.C.

**Lock Hospital and Rescue Home** (£8967). A. N. Cruikshank, Harrow Rd., and 91, Dean St.

**London Fever Hospital**, specially for infectious patients who can pay a small fee (£10,568), Major W. Christie, Liverpool Rd., N.

**London Homeopathic Hospital** (£8136), G. A. Cross, Superintendent, Great Ormond St., W.C.

**London Hospital** (Ordinary Income, £62,109; Ordinary Expenditure, £87,930). E. W. Morris, Sec., London Hospital.

**London Skin Hospital** (£1300). Secretary, H. Montague Duncan, 40, Fitzroy Square, W.

**Magdalen Hospital** (£5019; Expenses, £5345, Rev. W. Watkins, Warden and Secretary, Streatham, S.W.

**Metropolitan Dispensary** (£890), W. Norvell, 9, Fore Street, Cripplegate, E.C.

**Metropolitan Hospital** (£16,583), C. H. Byers, Kingsland Rd., N.E.

**Middlesex Hospital** (£16,745), F. Clare Melhado, Sec. and Superintendent, Mortimer St., Berners St., W.

**Mount Vernon Hospital for Consumption and Diseases of the Chest**, Hampstead and Northwood (£9321). William J. Morton, 7, Fitzroy Square, W.

**National Hospital for the Diseases of the Heart** (£2818), Capt. F. Handley, 32, Soho Sq.

**National Hospital for the Paralysed and Epileptic** (Albany Memorial) (£11,471). Nurses' Home in Powis Place. Treasurer, The Earl of Harrowby. Secretary, Godfrey H. Hamilton, Queen Sq., Bloomsbury, W.C.

**National Orthopaedic Hospital for the Deformed** (Ordinary, £3302), Keith Anstruther, F.Z.S., 234, Great Portland St., Regent's Park, and 47, Bolsover St., W.

**North-Eastern Hospital for Children**, Hackney Rd., N.E. (£7735), T. Glenton-Kerr, Hackney Rd., Bethnal Green, E.

**North London or University College Hospital** (£15,963), N. H. Nixon, Gower St., St. Pancras, W.C.

**North-West London Hospital** (£4540), A. Craske, The Hospital, 18, Kentish Town Rd., N.W.

**Paddington Green Children's Hospital**, London, W. (£4295), with Convalescent Home for 16 children at "Fair View," Slough, Bucks (£582); W. H. Pearce.

**Poplar Hospital for Accidents** (£9963), Lieut.-Col. Edward Feneran, 303, East India Rd., E.

**Queen Charlotte's Lying-in Hospital** (£4000), Arthur Watts, 191, Marylebone Rd., N.W.

**Royal Dental Hospital of London** (£7660), J. Francis Pink, 32, Leicester Sq., W.C.

**Royal Free Hospital** (£17,275), C. W. Thies, Gray's Inn Rd., W.C.

**Royal Hospital for Children and Women** (£3901), J. Houston, 184, Stamford St., S.E.

**Royal Hospital for Diseases of the Chest**, for the gratuitous relief of poor persons suffering from diseases of the chest in any of their various forms (£5232, Building Fund £1600). A. T. Mays, 231, City Rd., E.C.

**Royal Hospital for Incurables** (£32,967), W. David Newton, 106, Queen Victoria St.

**Royal London Ophthalmic Hospital** (Moorfields Eye Hospital) (£11,691), R. J. Bland, City Rd., E.C.

**Royal National Hospital for Consumption and Diseases of the Chest on the Separate Principle**, Ventnor (£11,829), E. Morgan, 34, Craven St., Charing Cross, W.C.

**Royal Orthopædic Hospital** (£1699 ordinary; Endowment legacy £1592), Tate S. Mansford, 55, Bolsover Street, W., pending amalgamation with the National Orthopædic Hospital.

**Royal Sea-Bathing Hospital**, Margate (£15,168; expenditure £7906), A. Nash, 13, Charing Cross.

**Royal Eye Hospital or Royal South London Ophthalmic Hospital** (£3857), Edwin Easton, St. George's Circus, Southwark.

**Royal Waterloo Hospital for Children and Women**, now being rebuilt with 300 beds (£3901). Captain J. Houston, Waterloo Bridge Road, S.E.

**Royal Westminster Ophthalmic Hospital** (£2495), T. Beattie-Campbell, King William St., West Strand, W.C.

**St. Bartholomew's Hospital** (£67,666), W. H. Cross, B.A., Clerk, West Smithfield, E.C.

**St. George's Hospital** (£28,024), C. L. Todd, Hyde Park Corner.

**St. John's Hospital for Diseases of the Skin** (£4806), Geo. A. Arnaudin, 49, Leicester Sq., W.C.

**St. Luke's Hospital for Mental Diseases**, Old St., W. H. Baird.

**St. Mark's Hospital for Fistula and other Diseases of the Rectum** (£2458). A. W. Sowden, City Road, E.C.

**St. Mary's Convalescent Home** (£4083), Miss E. Paget, 27, Kilburn Park Rd., N.W.

**St. Mary's Hospital** (£29,092), T. Ryan, Praed Street, Paddington, W.

**St. Peter's Hospital for Stone, Stricture and Urinary Diseases** (£4614), Irwin H. Beattie, Henrietta St., Covent Garden, W.C.

**St. Thomas's Hospital** (£55,858), G. Q. Roberts, Albert Embankment, Westminster, S.W.

**Samaritan Free Hospital for Women** (£7407), W. Guntrip King, 161-171, Marylebone Rd., N.W.

**Seamen's Hospital Society** (£18,123), P. Michelli, Greenwich.

**Small Pox and Vaccination Hospital**, Clare Hall, South Mimms, High Barnet. C. M. Wilkins, 30, Coleman Street, London, E.C.

**University College** (see North London).

**Victoria Hospital for Children** (£7813), H. G. Evered, Tite Street, Chelsea.

**West London Hospital** (£12,656). R. J. Gilbert, Hammersmith Rd., W.

**Westminster Hospital** (£17,259), S. M. Quennell, Broad Sanctuary, S.W.

## HOUSING QUESTION, THE.

In the 1902 ed. there appeared an article describing at length the evils arising from insanitary dwellings overcrowded with occupants, situated in insanitary localities overcrowded with buildings—evils which not only affect the poorer classes directly concerned, but also threaten the welfare of the whole community. The problem is naturally most acute in the large towns, but even in the rural districts it exists, because of the scarcity and insanitary condition of housing accommodation for the working classes. The legislation directed to the mitigation of these evils was also described at length in the 1902 ed., where a summary was given of the following Acts:—The **Shaftesbury Acts** (1851-85) increased the number of lodging-houses for the working classes, giving local authorities power to erect them and to improve the condition of common lodging-houses. The **Torrens Acts** ('68-82) gave power to close and demolish and subsequently rebuild insanitary dwellings. The **Cross Acts** ('75-82) dealt with whole areas, and gave power to local authorities to demolish and reconstruct.

## Housing of the Working Classes Acts.

A Royal Commission ('84-5) resulted in the **Housing of the Working Classes Act '85**, which extended the Shaftesbury Acts, and made new provisions as to the mode of acquiring land for housing purposes.

The **Housing of the Working Classes Act, 1890**, included 6 parts. Part I. deals with unhealthy areas, consolidating and amending the Cross Acts, provides that the medical officer of health in urban sanitary districts (rural sanitary districts being excluded from this section), whenever he is of opinion that a certain area contains houses, courts or alleys unfit for human habitation, or upon complaint by two justices of the peace or twelve ratepayers (who, if action is not taken, may petition the Local Government Board), shall make a representation to the local authority; and makes provision for an improvement scheme to be submitted by the local authority to the Secretary of State, or (in places outside London) to the Local Government Board, and confirmed by a special Act of Parliament. Part II deals with unhealthy dwellings. It consolidates and amends the Torrens Acts, and gives all sanitary authorities important powers and duties in relation to the closing and demolition of buildings unfit for human habitation, and in relation to the preparation and execution of schemes for the improvement of areas too small to be dealt with under Part I., proceedings being initiated, if necessary, by 4 householders living in or near the street where the nuisance arises making complaint to the medical officer, or

petitioning the Local Government Board in default of his action. Part III. consolidates and amends the Shaftesbury Acts as to the supply of working-class lodging-houses by the local authorities. Part IV. contains supplemental provisions, and Parts V. and VI. relate to the application of the Act to Scotland and Ireland. The Housing of the Working Classes Act '94 merely extends the borrowing powers under Part II. of the above Act.

In consequence of the difficulties experienced in working the '90 Act, the Housing of the Working Classes Act 1900 was passed. Sect. 1 enacts that where any council other than a rural district council have adopted Part 3 of the Housing of the Working Classes Act 1890, they may, for supplying the needs of their district, establish or acquire lodging-houses for the working classes under that Part outside their district. Sect. 2 sets forth: (1) the council of any rural district may, with the consent of the county council, adopt Part 3 of the Housing of the Working Classes Act 1890, either for the whole of their district or for any contributory place; (2) in giving or withholding their consent under this section, the county council shall have regard—(a) to the area for which it is proposed to adopt the said Part; (b) to the necessity for accommodation for the housing of the working classes in that area; (c) to the probability of such accommodation being provided without the adoption of the said Part; and (d) to the liability which will be incurred by the rates, and to the question whether it is, under all the circumstances, prudent for the district council to adopt the said Part. Other sections deal with the powers of Metropolitan boroughs to adopt Part 3 of the principal Act, their power to borrow money for that purpose being exercisable in like manner and subject to like conditions as for the purposes of Part 2 of that Act. The local authority may lease any land so acquired by them to any lessee on the condition that he erects and maintains on the land lodging-houses within the meaning of the Act. If a district council fails in its duty under the Act, its powers may be transferred to the county council. The Act applies only to England and Wales.

The Housing of the Working Classes Act, 1903 provides that the maximum period which may be sanctioned as the period for which money may be borrowed by a local authority for the purposes of the Housing of the Working Classes Act, 1890, and any Acts amending it, shall be eighty years. Where under statutory powers given after the date of the passing of this Act any land is acquired, whether compulsorily or by agreement, by any authority, company, or person, or where after the date of this Act any land is so acquired compulsorily under any general Act (other than the Housing Acts), certain proposals are to apply with respect to the provision of dwelling accommodation for persons of the working class. These enactments are of a very important character. If in the administrative county of London, or in any borough or urban district, or in any parish not within a borough or urban district, the undertakers [the authority, company, or person acquiring the land] have power to take under the enabling act [i.e. any Act of Parliament under which the land is acquired] working men's dwellings occupied by thirty or more persons belonging to the working class, the undertakers shall not enter on any such dwell-

ings until the Local Government Board have either approved of a housing scheme under this enactment or have decided that such a scheme is not necessary.

If, on a report made to the Local Government Board on an inquiry directed by them, they are satisfied that a scheme ought to have been made for the improvement of the area to which the inquiry relates, or of some part thereof, they may in their discretion order the local authority to make such a scheme either under Part I. (unhealthy areas) or Part II. (unhealthy dwelling-houses) of the principal Act, and to do all things necessary under the Acts for carrying into execution the scheme so made, and the local authority shall accordingly make a scheme or direct a scheme to be prepared, and do all things necessary for carrying such scheme into effect. Certain amendments of procedure for confirming improvement schemes are formulated, a power to modify schemes in certain cases is conferred, and provision is made for amending schemes of reconstruction under Part II. of the principal Act; the procedure for closing orders is amended, there is power to recover the cost of demolition where the amount realised by the sale of materials of a house closed as unfit for habitation is insufficient, and the procedure for the recovery of possession from occupying tenants in pursuance of closing orders is simplified. Any power of the local authority to provide dwelling accommodation or lodging-houses is to include a power to provide and maintain, with the consent of the Local Government Board, and, if desired, jointly with any other person, in connection with any such accommodation or lodging-houses, any building adapted for use as a shop, any recreation grounds, or other buildings or land which, in the opinion of the Local Government Board, will serve a beneficial purpose in connection with the requirements of the persons for whom the accommodation, etc., is provided, and to raise money for the purpose, if necessary, by borrowing.

#### *Standing Orders, etc.*

In addition to the above-mentioned public Acts, there is imposed by Standing Orders of Parliament an obligation to provide for rehousing on all promoters—whether municipal bodies or companies—who seek to obtain special powers, by means of local or private Acts, for undertakings which involve the clearance of sites occupied by dwellings for the working classes. New Standing Orders were recommended by a Parliamentary Commission in 1902. In connection with this subject, some of the provisions of the Public Health (London) Act 1891 are important. Vestries and district boards (now united as borough councils) are thereby required to make bye-laws with the object of abating nuisances and of securing proper sanitation; and to enforce them by means of a periodical inspection of all working-class lodging-houses other than common lodging-houses, which are under the supervision of the London County Council. They can apply to a court of summary jurisdiction to deal with a nuisance by means of a nuisance order, a prohibition order, or a closing order. If a vestry or district board (borough council) makes default in its duties, the county council may take proceedings, or may complain to the Local Government Board. The Public Health

Acts, '75 and '90, practically contain a sanitary code for places outside the Metropolis; and, in particular, provide for the regulation and inspection of working-class lodging-houses and of common lodging-houses by the sanitary authorities.

### *The Administrative Aspect.*

As to the administration of these Acts, a discussion of the subject, describing the action of the Metropolitan Board of Works and of its successor the London County Council, appeared in the 1902 ed. Some of the London Borough Councils are dealing energetically with the problem. The London County Council has taken vigorous action both directly, and indirectly through the subordinate local authorities. It appointed a Special Commissioner, who collected information as to existing general areas and particular houses classed as unfit for human habitation; and three-fourths of such areas have been improved and many separate houses pulled down. Finding it difficult to dispose of the cleared sites, the Council resolved to erect the necessary houses itself for rehousing the displaced population, and took action under Part III. of the '90 Act to purchase land and erect dwellings for the purpose of supplying housing accommodation. From a general summary of the Council's work in this direction up to March 31st, 1904, it appears that insanitary areas have been cleared displacing 12,021 persons, while other areas are being dealt with by displacing 4708 persons, or 16,819 in all, at a net cost of £1,143,536. The Housing Schemes, including the re-housing of the persons displaced as above, stand thus: Tenements occupied, 4691, containing 24,465 persons, at a cost of £1,484,000. Tenements in progress, 3154, for 18,728 persons, at a cost of £1,850,307. Tenements in preparation for 53,262 persons, at a cost of £2,484,380. The total Housing Schemes therefore provides for 96,435 persons at a cost of £5,018,687.

The Workmen's National Housing Council held a Conference on the London housing problem, Dec. 4th, 1904, and a resolution was carried, calling upon the Government to provide improved financial facilities for the carrying out of municipal housing schemes by either or all of the following methods: by empowering local authorities to issue non-interest-bearing notes, by grants from the Imperial Exchequer, and by a tax on site values, a proportion of the funds so raised to be set aside for housing purposes. The resolution also urged the London County Council and Borough and Urban District Councils in the area represented at the Conference to use their existing powers to a greater extent than heretofore, to build houses for the people requiring them, and to let the same at rents which should cover the actual annual cost, and so long as the present system of borrowing at interest prevailed, should not include any payment to the redemption sinking fund other than the proportion of it which would be included in the ordinary rate.

### *Associations.*

The Rural Housing and Sanitation Association was formed in 1903 to promote common action on the part of rural landowners and county and district councils: Hon. Sec., Miss A. Churton; Office, 9, Southampton Street, High Holborn, W.C. Other associations which devote themselves to this problem are the Workmen's

National Housing Council, which carries on a campaign in the country generally, stirring up the municipalities and local authorities wherever it can: Secretary, Mr. A. F. Knee, 10, Red Lion Court, Fleet Street, E.C.; the National Housing Reform Council, which supplies information, arranges conferences, etc.: Secretary, Mr. H. R. Aldridge, 432, West Strand, London, W.C.; the Liverpool Housing Association: Secretary, Mr. W. Knowles, The Beeches, Raby Drive, Bromborough; and the West of Scotland Housing Reform Council: Secretary, Mr. James MacLagan, 16, Drive Road, Govan, Glasgow.

Consult "Housing Handbook," by W. Thompson (King, 2s. 6d.); L.C.C. Report on Housing, 1855-1900 (King, 9s.); "Housing of the Working Classes Acts," by F. J. Allan (Butterworth, 7s. 6d.); "Public Health and Housing" (King, 5s.); Report of Royal Commission on Housing, 1889 [Cd. 4452, 8d.]

### *The Peabody Fund.*

The Peabody Fund, which is administered under a Royal Charter of incorporation by "The Governors of the Peabody Donation Fund," had its origin in the gift in 1862 by the late Mr. George Peabody, an American citizen, of £150,000, to be vested in trustees and devoted to the provision of improved dwellings at cheap rentals for persons of moral character and good conduct belonging to the poorer section of the industrial classes. The first residential block was completed and opened in '64 in Commercial Street, Spitalfields. Mr. Peabody made further donations of £200,000, and left a bequest of £150,000 for the same object, making a total of £500,000, to which has been added £927,561 received for rent and interest, bringing the total fund to Dec. 31st, 1903, to £1,427,561. Further blocks of similar dwellings have been put up in various parts of the Metropolis, at a total cost of £4,370,367 up to Dec. 31st, 1903. The 19 blocks of dwellings cover altogether an area of 2,038,915 square feet, and provide accommodation for upwards of 19,000 persons. There are provided 11,918 rooms, besides bath-rooms, laundries, and lavatories, comprised in 5387 separate dwellings. The present Governors include the Duke of Devonshire, the Right. Hon. Walter Long, M.P., and five others. The Ambassador of the United States to Great Britain, for the time being, is also a Governor *ex officio*. Secretary, F. B. Crouch, Esq. Head Offices: 54, Queen Street, Cannon Street.

### *Rowton Houses.*

"Rowton Houses," which have not inaptly been termed "Poor Men's Hotels," are buildings erected on the initiation of the late Lord Rowton for providing poor unmarried men with cheap accommodation in the shape of beds in airy compartments partitioned off (sometimes designated as cubicles), and the use of properly heated and ventilated public rooms for reading, writing, recreation, and smoking; baths, lavatories, etc.; in short, most of the conveniences afforded by the commercial and private hotels to the more opulent. They are not asylums nor charitable institutions, but are organised in accordance with the principles of commercial philanthropy—that is to say, that although intended to benefit the poorer classes, they are expected to pay a fair dividend of (say) 4 per cent., as a commercial investment. The charge is 7d. for one night or

3s. 6d. for seven nights. The first of these houses was erected in Vauxhall in '92 at a cost of some £30,000, by Lord Rowton himself, and provided accommodation for 484 persons. The venture having proved a successful one, a company "Rowton Houses, Limited," was formed to take over this house and to go on building others, and since that date four more, making the total accommodation for 3793 persons, have been opened in London, which have also been successful and yielded the dividend sought for. On the lamentable death of Lord Rowton in Nov. 1903 Sir Richard Farrant, who was Lord Rowton's advisor and had been connected with the scheme from the commencement, became Chairman of the Company. A sixth house, which will have from 1100 to 1200 beds, is now in course of erection at Camden Town. **Secretary, W. T. Dulake, Esq., 16, Great George Street, Westminster.**

#### **The Guinness Trust.**

In Nov. '89 Sir E. C. Guinness (now Lord Iveagh) gave £250,000, £200,000 of which, together with £25,000 given in '93 by the Goldsmiths' Co., and £120,626 net income from rents and investments, forms the Guinness Trust London Fund, with a capital at Dec. 31st, 1903, of £345,626. There were 9718 persons living in eight Trust Buildings at the end of 1903. Of the original gift £50,000 was appropriated to form the Dublin Fund, which is now called the Iveagh Trust. **Chairman of the Guinness Trust, Lord Iveagh; Secretary, Capt. T. H. Vickers. Offices, 5, Victoria Street, S.W.**

**Howard Association, The** (founded 1866) was instituted, under the patronage of Lord Brougham, to promote the best methods of treatment and prevention of crime and pauperism. The principles of the great philanthropist, John Howard, have been generally embodied in the work of the Association. It collects information both at home and abroad bearing on the present systems of punishment and prevention of crime. Many books and pamphlets dealing with prison

management, pauperism, boarding-out neglected children, vagrancy, and kindred subjects, have been disseminated by the Howard Association. The **Secretary** of the Association is Mr. Edward Grubb, M.A. **Office, Devonshire Chambers, Bishopsgate Without, E.C.**

**Huggins, Sir William, K.C.B., O.M., D.C.L., LL.D., Ph.D., F.R.S.,** was b. in London in 1824, and ed. at the City of London School and privately. He early devoted himself to astronomy, and in '56 built a private observatory at his residence at Tulse Hill, applying himself especially to spectroscopic astronomy. His contributions to science have been widely recognised. He was appointed Rede Lecturer '69, was President of the Royal Astronomical Society '76-8, of the British Association '91, and has been awarded a Royal medal, the Rumford medal, and the Copley medal of the Royal Society, of which he was in 1900 chosen President. In June 1902 King Edward VII. conferred on him the new "Order of Merit." From abroad recognition has come in the form of prizes from l'Académie Française, and of the ribbon of a Commander of the Brazilian Order of the Rose. He married in '75 Margaret, daughter of Mr. John Murray, of Dublin. Address: 90, Upper Tulse Hill, S.W. Athenæum.

**Humanitarian League, The**, was founded in 1891, its main object being to apply and emphasise, wherever possible, the principle that "it is iniquitous to inflict avoidable suffering on any sentient being." The League proposes a thorough revision and more humane administration of the criminal law and prison system, deprecates the various provocations to aggressive warfare, and urges the need of amending present social conditions. With regard to the treatment of animals, it advocates the prohibition of vivisection, condemns cruel sports, and aims at the mitigation of the sufferings to which animals are subjected in the cattle traffic and the shambles. The **Hon. Secretary** is Mr. Henry S. Salt, and the offices are at 53, Chancery Lane, London, W.C.

**Ibsen, Henrik**, the Norwegian dramatist and poet, was b. on March 28th, 1828, at Skien. After serving as apprentice to an apothecary for five years, he went to the Christiania University to study medicine. For some time he lived in great poverty, and a friend borrowed the money wherewith his first dramatic work ("Catilina," '50) was printed. In '51 he was appointed director of the National Theatre in Bergen founded by Ole Bull, and in '57 was appointed instructor of the Norwegian Theatre at Christiania, remaining in this position till '62. He went abroad in '64, and during the next 30 years resided, first in Rome, then at Dresden, and later on in Rome and Munich. In '66 was published his great dramatic poem, "Brand," which at last brought him fame and pecuniary independence. His next work was "Peer Gynt," a dramatic satire, his last play in verse. After this Ibsen gave himself up to writing dramas of modern life. The following are his modern plays: "The Pillars of Society" ('77), "A Doll's House" ('79), no doubt the most

discussed play of modern times all over Europe, "Ghosts" ('81), "An Enemy of the People" ('82), "The Wild Duck" ('84), "Rosmersholm" ('86), "The Lady from the Sea" ('88), "Hedda Gabler" ('90), "Master Builder Solness" ('92), "Little Eyolf" ('94), "John Gabriel Borkman" ('96), "When We Dead Awaken," a dramatic epilogue (1900). His works are translated into English and most European languages, and most of his plays have been performed in London. He has now settled down in his native country again, and lives in Christiania. On his 70th birthday a distinguished group of English admirers presented him with a handsome piece of silver. His only son, Dr. Sigurd Ibsen, is a member of the Norwegian Government, and is married to Björnson's eldest daughter.

**Ibert, Sir Courtenay Peregrine, K.C.S.I. C.I.E.,** Clerk of the House of Commons, was b. June 12th, 1841, at Kingsbridge, Devon, ed. at Marlborough Coll. and Balliol Coll., Oxon, where he took a first in Mods., first

Final Classical Schools, as well as the Hertford, Ireland, Craven, and Eldon Scholarships. He was called to the Bar at Lincoln's Inn '69, and practised as a Parliamentary and Equity draftsman and conveyancer. He was Counsel to the Education Department '79-82, legal member of the Viceroy's Council in India '82-6, Assistant Parliamentary Counsel to the Treasury '86-'99, and Parliamentary Counsel '99-1902. He was made Clerk of the House of Commons in Feb. 1902. He married a niece of the late Dean Bradley in '74, and has published "The Government of India" and "Legislative Methods and Forms." Address: Speaker's Court, Westminster, S.W.

**Imperial Federation.** The Imperial Federation League was formed at a conference held in '84 under the chairmanship of the late Right Hon. W. E. Forster. A special committee of the League appointed in '91 prepared a practical scheme of Federation, and presented its report on Nov. 12th, '92. (The substance of the report was given at length in the '99 and previous eds.) The League was then dissolved on Dec. 31st, '93. The movement is now being prosecuted by several bodies in the United Kingdom, as well as by branches founded by the League in Canada and Australia. Among the former may be mentioned **The United Empire Trade League**, Sir Howard Vincent, M.P., Hon. Sec., which advocates a commercial union of the Empire by means of preferential trading relations; **The British Empire League**, Sec., C. F. Murray, 112, Cannon Street, London, E.C.; **The Imperial Federation (Defence) Committee**, Hon. Sec., Howard d'Egville, 11A, Princes Street, Westminster, which advocates combination for the purposes of Defence on the lines of the report quoted above, in the first instance by maintaining a common Navy; **the Federal Union Committee** (4, Great George Street, Westminster), which advocates "legislative and administrative devolution applicable to the several countries of the United Kingdom, and the ultimate Federation of the Empire for the common ends." See COLONIAL CONFERENCE.

**Imperial Institute, The**, was founded in 1887 as a record of Queen Victoria's Jubilee (see eds. '87 and '88), and was transferred to the control of the Board of Trade by Act of Parliament in 1902. The principal work of the Institute is to display and illustrate the natural resources and industries of the Colonies and India, to promote by scientific and technical investigation the commercial utilisation of the raw materials of the Empire, and to supply full information concerning the Colonies and Dependencies of the Empire and their resources. The Institute includes a scientific and technical department, with extensive laboratories for the investigation and valuation of natural products, chiefly submitted through the Governments of India and the Colonies, with a view to their commercial utilisation; and a Reference Library and Reading-rooms containing works of reference and the principal newspapers and official publications and maps of India and the Colonies. The Indian and Colonial Collections in the Exhibition Galleries are open free to the public daily (Sundays excepted) from 11 a.m. to 5 p.m. in summer, and from 11 a.m. to 4 p.m. in winter. The Reference Library and Reading-rooms may be used by Life Fellows of the Institute and other persons properly introduced. The Institute works in co-operation with the Emigrants'

Information Office, established by the Colonial Office, at Westminster, and undertakes to supply information respecting emigration and settlement in the Colonies. **Director**, Prof. Wyndham R. Dunstan, M.A., LL.D., F.R.S. **Principal Assistant, Scientific and Technical Department**, T. A. Henry, D.Sc. (Lond.). **Superintendent Colonial Collections**, W. G. Freeman, B.Sc. (Lond.), F.L.S. **Superintendent Indian Section**, C. E. Jones, B.Sc. (Lond.), F.L.S. **Curator for Canada**, Harrison Watson. **Curator for Cape Colony**, Lewis Atkinson.

**Imperial Service Order, The**, was instituted by H.M. King Edward VII. in August 1902 as a decoration for members of the Civil Service of the Empire, to be conferred after long and meritorious service. It consists of the Sovereign, the Prince of Wales, and such Companions as the Sovereign shall appoint. Only members of the administrative or clerical branches of the Civil Service are eligible as Companions, and their number must not exceed 425, of whom 250 are to belong to the Home Civil Service, and 175 to the Civil Services of the Colonies and Protectorates. Appointments to the Order will be made on the recommendation of a Secretary of State after 25 (or in unhealthy Colonies 16) years' service, or for "eminently meritorious service." The decoration, which is to be worn on the left breast, is a star of silver, having as its centre a medallion of gold bearing the Imperial and Royal Cypher and the legend "For Faithful Service," both executed in dark blue enamel, the whole surmounted by the Imperial Crown. The statutes of the Order provide for the institution also of an Imperial Service medal, to be conferred upon Civil servants who are not eligible for appointment as Companions of the Order, but who are recommended by a Secretary of State for such medal on their retirement after 25 (or in unhealthy Colonies 16) years of meritorious service. Companions of the Order may add the letters "I.S.O." after their names. **Secretary and Registrar**, R. F. Reynard, Home Office, S.W.

**Imperial War Fund.** Established 1882. The war in South Africa caused a heavy drain on the fund in 1900, and by July 7th all grants to widows and orphans were compulsorily suspended because the money had run out, after a sum of over £8000 had been expended in grants, and £3000 out of original capital stock had been realised. **Hon. Sec., Col.-T. Tully.** **Offices**, 677/8/20, Bucklersbury, London, E.C.

### INCOME TAX.

The Tax was first imposed in 1708 to meet the cost of the French War, and was in force till 1801, again from 1803 to 1815, and then after 26 years it was again levied in 1842.

The rates at which the Income Tax has been charged from '42 to '95 are as follows:—

£100 but under £150: '53, '57-8, 5d. in the £; '54, 10d.; '55-6, 11½d.; '59, 6½d.; '61-2, 6d.

£150 and upwards: '42-52, and '57, 7d.; '54, 1s. 2d.; '55-6, 1s. 4d.; '58, 5d.; '59, '61-2, 9d.; '60, 10d.

Uniform duties on Incomes of £100 a year and upwards, with abatement of £60 on Incomes under £200: '63, 7d.; '64, '68, '71, 6d.; '65-6, '70, 4d.; '67, 5d.

Abatement extended to £80 on Incomes under £300: '72, 4d.; '73, 3d.; '74-5, 2d.

Exemptions extended to Incomes under £150,

and abatement to £120 on Incomes under £400: '76-7, 3d.; '78-9, '81, '83-4, 5d.; '80, '84, 6d.; '82, 6½d.; '85-6, 8d.; '87-8, 7d.; '88-93, 6d.; '93, 7d.

Exemptions extended to £160, and abatements to £160 on Incomes under £400: '94, 8d.

Abatements of £150 allowed on Incomes between £400 and £500, of £120 between £500 and £600, and of £70 between £600 and £700; '95-9, 8d., 1900, 1s.; 1901, 1s. 2d.; 1902, 1s. 3d.; 1903, 11d.; 1904, 1s.

For details of the produce of the tax under its various schedules see FINANCE NATIONAL, p. 186.

The Special Commissioners of Income Tax, under the Board of Inland Revenue, have their Offices at Somerset House, W.C.

### Gross and Net Income.

The Gross Income from all classes of profits brought under the review of the Department, the deductions allowed, and the Net Income on which tax has been paid, were—

	Gross Income.	Deductions.	Net Income.
1893-4 .	673,711,988	147,871,988	525,840,000
1897-8 .	734,461,246	209,250,046	525,211,200
1900-1 .	833,355,513	239,249,260	594,106,253
1901-2 .	866,993,453	259,442,534	607,550,919
1902-3 .	879,638,546	271,031,643	608,606,903
1903-4 .	not available		611,000,000*

\* Estimated amount.

The Gross and Net Income in 1902-3 were obtained thus (the capital letters referring to the schedules):—

Profits from—	Gross Income.	Net Income.
A. Ownership of Lands, Houses, etc. . . . .	£ 241,887,406	£ 152,282,299
B. Occupation of Lands, etc. . . . .	17,541,703	4,338,514
C. British Industrial, Colonial and Foreign Securities . . . . .	46,121,448	42,310,728
D. Businesses, Professions, Employments, etc. . . . .	491,646,201	361,403,999
E. Salaries of Government, Corporation, etc., Officials . . . . .	82,441,788	48,271,363
	<b>879,638,546</b>	<b>608,606,903</b>

### A Committee of Inquiry.

In April 1904 the following gentlemen were nominated to serve as a Committee to inquire into certain points connected with the Income Tax:—The Right Hon. C. T. Ritchie, M.P. (Chairman), Sir H. Primrose, K.C.B., C.S.I., Sydney Buxton, Esq., M.P., Cosmo Bonsor, Esq., Adam Murray, Esq., W. Gayler, Esq.; Secretary, F. L. Davies, Esq., of the Treasury. The terms of reference to the Committee are:—

"To inquire into and report whether it is desirable to effect any alteration in the system of the income tax, as at present prescribed and administered, under the following heads:

(a) The prevention of fraud and evasion.

(b) The treatment of income derived from

copyrights, patent rights, and terminable annuities.

(c) The allowances made in respect of the depreciation of assets charged to capital account.

(d) The system of computing profits assessable under Schedule D on the average of the profits actually realised in the three years preceding the year of assessment.

(e) The rules and regulations governing the recovery by taxpayers of over-payments of income tax."

**Incorporated Society of Authors, The.** established in 1884 to defend the interests of those who produce literary, dramatic, and musical property, to maintain the rights of all authors of the above works, to advise them as to questions of copyright, and in other ways to render them assistance in their agreements and the publication of their works; to help them to recover accounts and moneys due under their agreements, or for work sent to magazines, etc. Also to procure in England the passing of an Act which shall amend and consolidate the law of Copyright, Imperial or International. It is the only association of the kind in England, but its model, *La Société des Gens de Lettres*, has been flourishing for over fifty years in France. The organ of the Society is *The Author* (monthly). Office, 39, Old Queen Street, S.W. Chairman, Mr. Douglas Freshfield (1904). Secretary, G. Herbert Thring.

**Inebriates Acts, '98 and '99, The.** See SESSION, sect. 58, in ed. '99, and sect. 62, in ed. 1900. Other Acts were passed prior to that of '98. Under the Act of '79 an inebriate had himself voluntarily to apply for admission to a retreat. The '98 Act made compulsion legal in the case of such drunkards as by repeated drunkenness in public or by crime brought themselves within reach of legal procedure. The Licensing Act 1902 gave power to commit a wife who was an habitual drunkard to a retreat. There are three kinds of institutions to which inebriates may be sent: viz.,—(1) Certificated Inebriate Reformatories, (2) State Inebriate Reformatories, which are for the worst cases, and (3) Licensed Retreats, in which there has been marked improvement in late years.

**Inebriety, Society for the Study of.** Qualified medical practitioners are admitted as members. Hon. Sec., T. N. Kelynack, M.D., M.R.C.P., 120, Harley Street, London, W.

**Inland Revenue.** The Commissioners of H.M. Inland Revenue form the Board of Inland Revenue, which was established in 1849, and controls the collection of the Excise Duties, Death Duties, Stamp Duties, and Income and other Taxes. For details of the amounts collected under these heads see FINANCE NATIONAL, pp. 185-6. Chairman, Sir H. W. Primrose, K.C.B., C.S.I., I.S.O.; Deputy-Chairman, L. N. Guillemaud; Commissioners, B. Mallet, E. E. N. Bower; Special Commissioners of Income Tax, W. Gyles, H. W. Page Phillips, S. P. Foster; Joint Secretaries (Excise) J. B. Meers, C.B. (Stamps and Taxes) E. E. Stoodley.

**Institute of Oil Painters, The** (founded '83), has its headquarters at 191, Piccadilly, W. The Exhibitions, which are held annually, commencing in October, are open to all artists, and the principle of selection is the same as at the Royal Academy (*q.v.*). President, Frank Walton, R.I.; Vice-President, S. Melton Fisher; Secretary, W. T. Blackmore.

## INSURANCE COMPANIES AND STATISTICS.

### I. FIRE.

Despite the severe punishment meted out to the British offices operating in North America during the opening months of 1904, most of the companies are able to show a very fair margin of profit as the result of the year's trading. The curtailment of revenue anticipated as the result of the introduction of revised tariffs being postponed for at least another twelve months, most of the leading fire offices were able to report a gratifying increase of income. Beyond the disastrous conflagrations at both Baltimore and Toronto, occasioning losses of upwards of £5,000,000 and £1,600,000 respectively, there was nothing to disturb the equanimity of insurance managers or shareholders. The Baltimore conflagration was the primary cause of the National of Ireland going out of business. The sale, however, of their Canadian business in order to meet the claims at Baltimore enabled the shareholders to escape loss at Toronto.

The chief characteristic of the year was undoubtedly the numerous and far-reaching amalgamations announced. Mention should be made of the transfer of the Manchester Fire Office with a fire revenue of over £732,000 to the Atlas, which deal will, in addition to swelling the capital, no doubt entitle the Atlas to rank as one of the millionaire fire offices. With regard to the National of Ireland, it is understood that the Yorkshire Insurance Office merely proposes to acquire certain sections, leaving the former office to liquidate its American business and most of the Continental commitments. It is hoped that this deal will bring an additional revenue of something like £150,000 to the books of the Yorkshire. The Commercial Union is about to take over the business of the Hand in Hand, the oldest fire office in the world, established in the year 1696. This transfer is unique in many ways, the office being a mutual one. It is stated that in exchange for a revenue of some £402,673 and funds amounting to no less than £3,214,365, a trust fund is to be created to cover the liabilities of the society under its life and annuity contracts, in addition to which the purchaser has to provide for bonuses and reduction of premiums.

There was no memorable conflagration to mar the usually favourable results obtained on the home business, the most notable fire being the destruction of the London & North Western Railway Depot, involving a loss of some £220,000, of which one-third approximately fell on the railway company. The Manchester Warehouse District was visited by a somewhat extensive outbreak, occasioning a loss estimated at nearly £40,000. Several mansions and schools fell a prey to the flames, the destruction of Knepp Castle, near West Grinstead, occasioning a loss of about £50,000.

The risks of municipal insurance found a vivid illustration in the destruction of the Shoreditch Town Hall. It is understood that the first policy issued by the Municipal Mutual Co., a creation of recent date, whereby the properties under the control of the associated municipal authorities become mutually insured, was written at the above hall to cover this self-same hall. It appears somewhat as an irony of fate that the first claim should arise under

policy No. 1 for £40,000, covering each block for £20,000. However, the organisers of this enterprising concern were said to have welcomed this claim of about £10,000 as a test of the soundness of their scheme. The City Corporation, after an exhaustive inquiry on the part of the City Lands Committee, vetoed the suggested adoption of a scheme of municipal insurance for all buildings within the City area, pronouncing the opinion that at existing rates such a scheme was foredoomed to failure. Reference may be made to the attempted introduction of State Fire Insurance in France, where the Government is for the moment-favourable to the project. If, as stated, it is proposed to undercut current rates, the French fire companies must be somewhat uneasy.

With regard to alteration in rating, there is little to record beyond an increase of rates for congested districts in important provincial centres—notably Glasgow; the rates under the London and Mercantile Tariff, on the other hand, have been slightly modified.

Efforts are being made to secure a discount for premises in which an approved system of fire alarms is installed, provided such installation is coupled with a properly equipped scheme of fire appliances—such as the Grinnell, the May-Oatway or the Pearson. There is no doubt but that the offices will be prepared to concede a suitable compensation.

The Central Insurance Co., the Fine Art and General, and the National Union have all introduced what they term non-contentious or indisputable fire policies. These are non-tariff offices, and they appear to offer simple contracts and advantages worth the consideration of the would-be policy-holder. The proceedings of these companies may lead the tariff offices to modify their conditions.

The Century Insurance Company has entered the field for Fire business.

### Premium Income and Fire Losses.

The aggregate premium income of fire offices for 1903 amounted to about £22,000,000, and the losses to about £11,000,000. The number of companies in the United Kingdom of any importance whose business is entirely or mainly that of fire insurance is 44; about 30 compose the London Salvage Corps; and about 67 companies contribute towards the expenses of the Metropolitan Fire Brigade at the rate of £35 per million on the amount of property insured. The premiums and losses of British fire insurance companies are given below from Stone & Cox's *Policy Tables* (Aug. 1904), and returns since made:—

Name of Office.	Premium Income.	Fire Losses.
	£	£
Alliance (1824) . . .	889,138	387,354
Atlas (1808) . . .	519,377	270,767
Bolton Mutual (1876) . . .	11,261	576

Yorkshire (1824) . . . .	192,951	97,591

with other wealthy companies which have approved its system.

## II. LIFE.

One of the most important features of the year as regards life assurance was the attention given to the subject by the outside insurance press. Almost every popular paper has its insurance article, and the offices on their side have had to cater for this advertisement by offering their wares in more attractive forms. Monthly premiums, non-medical schemes of insurance, guaranteed surrender values, automatic non-extended insurance in case of lapse, and such like privileges, are likely to become the rule instead of the exception in the near future.

Of greater interest to those holding or contemplating life assurance in **Colonial Life Assurance Companies** is the extension of section 54 of the Income Tax Act, 1853, to apply to these institutions, which were heretofore excluded. Policyholders in Indian and Colonial Life Offices (though not American) are for purposes of exemption from income tax on premiums paid for life assurance or deferred annuities on the same footing as those in English offices—that is, entitled to exemption to the extent of one-sixth of their income. Policyholders are indebted to Sir H. S. King, whose firm (Messrs. H. S. King & Co.) are the London agents of the Australian Mutual Provident Society.

A noteworthy sign of the times is the attention given by **Educational Institutions to Insurance**. The London School of Economics, the City of London College, the Progressive Correspondence College have all provided courses of instruction, more or less advanced, to meet the requirements of the profession; and tested by the examining bodies—viz. the Institute and Faculty of Actuaries and the Federated Insurance Institutes—this feature should in time make for efficiency. The History, Theory, and Present Systems of Insurance can be taken as one of the Honours subjects for the B.Sc. (Final) Economics Degree of the University of London.

A Parliamentary notice was issued, dated Nov. 16th, 1904, of a proposed transfer of the undertaking and business of the Hand in Hand Fire and Life Insurance Society to the Commercial Union Assurance Co. (Ltd.) This is another instance of a mutual society going over to a proprietary company. The premium incomes and dates of establishment of both offices will be found in the tables given above. In a prospectus dated Nov. 1st the Hand in Hand Society practically abolished its bonus system in its life branch in favour of guaranteed results at past rates of bonus, no alteration being made in the premium rates. Mention may be made of the experiment of free life assurance coupons by *London Opinion*—an improvement on the more familiar accident coupon, and guaranteed by the Norwich Union Life Office.

As the financial year with the great majority of life offices closes at the end of December, published reports of their position do not appear for some months subsequently. According to the returns relating to life assurance companies in 1903 to the Board of Trade, and published in 1904, the important particulars in the table below are notified.

The above figures are, with a few exceptions, for the year ending Dec. 31st, 1903.

The British and foreign business of the **Western Assurance Co.**, whose chief office is at Toronto and whose branch office in Great Britain is at 2, Change Alley, Cornhill, has made good progress. The fire premiums of this company for 1903 amounted to £696,870, and the fire losses to £308,594.

The **Loss of Profit Policy of the Profits and Income Insurance Company** covers consequential loss which is not provided for by the ordinary fire or boiler policy, and also provides the means of meeting fixed charges, thus maintaining unimpaired the normal revenue. Loss through boiler explosions and epidemic is also covered at a slightly additional premium. The insurance of profit or fixed charges is a practical necessity to every manufacturing and trading concern. During the past few years the company's system has been carefully matured, and is now stated to be perfected on a scientific basis. The premiums appear to be moderate, and claims are paid in an equitable manner which is practically automatic. The company has secured facilities for re-insuring large sums

## INDUSTRIAL INSURANCE.

Life assurance as transacted at the **Post Office** is not suited to the habits of the working classes, and the number of policies issued by it is therefore very small. According to the last annual report of the Postmaster-General, for year ending March 31st, 1904, the number of Post Office assurances was 592 for £31,413. The number of immediate annuity contracts entered into was 1763 for £43,973. The number of deferred annuities granted was 157 for £3424.

On the other hand, an enormous number of life policies are granted to the masses by industrial life assurance companies and collecting friendly societies; and this kind of insurance has prodigiously increased during the last fourteen years—so much so that nearly half the population of this country is insured in them.

During the year a new Industrial Company, viz., **The Popular Life Assurance Co., Ltd.**, made its appearance, and deposited £20,000, in accordance with the Life Assurance Companies Act. It varied the usual Industrial Policy by issuing a **Dividend Contract** under which 4 per cent. is to be paid every year upon the premiums paid.

Industrial insurance is making rapid strides, and its interests have, since May 1904, been represented by the *Insurance Mail*, a weekly review, the circulation of which, it is understood, has already reached the phenomenal number of 12,000 copies per week.

The **Prudential** has the largest industrial business: its funds exceed £50,000,000, and in 1903 it settled no less than £2,100,824 in claims, of which £20,000 represented deaths from drowning, accidents, and explosions.

Of the Collecting Friendly Societies the **Liverpool Victoria Legal** has the largest pre-

mium income, and this society pays good bonuses. The **Aberdeen and Northern Friendly Society** announced a bonus to its members of 30s. per cent. per annum for the last five years. The **Co-operative Insurance Society**, in the interest of Co-operative Societies, introduced a scheme for the insurance of members based upon the average amount of their annual purchases, without reference to age or health. One penny of every £1 of purchases is considered the premium, and secures a policy for Four Shillings, and larger purchases secure proportionate benefits.

A novel feature of the policies of the **Pioneer Life Office** is that they are "protective," one-half the sum assured being paid in the event of loss of one limb or one eye by accident.

† Industrial Branch.

A review of the present systems of Life Assurance, as transacted in this country, with special reference to recent schemes established as new features by particular offices, appears below. First, however, a brief summary of the ordinary-forms of Life Assurance may be given. These can be subdivided under two headings, **Participating and Non-Participating**. The former class, in consideration of an increased premium being paid, shares in the profits of the business, called bonuses, and the latter does not. In the participating section the profits added will usually exceed the increase in the premium paid; but the non-participating policy-holders are not affected by the profits of the office, theirs being what the Clerical, Medical, and General Life Office aptly calls a "system of definite contracts."

The application of profits by way of bonus can be made in a variety of ways:—

1. By additions to the policy in reversionary value, the bonus so added being payable when the policy becomes a claim.
2. By reduction of premiums over a term of years, or during the continuance of the assurance; or to cancel the payment of premiums in old age.
3. By payment in cash.
4. By making the assurance payable during the life of the person assured, by converting it into an endowment assurance.
5. Or, in the case of endowment policies, by making the date of maturity earlier.

Sometimes the profits are deferred and allotted only to policies which have been in force a specified number of years, or, in the case of endowment assurances, those who survive the term. These are called **Deferred Bouses**, and should, under ordinary circumstances, be larger than those which vest immediately.

If the profits of a particular class of policy are pooled and divided at the end of a given time amongst the survivors of that class, they are known as **Tontine Bonuses**.

The usual forms of Life Assurance are:—

The **Ordinary Whole-Life Assurance**, with or without profits, under which the assured, by paying a premium throughout life, secures the payment of a sum at his death.

**Whole-Life Limited Payments**, where the payment of premiums is limited to a specified number of years.

**Endowment Assurance**, where the sum assured is paid at a given age, or at previous death.

**Joint Life Assurance**, the sum assured being payable on the death of the first.

**Insurance of Two or more Lives**, the amount assured being payable on the death of the survivor of two or more persons.

**Contingent Survivorship Assurance**, the amount being paid on the death of one life, providing that another be living.

**Short Period Assurance**, under which the risk of death is covered only for a given term of years.

Several of the ordinary life assurance companies have in recent years established what they call new features in life assurance. These, as far as is reasonably practicable, will be classified as under:—

#### 1. Endowment Policies.

The **Scottish Provident Institution** grants endowment assurance with or without bonus additions: the entire surplus arising under

such assurance with profit tables is to belong exclusively to those assured under this class. A division of surplus will take place as at Dec. 31st, 1908, and septennially thereafter. An interim bonus of £1 10s. per cent. per annum will be added to the sum assured in the event of death before the next division of surplus. Bonuses thereafter are to be calculated on the compound system, a uniform annual percentage being allocated to the sum assured and previous bonus additions. Paid-up policies on the usual plan and surrender values are allowed. Optional endowment assurances at whole-life rates with option of conversion are granted by the **Pelican and British Empire Life Office**. The **London, Edinburgh, and Glasgow Assurance Co.** grants double endowment assurance without medical examination. By such an assurance £100 is payable in the event of death previous to the endowment period, but if the assured survives this period, £200 is payable. So also do the **Star Life Office**, the **Prudential**, the **Refuge**, the **Standard Life**, the **Scottish Union and National**, and the **Scottish Equitable Assurance Companies**. The latter calls the plan a **Guaranteed Tontine Endowment Scheme**.

The **Yorkshire Fire and Life Insurance Co.** has brought out a new table, giving **Endowment Insurance at Minimum Cost**, but with profits deferred until the attainment of the endowment age. The same company has brought out another new scheme, under which, if death occurs before the endowment period, £1000 is paid to the legal representatives, but if that period is reached, the assured is entitled to any one of the four following options: 1. A cash payment of £1500. 2. An annuity for life of £52, and cash payment at death of £1500. 3. An annuity of £102, payable for 20 years certain. 4. An annuity for life varying in amount according to the age at entry and the duration of the endowment period. In connection with the second option it is explained that the assured can at any time take the £1500 and end the contract, the annuity being thus treated as merely payment of interest.

**Semi-Endowment Policies** are also granted by the **Sun Life Assurance Company of Canada**. They differ from the ordinary endowment ones in the following manner. While an ordinary endowment contract provides for the payment of a fixed sum at the end of the term specified, or in the event of previous death, a semi-endowment policy provides for the payment of double the amount on the death of the assured before the expiration of the endowment period.

The **London and Lancashire Life Office** has introduced a **Special Endowment Scheme**, combining a family provision with a good investment or a pension for life. Policies under this scheme are particularly advantageous to the insurer, in so far that the premiums charged are about equal to the non-profit rates of other offices, yet the assured has the right to receive a large cash bonus should he attain the Endowment age.

The **Scottish Life Assurance Co.** has issued two forms of **Guaranteed Option Policies**. The special features are **Guaranteed Paid-up Policies**, **Surrender Values**, **Extended Assurance** if premiums are unpaid, and these are actually endorsed on the policy. Either a 20-payment Life Policy or 20-year Endowment Assurance can be effected on this plan. As an illustration of the former policy, assuming

this company's previous rate of bonus, a person aged 35 for £37 4s. 2d. would secure a Whole-Life Assurance for £1000, premiums limited to 20 payments. At the end of the 13th year, for example, the bonuses would have amounted to £217 10s., and from figures guaranteed in the policy the assured could select a paid-up assurance for £800, or a cash surrender value for £333, or remain insured for 32 more years, if he desires to discontinue payment of premiums.

The Norwich Union Mutual Life Office has devised an entirely new Investment for Small Savings. It is simply Single Payment Insurance without Medical Examination. The plan is known as the **Current Savings Policy**. An investor aged 40 deposits a single premium £50, and receives a policy insuring £75, with full profits payable at death or at 60 years of age. The insurance benefits are entered on after 12 months, but in case of death within that period the premium is returned with 3½ per cent. interest. The loan value of these policies after two years rises rapidly from 90 per cent. of the deposited premium, and the effect of the Norwich Union Bonus will be to increase the policy to £100 by the time the contract matures. The return is over 3½ per cent. compound interest.

The Scottish Imperial, the Scottish Metropolitan, the Union Assurance Society, the Star Life Office and the Scottish Provident have all introduced **Endowment Assurance Policies with Guaranteed Bonuses**. The Royal Insurance Company permits its with-profit Endowment Assurance policy-holders to leave their bonuses with the company, these accumulating to large sums by the time the policy matures. The Endowment Assurance policies of the **Mutual Life of Australasia** are endorsed with guaranteed surrender values, and can be effected (if desired) by monthly premiums and without medical examination.

The **Equitable of the United States** has issued a new Endowment Bond, under which the return in case of death can never be less than the premiums paid compounded at 4 per cent. interest.

## 2. Instalment, Debenture, and Investment Policies.

A variation from the usual settlement of a life policy by payment at death or at a fixed date is for the office either to—

(a) Pay the sum assured by instalments, or

(b) Pay a percentage on the sum assured for so many years, the amount itself being paid at the end of that period.

For example, the **Colonial Mutual Life Assurance Society**, the **Pelican and British Empire Life Office**, have schemes under which 6 per cent. is guaranteed for 10 years after the sum assured becomes due, and the amount of the policy is paid at the end of that time. Other offices offering similar benefits are the **City of Glasgow**, the **National Mutual**, the **Provident Life**, the **English and Scottish Law Life**, the **Scottish Metropolitan**, and the **Gresham**. The **Norwich Union Mutual Life**, under its 5-per-cent. Guaranteed Income Policies, grants commutation values at any time whilst the income is being received, and, further, places these policies on a non-forfeiture plan. This Society's non-forfeiture plan works out so favourably under a 5-per-cent. Guaranteed Income Endowment Assurance for 20 years, that after 4 years the

policy can be maintained in force without further payment of premium, subject to a debt of the outstanding premiums and interest. Some of the offices undertaking to pay the sum assured under their policies (if desired) by instalments are the **Edinburgh Life Office**, the **Provident Life**, the **Sun Life of Canada**, and most of the American companies.

In the **Edinburgh Life Office** a man aged 30 would pay £16 instead of £20 17s. 6d. for a Whole-Life Policy for £1000, payable in 20 instalments. By this means the difficulty of investment is got over. Still another plan is to guarantee a percentage of the sum assured on the maturity of an Endowment Assurance policy during the remainder of the life of the assured, the payment of the sum itself being made to his wife or nominee at his death. The **Old Equitable**, the **Edinburgh**, the **Life Association of Scotland**, the **Colonial Mutual Life Office**, the **Marine and General Mutual**, and the **Citizens' Life Assurance Co. of Australia** favour this form of policy.

In the "**Old Equitable Life Assurance Society**," so named to distinguish it from its namesake of America, a policy called a **Perfect Endowment Assurance** for £1000 would cost about £40 per annum for 30 years only to a person aged 30. Under this policy £50 per annum would be paid from age 60 to the death of the life assured, when the £1000 would at once become payable. At the rate of premium stated, the policy would be entitled to share in the society's profits, which are distributed upon a unique system.

The **National Mutual Life Office** has introduced a 3-per-cent. **Dividend Policy**, also obtainable from the **Sun Life of Canada**. The feature is that the office allows 3 per cent. per annum on the premiums paid to date. As an illustration, if £100 is the premium and this will secure an endowment assurance payable in 25 years, on this plan for £1806 (age at entry 30), the **National Mutual Life Assurance Society** will pay 3 per cent. on one premium at the end of the first year, 3 per cent. on two premiums at the end of two years, and so on. The policy of the **Sun Life of Canada** is on the 20-Payment Life plan, and the 3-per-cent. interest or dividend credits can be left on deposit with the company at 3½ per cent. compound interest. The **Hand in Hand Fire and Life Society**, the **National Mutual of Australasia**, and **Scottish Provident Institution**, have **Investment plans** whereby, by combining an immediate annuity, a return of over 3½ per cent. can always be obtained on amounts invested. At some ages, in the case of the **National Mutual of Australasia**, the return is close upon 3½ per cent. per annum, and this would be increased by periodical additions of bonuses.

The **Scottish Widows' Fund** allows its policies, when due, to be deposited with it for not more than 20 years, and during that period pays 3 per cent. per annum on such amount deposited.

The **New York Life Insurance Co.** issues a form of policy called an "**Insurance Bond with guaranteed interest**," which combines insurance with a profitable investment for savings. The bonds are purchased by annual payments extending over a period of 10, 15, or 20 years; and as soon as the bond is fully paid up it yields interest at the rate of either 3 per cent. or 4 per cent. per annum for the remainder of life, according to the kind selected—the higher rate of interest, of course, involving a

larger annual payment from the bond-holder. In the event of the holder's death during the period for which the bond has been granted, all remaining payments will be cancelled and the bond at once become payable for its full amount, the same as an ordinary Endowment Insurance. If, however, the payments by the holder improved at either 3 per cent. or 4 per cent., as the case may be, should exceed the face value of the bond at the time of death within the period, the company would, instead of paying the face value, pay a sum equivalent to the return of all premiums paid with either 3 per cent. or 4 per cent. compound interest.

The Royal Exchange Assurance under the heading of **Guaranteed Optional Investment Policies** has recently introduced a new scheme under which a person aged 30 next birthday, by payment of an annual sum of £35 3s., is entitled to the following benefits upon the attainment of age 60, viz.: (a) An annual income of £50 for the rest of life, and a cash payment of £1000 at death; or (b) a free paid-up policy (payable at death) of £1914, subject to medical evidence of good health; or (c) a cash payment of £1200, or in the event of death before attainment of age 60 (a) a cash payment of £1200; or (b) a cash payment of £400, together with an annual income for 20 years of £50. After 3 years' premiums have been paid, each premium will secure a guaranteed proportional part of the benefits.

The Scottish Amicable Society, in order to meet the difficulty of finding satisfactory investments for the trust funds left by policyholders, issues what are called **Income Policies**, under which the office retains the sum assured when the policy becomes a claim until the death of the policyholder's widow or nominee—allowing 5½ per cent. to such nominee.

The North British and Mercantile Insurance Co. has introduced 5-per-cent. **Investment Policies** which have been designed primarily for the use of husband and wife, securing to the latter, called the nominee, a 5-per-cent. investment after the death of her husband (the assured) if she should survive him; but such policies may also be taken out by other persons. On the death of the survivor of the assured and the nominee, the sum assured will be at once paid over to the executors or administrators of the assured. In the case of a husband and wife both dying leaving a child or children, and while any child is under age, the fund may, on the death of the survivor of the parents, either be at once paid over to the husband's executors or administrators and the matter closed; or it may, if the husband has so directed at the outset, be left in the hands of the company until the youngest child attains twenty-one, and the company will allow interest at 3½ per cent. Power is reserved to the assured to revoke the foregoing provisions, in which case the sum assured would, at his death, be at once paid to his legal representatives or assigns. If it should be desired, while the assured and nominee are both living, to discontinue payment of premiums, the company will give to the assured either a cash surrender value or a fully paid-up policy, securing a reduced amount of assurance and annuity. The assured alone is medically examined. If the nominee should die first, the policy becomes an ordinary one, participating in profits during the remainder of its currency.

The Rook Life Assurance Co. grants In-

vestment Policies by which small or large sums may be accumulated without any risk of losing the money, and the certainty of receiving back a sure and profitable return as regards sums down, annuities, marriage settlements, family endowments, educational annuities, and leasehold redemption funds; and the whole with or without life assurance.

The Mutual Life Association of Australasia has introduced a scheme of **Income Policies** which guarantee £100 a year for 10, 15, and 20 years certain, commencing at age 50, 55 or 60, with a specified benefit in the event of earlier death, and the option of a large cash surrender value on survival of the age selected, all benefits being guaranteed.

The Mutual Life Insurance Company of New York is considered as the pioneer of life assurance which combines the modern feature of remunerative investment. It was the first to issue the popular 5-per-cent. gold-bond policy, under which, on the death of the assured, coupon bonds in denominations of £200 each payable to bearer are issued for the full value of that policy, and upon which interest at the rate of 5 per cent. per annum is paid for 20 years, at the end of which time the full value of the bond is also paid, or, if preferred, the company guarantees to purchase each £1000 bond at a premium of £305 making its value £1305. Policies at low rates are issued to secure protection of capital and to cover shrinkage in investment values. Under these policies a man at 35 can secure protective cover for £1000 at an annual premium of £21 14s. 2d., and such policies carry guaranteed surrender values.

The New York Life Insurance Co. enables the assured to change the mode of payments of the proceeds of the policy as a death claim at any time within five years from the date of issue (if not then assigned) from payment in one sum to the beneficiary, as provided in the policy, to payments by yearly instalments as stated therein. Such payments may continue during the lifetime of the beneficiary, but never for less than a fixed number of years, and the payment of the first instalment will be made immediately upon receipt and approval of proofs of the death of the assured, and subsequent instalments will be paid annually thereafter as provided.—The Canada Life Assurance Company, the oldest Colonial office, which has branch offices throughout the country, also grants 5-per-cent. 20-year gold bonds, with options at the end of the accumulative period. Some of the Bonus results of this office are remarkable.

### 3. Policies at Reduced and Modified Premiums.

Instead of a uniform annual premium throughout the term, several Life Offices accept a **reduced premium for the first few years of assurance**, and increase it thereafter. This is an improvement on the former "half-credit" plan, for no debt attaches to the policy. As an illustration, in the Liverpool, London, and Globe Insurance Co. a person aged 21 can insure for £1000 against death for a premium of £12 1s. 8d. per annum for 5 years and £24 3s. 4d. thereafter, and participates in this company's Reversionary Bonus (35s. per cent. per annum) after the fifth year.

The Standard Life Office has a scheme of **Increasing Premiums for Limited Payment Policies**; the premiums are smallest for the

first 7 years, and are increased every 7 years until after 21 years, when the policy is paid up and premiums cease.

The United Kingdom Temperance and General Institution for a uniform premium of £10 will grant a **Maximum Diminishing Assurance**: commence at £1203, for example, at age 24, diminishing annually to £276 to age 60, and so on.

The Legal and General Life Office grants insurance at minimum premiums under its **Perfected Maximum Policies**. A large immediate addition to the sum assured is obtained, though no guaranteed surrender values are given under this plan, the premiums being as low as consistent with safety.

Other offices granting life assurances at minimum premiums are the Atlas, the Clerical, Medical, and General, the Equity and Law, the Law Life, London Assurance, National Mutual, Scottish Equitable, Norwich Union, and the Yorkshire. In some cases the difference between the minimum and ordinary premium is charged up as a debt on the policy for the future bonus to liquidate, whilst in others only a portion of the bonus is anticipated, and the premium is fixed, and not subject to increase, nor the sum assured to a debt.

The peculiar system of the "Old" Equitable with regard to its distribution of profits, renders their **Reduced Payment System** exceedingly attractive. The Scottish Provident Institution has adopted what may be called the **Low Premium and Deferred Bonus** system. The premiums for policies granted by this society are considerably lower than the average rates of other offices, and thus a much larger sum can be assured than can be assured by the same premium in other offices. The particular feature of the scheme is that the whole surplus is reserved for division exclusively among those (more than half of the whole number) who survive the period at which their premiums with compound interest at 4 per cent. amount to the sum assured. The London and Lancashire Life Office has a similar plan, bonuses being deferred until the expectation of life is attained.—The Scottish Equitable Life Assurance Society has introduced the **Immediate Bonus Plan**. Under this scheme a table has been prepared by which members may pay very low premiums while retaining the right to share in the profits. The payments for those using the table have been fairly adjusted so as to put them on a footing of equality with members paying the higher ordinary premiums.

The Minimum Premium System referred to above was introduced by the Scottish Amicable Society in 1854. It is one of the most economical adaptations of life assurance yet devised.

The Pelican and British Empire Mutual Life Office issues **Diminishing Premium Policies**. Under these the premiums are limited in number and diminish in amounts at stated periods, the annual charge during the last few years becoming very small. The same office has made an arrangement which is described as **Bonus Policies at Minimum Premiums**. The rates are very little in excess of those for without-profit policies. The reversionary bonus to be allotted to the policies is always to be 1 per cent. per annum less than that allotted to the ordinary full-premium policies. If the bonus should fall below 1 per cent. these policies will get nothing, but will rank for their share beyond that proportion when the

distribution is more than that rate. The great advantage of this arrangement is that it involves no liability on the policy-holder. He is assured for a definite fixed sum, which cannot be reduced even if there is no bonus; nor can the premium be increased.—The Colonial Mutual Life Association, and also the Standard Life Office, under the **Reversible Premium Plan** issues policies whereby the sum assured becomes payable at death, and the premiums cease at the age of sixty or sixty-five, as selected at the outset, and afterwards the society will return one premium each year as long as the policyholder lives.—The London Life Association, to meet the case of those who require their assurance payments to be kept as low as possible from the outset, grants policies whereby one-half of the premiums payable during the first five years may be left on credit at 4 per cent. interest by policy-holders in the association. This office, which employs no agents, has recently improved upon this half-credit policy by a **New System of Minimum Policies**. There is no debt on the policy under this plan, and after 7 years participation in profits at a reduced rate is allowed, which operates to further reduce the premium. This premium is not subject to increase. The Metropolitan Life Assurance Society, an office which also pays no commission, in its **Discounted Abatement System** assumes a 33-per-cent. abatement, and discounts the premiums to this extent. No debt whatever attaches to the policy, and the premium is reduced to a minimum. After five years, if the rate of abatement by way of profit falls below 33 per cent. the premium would be increased (an unlikely occurrence); if it rises above 33 per cent. a further reduction in the premium would be made. This office also grants **Increasing Assurances** and guarantees surrender values under its non-participating Endowment Assurances. Mention may be made of what are known as **Convertible or Enlargeable Term Policies**. For a trifling advance on short-period rates an option is extended of converting a term-assurance to some other plan, so long as the change is effected before the policy runs out. Some of the offices offering this form of policy are the Atlas, City of Glasgow, English and Scottish Law Guardian, Old Equitable, Sun Life, Provident Life Office, and the Scottish Union and National. Thus, in the Provident Life Office, instead of paying £16 9s. 2d. per annum for a £1000 Whole-Life Policy, a man aged 25 can obtain this cover against death for only £12 16s. 8d. per annum for 15 years, during 10 years of which time he may convert the policy into a Whole-Life or Endowment Assurance without further medical examination, the new premium being that for his age at the time of conversion.

#### 4. Life Assurance without Medical Examination.

As mentioned above, several Life Offices, following the plan of the Caledonian Insurance Co., will grant policies on the **Double Endowment Plan** without medical examination. The Caledonian Insurance Co. also issues these policies by monthly premiums. To meet the case of those who do not desire a cash benefit on reaching the selected age, they provide instead of the endowment the option of a large paid-up policy or the exchange of an annuity for the endowment. Liberal cash values

will be allowed for the surrender of these assurances at any time after payment of two years' premiums. The Sun Life Office issues also immediate life assurances without medical examination by monthly premiums, and also ordinary policies by such premiums, for the convenience of those assurers—who are very numerous—who find it more convenient to pay premiums in small sums at short intervals instead of having to provide considerable amounts yearly, half-yearly, or quarterly. This scheme has recently been extended to women on the same terms and conditions.

The Standard Life Office, the Century, and the Mutual Life of Australasia have all adopted similar schemes of non-medical examination. The two last-mentioned offices accept monthly premiums, and the Mutual of Australasia incorporates in its policies **Guaranteed Surrender Paid-up Values**, and also allows immediate participation in profits.

#### 5. Partnership Policies.

The National Mutual Life Assurance Society has introduced a scheme for mercantile and professional firms called **Convertible Partnership Policies**. These are designed to meet the cases when after a few years a partnership may be dissolved, and the partnership policy is no longer required. In such a case, in exchange for the partnership policy, the society will grant to each partner a policy on his own life at the rate of premium for his original age at entry.—The Union Assurance Society has brought out a scheme under which policies are issued assuring a given sum on the death of the first of two lives, and convertible at any time into two separate single life policies, each for a sum not beyond 60 per cent. or three-fifths of the original sum assured at the rates of premium which would have been payable had these policies been effected when the original policy was issued. The conversion could be made at any time during the currency of the policy on the written request of both the assured and on production of satisfactory evidence that they are in good health, together with proof of title if necessary. This option is granted without any addition being made to the ordinary premiums for joint-life assurance. Similar plans are put forward by the Atlas Assurance Company and the Star Life Office.

#### 6. Female Life Assurance.

Until recently life offices were not favourably disposed to assure women, and would only grant them policies at premiums very much in excess of those charged to males. The United States insurance companies, which transact much assurance business in the United Kingdom, concede the same benefits in respect of non-forfeiture, freedom from restrictions, etc., in female policies at the same premium rates as are charged to males, and the British and Australian companies are now offering similar concessions. The Double Endowment Policy of the Prudential and the Monthly Premium Policies of the Sun Life Office are very suitable for women. The **Abstainers' and General Insurance Co.** have a unique pension scheme for women, whereby a large retiring allowance at 55 can be obtained for a very small annual premium.

#### 7. Assurances with Exemption from Payment of Premiums under circumstances involving Temporary or Permanent Incapacity.

The Sun Life Office has introduced what it terms the above-named policy, which means (a) that the policy cannot lapse so long as it has any surrender value; (b) if the assured has a breakdown in health he has no premiums to pay during the period of his incapacity; (c) if he becomes totally incapacitated the society will not trouble him for any more premiums; (d) if he meets with a very serious accident the society will pay him half the sum assured, keep the policy in force free of cost, and pay the balance of the policy at his death; (e) he can travel anywhere without paying an extra premium; (f) he can surrender his policy, and either receive a paid-up policy or withdraw its value in cash; (g) he can borrow money on his policy. It is stated that no other assurance office issues this policy.

The Law Life Assurance Society issues policies which provide for the discontinuance of premiums in the event of the assured becoming incapacitated, either by accident or bodily or mental disorders, from continuing to earn their own livelihood. These special benefits cease at age 65. Under this scheme female lives are not accepted. The Law Union and Crown Insurance Co. has also issued a table of rates giving these benefits to male lives, assuring for the whole of life by a limited number of payments, also to endowment assurances maturing at 50, 55, 60, or 65. The policy gives exemption from premium for any period of continuous incapacity caused as above stated, exceeding two months. This description of assurance is also transacted by the Scottish Accident Life and Fidelity Insurance Co., for the Exemption from Payment of Premiums on the life assured attaining the age of 70, or whilst the assured may be temporarily or permanently incapable by accidental bodily injury or illness, or by mental disorder, from attending to his usual profession, business, or occupation. The Protected Policy of the Star Life Assurance Society is one of this kind. The Century Insurance Company, the Scottish Temperance Life, and the Mutual of Australasia make a speciality of Combined Life and Accident Insurance, the last-named office endorsing guaranteed surrender values in its policies.

#### 8. Some Special Schemes of Life Assurance.

The Canada Life, the oldest Colonial office, and the Citizens of Australia have plans of assurance under which premiums are returned with the sum assured. This form of policy is popular in America and the Colonies, and might be with advantage more extensively cultivated here. The combination of plans of life assurance to give **Double Benefit Policies** is a favourite device. For example, the Abstainers and General and the General Life Offices combine a limited payment policy with an endowment at the time the payments cease. The Life Association of Scotland under its combined benefit policy pays half the sum assured on a given age being attained, and the balance at death thereafter. The Northern Assurance Co. issues policies combining Life Assurance with Deferred Annuities.

#### Total Abstainers and Vegetarians.

Several Life Offices offer special terms to total abstainers either by way of reduced

premiums or increased bonuses. The Abstiners and General, the Pelican and British Empire, the Scottish Temperance Life, the United Kingdom Temperance and General, and the Sceptre are of this number. The first-named company classifies vegetarians with a view to offering them the increased profits they deserve (if any).

#### Class Offices.

There are one or two offices which indicate by their name that they cater exclusively or particularly for special classes of lives. For example the Clergy Mutual and Clergy Pensions Institution for the clergy, the Friends' Provident for members of the Society of Friends, the University for members of universities, colleges or schools.

#### Naval, Military, or Mercantile Marine Policies.

The London and Lancashire Life Office has a special scheme for the insurance of Naval and Military Officers. It accepts these without extra payment at ordinary with-profit rates, profits being deferred until permanent retirement from the Service. The Yorkshire Insurance Co. has a similar scheme. The Clerical, Medical and General accept these risks at slightly increased premiums, more than compensated by the Clerical System of Bonuses if the life proves as good as that of a civilian. The Edinburgh Life Office charges a small extra payment only while the assured remains liable for military or naval foreign service. Officers and others in the Mercantile Marine Service are also accepted by the London and Lancashire Life Office under its Special Endowment Scheme (see Sect. I.) without extra premium. The Scottish Union and National Insurance Co. offers similar advantages.

#### 9. Children's Assurances and Endowments.

Children's Deferred Assurances are now effected by many offices. The leading method for such is that there are two scales of premiums. In one all that are paid are returnable if a child dies before 21. In the other scale, which is lower in the amount of premiums payable, these are non-returnable. On the child attaining 21 the policy comes into full force as a policy of insurance. By the scheme of the Atlas Assurance Company, if it should be desired to surrender the policy before the child attains 21, all the premiums paid, except the first, would be returned, but without interest. The Children's Endowment Policy of the National Mutual Life Association of Australasia appears to be much appreciated. The benefits of the policy are: (1) That the amount of the endowment shall be paid if the child survive the age of 21. (2) All premiums paid, with simple interest at 4 per cent. per annum, will be returned to the parent or his representatives if the child die before attaining this age. (3) That no further premiums shall be payable, and the policy shall be fully paid up, if the parent die before the child and during the currency of the policy. Policies are entitled to a full share in the profits, and no medical examination is required. At any time after three years' premiums have been paid, the policy may be exchanged for a paid-up one, assuring an amount bearing the same proportion to the original sum assured as the premiums paid bear to the total premiums payable.

The Norwich Union Life Office and the National Mutual Society have introduced Educational Annuities to commence at a given age of the child and to run for four or five years. They are a very inexpensive form of provision, and the policies carry valuable options.

#### 10. Annuity Schemes.

The National Mutual of Australasia is the cheapest office for Annuities. It returns generally  $\frac{1}{2}$  per cent. per annum more than most offices, and in some instances the difference is as great as 2 per cent. per annum. The Royal Exchange Corporation will grant increased annuities to lives below the average in health.—The Hand-in-Hand Fire and Life Insurance Society has devised Special Deferred Annuity Policies to facilitate provision for old age. Instead of the amounts of the periodical premiums and their due dates being fixed at the outset, the premiums may be paid in any multiples of £1, and at any intervals which may be most convenient. If the payment of premiums is not continued or made regularly, nothing is lost. Each premium is quite independent of the payment of other premiums, and secures a certain definite amount of annuity, as if it constituted by itself a wholly separate transaction. At the deferred age, or at death, or on surrender, the policyholder is entitled to take a guaranteed cash value which will be found to be almost exactly the accumulated amount of the premiums paid with compound interest at the rate of 3 per cent. per annum. The same society has introduced a new scheme of Immediate Annuities with a guaranteed return of part of the purchase-money in the event of early death or surrender. This scheme meets a large demand, and applications are received for annuities at the rate of 4, 6, 8 or 10 per cent. on the purchase-money. An absolutely guaranteed income can thus be secured at a higher rate than can be derived with safety from ordinary investments simultaneously with an equitable return of the purchase-money if the contract is cancelled by death or otherwise.

#### 11. Provision against Death Duties.

For providing a fund for payment of Death Duties under the Finance Act of '94 several life offices insert a clause in their policies that if requested by the legal personal representatives of the assured, entitled to receive the policy-moneys on grant of probate or letters of administration, they will either pay so much of the sum assured as will be enough to satisfy these duties to such representatives, or at their option pay the whole or so much of the policy-moneys as shall be required for these duties to the Inland Revenue Commissioners or any other persons lawfully entitled to receive the same under the beforementioned or any other statute.

#### 12. Loans on Personal Security.

Several British Life Assurance companies grant loans on personal security with life assurance. The English and Scottish Law Life Office and the Norwich Union offer very good terms in this line of business.

### III. MARINE INSURANCE.

The competition so prevalent in latter-day trading is probably nowhere so keen as in

Marine Insurance, and every year it is becoming more evident that any profits made at all commensurate with the risks undertaken depend almost entirely on outside or extraordinary influences. The premiums obtaining are continually the subjects of so much cutting, that in many instances, except by the very chance, it is practically impossible for any profit to be made, notwithstanding the large amounts which come forward for insurance. The market is so wide that the numerous attempts which have been made to establish tariffs have in nearly every instance fallen through, and it is difficult to forecast any brighter prospects for the future. The good effects of the general rise in rates in hull insurances, which took place some years ago, have almost entirely disappeared; and with the large reductions in rates and values for insurance at present being made the outlook is worse even than before.

Any review of the results of the business during particular years can only be based upon the balance sheets of those of the Marine Insurance Companies which are issued in such a way that the underwriting profits can be distinguished from the interest on premiums and reserves, which forms by far the larger part of their dividends; but the returns have steadily been declining since 1900-1, when, owing to the general prosperity in the world's trading, and to the large amount of shipping employed by the Government during the war in South Africa, there is no doubt that large profits were made by underwriters. Many steamers were laid up in port unemployed owing to bad trade during the last two years, and the rates of both Hull and Cargo insurances were much reduced in 1904. An attempt was made to steady the rates of insurances on hulls early in the year, which soon collapsed and the reductions went on as merrily as before. The companies afterwards agreed to a tariff for cargoes to Australia and the East.

The underwriters at Lloyd's are becoming so numerous and so powerful that several syndicates are already doing as much, if not more, business than any of the companies; and as their working expenses are infinitely less than the companies with their magnificent offices and large staffs, they are naturally able to accept lower rates. Hence, as may readily be seen, the explanation of the war in rates which has been going on for so many years, and the end of which, though all interested would gladly see it, no one can foretell, but it can only be by the weaker going to the wall, and by those who remain becoming stronger by their default.

The statements from time to time appearing in the press regarding war insurances, owing to the conflict between Russia and Japan, considerably exaggerated the amount of business placed, but it is probable that many underwriters did well in this direction. The number of captures was comparatively small, and several steamers with cargoes to Port Arthur or Vladivostok which were insured at very high rates (as much as 30 guineas per cent. was paid) arrived safely; and, as underwriters received additional premiums on nearly all hulls and cargoes to Mediterranean and Eastern ports, the profits on the war risks perhaps helped to counteract the baneful results of rate cutting and bad trade.

#### IV. ACCIDENT.

By far the most important change which has taken place in recent years by legislation between employers and employed has been caused by the **Workmen's Compensation Act, 1897**. The liability of an employer to his injured workmen is now regulated by the common law: by the **Employees Liability Act, 1880**; the **Workmen's Compensation Act, 1897**; and the **Workmen's Compensation Act, 1900**, which extended the Act of 1897 to workmen in agriculture. The liability thus imposed upon employers has been met by different kinds of insurance, the bulk of which is transacted by the existing accident insurance companies.

The year 1904 was undoubtedly satisfactory as a whole, although no striking developments occurred, except perhaps in connection with the insurance of Motor Cars. Competition for **Workmen's Compensation Act business**, which is undertaken by most Accident Insurance Companies and some Life Offices, was certainly not so keen as hitherto, and on the average higher rates of premiums were obtained. The tariff which was formed in 1898, and came to a deservedly inglorious end in 1899, was succeeded by an increasing desire on the part of the principal companies interested to support each other in securing adequate rates for large risks in the light of actual experience. The **Parliamentary Committee** appointed to investigate the working of those Acts reported, and amongst some twenty to thirty suggested amendments, special attention may be drawn to the following four, namely:—

(1) That no action should be maintainable by an injured workman at common law or under the **Employers' Liability Act of 1880** if the workman has a remedy under the **Workmen's Compensation Acts**. The simplest and most effective remedy to the present chaotic condition of things would appear to be, however, to repeal the Act of 1880 altogether;

(2) That all persons employed on building jobs or contracts should be protected by the **Compensation Acts**, thus removing the unjust anomaly (amongst others) of an inch in the height of a building robbing a workman or his widow and children of any compensation whatsoever;

(3) That the maximum capital sum recoverable should not exceed £500. At present, except in the event of death, no limit is fixed, and the employer is subjected to the most extortionate demands. If possible, it would be desirable to fix maximum sums according to the compensation payable to and the age of the injured workman;

(4) That **Medical Referees** should be salaried officials under the Acts, in order to secure strict impartiality. At present the Medical Referees are called upon to adjudicate when their very existence often depends upon either the friends of the employer or the mates of the injured workman.

In the other directions of accident activity a steadily increasing volume of new business was secured. The gradual transforming of the **Personal Accident Policy** into a purely **Sickness Policy** continues, as during the past year several offices extended their policies to cover further more or less known diseases.

During the year the **Scottish Employers' Liability and General Insurance Company** was transferred to the London and Lancashire Fire Office, which transacts a large accident

business. Two important companies were registered during 1904—namely, the Casualty, and the Car and General Insurance Corporation. The Casualty has been intrusted with the guarantee of the Accident Coupon Insurance of the *Daily Mail*, *Daily Mirror* and *Evening News*, and confines its operations exclusively to personal indemnity insurance. The Car and General Corporation in less than twelve months built up a business represented by a premium income exceeding £30,000. It publishes an exhaustive list of rates for Workmen's Compensation risks. It is the insurance company to the Motor Union, which includes the Automobile Club. Its motor-car policies include most valuable concessions.

About 16 offices transacting life assurance have Accident Departments. The British Equitable and Mutual Life of Australasia may now be included in this list.

A brief review of some special Accident Policies follows:—The Accident Insurance Co. has a policy with no time limit in the case of Total Disablement Compensation. The "Ocean's" Leader Policy carries an automatic 5-per-cent. annual addition to the sum insured, as well as a quinquennial reduction of premium in cases of no claim. The Car and General issues Sickness Insurance Policies without medical examination covering all illness. It also insures Schools against Epidemics. The Yorkshire Life Office caters for the Army and Navy, including the Indian Civil Service, insuring against accidents and charging no extra in cases of mishaps during Sports, including military horseracing and riots. Diseases are covered whilst resident in Europe. The Railway Passengers Assurance Co. has a plan of Select Insurances for Mercantile and Commercial Clerks. The Casualty Insurance Co. has an "All Risk" Policy obtainable at a small premium without medical examination. The General Accident Co. of Perth has introduced Sickness and Accident Insurance by Monthly Premiums, 50 per cent. of which are returned at 65 or at death from natural causes. The Empire Guarantee issues a Whole-Life Railway Accident Policy for £500 for 10s. The "Pallas" Personal Accident Policy of the "United Legal" Indemnity is a lifelong contract, and carries surrender values. This office also issues Family Insurances against certain illnesses. Under the "Red Shield" Policy of the London and Lancashire Fire Office special bonuses are allowed and premium reductions are offered to Total Abstiners. The Sun Life Office issues a combined Sickness and Accident Policy without medical examination insuring from £1 to £6 a week against any sickness. The Scottish Accident Life and Fidelity has placed the copstone on Accident Insurance by offering, in addition to compensation against illness, a sum at death if it results from such illness. The Compensation and Guarantee Fund makes a specialty of Insurance against Zymotic Diseases.

The Perfect Annuity Policy of the Royal Exchange Assurance provides annuities up to 15 years in the event of death, permanent total disablement, and permanent partial disablement by accident, or in the event of blindness or paralysis by disease. Furthermore, the annuities are doubled for railway or tramcar accidents, or accidents caused by the burning of any building, or the burning, sinking, or stranding of any first-class passenger steamer.

The Contingent Return plan of the Century Insurance Company secures £1 to £15 per week during disablement of the assured by sickness or accident, with return of all premiums. All premiums are returnable to the assured on his attaining 65, irrespective of claims. Sickness alone may be assured against on the same conditions at slightly lower premiums. Under the Life Sickness and Accident plan of this company tables are published of the yearly premium to be paid for £1 per week during disablement by sickness or accident of any kind, together with £100 with profits on reaching a specified age or at previous death. The Full Return plan of the company provides for disablement by sickness or accident, and, in addition, for the return of all premiums paid either at the death of the assured or on his attaining a specified age, without deduction of any sum he may have received as weekly benefit during the currency of the policy.

The Profits and Income Insurance Co. effects Health assurance, with or without return of premiums at a fixed age, irrespective of claims paid. With these benefits may be combined life assurance, endowments, and deferred annuities.

The Tontine Bonus for Non-Claimants is a system devised by the London, Edinburgh and Glasgow Assurance Co. Under this scheme the premiums payable by a policy-holder who continues his assurance with the company, and who makes no claim for compensation, will be considerably reduced, and it is possible that they will be eventually extinguished altogether, and yet the full benefit of his assurance in the event of subsequent injury be retained.

#### V. FIDELITY GUARANTEE.

The rates of premium vary from 5s. to 40s. per cent., and are classified under the different employments. Length of service, position and means are all matters taken into consideration when fixing the premium to be paid. Any number of officials of an employer may be guaranteed under one policy. Additions and alterations are made by endorsement from time to time. This is a great convenience when there is a large staff. Within the last few years, premiums have been reduced 50 per cent., and the present tariff is drawn up on such moderate lines that the inducement for large firms to form their own guarantee fund is removed. The Guarantee Society, the Provident Clerks' and General Guarantee Association, and the London Guarantee and Accident Company, Ltd., have each paid hundreds of thousands of pounds in claims. The Railway Passengers' Assurance Company, Ocean Accident and Guarantee Corporation, the Employers' Liability Assurance Corporation, the Law Guarantee and Trust Society, the General Accident Assurance Corporation, the Palatine and other companies, have also paid large claims. In addition to these companies, who insure employers generally against loss by their servants' dishonesty, there is a society called the "Bankers' Guarantee Trust Fund," to indemnify against loss by bank employés. The Bank of England and several of the leading railway companies have a fund contributed by the employés to secure their employers against loss by the dishonesty of the former. There is also a Local Government and a Post

Office Fidelity Guarantee Society, to insure the honesty of the Local Government and Post Office employes. The National Guarantee and Suretyship Association will act as sureties or relieve private sureties of their risk.

## VI. MISCELLANEOUS BRANCHES.

1. **Burglary and Housebreaking.** Several offices, and most Accident Insurance Companies, transact insurance against these felonies. The National Burglary Insurance Corporation, the pioneer of this class of business, issues a combined Burglary and Fire Policy, and also special policies for Licensed Victuallers, Cyclists, and the Army. The North British and Mercantile and the Century Insurance Companies have opened Burglary Insurance Departments; and the Guardian Fire and Life, the Yorkshire, and the Royal Exchange Assurance Offices already have done so. The Car and General Insurance Corporation offers a combined policy against burglary, housebreaking, larceny, and fire. It is understood that a large amount of burglary insurance is underwritten at Lloyd's. The Yorkshire Insurance Co. has a special Army scheme of Burglary Insurance.

The risk of murder by burglars or housebreakers is now covered by the Guardian Fire and Life Insurance Co. and the London Guarantee and Accident Insurance Association by payment of a small additional premium to that of the burglary and housebreaking risk.

2. The coupon system of insurance entitles persons who possess copies of specified newspapers, railway guides, etc., containing accident coupons, to the payment of certain sums for injuries mentioned therein; while some of these on other coupons promise to pay the next-of-kin or legal representatives of the holders who suffer death from certain accidents—which are generally those that happen in railway trains—within specified times, fixed sums, which vary very much according to chances of death from such occurrences. By far the greater part of this insurance is transacted by the Ocean Accident and Guarantee Corporation. It is also transacted by the Casualty Insurance Co., Century Insurance Co., General Accident Assurance Corporation, the Law Accident Insurance Society, the Northern Accident Insurance Co., the Fine Arts Insurance Co., the Compensation and Guarantee Fund, Ltd., the Commercial Union Assurance Co., the Law Fidelity and General Insurance Corporation, the Norwich Union Life, and the Pearl Insurance Co. The first of these two last-named offices underwrite the *London Opinion* life insurance coupon, and the second the life assurance scheme of the *Weekly Despatch*.

3. **Medical Attendance during Sickness** is insured by the National Medical Aid Co., the United Legal Indemnity Insurance Society, the Commercial Union, and several industrial assurance companies.

4. **Transit Risks.** The Northern Accident Insurance Co., the Fine Art and General Insurance Co., the Law Accident Insurance Society, the Compensation and Guarantee Fund, the London and Lancashire Fire Insurance Co. and the United Legal Indemnity Insurance Society, insure against loss of property in transit other than such as is sent by registered parcel post, as mentioned in

No. 27. The Car and General Corporation covers motors against transit risks.

5. **Horses and Cattle and Insurance against Death by Accident and Disease** is undertaken by the Horse, Carriage, and General Insurance Co., the Imperial Live Stock Insurance Corporation, the National Live Stock Insurance Co., and the Scottish Live Stock Insurance Co. The latter company covers the horses of the Yeomanry and Volunteers.

6. **Third Party Risks** are taken by most Accident Insurance companies.

7. **Vehicular Risks** are also taken by nearly all Accident Insurance companies. The Ocean Accident and Guarantee issues a public liability policy for horse drivers. The Horse, Carriage, and General Insurance Co. also makes a speciality of this line. The Car and General Insurance Corporation has a special prospectus for motor cars, lorries, and vans.

8. **Hailstorm Insurance** is transacted by the Norwich and London Accident Insurance Association, and the Nurserymen's and Market Gardeners' Insurance Co.; this company covers crops in glass houses. The Alliance Assurance Co. insures against hailstorms.

9. **Engines and Boilers.** Inspection and insurance of steam, gas, oil engines and boilers, and advice on all matters relating thereto, is undertaken by the Vulcan Boiler and General Insurance Co., by the National Boiler and General Insurance Co., by the Engine, Boiler, and Employers' Liability Insurance Co., and by the Law Accident Insurance Society.

10. **Plate-glass Insurance** was first commenced in '52 by the Plate-glass Insurance Co. Many companies transact this business. The method generally followed in plate-glass insurance is to undertake to make good all breakages, the companies being entitled, by way of salvage, to the broken glass. The insurance is often undertaken by contract in private dwellings.

11. **Mortgages, Debentures, and other Securities.** The insurance of the holders of these valuables against loss of principal and interest, and other business of a kindred character, is effected by the Law Guarantee and Trust Society, the Liverpool Mortgage Insurance Co., the Ocean Accident and Guarantee Corporation, the Trustees, Executors, and Securities Insurance Corporation.

12. **Trusteeship and Executorship.** In consideration of certain premiums, the Law Guarantee and Trust Society, the Ocean Accident and Guarantee Corporation, the Trustees, Executors, and Securities Insurance Corporation, the Century Insurance Co., the Liverpool Mortgage Insurance Co., and the Lancashire and Yorkshire Accident Insurance Co. arrange to act as trustees or executors. Trusteeship by insurance companies has recently made considerable progress, not only under wills and marriage settlements, but for debenture-holders. The Royal Exchange Corporation has recently agreed to act as trustees or executors.

13. **Pictures and other Valuable Objects of Art.** The owners of these are indemnified against loss from damage or destruction of such by the Fine Art and General Insurance Co., the Compensation and Guarantee Fund, and the United Legal Indemnity Insurance Society.

14. **License Insurance.** The Licenses Insurance Corporation and the Law Guarantee and Trust Society insure license-holders and other interested persons against loss or deprivation

in the value of property incurred by the forfeiture or non-renewal of licenses.

**15. Loss or Damage of Passengers' and Mariners' Luggage at Sea.** The Marine and General Mutual Life Assurance Society and the General Accident Assurance Corporation undertake these risks.

**16. Sinking Funds or Capital Redemption in connection with Leasehold Property.** Several life offices, and the Ocean Accident and Guarantee Corporation and the Law Guarantee and Trust Society, issue policies for this purpose.

**17. Special Indemnities or Contingency Policies** are issued in almost any cases, when they are required, by several life offices, as well as by the Ocean Accident and Guarantee Corporation, the Law Guarantee and Trust Society, the Law Accident Insurance Society, the Fine Art and General Insurance Co., the General Accident Assurance Corporation, the Compensation and Guarantee Fund, the Royal Exchange Assurance, and the Car and General. Most ordinary life assurance companies insure against issue of marriages, and on the other hand against a person dying with or without issue, when those events are improbable. Insurances are sometimes effected with ordinary life offices against such contingencies as a change of name, armorial bearings or religion, loss or recovery of reason, etc. The Law Guarantee and Trust Society, beyond granting policies for these objects, have done so with regard to defects in title to landed or other property: lost documents, missing beneficiaries, avoidance of voluntary settlement, and payment of annuities. Some of these risks are also insured by the Ocean Accident and Guarantee Corporation.

**18. Performance of Contracts.** The London Guarantee and Accident Co., the Fine Art and General Insurance Co., the Vulcan Boiler and General Insurance Co., and the General Accident Assurance Corporation, insure the performance of contracts; also the Fidelity and Deposit Co. of Maryland. The Car and General Insurance Corporation insures the continuance of salaries of employees in the event of bankruptcy of a firm.

**19. Cycle Insurance** of different kinds is undertaken by many companies, including the Law Accident Insurance Society, the National Burglary Insurance Corporation, the Fine Art and General Insurance Co., the General Accident Assurance Corporation, the United Legal Indemnity Insurance Society, the National Burglary Insurance Corporation, and the Law Fidelity and General Insurance Corporation.

**20. Excess Bad Debt Insurance.** Policies are issued by the Ocean Accident and Guarantee Corporation and the Commercial Union Assurance Co. for covering merchants and others against bad debts of short duration. The Excess Insurance Co. also insures Solvency and the taking up of Bills of Exchange.

**21. Motor-Car Indemnity and Horseless Carriage Insurance** is carried on by the General Accident Assurance Corporation, the Ocean Accident and Guarantee Corporation, the Law Accident Insurance Society, the Yorkshire Fire and Life Insurance Co. and the Norwich and London Accident Insurance Co. The Car and General Insurance Corporation offers special terms and facilities in this line.

**22. Chemists' and Druggists' Indemnity Insurance** is undertaken by the Northern Acci-

dent Insurance Co., the Scottish Employers' Liability and General Insurance Company, the Royal Exchange Assurance, the Law Accident Insurance Society, the Vulcan Boiler and General Insurance Co., the Patriotic Insurance Co., the Compensation and Guarantee Fund, and the United Legal Indemnity Insurance Society for risks connected with the dispensing and sale of drugs by chemists and druggists in their business.

**23. Lifts, Hoists, and Cranes.** Several of the leading accident companies, and about five Life Offices, assure the owners or tenants of passenger and other lifts against liability for damages for personal injuries to individuals from accidents by or in connection with such lifts. The Vulcan Boiler and General Insurance Co., the National Boiler and General Insurance Co., and the General Accident Assurance Corporation insure lifts and hoists against breakdowns.

**24. Landlords' and Factors' Indemnity Insurance.** Policies are issued for these risks by the Northern Accident Insurance Co., the Ocean Accident and Guarantee Corporation, the Law Accident Insurance Society, the Royal Exchange Assurance, the Compensation and Guarantee Fund, the General Accident Assurance Corporation, and the United Legal Indemnity Insurance Society to indemnify such persons for compensation which they may be compelled to pay in respect of those personal accidents the policy covers.

**25. Steam Pipes.** Inspection and insurance of steam pipes in connection with engines and boilers is undertaken by the Vulcan Boiler and General Insurance Co., the National Boiler and General Insurance Co., the Engine, Boiler, and Employers' Liability Insurance Co., and the Law Accident Insurance Society.

**26. Electrical Plant.** Inspection and insurance of engines, dynamos, motors, and other electrical apparatus is undertaken by all these four last-named companies.

**27. Registered Post Insurance** is transacted by the Compensation and Guarantee Fund, the Law Accident Insurance Society, the Fine Art and General Insurance Co., the Royal Exchange Assurance, and the United Legal Indemnity Insurance Society on bonds, jewellery, notes, and other valuable articles sent by registered post.

**28. House Purchase Insurance.** By this system, adopted by the British Homes Assurance Corporation, the Century Insurance Co., the Scottish Temperance Life Office and others, a person can buy his house and insure his life out of money which would otherwise be paid as rent.

**29. Loss or Destruction of Documents.** Insurance against these events are undertaken by the United Legal Indemnity Insurance Society.

**30. Indemnity against the payment of rent, mortgage interest, etc., if the house is rendered uninhabitable through fire,** is granted by the Central Insurance Co.

**31. Forged Transfers.** The Law Guarantee and Trust Society, and the Ocean Accident and Guarantee, and other offices insure companies against loss consequent upon dealing in, or acting on, forged transfers.

**32. Dairymen's Indemnity** policies are issued by the Car and General Insurance Corporation.

**33. School Epidemics** can be insured against in the last-named office, and the Profits and Income Insurance Co.

## INTERNATIONAL ARBITRATION.

*The Hague Conference.*

In response to the proposal sent out by the Czar, in August '98, to all the Powers, a Peace Conference was held at The Hague in May, June, and July, '99, attended by 101 representatives of the following States: Austria-Hungary, Belgium, Bulgaria, China, Denmark, France, Germany, Great Britain and Ireland, Greece, Italy, Japan, Luxembourg, Montenegro, Mexico, Netherlands, Persia, Portugal, Roumania, Russia, Servia, Siam, Spain, Sweden and Norway, Switzerland, Turkey, and the United States of America. Eight proposals were submitted to the Conference for discussion:—

1. Not to increase the present effective armaments, and to provide for a reduction of them in the future.
2. To prohibit the use of new arms and explosives.
3. To restrict the use of existing explosives, and prohibit projectiles or explosives from balloons, etc.
4. To prohibit submarine torpedo-boats, and not to construct boats with rams in the future.
5. To apply to naval warfare the stipulations of the Geneva Conventions of '64 and '68.
6. To neutralise ships and boats employed in saving those overboard during or after an engagement.
7. To revise the (unratified) declaration concerning laws and customs of war elaborated by the Brussels Conference of '74.
8. To accept in principle mediation and facultative arbitration in cases lending themselves thereto.

Three sections or commissions were nominated to report on the above eight points. Section 1 was to report on points 1 to 4, relating to the limitation of armaments; section 2 on points 5, 6, and 7, relating to laws of war, the Geneva Convention, etc.; and section 3 on point 8, relating to mediation and arbitration. It very early became apparent that little of a practical character was to be expected from the deliberations of commission 1 on disarmament; and on June 30th, '99, its work was closed by the adoption of a motion substantially to the following effect:—"The commission considers: First, that it would be very difficult to determine, even for a period of five years, the figure of effective forces without regulating at the same time the other elements affecting national defence. Secondly, that it would be no less difficult to regulate by an international convention the elements of that defence as organised in each country according to very different views. Thirdly, that the restriction of those military burdens which at present weigh upon the world is greatly to be desired for the material and moral welfare of humanity." The real work of the Conference was done in commission 3, which drafted a project of arbitration establishing a permanent arbitration court open to any of the signatory powers, with an international bureau at The Hague. As to the conventions and declarations embodied in the final Act and ratified by most of the countries represented, see eds. 1901 and 1902. The Conference broke up on July 29th, '99.

*Second Hague Conference Proposed.*

At the annual conference in 1904 of the Inter-Parliamentary Union, held at St. Louis, a resolution was unanimously carried requesting "the several Governments of the world to send delegates to an international conference to be held at a time and place to be

agreed upon by them for the purpose of considering: (1) The questions for the consideration of which the Conference at The Hague expressed a wish that a future conference be called; (2) The negotiation of arbitration treaties between the nations represented at the conference to be convened; (3) The advisability of establishing an international congress to convene periodically for the discussion of international questions," and asking the President of the United States to invite all the nations to send representatives to such a conference. The President received a deputation from the Union on Sept. 24th, and accepted the charge offered to him. Accordingly, on Oct. 31st, Mr. Hay sent a despatch to all the U.S. Ambassadors abroad directing them to ascertain whether and how far the governments to which they were accredited were disposed to act in the matter, and indicating three points for consideration: viz.—(1) the rights and duties of neutrals, including the question of contraband; (2) the inviolability of private property in naval warfare; and (3) the bombardment of ports, towns and villages by a naval force. A Note sent out by Mr. Hay, Dec. 16th, 1904, notified the acceptance in principle of the President's invitation, but deeply regretted Russia's refusal to join as tending to cause some postponement of the proposed conference. He suggested an interchange of views between the signatories of the Acts of 1899, through an International Bureau under the control of the Hague Court, with a view to the Government of the Netherlands eventually calling a renewed conference at The Hague.

*International Arbitration Court.*

The International Arbitration Court was organised in 1901, with a Permanent Bureau. The various Governments nominated members to represent them, and M. de Beaufort, as *ex officio* President, officially notified the signatories (April 14th, 1901) that the Court was duly constituted. The Court is to be housed in a Palace of Peace, of which Mr. Carnegie has undertaken to defray the cost.

British Members of the Court: Sir E. B. Malet, Sir E. Fry, Professor Westlake, and Sir John Ardagh.

General Secretary and Chief of the Bureau: M. le Jonkheer L. H. Ruyssenaers, Envoy Extraordinary and Minister Plenipotentiary of H.M. the Queen of the Netherlands.

First Secretary of the Bureau: M. le Jonkheer W. Röell.

The dispute between Japan and Great Britain, France, and Germany as to the house-tax was referred to the Court by a treaty signed Aug. 28th, 1902, and the Powers were ordered to deposit their respective cases by Nov. 28th, 1903. The hearing of the case was in 1904 postponed to Feb. 15th, 1905.

Great Britain and Germany agreed to refer their claims against Venezuela to the Court; and an Arbitration Tribunal consisting of M. de Mouravieff (President), M. Lammasch, and M. de Martens was appointed. The Tribunal met on Oct. 1st, 1903, and adjourned *sine die* on Nov. 13th. The decision, announced Feb. 22nd, 1904, was in favour of preferential payment to Great Britain, Germany, and Italy in respect of the 30 per cent. levied on the Customs receipts at La Guayra and Porto Cabello in settlement of the claims against

Venezuela. M. de Mouravieff, in announcing the decision of the Court, deplored the fact that its proceedings, which had begun in an atmosphere of peace, had closed amid the first echoes of a terrible conflict. This, he said, was a serious set-back to the cause of progress, and, in spite of the highest aspirations, no nation was free from danger of attack from an unexpected quarter. A just Providence, however, would decide between righteous claims and mere frivolous pretensions. The Japanese Minister afterwards entered a formal protest against these remarks. The expenses of the Arbitration amounted to only £110. See **VENEZUELA**.

An International Conference adopted, Dec. 25th, 1904, a Convention as to the status of hospital ships,

### Arbitration Treaties.

A treaty of arbitration and conciliation between Great Britain and France was signed Oct. 14th, 1903. This treaty provided for the reference of all differences of a judicial order and not involving vital interests or national honour to the decision of The Hague Court, the reference to be preceded by a special agreement setting out the subject in dispute, the powers of the arbitrators, and the constitution of the Court.

Similar treaties, holding good for 5 years, were signed as follows:—

- France and Italy, Dec. 25th, 1903.
- " " Spain, Feb. 27th, 1904.
- " " the Netherlands, April 6th, 1904.
- " " Sweden and Norway, July 9th, 1904.
- " " United States, Nov. 1st, 1904.
- Great Britain and Italy, Feb. 1st, 1904.
- " " Spain, Feb. 27th, 1904.
- " " Denmark, June 10th, 1904.
- " " Germany, July 12th, 1904.
- " " Sweden and Norway, Aug. 11th, 1904.
- " " Switzerland, Nov. 16th, 1904.
- " " Portugal, Nov. 16th, 1904.
- " " the United States, Dec. 12th, 1904.

- United States and Germany, Nov. 22nd, 1904.
- " " Portugal, Nov. 23rd, 1904.
- " " Switzerland, Nov. 21st, 1904.

- " " Spain, Dec. 23rd, 1904.

Belgium and Russia, Nov. 2nd, 1904.

The Netherlands and Denmark, on June 9th, 1904, concluded an unlimited treaty of arbitration, which contained a clause leaving it open for other Powers to join.

### Societies.

The International Arbitration League, formerly known as the Workmen's Peace Association, was originally established during the Franco-German war of 1870 to advocate non-intervention, peace, and international arbitration. For many years the League has carried on an active peace propaganda, in Great Britain, on the Continent, and in America. It initiated the memorial from 354 members of the British House of Commons to the President and Congress of the United States in favour of a permanent treaty of arbitration between the two nations, organised the deputation of M.P.s to Washington, also initiated and organised the inter-parliamentary conferences of Members of Parliaments in favour of international

arbitration which have been held at Paris, London, Rome, Berne, The Hague, Brussels, Budapest, Christiania, Vienna, and St. Louis. It has 102 members of Parliament as Vice-Presidents. **President**, Thomas Burt, M.P.; **Treasurer**, Howard Evans; **Secretary**, W. Randal Cremer, M.P. **Offices**, 11, Lincoln's Inn Fields, London.

The Peace Society was founded in 1816, and has for its object the promotion of permanent and universal peace. The Society has always advocated a gradual, proportionate, and simultaneous disarmament by all the nations of Europe, and the principle of arbitration. The Society maintains a constant propaganda in favour of peace, and, amongst other methods of action, especially advocates the preaching of sermons on peace, in as many churches as possible, on the Sunday before Christmas. **Treasurer**, Walter Hazell, Esq., J.P.; **Secretary**, W. Evans Darby, LL.D. **Offices**, 47, New Broad Street, London, E.C.

### INTERNATIONAL LAW.

International Law consists of those rules which civilised States formally or tacitly agree to observe in their relations with each other. Strictly speaking, it is not law at all, since there exists no definite superior to enforce such observance. This term, however, seems quite appropriate, if law is understood, not in its technical, but in its wider sense. **Modern International Law** is based upon certain historical usages as set forth and developed in the writings of Grotius and later Jurists, together with various treaties and conventions through which it has been definitely acknowledged and extended by statesmen. It deals with (1) Nations at peace; (2) Nations at war, and Neutrals; (3) Arbitration. The chief cause of International Law having been the need of checking the aboriginal license of war, the second branch has ever been, and must for long remain, the more important. Accordingly, it will be the one principally considered in this article.

#### 1. Nations at Peace.

For the most part the law of nations is concerned with "Sovereign" or "Semi-Sovereign" States. A "**Sovereign State**" is one which has a fixed territory and a civilised Government, while normally owing no obedience to any superior State. A "**Semi-Sovereign State**" is one independent as regards internal administration, but having its external policy subject, in a greater or less degree, to the control (suzerainty) of some superior State. In this second class are also placed those States (such as Belgium) whose independence is guaranteed by the great Powers on condition that they become "neutralised." The "**territory**" of a State is that portion of land and the water thereon to which it has an established title; and it includes certain bays and gulfs indenting its coast, and also the sea within three miles from the low-water mark. Beyond this limit every sea is open to all nations, and none can now be recognised as the exclusive property of any one nation, though particular claims have often been made in the course of history. When the "territorial" waters of a State communicate between two high seas there is a right of "innocent passage" for the private ships of all nations. But this does not

extend to ships of war; though, by courtesy, a neutral State may allow them to pass even if they belong to belligerents, provided they commit no hostilities therein. **The position of the Suez Canal is exceptional.** That has been specially "neutralised"; and consequently both public and private vessels of all nations, neutrals or belligerents, can always claim "innocent passage" as a matter of right. No permanent fortifications are allowed there. By the *Hay-Pauncefote Treaty, 1901*, between Great Britain and the United States, the general principle of neutralisation is to apply to any future Isthmian Canal which may be constructed under the auspices of the United States. Such canal "shall be free and open to vessels of commerce and war of all nations on the terms of entire equality." But seeing that there is no provision that it shall remain open in time of war, and no prohibition of fortifications, we, apparently, have in this case what may be termed only a limited neutralisation.

By the *Treaty of 1841*, confirmed by the Peace of Paris 1856, Russia and the other European Powers agreed to be bound by the custom by which Turkey prohibited the warships of all nations from passing through the Straits of the Dardanelles and Bosphorus. Accordingly, when, during the present Russo-Japanese war, a P. & O. steamer (the *Maica*) was seized on suspicion of carrying contraband, by one of the Russian Volunteer Fleet which had passed out from the Black Sea *via* the Dardanelles, the British Government successfully protested that if the Russian vessel was a war-ship it had no right to go through the Straits, and that if it was not a war-ship then it had no right to make the seizure.

**New territory** is obtained by (a) occupation, (b) conquest, and (c) cession. The two latter terms are self-explanatory. "**Occupation**" consists of formal annexation together with a definite settlement of some organised authority. What extent of "hinterland," or back country, appertains to an occupation beginning on the sea coast must depend upon what is to be considered reasonable under the circumstances. A "**Protectorate**" arises when one State completely controls the external relations of another State or of a portion of territory, while not interfering to any large extent with the internal administration. A "**sphere of influence**" is a portion of territory from which one State warns off other States; not itself exercising any control, either internal or external, but probably contemplating an ultimate protectorate or occupation.

## 2. Nations at War.

In mediæval times a declaration of war was an invariable preliminary; but, though it is still usual, modern custom does not regard it as absolutely essential. The termination of diplomatic relations, and an ultimatum, following unsuccessful negotiations, are wont to mark the beginning of hostilities; while the formal declaration may come later, or not at all. When independent civilised States make war they become *ipso facto* "**belligerents**," to whom neutral States must therefore concede such rights as those of "search" and "blockade." But in the case of a civil war it is a question of degree as to when the insurgents, ceasing to be mere rebels, shall receive "**recognition of belligerency**" from neutral States and even

from their own State. Such recognition by neutral States is justified, and will constitute no breach of neutrality when their own interests are directly affected, and when the insurgents have an organised Government of their own, and have turned their insurrection into actual war. As to the grounds for "**Mediation**" or for active "**Intervention**" in a war, opinions are far more vague. In fact, these questions appear to be rather matters of politics than of law.

War is normally waged by regular military bodies under the authority of a recognised Government; but exceptions are admitted to this rule if the combatants really are open and organised enemies, not occasional and isolated marauders. One of the Conventions ratified by most of the Powers at the Hague Conference, '99, sets forth that

(1) Irregular guerilla troops must be recognised as belligerents if (a) they are under responsible leadership; (b) wear a distinct badge recognisable from a distance; (c) carry arms openly; (d) conform to the customs of war.

(2) And further, as regards "**levies en masse**" of the ordinary inhabitants, the population of a non-occupied territory, who on the approach of the enemy of their own accord take up arms to resist the invading troops are considered as belligerents if they respect the laws and customs of war.

(3) **A territory is occupied** "when it is actually placed under the authority of the hostile army. The occupation applies only to those territories where such authority is established and in a position to assert itself." It follows, therefore, that insurgents in districts really occupied could be treated as rebels rather than belligerents.

By the *Geneva Convention, '64*, in order to afford as much protection as possible to the sick and wounded on land, hospitals and ambulances, together with the surgeons and nurses and other persons and things engaged in such service, were "neutralised" on certain conditions. And by one of the Hague Conventions, '99, this "neutralisation" has been extended in principle to naval warfare.

**Enemy's Property on Land.**—A State's movable property (with the modern exceptions of such things as libraries and works of art) may be confiscated. But the rule has slowly but surely grown up that private property cannot be recklessly seized; nor is general pillage allowed. "Requisitions" of food, etc., with or without payment, and even "contributions" of money, are sanctioned if within reasonable limits, and necessary to the army of occupation. Neither public nor private buildings may be deliberately destroyed unless they have been utilised for the purpose of hostilities. And devastation of territory should only be resorted to when "imperatively required by the necessities of war."

**Enemy's Property at Sea.**—The war-ships of belligerents may be captured anywhere except in the territorial waters of neutrals, or in a "neutralised" inter-oceanic canal. And private vessels of belligerents may also be captured; though on the outbreak of war a period is usually fixed to allow such vessels to leave enemy's ports. The old custom was to confiscate all enemy's goods at sea, whether found on enemy's or neutral ships. But the

**Declaration of Paris, '56**—which has now been practically adopted by all the Powers, though the United States, Spain, and some minor States did not formally accede to it—acting upon the principle of “free ships free goods,” sets forth that “the neutral flag covers enemy's goods with the exception of contraband of war”; and, declining to act upon the principle “enemy's ships enemy's goods,” it goes on to state that “neutral goods, with the exception of contraband of war, are not liable to capture under the enemy's flag.” “**Contraband**” consists of munitions and other articles essential to the prosecution of war. As to what these articles actually are there is much diversity of opinion. The English doctrine is that there are two classes: (1) goods absolutely contraband—arms and ammunition, horses, marine engines, naval and military stores, etc.; (2) goods conditionally contraband—money, provisions, coals, etc.; depending upon the question whether they are to be used for military, or only for civil, purposes. But most Continental jurists decline to accept this wide classification, their tendency being to minimise the range of the doctrine. In spite of this, the Russians, during the present war, at first attempted to extend unduly the range of “contraband” by treating goods under the second heading (such as coal and flour) as if they were absolutely contraband. However, in deference to British and American protests, they recognised that such goods were only conditionally contraband, the test being the use to which they were to be applied. By the Declaration of Paris, “privateering is and remains abolished.” But as that has not been formally ratified by all the Powers, it may be well just to note the old practice, though it is not likely to be revived. “Privateers” were private ships authorised, on behalf of belligerent States, by “**Letters of Marque**” (Commission), to wage war on their own account against the enemy's commerce. And, formerly, even the private ships of neutrals could be so commissioned, and thus avoid being treated as “pirates” during their depredations.

**Neutrals (Nations and Individuals).**—Belligerents can exercise certain rights as against neutrals, while on the other hand they owe them reciprocal duties. **Neutral States** must not only abstain from actually assisting belligerents with arms or money, but also they must prevent them from using their territories directly for the purpose of hostilities and from fitting out warlike expeditions thereon, whether military or naval. And further, neutrals have to recognise the right of belligerents to prohibit the passage of private ships to or from blockaded ports. A blockade, according to the Declaration of Paris, to be binding on neutrals “must be effective—that is to say maintained by a force really sufficient to prevent access to the coast of the enemy.” And, quite apart from this, there must be some notification, express or (probably) implied, of the existence of such effective blockade. That the subjects of neutral States may not convey contraband has been already pointed out. Belligerents may capture a neutral ship reasonably suspected of conveying contraband, and take it to one of their own ports for trial by a prize-court; but they may not themselves either confiscate the goods or sink the vessel (as was done by the Russians in the case of the *Knight Commander*). On the other hand,

the captain of a neutral ship must, on the demand of a belligerent, stop and have his papers examined, or else take the consequences. An analogous though distinct obligation is that neutrals should not use their ships for performing any service for belligerents which may, in some way or other, definitely assist them in the execution of warlike operations. It would appear that for the subjects of neutral States to enlist in the armies and navies of belligerent States is not contrary to International Law; but, for all that, most nations have special legislation directed against such “foreign enlistment” on the part of their citizens. So a vessel used for supplying coals to belligerents may be deemed to be in their “naval service”; and therefore its owners may become liable under the Foreign Enlistment Act. And recently (Dec. 1904) warrants have been issued against certain persons for causing to be despatched from the port of London a turbine vessel (the *Caroline*) to be used in the naval service of a foreign State at war with a friendly State. At the same time, no Government is supposed to prevent all wrong acts of its subjects which may constitute minor breaches of neutrality. If they lend money or convey contraband to the belligerents they do so at their own risk, while their ships are always liable to search and capture. For more serious breaches of neutrality, either on the part of its own subjects or of belligerents on its territory, the State itself is held responsible: if, for example, it wilfully or negligently allows a warlike expedition to be fitted out. In the famous “*Alabama*” case the question arose whether Great Britain was liable because, during the American Civil War, the Confederates had a cruiser built on British territory, whose armament was sent on after her departure. Or was the cruiser a mere article of contraband with which the Government had no concern? The law was not then, probably is not now, very definite on the point. But when the case was at last referred to arbitration, the preliminary treaty of Washington, '71, between Great Britain and the United States, laid down three rules upon which, *inter alia*, the tribunal was to act, the first and most important being,—“A neutral Government is bound to use due diligence to prevent the fitting out, arming, or equipping, within its jurisdiction, of any vessel which it has reasonable grounds to believe is intended to cruise or to carry on war against a Power with which it is at peace; and also to use like diligence to prevent the departure from its jurisdiction of any vessel intended to cruise or carry on war, as above, such vessel having been specially adapted, in whole or in part, within such jurisdiction, to warlike use.” On this basis the Geneva Tribunal decided against Great Britain, awarding heavy damages to the United States. As between the two parties to the treaty the rules, obviously, remain binding. But some of the other Powers repudiated such a stringent interpretation of the law when the treaty was drawn up, and it is doubtful whether even now the views therein expressed have been generally accepted. Hall suggests that, for the future, the character of the ship might be the test. A neutral State should therefore prevent a vessel from leaving its shores if it appears to be primarily designed for warlike use; but not if primarily designed for peaceful use. Belligerents

gerents, on their part, must abstain from attempting to carry on hostilities, or to fit out warlike expeditions (military or naval), or to levy troops in the territory of neutrals. And they must not make such territory, whether by land or sea, a regular base of operations; though, under real stress of circumstances, belligerent vessels may obtain occasional supplies of non-warlike materials at neutral ports. "Continued use is the crucial test of a base." Belligerent troops are not permitted to cross neutral territory unless pursued by the enemy, in which event the duty of the neutral State is to "intern" them—that is, disarm and detain them till the end of the war; and it is generally being recognised that this principle of "internment" also applies to maritime war in the case of any belligerent vessel taking refuge in a neutral port. See RUSSO-JAPANESE WAR.

**Consult :** Hall, "International Law"; Wheaton, "International Law"; Lawrence, "Principles of International Law." See EX-TRADITION, FOREIGN OFFICE, and INTERNATIONAL ARBITRATION.

**International Law, Institute of (*Institut de Droit International*).** This Institution was founded in '73, Dr. Lieber, a distinguished American, M. Moynier of Geneva, and M. Rolin-Jacquemyns, the well-known Belgian advocate, being its chief promoters. The first meeting was at Ghent in '74, and since then the Institute has assembled annually at various places on the Continent and in England. The 1904 session was held at Edinburgh. The idea of the founders was that since the rules which govern the intercourse of states are established out of respect for the public opinion of the civilised world, and since this public opinion in turn is mainly derived from the leading international jurists of Europe, the incorporation of those jurists into a society whose resolutions should form a *corpus juris gentium*, could not but facilitate the development of the reign of law and justice among nations. The maximum number of its members is 60, and of its associates 60, and no nation can possess more than a fifth of the whole number. The Institute was awarded the Nobel Peace Prize in 1904. The English members are Professors Westlake, Holland, Leech, and Dicey, Sir Robert Hart, Lord Reay, Mr. Thomas Barclay, Sir D. Mackenzie Wallace, and Lord Chief Justice Alverstone; and the English associates are Mr. E. J. Lawrence, Sir Sherston Baker, Sir John Scott, Mr. J. A. Foote, Prof. Goudy, Mr. John Macdonell, C.B., and Sir John Ardagh. **General Secretary,** Prof. Descamps (Secretary of State and Senator), 99, Rue de Namur, Louvain, Belgium.

## IRELAND.

Ireland has an area of 32,605 sq. m., and a population, according to the 1901 census, of 4,458,775, 2,200,040 males and 2,258,735 females, showing an excess of 58,695 females as against a similar excess of 66,844 in 1891. The decrease in the population, as compared with 1901, was 245,975. Munster showed a decrease of 97,241, or 8·29 per cent.; Connaught of 73,037, or 10·08 per cent.; Leinster of 38,709, or 3·26 per cent.; and Ulster of 36,988, or 2·28 per cent. The only county which showed an increase was Dublin, with 6·31 per cent. All the other counties showed a decrease, ranging from 5·69 per cent.

in the case of Wicklow to 13·45 in the case of Monaghan. As to religious professions, 3,308,661 were returned as Roman Catholics, being 6·7 per cent. less than the number in '91; 581,089 as Protestant Episcopalians, or 3·2 per cent. less than in '91; 443,276 as Presbyterians, or 0·4 per cent. less than in '91; 62,006 Methodists, or 11·7 per cent. more than in '91; 3,898 Jews, or 111·9 per cent. more than in '91; and 59,845 all other persuasions. Put in another way, 74·2 per cent. of the population were returned as Roman Catholics, 13·03 per cent. as Protestant Episcopalians; 9·94 per cent. as Presbyterians, and 1·39 per cent. as Methodists. The number of families returned in 1901 was 910,256, or a decrease since '91 of 2·3 per cent., representing an average of 4·9 persons to a family, as against 5 in '91. The number of inhabited houses was 858,158 in 1901, a decrease of 12,420, or 1·4 per cent. The country is divided into 4 provinces: Leinster, Munster, Ulster, and Connaught. There are 6 county boroughs: Dublin, pop. 290,638; Belfast, 349,180; Cork, 76,122; Limerick, 38,151; Londonderry, 39,892; and Waterford, 26,769. The number of emigrants from Ireland in 1903 was 40,659, of whom 39,789 were natives of Ireland. Since 1851, when the Emigration Returns were first compiled, up to the end of 1903, the number of native emigrants from Ireland totalled 3,961,011, including 2,058,907 males and 1,902,104 females.

## Administration.

The head of the executive in Ireland is the Viceroy or Lord-Lieutenant, who is assisted by a Chief Secretary, the Lord Chancellor of Ireland, the Attorney-General for Ireland, the permanent officials, and a Privy Council (which is a separate and distinct body from the Privy Council of Great Britain); but the government of the country is in all essential points carried on under the direction of or in concert with the Ministry of the day in London. The Lord-Lieutenant is charged with the maintenance of peace and order; the Irish Constabulary are under his control, and he may, if he think it to be necessary, direct the Commander of the Forces to send troops to their aid. He has power to commute sentences and pardon criminals. There are, however, more agreeable and less anxious functions attaching to the office; for, as representing His Majesty, the Viceroy, assisted by his wife, holds courts, drawing-rooms, levées, and maintains in Dublin an establishment of a semi-regal character. On occasions he confers the honour of civil knighthood. During his absence the duties of chief governorship are performed by three or more Lords Justices, those who act in this capacity being usually the Lord Chancellor of Ireland, the Commander of the Forces, and some of the judges. The Lord Chancellor of Ireland is head of the Irish judicial establishment, principal legal adviser of the Lord-Lieutenant, and exercises in Ireland many of the powers which in England are vested in the Lord High Chancellor. The office may be held by a Roman Catholic.

The Chief Secretary to the Lord-Lieutenant, or Chief Secretary for Ireland as he is usually called, has been described as prime minister to the Viceroy; and although he is in theory subordinate to the Home Office, he has his own establishment at the Irish Office in London, as well as in Dublin, and is directly responsible to the House of Commons for the

acts of the Irish administration. He is assisted by a **Permanent Under-Secretary**, salary £2000, and other officials. There is a separate **Local Government Board** (see below); a **Board of Public Works**, which is the great financial agent of the Government in Ireland; a **Board of Trade**; a **Board of National Education**, by which the grant made by Parliament for public education is administered (see **EDUCATION**); and a new **Department of Agriculture** and other Industries and Technical Instruction was created in '99. This Department has done a most important work in and for the country in the development of agriculture and industry. See article on **AGRICULTURE**.

**Lord-Lieutenant**, The Earl of Dudley, G.M.P., G.C.V.O.

**Chief Secretary**, Rt. Hon. George Wyndham, M.P.

**Under-Secretary**, Rt. Hon. Sir A. P. Macdonnell, G.C.S.I.

**Lord Chancellor**, Lord Ashbourne.

**Chairman Board of Public Works**, G. C. V. Holmes, C.V.O., C.B.

**Principal Officer Board of Trade**, Captain W. Tillar.

**Vice-President Board of Agriculture and Technical Instruction**, Right Hon. Horace Plunkett, K.C.V.O.

### **Royal Irish Constabulary.**

This is a semi-military force, consisting of over 10,000 members, who are drilled and disciplined as soldiers, live in barracks, and are armed with rifles, swords, bayonets, and revolvers. In quelling disturbances they are frequently required to act in large bodies in the double capacity of policemen and soldiers, but upon all their ordinary duties they are, like the men of other police forces, armed with a truncheon only. As at present constituted, the **Irish Constabulary Force** was established by Act of Parliament in '36, and is directly controlled by the Irish Government. It has undergone several changes and additions to its strength by subsequent statutes. In '67 the title of **Royal Irish Constabulary** was conferred on the force by command of H.M. Queen Victoria. The City of Dublin and its suburbs are protected by the **Dublin Metropolitan Police**, and the **Royal Irish Constabulary** perform police duties for the remainder of Ireland. A Reserve Force in Dublin was established in '39 for duty, when required, in any part of Ireland. Its authorised strength consists of 4 district inspectors, 8 head constables, and 400 sergeants, acting-sergeants and constables.

The **Inspector-General** is resident in Dublin, and is assisted by a **Deputy Inspector-General** and three **Assistant Inspectors-General**. Each county or riding is under the immediate charge of a county inspector.

The duties of this imperial constabulary consist of the following among other numerous civil services not imposed upon police forces in the United Kingdom: viz., collecting agricultural statistics yearly; taking the census decennially; acting as auctioneers for sale of distress; acting as inspectors of weights and measures; the performance of Custom officers' duties for the prevention of smuggling, and of Excise duties to prevent illicit distillation.

The headquarters of the force are at the depot in Phoenix Park. This is also the place for recruiting and the professional education of all members of the Constabulary. Recruits must be unmarried, at least 5 ft. 9 in. in height, and between 19 and 27 years of age.

A separate force was established by Act of Parliament for Belfast in '65, with an inspector in charge now styled **Commissioner of Police**, whose salary and half the cost of the extra men was to be paid for by that borough. In '70 a small additional force was appointed to **Londonderry**, the cost of which was to be defrayed in the same manner.

**Civil Service Examinations** are held, for candidates nominated by the **Chief Secretary**, for cadetships in the force. One-half of the vacancies for district inspectors are filled by cadets and one-half by specially selected head constables of exceptional merit. Candidates for cadetships must be unmarried, at least 5 ft. 8 in. in height, and between 21 and 26 years of age. A pension system has been established by statute law. Special provisions have also been made for men who are incapacitated from injuries received in the discharge of their duty.

### **Dublin Metropolitan Police.**

The **Dublin Metropolitan Police** are under the immediate direction of a **Commissioner** and an **Assistant Commissioner**, and the offices of **Receiver** and **Secretary** are consolidated. At the end of 1903 the effective strength of the force was 1175, consisting of 7 superintendents, 24 inspectors, 41 station sergeants, 149 sergeants, and 954 constables. An excellent detective staff exists in the force for the prevention and detection of crime, headed by a superintendent and other officers. The expenditure for the year ending March 31st, 1904, for the **Dublin Metropolitan Police Establishment**, including the **Police Courts**, was £149,650, of which £52,803 was received as appropriations in aid from local sources, and the balance from the **Imperial Treasury**. Pensions and gratuities are provided for the force by an Act of Parliament passed in '83.

### **Local Government Board.**

This Board, like those for England and Scotland, is the central authority for poor law, local government, and public health matters. The Board consists of the **Chief Secretary** to the Lord Lieutenant as **President**, a **Vice-President** (Sir Henry A. Robinson, K.C.B.), and **Commissioners** (Sir A. P. Macdonnell, G.C.S.I., and W. L. Micks), and is assisted by a staff of officials and inspectors. The duties of the Board are in the main similar to those of the English and Scottish Boards, but the Lord-Lieutenant exercises certain powers which in England belong to the **Local Government Board**. The principal local authorities are the same as those in England and Wales, but there are no parish councils in Ireland.

### **Local Taxation Statistics.**

According to the Report of the **Local Government Board** for the year ended March, 1903, the daily average number of indoor paupers was 41,892, and of outdoor paupers 55,578. The receipts of Boards of Guardians amounted to

£1,230,550, of which £1,209,547 came from the County Councils. The total expenditure was £1,175,886. In the case of Rural District Councils the receipts were £534,992, and the expenditure £485,210.

The receipts of Committees of Lunatic Asylums were £553,150, and their expenditure £478,245. As regards Town Authorities the receipts were £2,463,372, and the expenditure £2,387,945. The amounts paid into the Local Taxation Account from Imperial sources in aid of local rates during the year ended March 1903 came to £1,271,083. The amount raised by local taxation during the year was £3,931,634, which was an increase of £157,944 on the preceding year.

The total outstanding loans were as follows:—

County Councils . . . . .	£291,052
Town Councils . . . . .	5,217,203
Town Commissioners . . . . .	676,473
Commissioners under Special Acts . . . . .	931,277
Harbour Authorities . . . . .	2,726,384
Belfast Water Commissioners . . . . .	1,725,128
Joint Boards . . . . .	163,956
Boards of Guardians . . . . .	248,562
Rural District Councils . . . . .	2,190,411
Committees of Lunatic Asylums . . . . .	1,228,235

Total . . . . . £15,398,681

The Report as to Ireland, of the Royal Commission appointed in 1896 to inquire into Local Taxation, is dated April 11th, 1902 (see 1903 ed.). Generally it recommends that the same principles suggested for England and Scotland should be applied to Ireland.

Under the **Local Government (Ireland) Act, '98**, agricultural land is assessed to the poor rate and county cess at one-half of its value. To make up the deficiency on the other half, a grant is paid out of the Local Taxation (Ireland) account from moneys received from the Consolidated Fund. The total annual amount of the grant is £727,655, which practically all goes to the County Councils. The amount of rates collected by County Councils during the year was £1,581,574. Town authorities received £875,971 from rates for municipal purposes, and £467,022 from poor rates.

### **Local Administrative Bodies.**

**County Councils.**—The first step in the direction of improved institutions was made by establishing a uniform county franchise for all local government matters on the basis of the Parliamentary franchise. By the **Local Government (Ireland) Act, '98**, County Councils were established for every administrative county, its members being elected by the votes of the electors under the Ballot Act. The counties are divided into electoral areas, each of which returns its representative to the Council; and in addition to these members the County Council comprises the chairmen of Rural District Councils, and certain additional members chosen by the Council from outside. These Councils are elected triennially. They are the rating authority for the county except in urban districts. Their powers are limited to what may be called strictly county matters, and include all the powers transferred to them from the Grand Jury (whom they supersede so far

as all administrative work is concerned) from the Presentment Sessions; from Boards of Guardians as to the making of poor rates in all places other than those that are urban; and from various authorities as to such matters as coroners, lunatic asylums, contagious diseases of animals, technical instruction, the encouragement of agriculture, fisheries, ancient monuments, marine harbours and coast protection works, and other matters. The County Councils also have conferred on them some new powers as to the acquisition and holding of land, as to exceptional distress, hospitals, and the making of byelaws for the government of the county.

**Municipal Corporations.**—These Corporations exist in a limited number of the larger towns and cities, and are administered under the **Municipal Corporations (Ireland) Act, '40**, the municipality being the only authority for local government purposes. It is a somewhat remarkable feature of the past history of Ireland that, owing to the restricted class in whom rested the power of petitioning for a charter, only one town has, since the passing of the Act of '40, obtained municipal powers. Now that these restrictions are practically removed, it is to be anticipated that more towns will obtain charters of incorporation in view of the growing needs of many of them.

**Urban District Councils.**—These Councils supersede the Town Commissioners and other bodies previously existing in towns, and they become the sole rating authority in the area over which they have jurisdiction. The **Local Government Act, '98**, transferred to them all the powers of the Presentment Sessions, and provided for their election by the Local Government electors. They are the highway and public health and burial authority for the district, subject to control as regards highways of the County Council. If any town has a population exceeding 1500, it may petition the Local Government Board for Ireland for an Order forming it into an urban district, and such Order, if issued, will have effect without confirmation by Parliament.

**Rural District Councils.**—These Councils are elected by the Local Government electors for those parts of the county division or rural district which are outside urban districts, and two councillors, instead of one as is the case in England, are returned for each electoral division. The number of members of these Councils in Ireland is therefore relatively larger than for a similar district in England. They supersede the rural sanitary authorities, and are the sanitary, but not the highway, authority for their district. They have transferred to them the powers of the Baronial Presentment Sessions, and all public health powers as well, and they can exercise under the **Local Government Act, '98**, additional powers as to boats plying for hire, recreation grounds, labourers' dwellings, epidemic diseases, and other matters. They may obtain by an Order of the Local Government Board any of the powers of an Urban District Council. In regard to highway expenditure the Council has to submit proposals to the County Council, and it is not in their power to do more. The County Council will decide what is to be done, and carry it out. The funds of District Councils are obtained by precepts issued to the County Council, by whom the sum required is levied. There are no parish councils in Ireland.

**Rating Powers.**

The areas of local rating are the Rural and Urban Districts, and the Barony in which the county cess was in the past raised is now merged in the larger area of the county. For rating purposes the County Council is the sole authority in the county, exclusive of urban districts, and the Urban Council is the authority in its own district. Expenses for public health purposes are raised by a general rate or what are termed "district charges," and special rates are levied for works of water supply and sewerage, to which the areas that benefit are alone called upon to contribute. For poor law purposes the Guardians of each Union obtain funds by precepts on the County Council. General County purposes, such as the maintenance of highways, lunatic asylums, etc., are defrayed out of the rate levied by the County Council, and called the "poor rate." One-half the amount of all rates levied on agricultural land is remitted as against the ratepayer, and the deficiency is made good out of a grant from the Imperial Exchequer. Apart from the general expenses for which rates are levied uniformly on the rating areas, a system has been created of "excluded charges" which are levied on particular districts for special purposes, such as the cost of extra constabulary (this force not being under the control of the local authorities at all), the cost of harbour, tramway, and light railway works, compensation for injuries caused by crime, and expenses for local works of public sanitation.

**Irish County Councils.**

**Antrim.**—Chairman, Sir Francis E. W. Macnaghten, Bart., H.M.L.; Vice-Chairman, George M'Ferran, J.P.; Secretary, Arthur Hill Coates, County Court-House, Belfast; Surveyor, John H. Brett, C.E.

**Armagh.**—Chairman, R. G. McCrum; Secretary, Joseph Atkinson, Jun., County Court House, Armagh; Accountant and Assistant Secretary, T. E. Reid; Surveyor, R. H. Dorman.

**Carlow.**—Chairman, John Hammond, J.P., M.P.; Secretary, Richard J. Keogh, Solicitor; Office, Court House, Carlow; Surveyor, E. T. Qulton, M.A.; Sub-Sheriff, R. F. W. Thorp; Accountant, James O'Neill.

**Cavan.**—Chairman, P. McManns; Secretary, W. Finlay, Cavan; Surveyor, R. Somerville.

**Clare.**—Chairman, P. J. Hogan, J.P., Coeagh, Bodyke; Secretary, F. Naunton Studdent, Templemaley, Ennis; Surveyor, P. L. K. Dobbin.

**Cork.**—Chairman, Jeremiah J. Howard, J.P.; Secretary, John George McCarthy; Office, Court House, Cork; County Surveyors, S. A. Kirkby, M.A., Queenstown, and R. W. Longfield, Bandon.

**Donegal.**—Chairman, James Dunlevy, Donegal; Secretary, Bernard McFadden, Solicitor, Lifford; Surveyors, J. R. A. Ferguson, M.E., and J. H. Steadman, M.E.

**Down.**—Chairman, The Right Hon. Thomas Andrews, D.L.; Secretary, Robert MacIlwaine; Office, County Court House, Downpatrick; Surveyor, James Heron, B.E., Courthouse, Downpatrick.

**Dublin.**—Chairman, P. J. O'Neill, J.P.; Secretary, R. T. Blackburne, J.P.; Accountant,

E. M. Cowan; County Surveyor, W. Collen, C.E. Solicitor, W. J. Shannon.

**Fermanagh.**—Chairman, Jeremiah Jordan, M.P., Enniskillen; Secretary, E. Hugh Archdall; County Solicitor, Charles F. Falls, M.A., Enniskillen; Clerk, W. H. West, Enniskillen; Office, Court House, Enniskillen; Surveyor, James Parsons Burkett, Enniskillen.

**Galway.**—Chairman, J. A. Glynn, Esq., B.A.; Secretary, W. Gordon Seymour; Accountant, W. G. Fogarty; Secretary Technical Instruction, W. G. Fogarty; Office, County Court House; Surveyors, James Perry, M.E., Galway, and John Smith, M.E., Ballinasloe.

**Kerry.**—Chairman, D. M. Moriarty, solicitor, Killarney; Secretary, P. M. Quinlan; Office, Court House, Tralee; Surveyor, S. Goodwin; Office, Court House.

**Kildare.**—Chairman, Stephen J. Brown, B.A., J.P.; Secretary, John T. Heffernan; Accountant, Thomas Langan; Surveyor, Edward Glover, C.I.C.E.

**Kilkenny.**—Chairman, Joseph Walsh, J.P.; Secretary, George J. Morris; Office, Court House, Kilkenny; High Sheriff, Sir William Blunden, Castle Blunden, Kilkenny; Surveyor, Alex. M. Burden, C.E., Belle Vue, Kilkenny.

**King's Co.**—Chairman, Henry Egan, J.P., Tullamore; Secretary, Charles P. Kingston; Office, Court House, Tullamore; Surveyor, James Delany, Tullamore.

**Leitrim.**—Chairman, Patrick Gaffney, J.P.; Secretary, Charles Dolan; Office, Council Chambers, Carrick-on-Shannon; Surveyor, E. O'Neill Clarke; Solicitor, Charles W. Alleyne, Carrick-on-Shannon.

**Limerick.**—Chairman, Robert Coll, J.P.; Secretary, Robert Roche, 82, George Street, Limerick; Surveyor, John Horan, M.E., M.I.C.E.

**Londonderry.**—Chairman, Col. J. Jackson Clark, D.L.; Secretary, Thompson B. Adams; Office, County Court House, Londonderry; Surveyor, Charles L. Boddie.

**Longford.**—Chairman, John Phillips, Corboy, Longford; Secretary, T. N. Edgeworth, D.L., Kilshrewly, Edgeworthstown; Solicitor, John Wilson, Main Street, Longford; County Surveyor, J. W. Gunnis, F.R.I.B.A., Winston, Longford.

**Louth.**—Chairman, Peter Hughes, J.P.; Secretary, Townley F. Filgate; Office, Court House, Dundalk; Surveyor, Patrick J. Lynam, Dundalk.

**Mayo.**—Chairman, Conor O'Kelly, M.P., J.P.; Secretary, J. Clarke, Castlebar; Surveyors, W. P. Orchard, B.E.M. Inst.C.E.; E. K. Dixon, M.Inst. C.E.

**Meath.**—Chairman, John Sweetman; Secretary, Hugh J. Cullen, J.P.; Office, Navan; County Surveyor, J. H. Moore, 63, Eccles Street, Dublin.

**Monaghan.**—Chairman, T. Toal, Esq., J.P.; Secretary, D. C. Rushe, B.A.; Office, Court House, Monaghan; Surveyor, W. F. Barry, A.M.I.C.E.

**Queen's Co.**—Chairman, P. A. Meehan, J.P., Maryboro'; Secretary, J. Carey; Office, Court House, Maryboro'; Surveyor, H. V. White.

**Roscommon.**—Chairman, John Fitzgibbon Castlesea; Secretary, Michael J. Heverin, B.A. Solicitor, Castle View, Roscommon; Office County Council Chambers, Court House, Ros

common; **Surveyor**, Chris. Mulvany, M.Inst. C.E., Garrow House, Athlone; **Office**, The Court House, Roscommon.

**Sligo**.—**Chairman**, John O'Dowd, J.P., M.P.; **Secretary**, William T. Vernon; **Office**, County Court House, Sligo; **Surveyor**, Charles Booth Jones.

**Tipperary** (South Riding).—**Chairman**, P. F. Mullally, J.P.; **Secretary**, Michael O'Donnell, J.P.; **Office**, Court House, Clonmel; **County Surveyor**, Edward A. Hackett, M.I.C.E.

**Tyrone**.—**Chairman**, His Grace the Duke of Abercorn, K.G.; **Secretary**, Claude C. Hamilton; **Office**, Court House, Omagh, co. Tyrone; **County Surveyors**, F. J. Lynam, C.E., and J. W. Leebody, B.E.

**Waterford**.—**Chairman**, Edmond Nugent, J.P., Ballymacarbery, Clonmel; **Secretary**, R. G. Paul; **Office**, Dungarvan, co. Waterford; **County Inspector R.I.C.**, J. R. B. Jennings; **Surveyor**, W. E. L'Estrange Duffin, C.E.

**Westmeath**.—**Chairman**, Robert J. Downes; **Secretary**, R. W. C. Levinge, J.P.; **Sheriff**, George Arthur Boyd-Rochfort; **County Surveyor**, Arthur E. Joyce, C.E.

**Wexford**.—**Chairman**, Sir T. H. G. Esmonde, Bart., M.P.; **Secretary**, Captain W. H. Pigott; **Office**, Court House, Wexford; **Chief Constable**, Gilbert J. Talbot; **Surveyor**, Henry Webster, M.Inst.C.E.

**Wicklow**.—**Chairman**, Edward P. O'Kelly, J.P.; **Secretary**, Edward N. Wynne, C.E., J.P.; **Office**, Court House, Wicklow; **Surveyor**, Stephen G. Gallagher.

### *The Land Act, 1903.*

The Irish Land Act 1903 was given almost textually in the 1904 edition. At the Nationalist Convention held in Dublin, April 21st, 1904, Mr. J. Redmond attacked the Government because they had "declined to propose legislation to amend the grave defects which were retarding and marring the work of the Land Act, and had introduced a Bill dealing solely with the interests of the landlords, and so drawn as to prevent the possibility even of discussion of amendments of the tenants. Resolutions were carried asserting

"That serious amendments, including the abolition of the zones system, are required in the Irish Land Act 1903, to prevent the unjust inflation of the price of land in Ireland, and that the powers possessed under that Act by the Estates Commissioners and the Congested Districts Board for the acquisition of untenanted lands are not sufficient to provide a remedy for the evils of congestion by the redistribution of the land among the population of the poor districts of the country, without which the Irish land question can never be settled; and that a power of compulsory purchase of untenanted lands, such as the Congested Districts Board unanimously asked for in 1895, should be conferred upon that body and upon the Estates Commissioners acting under the Land Act of 1903, and that provisions should be made that sales, in cases of congested estates under that Act, should be made only to the Board or the Estates Commissioners,"

and declaring

"That the delay in putting in force the sections of the Land Act 1903, dealing with the restoration of the evicted tenants, is another proof of the irreconcilability of the great body of the Irish landlords; that there can be no hope of a settlement of the land question until these tenants are restored to their homes, from which they were unjustly evicted; that the Irish party insist upon the Estates Commissioners opening negotiations at once with the owners of all estates upon which there are evicted farms; that the powers possessed by the Estates Commissioners and the Congested Districts Board for the acquisition of grazing lands are insufficient; and that nothing short of compulsory purchase will ever lead to a settlement of the land question in the congested areas of the country."

See SESSION, sects. 11, 46, and 50.

### *Home Rule.*

The demand for Home Rule was renewed at the meeting of the Nationalist Convention in Dublin, April 21st, 1904. At Glasgow, July 10th, Mr. Redmond said: "The one great fact to the Irish leaders' mind which stood out in the present political situation was that Home Rule was still the be-all and end-all of the Irish policy and programme. . . . The land question might come to a settlement apart from Home Rule, and the finances of Ireland might be put on a better footing, but these could only be valuable because they were stepping-stones to Home Rule."

### *Irish University Education.*

A Royal Commission on Irish University Education was appointed June 1901, "To inquire into the present position of higher general and technical education in Ireland, outside Trinity College, Dublin, and to report as to what reforms, if necessary, are desirable in order, to render that education adequate to the needs of the Irish people." **Chairman**, Lord Robertson, one of the Lords of Appeal in Ordinary. **Other members**: Prof. Butcher, the Roman Catholic Bishop of Clonfert, Prof. Ewing, Sir R. Jebb, M.P., Mr. Justice Madden, Lord Ridley, Prof. Rhys, Prof. R. F. H. Dickey, D.D., Prof. J. Lorrain-Smith, Mr. Starkie, and Mr. Wilfrid Ward. **Secretary**, James Dermot Dale, M.A. Two volumes of evidence taken by the Commission were issued, and the final report was published in March 1903. The Commissioners pointed out that there were only two Universities in Ireland, Dublin University and the Royal University of Ireland. The Catholic University of Ireland exists only as an association of certain colleges which prepare students for the Royal University examinations. As to the religious difficulty, "the Roman Catholics of Ireland, forming 74 per cent. of the whole population, a large number of whom are interested in this question, are, as a body, unprovided with any adequately-endowed University education of which they are willing to avail themselves." The Roman Catholic population stand aloof from the existing State-endowed colleges, and, so far as appears, the

difficulty will continue unless met by a scheme which will be accepted by the Roman Catholic Hierarchy. The Royal University, the Commissioners recommended, should be reconstructed as a teaching University with four Constituent Colleges, the three existing Queen's Colleges at Belfast, Cork and Galway, and a new Roman Catholic College situated in Dublin. The Commissioners held that all the chairs in the new College should be open to persons of all denominations, and that the existing Catholic University School of Medicine should form the medical faculty of the College. The endowment and equipment of the College should be on a scale required by a University College of the first rank. The report further recommended the reform of the constitution and government of the Queen's Colleges, with an increase in their powers of self-government, and in the endowment of Queen's College, Belfast. Provision for the education of women was also recommended. There were notes appended by individual Commissioners objecting to the exclusion from the University scheme of both Magee Presbyterian College and the arts students of Maynooth.

A meeting in the Mansion House, Dublin, held on Jan. 29th, 1904, carried resolutions reaffirming the demand "so often and so fruitlessly made on behalf of Catholics of Ireland for justice in the matter of university education," and declaring the immediate settlement of the question to be a matter of extreme urgency. The Government, however, announced in July that they would not introduce any measure during the 1904 Session.

### **The Irish Reform Association.**

The Land Conference Committee, which was formed in 1902, and had so much to do with the inception of the Land Act, 1903, was in August 1904 dissolved and reconstituted as the Irish Reform Association, with Lord Dunraven, Sir Algernon Coote, Col. Hutcheson Poë, Mr. L. Talbot Crosbie and Col. Everard as a Provisional Organising Committee. The programme of the Association contained the following:—

"Believing as we do that the prosperity of the people of Ireland, the development of the resources of the country, and the satisfactory settlement of the land and other questions, depend upon the pursuance of a policy of conciliation and good will and of reform, we desire to do everything in our power to promote a union of all moderate and progressive opinion, irrespective of creed or class animosities, from whatever source arising, to co-operate in recreating and promoting industrial enterprise, and to advocate all practical measures of reform. While firmly maintaining that the Parliamentary union between Great Britain and Ireland is essential to the political stability of the Empire and to the prosperity of the two islands, we believe that such union is compatible with the devolution to Ireland of a larger measure of local government than she now possesses. . . . We believe that a remedy for the present unsatisfactory system can be found in a decentralisation or localisation of Irish finance. . . . We think the time has come to extend to Ireland the system of Private Bill legislation which has been so successfully worked in Scotland, with such modifications as Scottish experience may suggest, and as may be necessary to meet the requirements of

this country. We are of opinion that a settlement of the question of higher education is urgently needed, and that the whole system of education in this country requires remodelling and co-ordinating. We desire to do all in our power to forward the policy of land purchase in the spirit of, and on the general lines laid down in, the Land Conference Report. We consider that suitable provision for the housing of the labouring classes is of the utmost importance."

### **An Irish Financial Council.**

The Organising Committee reported further (Sept. 23rd, 1904) indicating the lines on which devolution might proceed. As to finance, the report suggested that the control over purely Irish expenditure should be taken from the Treasury, which was only interested in effecting economies for the Imperial account, and intrusted under Parliament to an Irish Financial Council interested in making savings for Irish purposes. Power to raise revenue would remain as now with Parliament, and the collection of the revenue would also remain an Imperial concern. The Council should be under the presidency of the Lord Lieutenant, and consist of 12 elected and 12 nominated members, including the Chief Secretary for Ireland as *ex-officio* member and Vice-President. The county and borough council constituencies and the Parliamentary constituencies could be formed into groups to elect members, and the nominated members should represent commercial interests and important minorities. The decisions of the Council should be final, unless reversed by the House of Commons by not less than a one-fourth majority of votes. The Council should prepare and submit the Irish Estimates to Parliament annually, and be competent to examine, supervise, and control every item of expenditure, and to call for information relevant to financial questions of all kinds; to propose such reductions as it considered consistent with the efficacy of the public services, and to apply such reductions and all other savings on the annual estimates to the improvement of the administration and the development of the country's resources.

It was essential that the chief spending department in Ireland—the Board of Works—which was now subordinate to the Treasury, should come directly under the undivided control of the Irish Government; and the Scotch system of Private Bill Procedure should be extended to Ireland.

### **"A Statutory Body."**

The Report proceeded: "We believe that power to deal with much of the business relating to Irish affairs, which Parliament is at present unable to cope with, might with perfect safety and with advantage both to Ireland and Parliament be delegated to an Irish body to be constituted for the purpose." This body might be composed of Irish representative peers and members of the House of Commons representing Irish constituencies and of past and present members of the Financial Council, which would thus become an extra-Parliamentary panel for the purpose. "Parliament should confer on the statutory body authority to promote Bills for purely Irish purposes, including some of those now dealt with by the provisional orders of

the Local Government Board and the Board of Works; and Parliament should take power to refer to the statutory body not only business connected with Private Bill Legislation, but also such other matters as in its wisdom it may deem suitable for reference under prescribed conditions."

Finally, a Royal Commission was suggested to deal with the subject and make the necessary inquiries.

### Discussion of Proposals.

The Irish Unionist Alliance (Sept. 26th, 1904) declared that these proposals were "attended with the gravest danger to the Unionist cause, and that legislation to confer further powers of local government on Ireland in excess of those granted to other portions of the United Kingdom must inevitably tend to the establishment of an Irish Parliament."

Mr. Wyndham, M.P., said (Sept. 27th, 1904), with reference to the proposal of a statutory Legislative Assembly for Ireland: "Upon that I have to say, without reserve or qualification, that the Unionist Government is opposed to the multiplication of legislative bodies within the United Kingdom, whether in pursuance of the policy generally known as 'Home Rule for Ireland,' or in pursuance of the policy generally known as 'Home Rule all round.'" He criticised the proposals for dealing with Private Bill Legislation and with Irish Finance, and added: "I do not for a moment question the sincerity of the Irish Reform Association's intention to avoid any course which might impair the Parliamentary Union of Great Britain and Ireland. I am convinced of their devotion to the Imperial ideal. I welcome their desire to stimulate energy and foster collaboration among their countrymen for the promotion of education, commerce, and industry. These aspirations are unimpeachable. But the chances of their realisation are prejudiced, and not enhanced, when they are confused with any plan, however tentative, for the multiplication of Legislative Assemblies within the limits of the United Kingdom. To any such plan, however contracted in scope and vague in feature, the Unionist party is opposed."

The Ulster Liberal Unionist Association (Sept. 30th, 1904) unreservedly condemned the proposals, and declared that it would fight them as determinedly as it did those of Mr. Gladstone.

Lord Dunraven, writing to the *Times*, Oct. 8th, 1904, described the proposals of the report thus: "(1) The creation of a financial council, partly elected and partly nominated, to make presentments and supervise the expenditure of voted money and of money derived from savings effected in administration; (2) the formation of a statutory body, composed, in accordance with the Scotch model, of members of the Legislature and an extra-Parliamentary panel, and empowered to deal with private Bill legislation, and such other business as Parliament may refer to it." These proposals, he said, did not trench in the slightest degree upon the supremacy of Parliament. He pointed out that "the administration of Irish affairs is in the hands of 41 departments. . . . In the expenditure of money devoted to Irish services, and passing through the hands of those 41 departments, the people of Ireland have no voice. They cannot say on what projects they desire the money should be expended; they cannot indicate cases

on which they think money has been unwisely expended; they have no incentive to making economies possible in the necessary running expenses of government. The people are powerless, and the Lord Lieutenant-General and General-Governor is practically powerless also. To put it shortly, the Lord Lieutenant can only influence the action of those departments which are concerned with crime; he cannot direct, stimulate, or control the action of those departments which deal with the moral and material welfare of the people over whom he is appointed to rule. . . . The thesis that Ireland suffers from a specific grievance is, I submit, proved. The existing state of things constitutes a hardship, and in justification of the Union a remedy should be found." Parliament, he argued, was overwhelmed with business, and unable to give adequate attention to Irish affairs; so that "the case for delegation, both for the relief of Ireland and of Parliament, is made out." He went on to contend that "devolution of legislative and administrative power is compatible with the supremacy of Parliament," and concluded thus: "The justification of the legislative Union is that it subjects Ireland 'to no hardship or inequalities of treatment.' I have shown as explicitly as the limits of a letter admit that hardship and inequality of treatment do exist. The justification of the Union by the adjustment of inequality and by the removal of hardship is the political objective of the Irish Reform Association."

Sir West Ridgeway, a former Under-Secretary of State for Ireland, warmly supported the aims and objects of the Association, stating that his views were conceived during the period of his service as Under-Secretary.

The Attorney-General for Ireland, the Right Hon. J. Atkinson, K.C.M.G., in a correspondence published in the *Times* (Nov. 3rd, 1904), denounced it as "a gross betrayal of the Unionist position and an injury to the Unionist cause."

It is proposed to hold an Irish International Exhibition at Dublin in 1906, all the work being, as far as possible, executed by Irish workmen from Irish material, and the most prominent position being reserved for the display of Irish manufactures.

**Irish Language Society for the Preservation of the.** This Society, founded in 1877, has gradually succeeded in establishing the teaching of Irish in popular schools and colleges in Ireland. There is a Chair of Irish established in the Royal University of Ireland, Professorships of Irish in Cork College and Galway College, likewise in the Catholic Training College (for teachers), Drumcondra, etc.; and Irish is on the programmes of the Royal University, of the National Board, and of the Commissioners of Intermediate Education. Irish-speaking Inspectors are sent to the schools; and Irish can be used as a medium for instruction in Irish-speaking districts. This bilingual system has greatly increased the efficiency of the teaching in these schools. Of the Society's books 317,872 have been sold in Ireland. President, The Right Hon. the O'Connor Don, P.C., D.L.; Treasurer, G. N. Count Plunkett, V.P., M.R.I.A., F.S.A.; Secretary, J. J. Mac-Sweeney, R.I.A. Offices, 62, Molesworth Street, Dublin.

## IRON AND STEEL TRADE OF THE WORLD.

The progress of this industry during the last twenty-five years has been so immense that it may now rightly be deemed to be one of the leading ones of the world, as will be manifest from the statistics given below.

See also *Report of the Tariff Commission on the Iron and Steel Trades*, pp. 207-8.

### I. PRODUCTION AND CONSUMPTION OF IRON ORE.

The 4th edition of Mulhall's "Dictionary of Statistics" (1898) gives the total tons produced in the world from 1800 to 1889 as follows:—

	Tons.
1801-20 . . . . .	35,000,000
1821-40 . . . . .	82,000,000
1841-50 . . . . .	96,000,000
1851-60 . . . . .	150,000,000
1861-70 . . . . .	205,000,000
1871-80 . . . . .	338,000,000
1881-88 . . . . .	367,000,000
For 88 years . . . . .	1,273,000,000

During these periods the weight of iron ore raised in leading countries was approximately as follows:—

Period.	Million Tons Ore.						Totals.
	Great Britain.	United States.	Germany.	France.	Spain.	Various.	
1801-20 . . . . .	17	3	4	6	—	5	35
1821-40 . . . . .	44	9	6	12	1	10	82
1841-50 . . . . .	49	10	7	14	1	15	96
1851-60 . . . . .	90	15	11	12	2	20	150
1861-70 . . . . .	101	27	31	17	4	25	205
1871-80 . . . . .	160	58	54	26	10	30	338
1881-88 . . . . .	116	90	72	22	37	30	367
For 88 years.	577	212	185	109	55	135	1273

### Statistics 1890—1903.

The total output of iron ore in the world probably amounted in 1902 to about 95,000,000 tons, the principal producers being the United States, Germany, the United Kingdom, and Spain, in the order given, these countries accounting for about 80 per cent. of the total output of the world. The details for the years named as to these countries, and as to France, are given in the following table. In the case of the United Kingdom, the United States, and British Colonies, the tons are equivalent to 2240 lbs., but in the case of all other countries they are metric tons, equivalent to 2204 lbs.

#### United Kingdom.

Year	Output in tons.	Tons per head	Consumption in tons	Tons per head
1890	13,781,000	0'37	18,205,000	0'49
1895	12,615,000	0'32	17,059,000	0'43
1900	14,028,000	0'34	20,318,000	0'49
1901	12,275,000	0'30	17,812,000	0'43
1902	13,426,000	0'32	19,847,000	0'47
1903	13,716,000	0'32	20,016,000	0'47

#### United States.

Year	Output in tons.	Tons per head	Consumption in tons	Tons per head
1890	16,036,000	0'26	17,283,000	0'28
1895	15,958,000	0'23	16,480,000	0'24
1900	27,553,000	0'36	28,400,000	0'37
1901	28,887,000	0'37	29,789,000	0'38
1902	35,554,000	0'45	36,631,000	0'46
1903*	31,606,000	0'39	32,505,000	0'40

#### Germany (including Luxemburg).

1890	11,406,000	0'23	10,721,000	0'22
1895	12,350,000	0'24	11,887,000	0'23
1900	18,964,000	0'34	19,824,000	0'35
1901	16,570,000	0'29	18,550,000	0'33
1902	17,964,000	0'31	19,053,000	0'33
1903*	21,231,000	0'36	23,112,000	0'39

#### Spain.

1890	6,055,000	0'34	346,000	0'02
1895	5,514,000	0'30	339,000	0'02
1900	8,676,000	0'48	853,000	0'05

#### France.

1890	3,472,000	0'09	4,797,000	0'12
1895	3,680,000	0'09	5,094,000	0'13
1900	5,448,000	0'14	7,195,000	0'18
1901	4,791,000	0'12	6,195,000	0'16
1902	5,004,000	0'13	6,144,000	0'16
1903	—	—	—	—

\* Provisional figures.

### Minor Producing Countries.

Where consumption exceeds production the balance is made up of imports from one or other of the minor producing countries.

The other countries which produce iron ore are mainly—

Country.	Year.	Tons.	Per head.
Russia . . . . .	1900	6,200,000	0'05
Austria-Hungary . . . . .	1902	3,307,000	0'07
Sweden . . . . .	1902	2,896,000	0'56
Belgium . . . . .	1902	166,000	0'02
Canada . . . . .	1902	360,717	—
Newfoundland . . . . .	1902	728,721	—
Italy . . . . .	1902	263,818	—
Greece . . . . .	1902	546,409	—
Algeria . . . . .	—	525,012	—

## II. PRODUCTION AND CONSUMPTION OF PIG IRON.

The greater portion of the pig iron produced is now used in the production of steel, and the amount of steel produced has in recent years increased proportionately much faster than the production of iron, particularly in the United States. According to Mulhall's Statistics, 4th edition (1898), the production of pig iron for the ninety years 1800-1889, in the principal nations producing it, was approximately as follows:—

Period.	United Kingdom.	United States.	Germany.	Other Countries.	Total.
	Tons.	Tons.	Tons.	Tons.	Tons.
1800-20 . . . .	5,700,000	1,400,000	1,300,000	4,800,000	13,200,000
1821-40 . . . .	16,400,000	3,800,000	2,500,000	10,100,000	32,800,000
1841-50 . . . .	18,200,000	4,200,000	2,600,000	8,500,000	33,500,000
1851-60 . . . .	32,500,000	6,600,000	4,400,000	13,600,000	57,100,000
1861-70 . . . .	47,400,000	11,400,000	10,300,000	24,500,000	93,600,000
1871-80 . . . .	65,600,000	24,200,000	20,600,000	31,700,000	142,100,000
1881-89 . . . .	71,200,000	47,900,000	33,300,000	38,700,000	191,100,000
For 90 years . .	257,000,000	99,500,000	75,000,000	131,900,000	563,400,000

The production among minor countries from 1830 to 1889 was approximately as follows:—

	1830.	1850.	1860.	1870.	1880.	1889.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
Belgium . . . .	35,000	73,000	220,000	520,000	490,000	850,000
Austria . . . .	80,000	140,000	310,000	400,000	470,000	760,000
Russia . . . .	120,000	220,000	290,000	350,000	450,000	600,000
Sweden . . . .	105,000	130,000	180,000	290,000	400,000	460,000
Spain . . . .	20,000	40,000	50,000	70,000	160,000	230,000
Various . . . .	25,000	37,000	50,000	80,000	120,000	160,000
Total . . . .	385,000	640,000	1,100,000	1,710,000	2,090,000	3,060,000

#### Statistics 1890—1903.

The total quantity of pig iron produced in the world in 1901 amounted to about 40,000,000 tons, and in 1902 to about 44,000,000, the chief producers being the United States, the United Kingdom, and Germany, in the order stated. These countries between them are accountable for about three-quarters of the whole output.

The figures below give for the countries and years named the total and per head output and consumption of pig iron.

#### United Kingdom.

Year.	Total Production.	Per head.	Total Consumption.	Per head.
	Tons.		Tons.	
1890 . . . .	7,904,000	0·21	6,825,000	0·18

\* Figures for '90-1900 extracted from the United States Geological Survey Reports.

The production of Germany was in 1903 for the first time above that of the United Kingdom.

**Production in Minor Countries.**

Very little pig iron is made in other countries than those named above. In Canada, however, it is increasing, and rose from 68,800 tons in '98 to 319,600 tons in 1902. Government bounties on the production of pig iron have been in operation in Canada since 1897, and are to continue in force, though subject to a gradual reduction, until 1907, but, although the bounty is on a higher scale in the case of pig iron made from native ores, the pig iron produced in Canada from Canadian ore is much less than that produced from imported ores, and the greater part of the Canadian ore is exported.

**III. PRODUCTION AND CONSUMPTION OF STEEL.**

The aggregate quantity of steel produced from 1850 to 1890, according to Mulhall's Statistics, 4th edition (1899), may be set down approximately as under:—

Period.	Great Britain.	United States.	Germany.	France.	Various.	Total.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
1850-69 .	2,600,000	700,000	1,300,000	800,000	700,000	6,100,000
1870-79 .	8,300,000	3,800,000	3,100,000	2,200,000	2,100,000	19,500,000
1880-89 .	25,100,000	27,700,000	12,200,000	3,800,000	6,100,000	68,900,000
For 40 years .	36,000,000	32,200,000	16,600,000	6,800,000	8,900,000	94,500,000

**Statistics, 1890-1903.**

The total steel production of the world in 1902 may be put at about 33,000,000 tons.

The following tables show, for the years named, the total production, and the production per head, of steel in the United Kingdom, Russia, Sweden, Germany (including Luxemburg), Belgium, France, Spain, and the United States:—

Year.	United Kingdom.	Per head	Russian Empire.	Per head.	Sweden.	Per head.	Germany (including Luxemburg).	Per head
	Tons of 2240 lb.		Metric Tons.		Metric Tons.		Metric Tons.

1903*	—	—	1,855,000	0'05	200,000	0'011	—	—

\* Provisional figures.

A comparison of the total quantity of steel produced, with the total quantity of pig iron consumed, for all purposes, shows that for every 100 tons of pig iron consumed for all purposes the United Kingdom produced on an average of the 3 years 1900-1902 about 64 tons of steel, while Germany produced 79 tons, the United States 81 tons, France about 60 tons, and Belgium about 64 tons.

The quantity of steel produced by the open-hearth process in the United Kingdom is at

present about double that produced by the Bessemer process. In Germany and the United States, on the other hand, the proportions are reversed, about two-thirds of the total production of these countries consisting of Bessemer steel. The quantity of pig iron consumed in the manufacture of one ton of Bessemer steel being greater than that consumed in the manufacture of one ton of steel by the open-hearth process, it follows that the proportion of iron converted into steel in the United States and

Germany is even greater, as compared with the United Kingdom, than would appear from the figures given above.

The United States Steel Corporation is the largest combination of industries in the world. It consists of nine large trade industries, and was incorporated on Feb. 23rd, 1901. Its authorised capital was \$508,486,300 preferred, and \$506,473,400 common stock. It controls from 65 to 75 per cent. of the steel industry of the United States. The profits were materially reduced during 1903, and 1904. *Engineering* for Oct. 9th, 1903, said, "The value of the common stock of the United States Steel Corporation is so little appreciated by investors that 100 dollars of it is regarded as worth no more than 18 dollars, this being the price quoted."

#### IV. IMPORTS AND EXPORTS OF IRON AND STEEL AND MANUFACTURES THEREOF.

##### British Imports and Exports.

The chief imports into the United Kingdom are pig iron (principally from Sweden and Spain); bars, angles, rods, and sections; unwrought steel (principally from Germany); and girders, beams, joists, etc. The figures are:—

	Tons.		
	1899.	1901.	1903.
Pig Iron . . . . .	171,373*	195,409	130,280
Bars, Angles, Rods, and Sections . . . . .	73,156	98,101	186,630
Unwrought Steel . . . . .	77,290	182,884	274,056
Girders, Beams, Joists, etc. . . . .	95,476	122,685	145,329

\* Includes a small amount of puddled iron.

The Chief Exports from the United Kingdom are:—

	Tons.		
	1899	1901.	1903.

\* Iron and Steel Sheets and Plates.

##### German Imports and Exports.

The Chief Imports of Germany are:—

	Metric Tons.		
	1899.	1901.	1903.
Pig Iron . . . . .	612,652	267,503	158,347
Wrought Iron Bars, Tyres, and Plough-shares . . . . .	37,179	22,518	26,129
Tinplate . . . . .	23,834	9,949	17,080
Cast Iron Wares . . . . .	25,631	20,690	9,514
Malleable Iron Pipes . . . . .	22,299	12,201	9,365

The Chief Exports are:—

	Metric Tons.		
	1899	1901	1903
Pig Iron . . . . .	182,091	150,447	418,072
Angle Iron . . . . .	221,165	342,447	419,555
Rails . . . . .	109,813	180,977	378,611
Wrought Iron Bars, Tyres, and Plough-shares . . . . .	193,933	329,513	348,929
Blooms, Puddled Bars, Ingots . . . . .	23,438	201,716	638,182
Rough Plates and Sheets of Wrought Iron . . . . .	150,239	255,627	278,933
Iron Wire . . . . .	92,251	154,285	165,510

##### French Imports and Exports.

The Imports of France are of no great importance. The chief exports are:—

	Metric Tons.		
	1899	1901	1903
Pig Iron . . . . .	153,792	96,463	193,715
Iron Bars . . . . .	29,695	25,703	25,187
Iron and Steel Rails . . . . .	18,753	37,682	48,868
Steel Ingots and Billets . . . . .	15,524	18,989	144,140
Structural Iron and Steel . . . . .	10,929	27,550	26,147

##### American Imports and Exports.

The Imports of the United States have not been large in recent years, but in 1902 and 1903 pig iron and steel imports increased considerably.

	Tons.		
	1899	1901	1903
Pig Iron . . . . .	40,393	62,930	599,574
Steel Ingots, Blooms, Billets, Bars, etc. . . . .	12,601	8,164	261,559
Tin Plates . . . . .	58,915	77,395	47,360

The chief exports are:—

	1899	1901	1903
Pig Iron . . . . .	228,678	81,211	20,381
Steel Bars or Rods . . . . .	47,421	35,562	40,251
Billets, Ingots, and Blooms . . . . .	25,487	28,614	5,445
Iron and Steel Rails . . . . .	277,714	318,956	30,837

Structural Iron and Steel . . . . .	54,244	54,005	30,641
Wire . . . . .	116,317	88,238	108,519

**Irving, Sir Henry**, Hon.D.Litt., LL.D. Dublin, Cambridge, Glasgow, was originally named **John Henry Brodribb**, but assumed his present name by royal patent. He was b. at Keinton, Glastonbury, 1838, and was ed. at Dr. Pinches' school in George Yard, Lombard Street, London. His first appearance on the stage was at the Sunderland theatre in '56, and he afterwards played at Edinburgh, London,

Glasgow, Manchester, Liverpool, and elsewhere. His first great success was made in the spring of '70 as Digby Grant in the comedy "Two Roses." In '71 he first appeared at the Lyceum in "The Bells," and then after a series of successes in "Charles I.," "Eugene Aram," and "Richelieu," came that famous representation of "Hamlet" in '74, which created such a sensation, and finally gave him his pre-eminent position on the stage. "Macbeth," "Othello," Tennyson's "Queen Mary," "Richard III.," and "The Lyons Mail," followed in '75, '76 and '77; and then, in December '78, he took over the sole management of the Lyceum, which ended in '99. In "Othello" afterwards he alternated the characters of Othello and Iago with the late Mr. Edwin Booth, and produced, and in conjunction with Miss Ellen Terry played in, "The Merchant of Venice," "Much Ado about Nothing," "The Cup," "Twelfth Night," "Faust," "The Dead Heart" ('89), "Ravenswood" ('90), "The Corsican Brothers" ('91), "Henry VIII." ('92), Tennyson's "Becket" ('93), "King Arthur" ('95), "Cymbeline" ('96), "Madame Sans-Gêne" ('97), and "Peter the Great" ('98). The interest in the last play was greatly increased by the fact that the author was Mr. Lawrence Irving, the great actor's son. In '83 he first visited America, and the visit has been many times repeated since. He produced a play by M. Sardou on "Dante" at Drury Lane in the spring of 1903. In '95 Sir Henry was knighted.

### ITALY.

Italy is governed by Victor Emmanuel III., the third constitutional king. The first was Victor Emmanuel II., King of Sardinia, of the house of Savoy-Carignano, who was declared King of Italy on March 17th, 1861, by the first Italian Parliament, which assembled in Feb. '61, though it was not until '70 that the province of Rome was occupied by the Italian army and annexed to the kingdom. The Executive is vested in the King, and exercised through his Ministers. The legislative authority is exercised by the King in conjunction with a Senate of about 360 members in 1904 (composed of the Princes of the royal house who are of age, and of an unlimited number of members selected by the Ministry and nominated by the King for life, who have rendered eminent services to the country, are upwards of forty years of age, and pay taxes to an annual amount of £120); and a Chamber of 508 Deputies, elected by conditional universal suffrage for a period of five years, though the King can dissolve the Chamber at any time. Electors must be over 21, and qualified by a certain standard of education, by payment of at least 19'80 lire in direct taxation, or if farmers of at least 500 lire of rent, or, if in business, of an annual rent varying from 150 to 400 lire, according to the communes in which they live; professors, soldiers who have served under arms for 2 years, and others are qualified to vote. All money bills must be initiated in the Chamber. Senators and deputies are unpaid, but travel free.

### The Army.

The Italian army consists of the **Active Army**, the **Mobile Militia**, and the **Territorial Militia**. There are 12 army corps, each having 2 infantry divisions, except that in the Rome district,

where there are 3. The organisation of the permanent army comprises 96 regiments of line infantry (288 battalions), 12 regiments of bersaglieri (36 battalions) and 7 Alpine regiments (22 battalions). The strength varies considerably, the company having upon a peace strength a maximum of 100 and a minimum of 60, with a mean of 80, known as the *forza bilanciata*. Large numbers of men are upon what is known as unlimited leave. There are 24 regiments of cavalry (144 squadrons), each squadron having a mean strength of 145 men and 124 horses. There are 24 regiments of field artillery, with 186 6-gun batteries, but in peace time the battery has only 4 guns. The army also comprises 1 regiment of horse artillery (6 batteries), 1 of mountain artillery (12 batteries), 1 brigade of mountain artillery, with 3 batteries in Venetia, 3 regiments of coast artillery and a brigade in Sardinia, 2 regiments of fortress artillery and 5 of engineers, comprising 60 companies of the various branches.

The total strength of the forces is given as follows, but it must be remarked that the men of the territorial militia are almost untrained:—

	Officers and Men.
With the colours . . . .	248,111
On unlimited leave . . . .	486,290
Mobile Militia . . . .	320,170
Territorial Militia . . . .	2,275,631
Total on a war footing . .	3,390,202

There are about 1250 guns with the Regular Forces and 378 with the Mobile Militia.

### The Navy.

The administrative machinery of the Italian Fleet is very similar to that of France. There is a **Minister of Marine**, responsible to Parliament, of which he is a member, and generally an admiral as well. There is also an **Under Secretary of State**, relieving the Minister of many of his executive duties. Attached to the Under Secretary of State's office are four bureaux, dealing respectively with the **Personnel**, **Shipbuilding**, **Artillery**, and the **Mercantile Marine**. There are also two consultative bodies to assist the Minister, one of which, presided over by the Under-Secretary of State, deals with general questions, and the other is practically a committee on designs. There are three **Naval Districts**, each administered by a flag-officer, the form of administration being a copy on a smaller scale of that at headquarters. The Superintendent of Dockyards has functions corresponding to those of the Under-Secretary of State, while the chief of the staff is to the Admiral commanding the district what the Director-General of Personnel is to the Under-Secretary of State. The financial year extends from July 1st to the following June 30th. Seamen for the Italian Fleet are recruited by conscription; all men following a seafaring life of twenty years of age must serve at sea for eighteen months or more. Actually the whole draft is not required, and the part which is taken for service remains afloat for four years. There are also training-schools for boys.

The Italian Naval Estimates for the year 1904-5 totalled £5,087,643 (127,191,083 lire), as against £5,087,269 (127,181,734 lire). The sum to be expended on new construction is £1,032,272 (25,806,802 lire).

The personnel of the Italian Navy, allowed for in the Budget of 1904 5, is 25,000. Of these 18,299 serve afloat, and 6,771 ashore.

The strength of ships built, building and projected for the Italian Navy on Nov. 30th was:—

#### Built.

Battleships, 1st class . . . . .	14
do. 3rd class . . . . .	3
Armoured cruisers . . . . .	5
Protected cruisers, 2nd class . . . . .	5
do. do. 3rd class . . . . .	13
Unprotected do. . . . .	1
Torpedo vessels . . . . .	14
Torpedo-boat destroyers . . . . .	11
Torpedo boats . . . . .	138
Submarines . . . . .	1

#### Building.

Battleships, 1st class . . . . .	4
Armoured cruisers . . . . .	1
Torpedo-boat destroyers . . . . .	2
Torpedo boats . . . . .	8
Submarines . . . . .	3

#### Projected.

Battleships, 1st class . . . . .	1*
Torpedo boats . . . . .	14
Submarines . . . . .	4

\* The projected battleship is to be of the *Vittorio Emanuele* class.

The Government dockyards of Italy are situated as follows:—

**Spezia.** One dock takes any ship; one takes all Italian ships; four smaller.

**Venice.** One dock takes cruisers; one smaller. One building to take any ship.

**Taranto.** One dock takes any ship.

Vice-Admiral Mirabello became **Minister of Marine**, and Vice-Admiral Frigerio **President of the Superior Council of the Navy**, in September.

The only large vessels launched for the Italian Navy during 1904 were the battleships *Regina Elena*, at Spezia on June 19th, and the *Vittorio Emanuele*, at Castellamare on Oct. 14th. No vessels have been completed during the year.

The torpedo flotillas have been reorganised under the title of "Superior Command of Torpedo Boats." An explosion occurred on board the *Marco Polo* at Chemulpo, whereby three men lost their lives.

Combined naval and military manœuvres were carried out in September, an expeditionary force being embarked at Naples, and landed on the beach some miles to the north in face of military opposition.

**President of the Superior Council**, Vice-Admiral Frigerio.

**Vice-President of the Superior Council**, Vice-Admiral Brochetti.

#### Local Government, Education, etc.

For the purposes of local government the country is divided into 69 provinces administered by provincial councils, and subdivided into 8275 communes. Each commune is presided over by a syndic (who in the larger communes is elected, in the smaller appointed by the King),

and has a municipal council of from 30 to 50 members according to the population. The Roman Catholic is the nominal State religion, and the religion of the vast majority of the people; but the Government has passed many acts so framed as to make the civil government supreme, and to secure complete freedom for all creeds. The officials of the Church are appointed by the Pope, but the royal assent is necessary in the case either of a bishop or an archbishop. (See separate article on RELIGIOUS BODIES.) Elementary education is compulsory between the ages of six and nine in all parts of the country, but the law is not rigorously enforced. There are about 52,000 public primary schools, with scholars numbering in all about 2,550,000. Secondary and higher instruction is also provided by the State, and there are 21 universities. The chief newspapers are the *Tribuna* of Rome, the Government organ, the *Secolo* of Milan (Liberal), the *Corriere della Sera*, which circulates throughout the north of Italy, and the *Osservatore Romano*, the Vatican organ.

#### Industries, Railways, etc.

**Agriculture** is the occupation of nearly one-third of the population, wheat, maize and other grains being largely produced. Poultry and dairy farming for export are making great progress. Wine, silk and oil are among the other products, and sulphur, zinc, lead and iron are mined. There has been a very marked and rapid industrial development in recent years, particularly in the last ten or twelve. The chief industries are the textile—silk, cotton, flax, hemp and jute—mechanical and metal industries. Electricity is very largely used for motive power and for lighting and traction. The chief exports are silk, wine, oil, eggs, sulphur, hemp and flax, skins, ores and cattle. There were in 1903 nearly 10,000 miles of railways, most of which belong to the State, though they were leased in 1885 for 60 years to companies which work them under contracts terminable if so desired in 1905, or 1925, when a decision will have to be made whether the existing contracts shall be renewed in a modified form or the State shall undertake the direct management of the lines itself. In the latter case the Treasury will have to make provision for the loans contracted with the companies, and for the material and rolling stock which may require to be taken over.

A Commission in 1903 recommended the establishment of a network of navigable water-courses, 212 miles in length, in the northern part of the kingdom, the region having already 1677 miles of navigable rivers and canals, which are to be connected by a system of auxiliary canals. The cost is estimated at about £4,500,000 sterling, but the actual cost will be reduced by a third by the sale of water-power and of water for agricultural purposes. The main line of the proposed system is a canal from Venice by Milan to Turin, another connecting Milan and Bologna, and a third Bologna and Venice. A navigable waterway is also recommended from Venice to the Austrian frontier, for which purpose three existing rivers can be utilised.

#### Statistics and Diplomatic.

Area, 110,646 sq. m.; pop., 1902, 32,966,307. Rome has a pop. of 463,000, Naples of 503,731, and Milan of 491,450. Revenue, 1902-3, £75,203,210; estimated 1903-4, £79,014,836; expenditure,

1902-3, £72,414,690; estimated 1903-4, £69,861,769. Public debt, 1903, £510,501,000; imports, 1902, £73,440,121; exports, £60,415,495.

**Papal Secretary of State**, Monsignor Merry Del Val.

### **Sovereign.**

**Victor Emmanuel III.**, King of Italy, succeeded his father, King Humbert I., who on July 29th, 1900, was assassinated at Monza by the Anarchist Bresci. Victor Emmanuel was b. Nov. 18th, '69, and in Oct. '96 was married to Princess Hélène of Montenegro. As Crown Prince of Naples, he visited Queen Victoria with his Princess in '97, and took part in the Diamond Jubilee celebrations. He earned the respect and confidence of the people over whom he rules before he ascended the throne, and his kindness of nature and rectitude of purpose are universally acknowledged. The heir to the throne is Umberto Nicola Tommaso Mario, Prince of Piedmont, born Sept. 16th, 1904. A daughter (Yolanda Margherita) was born in June 1901, and another daughter on Nov. 19th, 1902. Prince Emanuele of Savoy, Duke d'Aosta, cousin of the King, b. Jan. 13th, '69, was made a Royal Knight of the Garter by King Edward VII. in July 1902. While in England in 1903, on a visit to King Edward, the King received the degree of D.C.L. from Oxford University.

### **Political Parties.**

Italian political parties formerly consisted of a **Right** and a **Left**, the former being the party of Cavour, the monarchical and Conservative party, and the latter consisting of the followers of Mazzini, the Liberal and democratic if not Republican party. These two parties, however, have since split up into many different combinations. Signor Crispi, after a long tenure of power, resigned in '91, but the disastrous state of the country's finances led to his recall in '94 by the unanimous wish of the nation, and he remained in office until the disasters which overtook the Italian forces in Erythrea in the early part of '96 brought about his downfall. He was succeeded by the Marquis di Rudini, who found himself to a large extent dependent upon the support of the extreme Radicals, led by Signor Cavallotti, and after the general election in March '97 gave Signor Zanardelli and two other Radicals places in the Ministry (Dec. '97). General Pelloux succeeded him with a Liberal

Ministry, including adherents of Giolitti Zanardelli and Crispi, June 29th, '98, but was compelled to resign in May '99, and formed a new administration, consisting, for the most part, of Conservatives, a curious change, Baron Sonnino, though not in the Ministry, lent it his support. The general election of June 1900 necessitated by the dissolution of Parliament because of obstruction, resulted in large gains by the Extreme Left who secured 101 seats, allocated thus—Radicals 44, Republicans 27, and Socialists 30. The Government also gained many seats, and secured 300 supporters in the new Chamber, and the Constitutional Opposition about 110. Nevertheless General Pelloux resigned, and a Cabinet of a Moderate Liberal type, under Signor Saracco, succeeded to office. On this falling, in Feb. 1901, an administration was formed by Signor Zanardelli, which included both Signor Giolitti and Signor Prinetti in its ranks. Signor Prinetti resigned in April 1903, and in October Signor Zanardelli retired on the ground of his health. M. Giolitti then forming a new Ministry, with Signor Luzzatti as Finance Minister and Signor Tittoni as Foreign Minister. The Extreme Left had formed an important section of M. Zanardelli's supporters, but their attitude gradually changed to strong opposition both to him and to M. Giolitti. At the dissolution on Oct. 18th, 1904, they were 106 strong, including 48 Radicals, 24 Republicans, and 33 Socialists. At that time M. Giolitti had about 273 supporters, while the Opposition, including the Socialists, numbered about 235. See **History** below.

### **History, 1904.**

An arbitration convention with Great Britain, on the usual lines, was signed at Rome (Feb. 1st). The German Emperor visited Naples in March, and entertained the King and his suite to lunch on the *Hohenzollern*, afterwards visiting him on the Italian cruiser *Agordat* (26th). The Chamber sent a message to the King expressing its joy at the union symbolised by the meeting of the two Sovereigns, and the vitality of the Triple Alliance was held to have been demonstrated afresh. The President of the French Republic, accompanied by M. Delcassé, arrived in Rome (April 24th) to return the visit of the King and Queen to France in Oct. 1903. They were met by the King and driven to the Quirinal, receiving an enthusiastic popular welcome *en route*. At the State dinner (25th) both the King and M. Loubet in their speeches emphasised the cordial relations existing between the two countries. A military review (26th) and a banquet at the French Embassy (27th) concluded the visit to Rome. The President, accompanied by the King, went to Naples (28th), where he took his leave after a naval review had been held. The Pope made a formal protest against the action of the President, as Head of a Catholic State, in thus recognising the Power that had deprived him of his dominions, and the friction thus created led to important consequences. See **FRANCE**. A new Commercial Treaty with Switzerland was signed at Rome (July 13th), and approved by the Chamber on Dec. 16th. Similar treaties were arranged with Germany and Austria-Hungary during the year.

Serious strike riots, mainly provoked by the Socialist party, broke out in Italy in September, and a general strike throughout the country

was attempted. The troops had to be called out at Genoa, and at Venice, Turin and Milan there were grave disturbances. A reign of terror was exercised by the Socialists in Milan, and for three days the Labour Exchange prevented the appearance of all papers except its own organ. The very incompleteness of this temporary control, however, led to its breakdown, and by the 21st work was pretty generally resumed. The Premier used these disorders as an argument for a dissolution, and put before the country as the main issue the defence of the Constitution, which he declared was threatened by the attitude of the Socialists and other members of the Extreme Left. The General Election took place (Nov. 6th) and the second ballots (13th), the result being the loss of 15 seats to the Extreme Left, who only secured the return of 91 members, including 30 Socialists. The rout of the latter in important cities like Milan and Florence showed the alarm to which the September disturbances had given rise. More than four-fifths of the members elected had pledged themselves to support the Constitution against Socialist attacks. The Chamber met (Dec. 1st), and Signor Marcora, the Ministerial candidate, was elected President, receiving 292 votes. Signor Luzzatti, in the course of his financial statement (9th), referred to the projected State acquisition of railways. The liquidation with the companies, he calculated, would cost the State the sum of £20,000,000, and a further sum of £20,000,000 would have to be expended in the course of the next 10 years in the improvement of lines and railway material. The £20,000,000 for the railway companies he proposed to find by making use of the deposits and other funds of the savings banks of Lombardy and other similar institutions. The proposed abolition of *otroli*, he said, would be gradual, beginning first with only the poorest communes, where the duty is most irksome, and annually, for five or six years, including more communes in the list of free centres.

### Colonies.

**Erythrea.** The Italian possessions on the Red Sea were combined under this name by various decrees from '90 to 1901. The colony has the control of its own administration and the management of its own finance, a civil Governor appointed by the King representing the Italian Government. The colony extends from Cape Kasar about 670 miles along the coast of the Red Sea to a point on the Strait of Pab-el-Mandeb. The heavy reverses inflicted upon the Italian forces during '96 by Menelik's

army led to a decision to limit the Italian possessions to the Mareb and the Belesa, to abandon the province of Tigre, which had been incorporated as a part of the colony, and to give up the idea of a protectorate over Abyssinia. A treaty of peace was concluded in Nov. '96, by which the treaty of Ucciali, making Abyssinia a virtual protectorate, was abrogated, and the absolute independence of King Menelik was recognised. Italy, Abyssinia, and Great Britain agreed to a modification of the frontiers between the colony, Abyssinia, and the Soudan (May 15th, 1902), and the annexation of Raheita to the colony was announced (19th). The area of the colony is about 88,500 sq. m., and the population, which is nomadic, numbers about 450,000. Asmara is the seat of government. Massowah has about 8000 inhabitants. Gold mines exist near Asmara, and pearl fishing is carried on at Massowah by the Italian Pearl Fishery Company. A railway is being built from Massowah to Asmara.

**Somaliland.** The country occupying the eastern horn or promontory of Africa. The bulk of it is under the protection of Italy, according to the Anglo-Italian agreement of '91, though there is a British Protectorate on the coast of the Gulf of Aden, and France has a footing at Obok. Italian Somaliland is separated by the river Juba from the East Africa Protectorate (British), and has a coast-line extending from the Juba to Cape Guardafui, and then along the coast of the Gulf of Aden to the Somali Coast Protectorate (see separate article), also British. The area of Italian Somaliland is 100,000 sq. m., and the population about 450,000. It is divided into three parts for administrative purposes. A Convention with the Italian Trading Company of Benadir, whereby the Company undertook the administration of the towns of the territory and of the hinterland, forming the Benadir Coast Colony, with a coast-line from the Juba to Meregh, was approved (Nov. 28th, '99). The company was to administer the Benadir ports till July 16th, 1906, with an annual subsidy of £16,000 for the first 12 years and of £14,000 for the remainder of the term. An inquiry held in 1903, however, revealed the fact that the company's administration was negligent and incompetent, and in May 1904 Signor Tittoni, the Foreign Minister, said the duty now devolved upon the Government to administer the country itself. The second part consists of the Sultanate of Obbia under Sultan Yusuf Ali, on the eastern coast, and the third part of the Sultanate of the Mijertain, covering the Horn of Africa, the capital of which is Bandar Alula.

## J

**Jameson, Leander Starr, C.B.,** Premier of Cape Colony, Feb. 1904, was b. in Edinburgh in 1853, adopted the medical profession, became M.R.C.S. Eng. '75 and M.D. London '77. In '91 he was appointed Administrator of Rhodesia, and held that post till the famous Raid in Dec. '95, after the failure of which he was tried in London and sentenced to 10 months' imprisonment. He was elected to the Legislative Assembly of Cape Colony in 1900 to represent

Kimberley, and appointed a Director of De Beers in the same year, and of the British S. Africa Co. in 1902.

### JAPAN.

Japan is an empire—separated from China by the Eastern Sea and the Straits of Korea—consisting of the archipelago of Nippon, which includes four large islands, Yesso, Honshiu, Kinshiu, and Shikoku, together

with Formosa and the Pescadores, ceded by China in '95, and nearly 4000 smaller islands. Its area, excluding Formosa and the Pescadores, is about 147,655 sq. m., and the population (1903) 46,305,000. The population of the capital, Tokio, is 1,440,121, of Osaka, 821,235, and of Kioto, 353,139. Yokohama (pop. 193,762) and Kobe (pop. 215,780) are the two chief ports, and the chief centres of foreign trade.

The island of Formosa lies off the Chinese coast. Its area is about 13,500 sq. m., and the pop. (1903) 3,082,404, mostly Chinese. It is very mountainous, and the almost inaccessible inland parts are held by a primitive race of the Malay type. The chief towns are Tamsui at the north and Tainanfu and Anping at the south end. The chief products are coal, tea, sugar, rice, and camphor, the Government having a monopoly of the camphor industry, which is carried on by a British firm under contract with the Government. Considerable energy has been shown by the Japanese in developing internal communications. There are 154 miles of railways, and good roads have been also made in all directions. A Governor-General with large powers administers the island, which is divided into twenty districts, each under a chief magistrate.

The Pescadores have an area of 85 sq. miles and a pop. of 54,151.

### The Legislature.

The history of Japan is almost as ancient as that of China, the present Mikado, Mutsu Hito, being the representative of a dynasty which claims to have possessed the throne since B.C. 660. The country was, prior to '89, an absolute monarchy, but in that year a new Constitution was promulgated. In the Emperor are vested the executive power with the advice of his Ministers, whom he appoints, and who are responsible to him; and the legislative power with the consent of the Diet. The Diet is composed of a House of Peers and a House of Representatives. The House of Peers numbers about 330, and consists of (a) Peers elected for life, including: (1) male members of the Imperial family above 20 years of age; (2) princes and marquises above 25 years of age; (3) persons nominated by the Emperor for State services or for their learning; and (b) Peers elected for 7 years, including: (1) counts, viscounts, and barons above 25, to the number of one-fifth of each order, elected by the respective orders; (2) persons elected indirectly by the residents in the various districts who pay the highest taxes. In the House of Representatives there are 369 members, elected for 4 years by male citizens over 25 paying land tax or other direct taxes of not less than 10 yen per annum who have resided in their districts for one year at least. Elected and nominated members of both Houses are paid 2000 yen (about £200) for each session, with travelling expenses.

### The Army.

The Japanese army, in efficiency of administration and command, and in the training and quality of officers and men, has taken a high place among the armies of the world. In the war with Russia it has given proof of qualities that are not surpassed, and that are equalled in few other armies. The national spirit and education, based upon its feudal traditions, are directed to the formation of military forces necessary for the defence of the empire, which

it was foreseen would be threatened as it rose. The Emperor is supreme head of the army, and military affairs are directed through the War Minister and the Chief of the General Staff by the Superior War Council. In order to insure unity of action between the various branches and the navy, there is a Council consisting of the War Minister, the Naval Minister, the chiefs of the General Staff and the Naval Staff and the Director-General of Military Training.

The military expenditure has increased enormously, rising from 5,850,000 yen in 1877-8 to 58,000,000 yen in '98-99, after which there was a slight decline until war threatened with Russia.

The military forces are the **Permanent Army**, with reserves and recruiting reserves, the **Territorial Army** and its reserve or **National Militia**, and the Militia of certain of the islands. The Permanent Army is available for foreign service, the Territorial Army for home defence, and the Militia for auxiliary operations in more distant parts of the country; but in the war Japan has put forth a vast reserve of military strength, and the mobilisation of the Reserves has enabled her to despatch more than 300,000 men to Manchuria, and more are being mobilised. Under Marshal Oyama are the three armies of Generals Oku, Nodzu, and Kuroki, facing General Kuropatkin at Mukden, and that of General Nogi, which undertook the operations against Port Arthur.

Service is personal and obligatory from the age of 17 to 40. The periods are divided thus: 3 years in the Active Army, 4 years and 4 months in its reserve, and 10 years in the Territorial Army, making in all 17 years and 4 months, after which the man passes into the reserve of the Territorial Army to complete his period of liability. Until recently the obligation for foreign service was 12 years and 4 months; but in Sept. 1904 it was extended to 17 years and 4 months, as is mentioned above. It is estimated that this change will increase the fighting force of the army by about 200,000 men. The recruiting reserve is drawn from the excess of the contingent, and the men, after passing their 7 years and 4 months in the Reserves, pass to the Territorial Army.

The following are details of the effective strength of the army on a war footing, not comprising the troops in the island of Formosa: **Administrations and establishments**, 1000 officers, 2900 men; **Permanent Army**, infantry, 156 battalions; cavalry, 59 squadrons; field artillery, 19 regiments of 6 batteries, with 684 guns; fortress artillery, 20 battalions; engineers, 13 sapper battalions and 1 railway battalion; transport, 13 battalions: total, 203 battalions, 59 squadrons, 684 guns; or 7500 officers, 193,790 men, 61,390 horses. Depot troops: 52 battalions, 17 squadrons, 26 companies, 19 batteries; or 1000 officers, 34,600 men, 9000 horses, 114 guns. **Territorial Army**: 130 battalions, 26 squadrons, 312 guns, 3200 officers, 118,530 men, 11,860 horses. **Militia**: 35 officers, 1180 men, 210 horses. **Grand total**, 386 battalions, 26 companies, 99 squadrons, 1116 guns, 11,735 officers, 348,100 men and 84,460 horses. The total fully-trained force, according to the *St. Petersburg Gazette*, is 509,960. Another estimate gives the Active Army as 160,000 men, its reserve 120,000, the Territorial Army 98,000, and its militia reserve 114,000, being a total of 492,000 trained men. In peace the forces are grouped in three great

commands—the armies of the East, Centre, and West, whose commanders held positions analogous to the inspectors of the German Army. In these armies are grouped 12 divisions, with their headquarters at Tokio, Sendai, Nagoya, Osaka, Hiroshima, Kumamoto, Sapporo, Hirosaki, Kanazawa, Himeji, Marugame, and Kokura. The Guard division at Tokio is not included in this organisation. All these forces have now taken the field, and reserves have been called out in their place. The Military College and Academy train accomplished officers of great intelligence. They were pronounced by General Grant to be amongst the foremost of the kind in the world. The barracks and gymnasia are of the best type, and every care is paid to the physical development of the men. Medical, hospital, transport and supply arrangements are admirably efficient.

### The Navy.

The Naval Administration of Japan is under the control of a Minister of Marine (Vice-Admiral Baron Yamamoto, with a Vice-Minister (Rear-Admiral Saito). There are also ten heads of Departments: the Bureau of General Affairs, the Bureau of Military Affairs, the Bureau of Personnel, a Medical Bureau, an Accountant Bureau (which also includes supplies), a Bureau of Justice, a Bureau of Naval Education, a Central Department for the Materiel of the Navy, the Hydrographical Office, the Department of Works, the Legal Department (concerned with courts-martial), the Board of Admirals and the Board of Technical Affairs. The two last-named are Committees of Advice. In addition there is the Naval General Staff, of which the President is Admiral Viscount Ito, the Vice-President Sir G. Ijuin; and this staff is divided into three sections, including the Intelligence Department.

The number of officers and men available for active service is about 31,000. There is also a small reserve of some 4,000.

The executive officers are distributed as follows: 1 admiral, 7 vice-admirals, 14 rear-admirals, 61 captains, 110 commanders, 109 lieutenant-commanders, 270 lieutenants, 120 sub-lieutenants, and 75 midshipmen.

The strength of the Japanese Navy in ships built and building on Nov. 30th, 1904, was:—

#### Built.

Battleships, 1st class . . . . .	5
2nd class . . . . .	1
Coast " defence ships . . . . .	2
Armoured cruisers . . . . .	8
Protected cruisers, 2nd class . . . . .	11
3rd class . . . . .	8
Unprotected cruisers . . . . .	9
Torpedo vessels . . . . .	1
Torpedo-boat destroyers . . . . .	19
Torpedo boats . . . . .	82

#### Building.

Battleships, 1st class . . . . .	2
Protected cruisers, 2nd class . . . . .	1
Torpedo-boat destroyers . . . . .	1
Torpedo boats . . . . .	3

*Note.*—The two battleships building are the *Kashima* and *Katori*, both building in England. No particulars of the other vessels in the new shipbuilding programme which was supposed

to come into operation in 1904 have been made public.

The Government dockyards in Japan are situated as follows:—

**Yokosuka.** One dock takes any ship; two smaller.

**Kure.** One dock takes cruisers.

### Local Government, Education, etc.

For local administration the country (except Yesso, which has a governor and a special administration, and Formosa, for which see above) is divided into 46 districts, each with a governor and an elected assembly. The districts are subdivided into villages and towns, municipalities and counties, each with its chief magistrate, council and assembly. In religious matters absolute freedom is allowed, subject to the preservation of peace and order. The chief forms of religion, however, are Shintoism and Buddhism. Elementary education is compulsory for children of from 6 to 14 years of age. There are about 27,000 elementary schools, and about 5,000,000 pupils, while high schools and technical schools are rapidly increasing in number. For the administration of justice there are 310 sub-district courts of first instance, the district courts, which number 49, 7 courts of appeal, and the Supreme Court or Court of Cassation at Tokio. The chief Tokio journals are the *Jiji Shinpo*, *Nichi Nichi Shimbun*, *Asahi Shimbun* and the *Kokumin*.

### Industries, Commerce, etc.

There are about 1,300,000 tons of workable coal in the empire, one-half of which is found in Yesso, which island also contains large deposits of sulphur. Copper, iron, and silver are also mined. The length of railways is (1904) 4495 miles, of which 1344 miles are owned by the State. There are 21 cities and towns which have their own systems of telephone service. The land is largely held by peasant proprietors, and the chief products are rice and cereals, tea, sugar, and silk, while textile and other manufactures are improving and increasing. A gold standard was adopted in October '97. By treaties concluded with Great Britain and other European Powers in '94, the right of the Japanese to frame their own Customs policy was acknowledged, though provisional arrangements were made for a period of twelve years. Foreign jurisdiction in the treaty ports was abolished in '99, and in return the country was thrown open to European traders, instead of only the treaty ports. Great Britain enjoys "most favoured nation" treatment. Foreigners cannot own real estate, except as members of associations or partnerships constituted conformably to Japanese law.

### Sovereign.

**Mutsu Hito**, b. Nov. 3rd, 1852. Ascended the throne in '68, and married Princess Haruko in '69. His children are Prince Yoshihito (b. Aug. 31st, '79, proclaimed Crown Prince in '89, and married in 1900 to Princess Sadako, b. June 25th, 1884), and four Princesses. A son and heir, Prince Hirohito, was b. to the Crown Prince on April 29th, 1901, and another son, Prince Yasuhito, on June 25th, 1902. The Emperor's reign has been marked by great reforms; and the feudal system, which had impeded the general progress of the country, was abolished in '71. Under the rule of the present Mikado, Japan has entered upon an unprecedented era of prosperity. Civilisation has made rapid progress, and the introduction of Western arts and ideas has secured for Japan a foremost place amongst the Asiatic nations. He has given the Japanese a Parliamentary constitution based on European principles. His direction of the operations in the war with China was marked in Dec. '98 by the Diet by a vote of 20,000,000 yen from the war indemnity paid by China.

### Political Parties.

When the new constitution came into force and the Diet assembled in 1890, the Government was constituted mainly of statesmen drawn from two great clans, the Satsuma and Choshin clans. But the representatives elected to the Diet consisted for the most part of men drawn from two other and

rival clans—the Hizen clan under Count Okuma, and the Tosa clan under Count Itagaki. Count Okuma formed and led the Progressive party, and Count Itagaki the Liberal party, both of which advocated the principle of party government, though they would not combine to secure it. This the Government would not accept, and so they were continually being defeated in the House, which they as often dissolved. Eventually the Government tried a coalition in '95 with the Liberals, the Marquis Ito being Premier; and then for a time, especially during the war with China, the Opposition was quiescent. But after the war, difficulties again manifested themselves. In '98 the Liberals and Progressives at last joined their forces, and the Marquis Ito, who was then in power, at once resigned, and a new Ministry was formed, with Count Okuma as Premier. The experiment, however, failed, and the Marquis Yamagata formed a Cabinet on the old lines of clan statesmen, in Nov. '98, which endured till 1900. In August of that year the Marquis Ito issued a manifesto setting forth the aims of a new party formed by him and termed the Seiyukai, or Constitutional Political Association. He received the support of a majority of the members of the House of Representatives, and was soon afterwards appointed Prime Minister in place of the Marquis Yamagata, who resigned office (Sept. 29th). In June 1901 the Marquis Ito gave way to a Ministry led by Viscount Katsura, and composed mainly of members of the House of Peers unconnected with the two great political parties. The Seiyukai at the general election in August 1902 gained 192 seats, the Progressives 104, the Imperialists 20, and the Independents 59. The Seiyukai, therefore, had a clear majority of 9 over all the other parties put together; but, through the influence of the Marquis Ito, Viscount Katsura was left in power. The general election caused by the dissolution at the end of 1902 resulted in March 1903 in the return of the Seiyukai party 183 strong, with a majority in the House almost as large as they had before. Ultimately in July 1903 the Marquis Ito resigned his leadership of the Seiyukai to the Marquis Saionji, and accepted the office of **President of the Privy Council**, an advisory body which is consulted by the Emperor on all important measures, Count Matsugata and Marquis Yamagata also being appointed Privy Councillors. When the Diet was opened on Dec. 10th, 1903, the Seiyukai could claim 132 votes, the Progressives 85, and the remaining 159 members were divided into smaller groups. The Address in reply to the Speech from the Throne, read by the President of the Diet and approved by the House, expressed the view that the Ministry were pursuing a policy of opportunism at home and forfeiting opportunities abroad. The Government thereupon dissolved Parliament, and a general election was fixed for March 1st, 1904. Meanwhile the war with Russia broke out. The general election resulted in the return of 134 members of the Seiyukai, 93 Progressives, 132 Independents, and 20 Imperialists.

### The Anglo-Japanese Alliance.

An important Agreement with Great Britain was signed (Jan. 30th, 1902), giving expression to the common policy of the two countries in the Far East. The following is the **Text of the Agreement**. The Governments of Great

Britain and Japan, actuated solely by a desire to maintain the *status quo* and general peace in the extreme East, being moreover specially interested in maintaining the independence and territorial integrity of the Empire of China and the Empire of Korea, and in securing equal opportunities in those countries for the commerce and industry of all nations, hereby agree as follows:

Article I.—The High Contracting Parties, having mutually recognised the independence of China and Korea, declare themselves to be entirely uninfluenced by any aggressive tendencies in either country. Having in view, however, their special interests, of which those of Great Britain relate principally to China, while Japan, in addition to the interests which she possesses in China, is interested in a peculiar degree politically, as well as commercially and industrially, in Korea, the High Contracting Parties recognise that it will be admissible for either of them to take such measures as may be indispensable in order to safeguard those interests if threatened either by the aggressive action of any other Power, or by disturbances arising in China or Korea, and necessitating the intervention of either of the High Contracting Parties for the protection of the lives and property of its subjects.

Article II.—If either Great Britain or Japan, in the defence of their respective interests as above described, should become involved in war with another Power, the other High Contracting Party will maintain a strict neutrality, and use its efforts to prevent other Powers from joining in hostilities against its ally.

Article III.—If in the above event any other Power or Powers should join in hostilities against that ally, the other High Contracting Party will come to its assistance, and will conduct the war in common, and make peace in mutual agreement with it.

Article IV.—The High Contracting Parties agree that neither of them will, without consulting the other, enter into separate arrangements with another Power to the prejudice of the interests above described.

Article V.—Whenever, in the opinion of either Great Britain or Japan, the above-mentioned interests are in jeopardy, the two Governments will communicate with one another fully and frankly.

Article VI.—The present Agreement shall come into effect immediately after the date of its signature, and remain in force for five years from that date. In case neither of the High Contracting Parties should have notified twelve months before the expiration of the said five years the intention of terminating it, it shall remain binding until the expiration of one year from the day on which either of the High Contracting Parties shall have denounced it. But if, when the date fixed for its expiration arrives, either ally is actually engaged in war, the alliance shall, *ipso facto*, continue until peace is concluded.

#### History, 1904.

The Emperor opened the Diet in person (March 20th), and stated that the appeal to arms had been forced upon the country by Russia's want of sincerity. There could now be no pause till the object of the war was achieved. The House of Representatives expressed itself as "thoroughly satisfied with the declaration of war," and both Houses passed cordial votes of thanks

to the Navy (22nd). All political parties joined also in supporting the Government's programme of war taxes. The proposals included the extension of the tobacco monopoly, the creation of a salt monopoly, increases in the land tax, income tax, stamp taxes, etc., and new taxes on silk, piece goods, kerosene, and woollens. The Premier said (23rd) the settled national policy was the establishment of permanent peace in the Far East and the consolidation of the position of the Empire by promoting friendly relations with the great Powers and by respecting their legitimate rights. The Lower House passed all the war-tax bills except those levying duties on salt and silk, and slightly reduced the land tax (26th). The effect was to give an increase of £6,200,000 instead of £7,000,000 as the Government proposed, and this the Finance Minister accepted. The War Finance programme as finally settled was as follows: From foreign and domestic loans, Exchequer bonds, etc., £41,100,000; from increased taxes, £6,200,000; from economies and surpluses, £4,800,000; and from special accounts, £5,500,000: making a total of £57,600,000. After unanimously adopting a resolution to the effect that the House would not grudge supplies, trusting the Ministers faithfully to discharge their high duties, the Diet was closed (29th).

The discovery of a rich gold mine in the Kesen district of the Rikuzen province was reported in August.

In opening the Diet (Nov. 30th) the Emperor said: "Our expeditionary forces have been victorious in every engagement, and by displaying an increased brilliancy of valour have secured steady progress in the situation. Placing full confidence in the loyalty and devotion of our subjects, we expect that the ultimate object of the war will be attained; and we trust that you will endeavour, in compliance with our will, to discharge with harmonious co-operation the duty which is incumbent upon you." The Budget presented showed a total war revenue required of £78,000,000, including provision of interest on outstanding loans. The Government anticipated that it would be necessary to borrow only £45,000,000 of this. The ordinary revenue required was about £22,000,000, making a total revenue for 1905 of £100,000,000. The Government's proposals were unanimously voted amid enthusiasm.

A special article on the war, describing the preliminary negotiations, the course of hostilities up to the end of 1904, and the financial outlook, is given under the heading RUSSO-JAPANESE WAR.

Jaures, Jean, is a leading member of the French Chamber of Deputies, and a member of the Socialist party. A relative of the admiral of the same name, he was b. on Sept. 3rd, 1859, at Castres, in the South French department of Tarn. After a distinguished college career, he became Professor of Philosophy, first at Albi, and then at Toulouse. He took the degree of Doctor in '92, and one of his theses for the doctorate dealt with the German scientific socialists Lassalle and Marx. He had been elected deputy in '85, by the *scrutin de liste* against a Conservative, but the return to the *scrutin d'arrondissement*, in '89, deprived him of that honour. He was, however, successful in '92 and '93. Again rejected in '98, he was once more returned to the Chamber in 1902. He is editor of *La Petite*

*République*, and has attempted to reunite the different groups of French Socialists. See **SOCIALISM**. He was much to the fore in the defence of Capt. Dreyfus, and raised the question again in the Chamber in 1903. In Dec. 1904 he fought a duel with M. Déroulède. Amongst his publications are: "Les Preuves," '98; "Action Socialiste," 1900; "Etudes Socialistes," 1902. He is the general director of a great work, by various authors, "L'Histoire Socialiste," to be completed in 15 vols., of which three have appeared.

**Jeune, Right Hon. Sir Francis Henry, G.C.B.**, is the eldest son of a former Bishop of Peterborough, and was b. in 1843. Ed. at Harrow, elected to a scholarship at Balliol Coll., Oxford, where he obtained 1st Class in Classical Mods. '63, and 1st class in *Lit. Hum.* two years later. He also was successful in obtaining the Stanhope prize in '63, and the Arnold prize in '67. Fellow of Hertford Coll. '74, Hon. Fellow '82. He was called to the bar of the Inner Temple '68, and took silk in '88. In connection with the civil action of the Tichborne claimant he acted as junior counsel. In ecclesiastical law he long enjoyed a considerable reputation, and appeared in the Lincoln case in '90. Succeeded Lord Hannen, in Jan. '91, as Judge of the Probate, Divorce, and Admiralty Division. Was knighted on his accession to the judicial bench. On the decease of Sir C. P. Butt, in '92, Sir Francis succeeded him as President of the Probate Division, and was made a Privy Councillor. He was afterwards appointed Judge-Advocate-General, was made K.C.B. in '97 for services in that office, and G.C.B. in 1902. Lady Jeune has long been an energetic philanthropist, and, with Sir Francis, has occupied a noteworthy position in the social life of London. She published "Lesser Questions," a volume of essays, in '94. Address: Arlington Manor, Newbury.

## JEW.

The numbers of Jews in the various countries of Europe, according to the "Jewish Year-Book," are as follows: Russia, 5,082,342; Austria-Hungary, 2,076,277; Germany, 886,948; Roumania, about 200,000; Turkey, 282,277; Holland, 103,988; France, 86,885; Great Britain and Ireland, 188,000; Italy, 44,037; Switzerland, 12,551; Servia, 5100; Greece, 8350; Denmark, 5000; Sweden and Norway, 5000. Total in Europe, about 8,666,530. Outside Europe no satisfactory enumeration is possible, but it is probable that Asia contains 342,440; Africa, 354,500; the Americas, 1,556,128; and Australia, 17,933. There are probably about 11,013,000 Jews in existence at the present date, and of late years the number living in Palestine has noticeably increased. The Jews are returning to the land of their ancestors as tillers of the soil. It is estimated that there are now 78,000 Jews in Palestine. The number of Jews in London is estimated at 112,650, and in other parts of Great Britain and Ireland at 81,450.

In England, full emancipation was granted to the Jews in '58. They possess a special Jewish Board of Guardians (Middlesex Street, Bishops-gate), which provides for indigent Jews, and expended £68,999 in relief during 1903 to 5113 cases; a large orphan asylum at West Norwood, in addition to many other charities, and there are Jewish wards in several hospitals.

There are seven large Jewish elementary schools in London, the principal being the Jews' Free School, Bell Lane, Spitalfields, the largest and one of the most successful elementary schools in the world. Similar schools and charities are connected with the principal provincial congregations. The most important are those of Liverpool, Manchester, Birmingham, Leeds, Glasgow, Newcastle, Hull, and Sheffield. The spiritual wants of Jews are provided for in the East-End by a number of *hebras* or minor congregations, which have been united (Federation of Synagogues); while fifteen of the larger synagogues are organised by the United Synagogue (2, Charlotte Street, Portland Place, W.). Ministers for these are trained at the Jews' College (Queen Square House, Guilford Street, W.C.), which has a very extensive library of works dealing with Jewish subjects. Another library specially noteworthy for Hebrew MSS. is situated at the Beth Hamidrash (St. James' Place, E.C.), where the sittings of the Beth Din, or ecclesiastical tribunal, are held, at which points of Jewish law are decided.

## Ecclesiastical and other Bodies.

Ecclesiastical matters are under the control of the Chief Rabbi, Dr. Hermann Adler (*q.v.*). The mandates of the Chief Rabbi are only binding on the so-called Orthodox Jews, while there are "Reform" congregations at Upper Berkeley Street, London, Manchester and Bradford. There has been a marked *rapprochement* of recent years between these two bodies. There are, besides, some 3000 Spanish and Portuguese Jews (*Sephardim*) in London, who are under the spiritual charge of the Rev. Dr. Gaster and whose ritual slightly differs from that of the more numerous German and Polish Jews (*Ashkenazim*). A new movement, styled the Jewish Religious Union, was started in 1901, which provides services, largely in English, for those to whom the ordinary synagogue service does not appeal. The services were at first held in the West End only, but an East End Branch was established in Oct. 1903. As a religious term "Jew" has nowadays the very vaguest connotation, ranging from the superstition of the Chassidim of Russia and Galicia to the advanced agnosticism of the Society of Ethical Culture in New York.

Jews have some special enactments connected with the form and registration of their marriages, modifications of the Factory Acts to suit their Sabbath, etc. These, and other matters likely to affect them, are looked after by the Jewish Board of Deputies (19, Finsbury Circus; Solicitor and Secretary, Charles H. L. Emanuel, M.A.). In 1903 a Royal Commission recommended restrictions on alien immigration which would largely affect Jews, but no legislation has yet been enacted, the Bill which was brought in by the Government in the session of 1904 having been withdrawn owing to the opposition it encountered in Grand Committee. The chief Jewish weekly is *The Jewish Chronicle* (2, Finsbury Square, E.C.: Publisher, Solomon Davis).

Until comparatively recently Jews were restricted in their rights throughout the world, and those of eastern Europe and parts of Africa and the East still labour under many disabilities, which it is the object of the "Alliance Israélite" of Paris, and of similar societies in Germany, Austria, and England (Anglo-Jewish Association, 85, London Wall, E.C.: Secretary, M. Duparc), to remove.

### *The Anti-Semitic Movement.*

Anti-Semitism is a tendency, based even more on race feeling than on religious opinion, of unfriendly and even hostile disposition towards Jews. Economic considerations add to this tendency, Jews being popularly envied by their less prosperous neighbours on the ground of greater prosperity, the consequence, frequently, of sobriety, abstemiousness, inventiveness, and the absence of family quarrels, much rather than of avarice and usurious oppression. "The Jew is economical in everything except the education of his children." This is given by a Jew as the cause, or a chief cause, of their success. The anti-Semitic movement in Russia and closely adjoining countries is probably a continuance only of that spirit of oppression which once pervaded all Christendom. See RUSSIA as to the Kishineff massacre in 1903. Roumania has only lately been required by England and America to observe the Treaty of Paris of '78, and to refrain from its persecution which involved expatriation. Other countries have shown powerful hostile waves, such as France during the Dreyfus affair. In Austria the Emperor was, by repeated municipal elections, obliged to confirm as Burgomaster of Vienna Dr. Lueger, the avowed head of the Austrian anti-Semites. In Prussia, Bismarck and the Emperor William I. might have nipped the movement in the bud by some stern discouragement. They did not do so, and it has grown from a mere obscure feeling into an organised political party: members of the German Parliament declare themselves openly as the group of anti-Semites. They have their own papers, their candidates at elections, and their societies, but the influence of the movement is waning.

### *The Zionist Movement.*

This movement has on the side of the Jews produced a counter-move, the **Zionist Movement**, founded by the late Dr. Theodore Hertzl, and warmly promulgated by Max Nordau in Paris and Mr. I. Zangwill in London. According to Mr. Zangwill, Zionism aims at (1) the organisation of the Jews, (2) the opening of the door to Palestine, (3) the successful establishment of a home for the Jews there, (4) the working up of the State into a model State after the home has been established, and (5) the realisation of the Jewish mission by imparting to the world the social solutions and ideals of righteousness developed by the spiritual genius of the race. **Zionist Congresses** were held at Basle in '97, '98, '99, in London 1900, and again at Basle in 1903, with ever-increasing attendances. At the last mentioned the British Government's offer of land in British East Africa, on the Uganda Railway between Nairobi and Mau, for the founding of a specially Jewish colony, with self-government, under British control, was announced. The unexpected proposal was thankfully received by most of the leaders, but the majority of the Russian contingent of the representatives at the Congress voted against it, as deviating from the aim of obtaining Palestine. A commission of three members left in December 1904 for the region to investigate and report. It was reported that in England there were 15,000 Zionists enrolled in 75 associations, while the total number of members enrolled in the movement is 320,000.

Sir Francis Montefiore, Mr. L. J. Greenberg, and others are at the head of the movement in this country.

The **Jewish Colonisation Association** (Paris, 2, Rue Pasquier) is the trust created by the late Baron Hirsch for the purpose of helping persecuted Jews in all parts of the world, and its chief work has been the formation of colonies in Argentina. The Zionists contend that the money should be used to help their movement.

**Joachim, Joseph**, the distinguished violinist, was b. near Presburg, in Hungary, in 1831. Already famous as a youthful prodigy, he went to Leipzig in '43, to the Conservatoire previously founded by Mendelssohn, who saw his genius and encouraged him. He first came to London in '44, and has since annually visited us. He has been principal violinist of the **Monday and Saturday Popular Concerts** from their very commencement. In '69 he became the head of the newly developed Academy of Music at Berlin. He has written several works for his instrument and the orchestra, the chief being the Hungarian Concerto. The University of Cambridge conferred on him the degree of **Mus. Doc.** in '77, and he was afterwards given the Hon. D.C.L. of Oxford. In celebration of the fiftieth anniversary of his first appearance in public, Herr Joachim was, on March 17th, '89, presented with a magnificent violin purchased by subscribers to a fund of which the Duke of Edinburgh was President. On the sixtieth anniversary of his first appearance in England, his portrait, by Mr. Sargent, R.A., was presented to him by Mr. Balfour, at a reception held at Queen's Hall (May 16th, 1904).

**Johnston, Sir Harry H.**, G.C.M.G., K.C.B., D.Sc., was b. in London June 12th, 1858, and ed. at Stockwell Grammar School and King's College, London. After studying painting for some time at the Royal Academy he travelled a good deal, especially in Africa, and was made British Vice-Consul in the Cameroons in '85. Thence he was transferred to the Niger coast and to Portuguese East Africa. He took the leading part in the expedition to Lakes Nyasa and Tanganyika which resulted in the founding of the British Central Africa Protectorate, of which he was appointed Commissioner and Consul-General in '91. He was Consul-General of Tunis '97-9, and Special Commissioner of the Uganda Protectorate '99-1901, upon which he published a comprehensive work in 1902. He retired on a pension in 1902, and stood unsuccessfully for Rochester in 1903.

**Joint Stock Companies.** See 1902 ed. for an article upon the provisions made by the **Companies Acts '62-1900** as to the formation of such companies, with a summary of the 1900 Act in particular. A return is compiled annually by the Registrar of Joint Stock Companies, containing a list, with particulars of capital, etc., of all joint stock companies registered in the United Kingdom during each year, as well as a list of companies dissolved or struck off the register during the same year. In 1903, 4075 companies with a nominal capital of £126,606,015 were registered, as compared with 3929 companies, with a nominal capital of £156,983,861 in 1902, with 3365 companies, with a nominal capital of £144,760,333 in 1901, and 4864 companies, with a nominal capital of £221,827,934, in 1900. On April 30th, 1904, there were in the register in

the United Kingdom 37,287 joint stock companies (35,965 in 1903), with a paid-up capital of £1,899,648,675 (£1,849,455 in 1903). During the year ended Dec. 31st, 1903, the total number of companies dissolved by order of the Court or after voluntary liquidation and struck off the register under the Acts of 1880 and 1900 was 2421. A report of the Board of Trade under the Companies (Winding-up) Act of 1890, issued in Dec. 1903, showed that during the year 1902 winding-up proceedings were commenced in the case of 1639 companies, the total capital involved being £64,279,454; and that during the ten years ended 1902, 38,928 companies were registered, and 14,538 went into liquidation, nearly the whole being voluntary liquidations. On these liquidations the estimated loss on vendors' shares was £179,619,685; the loss on shares subscribed for cash, £163,434,137; and the loss to creditors, £39,499,877. The report contained much comment on the evasion of the 1900 Act by "private companies"—i.e., companies which do not issue prospectuses—these companies numbering 3147, with a nominal capital of £118,282,529 in 1902. "The present tendency of company formation is clearly in the direction either of 'one-man' companies or of companies which obtain their capital without any restriction on allotment or on commencing business, and without the disclosure of facts required by sect. 10 of the 1900 Act. . . . There can be little doubt that the proportion of private to that of public companies has greatly increased since the passing of that Act as the result of the omission to apply its provisions to all companies, whether issuing a prospectus to the public or not."

**Jones, Henry Arthur**, the dramatist, was b. Sept. 20th, 1851, at Grandborough, Bucks. His early dramatic attempts included "Only Round the Corner," "A Clerical Error," "His Wife," and "A Bed of Roses." In Nov. '82 Mr. Wilson Barrett produced "The Silver King" at the Princess's Theatre, and this greatly increased Mr. Jones's reputation. "Breaking a Butterfly" and "Chatterton" ('84), "Saints and Sinners," "Hoodman Blind," "The Lord Harry," "The Noble Vagabond," "Hard Hit," and "Heart of Hearts," which followed, testify to the energy with which he prosecuted his dramatic labours. "Wealth," at the Haymarket in April '89, was followed by "The Middleman" (Aug. '89). A play of daring originality, called "Judah" ('90), and "The Dancing Girl" ('91), added greatly to the estimation in which he was held. In Nov. '92 "The Crusaders" was produced at the Avenue Theatre; "The Tempter," Mr. Jones's first essay in blank verse, at the Haymarket in '93, "The Masqueraders" at the St. James's, and "The Case of Rebellious Susan" at the Criterion in '94, "The Triumph of the Philistines" at the St. James's in '95, "Michael and his Lost Angel" at the Lyceum, and "The Rogue's Comedy" at the Garrick in '96, "The Physician" and "The Liars" at the

Criterion in '97, "The Manœuvres of Jane" at the Haymarket in Oct. '98, "Carnac Sahib" at Her Majesty's in April '99, "Mrs. Dane's Defence" at Wyndham's Theatre in Oct. 1900, "The Princess's Nose" at the Duke of York's, "Chance, the Idol" at Wyndham's in 1902, "Whitewashing Julia" at the Garrick in 1903, "Joseph Entangled" at the Haymarket and "The Chevalier" at the Garrick in 1904. A book on "The Renaissance of the Drama" was published by him during '95, and nearly all his plays are published in book form. Address: 38, Portland Place, W.

**Journalists, The Institute of**, was established on March 9th, 1889, by conversion of the National Association of Journalists, a professional society founded in '84, and incorporated by royal charter in March '90. The Charter, by which journalism is formally constituted one of the professions, directs and declares that the members of the Institute "shall for ever hereafter be, by virtue of these presents, one body politic and corporate." The objects of the Institute include the devising of examination or other practical tests for candidates for membership; "the promotion of whatever may tend to the elevation of the status and the improvement of the qualifications of all members of the journalistic profession"; ascertainment, and where necessary amendment, of the law and practice affecting the discharge by journalists of their professional duties, and the promotion by all reasonable means of the interests of journalists and journalism. The Hall of the Institute is in London, but the council meetings and the annual conference are both movable, and are held from time to time in the chief towns throughout the country. At the date of conversion into the Institute there were about 1200 members, since increased to over 3000, organised in 55 districts and sub-districts, and including nearly all the well-known journalists of London and the provinces (including Scotland and Ireland), and an increasing number in the Colonies, India, etc. The Charter, moreover, confers upon the Institute power to affiliate branches in India and the colonies and in foreign countries—a power which has been exercised in the case of the New Zealand Institute of Journalists. The Annual Conference in 1904 was held at Glasgow. Mr. D. Sandeman, F.J.I., of Glasgow was elected President for 1904-5. Hon. Treasurer, Mr. Arthur W. à-Beckett, F.J.I. Legal Advisers, Mr. J. Andrew Strahan, M.A., LL.B., Hon. Counsel; and Sir Albert K. Rolitt, M.P., Hon. Solicitor; Messrs. Adams & Adams, Solicitors. Auditors, Mr. Arthur J. Cook, A.I.A., and Mr. F. Hinde, F.J.I. Hon. Secretaries, Mr. G. H. Kynaston, F.J.I., and Mr. Joseph Watson, F.J.I. Secretary of the Institute, Herbert Cornish, F.J.I. Hall of the Institute, Tudor Street, London, E.C.

## K

**Katsura, General Viscount**, Prime Minister of Japan, was b. in 1849 in the province of Nagato, generally called Choshu, in the western part of the main island of Japan. This province has given birth to many illustrious statesmen and generals, amongst whom the names of Marquis Ito, Field-Marshal Marquis Yamagata, and Count Inoué may be mentioned. During the Restoration era, in '67, General Katsura distinguished himself as an able subaltern, and thus began his brilliant military career. Some years after the Restoration he was sent to Germany to study army details, and spent several years in that country. In '76, when a colonel, he was again sent to Germany in company with the late General Kawakami, to inspect the German military system. (These two officers were at that time regarded as the most promising men in the Japanese army.) On his return home he was gazetted major-general, and was appointed Vice-Minister of the War Office, under General Oyama. During his tenure of this office he took a prominent part in the reform of the Japanese army. In '91 he was promoted to be lieutenant-general, and in the following year was appointed to the command of the third division of the army. During the Chino-Japanese war he marched with his division through Korea to Manchuria; and later on, under General Nodzu, he won many victories. For his distinguished services he was created a viscount, and two years after promoted to the rank of general. In '98 he was appointed War Minister, and held that post till the downfall of the Yamagata Cabinet in October 1900. The present Ministry, under his premiership, was formed in May 1901, in succession to the Ito Cabinet. See JAPAN.

**Kerr, Admiral of the Fleet Lord W. T., G.C.B.**, Senior Naval Lord of the Admiralty 1899-1904, is the 4th son of the 7th Marquis of Lothian, and was b. Sept. 28th, '39. Ed. at Radley, he entered the Navy in '53, and has seen much and varied service—in the Baltic '54-5, with the Naval Brigade at Lucknow, in important sea commands, and at the Admiralty. His sea service includes the position of second-in-command of the Mediterranean station '90-92, and the full command of the Channel Squadron '95-7. He was private secretary to the First Lord '85-90, Junior Lord '92, and Second Lord '94-5. Promoted to G.C.B. June 1902. Address, 58, Cromwell Road, S.W.

**Kew Gardens.** First formed as a Botanic Garden by the Princess Augusta of Saxe-Gotha, Dowager Princess of Wales, in 1759; gardens transferred to Commissioners of Woods and Forests 1840. Botanic Garden opened to the public free '41; Arboretum '47. Palm-house built '48; Temperate house '62-99; Jodrell Laboratory for research '76; North (Picture) Gallery '82. Transferred to Department of Agriculture 1903. The Gardens are in close connection with the Colonial Office, and serve as an advanced horticultural school, in which special attention is given to the training of gardeners for colonial and Indian service. **Open free** to the public every weekday from noon (June to September from 10 a.m.), and on Sunday from 1 p.m.

till dusk. **Director**, Sir W. T. Thiselton-Dyer, K.C.M.G., C.I.E., F.R.S.; **Curator**, W. Watson. **Office**, 197, New Road, Kew.

**King's College, London.** Established by royal charter Aug. 14th, 1829, opened '31; charter annulled by Act of Parliament May 19th, '82, and College re-incorporated for the purpose of "giving instruction in literature, science, and the doctrines and duties of Christianity as the same are inculcated by the Church of England." By the Amending Act 1993 all religious tests as qualification for office in the College or on the Council were removed, except in the case of Professors and Lecturers in the faculty of Theology. The College is a School of the University of London in all the Faculties, and appoints two members of the Senate. There are eight faculties and departments in the College—viz., theology, arts, natural science, engineering, medicine, women's, civil service, and two schools. The College grants, under authority of its Act of Parliament, the diploma of "Associate of King's College," to which is attached the privilege of free admission to all the classes in the department from which they have been elected, as also the use of the college libraries and museums. The Department for Women is conducted in Kensington Square; certificates of proficiency are granted on passing the examinations, after a regular attendance of three or more terms. The students of the Evening Classes, which are held in each faculty, from October to March and from April to June, receive certificates. The Civil Service Department and the Strand School prepare for the excise, customs, post office, the navy, and other examinations, and for commercial life; women are also prepared. During the Academic year 1902-3, there were 120 students in theology (70 matriculated), 331 in arts and laws (59 matriculated), 780 in science and engineering (121 matriculated), 359 in medicine (106 matriculated), also 418 women. In addition to the above 2008 students, 1210 attended the lectures on Banking, 1556 were in the Civil Service classes, 316 boys attended the school, now removed to Wimbledon Common, and 731 the Strand School: total under education, 5821. The whole College is under the supervision of the Principal, Rev. Dr. Arthur C. Headlam.

**Kipling, Rudyard**, was b. in Bombay 1865, and is the son of Mr. J. Lockwood Kipling, C.I.E. He was ed. in England, and in '82 he went out to India and joined the staff of the *Civil and Military Gazette*, Lahore, for which paper his earlier tales were written. He has depicted Anglo-Indian and military life in "Soldiers Three," "Black and White," "Plain Tales from the Hills," "Story of the Gadsbys," "Life's Handicap," etc. "The Naulakha," published in '91, and written in collaboration with Wolcott Balestier, is not of such high merit as the work that is all his own. "Many Inventions," a collection of stories, appeared during '93, and a good deal of verse in various magazines. In '94 "The Jungle Book" was published, followed in '95 by "The Second Jungle Book." A book of verse, "Barrack-Room Ballads," appeared in '92, and in '96 another volume, "The Seven

Seas." In '97 he published "Captains Courageous," in '98 "The Day's Work," in '99 "Stalky & Co.," in 1901 "Kim," in 1902 "Just So Stories," in 1903 "The Five Nations," and in 1904 "Traffics and Discoveries." In 1903 a dramatised version of "The Light that Failed" was produced at the Lyric.

### KNIGHTHOOD, ORDERS OF.

In modern days knightships are conferred as a mark of the Sovereign's esteem, or as a reward for services of any kind, military or civil. They are bestowed by the Sovereign, or the Lord Lieutenant of Ireland as representing him, or by letters patent. The Royal Orders of Knighthood are: the Garter, the Thistle, St. Patrick, the Bath, St. Michael and St. George, Star of India, the Indian Empire, and the Victorian Order.

In 1904 H.M. the King commanded the creation of a Central Chancery of all the Orders of Knighthood, and the issue of Insignia and registration of warrants is now carried out by the Lord Chamberlain's Department, the Comptroller of which is Major-General Sir Arthur Ellis, G.C.V.O., C.S.I.

Knights not belonging to any of these orders are termed knights bachelors. The knightships conferred and promotions made during 1904 are set out below.

#### The Most Noble Order of the Garter.

Originally established by King Edward III. in 1349, and reconstituted in 1831, it is limited to the Sovereign, the Prince of Wales, and such descendants of George I. as may be elected to be members of it, and to twenty-five Knight Companions; but sovereigns and princes of other realms, and extra Knight Companions, may be admitted by special statutes. Its abbreviation is K.G., and it is the highest order of knighthood. Its insignia and habit are most elaborate and imposing, and include the George,—a gold medallion of St. George and the Dragon, suspended from a blue ribbon; the Garter, which is worn below the knee of the left leg, and is made of dark blue velvet, edged with gold, its motto being "*Honi soit qui mal y pense*" ("Evil be to him who evil thinks"); a mantle of blue velvet lined with taffeta, with the star of the order embroidered on the left breast; a hood and surcoat of crimson velvet, and a hat of black velvet; a collar of gold weighing thirty ounces, and the star with the cross of St. George in the centre, encircled by the Garter. The following is a full list, the date of creation being prefixed in each case:—

#### THE SOVEREIGN.

- 1901. H.M. Queen Alexandra (Lady of the Order).
- 1884. Wales, H.R.H. the Prince of.
- 1867. Connaught, H.R.H. the Duke of.
- 1902. Connaught, H.R.H. Prince Arthur of.
- 1878. Cumberland, H.R.H. the Duke of.
- 1902. Saxe-Coburg, Duke of (Duke of Albany).

- 1902. Aosta, the Duke of.
- 1867. Austria, the Emperor of.
- 1902. Austria, Archduke Francis of.
- 1866. Belgians, the King of the.
- 1865. Denmark, the King of.
- 1896. Denmark, the Crown Prince of.

- 1864. Spencer, Earl.
- 1902. Sutherland, Duke of.
- 1902. Wellington, Duke of.

Prelate, The Bishop of Winchester.  
 Chancellor, The Bishop of Oxford.  
 Registrar, The Dean of Windsor.  
 Garter Principal King of Arms, Sir Alfred S. Scott-Gatty.

Gentleman Usher of the Black Rod, Admiral Sir Henry F. Stephenson, G.C.V.O., K.C.B.

**Garter King of Arms.** The holder of this office of dignity and historic interest is, within the College of Arms, above all other officers. His powers include the adjustment of arms in England and Wales, and the power of granting arms under the authority of the Earl Marshal in conjunction with the provincial Kings of Arms, according to their several jurisdictions, to persons qualified to bear them, and the creation of arms, crests, cognisances, and devices, as well as the power and authority to grant armorial bearings. He has, under the Earl Marshal, the regulation of the proceedings at State ceremonies, and the guidance of coronations; and he controls and manages all matters concerning the Order of the Garter. At the commencement of every Session he lays on the table of the House of Lords the roll of the lords temporal, and he assists at the introduction of all newly created peers (see PARLIAMENT). The present holder of the office, Sir Alfred S. Scott-Gatty, is a son of the late Rev. Alfred Gatty, D.D., was b. in '47, ed. at Marlborough and Christ's College, Cambridge,

became Rouge Dragon Pursuivant of Arms '80, York Herald of the College of Arms '86, and Acting Registrar of the College '99. He is well known as a composer, and succeeded the late Sir A. W. Woods as Garter Principal King of Arms, April 21st, 1904. Office, The College of Arms, Queen Victoria Street, E.C.

### **The Most Ancient and Most Noble Order of the Thistle.**

Originally established in 1540, and remodelled in 1687, and again in Queen Anne's reign (1703). It was by the statute of 1827 declared that this Order should consist of the Sovereign and 16 knights. Its abbreviation is K.T., and the badge, the Gold St. Andrew, is suspended from a green ribbon; motto, *Nemo me impune lacessit*. The following is a list of the Knights of the Order:—

#### **The Sovereign.**

Prince of Wales. D. of Connaught.

D. of Argyll.	E. of Home.
D. of Athole.	M. of Zetland.
E. of Southesk.	M. of Tweeddale.
D. of Buccleuch.	M. of Linlithgow.
D. of Montrose.	L. Balfour of Burleigh.
D. of Fife.	E. of Errol.
E. of Crawford and	D. of Roxburghe.
Balcarras.	E. of Haddington.
E. of Rosebery.	

Dean, Very Rev. James Cameron Lees, D.D.  
Secretary, Sir Duncan Alexander Dundas Campbell, Bart.

Lyon King of Arms, Sir J. Balfour Paul.  
Gentleman Usher of the Green Rod, Hon. Alan David Murray.

### **The Most Illustrious Order of St. Patrick.**

Established in 1783 by George III., and is to consist of the Sovereign, a Grand Master, who is the Lord-Lieutenant of Ireland for the time being, and 22 Knights. Its abbreviation is K.P.; its badge is suspended from a sky-blue ribbon, with motto *Quis separabit?* There are, at present, 27 K.P.s, including the sovereign and princes of the blood, and subjoined is a list of them:—

#### **The Sovereign.**

The Prince of Wales.	Earl of Kilmorey.
Duke of Connaught.	Earl of Rosse.
Earl of Gosford.	Lord Iveagh.
Earl of Kenmare.	Earl Roberts.
Earl of Listowel.	Earl of Lucan.
Earl of Dunraven.	Earl of Bandon.
Earl of Carysfort.	Lord Clonbrock.
Earl of Howth.	Earl of Longford.
Lord Monteagle.	Marquess of Waterford.
Viscount Wolsley.	Earl of Enniskillen.
Marquess of Ormonde.	Lord De Ros.
Earl of Erne.	Earl of Mayo.

Grand Master, The Lord-Lieutenant of Ireland.  
Chancellor, The Chief Secretary for Ireland.

Ulster King of Arms and Registrar, Sir Arthur E. Vicars, C.V.O.

Secretary, G. Francis W. Lambart; Genealogist, H. Farnham Burke.

Usher of the Black Rod, Col. Viscount Charlemont, C.B.

### **The Most Honourable Order of the Bath.**

Originally established by King Henry IV. at his coronation, 1399, this order fell into neglect in the seventeenth century, but was revived in 1725, under George I. It was remodelled by the Prince Regent in 1815, to commemorate the auspicious termination of the long and arduous contest in which the empire had been engaged, and was further enlarged in 1845, and now has three classes:—

G.C.B. . Knight Grand Cross Bath.

K.C.B. . Knight Commander Bath.

C.B. . Companion Bath.

Members of the first two classes, being knights, are, after knighthood, entitled to the prefix "Sir." The G.C.B.'s are not to exceed 55 for military service, exclusive of the sovereign and princes of the blood, and those distinguished foreigners upon whom may be conferred the honorary dignity, and 27 for the civil service; of the second class there may not be more than 145 for military and 100 for the civil service, excluding those admitted as honorary members, and except in certain special circumstances when there is power to increase the numbers. Of Companions there may be 988, of whom 705 may be for military and 283 for civil service. An officer must have received a medal or some similar honour, or have been specially mentioned in despatches for distinguished service in action before he can be nominated. The badge is suspended by a crimson ribbon, with motto *Tria juncta in uno* (Three joined in one).

Dean, The Dean of Westminster.

Registrar and Secretary,

Bath King of Arms, Sir Spencer C. B. Ponsonby-Fane, G.C.B., I.S.O.

Gentleman Usher of the Scarlet Rod, Charles George Barrington, C.B.

### **The Most Exalted Order of the Star of India.**

Established by letters patent in 1861 and enlarged in '66 and '78. Its badge is worn pendent from a light-blue ribbon with white stripes edgewards; motto, "Heaven's Light our Guide." It consists of the Sovereign, a Grand Master, who is the Viceroy of India for the time being, and three classes of members:—

G.C.S.I. . Knight Grand Commander.

K.C.S.I. . Knight Commander.

C.S.I. . Companion.

Members of the first two classes, being Knights, are entitled to the prefix "Sir." Of the first class there may be 36, of the second class 85, and of the third (or Companions) 170; but extra and honorary members may, and have been, from time to time appointed.

Registrar, Major-Gen. Sir Arthur Ellis, G.C.V.O., C.S.I.

Secretary, The Foreign Secretary to the Government of India.

### **The Most Distinguished Order of St. Michael and St. George.**

Instituted in 1818, and is the order to which subjects of His Majesty who have taken a distinguished part in colonial and foreign affairs are generally admitted. It consists of the Sovereign, a Grand Master, and three classes of members:—

G.C.M.G. . . . Knight Grand Cross.  
K.C.M.G. . . . Knight Commander.  
C.M.G. . . . Companion.

Members of the first two classes, being Knights, are entitled to the prefix "Sir." The first class now consists of 100 members, exclusive of honorary members and princes of the blood, the second of 300, and the third of 600 members.

The motto of the Order is *Auspiciis melioris avi*.

Secretary, Sir M. F. Ommannay, G.C.M.G., K.C.B., I.S.O.

Office of Arms, Sir W. A. Baillie Hamilton, K.C.M.G., C.B.

### **The Most Eminent Order of the Indian Empire,**

Instituted in 1878 to commemorate the proclamation of H.M. Queen Victoria as Empress of India, and enlarged in '86, and in the Jubilee year, as a means of rewarding those whose services to the Indian Empire have merited the Imperial favour. This order consists of the Sovereign, a Grand Master, who is the Viceroy of India for the time being, and of three classes of members—viz., Knights Grand Commanders (G.C.I.E.), Knights Commanders (K.C.I.E.), and Companions (C.I.E.). Only the two first of these, being knights, are entitled to the prefix "Sir." The motto of the order is *Imperatricis Auspiciis*.

Secretary, The Foreign Secretary to the Government of India.

### **The Imperial Order of the Crown of India.**

Instituted Jan. 1st, 1878, and consists of the Sovereign and such as the Sovereign may think fit to appoint of the Princesses of His Majesty's Royal and Imperial House; the wives and female relatives of Indian Princes; and the wives or other female relatives of any of the persons who have held, now hold, or may hereafter hold, the offices of Viceroy and Governor-General of India, Governors of Madras or Bombay, Principal Secretary of State for India or Commander-in-Chief in India.

Registrar, Major-Gen. Sir Arthur Ellis, G.C.V.O., C.S.I., Comptroller of the Lord Chamberlain's Department.

### **The Royal Victorian Order**

was created and instituted by H.M. Queen Victoria by letters patent under the Great Seal, April '96. Those admitted to the order are to be British subjects who may have rendered important or personal services to the Sovereign; or foreigners upon whom His Majesty may think fit to confer the distinction, and who are to rank as honorary members. Members of the order are divided into five classes:—

Knights Grand Cross . . . . G.C.V.O.  
Knights Commanders . . . . K.C.V.O.  
Commanders . . . . . C.V.O.  
Members of the Fourth Class  
Members of the Fifth Class

Members of the first and second classes receive the honour of knighthood. The first three classes rank after the corresponding classes of the Order of the Indian Empire.

Chancellor, The Lord Chamberlain for the time being.

Secretary, The Keeper of His Majesty's Privy Purse for the time being.

### **The Order of Merit.**

Created by King Edward VII. on June 26th, 1902. It is designed to include British subjects who have won conspicuous distinction in the naval and military services, or in letters, art and science. The badge of the Order consists of a cross of red and blue enamel of eight points, having the words "For Merit" in gold letters within a laurel wreath on a blue enamel centre. The reverse of the badge shows the King's Royal and Imperial cipher in gold, and the whole is surmounted by the Imperial Crown enamelled in colour, and suspended by a ribbon of Garter blue and crimson. The members of the Order are:—

Admiral Sir E. H. Seymour.

Earl Roberts.

Lord Kelvin.

Lord Lister.

Lord Rayleigh.

Sir W. Huggins.

The Rt. Hon. J. Morley.

Viscount Kitchener.

Viscount Wolseley.

### **The Distinguished Service Order.**

Instituted by H.M. Queen Victoria, who, holding that the means of adequately rewarding the distinguished services of officers in the naval and military services who had been honourably mentioned in despatches were limited, instituted and created for the purpose of rewarding individual instances of meritorious and distinguished service in war a new naval and military Order of distinction. The statutes of the Order were issued from the War Office on Nov. 6th, '86. Foreign officers who have been associated in naval and military operations with our forces are eligible to be honorary members; and the Order ranks next to the Fourth Class of the Royal Victorian Order. The badge, which consists of a gold cross, enamelled white, edged gold, having on one side thereof in the centre, within a wreath of laurel enamelled green, the Imperial Crown in gold upon a red enamelled ground, and on the reverse, within a similar wreath and on a similar red ground, the Royal Cypher E.R. VII., is to be suspended from the left breast by a red riband edged blue of one inch in width.

Secretary and Registrar, F. A. Bayly, War Office.

## **KNIGHTHOODS AND OTHER HONOURS CONFERRED, 1904.**

### **Baronetcies conferred.**

Boyle, Edward, Esq., K.C.  
Cayzer, Sir Charles, M.P.

**Deuntzer**, Johan Henrik, President of the Danish Council, and Minister for Foreign Affairs (hon.).  
**von Dobe**, Lieut.-Gen. Wenzel, Freiherr Kotz, Chamberlain to the Emperor of Austria-Hungary (hon.).  
**von Eisendeeher**, Vice-Admiral Charles, German Navy (hon.).  
**Festetics**, H. E. Tassilo, Count (hon.).  
**Gosselin**, Sir Martin Le M. H., K.C.M.G., K.C.V.O., C.B.  
**Kilmansegg**, H.E. Count, Governor of Lower Austria.  
**von Koester**, Admiral Hans, Com.-in-Chief German Navy (hon.).  
**Lascelles**, Sir Frank C., G.C.B., G.C.M.G.  
**Meldahl**, M. Ferdinand, Chamberlain to H.M. the King of Denmark (hon.).  
**Montecuccoli**, Vice-Admiral Rudolf, Count of Austria (hon.).  
**von Neurath**, Constantin, Freiherr, Lord Chamberlain to the King of Wurtemberg (hon.).  
**Oscar**, H.R.H. Prince, of Sweden and Norway (hon.).  
**Prussia**, H.R.H. Prince Augustus William of (hon.).  
**Prussia**, H.R.H. Prince Joachim Francis of (hon.).  
**Prussia**, H.R.H. Prince Oscar Charles of (hon.).  
**Prussia**, H.R.H. Prince William Eitel of (hon.).  
**von Reischach**, H.E. Eck, Baron, Chamberlain to H.M. Queen of Wurtemberg (hon.).  
**Ribeira Grande**, Don José, Comte da, Lord Chamberlain to H.M. the Queen of Portugal (hon.).  
**Richmond and Gordon**, Duke of.  
**von Richthofen**, Baron, German Foreign Minister (hon.).  
**Saint-Quentin**, Major-Gen. Count Bigot de, Comptroller to the Archduke Frederick of Austria (hon.).  
**Schleswig-Holstein**, Sonderburg Glücksburg, H.H. Prince Albert Christian Adolphus Eugene of (hon.).  
**von Seckendorff**, Vice-Admiral Baron, K.C.V.O., of Prussia (hon.).  
**Teck**, H.S.H. Prince Alexander of, K.C.V.O., D.S.O.  
**von Tirpitz**, Admiral Alfred, German Minister of Marine (hon.).  
**Trauttmansdorff-Weinsberg**, H.S.H. Charles, Prince (hon.).  
**Villaca**, Antonio Eduardo, Minister for Foreign Affairs, Portugal (hon.).  
**Weid**, H.S.H. William Adolphus M. C., Hereditary Prince of (hon.).

**K.C.V.O.**

**de Breteuil**, Marquis.  
**Burton**, Michael Arthur, Lord.  
**Collins**, Sir Robert H., K.C.B., Comptroller of the Household of the Duchess of Albany.  
**Danneskjold-Samsøe**, Count Christian Conrad, Director of the Royal Theatre, Copenhagen (hon.).  
**Fischel**, Rear-Admiral German Navy (hon.).

**Fitz-George**, Colonel Augustus C. F., C.B. (with knighthood).  
**Fitz-George**, Rear-Admiral Adolphus A. F., C.V.O. (with knighthood).  
**Goschen**, Sir W. E., K.C.M.G., British Minister at Copenhagen (hon.).  
**Gough**, Viscount, British Minister to Saxon / and Chargé d'Affaires at the Court of Waldeck and Pyrmont.  
**Habrida**, Colonel, Commr. Vienna Police.  
**Hardinge**, Sir Charles, K.C.M.G., C.V.O., C.B., H.M. Ambassador at St. Petersburg.  
**Hart**, Major-Gen. Sir Reginald C., V.C., K.C.B.  
**Krag Juel Vind Frijs**, Count Julius Benedictus, Acting Master of the Horse to H.M. the King of Denmark (hon.).  
**Krag Juel Vind Frijs**, Count Magens Christian (hon.).  
**Launceston**, Don Antonio M. de, Physician to the King and Queen of Portugal (hon.).  
**Lane**, Major-Gen. Ronald B., C.V.O., C.B.  
**du Lau**, Marquis.  
**Leach**, Major-Gen. J., commanding the Woolwich district.  
**Lemvig**, Colonel, commanding Danish Life-Guards (hon.).  
**Mensdorf-Ponilly**, Count, C.V.O., aide-de-camp to the Emperor of Austria (hon.).  
**Milne**, Rear-Admiral Sir Berkeley, Bart., A.D.C. (knighted).  
**Oldenburg**, M. Waldemar, Over Präsident of Copenhagen (hon.).  
**Petersen**, M. Eugen, Chief Commr. of Police, Copenhagen (hon.).  
**Savile**, Lord, C.V.O.  
**von Baudissin**, Rear-Admiral Count, German Navy (hon.).  
**von Engelbrechten**, Colonel German Army (hon.).  
**von Röder**, Major-Gen. Karl H. R. Freiherr, of Wurtemberg.  
**de Weede**, Jonkhur Rudolf E. W., Lord Chamberlain to the Queen Mother of the Netherlands (hon.).  
**Williams**, Major-Gen. A. H. W. (with knighthood).

**NEW KNIGHTS.**

**Angier**, Theodore V. S., shipowner.  
**Banerjee**, Dr. Gooroo Dass, lately a Puisne Judge at Calcutta.  
**Barclay**, Thomas.  
**Barham**, G.  
**Baxter**, George W., Dundee.  
**Beachcroft**, Richard M., L.C.C. and chairman Metropolitan Water Board.  
**a Beckett**, A., late Assistant Accountant-General of the Army.  
**Bellamy**, J. A., Plymouth.  
**Bignold**, Arthur, M.P.  
**Bray**, Mr. Justice Reginald More.  
**Brickwood**, John.  
**Bundey**, The Hon. William Henry, late Judge Supreme Court of South Australia.  
**Burkitt**, William Robert, Puisne Judge at Allahabad.  
**Candy**, Edward Townshend, C.S.I. (retired), lately a Puisne Judge at Bombay.  
**Cook**, Henry, Sec. Royal Co. of Archers.  
**Cowley**, The Hon. Alfred Sandlings, Speaker Queensland Legislative Assembly.  
**Dewar**, Prof. James, F.R.S.  
**Donaldson**, George.  
**Doughty**, George, M.P.  
**Dunning**, E. H.  
**Elgar**, Dr. Edward.

**Gatty, Stephen Herbert**, Chief Justice of Gibraltar.  
**Gibb, George S.**  
**Hampson, Alderman R. A.**, Lord Mayor of Liverpool.  
**Hewitt, Thomas, K.C.**  
**Hill, J. E. Gray.**  
**Holman, Constantine.**  
**Horwood, William Henry**, Chief Justice of Newfoundland.  
**Jenkins, George Henry, C.M.G.**, Clerk of the Parliaments, Victoria.  
**Lewis, Walter Llewellyn**, Chief Justice of British Honduras.  
**Major, A.**, late Director Army Contracts.  
**Marriott, Charles H., M.D.**, Leicester.  
**Marzials, F. T., C.B.**, late Accountant-General of the Army.  
**Masson, David Parkes, C.I.E., V.D.**, Lieut.-Col. Commandant 1st Punjab Vol. Rifle Corps, and member Legislative Council of the Punjab.  
**McCrath, J. T.**, Nottingham.  
**McNeill, Malcolm, C.B.**, Vice-President Local Govt. Board, Scotland.  
**Monro, Capt. David**, late Inspector of Constabulary for Scotland.  
**Murphy, Shirley F., M.D.**, Medical Officer L.C.C.  
**Perry, Major Allan, M.D.**, Ceylon.  
**Pilkington, W. H.**  
**Pink, Thomas.**  
**Plummer, Walter, M.P.**  
**Riddell, A. O.**  
**Rogers, Alderman Hallewell**, Lord Mayor of Birmingham.  
**Sawyer, W. P.**  
**Scott, Benjamin.**  
**Scott-Gatty, Alfred Scott, C.V.O.**, Garter King of Arms.  
**Sinclair, Prof. W. J.**, Manchester Univ.  
**Stephen, Matthew Henry**, late Acting Chief Justice Supreme Court of New South Wales.  
**Stern, E.**  
**Stevenson, T., M.D.**, Scientific Analyst to the Home Office.  
**Swan, Dr. J. Wilson, F.R.S.**  
**Tanner, H.**, Office of Works.  
**Thomas, Griffith**, Mayor of Swansea.  
**Warrington, Mr. Justice Thomas Rolls.**  
**Webb, Aston, R.A.**, designer Victoria Memorial.  
**Williams, T. Marchant.**  
**Wise, W. Lloyd.**

**Koch, Dr. Robert**, the eminent bacteriologist, was b. at Klanthal, Hanover, Dec. 11th, 1843, and took his medical degree at Göttingen. His first appointment was that of assistant surgeon in the General Hospital, Hamburg. He began his bacteriological investigations when district surgeon at Wallstein, and in '80 was appointed a member of the Imperial Board of Health. In '82 he discovered means of isolating tubercle bacilli, and produced tuberculosis by inoculating animals. He was then appointed a German Privy Councillor, and was given the direction of the German Cholera Commission which visited India and Egypt. For his services he received a gift of 100,000 marks (£5000). Then, at the request of his Government, he made a scientific expedition to the south of France in connection with cholera, to South Africa to study the cattle plague, rinderpest; to India in connection with bubonic plague, and to East Africa, the Dutch Indies, New Guinea, Italy, and Istria in connection with malaria. In July 1901 Dr. Koch attended the British

Congress on Tuberculosis held in London and presided over by Lord Lister, and read an address on "The Combating of Tuberculosis in the light of the experience gained in the successful combating of other infectious diseases." He received the Harben medal for 1900 (which had only been conferred on three previous recipients), in recognition of his eminent services to medical science and the public health.

**Koerber, Dr. Ernst von**, Austrian Prime Minister, was born at Trient, in Tyrol, Nov. 6th, 1850, of an old family. He received his education at the Theresian Academy at Vienna, and studied law at the Vienna University. Having obtained his LL.D. degree in '72, he entered upon the usual Austrian official career, but in '74 he left the law for the service of the Ministry of Commerce, where in 19 years he rose from the lower rungs to the top of the ladder. He is credited with having, in '75 worked out a complete plan for the nationalisation of all Austrian private railway lines, which since then has been almost entirely carried out. Later on he became the real leader in Austrian commercial and railway affairs. Count Badeni, as Premier, called him into the Home Office, and after that Minister's fall he filled successively the places of Minister of Commerce and Home Secretary in the passing Cabinets of Gautsch and Clary. When the latter found himself unable to repress parliamentary obstruction, in January 1900, Dr. Koerber became Prime Minister, and has since endeavoured, with great patience, and resourcefulness, to arrive at satisfactory settlements of the constitutional difficulties which have confronted him. He introduced and carried the laws necessary for an extensive system of canals between the Danube, Oder, Moldau, and Elbe, and the construction of a second railway line between Vienna and Trieste. He is an excellent speaker, and a convinced adherent of the parliamentary system. In April 1903 he received from the Emperor the Grand Cross of the Order of St. Stephen. His resignation was reported at the end of 1904. See AUSTRIA-HUNGARY, History, 1904.

### KOREA.

A country embracing the peninsula lying between the Yellow Sea and the Sea of Japan, under Yi Hi, who succeeded to the throne in 1864, and assumed the title of Emperor in '97. He was made an Hon. G.C.I.E. in Dec. 1900. The existing dynasty was founded in 1392.

Until '94 China was the suzerain of Korea, and directed her foreign policy. But so many abuses prevailed under this system, that in June '94 Japan stepped in and proposed various reforms, which it was suggested should be jointly carried out by China and Japan. China refused this offer, and eventually hostilities commenced, with the result that the Chinese were driven out of Korea, and a treaty of alliance with Japan was signed in Aug. '94. On the conclusion of the war in '95, China relinquished her suzerainty, and the independence of Korea was acknowledged.

There is a Cabinet consisting of ten Ministers, whose acts must be ratified by the Emperor. For local administration the country is divided into 13 provinces, and these are further divided into 339 districts. The army consists of about 10,000 men. The Chief Commissioner of Customs is a British subject.

Rice, millet, cotton, hemp, and tobacco are grown on the fertile territory skirting the sea, and the people are similar in their habits and customs to the Chinese on the neighbouring mainland. The worship of ancestors is carefully observed, and some educational work is done at Seoul. Gold mining is carried on by an American company, which is working the Wonsan deposits, by British subjects near there, and by German, Japanese and Russian concessionaires. The export of gold has increased from £240,047 in '98 to £516,961 in 1903. Copper, iron, and coal are also found in abundance.

The country is now being opened up by railways. The Seoul and Chemulpo railway, 26½ miles, was taken over by Japan in '99, and trains commenced running on July 8th, 1900. A contract was signed in '98 also for the construction by a Japanese syndicate of a railway between Seoul and Fusan, a distance of 360 miles, at a cost of £2,500,000. In December 1903 the Japanese Government assumed a firmer control of the line, and arranged for its completion during 1904. A Reuter telegram from Tokio stated (Dec. 23rd, 1904) that by Jan. 1st, 1905, trains would be run through from Fusan to Seoul, and the line formally opened. A Government railway between Seoul and Wiju is in progress, and was in December 1904 completed as far as Pingyang; while another line has been laid by the Japanese from Antung, on the western bank of the Ya-lu, to Liao-yang. In March 1905 a line from Seoul to Gensan is to be commenced.

Foreign commerce is carried on at Seoul, the Treaty Ports of Chemulpo, Fusan, Yuensan, Chinnampo, Mokpo, Kunsan, Massampo, Song-chin, and the inland city of Pingyang—the bulk of the trade being with Japan. Wiju and Yongampo were in 1904 opened to foreign trade.

Area about 82,000 sq. m., and population estimated at from 10,000,000 to 16,000,000. Capital, Seoul, pop. 200,000. Imports, 1902, £1,382,351; 1903, £1,859,876, including £590,000 of cotton goods, of which about half were of British origin; exports, 1902, £1,365,995, including £516,961 gold; 1903, £1,524,511, including £557,006 gold. The other chief exports are rice, beans, ginseng, and hides.

British Minister Resident (and Consul-General), Sir John N. Jordan, K.C.M.G., at Seoul.—Vice-Consul, A. H. Lay, at Chemulpo.

Japanese Minister, Mr. Hayashi.

Chief Commissioner of Customs, Mr. McLeavy Brown, C.M.G.

Financial Adviser, Mr. Megata.

Foreign Affairs Adviser, Mr. D. W. Stevens.

Minister in London. Vacant. *Chargé d'Affaires*, Yi Han Eung, 4, Trebovir Road, Earl's Court.

### History, 1904.

In January, in view of the threatening aspect of the Russo-Japanese negotiations, the Korean Minister of Foreign Affairs declared that Korea would maintain strict neutrality in the event of war. The negotiations between the two Powers were broken off (Feb. 5th), and hostilities were commenced with the utmost promptitude and effect by Japan. A force of troops was landed at Chemulpo (8th), and the fleet escorting it sank the Russian cruiser *Yariagi* and the gunboat *Koriets* lying at that

port (9th). The Japanese force marched to Seoul, and at once occupied the town. For full details of the war see RUSSO-JAPANESE WAR.

An Agreement between Japan and Korea was signed (23rd), the English text of which is as follows:—

1. For the purpose of maintaining a permanent and solid friendship between Japan and Korea and firmly establishing peace in the Far East, the Imperial Government of Korea shall place full confidence in the Imperial Government of Japan, and adopt the advice of the latter in regard to improvement in administration.
2. The Japanese Government shall in a spirit of firm friendship ensure the safety and repose of the Imperial Household of Korea.

3. The Japanese Government definitely guarantees the independence and territorial integrity of the Korean Empire.

4. In case the welfare of the Imperial House of Korea or the territorial integrity of Korea is endangered by aggressions of a third Power or internal disturbances, the Japanese Government shall immediately take such necessary measures as circumstances require, and in such case the Korean Government shall give full facilities to promote the action of the Japanese Government. The Japanese Government may for the attainment of the above-mentioned object occupy, when circumstances require it, such places as may be necessary from strategic points of view.

5. The Governments of the two countries shall not in future, without mutual consent, conclude with a third Power such an arrangement as may be contrary to the principles of the present Protocol.

6. Details in connection with the present Protocol shall always be arranged as the circumstances may require between the representative of Japan and the Minister of State for Foreign Affairs of Korea.

On the previous day the Russian Foreign Minister, Count Lamsdorff, sent a protest to the Powers charging Japan with having violated international law by landing troops in Korea before the opening of hostilities, with having attacked the Russian ships at Chemulpo three days before the declaration of war, and with stopping the delivery of telegrams sent to the Russian officers informing them of the rupture of diplomatic relations. The Russian Government also announced that, owing to "Japan's illegal assumption of power in Korea," it would regard all orders and declarations of the Korean Government as invalid. Japan notified the Government that she would build the projected railway line from Seoul to Wi-ju for military purposes immediately. The formal concession was signed (March 10th), and on the same date the treaty between Japan and Korea was published. The Marquis Ito was sent to Seoul on a special mission to advise the Emperor as to the reform of the internal administration of the country, which was at once commenced under Japanese control. The Marquis Ito returned to Tokio (27th). In May the Government issued a decree annulling all treaties and agreements with Russia, including the Ya-lu timber concessions. An agreement with Japan was signed at Seoul (Aug. 22nd), whereby the Government undertook to regulate all matters of national finance and all her foreign relations according to the advice of a Japanese Financial Adviser recommended by Japan, and of a Foreign Diplomatic Adviser also recommended by Japan; also to

consult with the Japanese Government before concluding treaties or conventions with other Powers, or granting concessions to or making contracts with foreigners. Other reforms which are to be brought into effect are the establishment of a proper currency system, a central bank, the reduction of the Korean army to 1000, the discharge of all unnecessary Government officials, the opening of all such posts to all classes of the nation, the remodelling of the educational system, and the improvement of agriculture.

**Kubelik, Johann**, violinist, was b. 1880 at Miehle, near Prague. He received his first musical lessons from his father, a market gardener, and at twelve entered the Prague Conservatoire, where his natural talent, coupled with assiduity, attracted attention. He was very successful at concerts in Austria-Hungary prior to appearing in Feb. 1900 in Berlin with the Philharmonic orchestra. Invited to England by Dr. Richter, he made his *début* at St. James's Hall, June 18th, 1900, in a concerto by Paganini, of the technical difficulties of whose compositions he made light both then and during his subsequent recitals. He made an American tour in 1901-2.

**Kuropatkin, Alexei Nicolaievitch**, was b. March 20th, 1848, and ed. at the First Paul Military School and the Nicolai Academy of the General Staff, passing out with great distinction

in '74. He accompanied the French Foreign Legion on an expedition in Algiers in '75, and then went to Turkestan, where he came into contact with General Skobelev, who in '77 made him his Chief of the Staff. He took part in the the Khokand and Kashgar campaign, and has written a book on "Kashgaria." He served with Skobelev as Chief of the Staff in the Turkish War, and afterwards wrote an account of the campaign. In '82 he reached the rank of General, in '90 he was appointed Commander of the province of Transcaspia, in '97 Commander-in-Chief of the Trans-Caucasus District, and in '98 Minister of War. He visited the Far East in 1903, and on the outbreak of war with Japan was appointed in Feb. 1904 to command the army of Manchuria, while later in the year he was given the command of all the forces there. See RUSSO-JAPANESE WAR.

**Kyrie Society, The**, owes its origin to Miss Miranda Hill, and was formed in 1877. Its work is apportioned between four branches, which undertake, first, to decorate workmen's clubs, hospitals, etc.; second, to preserve open spaces; third, to give music and entertainments to the poor; and fourth, to provide them with literature. **Hon. Secretaries**, Miss Lilian James and C. W. Empson, Esq. **Office**, 2, Manchester Street, W. There are provincial societies at Birmingham, Cheltenham, Dublin, Edinburgh, Glasgow, Leicester, Liverpool and Nottingham.

## L

### THE LABOUR MOVEMENT.

#### Trade Unions.

At the end of 1903 there were 1166 Trade Unions, with a total membership of 1,902,308, a decrease in membership of 1.4 per cent. Over three-fourths of the total membership is found in the building, mining and quarrying, metal, engineering and shipbuilding, and textile trades. During the ten years 1893-1902 the total membership increased by 27 per cent. There were 1,503,298 unionists in 1892, but the number fell to 1,408,486 in 1895, since when it has steadily risen until 1903, when it fell from 1,925,000 to the number given above. **Women Trade Unionists** numbered 120,078 in 1901, a reduction of 3432 since 1900; of these 89.9 per cent. were engaged in the textile trades, especially cotton-spinning and weaving. The membership of the 100 principal unions rose from 902,763 in 1892 to 1,133,640 in 1903. Their average income rose from 32s. 4.3d. per head in 1892 to 36s. 7d. in 1903, the total in the latter year being £2,073,612. Usually a weekly contribution is fixed by the rules, but the income of a trade union varies according to the needs of the organisation, being increased by levies for special purposes; the contributions per member in 1901 ranged from 8s. to 72s. per year. The total outlay of the 100 principal unions in 1903 was £1,895,015, or 33s. 5.5d. per head. These unions spent, in 1903, £172,418, or 9.1 per cent. of total expenditure, on dispute benefit; £504,214, or 26.6 per cent., on unemployed benefit; £791,404, or 41.8 per cent., on other benefits; and £426,979, or 22.5 per cent., on working and other expenses. In the ten

years 1892-1901 the 100 principal unions expended altogether £15,127,629, of which 19.8 per cent. went for working and miscellaneous expenses, 19.4 for dispute benefit, and 60.8 per cent. for other benefits: *i.e.* unemployed, 21.7; sick and accident, 17.9; superannuation, 9.9; funeral, etc., 11.3. At the end of 1901 the 100 principal unions had funds in hand amounting to £4,161,916, or 71s. 8.3d. per head, compared with £1,605,067, or 35s. 10.3d. per head in 1892. The building unions had 44s. 2d. per head; mining and quarrying, 67s. 2d.; metal, engineering, and shipbuilding, 115s. 9d.; textile, 112s. 10d.; clothing, 36s. 3d.; transport, 66s. 8d.; and other unions, 39s. 10d.

In 1903 there were 204 Trades Councils, with 839,110 members, compared with 158 with 708,784 members in 1894. They are local councils formed by delegates from neighbouring trade unions. Their main objects are to exert influence on local politics in parliamentary and municipal elections, and to afford mutual assistance in disputes. There were also, in 1903, 90 Federations of Trade Unions with 1,727,000 members, compared with 117 with 1,066,676 members in 1897. Their constituent members are trade unions, but their objects and their areas vary very much. Building trades federations are mostly formed of allied trades, and are local in character. The metal and printing groups are also mainly federations of several trades, but the mining and textile groups are largely formed of federations of unions within the same trade. Federations of several trades often have a rule providing for the settlement of disputes between the societies who are members by submission of the matter

to the arbitrament of the federation. The Miners' Federation had a membership of 340,000; and the Engineering and Shipbuilding Trades Federation, 240,000.

The General Federation of Trade Unions was founded in '99. In 1903 it had a membership of 403,000. Its income was £31,311; expenditure, £10,723; and its total fund, £98,883. The declared objects of the Federation are to maintain the right of combination, to further conciliation, and to assist workers engaged in disputes when approved by the Executive Committee.

### Trade Union Congress.

The Congress is composed of representatives of trade unions, either working at their trade or paid union officials. Unions may send one delegate for every 2000 members or fraction thereof. Voting on important questions is on the principle of one vote for every 1000 members represented. A Parliamentary Committee of 12 belonging to different unions is elected to look after the interests of the working classes in parliamentary matters and elsewhere, and a paid secretary is also appointed annually. The office of the Parliamentary Committee is in Buckingham St., W.C., and the secretary is Mr. S. Woods.

The 37th annual Congress was held at Leeds on Sept. 5th, 1904, and five following days. The chairman was Mr. R. Bell, M.P., chairman of the Parliamentary Committee and General Secretary of the Amalgamated Society of Railway Servants. There were 159 organisations, with 1,320,432 members, represented by 453 delegates. Though the number of organisations represented was three less than in the previous year, the increase in total membership was due to the fact that the Northumberland Miners' Association was represented this year but not in 1903.

Among the principal industrial subjects on which the Congress passed resolutions were: Restriction of the hours of labour to eight per day for miners and for workpeople generally; certificates of competency for persons in charge of steam engines and boilers; trade unions to undertake industrial assurance; reduction of naturalisation fees to alien workmen; amend-

ment of the law in relation to trade unions and industrial disputes; the appointment of a Minister of Labour; amendment of the Mines Regulation Act, the Factory and Workshops Acts, the Shop Clubs Act, the Workmen's Compensation Acts, and the Truck Acts; reduction of fees for Registrars' certificates of death when required for trade unions; general old-age pensions; the character note system; wages of Government employees; and improved housing accommodation for working people. A resolution in favour of compulsory arbitration in trade disputes was rejected by 869,000 to 383,000 votes. Delegates were received from the National Federation of Labour of the United States, the Co-operative Union, the Labour Representative Committee, and the General Federation of Trade Unions. Two British delegates were appointed to attend the annual conference of the American Federation of Labour in the following December (1904).

The income of the year was £4443 (including a balance of £1751 from previous Congress); expenditure, £2347, leaving a balance of £2096. The 1905 Congress will be held at Hanley.
